G. M. Sc.

——**As Philosopher:** The position of Judah ha-Levi in the domain of Jewish philosophy is parallel to that occupied in Islam by Ghazali, by whom he was influenced (comp. Kaufmann, "Attributenlehre," pp. 119 *et seq.*). Like Ghazali, Judah endeavored to liberate religion from the bondage of the various philosophical systems in which it had been held by his predecessors, Saadia, David ben Marwan al-Mekamez, Gabirol, and Baḥya. In a work written in Arabic and entitled "Kitab al-Ḥujjah wal-Dalil fi Nuṣr al-Din al-Dhalil" (known in the Hebrew translation of Judah ibn Tibbon by the title "Sefer ha-Kuzari," and cited in this article as the "Cuzari"), Judah ha-Levi expounded his views upon the teachings of Judaism, which he defended against the attacks of philosophers, heretics, Karaites, etc.

The work is divided into five essays ("ma'amarim"), and takes the form of a dialogue between the pagan king of the Chazars and a Jew who had been invited to instruct him in the tenets of the Jewish religion. After a short account of the incidents preceding the conversion of the king, and of the conversations of the latter with a philosopher, a Christian, and a Moslem concerning their respective beliefs, the Jew appears on the stage, and by his first statement startles the king; for, instead of giving him proofs of the existence of God, he asserts and explains the miracles performed by Him in favor of the Israelites. The king expresses his astonishment at this exordium, which seems to him incoherent; but the Jew replies that the existence of God, the creation of the world, etc., being taught by religion, do not need any speculative demonstrations. Further, he propounds the principle upon which his religious system is founded; namely, that revealed religion is far superior to natural religion. For the aim of ethical training, which is the object of religion, is not to create in man good intentions, but to cause him to perform good deeds. This aim can not be attained by philosophy, which is undecided as to the nature of good, but can be secured by religious training, which teaches what is good. As science is the sum of all the particles of truth found by successive generations, so religious training is based upon a set of traditions; in other words, history is an important factor in the development of human culture and science.

Main Principle of the "Cuzari."

Now as the Jews are the only depositaries of a written history of the development of the human race from the beginning of the world, the superiority of their traditions can not be denied. No comparison is possible between Jewish culture, which is based upon religious truth, and Greek culture, which is based upon science only; for the wisdom of the Greek philosophers lacked that divine support with which the Prophets were endowed. Had a trustworthy tradition that the world was created out of nothing been known to Aristotle, he would have supported it by at least as strong arguments as those advanced by him to prove the eternity of matter. Belief in the eternity of matter, however, is not absolutely contrary to Jewish religious ideas; for the Biblical narrative of the Creation refers only to the beginning of the human race, and does not preclude the possibility of preexistent matter. Still, relying upon tradition, the Jews believe in "creatio ex nihilo," which theory can be sustained by as powerful arguments as those advanced in favor of the belief in the eternity of matter. The objection that the Absolutely Infinite and Perfect could not have produced imperfect and finite beings, made by the Neoplatonists to the theory of "creatio ex nihilo," is not removed by attributing the existence of all mundane things to the action of nature; for the latter is only a link in the chain of causes having its origin in the First Cause, which is God.

"Creatio ex Nihilo."

Having established that revelation and not speculative philosophy is the only trusty guide to the knowledge of God, the Jew proceeds to demonstrate the superiority of his religion. The preservation of the Israelites in Egypt and in the wilderness, the delivery to them of the Law on Mount Sinai, and their later history are to him so many evident proofs of their superiority. He impresses upon the king the fact that the favor of God can be won only by accomplishing the precepts in all their minutiæ, and that those precepts are binding only on the adherents of Judaism. The question why the Jews only were thus favored with God's instruction is as little worthy of consideration as would be the question why the animals had not been created men. The Jew then shows that the immortality of the soul, resurrection, reward, and punishment are all implied in Scripture and are referred to in Jewish writings.

Superiority of Judaism.

In the second essay Judah enters into a detailed discussion of some of the theological questions hinted at in the preceding one. To these belongs in the first place that of the divine attributes. Judah rejects entirely the doctrine of essential attributes which had been propounded by Saadia and Baḥya. For him there is no difference between essential and other attributes. Either the attribute affirms a quality

Question of Attributes.

in God, in which case essential attributes can not be applied to Him more than can any other, because it is impossible to predicate anything of Him, or the attribute expresses only the negation of the contrary quality, and in that case there is no harm in using any kind of attributes. Accordingly Judah divides all the attributes found in the Bible into three classes: active, relative, and negative, which last class comprises all the essential attributes expressing mere negations.

The question of attributes being closely connected with that of anthropomorphism, Judah enters into a lengthy discussion on this point. Although opposed to the conception of the corporeality of God, as being contrary to Scripture, he would consider it wrong to reject all the sensuous concepts of anthropomorphism, as there is something in these ideas which fills the human soul with the awe of God.

The remainder of the essay comprises dissertations on the following subjects: the excellence of Palestine, the land of prophecy, which is to other countries what the Jews are to other nations; the sacrifices: the arrangement of the Tabernacle, which, according to Judah, symbolizes the human body; the prominent spiritual position occupied by Israel, whose relation to other nations is that of the heart to the limbs; the opposition evinced by Judaism toward asceticism, in virtue of the principle that the favor of God is to be won only by carrying out His precepts, and that these precepts do not command man to subdue the inclinations suggested by the faculties of the soul, but to use them in their due place and proportion; the excellence of the Hebrew language, which, although sharing now the fate of the Jews, is to other languages what the Jews are to other nations and what Palestine is to other lands.

The third essay is devoted to the refutation of the teachings of Karaism and to the history of the development of the oral tradition, the Talmud. Judah ha-Levi shows that there is no means of carrying out the precepts without having recourse to oral tradition; and that such tradition has always existed may be inferred from many passages of the Bible, the very reading of which is dependent upon it, since there were no vowels and accents in the original text.

Names of God.

The fourth essay opens with an analysis of the various names of God found in the Bible. According to Judah, all these names, with the exception of the Tetragrammaton, are attributes expressing the various states of God's activity in the world. The multiplicity of names no more implies a multiplicity in His essence than do the multifarious influences of the rays of the sun on various bodies imply a multiplicity of suns. To the intuitive vision of the prophet the actions proceeding from God appear under the images of the corresponding human actions. Angels are God's messengers; and either they exist for a length of time, or they are created only for special purposes.

From the names of God and the essence of angels Judah passes to his favorite theme and shows that the views of the Prophets are a purer source for a knowledge of God than the teachings of the philosophers. Although he professes great reverence for the "Sefer Yeẓirah," from which he quotes many passages, he hastens to add that the theories of Abraham elucidated therein had been held by the patriarch before God revealed Himself to him. The essay concludes with examples of the astronomical and medical knowledge of the ancient Hebrews.

Arguments Against Philosophy.

The fifth and last essay is devoted to a criticism of the various philosophical systems known at the time of the author. Judah attacks by turns the Aristotelian cosmology, psychology, and metaphysics. To the doctrine of Emanation, based, according to him, upon the Aristotelian cosmological principle that no simple being can produce a compound being, he objects in the form of the following query: "Why did the emanation stop at the lunar sphere? Why should each intelligence think only of itself and of that from which it issued and thus give birth to one emanation, thinking not at all of the preceding intelligences, and thereby losing the power to give birth to many emanations?" He argues against the theory of Aristotle that the soul of man is his thought and that only the soul of the philosopher will be united, after the death of the body, with the active intellect. "Is there," he asks, "any curriculum of the knowledge one has to acquire to win immortality? How is it that the soul of one man differs from that of another? How can one forget a thing once thought of?" and many other questions of the kind. He shows himself especially severe against the Motekallamin, whose arguments on the creation of the world, on God and His unity, he terms dialectic exercises and mere phrases.

However, Judah ha-Levi is against philosophical speculation only in matters concerning Creation, God, etc.; and he follows the Greek philosophers in treating of the genesis of the material world. Thus he admits that every being is made up of matter and form. The movement of the spheres formed the sphere of the elements, from the fusion of which all beings were created. This fusion, which varied according to climate, gave to matter the potentiality to receive from God a variety of forms, from the mineral, which is the lowest in the scale of creation, to man, who is the highest because of his possessing, in addition to the qualities of the mineral, vegetable, and animal, a hylic intellect which is influenced by the active intellect. This hylic intellect, which forms the rational soul, is a spiritual substance and not an accident, and is therefore imperishable.

The discussion concerning the soul and its faculties leads naturally to the question of free will. Judah upholds the doctrine of free will against the Epicureans and the Fatalists, and endeavors to reconcile it with the belief in God's providence and omniscience (see Free Will).

Influence of the "Cuzari."

Although the "Cuzari" failed to stem the philosophical flood which, at the time of the appearance of the work, was inundating Judaism, it exercised a great influence upon the theologians. It was much studied; and traces of it are to be found in all the theological and cabalistic writings of the Middle Ages, not excluding even the Zohar, which borrowed from it several passages, among them the saying, "Israel is among the nations as the heart among the limbs" (Zohar, iii. 221b; comp. Jacob Emden, "Mitpaḥat Sefarim," i., § 5; Jellinek, "Beiträge zur Gesch. der Kabbala," i. 76). Besides the Hebrew translation of Judah ibn Tibbon, which passed through eleven editions (1st ed. Fano, 1506; last ed. by David Cassel, Leipsic, 1869), another rendering into Hebrew was made by Judah ben Isaac Cardinal, at the beginning of the thirteenth century. The study of the "Cuzari" seems to have become very popular in the fifteenth century. No less than six commentaries on it appeared in the first half of that century; namely: three by Solomon ben Menahem Frat Maimon and his two pupils; one by Jacob ben Ḥayyim Vidal Farissol, under the title "Bet Ya'aḳob"; one by Solomon ben Judah Vivas, entitled "Ḥesheḳ Shelomoh"; and one by Nathanael Caspi. In addition to these commentaries, which are still extant in manuscript, there have been published in the various editions of the "Cuzari" the commentaries of Judah Mercato (1589-94), Isaac Satanow (1795), Israel Zamosc (1796), G. Brecher (Prague, 1838), and Israel Halevy (Presburg, 1860). The "Cuzari" was translated into Latin by Buxtorf (1660); into Spanish by Jacob Abendana (1663); and into German by Jolowicz and David Cassel. Another German version, translated from the Arabic original, was published at Breslau in 1885 by Hartwig Hirschfeld, who two years later critically edited the Arabic and Hebrew texts (Leipsic, 1887).

S. Landauer has shown that v., § 12 of the "Cuzari," in which Ḥa-Levi gives the views of the "philosophers" on the soul (2d ed. Cassel, pp. 385–400; ed. Hirschfeld, pp. 310–325), is practically an excerpt from the "Psychology of Ibn Sina" (Avicenna) published in part by him ("Z. D. M. G." xxix. 335). Corrections of the Arabic text are given by Goldziher in "Z. D. M. G." xli. 691, of the Hebrew text by Horovitz in "Monatsschrift," xli. 264. In regard to the passage i., § 68 on the eternity of the universe, see the remarks of Kaufmann in "Monatsschrift," xxxiii. 208, and Hirschfeld, *ib.* p. 374. Portions of the Arabic text have been published by Neubauer in "Miscellany of Hebrew Literature," i. 62, and by B. Goldberg in "Ha-Maggid," v. 183.

G. I. BR.

JUDAH HA-LEVI BEN SHALOM (known also under the name **Judan**): Palestinian amora of the fourth generation; flourished in the second half of the fourth century. Few halakot of his are recorded in the Jerusalem Talmud. He appears as the opponent of Hananiah in the question of the fine imposed upon those who illegally make use of tithes (Yer. Ter. 44c; Ket. 27b), and as opposing Mattaniah in a halakic matter (Yer. Shab. 13d; Giṭ. 44b). A question addressed to Jose on the laws of inheritance is given under Judah's name (Dem. 25c), and he is found instructing a Babylonian amora named Phinehas in a question of ritual ('Er. 22d). Judah's activity in the field of the Halakah was rather limited; his name occurs more frequently in midrashic and haggadic literature. Some of his haggadot are very interesting; for instance, that concerning the love of God for men: "When we are worthy and have good actions to our credit, then God gives us our reward; but when we have nothing of our own, then God blesses us for the sake of His love; for He is good" (Midr. Teh. to Ps. lxxii.). Judah is the author also of the following sayings: "Nothing causes more harm than women; the sin of the golden calf caused the death of only 3,000 persons, while that of the women of Shittim caused the death of 24,000. Therefore is it said: 'And I find woman more bitter than death'" (Eccl. vii. 26). "Joseph resisted the enticements of the wife of his master; at the moment of temptation the image of his father appeared to him and said: 'Joseph, the names of thy brothers will at a future time be on the stones of the breastplate; wilt thou be satisfied that thy name should be missing?'" (Tan., Wayesheb, p. 94).

JUDAH LÖB BEN JOSHUA (HÖSCHKE): Rabbi at Busk, Poland (now Austrian Galicia), in the seventeenth century. He was the author of "Leb Aryeh," containing homilies on the Pentateuch and the Five Megillot, published at Wilmersdorf in 1673.

BIBLIOGRAPHY: Steinschneider, *Cat. Bodl.* col. 1333.

S. S. I. BR.

JUDAH LÖB BEN SIMEON, or **LEO SIMONIS**: Rabbi and physician; born at Frankfort-on-the-Main about the middle of the seventeenth century; died at Mayence in 1714. He studied medicine and philosophy in Padua, where in 1674 he obtained the degree of doctor of medicine and of philosophy. About a year after his return to Frankfort, David Claudius of Giessen solicited his collaboration on the Bible which he was about to edit with Latin annotations. The young scholar accepted the offer, and he wrote a preface to the work (Frankfort, 1677).

Judah's medical work did not interfere with his study of the Talmud and the Cabala; so that, owing to his great erudition, he was named "dayyan" of Frankfort. He occupied that office till 1687, when he was called as chief rabbi to Mayence, which office he held for twenty-seven years.

While he was at Mayence he wrote: "Yad Yehudah" (Frankfort-on-the-Main, 1678), a commentary on Menahem Azariah da Fano's "'Asarah Ma'amarot," and "Zera' Yehudah" (Offenbach, 1721), a commentary on the Passover Haggadah. Some responsa of his are to be found in the collection "Shab Ya'aḳob" by Jacob ha-Kohen Poppers of Frankfort-on-the-Main.

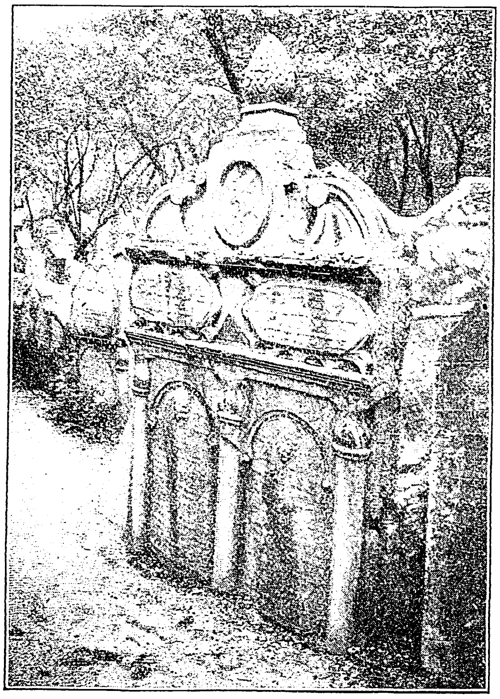
D. M. SEL.

JUDAH LÖW (LÖB, LIWA) BEN BEZALEEL (known also as **Der Hohe Rabbi Löw**): Austrian Talmudist and mathematician; born about the second decade of the sixteenth century in Posen, whither his family had gone from Worms toward the end of the fifteenth century, probably in consequence of persecution; died at Prague Aug. 22, 1609; second son of Bezaleel ben Ḥayyim. His father was the brother of Jacob Worms, the chief rabbi of all the communities of the German empire, and brother-in-law of Isaac Klauber of Posen, whose grandson was Solomon Luria. Löw's elder brother Ḥayyim (see Ḥayyim ben Bezaleel) studied with Shalom Shakna. Löw had also younger brothers named Sinai and Samson, who enjoyed reputations as scholars.

His Takkanot.

As Löw never speaks of himself in his books, little is known concerning his life. The assumption that he was Shakna's pupil is disproved not only on the ground of chronological difficulties, but also by his positive attitude in denouncing the pilpul, in which Shakna indulged so much. From 1553 to 1573 Löw was Moravian "Landesrabbiner" at Nikolsburg, an office by virtue of which he directed not only the affairs of the community, but especially the study of the Talmud. He caused a collection to be made of the Moravian statutes ("taḳḳanot") concerning the election of the county and district elders, taxation, and the restraint of luxury, with the purpose of supplementing and confirming them. The Moravian communities considered him an authority, even long after he had given up his office—perhaps in consequence of the persecution of the Jews in Moravia—and had settled in Prague. As such he was appealed to when the "Nadler" calumny was carried into Moravia, in consequence of which his own family suffered and against which he himself had delivered a warning discourse on the Sabbath between Rosh ha-Shanah and Yom Kippur, 1583 (printed Prague, 1584). "Nadler" (or rather "Nudler": comp. Grimm, "Wörterbuch") was an opprobrious epithet that cast a slur upon the legitimacy of many families.



Tombstone of Judah Löw ben Bezaleel at Prague.
(From a photograph.)

Löw had undertaken to deliver the discourse because a short time previously the death of Isaac Melnik had left the chief rabbinate of Prague vacant. At the time Löw occupied a semiofficial position. He had founded the "Klaus," a Talmud school which he conducted until 1584, and he had also rendered great services to the community of Prague by regulating the statutes of the ḥebra ḳaddisha, founded in 1564, and by organizing mishnayot societies. Yet he was passed over in the election, his brother-in-law Isaac Ḥayyot, an adherent of the pilpul, being chosen chief rabbi of Prague. Löw then gladly accepted the call of his native community, Posen. In 1588, however, he was again in Prague. He was drawn thither not only by family ties (his wife belonging to the eminent Altschuler family, and his daughters being married in that city), but also by the fact that Isaac Ḥayyot had resigned his office. For a second time Löw accepted the position of rabbi. At this date (1588) he renewed and enlarged the scope of the ban which he, together with ten scholars of Prague, had pronounced in 1583 against the "Nadler" calumny. On the present occasion he acted in conjunction with Eleazar of Worms at Posen, and Mordecai Jaffe, Isaac Cohen Shapira, Joseph b. Isaac ha-Levi Günzburg, and Uri Lipman Ḥefeẓ at Gnesen. On the tenth of Adar, 5352 (Feb. 23, 1592), Löw was commanded to appear before the emperor in the castle. He went to the audience accompanied by his brother Sinai and his son-in-law Isaac Cohen; and Prince Bertier was present with the emperor. The conversation seems to have turned on cabalistic subjects.

In the same year (but it can not be proved whether it was in consequence of the audience) Löw went back to Posen, where he had been chosen chief rabbi of Poland. Here he wrote a work on the ethics of Judaism, "Netibot Shalom" (Prague, 1596), as the second part of his Abot commentary "Derek ha-Ḥayyim" (Cracow, 1589). In Prague were also printed in 1593 two discourses he had delivered in Posen, "'Al ha-Miẓwot" and "'Al ha-Torah wa-'Abodah." In the "Pesaḳ 'al 'Agunah" (*ib.* 1594) there is a responsum by Löw. In this work Löw is called "chief rabbi of Prague"; and indeed he became chief rabbi de jure, probably after the death of Isaac Ḥayyot (1597).

His Works.

At Prague Löw wrote between 1598 and 1600 the following works: (1) "Tif'eret Yisrael" (Venice, 1599), on the excellence of the teachers of the Torah; (2) "Neẓaḥ Yisrael" (Prague, 1599), on the Exile and the Messianic time; (3) "Be'er ha-Golah," on difficult Talmudic passages, being at the same time a defense of the Talmud (*ib.* 1598); (4) "Or Ḥadash" (*ib.* 1600), on Esther and Purim; (5) "Ner Miẓwah" (*ib.*), on Ḥanukkah. There was also printed at Prague (1598) the funeral sermon preached by Löw on the death of Akiba Günzburg of Frankfort. Löw was specially active as the friend and counselor of the noble Mordecai Meisel. After suffering much at Prague from external oppression and internal quarrels, he now stood as the center of the rapidly rising community.

Löw was held in high regard by his contemporaries as well as by posterity. He is praised as the "glory of the Exile," the "light of Israel" (Gans), "the wonder of our time, in whose light our coreligionists walk, and whose waters all Israel drinks." His person even has become the center of a whole cycle of legends (see Golem), which are closely related to the Faust legends and were due probably to his ascetic, pious, retired life, to his profound knowledge, and not a little to his mysterious audience with Emperor Rudolph II.

Yet he was not among the champions of the Cabala, and none of his works is devoted to it. Although he could not reconcile himself to the investigations of Azariah dei Rossi, and understood all the utterances of the Haggadah literally, yet he was entirely in favor of scientific research in so far as the latter did not contradict divine revelation.

In addition to those of Löw's works mentioned above, the following have appeared: "Gur Aryeh" (Prague, 1578), commentary to Rashi on the Pentateuch; "Geburat ha-Shem" (Cracow, 1582), on the Pesaḥ Haggadah; discourse for Shabbat ha-Gadol (Prague, 1589). The following manuscripts are extant: "Bi'ure Yoreh De'ah," printed 1775; "Ḥiddushe Aggadot"; "Bi'urim 'al Dine Mezuzah, Ketibat Megillah, Kele ha-Ḳodesh, Bigde Kehunnah we-Sammane ha-Ḳeṭoret"; "Bi'urim 'al ha-Rif u-Mardekai."

JUDAH LÖW BEN OBADIAH EILENBURG: Russian rabbi of the sixteenth century; succeeded Naphtali Herz as rabbi of Brest-Litovsk about 1570. His signature appears in the "taḳḳanot" (ordinances) passed by the Council of Four Lands at the Gromnitca fair at Lublin (1587), with those of Solomon of Lublin, Joshua Falk, Samuel Edels, and other prominent rabbis. These taḳḳanot prohibit, among other things, the purchase of rabbinical positions or the securing of such positions through influence. Judah is the author of "Minḥat Yehudah," a supercommentary on Rashi to the Pentateuch (Lublin, 1609; Prague, 1678; etc.). With Judah's own explanations the work contains extracts from Solomon Luria, from Mordecai Jaffe's "Lebush ha-Orah," and from Elijah b. Abraham's "Mizraḥi."

Bibliography: Feinstein, *'Ir Tehillah*, pp. 23, 160, 165, 186, 191; Benjacob, *Oẓar ha-Sefarim*, p. 341.

H. R.

JUDAH BEN MEÏR HA-KOHEN HA-ZAḲEN: French Talmudist; lived about the year 1000. According to the sources, he was surnamed "Léon," "Léonṭe," "Léonṭin," "Sire Léon," and "Sire Léonṭin," and was designated as "the grand" and "the gaon." He was the principal teacher of Gershom ben Judah (Me'or ha-Golah), who considered him an authority in religious decisions. Judah seems to have been one of the founders of the scientific study of the Talmud in France. He, together with Eliezer ben Judah, addressed a teshubah to the Jewish community of Troyes concerning the validity of certain statutes.

S. S. M. Sc.

JUDAH BEN MENAHEM: Italian liturgical poet; lived, probably at Rome, in the middle of the twelfth century; father of the Roman dayyan Menahem ben Judah. He was the author of fourteen piyyuṭim, of which some are to be found in the printed Roman Maḥzor, and some are still in manuscript.

Bibliography: Zunz, *Literaturgesch.* pp. 140 *et seq.*; Landshuth, *'Ammude ha-'Abodah*, p. 68; Luzzatto, *Mebo*, p. 21; Vogelstein and Rieger, *Gesch. der Juden in Rom*, i. 368.

G. I. Br.

JUDAH MINZ. See Minz, Judah.

JUDAH BEN MOSES OF ARLES: A scholar of the second half of the eleventh century who enjoyed a great reputation and authority not only in France, but throughout the Rhine districts. One of Rashi's contemporaries, Nathan b. Makir of Mayence, mentions him as among "the venerable ones" and "the most respected" of Mayence (Zunz, "Literaturgeschichte," p. 160).

E. C. S. K.

JUDAH BEN MOSES B. DANIEL. See Romano, Leone.

JUDAH BEN NATHANAEL: French liturgical poet; lived at Beaucaire in the first quarter of the thirteenth century. Al-Ḥarizi, who became acquainted with him about 1211, praises him highly. Judah had five sons: Samuel, Ezra, Isaac, Isaiah, and Nathanael, all of whom were liturgical poets. The eldest, Samuel, was the author of "Ḳerobot," inserted in the Avignon ritual and recited on the fast-day of Ṭebet; the third son, Isaac, surnamed "ha-Sheniri" (השנירי), whose songs "made the stars pale," lived at Malaucene, and composed piyyuṭim for the different festivals of the year, many of which are preserved in the Siddur of Avignon and Carpentras.

Bibliography: Zunz, *Z. G.* pp. 466, 469; idem, *Literaturgesch.* pp. 472-475.

G. S. K.

JUDAH B. PEDAYA (known also as **Bar Padah**): Palestinian amora of the first generation (3d cent.); nephew of Bar Ḳappara. Among his numerous pupils the most important was the haggadist Joshua b. Levi, who claimed to have received numerous halakot from Judah (Ex. R. vi.; Eccl. R. vii. 7). According to another statement of Joshua b. Levi (Gen. R. xciv.), Judah was the most important of the haggadists of the South, and discussed Talmudic questions with the patriarch Judah I. His halakic and haggadic sayings are numerous in both Talmuds (Weiss, "Dor," iii. 63). In his haggadic interpretations he often departs from the traditional vocalization. Thus, in Gen. R. (to Gen. xix. 12), he reads "pe" instead of "po," and supposes that the angels forbade Lot to entreat forgiveness for the people of Sodom after they had manifested their shameful desires (Gen. R. xxvi.).

E. C. A. S. W.

JUDAH POKI (PUKI) BEN ELIEZER TSHELEBI: Karaite scholar; lived at Constantinople; died before 1501; nephew of Elijah Bashyazi. According to Steinschneider, the surname "Poki" is a variation of "Bagi," which is derived from the Turkish "bak" (pronounced "bag"). Judah traveled through Palestine, Egypt, Babylonia, and Persia to acquaint himself with the Karaite writings found in those countries. In 1571 he is met with in Cairo in the house of the Karaite Nasi. Judah wrote "Sha'ar Yehudah," a discussion of the laws concerning incestuous marriages (published by his son Isaac at Constantinople in 1581). The author quotes in this work another work of his: "Zot li-Yehudah," on the determination of the new moon. Jedidiah Solomon ben Aaron of Trok cites in his "Appiryon" a prayer-book composed by Judah, and other works dealing with Hebrew grammar and poetry.

JUDAH B. SAMUEL IBN 'ABBAS. See 'Abbas, Judah ben Samuel ben.

JUDAH BEN SAMUEL HE-ḤASID OF REGENSBURG: Ethical writer and mystic; died Feb. 22, 1217 ("Oẓar Ṭob," 1878, p. 045; Berliner, "Magazin," 1876, p. 220; "Kerem Ḥemed," vii. 71 [erroneously 1216]; "Ben Chananja," iv. 248 [erroneously 1213]). He was descended from an old family of cabalists from the East that had settled in Germany. His grandfather Kalonymus was a scholar and parnas in Speyer (died 1126). His father, also called "He-Ḥasid" (= "the pious"), "Ha-Ḳadosh," and "Ha-Nabi" (Solomon Luria, Responsa, No. 29), was president of a bet ha-midrash in Speyer, and from him Judah, together with his brother Abraham, received his early instruction. Samuel (see A. Epstein in "Ha-Goren," iv. 81 *et seq.*) died while Judah was still young (*idem*, "Jüdische Altertümer in Worms und Speier," in "Monatsschrift," xli. 41, 42). About 1195 the latter left his native place and settled in Regensburg (Ratisbon), on account of an "accident" (Moses Minz, Responsa, No. 76)—most probably persecution experienced by the Jews of Speyer generally.

He founded a yeshibah in Regensburg and secured many pupils. Among those who became famous were Eleazar of Worms, author of the "Roḳeaḥ"; Isaac ben Moses of Vienna, author of "Or Zarua'"; and Baruch ben Samuel of Mayence, author of "Sefer ha-Ḥokmah." Eleazar applies to his teacher in several passages terms expressive of the highest esteem, such as "father of wisdom" (Paris MS. No. 772. fol. 73a; comp. Epstein in "Monatsschrift," xxxix. 459).

Judah left one son, Moses Saltman (Epstein, *l.c.* p. 449, note 7), author of a commentary on several parts of the Bible (see Schiller-Szinessy, "Cat. Hebr. MSS. . . . University Library, Cambridge," p. 159). It has been erroneously supposed that Judah had two other sons, Aaron (Luria, *l.c.*) and David (Steinschneider, "Hebr. Bibl." iv. 98; Gross, in Berliner's "Magazin," i. 106; Brüll's "Jahrb." ix. 45; Epstein, *l.c.*).

Legends of His Life.

Legend describes Judah as an excellent bowman who at the age of eighteen was ignorant of the daily prayers. When, however, enlightenment suddenly came upon him he performed many miracles. He restored fertility to a young married woman. The prophet Elijah is said to have partaken of his "Seder" meal and to have been seen by him in a synagogue. He miraculously prevented a Jewish child from being baptized, and knew the exact year of Israel's redemption. He maintained social intercourse with the Bishop of Salzburg and acted as seer for the Duke of Regensburg (Jellinek, "B. H." vi. 139; Grünbaum, "Jüdisch-Deutsche Chrestomathie," p. 385; Brüll's "Jahrb." ix. 20). The report of such intercourse with persons in official positions may perhaps be based on truth.

Writings.

It is rather difficult to determine in what the new and important departure ascribed to him by legend consisted, since the obscurity spread over his works is as impenetrable as that surrounding his life. The study of the Talmud, especially as it was treated by his contemporaries, seemed to him fruitless. Still, occasionally a halakic writing, "Gan Bosem," is quoted (comp. Zunz, "Z. G." p. 162) as his; a decision of his is found in TaSHBaẒ, § 219 (Zunz, *l.c.* p. 566), in R. Isaac's "Or Zarua'," and in Meïr Rothenburg's collection of responsa (Zunz, "Literaturgesch." p. 298); and he is found in social intercourse with celebrated halakists of his age.

His commentary on the Pentateuch, written down by his pupils after his lectures, is known only by citations in later commentaries (Zunz, "Z. G." p. 76 *et passim*; Luzzatto, "Kerem Ḥemed," vii. 71; "Oẓar Ṭob," 1878, p. 045).

Liturgist.

He composed liturgical songs, but the authenticity of those attributed to him is uncertain. As regards his שיר היחוד (seven parts; the eighth is called שיר הכבוד), printed in Tihingen, 1560 (Steinschneider, "Cat. Bodl." No. 3313), and translated into German in S. Heller's "Die Echten Hebräischen Melodien" (ed. Kaufmann), there is very great divergence of opinion, and the question of its authorship is still undecided. According to Zunz ("Literaturgesch." p. 300), it seems to be genuine, as do also his prayer יבכה דמעתי and his seliḥah אלהים בישראל גדול יחודך. More probably, according to the sources (see "Siddur Hegyon Leb," p. 529, Königsberg, 1845), his father, or a certain Samuel Ḥazzan, who died as a martyr at Erfurt in 1121, composed the "Shir ha-Yiḥud," and Judah himself wrote a commentary on it (Landshuth, "'Ammude ha-'Abodah," p. 77; Epstein, in "Ha-Goren," iv. 98). Several prayers are erroneously attributed to Judah; *e.g.*, Zunz wrongly ascribes to him the alphabetical "teḥinnah" אזכרה יום מותי (Steinschneider, *l.c.*; Landshuth, *l.c.*). He wrote also commentaries on several parts of the daily prayers and on the Maḥzor (Zunz, *l.c.* p. 301; comp. also Epstein, *l.c.* pp. 91, 95 *et seq.*).

Judah collected the notes of travel of his fellow citizen Pethahiah, though incompletely and without any order (Zunz, in Asher's "Itinerary of Benjamin of Tudela," ii. 253). His chief literary work was an ethical and mystical one. Undoubtedly genuine is his "Sefer ha-Kabod," which is mentioned by his pupils. Rather doubtful is the authorship of the ethical will (צואה), printed in 1583 and translated into Judæo-German, Prague, seventeenth to eighteenth century (comp. Moses Brück, "Rabbinische Ceremonialgebräuche in Ihrer Entstehung," pp. 68 *et seq.*, Breslau, 1837; Abrahams, "Ethical Wills," in "J. Q. R." iii. 472). This testament contained regulations regarding the dead (§§ 1-15), the building of houses (§§ 16-21), matrimony (§§ 22-32), prohibited marriages between stepbrothers and stepsisters and between cousins, and various customs and superstitious prescriptions (§§ 33-end).

There are also ascribed to Judah an astrological work, "Gemaṭriot" (Azulai, "Shem ha-Gedolim," ii., No. 27), handed down by his pupils and seen by Azulai, and "Sefer ha-Ḥokmah," on prayers and customs and the writing of scrolls of the Law.

Sefer Ḥasidim.

The principal work, however, with which Judah's name is connected is the "Sefer Ḥasidim" (Bologna, 1538; Basel, 1580, and often reprinted [see Steinschneider, "Cat. Bodl." col. 1320]; published according to De Rossi MS. No. 1133 [which contains many variant readings and represents an older text] in Meḳiẓe Nirdamim collection by Judah Wistinetzki, Berlin, 1891-93). The book contains ethical, ascetic, and mystical sentences, intermingled with elements of German popular belief. It deals (§§ 1-13) with piety (heading, "Shemuel"; so-called "Sefer ha-Yir'ah"); (§§ 14-26), reward and punishment, penitence, the hereafter, etc. (heading, "Sefer ha-Ḥasidim"; so-called "Sefer Teshubah"); (§§ 27-489), authorship of the book, pride, the hereafter and retribution, penitence and sinful desires, fasting and fast-days, suspicion, public mortification, martyrdom, etc. (heading, "Zeh Sefer ha-Ḥasidim"); (§§ 490-638), the Sabbath; (§§ 639-746), tefillin, ẓiẓit, mezuzot, books; (§§ 747-856), the study of the Law; (§§ 857-929), charity; (§§ 930-970), reverence for parents; (§§ 971-1386), piety, worship of God, prayer, visiting the sick, etc.; (§§ 1387-1426), excommunication and oaths; the final paragraphs repeat and amplify upon matter previously discussed.

The "Sefer Ḥasidim" is not a uniform work, nor is it the product of one author. It has been said that Samuel he-Ḥasid is the author of the first twenty-six sections (see ed. Wistinetzki, p. 490, note; Epstein, *l.c.* p. 94). In its present form the book contains, according to Güdemann ("Erziehungswesen," Vienna, 1880, p. 281, note iv.), three revisions of the same original work, of which Judah is undoubtedly the author; and both the contents and language of the book indicate that it originated in Germany. Important additions were made also by Judah's pupil Eleazar Roḳeaḥ (see Epstein, *l.c.* p. 93), for which reason the authorship of the whole work has sometimes been ascribed to him. On account of the fact that collectors and copyists used varying recensions, sometimes the same passage occurs two or three times in different parts of the "Sefer Ḥasidim." Some fragments of other books are inserted (as § 33, Isaac Alfasi's "Halakot"; § 36, Saadia Gaon's "Emunot we-De'ot"; § 431, Yerushalmi Berakot; §§ 30-32, R. Nissim's "Megillat Setarim"). It consists, according to the edition of Basel, of 1,172 paragraphs; according to the last edition, of 1,903. Chosen parts have been translated into German by Zunz, "Z. G." pp. 135-142 (comp. Zunz, "Literaturgesch." p. 299; Grätz, "Gesch." vi. 215). The "Book of the Pious" is an exceedingly rich source for the "Kulturgeschichte" of the Jews in the Middle Ages (see Berliner, "Aus dem Inneren Leben"; Abrahams, "Jewish Life in the Middle Ages"). Judah he-Ḥasid has often been confounded ("Ḳore ha-Dorot," "Shalshelet ha-Ḳabbalah," "Yuḥasin," "Shem ha-Gedolim") with Judah Sir Leon of Paris, who is also called "he-Ḥasid," which is nothing but an honorable title usual in his age. The fact that French words are to be found in the "Book of the Pious" and that it reflects French conditions caused Grätz also to attribute its authorship to Judah Sir Leon he-Ḥasid. But the reasons given by Grätz are not tenable.

Mystic.

The precise importance of Judah ben Samuel it is difficult to determine. Side by side with the official, dogmatic religion of the Church or the Synagogue there has always existed a mysticism dealing more largely and more intimately with the personal relation of the individual to God, which at times was in opposition to the religion of the Synagogue. Judah's mysticism was in such a stage of opposition; he therefore undervalued the study of the Halakah and indulged in marked departures from the accepted religious practises. He endeavored to deepen the feeling of devotion and piety and emphasized the importance of studying the Bible as against studying the Talmud. He deals mystically with prayer, regarding it as more important than study. It was really he who introduced theosophy among the Jews of Germany. The occasional quotations from his "Sefer ha-Kabod" present the salient points of his views. The conception of a personal relation to the Lord was long since felt by Jewish thinkers to be inconsistent with His spiritual nature. Judah and his school, therefore, though not the first ones, distinguished between the Divine Being ("'Eẓem") and the Divine Majesty ("Kabod"). The Divine Being, called also "Ḳedushshah," dwells in the west, invisible to men and angels. The Divine Being is superior to all human perception. When God reveals Himself to men and angels, He appears in the form of the Divine Majesty. The Divine Majesty, then, dwelling in the east and created out of divine fire, holds the divine throne, true to its nature of representing to human eyes the Divine Being. The throne is draped on the south, east, and north, while it is open to the west in order to allow the reflection of the Divine Being dwelling in the west to shine upon it. It is surrounded by the heavenly legions of angels, chanting to the glory of the Creator (Epstein, in "Ha-Ḥoḳer," ii. 37 *et seq.*).

Lacking the philosophic training common among the Spanish Jews—although he was acquainted with Ibn Ezra, Saadia, some of the Karaites, and perhaps Maimonides—Judah did not reduce his mystic-theosophical theories to a system, and they are therefore difficult to survey. His intellectual importance is on the whole not clear (comp. Güdemann, "Gesch." pp. 153 *et seq.*, 167 *et seq.*; Jew. Encyc. iii. 465, *s.v.* Cabala). Zunz ("Z. G." p. 125) says of him: "To vindicate whatever is noble in human endeavors, and the highest aspirations of the Israelite, and to discover the inmost truths alluded to in the Sacred Books, seemed to be the ultimate purpose of a mind in which poetic, moral, and divine qualities were fused."

K. M. Sc.

JUDAH IBN SHABBETHAI (known also as **Judah Levi ben Isaac**): Spanish poet of the end of the twelfth century. He has been identified with the physician Judah b. Isaac of Barcelona, who is praised as a poet by Al-Harizi (ch. 46), but he may also have lived at Burgos. He is a master of the "mosaic" style, and skilfully applies Biblical and Talmudic phrases; his humor is spontaneous. Judah ibn Shabbethai is the author of "Milhemet ha-Hokmah weha-'Osher" and "Minhat Yehudah Sone ha-Nashim." The former work (called also "Melek Rab") is in the style of the "makamah," in rimed prose interspersed with short poems. It was written in 1214, and is addressed to the nasi Todros ha-Levi Abulafia, who is called upon, at the end of the work, to act as judge in a poetical dispute. It appeared at Constantinople in 1543 (?), and was probably printed for the last time as an appendix to Abraham b. Hasdai's "Ben ha-Melek weha-Nazir" (Warsaw, 1894).

"Minhat Yehudah Sone ha-Nashim" (called also "Sefer Zerah" or "Tahkemoni") likewise is written in the style of the makamah. It is a humorous satire on women, and is a much better piece of work than the "Milhemet." It was written in 1218 and dedicated to Abraham al-Fakhkhar (ben ha-Yozer). Like the "Milhemet," it appears to have been first printed at Constantinople, in 1543, the last reprint being in Eliezer Ashkenazi's "Ṭa'am Zekenim" (Frankfort-on-the-Main, 1854).

G. H. B.

JUDAH B. SHENEOR OF EVREUX: French liturgical poet of the thirteenth century. He maintained a correspondence with Jacob b. Solomon of Courson (*c.* 1260). According to Carmoly, he was the brother of Moses and Samuel of Evreux, and lived in Vendeuvre; but Gross rejects this opinion, for Judah followed them a whole generation later, and it can not be positively affirmed even that he was a native of Evreux. Judah composed an elegy of forty-five strophes on the martyrs, opening with the words "Ziyyon halo tish'ali." He is quoted by Aaron ha-Kohen ("Shabbat," § 324). The reference in "Semak" (No. 153) is not to Judah, but to Isaac b. Sheneor.

Bibliography: Zunz, *Z. G.* p. 42; idem, *Literaturgesch.* p. 479; Gross, *Gallia Judaica*, p. 11.

G. I. L.

JUDAH SICILIANO (called also **Al-Sha'ari** [אלשערי]): Italian poet of the fourteenth century. He earned a livelihood by giving lessons in poetry and by writing occasional poems; but none of his poetical productions has been preserved. He composed a riming dictionary, preserved in manuscript at Oxford and Rome (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1530; Michael, "Or ha-Hayyim," No. 1163). Judah became acquainted with Immanuel ben Solomon of Rome by sending him a poem; the latter in his "Mehabberot" (ch. xiii.) highly commends Judah's skill in the use of various meters.

Bibliography: Zunz, *Analekten*, in *G. S.* iii. 184; idem, *Z. G.* p. 516; Vogelstein and Rieger, *Gesch. der Juden in Rom*, i. 327, 389, 434, 445.

G. M. Sc.

JUDAH BEN SIMEON BEN PAZZI (called also **Judah b. Pazzi** and **Judah b. Simon**): Palestinian amora and haggadist of the beginning of the fourth century. He frequently transmits halakic and haggadic aphorisms under the name of his father and of R. Joshua b. Levi, R. Johanan, and Simeon b. Lakish. In his own haggadic maxims Judah frequently employs parables, of which one may be cited: "A wolf broke into the fold and seized a kid. Then came a strange dog which barked at the wolf and fought with him for the kid. Thereupon the wolf said: 'Why dost thou bark at me? Have I taken aught that was thine?' Such a dog was Balak, who opposed the Israelites because they had overcome Sihon and Og" (Yelammedenu, in Yalk., Num. xxii.).

Bibliography: Bacher, *Ag. Pal. Amor.* iii. 160-220.

S. J. Z. L.

JUDAH IBN TIBBON. See Ibn Tibbon, Judah.

JUDAH ZEEB BEN EPHRAIM: Hungarian Talmudist of the seventeenth century; son of Ephraim ben Jacob ha-Kohen, whose home in Ofen he left for Jerusalem in 1685. Judah edited his father's responsa, "Sha'ar Efrayim," published at Prague in 1686. He added some original responsa under the title "Kontres Aharon." He then returned to Jerusalem, whither he had gone on leaving Ofen.

Bibliography: Fuenn, *Kiryah Ne'emanah*, p. 84.

S. S. A. Pe.

JUDAH B. ZIPPORI: Instigator of an uprising against Herod the Great. Shortly before the latter's death two prominent scribes of Jerusalem, one of whom was Judah b. Zippori (Josephus, "Ant." xvii. 6, § 2, has *Σαριφαῖος*; "B. J." i. 33, § 2, has *Σεπφεραῖος*; ed. Niese), thought it a good opportunity to tear down the golden eagle that Herod had placed above the gate of the Temple. They incited the young men of Jerusalem, some of whom were their own pupils, and these, on a false report of Herod's death, cut down the eagle. Thereupon a party of soldiers seized forty of them and took them before the king. They did not deny their deed; and the angry king had the ringleaders, among them the two scribes, burned alive; the remainder he delivered for punishment to his servants, who killed them.

G. S. Kr.

JUDAISM * (’Ιουδαισμὸς): The religion of the Jewish people (II Macc. ii. 21, viii. 1, xiv. 38; Gal. i. 13 = יהדות, Esth. R. iii. 7; comp. מתיהדים, Esth. viii. 17); their system of beliefs and doctrines, rites and customs, as presented in their sacred literature and developed under the influence of the various civilizations with which they have come in contact, widening out into a world-religion affecting many nations and creeds. In reality the name "Judaism" should refer only to the religion of the people of Judea, that is, of the tribe of Judah, the name "Yehudi" (hence "Judean," "Jew") originally designating a member of that tribe. In the course of time, however, the term "Judaism" was applied to the entire Jewish history.

Definition.

A clear and concise definition of Judaism is very difficult to give, for the reason that it is not a religion pure and simple based upon accepted creeds, like Christianity or Buddhism, but is one inseparably connected with the Jewish nation as the depository and guardian of the truths held by it for mankind. Furthermore, it is as a law, or system of laws, given by God on Sinai that Judaism is chiefly represented in Scripture and tradition, the religious doctrines being only implicitly or occasionally stated; wherefore it is frequently asserted that Judaism is a theocracy (Josephus, "Contra Ap." ii. 16), a religious legislation for the Jewish people, but not a religion. The fact is that Judaism is too large and comprehensive a force in history to be defined by a single term or encompassed from one point of view.

Extending over thirty-five centuries of history and over well-nigh all the lands of the civilized globe, Judaism could not always retain the same form and character. Judaism in its formative period, that is, in the patriarchal and prophetic times, differed from exilic and post-exilic Judaism; and rabbinic or pharisaic Judaism again presents a phase quite different from Mosaic Judaism, to which the Sadducees, and afterward to some extent the Karaites, persistently clung. Similarly Judaism in the Diaspora, or Hellenistic Judaism, showed great divergences from that of Palestine. So, too, the mysticism of the Orient produced in Germany and France a different form of Judaism from that inculcated by the Arabic philosophy cultivated by the Jews of Spain. Again, many Jews of modern times more or less systematically discard that form of Judaism fixed by the codes and the casuistry of the Middle Ages, and incline toward a Judaism which they hold more in harmony with the requirements of an age of broader culture and larger aims. Far from having become 1900 years ago a stagnant or dried-up religion, as Christian theology declares, Judaism has ever remained "a river of God full of living waters," which, while running within the river-bed of a single nation, has continued to feed anew the great streams of human civilization. In this light Judaism is presented in the following columns as a historic power varying in various epochs. It is first necessary to state what are the main principles of Judaism in contradistinction to all other religions.

I. The Essence of Judaism: (*a*) Judaism is above all the religion of pure monotheism, the proclamation, propagation, and preservation of which have been the life-purpose and task of the Jewish people. "God is One, and so should Israel be of all nations the one vouching for His pure worship" (Josephus, "Ant." iv. 8, § 5; Ber. 6a, with reference to I Chron. xvii. 20, 21; Deut. vi. 4, xxvi. 17–18; Sifre, Deut. 31; and Sabbath afternoon liturgy: "Attah eḥad"). Judaism is not the mere profession of belief in the unity of God which each Jew is enjoined to make every morning and evening by reciting the Shema‘ ("Ant." iv. 8, § 13; Sifre, Deut. 34; Ber. i. 1 *et seq.*, ii.). It is the guardianship of the pure monotheistic faith; and this implied the intellectual and spiritual elaboration as well as the defense of the same throughout the centuries against all powers and systems of paganism or semi-paganism, and amidst all the struggles and sufferings which such an unyielding and uncompromising attitude of a small minority entailed (see Jew. Encyc. vol. vi., s.v. God).

Unity of God.

Judaism did not begin as an abstract or absolute monotheism arrived at by philosophical speculation and dogmatic in its character. Its God was not selected out of many, and invested with certain attributes to suit the requirements of an age or of a class of thinkers. Judaism at the very outset was a declaration of war against all other gods (Ex. xx. 3). Yhwh, its Only One, from Sinai, spoke at the very birth-hour of Israel, His first-born, the words: "Against all the gods of Egypt I will execute judgment: I am the Lord" (Ex. xii. 12); and to Babylon went forth His word: "The gods that have not made the heavens and the earth, they shall perish from the earth, and from under these heavens." "They are vanity, the work of error" (Jer. x. 10, 15). "All the gods of the nations are things of nought ["elilim"; A. V. "idols"]: but the Lord made the heavens" (Ps. xcvi. 5). The contrast between the living God and everlasting King, the only true God, and the idols worshiped by brutish man (Isa. xliv. 9–19; Jer. x. 8–15; Ps. cxxxv. 16–18) was too striking to allow Judaism to regard heathenism and all its folly otherwise than with sarcastic contempt; while the heathen, on their side, were at a loss to comprehend the Jew worshiping an unseen God and without any images (Tacitus, "Historiæ," ii. 5, 9; Juvenal, xiv. 97). But idolatry, as well as idolaters, was consigned to relentless extermination by Judaism, not so much on account of its intrinsic error as because of the abominable rites connected with it, which led to the degradation and moral depravity of man (Ex. xx. 5; xxiii. 24, 33; Lev. xviii. 24–30; Deut. iv. 24, vii. 2–5, 23; ix. 3; xiv. 16; xx. 17–18). From the days of Moses (Num. xxv. 1) down to the time of Philo and the rabbinic schools (Philo, "De Humanitate"; Döllinger, "Heidenthum und Judenthum," 1857, pp. 682 *et seq.*, 700–718; see also Jubilees, Book of; Sibyllines), pagan cults were steeped in vice and cruelty, rendering them "an abomination" unto "Israel's God, who hateth lewdness" (Sanh. 106a), wherefore rigid intolerance toward every form or snare of idolatry became the characteristic feature of the rabbinical law (*ib.* vii. 6 *et seq.*, x. 4; Maimonides, "Yad," 'Akkum, ii.-vii.; *ib.* Melakim, vi. 4; see Worship, Idol-. Judaism brooks no compromise with polytheism or idolatrous heathenism. Indeed, it enjoins the Jew to give up his life rather than to act disloyally toward his pure monotheistic faith (Dan. iii.; I Macc. i. 63; II Macc. vii.; Sanh. 74a). As soon as the Jewish people were scattered among other nations, and thereby found the opportunity of drawing comparisons between other beliefs and their own, it was inevitable that they should be so impressed with the superiority of their faith as to look forward with perfect confidence to its ultimate triumph, like Abraham, conscious of their mission to proclaim the only God everywhere and to establish His kingdom throughout the earth (Isa. ii. 2, xv., xlvi., xlix.; Zech. viii. 23; Gen. R. xxxix.; see also Propaganda Literature); and this hope for the final victory of pure monotheistic truth over all pagan error found powerful utterance in the daily prayer of the Jew (see 'Alenu), and especially in the solemn New-Year liturgy (see Liturgy).

---

* It is natural that divergent views upon so complex a subject should exist. The following article is frankly written from the standpoint of Reform Judaism. For a presentation of the more conservative aspect of the subject see Religion; Theology.

Universality of God.

However tribal or exclusive the idea of the God of Israel may have been originally, Judaism boldly assumes that its God was the God of man from the very beginning; the Creator of heaven and earth, and the Ruler of the world from eternity to eternity, who brought the Flood upon a wicked generation of men, and who established the earth in righteousness and justice (Gen. i.-x.). In the light of this presentation of facts, idolatry or the worship of other gods is but a rebellious breaking away from the Most High, the King of the Nations, the universal God, besides whom there is no other (Deut. v. 39; Jer. x. 7), and to whom alone all knees must bend in humble adoration (Isa. xlv. 23, lxvi. 23). Judaism, accordingly, has for its sole object the restoration of the pure worship of God throughout the earth (Zech. xiv. 9); the Sinaitic covenant, which rendered Israel "a kingdom of priests among the nations"—itself only a renewal of the covenant made with Abraham and his descendants for all time—having been concluded for the sole purpose of giving back to mankind its God of old, the God of the Noachian covenant, which included all men (Gen. ix. 17, xviii. 18-19; Ex. xix. 3-6; Isa. xlix. 6-8). Surely there is nothing clannish in the God of the Prophets and the Psalmist, who judges all men and nations alike with justice and righteousness (Amos i.-ii., ix. 7; Jer. xxvi.; Ezek. xl.; Ps. xcvi. 13, xcviii. 9; and elsewhere). Judaism's God has through the prophetic, world-wide view become the God of history, and through the Psalms and the prayers of the Ḥasidim the God of the human heart, "the Father," and the "Lover of souls" (Isa. lxiii. 16; see Wisdom, xi. 26, and Abba). Far from departing from this standpoint, Judaism in the time of the Synagogue took the decisive forward step of declaring the Holy Name (see Adonai) ineffable, so as to allow the God of Israel to be known only as "the Lord God." Henceforth without any definite name He stood forth as the world's God without peer.

Spirituality of God.

Judaism at all times protested most emphatically against any infringement of its pure monotheistic doctrine, whether by the dualism of the Gnostic (Sanh. 38a; Gen. R. i.; Eccl. R. iv. 8) or by the Trinitarianism of the Church (see Jew. Encyc. iv. 54, *s.v.* Christianity), never allowing such attributes as justice and pardoning love to divide the Godhead into different powers or personalities. Indeed, every contact with other systems of thought or belief served only to put Judaism on its guard lest the spirituality of God be marred by ascribing to Him human forms. Yet, far from being too transcendental, too remote from mortal man in his need (as Weber, "Jüdische Theologie," 1897, pp. 157 *et seq.*, asserts), Judaism's God "is ever near, nearer than any other help or sympathy can be" (Yer. Ber. ix. 13a); "His very greatness consists in His condescension to man" (Meg. 31a; Lev. R. i., with reference to Ps. cxiii. 6). In fact, "God appears to each according to his capacity or temporary need" (Mek., Beshallaḥ, Shirah, iv.; see Schechter in "J. Q. R." vi. 417-427).

Judaism affirms that God is a spirit, above all limitations of form, the Absolute Being who calls Himself "I am who I am" ("Eheyeh asher Eheyeh"; Ex. iii. 14), the Source of all existence, above all things, independent of all conditions, and without any physical quality. Far, however, from excluding less philosophical views of the Deity, so ardent a Jew as R. Abraham b. David of Posquières contends against Maimonides that he who holds human conceptions of God, such as the cabalists did, is no less a Jew than he who insists on His absolute incorporeality (Haggahot to "Yad," Teshubah, iii. 7). Indeed, the daily prayers of the Jew, from "Adon 'Olam" to the "Shir ha-Yiḥud" of Samuel b. Kalonymus, show a wide range of thought, here of rationalistic and there of mystic character, combining in a singular manner transcendentalism and immanence or pantheism as in no other faith. While the ideas of the various ages and civilizations have thus ever expanded and deepened the conception of God, the principle of unity was ever jealously guarded lest "His glory be given to another" (Isa. xlii. 8; see God).

Ethical Monotheism.

But the most characteristic and essential distinction of Judaism from every other system of belief and thought consists in its ethical monotheism. Not sacrifice, but righteous conduct, is what God desires (Isa. i. 12-17; Amos v. 21-24; Hos. vi. 6; Micah vi. 6-8; Jer. vii. 22; Ps. xl. 7 [A. V. 6], l. 8-13); the whole sacrificial cult being intended only for the spiritual need of man (Pesiḳ. vi. 57, 62; Num. R. xxi.; Lev. R. ii.). Religion's only object is to induce man to walk in the ways of God and to do right (Gen. xix. 19; Deut. x. 12), God Himself being the God of righteousness and holiness, the ideal of moral perfection (Ex. xx. 5-6, xxxiv. 7; Lev. xix. 1; Deut. vii. 9-10). While the pagan gods were "products of fear," it was precisely "the fear of God" which produced in Judaism the conscience, the knowledge of a God within, thus preventing man from sin (Gen. xlii. 18; Ex. xx. 20; Deut. x. 12; Job i. 1). Consequently the history of mankind from the beginning appeared as the work of a moral Ruler of the world, of "the King of the nations of whom all are in awe" (Jer. x. 7; Ps. lxv. 13, xcvi. 10; Dan. ii. 21), in whom power and justice, love and truth are united (Ps. lxxxix. 15 [A. V. 14]). As He spoke to Israel, "Be holy, for I the Lord your God am holy" (Lev. xix. 1, Hebr.), so "He said unto man, Behold the fear of the Lord, that is wisdom; and to depart from evil is understanding" (Job xxviii. 28; comp. Micah vi. 8; Isa. xxxiii. 15; Ps. xv., xxiv. 4: "He hath showed thee, O man, what is good; and what doth the Lord require of thee, but to do justly, and to love mercy, and to walk humbly with thy God?"). Quite characteristic of rabbinical Judaism is the fact that the names used for God are chiefly taken from His ethical attributes: "The world's Righteous One" ("Zaddiḳo shel ‘olam," Gen. R. xlix.; Yoma 37a); "The Merciful One" ("Raḥmana"); and most frequently "The Holy One, blessed be He!" ("ha-Ḳadosh baruk hu"). Before Cain killed his brother, he said: "There is no divine judgment and no Judge" (Targ. Yer. to Gen. iv. 8). "The first question put to man at the Last Judgment will be: 'Didst thou deal honestly with thy fellow man?'" (Shab. 31a; see God).

Unity of the Cosmos.

(*b*) The unity of the world is a corollary of the unity of God. The many gods of heathendom divided the world into many parts and domains, and made it appear as the battle-ground of hostile powers. The One God of the Bible renders earth and heaven, light and darkness, life and death one—a universe ruled by everlasting wisdom and goodness, the work of one great Designer and Ruler who foresees in the beginning what will be in the end, who arranges everything according to His sublime purpose (Gen. i. 1–31; Isa. xlv. 5–7, xlvi. 9–10, lv. 8–9; Ps. civ. 24; Prov. iii. 19, 20; Job xxviii. 24–27, xxxviii.). Therefore God's covenant with the world which He created makes night and day and the seasons of the year maintain their order. He has given earth and heaven and everything therein their laws which they can not transgress (Gen. viii. 22; Jer. xxxiii. 20; Job xxxviii. 33; Ps. civ. 9, cxlviii. 6). At the same time God is ever present in the world watching and sustaining everything (Isa. xl. 28, xli. 4; Ps. civ. 27–30, cxxxix. 16, cxlv. 15–16; see Providence). Every single act of God is part of His wondrous work (Job v. 9, xxxviii.; Ps. lxxvii. 15 [A. V. 14], xcvi. 3). Accordingly all miracles are manifestations of His omnipotence (Gen. xviii. 14; Ex. ix. 16; Num. xvi. 30). The grand conception of an all-controlling Power and Wisdom creating order everywhere, and working after one great design, attainable only upon the basis of Jewish monotheism, finally paved the way for the idea of an empire of law in nature. How far this unity and immutability of the laws of nature, fixed by the will of the Creator, are compatible with miracle is a question the difficulty of which was felt by the rabbis of the Mishnah (Ab. v. 6; and Gen. R. v.). "God at Creation fixed the conditions for certain creatures under which they should change their nature" (the passage was misunderstood by Weber, *l.c.* p. 202, as well as by the medieval Jewish philosophers; see Miracles).

No Power of Evil.

At any rate, Judaism, while insisting upon the unity of God and His government of the world, recognizes alongside of God no principle of evil in creation. God has no counterpart either in the powers of darkness, as the deities of Egypt and Babylon had, or in the power of evil, such as Ahriman in the Zoroastrian religion is, whose demoniacal nature was transferred by the Gnostic and Christian systems to Satan. In the Jewish Scriptures Satan has his place among the angels of heaven, and is bound to execute the will of God, his master (Job i. 7); and though sin and death are occasionally ascribed to him (see Satan), he can seduce and harm only as far as God permits him, and in the end must work for good (B. B. 16a). "God is the Creator of light and darkness, the Maker of peace and of evil" (Isa. xlv. 7). Everything He made was found by Him to be very good (Gen. i. 31); "also death," says R. Meïr (Gen. R. ix.). "What the Merciful does is for the good" (Ber. 60b). Whatever evil befalls man has disciplinary value: it is intended for his higher welfare (Deut. viii. 5; Ps. xciv. 12; Ta‘an. 21a: "Gam zu leṭobah").

Because the Lord saw that the world could not stand to be measured by strict justice, He mingled the quality of mercy with that of justice and created the world with both (Gen. R. xii.). In striking contrast to the pessimistic doctrine that the world is the product of mere chance and full of evil, the Midrash boldly states that the world was (or is) a process of selection and evolution: "God created worlds after worlds until He said, 'This at last pleases Me'" (Gen. R. ix.; see Optimism).

Man as the Son of God.

(*c*) Next to God's unity the most essential and characteristic doctrine of Judaism is that concerning God's relation to man. Heathenism degraded man by making him kneel before brutes and the works of his hand: Judaism declared man to be made in the image of God, the crown and culmination of God's creation, the appointed ruler of the earth, and vicegerent of God (Gen. i. 26, 28). In him as the end of Creation the earthly and the divine are singularly blended. This is the obvious meaning of the childlike Paradise story (Gen. ii.–iii.). The idea is summed up in the Psalmist's words: "Thou hast made him a little lower than godly beings [A. V. "angels"]" ("Elohim"; Ps. viii. 6 [A. V. 5]); "Thou hast made him ruler over the work of Thine hand" (*ib.* verse 7 [6]). This twofold nature of man, half animal, half deity, is frequently alluded to in Job (iv. 17–19, vii. 17, x. 9–12, xxv., xxxii. 8). The original meaning of "The Lord made man in the image of Elohim" is somewhat doubtful, though clearly some kind of "godly beings" is intended (Gen. i. 27, v. 1); the old translators have "angels"; see Book of Jubilees, xv. 27, and Mek., Beshallaḥ, vi.; Ex. R. xxx. 11, xxxii. 1; Gen. R. viii.; and Targ. Yer. to Gen. i. 27; Symmachus and Saadia translate: "God created him in a noble, upright stature" (see Geiger, "Urschrift," pp. 323, 324, 328). However this may be, R. Akiba, as spokesman for Judaism, takes it to signify that man is born free like

God, able to choose between good and evil (Mek., *l.c.*). According to others (see Naḥmanides and Ibn Ezra, *ad loc.*), it is his intelligence which renders him "the image and likeness of God" (Gen. ii. 7; Isa. xlii. 5; Ps. civ. 29; Prov. xx. 27; Job xxxii. 8; Eccl. xii. 7). At any rate, it is the affinity of the human soul to God which is expressed in the words "image of God." The Rabbis say, "He is made for two worlds: the world that now is, and the world to come" (Gen. R. viii.; Tan., Emor, ed. Buber, p. 21).

The body makes man cherish sensual desires, and thus incline to sin (Gen. vi. 3-5, viii. 21; see Yeẓer Hara'); but it by no means forces him to commit sin. Judaism refutes the idea of an inherent impurity in the flesh or in matter as opposed to the spirit. Nor does Judaism accept the doctrine of original sin. The Paradise story (Gen. iii.) asserts in parabolic form man's original state of innocence (see Original Sin). "The soul that Thou hast given me is pure, Thou hast created it, Thou hast fashioned it, and Thou hast breathed it into me, and Thou preservest it within me, and at the appointed time Thou wilt take it from me to return it within me in the future." These are the words recited by the Jew every morning in his prayer (Ber. 60b). The belief of some, borrowed from Plato, that the body is "a prison-house of the soul" (Wisdom, ix. 15; Josephus, "B. J." ii. 8, § 11), never took root in Judaism, though the idea that Adam's sin brought death into the world (Wisdom, i. 13-16, ii. 21-24) is occasionally voiced by the Rabbis (see Death). Judaism knows of no "law of sin in the body" of which Paul speaks (Rom. vii. 23-25). Some commentators have found the doctrine of original sin in Ps. li. 7 (see Ibn Ezra and Delitzsch, *ad loc.*); but the view receives in general no support from rabbinical literature (see Lev. R. xiv. 5), though R. Johanan speaks of "the poison of the serpent" ('Ab. Zarah 22b; comp. Shab. 55b; Naḥmanides on Num. xix. 2; Zohar i. 52; Eccl. R. vii. 13).

Man's Freedom of Will.

The fundamental principle of Judaism (see Maimonides, "Moreh," iii. 17) is that man is free; that is to say, the choice between good and evil has been left to man as a participant of God's spirit. "Sin lieth at the door, and unto thee shall be its desire; but thou shalt rule over it" (Gen. iv. 7, Hebr.) says God to Cain; and herein is laid down for all time the law of man's freedom of will. Accordingly Moses says in the name of God: "See, I have set before thee this day life and good, and death and evil; . . . therefore choose life" (Deut. xxx. 15, 19); and Ben Sira, commenting upon this, says: "God hath made man from the beginning and left him in the hand of his counsel. . . . He hath set fire and water before thee; thou mayest stretch forth thy hand unto whichsoever thou wilt. Before man is life and death; and whichsoever he liketh, it shall be given him" (Ecclus. [Sirach] xv. 14-17). Similarly R. Akiba declares: "All is foreseen; but the mastery [that is, free will] is granted" (Ab. iii. 15). Another rabbinical saying is, "Everything is determined by Heaven save the fear of Heaven" (Ber. 33b). Freedom of will constitutes man's responsibility; and his heavenly prerogative would be impaired were there an inheritance of sin. "Every man shall be put to death for his own sin," says the Law (Deut. xxiv. 16). It is the principle for which the prophet Ezekiel fought (Ezek. xviii. 20). Accordingly the Rabbis say: "The wicked are under the power of their hearts; the righteous have their hearts in their power" (Gen. R. lxvii.). Also, "Man is constantly led along the way he wishes to go. If he wishes to pollute himself by sin, the gates of sin will be opened for him; if he strives for purity, the gates of purity will be opened to him" (Yoma 38a; Mak. 10b; Nid. 30b). Regarding the difficulty of reconciling free will with divine omniscience, see Free Will. Notwithstanding man's propensity to sin, caused by the Yeẓer ha-Ra', "the leaven in the lump" (Ber. 17a; comp. I Cor. v. 7), and the universal experience of sinfulness (Eccl. vii. 20; Ex. R. xxxi.), rabbinical Judaism denies that sin is inherited from parents, pointing to Abraham the son of Terah, Hezekiah the son of Ahaz, and others as instances to the contrary (Tan., Ḥuḳḳat, ed. Buber, p. 4, with reference to Job xiv. 4), and insists on the possibility of sinlessness as manifested by various saints (Shab. 55b; Yoma 22b; Eccl. R. i. 8, iii. 2).

Sin and Repentance.

Sin, according to Jewish teaching, is simply erring from the right path, owing chiefly to the weakness of human nature (Num. xv. 26; I Kings viii. 46; Ps. xix. 13, lxxviii. 39, ciii. 14; Job iv. 17-21); only in the really wicked it is insolent rebellion against God and His order ("pesha'" or "resha'"; Isa. lvii. 20; Ps. i. 4-6, xxxvi. 2; and elsewhere). And there is no sin too great to be atoned for by repentance and reparation (Ezek. xviii. 23; Yer. Peah i. 16b; Ḳid. 40b). The whole conception, then, of mankind's depravity by sin has no place in Judaism, which holds forth the reintegrating power of repentance to Gentiles and Jews, to the ordinary and the most corrupt sinners alike (Pes. 119a; R. H. 17b; Sanh. 103a, 108a; Yoma 86a, b). "Before God created the world, He created repentance for man as one of his prerequisites" (Pes. 54a; Gen. R. xxi., xxii.; see Repentance; Sin).

Unity of Mankind.

(*d*) The doctrine by which Judaism exerted the greatest influence upon the history of the world is, however, that of the unity of the human family. The first eleven chapters of Genesis, whatever the origin of the narrative may be (see Babylonia and Genesis), teach that all the tribes of men have descended from one parent, Adam (= "man"), and that consequently the various races constitute one family. This doctrine is the logical consequence of the other, the unity of God. The theology of Judaism shaped its anthropology also. Childlike as the story of the confusion of tongues at the building of the Tower of Babel may appear (Gen. xi. 1-9, probably based upon an old Babylonian myth relating to the battle of the giants with the celestial gods), the Jewish genius made it convey a great truth, namely: God dispersed men in order to cause the whole earth to be the habitation of the human race, and thus to found and establish the higher unity of man upon the greatest possible diversity. Accordingly the end of history is that the Lord shall "turn to the nations [A. V., incorrectly, "the people"] a pure language, that they may all call upon the name of the Lord, to serve Him with one consent" (Zeph. iii. 9; comp. Gen. ix. 1).

Here is foreshadowed the world-plan of salvation, the KINGDOM OF GOD, an idea peculiar to Judaism. As Creation is centered upon man, so is the perfection of humanity, through the unfolding of all the powers of man in the world, the aim of the world-drama of history (Gen. i. 28; Isa. xlv. 18). "The world was created for man" (Ber. 6b). "Abraham, the true type of humanity, would have been the first-created man had God not seen the necessity of making him the restorer of a world corrupted by sin since Adam's day." "The Torah given to Israel on Sinai was originally intended for Adam as the first man; but, seeing that the six Noachian commandments—that is, the unwritten laws of humanity—were kept by him, God reserved the Torah for the descendants of Abraham" (Eccl. R. iii. 11; comp. Gen. R. xvi. 9, xxiv. 5). By their non-observance of the Noachian laws (Gen. R. xxiii., xxxviii.) the early generations of men all failed to fulfil the design of the Creator; Abraham was therefore selected to bring men back to the way of righteousness (Gen. xviii. 19; Josh. xxiv. 3), and thus to reunite the world by making the God of heaven God of the earth also (Gen. R. xxxix. 13, lix. 11).

The Ten Words of Sinai, too, were intended for every nation; but when all the others refused to accept them and Israel alone merited the priesthood by promising "What the Lord sayeth we will do," the Owner of the whole earth rendered Israel "His peculiar treasure among the nations, a kingdom of priests and a holy nation" (Ex. xix. 1-8, xxiv. 7; Mek., Yitro, Bahodesh, 5; Sifre, Deut. 343; Pesik. R. xxi.). In fact, the Ten Words of Sinai were promulgated in seventy languages in order that they might be understood by all of the seventy nations (Shab. 88b). "Had Israel not accepted the Law, the world would have been turned into chaos" (Shab. 88a).

Israel's Mission.

Israel, then, has been chosen, like Israel's ancestor Abraham, the descendant of Shem (Gen. ix. 26-27), to be a blessing to all nations on earth (*ib.* xii. 3, xix. 18); and the name by which the Lord calls him at the Exodus (Ex. iv. 22), "My first-born son," betokens in the language of the time his mission to be that of the priest and teacher in the household of the nations, leading the rest by his precept and example to the worship of the Only One (*ib.* xix. 6; Isa. lxi. 6). "A people dwelling in solitude and not counted among the nations" (Num. xxiii. 9; Deut. vii. 7), but watched over by divine providence with especial care (Deut. xxvii. 18-19, xxxii. 8-12), the standard-bearer of incomparable laws of wisdom and righteousness in the sight of the nations (*ib.* iv. 5-8), Israel has been created to declare God's praise to the world, to be "His witnesses" (LXX., "martyrs") testifying to His unity, "the light of the nations," and the "covenant of the people to establish the earth" (Isa. xliii. 10, 21; xlix. 6-8). "To Israel's house of God the nations shall flock to be taught of His ways and to learn to walk in His paths." This is to bring humanity back to its normal condition, peace and bliss on earth, because righteousness will then prevail everywhere and the whole "earth shall be full of the knowledge of the Lord" (Isa. ii. 2-4, ix. 6, xi. 4-9, lxv. 25; Micah iv. 1-4). Israel, who when redeemed from Egypt proclaimed God as King (Ex. xv. 19; Lev. R. ii. 4), received the truth of Sinai as a trust; he is never to rest until his God shall become king of the whole earth, until all men and nations shall bend the knee before Him (Zech. xiv. 9; Isa. xl. 5, xlv. 13, xlix. 19; Ps. xxii. 29 [A. V. 28], xlvii. 9 [8], lxxvii. 5 [4], xcvi.-xcix.). "Israel, who proclaims God's unity, is proclaimed by God as His unique people" (Mek., Beshallah, Shirah, 3). Israel, as the people of the saints of the Most High, is to establish the kingdom of God to last forever (Dan. ii. 44, vii.). But as teacher and guardian of mankind's purest faith and loftiest hope, he is dealt with more severely by God for every transgression (Jer. ii. 21; Ezek. xx. 33-41; Amos iii. 2). Nay more, as the servant of God he has been chosen for continual martyrdom in the cause of truth and justice; he, therefore, is the "man of sorrows" whose affliction is to bring healing to the world and to lead many to righteousness (Isa. lii.-liii.; see SERVANT OF GOD).

Whether the expectation is that the universal kingdom of God on earth will be brought about by an ideal king from the house of David, the Messiah, as Isaiah and his followers depict the future of Israel (Isa. xi. 1 *et seq.*; Ezek. xxxiii. 24), or by the dispersed people of Israel itself, as the seer of the Exile (Isa. lvi.-lxvi.) indicates (see MESSIAH); whether or not the great day when all flesh shall worship the Lord will be preceded by a day of divine judgment when all the wicked "shall be stubble" (Mal. iii. 19, 21 [A. V. iv. 3]; see DAY OF THE LORD; ESCHATOLOGY; GOG AND MAGOG), Judaism by its idea of a divine kingdom of truth and righteousness to be built on earth gave to mankind a hope and to history a goal for which to live and strive through the centuries. Other nations beheld in the world's process a continual decline from a golden age of happiness to an iron age of toil, until in a great catastrophe of conflagration and ruin the end of all things, of men and gods, is to be reached: Judaism points forward to a state of human perfection and bliss to be brought about by the complete unfolding of the divine in man or the revelation of God's full glory as the goal of history. And herein lies its great distinction also from Christianity. Judaism's scope lies not in the world beyond, the world of the spirit, of which man on earth can have no conception. Both the hope of resurrection and that of immortality, in some form or other familiar and indispensable to all tribes and creeds, seem evidently to have come to the Jews from without—the one from Persia or Babylonia, the other from Greece. Judaism itself rests on neither (see ESCHATOLOGY; IMMORTALITY; RESURRECTION). Its sole aim and purpose is to render the world that now is a divine kingdom of truth and righteousness; and this gives it its eminently rational, ethical, and practical character.

II. Character of Judaism: Judaism has a twofold character: (1) universal, and (2) particular or national. The one pertains to its religious truths destined for the world; the other, to its national obligations connected with its priestly mission. Upon the former more stress is laid by the Prophets and by most of the sacred poets, by the Alexandrian propagandists and the Palestinian haggadists, as well as by the medieval philosophers and the modern Reform school; whereas the Mosaic law, the Halakah, and the Talmudic and cabalistic schools dwell almost exclusively upon the latter.

(1) As a universal religion Judaism differs from all other religions in that it is not a creed or a system of beliefs upon the acceptance of which redemption or future salvation depends (see Articles of Faith). It is a system of human conduct, a law of righteousness which man should follow in order to live thereby (Lev. xviii. 5); that is, according to R. Meïr, the law of humanity, since "man" is spoken of and not Israel nor priest nor Levite (Sifra, Aḥare Mot; 'Ab. Zarah 3a; comp. Sanh. 59a, where the meaning of R. Meïr's words is altered). It is a law "for life and not for the depriving of man's life" (Sifra, *l.c.*). When, in answer to a heathen mocker, Hillel summed up the entire Law in the Golden Rule: "What is hateful to thee do not unto thy neighbor" (the Targumic translation of "Love thy neighbor as thyself"; Lev. xix. 18; Shab. 31b; see Ab. R. N., Recension B, xxvi., ed. Schechter, p. 53, where the answer is ascribed to R. Akiba instead; comp. Sifra, Ḳedoshim, iv.), he simply voiced the truth of which Abraham and Job are set up as types, and which is expressed by lawgiver (Deut. iv. 8) and prophet (Isa. i. 10–17, xxxiii. 15; Hos. vi. 6; Amos v. 21–24; Micah vi. 6–8; Zech. viii. 16–17), by the Psalmist (Ps. xv., xxiv., xxxiv. 13–15) and the Book of Wisdom, as well as by the Rabbis (Mek. 23b–24a). Whereas heathenism by its cults of Moloch and similar gods fostered cruelty, the Torah enjoined man "to walk in the ways of a righteous and merciful God, and be righteous and merciful like Him" (Deut. xi. 22; Sifre, Deut. 49; Mek., Beshallaḥ, Shirah); to love the stranger and protect the fatherless and the widow as He does (Deut. x. 17–20).

Justice to All.

Judaism is, above all, the law of justice. Whereas in heathendom, except in the case of some exalted philosopher like Plato, might was deified, and the oppressed, the slave, and the stranger found no protection in religion, the declaration is everywhere made throughout Scripture that injustice committed by man against man provokes the wrath of the world's Ruler and Judge (Ex. xxi. 22–23; Gen. vi. 13, xviii. 20; Deut. xxvii. 15–26; Amos i. 3–ii. 8; and elsewhere), and that righteousness and compassionate love are demanded for the oppressed, the slave, the poor, the fatherless and homeless, the stranger, and for the criminal as having a claim on the sympathy of his fellow men; even for the dumb creature compassion is required (Ex. xxii. 20–26, xxiii. 5–6; Deut. xxii. 6; xxiv. 6, 10–xxv. 4; Job xxxi.). This is the "Torah" of which Isaiah speaks (Isa. i. 10), the "commandment" put by God upon every human heart (Deut. xxx. 11–14). And this spirit of justice permeates the Talmudic literature also. "For righteousness is one of the pillars of the world" (Ab. i. 18). "Where right is suppressed war comes upon the world" (*ib.* iv. 8). "The execution of justice is one of the Noachian laws of humanity" (Sanh. 56b). "Justice is demanded alike for the Gentile and the Jew" (Mak. 24a; B. Ḳ. 113a; and other quotations in Baḥya b. Joseph's "Ḳad ha-Ḳemaḥ," ch. "Gezelah"). To have due regard for the honor of all fellow creatures ("kebod haberiyyot"; Tos., B. Ḳ. vii. 10) is one of the leading principles of rabbinic law (Shab. 94b).

Purity and Truth.

Judaism furthermore is the law of purity. Heathenism by its orgiastic cults of Baal-peor, Astarte, and the like, fostered impurity and incest (Lev. xviii. 3, 24–30; Num. xxv. 1–9; Deut. iv. 3). The Torah warns against fornication, and teaches purity of heart and of action (Num. xv. 39; Deut. xxiii. 18–19, xxiv. 15; Prov. vii. 5–27; Job xxxi. 1), because God is too pure to tolerate unchastity in man or in woman (see Holiness; Purity). Judaism resents every act of lewdness as "nebalah" = "villainy" (Gen. xxxiv. 7, 31; Deut. xxii. 21; Judges xix. 24; II Sam. xiii. 12; see Folly), and most severely condemns lascivious talk (Isa. ix. 16; Shab. 33a).

Judaism is, moreover, the law of truth. Its God is the God of truth (Jer. x. 10). "The seal of the Holy One is truth" (Gen. R. lxxxi.; see Alpha and Omega). Abraham, Moses, Jeremiah, Job, and Ḳohelet wrestled with God in doubt until He revealed Himself to them in a higher form (Gen. xviii. 25; Ex. xxxii.–xxxiii.; Jer. xii. 1; Job xxxi. 35). And as the Prophets had perfect faith in God as the God of truth and therefore shrank from hypocrisy (Yer. Ber. vii. 11c), so did all the Jewish philosophers show perfect confidence in truth while boldly expressing their lofty views concerning the Deity and divesting God of every trace of Anthropomorphism and Anthropopathism and of every attribute infringing upon the spirituality and unity of God. It was, says the Talmud, the last will of Canaan that his children should not speak the truth and should love lasciviousness (Pes. 113b). "The Torah of Moses is truth" and "desires men to speak the truth and assent to the truth, even as God Himself assents to the truth when honestly spoken"; for "Upon truth rests the world" (B. B. 74a; Ps. xv. 2; Ab. R. N. xxxvii.; Ab. i. 18). This honest search for truth made Judaism, indeed, the world's great power for truth as well as for righteousness.

Judaism promotes and fosters education and culture. In contrast to such systems of faith as foster ignorance of the masses, it renders it a duty for the father to instruct his children and for the community to provide for the general instruction of old and young (see Education; Philosophy). It sanctifies labor, and makes the teaching of a trade whereby a livelihood may be earned a duty incumbent upon the father or upon the municipal authority (see Labor, Holiness of). It makes the systematic care of the poor a duty of the community with a view to the dignity and self-help of the recipient (see Charity). It denounces celibacy as unlawful, and enjoins each man to build a home and to contribute to the welfare of human society (see Marriage). The high priest in Israel was not allowed to officiate on the Day of Atonement unless he had a wife living with him (Yoma i. 1; comp. Ta'an. ii. 2). It enjoins love of country and loyalty to the government, no matter how unfriendly it be to the Jew (Jer. xxix. 7; Ab. iii. 2; Ket. 111a; see PATRIOTISM).

The Religion of Joy, Hope, and Love.

Judaism is a religion of joy, and it desires that man should rejoice before God and gratefully enjoy all His gifts, at the same time filling other hearts with joy and thanksgiving. Especially are its Sabbath and festal days seasons of joy with no austerity about them. Judaism discourages asceticism (see ASCETICISM; JOY).

Judaism is a religion of hope. It teaches men to recognize in pain and sorrow dispensations of divine goodness. It is optimistic, because it does not defer hope merely to the world to come, but waits for the manifestation of God's plans of wisdom and goodness in the moral and spiritual advancement of man. While the present world is, in comparison to the future one, declared to be "like the vestibule wherein one prepares for the palace," it is nevertheless stated that "one hour devoted to repentance and good works in this world is more valuable than the entire life of the world to come" (Ab. iv. 16–17); for "to-day is the time for working out one's destiny, while to-morrow is the time for receiving compensation" ('Er. 22a).

As its highest aim and motive Judaism regards the love of God. Twice every day the Jew recites the Shema', which contains the words: "Thou shalt love the Lord thy God with all thine heart, with all thy soul, and with all thy might" (Deut. vi. 5); this verse is understood to enjoin him to willingly surrender life and fortune whenever the cause of God demands it, while it at the same time urges him to make God beloved by all his fellow creatures through deeds of kindness, as Abraham did (Sifre, Deut. 32). This love of God implies the most unselfish devotion and the purest motive of action; that is, acting not from fear, but rather for God's sake alone (Sifre, Deut. 32, 48; Ab. ii. 12); doing good not in view of any reward in the world to come (Ab. i. 3), but for its own sake (see Schreiner, "Die Jüngsten Urtheile über das Judenthum," 1902, pp. 145–151); and it also implies the love of man (Deut. x. 12–19; see LOVE).

Judaism, finally, is a system of sanctification of life. It teaches that the whole of life is holy, because God is manifested in it: "Be holy, for the Lord your God is holy" (Lev. xix. 1, Hebr.). Even in the functions of animal life the presence of a holy God should be realized (Deut. xxiii. 15); and when the perfect state of humanity shall have been attained, every road will be a holy road free from impurity (Isa. xxxv. 8), and "In that day shall there be upon the bells of the horses, Holy unto the Lord" (Zech. xiv. 20, R. V.).

(2) The striking feature of Judaism, however, is that, while containing the highest spiritual and ethical truths for humanity, it is bound up with the Jewish nation. The One and Only God, YHWH, is Israel's God in particular (Sifre, Deut. 31); and the separation of Israel from the rest of the nations in order to distinguish it as God's people is the express purpose of the Torah (Lev. xx. 24, 26), and the characteristic trait of Judaism from the time of Ezra (Ezra vi. 21; Neh. x. 21) and of the Scribes or Pharisees (see PHARISEES). This national distinctness or aloofness of the Jew has brought him all the hostility, persecutions, and bitter attacks of a surrounding world from the days of Haman (Esth. iii. 8) and of Apion in Alexandria down to the most recent times (see ANTI-SEMITISM; APION). Even such historians as Mommsen ("Römische Gesch." 1885, v. 487), Ed. Meyer ("Gesch. des Alterthums," iii. 167–236), Harnack ("Die Mission und Ausbreitung des Christenthums," 1902, p. 16), and Bousset ("Wesen der Religion des Judenthums," 1903, pp. 128–157) see in Judaism only a national religion, in Israel's God a national God.

National Character of Judaism.

Nay, it may be affirmed without exaggeration that a just and unprejudiced estimate of Judaism is found nowhere in modern Christian writings (see Schreiner, *l.c.*). The fact of the matter is that Judaism, while representing the guardianship of the universal religious truths for humanity, surrounded the Jewish people, as the priestly people of the world's Only God, with laws and rites of a specific national character in order to keep these very truths forever intact and at the same time to invest the guardians of them with the sanctity of the world's priesthood. "The people of Israel have from the beginning sworn fidelity to God and have recognized Him as the world's Ruler" (Ber. 6a; Ḥag. 3a); therefore have they been called "the sons of God" (Deut. xiv. 1; Ab. iii. 13). Yet their especial sonship of God implies that they should be faithful to Him unto death, and by continued self-surrender and martyrdom should glorify His name before the world throughout the ages (Sifra, Emor, iv., on Lev. xxii. 32–33; comp. Ps. xliv. 18–23; Dan. iii.; II Macc. vii.; and ḲIDDUSH HA-SHEM).

The Jews a Separate People.

The Sinaitic covenant which rendered Israel "a kingdom of priests and a holy nation" (Ex. xix. 6) became, the Rabbis say, "a source of hatred to the nations" (Shab. 89a: a play upon words, "Sinai"—"Sin'ah"), because it separated it from them by statutes and ordinances such as the dietary and the Levitical purity laws and others intended to prevent idolatrous practises. Like the priest in the Temple, whose garments and mode of life distinguished him from the rest in order to invest him with the spirit of greater sanctity and purity (I Chron. xxiii. 13), so Israel was for all time to be impressed with its priestly mission by all those ceremonies which form so prominent a feature in its religious life (see CEREMONIES; CIRCUMCISION; COMMANDMENTS; DIETARY LAWS). Particularly the Mosaic and, later on, the Pharisaic laws had for their object the separation of the Jewish people from all those influences prevalent in heathendom which led to idolatry and impurity; wherefore not only intermarriage, but also participation in any meal or other festive gathering which could possibly be connected with idol-worship was prohibited (see WORSHIP, IDOL-; INTERMARRIAGE; JUBILEES, BOOK OF.) This persistent avoidance of association with the Gentiles on the part of the Pharisees, which in the time of the Maccabees was termed ἀμιξία = "keeping apart from the surrounding nations" (comp. II Macc. xiv. 38), became the chief cause of the accusation of a "hatred of mankind" which was brought against the Jews by the Greeks and Romans, and which has ever since been reiterated by the anti-Semites (see Schürer, "Gesch." iii. 3, 416).

In reality these very laws of seclusion fitted the Jew for his herculean task of battling for the truth against a world of falsehood, and enabled him to resist the temptations and to brave the persecutions of the nations and the ages. They imbued him with a spirit of loyalty unparalleled in human history; they inculcated in him the principle of abstinence, enabling him to endure privation and torture; and filled him with that noble pride which alone upheld him amidst the taunts and sneers of high and low. They brought out those traits of manhood which characterized Abraham, who, according to the Rabbis, was called "'Ibri" (Hebrew) because his maxim was: "Let all the world stand on the one side ["'eber eḥad"]—I side with God and shall win in the end" (Gen. R. xlvi.). But these laws also fostered a conception of the sanctity of life unknown to other creeds or races. By investing the commonest act and event with religious obligations, they made the whole of life earnest and holy with duty. Instead of being "a yoke of servitude," as Schürer and others have it, they "filled the home and the festal seasons with higher joy" (see Schechter and Abrahams in "J. Q. R." iii. 762 *et seq.*, xi. 626 *et seq.*).

III. Judaism in Its Relation to the Gentile World: Notwithstanding its unmitigated severity against heathenism with its folly and vice, and against every mode of compromise therewith, Judaism does not, like other creeds, consign the non-believer to eternal doom. It judges men not by their creed, but by their deeds, demanding righteous actions and pure motives, since "fear of God" signifies fear of Him who looketh into the heart (Sifra, Aḥare Mot, iii. 2). It declares through R. Joshua b. Hananiah, whose opinion is generally accepted, that "the righteous of all nations have a share in the world to come"; the Shammaite R. Eliezer in consigning all heathen to Gehenna bases his argument on the Scriptural verse Ps. ix. 18 (A. V. 17), into which he reads, "The wicked are turned to Sheol because all heathen forget God"—not as R. Joshua does, "all those heathen that forget God" (Sanh. 105a). It is the moral depravity ascribed to the heathen, owing to his unchaste and violent habits, which is the cause of all the harsh haggadic expressions—such as "the people that resemble the ass" (Ket. 111a)—and halakic injunctions found in the Talmud against the heathen (Gentile or 'Akkum; see Jubilees, Book of). The latter is always under grave suspicion (see 'Ab. Zarah ii. 1; Yeb. 98a), yet, no sooner does he solemnly discard idolatry than his association is invited and he has a claim on protection (Giṭ. 45a).

Its Attitude Toward Proselytism.

On the contrary, Judaism waits for "the righteous nation that keeps the faith" (Isa. xxvi. 2), and opens wide "its gates that the righteous from among the heathen world may enter" (Ps. cxviii. 20; Sifra, Aḥare Mot, xiii.), calling the Gentiles that serve God in righteousness "priests of the Lord" ("Otiot de-R. Akiba," letter "Zayin"). It declares that the Holy Spirit may rest upon the righteous heathen as well as upon the Jew (Tanna debe Eliyahu R. ix.). It pays due homage to the wise among the heathen (Ber. 58a; Soṭah 35b; Bek. 8b; Gen. R. lxv.). It recognizes the existence of prophets among the heathen (B. B. 15b: "Fifteen prophets God sent to the heathen world up to the time of Moses: Balaam and his father, Job and his four friends," etc.; comp. Lev. R. i. 12, ii. 8; Tanna debe Eliyahu R. xxvi.; *ib.* Zuṭa xi., etc.). The assertion made by Max Müller, Kuenen, and others, that Judaism is not a missionary religion, rests on insufficient knowledge. There existed an extensive proselyte propaganda literature, especially in Alexandria (see Didache; Propaganda); and, according to the Midrash, "the heathen world is saved by the merit of the one proselyte who is annually won" (Gen. R. xxviii.; comp. Matt. xxiii. 15; Jellinek, "B. H." vi., Introduction, xlvi.). Abraham and Sarah are represented as devoting their lives to making proselytes (Gen. R. xxxix.); and as the Psalmist accords to the proselytes—"those that fear God"—a special place (Ps. cxv. 11), so does the daily prayer of the Jew in the "Shemoneh 'Esreh" contain a special blessing for the proselytes ("Gere ha-Ẓedeḳ"). Only in later centuries, when the Church interfered through apostates and by edicts, was the proselyte declared to be a plague instead of a desired accession to the house of Israel (Isa. xiv. 1); the ancient Halakah endeavored to encourage the heathen to come under the wings of the Shekinah (Yeb. 47a, b; Mas. Gerim; Lev. R. ii.). In order to facilitate the admission of Gentiles, Judaism created two classes: (1) "proselytes of righteousness," who had to bring the "sacrifices of righteousness" while submitting to the Abrahamic rite in order to become full members of the house of Israel; and (2) "proselytes of the gate" ("gere toshab"), who accepted only the seven Noachian laws (ten and thirty are also mentioned) of humanity. Occasionally the necessity of undergoing circumcision is made a matter of controversy also in the case of the full proselyte (see Circumcision). But proselytism as a system of obtaining large numbers is deprecated by Judaism.

However, the Messianic age is regarded as the one when "the fulness of the heathen world" will join Judaism (Isa. xiv. 1; Zech. viii. 23; 'Ab. Zarah 3a). Especially characteristic of the cosmopolitan spirit of Judaism is the fact that the seventy bullocks brought as sacrifice during the Sukkot festival at the Temple were taken to be peace-offerings on behalf of the supposed seventy nations representing the heathen world (Suk. 55b), a view shared by Philo ("De Monarchia," ii. 6; idem, "De Septenario," p. 26; see Treitel in "Monatsschrift," 1903, pp. 493-495). Throughout the entire ethical literature of the Jews, from Tanna debe Eliyahu R. down to the various Ethical Wills of the Rabbis, there is voiced regarding the non-Jewish world a broadly human spirit which stands in strange contrast to the narrowness with which Judaism is viewed by Christian writers, even those of high rank (see Zunz, "Z. G." pp. 122-157). The same cosmopolitan attitude was taken by Judaism whenever its representatives were called upon to act as intermediaries between Moslem and Christian; and the parable of the three rings, put by Lessing into the mouth of Nathan der Weise, was actually of Jewish origin (see Wünsche in "Lessing-Mendelssohn Gedenkbuch," 1879, pp. 329 *et seq.*).

IV. Judaism as Law: Owing to the Paulinian antithesis of law and faith or love (see Löwy, "Die Paulinische Lehre von Gesetz," in "Monatsschrift," 1903, pp. 332 *et seq.*, 417 *et seq.*), the Torah, the basis and center of Judaism since Ezra, has been persistently placed in a false light by non-Jewish writers, undue stress being laid upon "the burden of the Law." In reality, the word "Torah" signifies both "law" and "doctrine"; and Judaism stands for both while antagonizing Paul's conception of faith as a blind dogmatic belief which fetters the mind. It prefers the bondage of the Law to the bondage of the spirit. It looks upon the divine commandments as a source of spiritual joy ("simḥah shel miẓwah") and as a token of God's special protection (Ber. 31a), for which it enjoins the Jew to offer Benedictions and to display zeal and enthusiastic love (Ab. v. 20). "God has given the children of Israel so many commandments in order to increase their merit [Mak. iii. 16] or to purify them" (Tan., Shemini, ed. Buber, p. 12). Every morning after having taken upon himself the yoke of God's kingdom, the Israelite has to take upon himself the yoke of the divine commandments also (Ber. ii. 2); and there is no greater joy for the true Israelite than to be "burdened with commandments" (Ber. 17a). "Even the commonest of Jews are full of merit on account of the many commandments they fulfil" (*ib.* 57a.)

The Law was accordingly a privilege which was granted to Israel because of God's special favor. Instead of blind faith, Judaism required good works for the protection of man against the spirit of sin (*ib.* 32b). The Law was to impress the life of the Jew with the holiness of duty. It spiritualized the whole of life. It trained the Jewish people to exercise self-control and moderation, and it sanctified the home. It rendered the commonest functions of life holy by prescribing for them special commandments. In this sense were the 613 commandments regarded by Judaism.

Purpose of the Law.

Some of these are understood to be divine marks of distinction to separate Israel from the other nations—statutes ("ḥukkot") which are designated as unreasonable by the heathen world, such as laws concerning diet, dress, and the like (Sifra, Aḥare Mot, xiii.). Others are called "'eduyot" (testimony), in view of their having been given to make Israel testify to God's miraculous guidance, such as the festive seasons of the year; while still others are "signs" ("ot"), being tokens of the covenant between God and Israel, such as circumcision, the Sabbath (Gen. xvii. 11; Ex. xxxi. 13), the Passover (Ex. xii. 13, xiii. 9), and, according to the rabbinical interpretation, the tefillin (Deut. vi. 8, xi. 18).

Of sacraments, in the sense of mysterious rites by which a person is brought into a lifelong bodily relationship to God, Judaism has none. The Sabbath and circumcision have been erroneously called thus by Frankel (in his "Zeitschrift," 1844, p. 67): they are institutions of Judaism of an essential and, according to the generally accepted opinion, vital character; but they do not give any Jew the character of an adherent of the faith (see Ceremony; Commandments). At the same time the Sabbath and the festival seasons, with the ceremonies connected with them, have at all times been the most significant expressions of Jewish sentiment, and must be regarded as the most important factors of religious life both in the Synagogue and in the home (see Ab, Ninth of; Atonement, Day of; Ḥanukkah; New-Year; Passover; Purim; Sabbath; Shabuot; and Sukkot).

While the immutability of the Torah, that is, the law of Moses, both the written and the oral Law, is declared by Maimonides to be one of the cardinal doctrines of Judaism, there are views expressed in the Talmud that the commandments will be abrogated in the world to come (Nid. 61b). It is especially the dietary laws that will, it is said, be no longer in force in the Messianic time (Midr. Teh. on Ps. cxlvi. 4).

Orthodox and Reform Judaism.

On the question whether the laws concerning sacrifice and Levitical purity have ceased to be integral parts of Judaism, Reform and Orthodox Judaism are at issue (on this and other points of difference between the two extreme parties of Judaism see Reform Judaism). Between the two stands the so-called "Breslau school," with Zacharias Frankel as head, whose watchword was "Positive Historical Judaism," and whose principle was "Reform tempered with Conservatism." While no longer adhering to the Mosaic origin of the Pentateuch (see Grätz in "Gesch." ii. 299-318, and Schechter in "J. Q. R." iii. 760-761) and the divine character of tradition (see Frankel, "Darke ha-Mishnah"), it assigns the power and authority for reforms in Judaism only to the Jewish community as a whole, or to what Schechter calls "catholic Israel." The latter author desires "a strong authority," one which, "drawing inspiration from the past, understands also how to reconcile us [the Jews] with the present and to prepare us [them] for the future" ("J. Q. R." iv. 470). Grätz goes so far as to reduce Judaism to two fundamental principles: (1) "the religious element, which is mere negative monotheism in the widest acceptation of the term," and (2) the ethical, which offers the ideal for the moral life: "Be ye holy even as I am holy"; at the same time declaring that "prophets and Talmudists did not regard sacrifice or ritual as the fundamental and determining thing in Judaism" (Grätz, i. 9). This leads to a final statement of the principles and forces of Judaism.

V. Historic Principles and Forces of Judaism: The Shema', "the proclamation of God's unity, requires an undivided Israel" (Mek., Yitro, Baḥodesh, i.). "One God, One Israel, and One Temple" is the principle twice stated in Josephus ("Ant." iv. 8, § 5; "Contra Ap." ii. 28); "One God, One Israel, and One Torah" is the principle upon which Orthodox Judaism rests. "It was an evil day for Israel when the controversies between the schools of Shammai and Hillel began, and the one Torah appeared to have become two Torot" (Sanh. 88b; where the plural "Torot" occurs, it refers to the written and oral law; Yoma 28b, with reference to Gen. xxvi. 5; comp. Shab. 31a). This Torah, both written and oral, was known to and practised in all its details by the Patriarchs (Yoma 28b; Gen. R. lxiv.; comp. JUBILEES, BOOK OF, and "Attah Eḥad" in the liturgy). "Whosoever denies that the whole Law, written as well as oral, was given by God to Moses on Sinai is a heretic" (Sanh. 99a; Sifra, Behar, i. 1).

Chain of Tradition.

The trustworthiness of the divine behest until the final codification of the Law, from this point of view, rests upon the continuous chain of tradition from Moses down to the men of the Great Synagogue (Ab. i. 1), and afterward upon the successive ordination of the Rabbis by the elders with the laying on of hands (probably originally under the influence of the Holy Spirit; see SEMIKAH). Accordingly the stability and the immutability of the Law remained from the Orthodox standpoint one of the cardinal principles of Judaism (see M. Friedländer, "The Jewish Religion," 1891; Samson Raphael Hirsch, "Horeb," 1837).

Independent research, however, discerns evolution and progress to have been at work in the various Mosaic legislations (Ex. xx. 22-xxiii. 19; Deut. xii.-xxi. 13; and Leviticus together with Num. xv., xviii.-xix. 22), in the prophetic and priestly as well as in the soferic activities, and it necessarily sees in revelation and inspiration as well as in tradition a spiritual force working from within rather than a heavenly communication coming from without. From this point of view, ethical monotheism presents itself as the product not of the Semitic race, which may at best have created predisposition for prophetic inspiration and for a conception of the Deity as a personality with certain moral relations to man, but solely of the Jewish genius, whose purer and tenderer conception of life demanded a pure and holy God in sharp contrast to the cruel and lascivious gods of the other Semitic races (see M. Joël, "Religiös-Philosophische Zeitfragen," 1876, pp. 82-83).

The Prophetic Spirit.

It was the prophetic spirit of the Jewish nation embodied in Abraham (not the Midianite, as Budde thinks, nor some Babylonian tribe, as the Assyriologists would have it) which transformed YHWH, an original tribal deity localized on Sinai and connected with the celestial phenomena of nature, into the God of holiness, "a power not ourselves that maketh for righteousness," the moral governor of the world. Yet this spirit works throughout the Biblical time only in and through a few individuals in each age; again and again the people lapse into idolatry from lack of power to soar to the heights of prophetic vision. Only in the small Judean kingdom with the help of the Deuteronomic Book of the Law the beginning is made, and finally through Ezra the foundation is laid for the realization of the plan of "a kingdom of priests and a holy nation."

But while thus the people were won, and the former propensity to idolatry, the "yeẓer ha-ra'," was banished forever by the power of the men of the Great Synagogue (Yoma 69b), the light of prophetic universalism became dim. Still it found its utterance in the Synagogue with its liturgy, in the Psalms, in the Books of Jonah and Job, in the Books of Wisdom, and most singularly in the hafṭarah read on Sabbath and holy days often to voice the prophetic view concerning sacrifice and ritual in direct antagonism to the Mosaic precepts. Here, too, "the Holy Spirit" was at work (see INSPIRATION; SYNAGOGUE). It created Pharisaism in opposition to Sadducean insistence upon the letter of the Law; and the day when the injunction "an eye for an eye, and a tooth for a tooth" was abrogated, and the rationalistic interpretation of the Scribes was substituted therefor, was celebrated as a triumph of reason (Megillat Ta'an. iv. 1). While the legalists beheld God's majesty confined to "the four ells of the Halakah" (Ber. 8a), the Haggadah unfolded the spirit of freedom and progress; and when mysticism in the East threatened to benumb the spirit, philosophy under Arabian influence succeeded in enlarging the mental horizon of Judaism anew.

Thus Judaism presents two streams or currents of thought ever running parallel to each other: the one conservative, the other progressive and liberal; the one accentuating the national and ritualistic, the other the cosmopolitan and spiritual, elements; mysticism here and rationalism there, these together forming the centripetal and centrifugal forces of Judaism to keep it in continuous progress upon its God-appointed track.

Judaism, parent of both CHRISTIANITY and ISLAM, holds forth the pledge and promise of the unity of the two ("Yad," Melakim, xi. 4; "Cuzari," iv. 23; see JEW. ENCYC. iv. 56, *s.v.* CHRISTIANITY), as it often stood as mediator between Church and Mosque during the Middle Ages (see DISPUTATIONS and JUDAH HA-LEVI). In order to be able to "unite all mankind into one bond" (New-Year's liturgy and Gen. R. lxxxviii.), it must form "one bond" (Lev. R. xxx.). It must, to use Isaiah's words, constitute a tree ever pruned while "the holy seed is the substance thereof" (Isa. vi. 13); its watchword being: "Not by might, nor by power, but by my spirit, saith the Lord of hosts" (Zech. iv. 6).

JUDAIZERS. See INQUISITION.

JUDAIZING HERESY (ZHIDOVSTVUYUSHCHAYA YERES), or **JUDAIZING CHRISTIANS:** A Christian heresy which first made its appearance in Novgorod during the reign of Grand Duke Ivan Vassilyevich III. (second half of the fifteenth century), and from there spread to Pskov and Moscow.

From the work of the priest Josif Volotzki, entitled "Prosvyetitel," etc. (The Enlightener, or the Detection of the Judaizing Heresy), it is evident that the first propagator of the heresy was the influential Jew Skhariyah (Zechariah) of Kiev, "who had studied astrology, necromancy, and various magic arts." He came to Novgorod (1471) in the suite of Prince Michael Olelkovich, probably as his commercial agent, and was soon followed by the Lithuanian Jews Osif, Shmoilo, Skargei, Moisei, and Chanush. Skhariyah at first converted the priest Dionis and the archpriest ("Protopapas") ALEKSEI, and through the latter many other clergymen of Novgorod and Pskov. The doctrine of the sect, as given by Volotzki and other Russian church historians, was as follows: The belief in the only one God and the negation of the divinity of Jesus Christ and of the Trinity. Christ, according to their belief, has not yet appeared, and when he does so, he will not appear as the son of God in substance, but through his benefactions, "like Moses and the Prophets." Until the arrival of Christ the laws of Moses should be strictly followed, since the evangelistic writings are all erroneous. Furthermore, they condemned images and strongly censured monasticism.

The Russian historian Ilovaiski is of the opinion that the essential principles of the heresy had little in common with Judaism, and were rather the outcome of the rationalistic ideas of the Reformation, which reached Novgorod from western Europe. But Luther's predecessor, Johannes von Goch (1400–75), recognized the authority of the Church and the monastic orders; and Erasmus of Rotterdam was not born till 1467 or 1469.

In the beginning the heresy was kept secret, its adherents remaining within the Greek Orthodox Church. In 1480, when Grand Duke Ivan Vassilyevich visited Novgorod, Aleksei and his friend Dionis found favor with him. He took them both to Moscow and placed them at the head of the Churches of the Assumption and of the Archangel Michael respectively, and here they commenced an active propaganda. Aleksei, enjoying the confidence of the grand duke in a high degree, soon succeeded in converting his secretary, Feodor Kuritzyn; the archimandrite Zossima; the monk Zechariah; the princess Helena, daughter-in-law of the grand duke; and many other prominent personages. The grand duke soon became familiar with the doctrine of the heresy, and seemed to be favorably disposed toward it.

The existence of the heresy was officially denounced in 1487, when a few intoxicated clergymen of Novgorod openly blasphemed against the Orthodox faith and were accused before the archbishop Gennadi. One of the accused priests, Naum, repented and told the archbishop all about the heresy, and that some of the merchants of Moscow, among them Ivashka Chorny and Ignashka Zubov, had been circumcised and had escaped to Lithuania (1487). Gennadi then became the chief opponent of the heresy, but found little support in the higher courts, both civil and ecclesiastical, since the grand duke favored the leaders of the heresy and the metropolitan Geronti was personally antagonistic to Gennadi. The latter then called a council of the bishops (1488), which decreed execution of the impenitent heretics, "who glorify the Jewish faith and abuse the Greek Orthodox religion." In 1491, when Zossima was appointed metropolitan, Gennadi convened another council, which condemned the chief heretics among the clergy, pronounced an anathema against them, and imprisoned them in a monastery. In Novgorod, by Gennadi's orders, the heretics were punished in a very cruel manner.

With all his influence and power, however, Gennadi did not succeed in suppressing the heresy; for the sectarians were favored by the grand duke, and, with the help of Kuritzyn, one of the sect, Kassian, was appointed Archimandrite of Novgorod. Gennadi then secured the aid of Joseph Volotzki, who by his accusations forced Zossima to resign (May 17, 1494). The grand duke's daughter-in-law also took the part of the heretics, and with the accession of her son to the throne the sectarians hoped that the persecution of the heresy would cease.

In 1490 the Church council passed a resolution against the heretics, many of whom were tortured to death in the prison of Novgorod. The majority of the Judaizers, however, continued their teachings and converted many of the masses directly to Judaism. By the machinations of Gennadi, Helena and her son Dimitri were imprisoned in a monastery (1502), and Vassili, the younger son of the grand duke, was proclaimed successor to the throne. The attitude of the government in regard to the heresy then changed. The council convoked by the grand duke opened its sessions Dec. 27, 1504, and condemned some of the heretics to capital punishment. The deacon Volk Kuritzyn (Feodor's brother), Ivan Maximov, and Dimitri Konopliov were burned in cages at the stake, while other members of the sect, including the archimandrite Kassian, were burned at the stake in Novgorod. Some of the heretics were imprisoned; others were sent to monasteries.

From this blow the heresy could not recover, although the doctrines of the sect continued to spread secretly. Kostomarov (vol. xii.) believes that the sect of the Molokans derived its origin from the Judaizers.

In a letter to the Metropolitan of Moscow, Gennadi sends a collection of speeches, delivered before the czar by the Russian ambassador to Spain, concerning the way in which the King of Spain had outrooted heretics. He further relates the story of the baptized Jew Daniel, who had lately traveled from Kiev to Moscow and had heard from the Jews of Kiev that the grand duke had destroyed all the churches in Moscow, owing to the spread of the heresy, with which the grand duke seems to have sympathized.

For the defense of the Orthodox faith against the Judaizers, Dimitri Gerasimov, translator at the ambassadors' court, translated from the Latin the following works:

(1) Nicholas de Lyra's work on "The Infidelity of

the Jews"; (2) "Conviction of the Jews"; (3) the work of the baptized Jew Joseph on "The Jews Who Were Baptized in Africa."

But little is known of the fortunes of the Judaizing sects during the period intervening between the reign of Ivan III. and that of Alexander I. It is known only that Ivan the Terrible would not admit in 1550 Jewish merchants from Poland, for the reason that they brought "poisonous herbs to Russia and led the Russians away from Christianity" (Regesty No. 470; see also Regesty No. 500). It would seem, however, from the legislative measures passed from time to time, that the government still regarded the Judaizing sects as a real menace to the supremacy of the Greek Orthodox Church. The fact that little is known of the Judaizing sects during that period may be due to the care exercised by the sectarians in keeping their beliefs secret, and to the disinclination of the Jews of Russia in the making of proselytes.

During the reign of Emperor Alexander I. the sectarians, encouraged by his liberal attitude, gathered new life, and many began openly to announce their principles. They were then called in the Russian official documents "heretics" and "Sabbatarians," who followed certain Jewish dogmas and rites, *e.g.*, the observance of the Sabbath and circumcision. The first official reports about them appeared in 1811, almost simultaneously from the governments of Tula, Voronezh, and Tambov. The Archbishop of Voronezh reported that the sect owed its origin, in 1796, to some Jews who had settled among the Christian inhabitants of those governments, and that its doctrines had taken root in six villages of the districts of Bobrov and Pavlov. In 1818 some of the farmers of the government of Voronezh sent a formal complaint to the emperor Alexander against the oppression by the local civil and ecclesiastical officials of those who confessed the Mosaic faith. Upon the strength of this complaint a strict investigation was ordered concerning bribes which had been accepted by some of the officials. At the same time the secretaries of worship and of the interior were ordered to make a report to the emperor concerning the Judaizing Christians.

From the investigation it became apparent that the Judaizing heresy had spread to the governments of Orel, Tula, and Saratov. About 1,500 members confessed it openly, and many more kept their belief secret. The sect, according to the opinion of the metropolitan, was not a distinctly Old Testament cult, but was characterized by the observance of certain Jewish rites, *e.g.*, the celebration of the Sabbath, circumcision, contracting marriages and dissolving them at will, peculiar burial ceremonies, and manner of assembling for prayer. The sectarians declared that they did not condemn the Christian faith, and, therefore, did not consider themselves apostates; and they insisted that they never had been Christians, but had only adhered to the faith of their fathers, which they would not forsake.

The measures which were taken against the spread of the Judaizing heresy had sad consequences for the Jews. While the leaders of the sect were sent into the army or deported to Siberia, the officials considered it useful to themselves to call the sect in official documents a Jewish sect, and to announce that the sectarians were Jews. They claimed that the name "Sabbatarians" would not convey to the Russian masses a correct idea of the nature of the sect. Its members were intentionally called "Jews" in the statutes so as to expose them to the contempt of the people. Finally a ukase was issued by the synod July 29, 1825 ("Pervoe Polnoe Sobranie Zakonov" xl., No. 30,436 A), ordering the expulsion of all Jews from those districts in which the Sabbatarians or Judaizing Christians were to be found.

As late as 1880 Jews were expelled from districts where adherents of the sect were supposed to exist.

JUDAS THE ESSENE: Saint renowned for his prophetic powers in the time of King Aristobulus (105–104 B.C.). Josephus ("Ant." xiii. 11, § 2; "B. J." i. 3, § 5) relates the following characteristic story concerning him: Judas had foretold that the death of Antigonus, the king's brother, would take place on a certain day at Strato's Tower in Cæsarea by the Sea, when to his great astonishment he saw him pass by the Temple on the day specified. As he had never before failed in his predictions he was greatly dejected on realizing that this time his prophecy could not be fulfilled, the distance to Cæsarea being so great and the hour so late. However, the prophet, as Josephus calls him, learned a few hours afterward that there was near Jerusalem a subterranean passage also called "Strato's Tower," and that Antigonus had been slain there by the body-guards of the king.

G. K.

JUDAS THE GALILEAN: Leader of a popular revolt against the Romans at the time when the first census was taken in Judea, in which revolt he perished and his followers were dispersed (Acts v. 37); born at Gamala in Gaulonitis (Josephus, "Ant." xviii. 1, § 1). In the year 6 or 7 C.E., when Quirinus came into Judea to take an account of the substance of the Jews, Judas, together with Zadok, a Pharisee, headed a large number of Zealots and offered strenuous resistance (*ib.* xviii. 1, § 6; xx. 5, § 2; *idem*, "B. J." ii. 8, § 1). Judas proclaimed the Jewish state as a republic recognizing God alone as king and ruler and His laws as supreme. The revolt continued to spread, and in some places serious conflicts ensued. Even after Judas had perished, his spirit continued to animate his followers. Two of his sons, **Jacob** and **Simon,** were crucified by Tiberius Alexander ("Ant." xx. 5, § 2); another son, **Menahem,** became the leader of the Sicarii and for a time had much power; he was finally slain by the high-priestly party ("B. J." ii. 17, §§ 8–9).

Grätz ("Gesch." iii. 251) and Schürer ("Gesch." i. 486) identify Judas the Galilean with Judas, son of Hezekiah the Zealot, who, according to Josephus ("Ant." xvii. 10, § 5; "B. J." ii. 4, § 1), led a revolt in the time of Quintilius Varus. He took possession of the arsenal of Sepphoris, armed his followers, who were in great numbers, and soon became the terror of the Romans.

JUDAS ISCARIOT (איש קריות = "the man of Keriot," a town in Judah; Josh. xv. 25; see also Rapoport, "'Erek Millin," p. 28, *s.v.* אזכרות; Taylor, "Sayings of the Jewish Fathers," p. 170): One of the twelve Apostles of Jesus; he betrayed his master and delivered him up to the priests for judgment (Matt. x. 4; Mark iii. 19; Luke vi. 16). That Jesus should have shown so little foresight in the choice of an apostle naturally caused great perplexity to his followers; and consequently the Gospels present the facts of the betrayal as well as the character of Judas from partizan points of view and in different ways. According to Luke xxii. 3–5 (comp. John xiii. 27) Satan entered into him while he sat at the table, among the rest of the Apostles, to partake of the Passover meal, and he left to commune "with the chief priests and captains, how he might betray" Jesus, while they "covenanted to give him [Judas] money." In Mark xiv. 10–11 Satan is omitted; in Matt. xxvi. 15 the price of thirty pieces of silver is given with a view to the Christian interpretation of Zech. xi. 12 (comp. Matt. xxvii. 3–9 *et seq.*). Possibly the story that Judas was moved by avarice is a later invention. In fact, the tendency to make Judas the type of greed is manifested in John xii. 4–6, according to which passage he was a thief who misappropriated the money in the common treasury of which he had charge; therefore he objected to having fine ointment worth three hundred pence expended upon the anointing of the feet of Jesus by Mary instead of being deposited with the money reserved for the poor.

In all likelihood, Judas, being of the district of Judah, while the rest were all Galileans, was not impressed with the Messianic character claimed by Jesus, and therefore, merely to obtain immunity for himself, committed the cowardly act of betraying him to the soldiers and officers of the priests that came with swords and staves to seize him and his followers. He singled out Jesus by kissing him while greeting him as rabbi (John xviii. 1 *et seq.*); they then seized Jesus and brought him bound to Annas and Caiaphas the high priest (Matt. xxvi. 47 *et seq.*, and par. pas.), while his disciples, including Peter, left their master to his destiny.

The Gospels, however, relate that Jesus knew beforehand that Judas would betray him, and accordingly announced it at the Passover meal in the very presence of Judas, pointing him out as the betrayer before he left the table and immediately before the betrayal took place (Matt. xxvi. 21 *et seq.*, 46 *et seq.*; Mark xiv. 18 *et seq.*, 42; Luke xxii. 21; John xiii. 21, xviii. 4).

The End of Judas.

About the further history of Judas various legends circulated. Matt. xxvii. 3 *et seq.* relates that when he saw that Jesus was condemned, he repented of his act and took back the thirty pieces of silver he had received from the priests and elders and cast the money into the Temple treasury, calling it the price of innocent blood, and then went away, and, like Ahithophel (II Sam. xvii. 23), hanged himself; but the priests would not use the money for Temple purposes, it being blood-money (comp. Deut. xxiii. 18); they decided, therefore, to buy with it the potter's field in which to bury strangers; hence its name, "Ḥaḳal Dama" (= Field of Blood).

As is so often done by Matthew, the passage Zech. xi. 12–13, strangely confused with Jer. xviii. 2 and xxxii. 6 *et seq.*, is referred to as a typical prophecy of the event here narrated. Quite different is the story of Judas' end related in Acts i. 18–19. There, he bought the field with the money and died upon it through a fall: "falling headlong, he burst asunder in the midst, and all his bowels gushed out"; this account is concluded by a reference to Ps. lxix. 26 (A. V. 25). See Aceldama. According to Papias, the disciple of John (see Gebhardt and Harnack, "Patrum Apostolicorum Opera," i. 2, 93 *et seq.*), Judas' whole body was so swollen as to be a terrible sight to those passing by, and, after lying there a short time, he burst open on his own field. In the Arabic Apocryphon, "Evangelium Infantiæ Salvatoris," ch. xxxv., Judas is represented as having been possessed by Satan at the birth of Jesus; and when the infant Jesus was taken near him to afford him relief from an ailment, Jesus beat him instead. In the Middle Ages Judas was frequently made a subject of popular myths and represented as the type of wickedness.

T. K.

JUDAS MACCABEUS: Son of the priest Mattathias, and, after his father's death, leader against the Syrians. When he entered on the war he must have been in the prime of his manhood. At first he did not fight pitched battles, but made unexpected night attacks upon villages and small towns on the edge of the desert, in order to drive out the Syrians, destroy the heathen altars, and punish Jewish traitors (I Macc. iii. 8; II Macc. viii. 1; Josephus, "Ant." xii. 6, § 4). He and his brothers probably had then only a small troop of fugitives about them, as his father had had, and could not carry on an open warfare; it was the continued small conflicts that gradually created for him an organized army. At first only the Syrian local authorities who were immediately concerned paid any attention to the Jewish rebellion. Apollonius, strategus of Samaria, attacked Judas with his army, but was defeated and slain, and his sword was thenceforth borne by Judas; on that occasion the Jews took a great deal of booty (I Macc. iii. 10–12; "Ant." xii. 7, § 1). This victory must have brought Judas many recruits, and the news of the battle moved Seron, strategus of Cœle-Syria, to march against him with a considerable army, including many Jewish traitors. The small Jewish band, weak with fasting, was at first dismayed by the might of the enemy, but Judas succeeded in inflaming their zeal for the holy cause, and they gave battle in the narrow pass of Beth-horon, northwest of Jerusalem. The Syrians were defeated and pursued as far as the plain; 800 of them fell, and the rest fled into the country of the Philistines (I Macc. iii. 13–14; Josephus, *l.c.*).

Syrians Advance Against Judas.

Antiochus undertook an expedition (166–165 B.C.) into Persia (I Macc. iii. 37); he needed money to meet the war-tax of the Romans, and the tax-income from Judea had been interrupted by the disturbances; he left the government and his minor son, Antiochus V., in the care of Lysias, a man of royal blood. Lysias then sent Ptolemy, son of Darymenes (II Macc. viii. 8 makes him strategus of Cœle-Syria and Phenicia), Nicanor, son of Patroclus, and Gorgias—men experienced in war—to Judea with an army of 40,000 infantry and 7,000 cavalry; they went as far as Emmaus ("Ant." xii. 7, § 3). Victory seemed to the Syrians so assured that they had Phenician traders with them in camp prepared to buy as slaves the captives whom they expected to take; the money was intended by Nicanor to defray the Roman war-tax (II Macc. viii. 10). The Jews assembled in Mizpah, the old place of worship (I Macc. iii. 46; Josephus and II Macc. do not name the place), where, in sackcloth and ashes, they observed a solemn day of prayer and repentance. Judas' 3,000 men were scantily armed; he had no cavalry, and there were not even enough helmets and swords for his force; but his followers were well disciplined (I Macc. iii. 55, iv. 6; comp. vi. 6; "Ant." xii. 7, §§ 3-4). According to another authority, Judas had as many as 6,000 men, who were divided into four equal companies of 1,500, and commanded by four of the Maccabean brothers, the first division by Judas himself; the fifth brother, Eleazar, read aloud from the Bible (comp. the difficult passage I Macc. iii. 48), and gave the password: "Help of God" (II Macc. viii. 16–23). This authority deserves credence in preference to I Maccabees or Josephus (who slavishly follows I Macc.). By a stratagem, Judas gained an advantage over Gorgias (I Macc. iv. 1–25; "Ant." xii. 7, § 4), overcame both him and Nicanor, and killed 9,000 Syrians (perhaps 900); he captured much spoil, including the money of the Phenician traders (II Macc. viii. 23-25). It is probably only a tradition that this battle took place on Sabbath eve and that the stricter Jews were thereby prevented from pursuing the enemy (II Macc. viii. 23-29).

Ḥanukkah.

The next battle was with Lysias himself (autumn of 165 B.C.), who approached from the south, where he had hoped to find support from the Idumeans. The two armies met at Beth-zur, south of Jerusalem and on the road to Hebron. Judas, although much weaker, gained a brilliant victory and compelled Lysias to retreat to Antioch (I Macc. iv. 26–35; "Ant." xii. 7, § 5; II Macc. xi. 1–15 places Lysias' campaign much later and makes the enemies conclude peace with each other, which can hardly be true). Judas and his associates could now enter Jerusalem; only the citadel, the Acra, remained in the hands of the Syrian garrison; with them, probably, were also the Jewish traitors, perhaps with the high priest Menelaus at their head. The first thing the patriots did was to reconsecrate the profaned Temple, and with this is connected the origin of the Ḥanukkah feast. This closes the first period of the Maccabean revolt.

Judas was left in peace for about two years. But the small neighboring tribes, which did not like to see the Jews once more in power, arose again, as in the time of Nehemiah. Judas punished first the Idumeans in Acrabatene, in the region of the Dead Sea; then the tribe of Baans. He proceeded next against the Ammonites in the land east of the Jordan, who were led by Timotheus; took their city Jaazer, and made their wives and children captives (I Macc. v. 1–8; "Ant." xii. 8, § 1). The Jews in Gilead, who had taken refuge in the fortress Diathema, sent word to Judas that they were severely beset by Timotheus, and begged for aid; other messengers reported the straits of the Jews in Galilee, who likewise were harassed by their neighbors. Judas sent his brother Simeon to Galilee with 3,000 men; the enemies of the Jews were punished, and the comparatively few Jews there were transferred to Jerusalem with their wives and children.

March Against Gilead.

Judas and his brother Jonathan went next against Gilead with 8,000 men, leaving the remainder of the army to Joseph b. Zechariah and Azarias, who, contrary to orders, fought with Gorgias for the possession of Jabneh, and suffered a severe defeat. They "came not of the seed of those by whose hand deliverance was given unto Israel" (I Macc. v. 62). Judas and Jonathan fought with great success in Gilead; the city of Bosor was taken and Timotheus put to flight; the latter, indeed, gathered his forces together again, but was again defeated. The Jews of Gilead were transferred also to Judea, whither Judas returned victoriously by way of Scythopolis, after being compelled to fight his way through Ephron (I Macc. v. 3–50; "Ant." xii. 8, §§ 2–5). Judas had been successful in all these battles, which were planned with great skill.

Battle at Beth-zur.

Meanwhile, Antiochus IV. died (164 B.C.; Seleucidan era 148, not 149 as in I Macc. vi. 16). Before his death he appointed his trusted friend Philip as regent and guardian of his son. There was really no government to keep watch on the Jews. Thus Judas undertook the siege of the Acra, the garrison of which continually annoyed those who attended the Temple, although the latter was strongly fortified. Some in the Acra, among them renegade Jews, escaped and fled to Antioch, bitterly complaining that they, who had remained faithful to the king, were threatened in life and property. Thereupon another strong army was sent into Judea; Lysias commanded 100,000 infantry, 20,000 cavalry, and 32 elephants; the young king, nine years of age, marched with him. It was an imposing army, such as the Jews, probably, had never previously seen. The Syrians could not, indeed, easily capture the fortified Beth-zur, yet Judas was obliged to abandon the siege of the Acra and turn against the enemy. A battle ensued (162 B.C.) at Bath-zacharias, four hours north of Beth-zur. One of the brothers, Eleazar, was killed in the execution of an act of daring; Judas, too, was conquered, and Beth-zur fell into the hands of the Syrians (I Macc. vi. 28–48 [where the defeat is scarcely mentioned]; "Ant." xii. 8, §§ 3-5; "B. J." i. 1, § 5; in II Macc. xiii. 1–17 a victory is made of it). The Syrian army then besieged the Temple mount; the besieged, who had their brethren from Galilee and Gilead among them, were in want of provisions, since it was the Sabbatical year (Seleucidan era 150), and hence they sued for peace. Lysias granted them complete religious freedom, which was what they had been fighting for, and this right was not again taken from them. The Jews were compelled, however, to submit to the Syrians, as before the war, and even the fortifications of the Temple were destroyed (I Macc. vi. 49-54; "Ant." xii. 9, § 5; II Macc. xiii. 18-22).

Bacchides and Alcimus.

The cause of all the evil, Menelaus, was executed at this time ("Ant." xii. 9, § 7; II Macc. xiii. 3-8). Perhaps it was this peace with Lysias to which II Maccabees xi. 14 intended to refer, although the passage places it as early as Lysias' first campaign. Probably, Lysias concluded peace in order to be able the more easily to subdue his rival Philip. But soon a more formidable enemy appeared in the person of the new king Demetrius I. (162-150), who put to death both Lysias and his royal ward. The renegade Jews, among them Alcimus, whom Josephus for some strange reason calls high priest, even at this stage, went to Demetrius and again complained of the persecutions they endured at the hands of Judas and his party. Demetrius, energetic and impulsive as he then was, immediately sent Bacchides to Judea with a large army, placed Alcimus under his protection, but bade him remove Judas and his companions. Bacchides endeavored to lure Judas into his power by pacific assurances; Judas, however, saw through his craft. But now internal divisions again became manifest; the Hasidæans, when they saw their religious freedom assured to them, willingly recognized Alcimus and the Syrian dominion—but to their misfortune, for Bacchides, in spite of his solemn oath, killed sixty of them, thereby cowing the others.

Although the land was by no means pacified, Bacchides went back to Antioch, leaving behind only one command to protect Alcimus. The party of Alcimus fought now with that of Judas, but the latter was the stronger, and Alcimus sent again to the king with a plea for aid (I Macc. vii. 1-25; "Ant." xii. 10, §§ 1-3).

The king sent a strong army under Nicanor (not the Nicanor of Antiochus Epiphanes), a man who had enjoyed his confidence in Rome. Nicanor also first tried stratagem, and for a time Judas believed in his friendly disposition, but he then discovered the treachery and escaped the danger in time (I Macc. vii. 26-30; "Ant." xii. 10, § 4). II Macc. xiv. 12-27 represents Nicanor as feeling real respect for Judas; he made peaceful propositions to him through Posidonius, Theodotus, and Mattathias, which were accepted; the friendship was increased by their personal acquaintance, and Nicanor is said to have advised Judas to take a wife and found a race of heroes. But Alcimus looked upon these developments with alarm, charged Nicanor with treachery before the king, and declared that Judas desired to be high priest in his stead.

Then, for the first time, hostility broke out between Nicanor and Judas, and a battle was fought at Capharsalama. Graetz, Schürer, and Wellhausen state that it ended in the defeat of Nicanor, and that is, indeed, the literal statement of I Macc. vii. 32, where it is said: "There were slain of Nicanor's side about 5,000 men, and [the rest] fled into the city of David." But one would naturally suppose that the Syrian army would flee into the Acra, since the city of David was in Judas' hands; and it is also said immediately afterward (verse 33): "After this went Nicanor up to Mount Sion": hence Judas must be intended in verse 32, not Nicanor. In fact, Josephus ("Ant." xii. 10, § 4), who always uses I Maccabees, has another version: "He beat Judas, and forced him to fly to that citadel which was at Jerusalem" (*i.e.*, to that part of the mount fortified by Judas). Since, then, Judas had fled to Jerusalem, it is comprehensible that Nicanor, being threatened by the priesthood there, demanded his surrender (I Macc. vii. 26-38; "Ant." xii. 10, §§ 4, 5; II Macc. xiv. 11-36).

Nicanor Day.

Thereupon Nicanor proceeded to the region of Beth-horon, northwest of Jerusalem, a place situated favorably for the Jews, who were acquainted with the country; Judas encamped against him at Adasa. The battle that ensued was desperate, and ended in a glorious victory for the Jews; Nicanor fell, and his troops to the number of 9,000 were put to flight (I Macc. vii. 39-50; "Ant." xii. 10, § 5; II Macc. xv. 1-36). Judas appointed the 13th of Adar, the day of the victory (161 B.C.), as a feast-day, and it still has a place in the calendar of special days ("Megiliat Ta'anit").

Was Judas High Priest?

Judas was again the ruler of the whole land. According to Josephus ("Ant." xii. 10, § 6), the sudden death of Alcimus occurring at this time, the people gave the office of high priest to Judas. Josephus ("Ant." xii. 11, § 2), in relating Judas' death, observes also that he was high priest for three years; but in another place he says that after the death of Alcimus there was an intermission of seven years in the office of high priest ("Ant." xx. 10). Judas' three years, then, fell probably immediately after the consecration of the Temple (165-162), that is, before the election of Alcimus, who, moreover, according to I Maccabees, may possibly have died after Judas. Neither I Maccabees nor the rabbinical authorities, however, speak of Judas occupying the high-priesthood (see Grätz, "Gesch." 2d ed., ii. 365, note 3).

Treaty with Rome.

I Macc. viii. (comp. "Ant." xii. 10, §§ 6, 11; II Macc. iv. 11) then relates in detail how Judas made a treaty with Rome, and describes the power of that country, probably not as it appeared to Judas, but as it appeared to the author. Judas may safely be accredited with political sagacity enough to see the advantage of suing for the favor of the Romans, for he must have observed that they were continually concerned in Syrian trade. The narrative is also furnished with names and details, which show that it has some real foundation in fact. This is the opinion of Graetz, Schürer, and Niese. That Josephus, in "B. J." i. 1, § 4, does not mention the treaty is probably due to the fact that he is merely summarizing. Justin (xxxvi. 3, § 9) speaks of the "amicitia Romanorum" for which the Jews had asked, only it is not known whether he intends to refer it to the time of Demetrius I. or to that of Demetrius II. The document, however, which the Romans are said to have given to Judas' ambassadors (I Macc. viii. 23–30) is generally held to be not genuine. After the defeat of Nicanor, Demetrius again sent a large army under Bacchides, which encamped near Berea (Berzetho); Judas encamped near Elasa (Eleasa). The courage of the Jews sank at the sight of the large army confronting them, and they fled, only 800 men remaining for the battle.

Judas' Death.

There was no escape for Judas. Once more he performed prodigies of valor; with a few courageous followers he put the right wing of the enemy to flight, but he was hard pressed by the left wing and fell fighting (160 B.C., in the month of Nisan). His body was concealed by his brothers and buried in Modin (I Macc. ix. 1–21; "Ant." xii. 11, § 6). The patriotic party, called "Friends of Judas," was now relentlessly persecuted.

I Macc. iii. 1–9 gives an enthusiastic description of the warlike ability, heroism, and bravery of Judas and of the punishment he inflicted upon the enemies of God, both heathen and Jews; Josephus ("Ant." xii. 11, § 2) emphasizes the fact that Judas, like his father, Mattathias, fought for the freedom of his people and won everlasting renown. This characterization is wholly confirmed by fact. Judas' strict piety should also be emphasized; he prays to God before almost every battle; he fulfils the commandment of Deut. xx. 1–9; he sings psalms (I Macc. iv. 24); he watches for the true prophet (*ib.* iv. 46); he introduces Ḥanukkah and Nicanor Day.

G. S. KR.

JUDD, MAX (originally **Maximilian Judkiewich**): American manufacturer, consul-general, and chess-player; born Dec. 27, 1851, at Cracow, Austria; emigrated to the United States when eleven years old. From 1864 to 1867 he lived in Washington, D. C., and, on becoming an American citizen, was granted permission by an act of Congress to assume his present name. Since 1873 he has resided in St. Louis, Mo. From 1874 to 1893 he was engaged in business as a wholesale cloak-manufacturer, and in the latter year was appointed by President Cleveland United States consul-general at Vienna, which post he held for more than four years.

Judd has been very active in the American chess world. He won fourth prize at the Michigan state tournament of 1869; first prize at the Ohio state tournament held at Cincinnati in 1872; and second prize at the centennial tourney at Philadelphia in 1876. He lost a match with McKenzie, champion of the United States, by 5 to 7 in 1883; won one with Showalter by 7 to 3 in 1889; and gained first prize at the Western Chess Congress held in Chicago in 1903.

Though Judd was never pitted against Steinitz or Zukertort in set matches, he played a large number of games with those masters, winning a majority; and a game which he won from Blackburne (New York, 1889) has been published as a specimen of fine play ("Examples of Chess Master-Play," transl. from the German of Jean Dubresne by C. T. Blanshard, New Barnet, 1893).

A. A. P.

JUDE, DER: Periodische Blätter für Religion und Gewissensfreiheit: Weekly magazine published in Altona, Germany, from April 10, 1832, to Dec. 31, 1833, by Gabriel Riesser. Its chief aim was to agitate for the social emancipation of the Jews of Europe. Full accounts were published of the debate in the English Parliament during 1833 on the proposed removal of the Jewish disabilities.

Arms of the Jews of Judenburg.

JUDENBURG: One of the oldest cities of Styria, Austria; the ancient **Idunum.** The name of Judenburg occurs in a document of 1075. Then there were many Jews in the district; Jews probably had been living there for a century. Influential, and in almost complete control of its commerce, they excited by their success the envy of the Christians, who spread and believed the most absurd reports concerning them. About the time when the accusation was spread at Fürstenfelde that the Jews had desecrated the host, it was reported at Judenburg that the Jews had formed the design of murdering all the Christians in the night of Christmas. It was said that a Jewish girl who was in love with a Christian had betrayed the plan to him, urging him to save himself by flight. The Christian in turn warned his fellows, and the people determined to exterminate the Jews. Many of them fled, but a great number were killed. This event did not deter the Jews, however, from resettling there shortly after. As early as 1329 a Jew Höschel is mentioned as lending money to the convent of Admont; and it is also said that the Bishop of Lavant borrowed money from the Jews David and Höbsel. Among the Jews that Duke Albert II. took under his especial protection were Haslein, Velchlein, Isserlein, and Freudmann. In the beginning of the fifteenth century twenty-two Jewish wholesale dealers were established at Judenburg each of whom possessed a fortune of over 100,000 gulden, and of thirty-eight other wealthy merchants the majority also were Jews. A rather long street called "Judengasse" was occupied almost entirely by the Jews, but was not considered as a ghetto, as they were living also in other parts of the city.

In 1496 the Diet of Styria obtained an order from Emperor Maximilian expelling the Jews from Styria, Carinthia, and Carniola, because they had been "guilty of desecrating the holy sacrament of the altar and murdering Christian children." The Jews again settled in these three crown lands under Emperor Francis Joseph I. The escutcheon of the city of Judenburg bears an Austrian eagle and a Jew's head with pointed beard and peaked hat. In the chief square is still standing a house on which the figure of a Jew's head is carved as the sign of the city; it is said that this was the principal synagogue of the Jews. Legend reports that on the occasion of the massacre of the Jews the last one caught was strangled with a chain at the city gate still called "Judenthürl." At present there is a small community in the city belonging to the rabbinate of Graz, with a chapel and a cemetery.

JUDENHUT: Tall, conical hat, generally yellow, serving, in conformity with the decrees of the fourth Lateran Council (1215), as a distinguishing mark for the Jews. This council ("Mansi Concilia," xxii. 1055 *et seq.*; Grätz, "Gesch." 3d ed., vii. 16) decreed that every Jew should wear a distinguishing mark; this decree was reaffirmed by the Synod of Vienna, 1267. Pope Paul IV., in 1555, decreed that the Jews should wear hats of a yellow color (Grätz, *l.c.* ix. 339; Berliner, "Gesch. der Juden in Rom," ii. 5). In paintings and engravings since the thirteenth century Jews can be recognized by their pointed hats. The Jewish troubadour Süsskind von Trimberg says that he walked about in the Jewish manner with a long mantle and a pointed hat. His picture in an illuminated manuscript containing the troubadours' songs ("Manessische Handschrift") shows him with such a hat (Hagen, "Minnesinger," ii. 258-260, 536-538; Grätz, *l.c.* vi. 234). As a mark of exceptional favor, some distinguished Jews were exempted from wearing the Jews' hat; the municipal board of Venice, for instance, allowed the famous physician and professor Jacob Mantino to wear during two months the regular black doctors' cap ("Vessillo Israelitico," 1903, p. 310). See Head-Dress.

G. D.

JUDENSCHREINSBUCH: Collection of deeds belonging to Jews in the St. Lawrence parish of the city of Cologne (Germany); since the thirteenth century they have been kept in a separate alcove; later on they were bound into book form. The Jewish deeds were written in Latin and often also in Hebrew, the Hebrew text being sewed to the Latin document. They date from about 1230 to 1347, and have been edited by Robert Höniger and Moritz Stern ("Judenschreinsbuch der Laurenzpfarre zu Köln," Berlin, 1888) for the Historische Commission.

G. D.

JUDENSCHULE (Schola Judæorum): The usual German expression for "synagogue" in medieval times. It seems to have been first used in the charter of Frederick II. of Austria, issued 1244 (Scherer, "Die Rechtsverhältnisse der Juden," etc., p. 182), wherein wilful damage done to the synagogue is declared punishable by a fine of two talents. The reason for calling a synagogue "school" is found in the practise, traceable to Talmudic times, of using the synagogue as a schoolroom (Shab. 11a). The lack of decorum in the ancient synagogues imposed on the term "Judenschule" the meaning of "a disorderly crowd." Sessa therefore originally gave to his farce, known later as "Unser Verkehr," the name "Judenschule" (1813).

The Italian Jews also call their synagogue "scuola"; so the Scuola Catalana in Rome ("Vessillo Israelitico," 1904, p. 14). In Slavic countries the equivalent "shkola" is used for "synagogue," and the sexton is therefore called "shkolnik," just as in some German documents the ḥazzan is called "Schulsinger." Similarly in England the synagogue is called "shool" by the Ashkenazim. The name "Schulmeister," however, seems to be limited to the teacher, and is not applied to the rabbi.

G. D.

JUDENSTÄTTIGKEIT ("Jews' settlement" or "Jews' establishment"): Archaic technical term for the legal status of a Jewish community, and as such identical with the more frequent term "Judenschutz." It seems to have been used only at Frankfort-on-the-Main and Worms. The first edition of the Frankfort "Judenstättigkeit" was printed as a means of political agitation by the Frankfort gilds in 1613. The next authorized edition, identical with the first, was printed by the Frankfort senate in the following year. This law, however, was superseded, through the events connected with the Fettmilch riot, by one issued by Emperor Mathias (1617) and confirmed by Emperors Leopold (1661) and Joseph I. (1705). Both are included in Schudt's "Jüdische Merckwürdigkeiten." A new "Stättigkeit," issued by Prince Dalberg in 1807, was abrogated in 1811, when the Jews received full rights of citizenship.

JUDGE.—Biblical Data: The common Hebrew equivalent for "judge" is "shofeṭ," a term found also in the Phenician as "sufeṭ" (= "regulator"); the latter is a name given to those who had chief control in the Sidonian colonies, and to the Hebrew "shofeṭ" was originally attached a similar significance. But alongside of the original meaning, which the Hebrew retained (see Judges, Book of), the term assumed the significance of "judge." The later Hebrew word "dayyan" (Ezra vii. 25, Aramaic portion), which has come in Talmudic and post-Talmudic times to be the word used exclusively for "judge," is found in the Bible only in reference to

God (I Sam. xxiv. 16; Ps. lxviii. 6). The term "pelilim" (Ex. xxi. 22; comp. Deut. xxxii. 31), usually translated "judges," is a rare word; and a different reading has been suggested by Budde for the passage quoted (Stade's "Zeitschrift," xi. 101). The term "elohim" is also used in reference to judges (Ex. xxi. 6; xxii. 7, 8; comp. Ps. lxxxii. 1, 6); but some of the modern commentators translate this word here, as elsewhere, by "God" (Hastings, "Dict. Bible," *s.v.* "Judge, Judging," and note).

Institution.

Among the early Israelites, the elders of the tribes, and subsequently the elders of the locality, administered justice (see ELDER). Acting upon the advice of Jethro, Moses selected "able men out of all Israel and made them heads over the people, rulers of thousands, rulers of hundreds, rulers of fifties, and rulers of tens; and they judged the people at all seasons: the more important [A. V. "hard"] causes they brought unto Moses, but every small matter they judged themselves" (Ex. xviii. 25, 26; comp. Deut. i. 15). It is also recorded that Moses once appointed Aaron and Hur to act as chief judges in his absence (Ex. xxiv. 14). The judge was considered a sacred person; seeking a decision at law was called "inquiring of God" (Ex. xviii. 15). Moses is often represented as bringing a case to God before rendering a decision (Ex. xviii. 19; comp. Num. xv. 34, 35; xxvii. 5).

Development.

After the Israelites settled in Canaan the system introduced by Moses seems to have fallen into desuetude, because there was no union among the tribes. The military rulers of the people in the time of the Judges probably assumed control over the administration of justice. Samuel is recorded as having traveled from place to place judging Israel, while his headquarters were at Ramah (I Sam. vii. 15-17, xii. 3; comp. Judges v. 10), and his sons judged the people at Beer-sheba (I Sam. viii. 2).

With the establishment of the monarchy the king and his officers were naturally regarded as the supreme authority and the final court of appeals (II Sam. xii. 1-16, xv. 2, xvi. 5-9). Solomon was considered "to have the wisdom of God in him to do judgment" (I Kings iii. 28). Although David is recorded as having appointed 6,000 Levites as judges and officers (I Chron. xxiii. 4, xxvi. 29), the organization of courts of justice in accordance with the Deuteronomic code (Deut. xvi. 18, xvii. 8-13) was not effected until the time of Jehoshaphat. He established courts all over Palestine, and appointed two chief justices—a priest over ecclesiastical affairs, and a "nagid" (the ruler of the house of Judah) over temporal affairs (II Chron. xix. 4-11). In Jerusalem the royal judges soon superseded the elders (Jer. xxvi. 11); but in the smaller communities the elders still continued to exercise their wonted authority (Isa. iii. 14; II Kings xxiii. 1). On the return of the Jews from Babylon, Ezra was ordered by Artaxerxes to appoint judges "which may judge all the people that are beyond the river" (Ezra vii. 25, 26; x. 14).

The qualifications for judgeship are tersely described in Jethro's words, "able men, such as fear God, men of truth, hating covetousness" (Ex. xviii. 21). The judge must not be influenced by the position or wealth of the litigants (Ex. xxiii. 6; Deut. i. 17, xvi. 19), and must not accept bribes (see BRIBERY). It was the duty of the judges, in order to put away from themselves the guilt of innocent blood, to determine by measurement the town nearest the place where was found the body of a murdered man whose murderer was not known (Deut. xxi. 1-9). The judge had to be present at the infliction of the punishment of flagellation (Deut. xxv. 1-3). See SANHEDRIN.

E. G. H. J. H. G.

——**In Rabbinical Literature:** While the term "dayyan" in Talmudic literature is identical with "sage," "student of the Law," "professor of the academy," or "rabbi of the community," perfect freedom was given to the litigants in a civil case to choose from among the people their own judges. Even one man could administer justice and enforce his decisions, if he was known as a scholar ("mumḥeh"), or if the litigants agreed to abide by his decision (Sanh. 5a). If one of the litigants chose one judge and the other chose another, these two judges might select a third, even against the will of either party; and the decision rendered by them was binding (*ib.* 23a). Each one of the judges, however, was careful not to accept the appointment unless he was satisfied that the other members of the court were worthy and respectable men (Sheb. 30b). The Rabbis recommended that all cases should be brought before a regularly constituted court of three; and the larger the court the better (Sanh. 8a; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 3, 3, 4).

Qualifications.

The qualifications of the judge were many and various. The members of the three classes of courts—the Great Sanhedrin, the Lesser Sanhedrin, and the Court of Three (Josephus, in "Ant." iv. 8, mentions a Court of Seven)—which, according to Talmudic tradition, existed in Palestine during the second commonwealth (see BET DIN; SANHEDRIN), had to be duly ordained and authorized by the nasi of the Sanhedrin or by three of its members (Sanh. 13b; Maimonides, "Yad," Sanh. iv.; see AUTHORITY; ORDINATION). Only ordained judges could decide cases involving fines or corporal punishment (Sanh. 14a; "Yad," *l.c.* 12).

The members of the Sanhedrin had to be familiar not only with Jewish law and tradition, but also with many languages and sciences (Sanh. 17a). Priests and Levites were preferred to laymen (Sifre, Deut. xvii. 9); and only such Israelites could serve as members of the Sanhedrin as were of pure Jewish descent (Sanh. 32a; see YIḤUS). A very old man, a eunuch, or one who had no children could not be a member of the Sanhedrin (*ib.* 36b). Besides possessing the necessary mental and spiritual qualifications, a member of the Sanhedrin had to be physically well built, of imposing figure, and without a blemish on his body (*ib.* 17a). While members of the Court of Three were not required to possess all these qualifications, they had to be distinguished for the following seven qualities: wisdom, humility, fear of God, hatred of money, love of truth, amiability, and a good reputation ("Yad," *l.c.* ii. 7, where these qualities are derived from Biblical passages).

Persons related to one another were disqualified from acting together as judges or as witnesses; judges were required to be amicably disposed toward one another (Sanh. 29a), and there could not be among them one who was a particular friend or enemy of one of the litigants (Ket. 105b). One who witnessed a crime or a transaction could not act as judge in the matter (Mak. 12a). All those disqualified from testifying in Jewish courts (see Evidence) were prohibited also from acting as judges (Nid. 49a). A woman or a proselyte was disqualified for judgeship (Yeb. 102a; B. Ḳ. 15a; Tosef., *s.v.* "Asher"). There is no age limit given in the Talmud. While the opinion expressed is that no one under forty should give decisions ('Ab. Zarah 19b), the later rabbis allowed a person of eighteen years to assume the title of judge (comp. Shab. 56b), while others were of the opinion that one of thirteen years of age might administer justice (Ḥoshen Mishpaṭ, 7, 3; comp. Yoreh De'ah, 242, 13, 14).

Equality Before the Law.

Equality before the law should be the principle guiding all the actions of the Jewish judge (Lev. xxiv. 22; Deut. i. 17). A case involving a "peruṭah" (the smallest Palestinian coin) should be regarded by him with the same gravity as one involving thousands (Sanh. 8a). Both parties should be accorded equal respect by the court, and no preference should be shown even to the learned man (Sheb. 30a; "Yad," *l.c.* xxi. 1; Ḥoshen Mishpaṭ, 17, 1). The judge must not listen to the arguments of one of the litigants in the absence of the other, nor must he assist either of them in his arguments, but must listen quietly to the presentation of the case by both parties and then render his decision (*ib.* 30b, 31a; "Yad," *l.c.* 10; Ḥoshen Mishpaṭ, 17, 8). He should attend to the cases in the order in which they are presented, although he may attend to an orphan's case before that of a widow, to a widow's before a learned man's, to a scholar's before that of an ignoramus, and to a woman's before a man's (Sanh. 8a; "Yad," *l.c.* 6; Ḥoshen Mishpat, 15, 1, 2). There was no interpreter between the judge and the parties concerned in the case, except when the judge understood a language, but could not speak it fluently (Mak. 6b). The judge was enjoined to arbitrate between the contending parties; and the first question put to them was, "Do you wish law or arbitration?" but he could not compel them to arbitrate except when orphans were involved or when the case could not be established on a legal basis. If the decision was once rendered in accordance with law, the same court could not again arbitrate, even if both parties wished it (Sanh. 6b; "Yad," *l.c.* xxii. 4, and "Kesef Mishneh," *ad loc.*; Ḥoshen Mishpaṭ, 12, 2–5).

Forty years before the destruction of the Second Temple, the Talmud relates, the Sanhedrin removed from the Temple premises to a place called "trade-hall" ("ḥanut"), and since then the Jewish courts have had no jurisdiction in cases involving capital punishment ('Ab. Zarah 8b; Sanh. 41a). The authority of the judge was still further curtailed after the wars of Bar Kokba, when the ordination of judges was prohibited (Sanh. 14a). As only ordained judges could decide penal cases, after that period judges could, theoretically, attend only to strictly civil cases; but they were given the power to decide also such penal cases as involved actual injury to others—that is, those of common occurrence and the settlement of which was an urgent matter (Giṭ. 88b; Ḥoshen Mishpaṭ, 1, 1; see Jurisdiction). Still when there was need of prompt and decisive action, the local courts frequently extended the bounds of their authority, and inflicted corporal punishment, confiscated property, and even asked assistance of non-Jewish governments to force obedience to their mandates (Sanh. 46a *et al.*).

While throughout the Diaspora various governments granted to the Jewish rabbis judicial authority, sometimes even in criminal cases, the tendency of the later rabbis was to submit to the law of the land in all cases; and only such matters as did not affect the community and from which the government derived no special benefit were decided in Jewish courts (Ḥoshen Mishpaṭ, 369, 6–11; see Conflict of Laws).

Judge in Error.

A judge who made a mistake in his decision of a law that is clearly stated in the Mishnah or in the Talmud or in any of the accepted codes had to try the case again if possible, but if not—as when one of the litigants could no longer be reached—he was not required to pay any loss resulting from his decision. If the mistake was in a matter disputed by the authorities, but which was generally decided in accordance with one opinion and the judge decided in accordance with the opposite opinion ("shiḳḳul ha-da'at"), if he was a learned man ("mumḥeh") and the litigants had agreed to abide by his decision, or if he had been appointed a judge by the recognized authorities, he had to give them a new trial; and if this was impossible, he was not required to pay. But if he was not a learned man, although the litigants had agreed to abide by his decision, or if he was a learned man but had no permission to judge and the litigants had not agreed to abide by his decisions, he had to give them a new trial; and if this was not possible, he had to pay the damages caused by his decision (Sanh. 32a, 33a; "Yad," *l.c.* vi. 1; Ḥoshen Mishpaṭ, 25, 1–3, Isserles' gloss, and "Pitḥe Teshubah," *ad loc.*). See Accusatory and Inquisitorial Procedure; Criminal Procedure; Execution; Fees; Sanhedrin.

S. S. J. H. G.

JUDGES, BOOK OF (Hebr. שופטים): In the Hebrew canon, the second book of the Earlier Prophets, placed between Joshua and Samuel.

§ I. Name: The book derives its name from the fact that it deals with the "Judges," a term which, according to the statements found in the book (comp. ii. 11–19 and the constantly recurring formulas in iii. 7, vi. 1; iii. 12, iv. 1, x. 6, xiii. 1; iii. 8, iv. 2, 9, x.

7), designates men who dealt out justice to the oppressed people (comp. שׁפט, Ps. x. 18); hence it is used in the sense of מושיע = "rescuer" (ii. 16, 18). The word, however, means more than this and more than the modern "judge": it means the leaders or rulers (comp. the Suffetes [= שופטים] in Carthage) who took charge of the affairs of the several tribes in case of war with the Canaanites or other neighboring peoples, and who also assumed leadership of their respective tribes in the succeeding times of peace. In accordance with the needs of the time, their functions were primarily judicial (iv. 5). The book itself announces that it will deal with the time of the Judges from the death of Joshua; but the description of Joshua's death at the beginning of the book is doubtless a later addition, and the introduction repeats (i. 1–ii. 5) the theme of the Book of Joshua, namely, the conquest of the country west of the Jordan. Nor does the Book of Judges give the conclusion of the history of the Judges; for the two stories appended to the book in its present form belong not to the end of that period, but to its beginning, and the narratives forming the kernel of the book break off before the period of the Judges ends. The thread is taken up again in the Book of Samuel. It may be assumed, however, that the original Book of Judges was carried down to the end of the period and concluded with the story of Eli and Samuel, which forms the beginning of I Samuel.

§ II. Synopsis of Contents: Before discussing the several parts and their origin, it may be well to note the peculiar composition of the book. The introduction and additions may clearly be separated from the main text, giving the following three divisions: (1) introduction; (2) Book of Judges proper; and (3) appendixes.

(1) **Introduction:** (*a*) i. 1–ii. 5, a general view of the conquest of Canaan. The story is evidently intended to portray the great tribulations of the time of the Judges, which God inflicted because the Israelites partially spared the Canaanites in spite of His command to the contrary (see ii. 1–5, especially verse 3). (*b*) ii. 6–iii. 6, a general description of the conditions obtaining at the time of the Judges. The chief characteristic of this time is found in the recurring change from apostasy and punishment to repentance and deliverance. The account forms the introduction to the following stories, which are, as it were, summarized in ii. 11–19.

Sections of Book.

(2) **The Book of Judges Proper, iii. 7–xvi. 31:** This describes Israel's delivery, through divinely appointed judges, from the subjugation to the Canaanites and the neighboring peoples which it had brought upon itself. The accounts of the activities of the several judges vary considerably in length; only the five so-called "Great Judges" are treated in detail. The narratives may be summarized as follows: (*a*) iii. 12–30, account of the Benjamite Ehud, who overthrew the tyranny of the Moabites; (*b*) iv.–v., story of Barak (and Deborah), who overthrew the tyranny of the Canaanites (but see § III.); (*c*) vi. 1–viii. 32, story of Gideon of western Manasseh, who overthrew "the Midianites and the Amalekites and all the children of the East"; (*d*) x. 6–xii. 7, story of Jephthah the Gileadite of the tribe of Gad, who vanquished the Ammonites; (*e*) xiii.–xvi., account of the Danite Samson, who vanquished the Philistines; (*f*) iii. 7–11, story of the Kenazite Othniel, from the tribe of Judah, who vanquished Chushan-rishathaim (iii. 10); together with various incidental remarks relating to the so-called Minor Judges: (*g*) iii. 31, story of Shamgar; (*h*) x. 1–5, stories of Tola of Issachar and Jair of Gilead (eastern Manasseh); and (*i*) xii. 8–15, stories of Ibzan of Beth-lehem, Elon the Zebulonite, and Abdon the Pirathonite of the tribe of Ephraim. With the exception of the priestly tribe of Levi and the two tribes of Reuben and Simeon, which soon became extinct, each of the tribes is represented by at least one judge. The section viii. 33–ix. 57, dealing with the leadership of Abimelech, is not strictly of the same order as the rest.

(3) **Appendixes:** Two stories from the time of the Judges: (*a*) xvii. and xviii., the campaign of the Danites, and the transference to Dan (Laish) of the sanctuary of Micah the Ephraimite; (*b*) xix.–xxi., the outrage at Gibeah, and the resultant punitive war against Benjamin, which is almost destroyed; the measures taken for the preservation of the tribe.

§ III. Sources: The Main Text, iii. 7–xvi. 31: The earliest sources are found in the stories relating to the five Great Judges:

(1) The account of Ehud, iii. 12–30, which, with the exception of the Deuteronomistic framework (verses 12–15 and 30), is a uniform story, based doubtless on ancient tradition.

Song of Deborah.

(2) The story of Barak and Deborah, iv. and v., in which must be distinguished: (*a*) the Song of Deborah, v. 2–31, describing the sufferings and the victory of the people, and which was doubtless composed by an eye-witness. It is uncertain, however, whether Deborah herself composed this. Doubt arises from the exhortation (v. 12) "utter a song," and from the fact that the introduction does not say that she composed it, but only that Deborah and Barak sang it (*ib.* verse 1). Nor does it follow absolutely from the word שקמתי (verse 7) that Deborah composed the Song. Although קמתי is probably intended as the first person and has been so interpreted down to recent times, yet it may also have been intended as an address to Deborah, as the second person feminine singular (= קַמְתְּ; comp. לִמַּדְתְּי, Jer. ii. 33)—"until thou hast arisen, Deborah!" And even its interpretation as the third person feminine singular (= קָמַת, old form of קמה, in which the י would be secondary, conditioned by the traditional conception, according to which the expression is in the first person) is not excluded, and the reading may be, "until Deborah arose." Nor is the first person in verse 3 decisive, as it may refer to any poet. The exhortation in verse 12, "Awake, awake, Deborah: awake, awake, utter a song," formerly considered a direct proof of Deborah's authorship, really excludes this possibility, unless it is assumed that it is a poetic address of the author to herself. Aside from these doubtful arguments, the context, with its striking references to the deeds and thoughts of women (Deborah, Jael, Sisera's mother and her "wise women"), might point to a

poetess as the author. Even if the Song was not composed by Deborah, it was at least the work of a contemporary; and as such it is the earliest source for the history of Israel, and a historical document of supreme value. It not only recounts a historical fact, but breathes the wild spirit of a heroic age, and with elemental force portrays especially the pitiless delight in battle and bloodshed, and the joy of deliverance from the yoke of tyranny.

(*b*) The prose historical account in ch. iv. stands in a peculiar relation to the Song, inasmuch as the poetical account has been clearly changed into a historical narrative, which presents various contradictions to and exaggerations of the Song in regard to numbers and events. This prose account based upon the Song of Deborah is, however, only a part of the story told in ch. iv.; for, in the first place, the story of the victory of Barak and the tribes of Zebulun and Naphtali over King Jabin of Hazor (iv. 10) is joined to it, and, in the second place, there are other details which are not found in the Song, and which therefore were derived from independent tradition, especially the reference to the attack made by the Israelites from Mount Tabor. The story in ch. iv., taken for the most part from the Song, and which may be called the story of Sisera in contrast to the story of Jabin, narrates the victory of Deborah and of Barak of Issachar over Sisera at the Kishon, and the death of the last-named at the hands of Jael. In consequence of the fusion of the stories, Sisera in the account in ch. iv. does not appear as the head of a coalition of the Canaanite kings, as he is represented in the Song, where he is the chief personage, but merely as the general of King Jabin. The stories are so closely fused that they can no longer be separated, this being doubtless due to the confounding of two heroes of the name of Barak (= "lightning"; comp. the surname in "Hamilcar Barcas"); namely, Barak of Kedesh of the tribe of Naphtali (iv. 5 [A. V. 6]) and Barak of Issachar (v. 15).

Account of Gideon.

(3) The account of Gideon, vi.-viii., consisting of two separate narratives brought into harmony by the passages vii. 25 and viii. 10. According to the main text, including vi. 2-6, 11-24, 33 *et seq.*, vii. 1, and vii. 9-25 (except verse 12), as well as the passages vi. 35; vii. 2-8, 14, 16-22, preserved only in revised form, Gideon delivered the whole of Israel from the inroads of the Midianites, whose camp on Mount Gilboa he surprised. The Ephraimites then captured and killed the fugitives together with their kings Oreb and Zeeb at the fords of the Jordan (comp. especially vii. 24). According to another account, which forms a connected series of additions to the main text (*i.e.*, to vi. 2-viii. 3), and which includes vi. 7-10, 25-32, 36-40 as well as the Deuteronomically revised passage viii. 4-27, Gideon with 300 men captured the Midianite kings Zebah and Zalmunna beyond the Jordan, whither he had pursued them.

A valuable remnant of the earliest Hebrew history has been preserved in the story of Abimelech, which is appended to the story of Gideon. Jotham's daring and original parable of the trees in search of a king, included in this story, was (as appears from ix. 57) probably added at a later time by an editor who took it from a source earlier than that of the main story. This parable, one of the few remnants of purely secular writing, can not have originated in the time of Abimelech, who reigned only three years at Shechem, as its criticism of the king was evidently the result of a clearer insight than could have been possessed by a contemporary. It was probably a product of the Northern Kingdom, where the people had unfortunate experiences with elected kings.

(4) The story of Jephthah, xi. 1-xii. 7, is in general uniform; the first two verses, however, are probably revised, as they do not fit in with verse 7, nor with the passage xi. 12-29, which appears as a learned disquisition applying in no wise to the Ammonites, to whom the message was to be addressed, but to the Moabites. In xi. 35-40, also, the editor, intent on abbreviating, seems to have made changes in order not to dwell on the human sacrifice which must have been described in the original narrative.

(5) The story of Samson, xiii.-xvi., narrating in twelve sketches his deeds and tragic death. This, also, is a uniform composition, with the exception of a revision in xiii. and xiv., and is evidently the work of a single author.

In general, it may be noted in regard to these old heroic stories of the Book of Judges that there is some resemblance in language and manner of description to the narrative sources of the Pentateuch; for this reason Cornill has designated the first version of the story of Gideon, the story of Samson, and the basis of x. 6-16 as Jahvistic in character, and the story of Sisera, the second version of the story of Gideon, together with the stories of Abimelech and Jephthah, as Elohistic (other scholars, however, as Budde, think differently). These resemblances are so slight that they may be explained as contemporaneous work or imitation, rather than as a continuation of the Pentateuch sources.

Original Book.

The main text of Judges, including the above-named stories, constituted, with the exception of later additions, the earlier book, which began therefore with ii. 6; and as the initial words, "And when Joshua had let the people go," correspond with the words introducing the first valedictory in Josh. xxiii. 2, it follows that the original Book of Judges continued the original Book of Joshua. Furthermore, it follows that the second valedictory with the accompanying statements in Josh. xxiv., and the first account of Joshua's death, in Judges ii. 8 *et seq.*, as well as the present introduction to Judges, were added later; this is also apparent from the present beginning of Judges: "Now after the death of Joshua it came to pass."

The Introduction: It has been shown that the introduction is a later addition; and the fact is further proved by its contents, the story of the conquest of the country west of the Jordan, which is the theme of Joshua, being here repeated. But while the Book of Joshua narrates the story of the complete destruction of the Canaanites by the people of Israel under one commander-in-chief, the introduction to Judges says that the tribes of Israel fought singly; and it does not refer to the complete destruction of the Canaanites (comp. Judges i. 27-33, ii. 1-3). Of these two accounts the introduction to Judges is doubtless more objective, and shows a better comprehension of the actual facts, while the narrative in Joshua is founded on the Deuteronomistic revision. The introduction itself, however, is not uniform; according to i. 8, the children of Judah conquered and burned Jerusalem and killed its inhabitants, while, according to i. 21, the children of Benjamin did not drive the Jebusites out of that city, but dwelt together with them in Jerusalem "unto this day" (according to the parallel account in Josh. xv. 63, some scholars read in this passage בני יהודה instead of בני בנימן, which is derived from Josh. xviii. 28). Cornill ascribes a Jahvistic origin to the passages i.–ii. 1a, 5b, 23a; iii. 2–3, and an Elohistic origin to i. 1a; ii. 13, 20–22a; iii. 5–6.

The Appendixes: The first appendix, xvii. and xviii., is a very valuable old story. Bertheau, Budde, Kittel, Cornill, and others assert that two accounts must be here distinguished. According to one, the Ephraimite Micah made an ephod and teraphim, and hired a Levite to be to him "a father and priest"; 600 Danites then persuaded the Levite to go with them and become their priest, whereupon they conquered Laish and set up there for their tribal sanctuary the image that Micah had made. According to the other account, Micah made a "pesel" (graven image) and "massekah" (molten image), and engaged a young Levite as priest, whom he held as a son; but the Danites, who stole the pesel and massekah, made Jonathan, Moses' grandson, their tribal priest instead of the Levite, and through the descendants of Jonathan the priesthood was transmitted in the tribe of Dan. But according to Oort, Wellhausen, Kuenen, Baudissin, and others, it is more probable that the discrepancies in the narrative may be explained on the ground of interpolations (compare פסל and מסכה, which always follow אפוד and תרפים). The story itself is unique in that it describes a cult and a priesthood which are nowhere else found in the Old Testament. This fact itself points to an early date of composition.

The Priest of Micah.

As two dates are given in the text, xviii. 30 and 31, the question arises which of these two statements is the original—that is, the earlier—one. The first statement, xviii. 30, points to the time of the fall of Ephraim (722 B.C.), or at least to that of the deportation of the northern and eastern inhabitants of the country (735 B.C.); the second, to a time near the beginning of the royal house of Israel, as the destruction of the Temple of Shiloh probably occurred during the Philistine wars, in which the priestly house of Eli, officiating at Shiloh, perished. The first statement, also, originated at a time that had become remote to later generations, as is shown by the fact that the ascription of these deeds to a grandson of Moses caused offense to the people, and a copyist tried to remove it by interpolating a נ in מישה so as to change the name to מנשה (this has recently been denied by Sinker).

The second appendix, xix.–xxi., in its main text, which can now hardly be determined with certainty, might similarly be traced back to an ancient story, as is indicated by expressions similar to those found in the first appendix; *e.g.*, the Levite sojourning as a stranger in the country (xix. 1). The formula common to both appendixes, "in those days there was no king in Israel, but every man did that which was right in his own eyes" (xvii. 6, xxi. 25; comp. xviii. 1, xix. 1), perhaps also indicates that the original text was composed before the Exile; although it is possible that in the second appendix it is a later addition, or was introduced by the author in imitation of the first appendix. For the story as a whole dates from a very late period, since there is evidence that it is based on the Priestly Code. This is especially evident in the fact that the community of Israel is represented as a compact body pronouncing punishment upon Benjamin as with one voice, while elsewhere in Judges every tribe attends to its own affairs. The fact that all the personages named, with the exception of Aaron's grandson Phinehas in xx. 28, are anonymous indicates that this is a piece of fiction and not a historical narrative. The story may have some historical foundation; for Hosea (x. 9), speaking of course quite independently of this story, also mentions the sin of Israel since the days of Gibeah. Nor is it impossible that the story, as Nöldeke was the first to assume, describes the ruin of Benjamin by the war between David and Saul's son and the insurrections under David.

§ IV. Combination and Revision of The Sources: The earlier Book of Judges, a compilation of the stories of the five Great Judges together with the additions of the redactor, was practically Judges in its present form, with the exception of the Deuteronomistic framework (together with the story of Othniel), the six Minor Judges, and some later revised additions. The Deuteronomistic editor added to the earlier book the following passages; namely, ii. 6-9 and iii. 7-11 (the account of Othniel being taken from Josh. xv. 17), all the additions by which he adapted the old material to his conception of history, and the strictly chronological arrangement taken from I Kings vi. 1, the 480 years being divided by him into 12×40 years or generations, 20, 40, or 80 years respectively being assigned to each of the judges. This Deuteronomistic arrangement was again supplemented by an editor following the Priestly Code, who partly revised the work, inserted passages of his own (viii. 29-31 and x. 17, 18), and added the portions relating to the five Minor Judges (x. 2-5 and xii. 8-15), in order to round out the number of the twelve judges. This last-named portion has been skilfully harmonized with the chronological arrangement of the Deuteronomistic editor; for the sum of the years of office of the five Minor Judges (23 + 22 + 7 + 10 + 8 = 70) is practically equal to that of the years of oppression under the five Great Judges (8 + 18 + 20 + 7 + 18 = 71). The last editor, finally, added to iii. 31 the personage of Shamgar (from the Song of Deborah, v. 6) because at his time the judgeship of Abimelech caused offense, and the editor wished to remove Abimelech without disturbing the number of the judges.

Additions by Deuteronomist.

§ V. Age of the Sources: The sources from which the material for the various heroic stories was taken are in part very old, the Song of Deborah having originated as early as the time of the Judges.

These old sources, however, were committed to writing a considerable time after the date of the events which they narrate. Samson certainly lived a long time before the account of his life was written down, because it has a very evident admixture of mythic elements, as, for instance, his heroic deeds and the virtue ascribed to his hair. His deeds remind one of the deeds of Hercules, and his name (שמשון = "the sunny") shows a resemblance in attributes to the Phenician sun-god Melkart, the prototype of the Greek Herakles. Although the story of Samson may be based on historical fact, it must be noted that Samson's deeds differ from those of the other warrior judges in that these latter are "saviors of their tribe" while Samson fights with the Philistines on his own account. Hence the compilation of the stories of the five Great Judges must be dated soon after the division of the kingdom. Single passages, like the basis of ch. xvii. and xviii., may be much older. The editor who combined his own additions with the book containing the stories, producing thereby the earlier Book of Judges, probably wrote in the last decades of the kingdom of Israel. The Deuteronomistic edition was undertaken during the Exile, at which time the other additions were probably also incorporated. The two appendixes were added very much later, as appears not only from the date of composition of the second appendix (xix.-xxi.), but also from the fact that the Deuteronomistic revision, which may be traced throughout the Book of Judges down to ch. xvi., did not include the two appendixes. Had they been added earlier, moreover, they would have been inserted in a different place, namely, in the beginning, where they belong, according to the dates mentioned in them (xviii. 30 and xx. 28). Although these references to the time may be glosses, they can not have been added after the book was completed.

Story of Samson.

§ VI. Literary Characteristics: As a result of difference in sources originating at different times, the book has no literary unity. Side by side with the stereotyped formulas, which reveal the historical point of view of the compiler of the earlier Book of Judges (iii. 7, vi. 1; iii. 12, iv. 1, x. 6, xiii. 1; iv. 2, 9, x. 7), and the passages added in the spirit of these formulas, there are stories popular in character, to which have been added snatches of old folk-poetry, old proverbs, descriptions of popular customs, popular etymologies, and other characteristics of naive popular composition. The mythological elements, which are especially predominant in the story of Samson, are also derived from popular beliefs. Yet the historical narrative, in spite of various legendary additions, is on the whole true to fact, as appears from the frankness with which religious and moral conditions, widely differing from later customs, are discussed.

E. G. H. V. RY.

JUDGES, PERIOD OF: The present form of the Book of Judges has given rise to the phrase "time of the Judges," which covers the period from the death of Joshua down to the revival and consolidation of Israel as a kingdom under Saul. This period, however, does not correspond with that covered by the Book of Judges, which includes part of Joshua's period; and the events under the last two judges belong to the Book of Samuel. Moreover, the designation "Judges," as well as the account given of their activity in the book in its present form, is inadequate, as the term "judge" was subsequently applied to certain persons who, without being kings, ruled over the whole of Israel like the Kings. This happened, however, only when the people were collected together on extraordinary occasions, as, for instance, in making war upon a common enemy, when the members of several or of a majority of the tribes would place themselves under the leadership of the strong warriors among them; and when the object in view had been accomplished, such leaders returned to the respective spheres of their personal influence. This influence did not extend beyond the bounds of their own tribe or of a few other tribes, though they retained the preeminence they had achieved by their leadership in YHWH's war. In times of peace, moreover, their activities were chiefly confined to the judicial functions whence they derived their title. Indeed, most of the judges had only a local importance; for there has been preserved no account of their deeds based on actual authentic

Social Conditions.

Mostly of Local Importance.

tradition, but only a formal account composed for a definite purpose and, therefore, of no historical value. Similarly, the chronological framework into which the account of the twelve judges has been fitted is, as regards their sequence and their tenure of office for twenty, forty, or eighty years respectively, a fiction of later time. All that remains, after separating these later additions to the "historical account" of Judges, is confined to the old stories of the five so-called "Great Judges," which form the substance of the Book of Judges; to these may be added the beginning of the book, if not as an actual historical source, at least as a valuable source on the early ritual. These five Great Judges did not exert a legally or judicially determined influence upon affairs common to the Israelitic tribes: their personal influence was rather confined to one or a few tribes; and only the stress of events brought a majority of the tribes under their leadership. Still they rendered great services by preserving the work of Moses under difficult conditions at a time when neither the life nor the laws of the people had been fully regulated.

The "Great Judges."

Historic Background of Song of Deborah.

A faithful picture of the conditions obtaining at the so-called "time of the Judges" is found in the Song of Deborah (see Judges, Book of, § 3), which is not only the most important historic source in Judges, but also the earliest source of Hebrew historical tradition. It may be gathered from the text (Judges v.), which unfortunately has been much mutilated, that the principal reason for the temporary union of the tribes in the war of YHWH, aside from the oppressions under which they suffered, was the religious conviction that Israel could not serve YHWH more worthily than by engaging in war with Canaan (verse 23). But long-continued bitter oppression had discouraged the Israelitic troops; and any flickerings of rekindling courage were quenched by threatened attacks (verses 6 *et seq.*). In this period of general discouragement (verse 8) arose the prophetess Deborah, who, by her firm faith in YHWH and in His helping hand, reawakened in the masses and among the chiefs the feeling of the solidarity of the tribes of YHWH. Ephraim, Benjamin, Machir (Manasseh), Zebulun, Naphtali, and Issachar send troops under the leadership of their respective princes, with Barak, the son of Abinoam—who, according to verse 12 ("lead thy captives captive," reading שביך), had suffered personal injury—as commander-in-chief of the entire Israelitic army (verses 12–15). Only a few tribes remained behind; and upon these scorn and curses are hurled: upon Reuben for its indecision; upon Gilead for its indifference; upon Dan and Asher for their covetousness; and upon Meroz for its cowardly egoism (verses 15–18, 23). Sisera and his allies collect their army on the plain of the River Kishon before Haroseth, where the war-chariots can deploy and the bowmen afford protection. In the battle that ensues YHWH aids the Israelites by a storm. The Canaanites are defeated in Taanach, on the southern border of the plain of Jezreel, and their leader, Sisera, is killed in flight by the treachery of the Kenite woman Jael (verses 19–22, 24–27).

The Wars of YHWH.

This is the substance of the song; but a few other conclusions may be drawn from it. It is to be noted that the tribes of Simeon, Levi, and Judah are not mentioned at all; this may be explained on the ground that the first-named two were then already dissolved, and that for some time Judah had not been closely connected with the other tribes (comp. Gen. xxxviii. 1), and was not flourishing, as it subsequently was in consequence of its connection with the southern family of Tamar (Gen. xxxviii.). Since five tribes are bitterly reproved for taking no part in the war it must be assumed that YHWH's army included at that time nearly all the men dwelling in Israel. This may be historically explained only on the ground that after Israel's decisive victories, which finally placed the tribes in possession of Canaan, an agreement made in Canaan more closely connected the tribes, which had been consolidated by the common war of YHWH, imposing upon them service in the army and also the recognition of YHWH and His judgment; and it may be assumed that this agreement was made during the events forming the story of Josh. xxiv.

If one compares the performance of the Israelitic tribes, as described in the Song of Deborah, with the other statements referring to immediately preceding conditions, it will be furthermore seen that this common action of the Israelitic army was in fact an extraordinary event and one momentous for the development of the Israelitic people. For the territory of the Israelitic tribes, which it may be estimated numbered at that time 130,000 persons (according to Judges v. 8 there were 40,000 men able to bear arms), was very limited, as appears from Judges i. 27–33. In the interior the Canaanites held the boundaries of the plain of Jezreel to the south, east, and north (*ib.* verses 27 and 30); important localities in the mountains of Galilee (*ib.* verses 31 and 33), the entire coast southward to Dor (*ib.* verses 27 and 31), and the fortress of Gezer on the southwest frontier of Ephraim, which covered important passes to the mountains (*ib.* verse 29). Some of the Israelitic tribes found settled abodes only with great difficulty, having to contend even with the hostility of the other tribes. It is reported of the Danites (*ib.* xvii. *et seq.*) that, after being driven from the coast, they sought refuge on the western side of the plateau (*ib.* i. 34, v. 17, xvii. *et seq.*), and that, being unable to remain there, they traversed the territory of Ephraim, and finally settled in the vicinity of Laish at the sources of the Jordan.

The Rescue of Individual Tribes by Their Judges.

The Israelites had to wage sanguinary wars with the native Canaanites and with the neighboring peoples, both before winning their permanent dwelling-places—which was of course their primary object—and after having conquered the country, in order to make their possession secure. The story of Jabin, for example (Judges iv.), recounts a victory of the tribes of Zebulun and Naphtali, which, like Dan and Asher, were half-breed tribes; *i.e.*, they had a larger admixture of Canaanite blood than the other tribes. This is probably the same victory which in Josh. xi. 1–5 is represented as having been gained by Joshua at the waters of Merom. The event, however, took place after the death of Joshua; and it opened up to the Israelites regions in which the Canaanites predominated, as they did in general in the lands lying toward the coast of the Mediterranean.

Enemies in the east were added to those in the country west of the Jordan. Nomad tribes which camped alongside of Israel near Horeb and Kadesh, the Amalekites and the Midianites as well as the Moabites, appeared on the eastern frontier of Palestine, with the purpose of settling, like Israel, in the western cultivated country; and the Israelites had to stem this movement from east to west, lest they should be overwhelmed by the newcomers. Now the several judges appeared where danger threatened. Ehud the Benjamite, by murdering the Moabite king Eglon, liberated his tribe from the tribute which that king had imposed upon it; and with the troops from Mount Ephraim he recaptured the fords of the Jordan as well as Jericho, which was besieged by the nomad tribes (Judges iii.). The Gileadite Jephthah of Mizpah (*ib.* xi.) succeeded in repulsing the Ammonites, who at that time were threatening Gilead, that is, the tribe of Gad, and who subsequently even advanced to the valley of the Jordan (I Sam. xi.). Gideon (Jerubbaal), of Ophrah in Manasseh, fell upon the Midianites, who had entered into the territory of Manasseh, at the source of the present Nahr Jalud, on the eastern border of the plain of Jezreel, and drove them toward the valley of the Jordan. Aside from Manasseh, he called also upon the neighboring tribes of Naphtali and Asher to take part in the pursuit, and ordered the Ephraimites to guard the fords of the Jordan, in order to cut off the Midianites' retreat and to capture their kings Oreb and Zeeb (Judges vi. *et seq.*).

Prognostications of the Kingdom.

After his successes Gideon retained a leading position within his tribe. According to Judges viii. 22 *et seq.*, he was even offered the hereditary rulership, *i.e.*, kingship over the tribe, but refused it as being a heathen dignity. The Midianites described him and his family as men of royal appearance (*ib.* viii. 18); and the tribe of Manasseh, which was at that time the largest and most important and which occupied the most fertile part of the country, from the plain of Jezreel to Shechem, gained its supremacy over the other tribes probably through the influence of the personality of Gideon and of the reputation he enjoyed among the other tribes (comp. Gen. xli. 50 *et seq.*). Manasseh, however, had subsequently to cede this supremacy to Ephraim (comp. Gen. xlviii.).

A consequence of the tribal kingship of Gideon, who was first succeeded by his seventy sons, was the tyranny of Abimelech, a son of Gideon born at Shechem, hence of a Canaanite mother. He demanded from the Shechemites to be recognized as sole ruler; and the Canaanite population, which had already recognized Israel's supremacy, decided in favor of the related half-breed. He seized the treasure of the temple, gathered some troops about him, and destroyed all the descendants of Gideon, with the single exception of Jotham. The Shechemites now really proclaimed him king, and he ruled for three years "over Israel," *i.e.*, the territory of Palestine over which Gideon had ruled (Judges ix. 6, 22). He put down with much bloodshed an insurrection of the Shechemites, instigated by an Israelitic clan called Ebed (Jobaal) under the leadership of Gaal; but he was killed soon after in an attack on Thebez (*ib.* verses 50-54).

Religious Conditions in Israel.

The foregoing are the facts that may in general be gathered in regard to the political conditions and events relating to the Israelitic tribes during the so-called "time of the Judges." It now remains to glance at the religious and cultural conditions during the same period. The sources, and in particular the stories of the Book of Judges in its present shape, recount the repeated apostasy of Israel and its worship of the Canaanite gods: but as the accounts cite only a few specific instances, one has evidently to deal with a survey of the religious conditions of the time from the standpoint of later conditions and conceptions; and these accounts, with their interchange of apostasy and oppression, of repentance and salvation, were in fact added to the book at a later time. At the time of the Judges Yhwh was actually the god of Israel, that is, of its leaders and of the people generally, as appears especially from the Song of Deborah; and in addition Baal, the chief god of the Canaanites, was also prominent in names—for example, "Jerubbaal" = "Gideon"—and therefore probably also in the cult of Israel. Later historians regarded this as a formal apostasy from Yhwh, although it was not so in fact, because no pure cult of Yhwh existed at the time of the Judges. Yet the prophets Hosea and Jeremiah correctly judged the conditions when they complained that the apostasy from Yhwh began with the immigration into Canaan (Hosea ix. 10, x. 1, xi. 1 *et seq.*, xiii. 5 *et seq.*; Jer. ii. 1-8). A relation arises between Yhwh and Baal which actually leads Israel to the verge of natural religion. The name "Jobaal" is typical of this relation; for it implies the equality of the Canaanite Baal with the Israelitic Yhwh, an implication that could not remain without consequences.

As Israel, after taking possession of the country, soon made its Yhwh analogous to Baal, who had until now been lord of the land, so it also took possession of the hill sanctuaries of the latter (the "bamot"), which were held sacred as being nearer to the godhead. The Israelites soothed their religious conscience by connecting the legends of the Patriarchs with these old Canaanite sanctuaries. Connected therewith were frequently the so-called "maẓẓebot." These were originally large exposed blocks which were "set up" (מצבה, from נצב), *i.e.*, set upright, on their broad side, and which, as seats of the godhead, received votive offerings of oil and sacrificial blood. Later they probably gave place to artistically hewn pillars which stood near the altar. The cult of Yhwh was also connected with sacred trees standing near the eminence or in the open field; but the Israelites did not accept the "asherim," which probably were originally simple trunks of trees or poles planted beside the altar as symbols of Astarte, the goddess of fruitfulness (see Asherah). As the bamot and their mazzebot were originally dedicated to Yhwh (comp. Ex. xxiv. 5 [A. V. 4]), the asherim, which may even have been connected with the phallic cult, had no place beside these altars; and they are in fact not mentioned in early times.

Baal and YHWH.

Whatever facts can be gathered from the original accounts of that time in regard to this Yhwh cult at the old Canaanite sanctuaries, which was perhaps also influenced by the ritual of the Canaanites themselves, are confirmed by the accounts referring to several of these places of worship. Thus there was at Shechem a Baal-berith (= "covenant Baal"), who was evidently intended as the guardian and protector of the covenant made between the Israelites and the Canaanites in regard to their dwelling together in peace (Judges ix.). As it is not explained whether he was intended to represent Yhwh or Baal, the Canaanite part of the inhabitants of Shechem probably took him to be Baal, while the Israelites recognized him, in spite of his name "Baal," as Yhwh. And Jerubbaal (Gideon), who, as stated above, went to battle in behalf of Yhwh, and erected a sanctuary to Yhwh in his native city of Ophrah, set up in the sanctuary an ephod, that is, an idol, which, in accordance with Canaanite custom and skill, was finely wrought and covered with precious metals. The later reviser of Gideon's story not unjustly regarded this as a grievous apostasy on the part of Gideon and his contemporaries (*ib.* viii., especially verses 27 *et seq.*). The Danites, on their expedition to Laish, found a similar idol on Mount Ephraim, together with teraphim, images probably representing progenitors of the tribe or race. While the narrator of the story is sure that both emblems refer to the cult of Yhwh, and are not images of Baal and Ashtaroth, the reviser thinks it necessary always to add the words פסל ומסכה to אפוד ותרפים in order to indicate that they were carved and cast images (and hence did not belong to the Yhwh cult, which permitted no such images). When the Danites seized the images together with the attendant priest, and carried them to Dan, a sanctuary arose there that subsequently became famous, and whose Levitic priests traced their descent back to Moses (*ib.* xvii.-xviii., especially xviii. 30).

Cultural Status of the Israelites.

The cultural conditions of the Israelites during the time of the Judges were of course dependent primarily on the economic conditions. By conquering the land of Canaan the Israelites were transformed from nomads into agriculturists, for they now dwelt in villages and towns, in huts and houses, and lived on what they raised in their fields, namely, grain, wine, oil, figs, and the milk and meat of their cattle. What they did not need for their own subsistence they sold to the Phenician merchants that traveled through the country, or exchanged for the products of Phenician skill, such as decorated vessels and garments, or for goods imported by the Phenicians from the cultured countries of the Euphrates or from Egypt (comp. Gen. xlix. 20, and for later time I Kings v. 23, 25; Ezek. xxvii. 17; Josephus, "Ant." xiv. 10, § 6). Thus the Israelites, as the inheritors of Canaan, entered at the same time into possession of the richer and more developed culture of that country.

But the pleasures with which they became acquainted through the more refined former lords of the country were attended by the consequences of more advanced culture; and the Israelites in time gave themselves up to voluptuousness and immorality, as the tirades of the Later Prophets amply testify. This more luxurious mode of life was not, it is true, adopted at the very beginning of the time of the Judges; indeed Israel remained for some time a rough people, barbarized by continuous wars. Sword law and the vendetta reigned supreme. Neither expeditions undertaken for pillage and plunder (comp. Judges xvii. *et seq.*), nor treacherous dealings with the enemy, as practised by Samson, nor assassinations, as those committed by Jael and Ehud, gave offense; and even the lives of those nearest and dearest were sacrificed to satisfy a vow, as in the case of Jephthah.

E. G. H. V. Ry.

JUDGMENT: The sentence or final order of a court in a civil or criminal proceeding, enforceable by the appropriate modes of execution appointed by law. In criminal cases, according to Talmudic law, the judgment was pronounced by the chief of the court in the presence of the accused (Sanh. 79b; Maimonides, "Yad," Sanh. xiv. 7; *ib.*, Rozeaḥ, iv. 7). If the judgment was for acquittal it could not be reversed; but if it was for conviction it could be reversed, and another trial instituted either at the plea of the convict, after presenting a sufficient reason, or at the instance of new witnesses appearing for the defendant (see Acquittal; Execution).

In Civil Cases.

In civil cases, also, judgment was pronounced by the presiding judge. The formula was very simple: "A, thou art guilty"; "B, thou art innocent." The judgment could be pronounced even if the parties concerned were not present (Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 18, 6; comp. *ib.* 13, 6). If one of the litigants wished to have a written copy of the judgment, the court might furnish him with one before the litigants left the court-room, but not after, because it was apprehended that they might settle the case between themselves outside. The formula for a written judgment was as follows: "A and B came before the court, and in its opinion A is guilty and B is innocent." Neither in the written nor in the spoken sentence should the names of the judges be included (Sanh. 30a; "Yad," Sanh. xxii. 8; Ḥoshen Mishpaṭ, 19, 2; comp. *ib.* 39, 9-10).

The reasons for the decision were included in the judgment only when the judges noticed a dissatisfaction on the part of the litigants, or when one of the litigants asked for the reasons. The prevailing custom, however, was to explain the reasons of a judgment only when one of the litigants was compelled to appear before a certain court, though he wished to be judged by another. In such a case he had to pay the money immediately on the receipt of the judgment note; and if the decision was reversed by another court the money was refunded to him. A high and famous court need not assign any reason for its decisions (Sanh. 31b; Tosef., Sanh. *s.v.* "We'im"; B. M. 69b; Tosef., B. M. *s.v.* "Ki"; Ḥoshen Mishpaṭ, 14, 4, Isserles' gloss).

The judges were not permitted to divulge to the public their individual opinions of any case after it had been decided. On one occasion a disciple was expelled from the court-room because he related the opinions of the judges in a case twenty-two years after its trial (Sanh. 31a; "Yad," Sanh. xxii. 7).

Reversal of Judgment.

A judgment in civil cases could be reversed at the instance of either of the parties. Even if the court ordered them to produce all new testimony within thirty days, and they brought new testimony after that period, the judgment might be reversed and a new trial instituted. If at the question of the court one of the litigants admitted that he could bring no other testimony, and then produced new testimony, which, however, could have been obtained before, the judgment could not be reversed. But if he brought witnesses who were in a distant land at the time of the trial, or testimony of which he might have had no previous knowledge, a new trial was usually granted (Sanh. 31a; "Yad," Sanh. vi. 6-8; Ḥoshen Mishpaṭ, 20, 1).

For reversal of judgment in cases of appeal to higher courts see Appeals. See also Excommunication; Execution.

JUDGMENT, DAY OF. See Day of Judgment; Judgment, Divine.

JUDGMENT, DIVINE: The final decision by God, as Judge of the world, concerning the destiny of men and nations according to their merits and demerits. Justice and righteousness are such fundamental ideas with Judaism and are such essential attributes of God (Gen. xviii. 19; Job xxxiv. 12; Jer. ix. 23; Ps. lxxxix. 15 [A. V. 14], xcvii. 2) as to have forced the conviction upon every believer that all the evil which befalls man is the outcome of the divine judgment, and that every evil deed will meet with its due punishment. "Shall not the Judge of all the earth do righteous judgment? [A. V. "right"]" (Gen. xviii. 25). "Behold, the righteous shall be recompensed on earth: much more the wicked and the sinner" (Prov. xi. 31, Hebr.). All the great catastrophes of past ages, such as the Flood, the overthrow of Sodom and Gomorrah, the earthquake that swallowed up Korah and his men, and the destruction that came upon Egypt and upon other oppressors of the Israelites, are, therefore, represented in the Bible as divine judgments (Gen. vi. 5, xviii. 20; Ex. vii. 4; Lev. xviii. 25; Num. xvi. 30, xxxiii. 4; Judges ii. 18 [the original meaning of "shofeṭ" is "vindicator"; that is, executor of the divine judgment upon Israel's foes]; comp. II Sam. xviii. 19; Isa. xi. 4). The end of history, therefore, was conceived to be the execution of the divine judgment upon all the nations (Isa. xi. 15, xxv. 6-xxvi. 9, lxvi. 16; Jer. xxv. 31; and especially Joel iv. [A. V. iii.] 12). This divine judgment is to take place, according to the Biblical view, on earth (Ps. xcvi. 13, xcviii. 9; Joel, *l.c.*), and is intended to be particularly a vindication of Israel (Deut. xxxii. 41; Isa. xxx. 18; Jer. xxv. 31, xxx. 11; and Ps. cxxxv. 14).

In the Apocrypha.

This Day of Judgment (see Day of the Lord) is mentioned in Judith xvi. 18, in apocalyptic and rabbinical literature referring to Isa. lxvi. 24, and in Psalms of Solomon, xv. 12. It is portrayed in very vivid form in the Sibyllines (iii. 34, 91, 500-544, 670, 687, 783), in the Book of Jubilees (v. 10, ix. 15, xxiii. 11, xxxvi. 11), and particularly in Enoch (x. 6, 12; xvi. 1; xix. 1; xxii. 4, 11; xxv. 4; xlv. 2; lxxxiv. 4; xciv. 9). The leading idea in Enoch is that the Deluge was the first world-judgment, and that the final judgment of the world is to take place at the beginning or at the close of the Messianic kingdom (Enoch, x. 4-12, xvi. 1, xix. 1, liv. 5-10, xc. 19-27, and elsewhere). The one at the beginning of the Messianic kingdom (*ib.* xlv. 2; Mek., Beshallaḥ, Shirah, 6; 'Ab. Zarah 3b) is more national in its character; the one at the close, called by R. Eliezer "the Day of the Great Judgment" (Mek., Beshallaḥ, Wayissa'u, 4), is to consign all souls either to Paradise or to Gehenna. The fire of the latter consumes the wicked, the heathen often being represented as types of wickedness, while the Israelites are supposed to be saved by their own merit or by that of their fathers (Tosef., Sanh. xiii. 2-5; R. H. 17a; Eccl. R. iii. 9, iv. 1; Pes. 103a; Midr. Teh. to Ps. i. 5-6). The divine judgment described in the Testament of Abraham (see Abraham, Testament of) is one concerning all souls (xi.-xiv.) in the life to come. The twelve judges described as sitting there (see "J. Q. R." vii. 587) have their parallel in the Falasha tradition (see Halévy in "Taazaze Sanbat," p. 144, Paris, 1902, following Ps. cxxii. 5; comp. Tan., Ḳedoshim, ed. Buber, i.; Luke xxii. 30). Regarding the Messiah as Judge, see Eschatology.

But there is a divine judgment which takes place in this world and is continual. "Man is judged daily," says R. Jose (Tosef., R. H. 13). R. Levi says (Yer. R. H. i. 57a; Pes. R. xl.; Midr. Teh. to Ps. ix. 9): "God judges the nations at night, when they refrain from committing sin, and judges the people of Israel in the daytime, when they are doing meritorious work." "There are four seasons of the year," says the Mishnah (R. H. i. 2), following Akiba (Tosef., R. H. i. 13), "when the world is judged: in spring [Pesaḥ], in regard to the yearly produce; in early summer [Shabu'ot], in regard to the fruitage of the trees; on Sukkot, in regard to the winter's rain; and on New-Year's Day, when man is judged." It is owing to these views (comp. Jubilees, Book of) that the 1st of Tishri became the Day of Judgment in the Jewish liturgy (see Day of Judgment). Not yet recognized as such in the time of Josephus ("Ant." iii. 10, § 2) and Philo ("De Septenario," § 22), this season of repentance and penitential prayer removed from the Jew that gloom and dread of the Last Judgment Day so prevalent in Essene and Christian life and literature (comp. Ber. 28b), and gave to Jewish ethics its more practical, healthy, and mundane character. K.

JÜDISCH-THEOLOGISCHES SEMINAR (FRÄNCKELSCHER STIFTUNG): Institution in Breslau for the training of rabbis, founded under the will of Jonas Fränckel, and opened in 1854. Commercial Councilor ("Kommerzienrath") Jonas Fränckel, a descendant of a rabbinic family, and a very wealthy bachelor, who devoted his entire fortune to philanthropic and educational purposes, left a bequest for the establishment of a training-school for rabbis and Jewish teachers. Fränckel was president of the Breslau congregation, and an enthusiastic supporter of Geiger, who had no doubt inspired the bequest; and it was probably the founder's intention that Geiger should be the president of the institution (Abraham Geiger, "Leben in Briefen," p. 129, Berlin, 1878). The executors of the Fränckel legacy felt, however, that an institution which should be presided over by a man of Geiger's advanced views would not gain the confidence of the congregations; they therefore called Zacharias Frankel to the presidency (Feb. 7, 1853). Owing to some legal complications the seminary could not be opened until Aug. 10, 1854, although its constitution had been confirmed by royal order of Aug. 31, 1847. Frankel selected as teachers Heinrich Graetz and Jacob Bernays, to whom Manuel Joël and B. Zuckermann were added as assistants, both being soon afterward promoted to the rank of regular teachers.

Original Departments.

The institution had at the beginning three divisions, namely: the regular rabbinical department, which admitted only such students as were entitled to enter the university; the preparatory department, receiving students who possessed the knowledge required for entrance to the "Secunda" of a Prussian gymnasium; and a training-school for religious teachers. For a teacher's diploma a three-year course of study was required, while the rabbinical course required seven years. The teachers' seminary, which in the beginning was very well attended, soon declined, and in 1867 was closed on account of lack of students. The preparatory department, originally necessary because the students of the seminary came largely from yeshibot and had no secular training, became superfluous with the increase of students having regular gymnasium education, and was closed in 1887; so that to-day the seminary has only one department, and provides for theological training only.

The administrators of the Fränckel estate inaugurated the seminary with a capital of 100,000 thalers ($72,000) apart from the building and the library; for a teachers' pension fund the sum of 3,000 thalers was set aside; and a stipendiary fund for students was started with 5,000 thalers. The last-named fund received many additions in later years, and special foundations were created for graduates who had not obtained positions, *e.g.*, the Director Frankel Stiftung, founded on the occasion of Zacharias Frankel's seventieth birthday (1861), and a similar foundation on the occasion of Graetz's seventieth birthday (1887); two prizes, one founded by Joseph Lehmann (1855) with a capital of 1,800 marks, and one by David Kaufmann (1895), in memory of David Rosin, with a capital of 4,000 kronen.

Curriculum and Staff.

The subjects taught at the rabbinical seminary were: Talmudic literature, by the president ("Director"); history and exegesis, by Graetz; philosophy of religion, by Bernays; homiletics and Midrash, by Joël; and the calendar by Zuckermann, who was also librarian. This division was changed in details when the teaching staff underwent changes, but remained the same in its general principles. In 1863 Joël became rabbi of Breslau and was succeeded by Jacob Freudenthal, who retained his position at the seminary until 1888, when he was appointed professor of philosophy at Breslau University. In 1866 Bernays was called as professor of philosophy and chief librarian to the University of Bonn, and he was succeeded at the seminary by David Rosin, who held the post until his death (Dec. 31, 1894). After Zacharias Frankel's death (Feb. 13, 1875), Leyser Lazarus was elected president and served as such from Sept. 23, 1875, until his death (April 16, 1879).

After Lazarus' death the administration changed. David Joël, brother of Manuel Joël, was called to the institution as professor of the Talmudic branches, with the title of "Seminarrabbiner," and the presidency was to alternate between him and Professor Graetz as the senior of the faculty. Joël, who entered upon the duties of his office Jan. 1, 1880, died Sept. 9, 1882; and since his death the presidency of the seminary has been held in turn by the members of the faculty. Joël was succeeded as "Seminarrabbiner" by Israel Lewy, who has held the chair of Talmudic literature since May 1, 1883. Since the death of Graetz (Sept. 7, 1891) Marcus Brann has occupied the chair of history, teaching at the same time exegesis and Talmudic codes. After the death of Zuckermann (Dec. 17, 1891) his position as teacher was not filled, Brann assuming the duties of librarian. Upon Rosin's death (Dec. 31, 1894), Saul Horovitz was called (Jan., 1896). He teaches philosophy of religion, homiletics, and some of the Talmudic branches; so that the present (1904) staff of professors comprises only three teachers (Lewy, Brann, and Horovitz).

Students.

Since its inauguration the seminary has had 464 students and has graduated 119 rabbis. A number of other officiating rabbis, while not graduates of the institution, have received part of their training there. They came from various countries of Europe and from the United States, and have occupied prominent positions throughout Europe and America. The first graduation of teachers took place in 1857; the first graduation of rabbis, in 1862, on Jan. 27, the anniversary of the death of Jonas Fränckel, the founder of the institution. The average number of students is about 40, the highest number having been 58 in 1866. The library, which was begun with the collection of Leon V. Saraval of Triest, and has been augmented by various important donations, numbers, according to the latest report, 22,332 printed volumes and 212 volumes of manuscripts.

Of the students quite a number have acquired considerable reputation as scientific authors; among them may be mentioned Perles, Güdemann, Rahmer, Bacher, Kaufmann, A. Schwarz, and Philip Bloch.

The institution has remained faithful to the spirit of its first president, Zacharias Frankel, the principal exponent of historical Judaism. It proclaims freedom in theoretical research, but demands of its disciples a faithful adherence to the practises of traditional Judaism. Of existing seminaries it is the oldest, in view of the fact that the Séminaire Rabbinique of Paris was hardly more than a yeshibah before its removal from Metz. At all events the Jüdisch-Theologisches Seminar was the first scientific institution for the training of German rabbis; and as such it has been the type for those founded in Budapest and Vienna.

JÜDISCHE ZEITSCHRIFT FÜR WISSENSCHAFT UND LEBEN: Quarterly publication issued in Breslau from 1862 to 1873 (11 vols.) by Abraham Geiger. It was originally Geiger's intention to call it "Zeitschrift Biblischer und Jüdischer Wissenschaft," and he was partly led to issue the "Zeitschrift" because of Hilgenfeld's refusal to publish in his "Zeitschrift für Evangelische Theologie" articles written by others than Protestants (see Geiger's "Nachgelassene Schriften," v. 255 *et seq.*). The "Jüdische Zeitschrift" contained not only scientific articles on Jewish history and literature, but also articles dealing with the religious questions that agitated the Jews of his day. A great deal was written by Geiger himself (*e.g.*, the "Vorlesungen über Judenthum," in vols. ii. and iii.), and the foremost Jewish scholars also contributed to it. G.

JÜDISCHES CENTRALBLATT. See Periodicals.

JÜDISCHHEIT (JÜDISCHEYT or JÜDISCHAYT): Medieval German expression for the Jewish community of a certain locality or of a whole country. Thus the gilds of Speyer in 1352, readmitting the Jews after their expulsion in 1349, speak of them as "Jüdischheit, die bi uns zu Spire wohnende werdent" ("Zeitschrift für Gesch. der Juden in Deutschland," v. 246); the "Gemeine Jüdischheit" in Rothenburg-on-the-Tauber in 1519 sent a petition to the emperor (*ib.* iv. 3). The Jews in Burgau, in a petition addressed to Emperor Ferdinand I. in 1559, speak of the "Gemeine Jüdischheit, so im heiligen Reich wohnend" (*ib.* iii. 161, v. 333). Josel of Rosheim signs documents as "Gemeiner Jüdischhait Bevelshaber" (*ib.* iii. 169) or as "Regierer Gemeiner Jüdischait im Reich" (Feilchenfeld, "Josel von Rosheim," pp. 15, 27, 153, Strasburg, 1898). But by the sixteenth century the expression "Judenschaft" had become more customary ("Zeitschrift für Gesch. der Juden in Deutschland," iii. 162, v. 332). Samson Wertheimer is called in the "Schutzbrief" granted to him by Emperor Leopold I., Aug. 29, 1703, "der in unsern. . . Landen sich befündenden Judenschafft Vorgesetzter Rabbiner" (Kaufmann, "Samson Wertheimer," p. 29, Vienna, 1888); and the Jewish community of Halberstadt, in an address to the prefect of the department of the Saale in 1808, speaks of itself as "Judenschaft" (Auerbach, "Gesch. der Israelitischen Gemeinde Halberstadt," p. 212, Halberstadt, 1868). When the Jews began to be considered as ordinary citizens, even this name was obnoxious; and when the Prussian government in the bill concerning the legal status of the Jews spoke of "Judenschaften" the states changed it to "Synagogengemeinden," which expression remained in the law of July 23, 1847.

"Jüdischkeit" ("Yiddishkeit": "Jewish Chronicle," March 18, 1904, p. 20) is nowadays used, in a sense somewhat akin to the English "Jewishness," by the German Orthodox to signify strict adherence to the ritual laws and complete acceptance of the Orthodox principles. It is frequently found in "Der Israelit" of Mayence and in cognate literature. Breuer, in his eulogy of S. R. Hirsch, Papa, 1889, says: "Jüdischkeit, alte Jüdischkeit, war zum Hohn und Spott geworden" ("Isr. Wochenschrift," 1890, p. 43).

D.

water-supply of the city (vii. 12 *et seq.*) is the great spring Ras el-'Ain, in the valley (*ἐν τῷ αὐλῶνι, ib.* 17) just above Shechem, "at the foot" of Mount Gerizim. The abundant water-supply of the modern city is probably due to a system of ancient underground conduits from this one spring; see Robinson, "Physical Geography of the Holy Land," p. 247, and Guérin, "Samarie," i. 401 *et seq.* Further corroborative evidence is given by the account of the blockade of Bethulia in vii. 13–20. "Ekrebel" is 'Akrabah, three hours southeast of Shechem, on the road to the Jordan; "Chusi" is Ḳuza (so G. A. Smith and others), two hours south, on the road to Jerusalem. The identity of Bethulia with Shechem is thus beyond all question.

The reason for the pseudonym is obvious. Because of the feeling of the Jews toward the Samaritans, the name "Shechem" could not be repeatedly used in a popular tale of this character for the city whose people wrought deliverance for Jerusalem and for the sanctuary of the Jews. The original form of "Betylua" (Greek, *Βαιτουλουα*, etc.; Latin, "Bethulia," whence the modern usage) is quite uncertain. The favorite בית אלוה = "House of God," is not improbable.

Literary and Religious Importance.

Judith is certainly one of the very best extant specimens of old Jewish story-telling, and forms a worthy companion-piece to Tobit, which it surpasses in vividness of style. Its author introduces a considerable variety of material, but all in due proportion; everything is subordinated to the main action, and the interest never flags. The principal scenes are painted very vigorously, and a striking picture is often sketched in a few words (comp. x. 10, 18; xiii. 13; xiv. 6). The poem in the closing chapter is a fine composition, plainly the work of no ordinary writer.

The book has a distinctly religious trend, and is well calculated to inspire both patriotism and piety. For the history of the Jewish religion, however, it contributes little of importance. Views and doctrines which have nothing to do with the progress of the story are not introduced.

Original Language; Versions.

As most students of the book have recognized, it was originally written in Hebrew. The standard Greek version bears the unmistakable marks of a translation from this language. The idioms are those of classical Hebrew; and yet the dialect in which the book is composed is plainly a living one. The diction is fresh and vigorous, and not noticeably reminiscent of the canonical Old Testament.

The wide-spread popularity of the story is attested, as in the case of Tobit, by the existence of a number of separate recensions; these do not, however, diverge very widely from one another. Three Greek forms have been preserved: (1) the standard text, found in most manuscripts (including the principal uncials) and given in all the printed editions; in all probability the recension which most nearly represents the original form of the story; (2) a somewhat corrected and "improved" recension, represented by Codex 58 (Holmes and Parsons) and by the Old Latin and Syriac versions; and (3) a text closely related to the preceding, found in Codices 19 and 108. The Old Latin translation exists in several divergent forms. The Vulgate version was made by Jerome (according to his own testimony hastily and with considerable freedom) from an Aramaic text. It gives the narrative in a form which is both much abridged and plainly secondary.

The several Hebrew versions of Judith are all comparatively recent, and are quite worthless for the criticism of the book. Two of these are given in Jellinek, "B. H." i. 130–141, ii. 12–22; another is published by Gaster in "Proc. Soc. Bibl. Arch." xvi. 156–163. These are all free adaptations of the story, very much abridged.

Author and Date.

The author of Judith beyond question lived and wrote in Palestine. He was a Jew, not a Samaritan, and probably dwelt near Shechem. From the manner and frequency of the mention of Dothan (iii. 9 [?]; "Dothaim," iv. 6; vii. 3, 18; viii. 3)—if the Greek text can be trusted—it might perhaps be conjectured that his home was there. From the prominence given in the book to the ceremonial law, many have drawn the conclusion that its author was a Pharisee; but this is hardly a safe conclusion. All that can be inferred with certainty is, that the punctilious performance of rites and ceremonies was popularly recognized at that time as characteristic of the extreme type of "holiness" demanded by the story for its heroine. There is nowhere in the story any hint that its writer would have recommended such punctiliousness as desirable for the Jews in general, any more than the admiring Christian biographers of Simeon Stylites appear to think that it would be well for the people to follow his example. As for the tale invented to deceive Holofernes (xi. 12–16), it is of course not necessary to suppose that even such a saint as Judith would have regarded this transgression of the Law, in a time of distress, as a grievous sin.

The tale of Judith, as has already been observed, is not given any genuine historical setting; nor is it likely that its author himself connected it with any particular time. The names, Jewish and Persian, of his principal characters he selected with the freedom which belongs to any popular narrator. There is nothing in the book which gives any direct clew to its date, or any precise indication of the circumstances of the Jews at the time when it was written.

Possible Date of Composition.

The passage iii. 8 is plainly a reminiscence of the measures taken by Antiochus Epiphanes. It may also fairly be urged that the glorification of Shechem in this transparent way is much more easily conceivable after 120 B.C., when John Hyrcanus took and humbled the city, than before that date, when it was a perpetual thorn in the side of the Jews. On the other hand, the character of the Hebrew in which the book is written (see above) favors a comparatively early date. One would probably not be far out of the way in placing it near the beginning of the first century B.C. The book is first quoted by Clement of Rome (Ep. I. ad Corinth., c. 55), near the end of the first century of the common era.

water-supply of the city (vii. 12 *et seq.*) is the great spring Ras el-'Ain, in the valley (*ἐν τῷ αὐλῶνι, ib.* 17) just above Shechem, "at the foot" of Mount Gerizim. The abundant water-supply of the modern city is probably due to a system of ancient underground conduits from this one spring; see Robinson, "Physical Geography of the Holy Land," p. 247, and Guérin, "Samarie," i. 401 *et seq.* Further corroborative evidence is given by the account of the blockade of Bethulia in vii. 13-20. "Ekrebel" is 'Aḳrabah, three hours southeast of Shechem, on the road to the Jordan; "Chusi" is Ḳuza (so G. A. Smith and others), two hours south, on the road to Jerusalem. The identity of Bethulia with Shechem is thus beyond all question.

The reason for the pseudonym is obvious. Because of the feeling of the Jews toward the Samaritans, the name "Shechem" could not be repeatedly used in a popular tale of this character for the city whose people wrought deliverance for Jerusalem and for the sanctuary of the Jews. The original form of "Betylua" (Greek, *Βαιτουλουα*, etc.; Latin, "Bethulia," whence the modern usage) is quite uncertain. The favorite בית אלוה = "House of God," is not improbable.

Literary and Religious Importance.

Judith is certainly one of the very best extant specimens of old Jewish story-telling, and forms a worthy companion-piece to Tobit, which it surpasses in vividness of style. Its author introduces a considerable variety of material, but all in due proportion; everything is subordinated to the main action, and the interest never flags. The principal scenes are painted very vigorously, and a striking picture is often sketched in a few words (comp. x. 10, 18; xiii. 13; xiv. 6). The poem in the closing chapter is a fine composition, plainly the work of no ordinary writer.

The book has a distinctly religious trend, and is well calculated to inspire both patriotism and piety. For the history of the Jewish religion, however, it contributes little of importance. Views and doctrines which have nothing to do with the progress of the story are not introduced.

Original Language; Versions.

As most students of the book have recognized, it was originally written in Hebrew. The standard Greek version bears the unmistakable marks of a translation from this language. The idioms are those of classical Hebrew; and yet the dialect in which the book is composed is plainly a living one. The diction is fresh and vigorous, and not noticeably reminiscent of the canonical Old Testament.

The wide-spread popularity of the story is attested, as in the case of Tobit, by the existence of a number of separate recensions; these do not, however, diverge very widely from one another. Three Greek forms have been preserved: (1) the standard text, found in most manuscripts (including the principal uncials) and given in all the printed editions; in all probability the recension which most nearly represents the original form of the story; (2) a somewhat corrected and "improved" recension, represented by Codex 58 (Holmes and Parsons) and by the Old Latin and Syriac versions; and (3) a text closely related to the preceding, found in Codices 19 and 108. The Old Latin translation exists in several divergent forms. The Vulgate version was made by Jerome (according to his own testimony hastily and with considerable freedom) from an Aramaic text. It gives the narrative in a form which is both much abridged and plainly secondary.

The several Hebrew versions of Judith are all comparatively recent, and are quite worthless for the criticism of the book. Two of these are given in Jellinek, "B. H." i. 130-141, ii. 12-22; another is published by Gaster in "Proc. Soc. Bibl. Arch." xvi. 156-163. These are all free adaptations of the story, very much abridged.

Author and Date.

The author of Judith beyond question lived and wrote in Palestine. He was a Jew, not a Samaritan, and probably dwelt near Shechem. From the manner and frequency of the mention of Dothan (iii. 9 [?]; "Dothaim," iv. 6; vii. 3, 18; viii. 3)—if the Greek text can be trusted—it might perhaps be conjectured that his home was there. From the prominence given in the book to the ceremonial law, many have drawn the conclusion that its author was a Pharisee; but this is hardly a safe conclusion. All that can be inferred with certainty is, that the punctilious performance of rites and ceremonies was popularly recognized at that time as characteristic of the extreme type of "holiness" demanded by the story for its heroine. There is nowhere in the story any hint that its writer would have recommended such punctiliousness as desirable for the Jews in general, any more than the admiring Christian biographers of Simeon Stylites appear to think that it would be well for the people to follow his example. As for the tale invented to deceive Holofernes (xi. 12-16), it is of course not necessary to suppose that even such a saint as Judith would have regarded this transgression of the Law, in a time of distress, as a grievous sin.

Possible Date of Composition.

The tale of Judith, as has already been observed, is not given any genuine historical setting; nor is it likely that its author himself connected it with any particular time. The names, Jewish and Persian, of his principal characters he selected with the freedom which belongs to any popular narrator. There is nothing in the book which gives any direct clew to its date, or any precise indication of the circumstances of the Jews at the time when it was written. The passage iii. 8 is plainly a reminiscence of the measures taken by Antiochus Epiphanes. It may also fairly be urged that the glorification of Shechem in this transparent way is much more easily conceivable after 120 B.C., when John Hyrcanus took and humbled the city, than before that date, when it was a perpetual thorn in the side of the Jews. On the other hand, the character of the Hebrew in which the book is written (see above) favors a comparatively early date. One would probably not be far out of the way in placing it near the beginning of the first century B.C. The book is first quoted by Clement of Rome (Ep. I. ad Corinth., c. 55), near the end of the first century of the common era.

JUDITH, MADAME (*née* **JULIE BERNAT**): French actress; born in Paris Jan. 30, 1827. She began her theatrical career at the Théâtre des Folies-Dramatiques in 1842, where her melodious voice and graceful bearing won her the heart of the public, to whom she was known as "la belle Juive." On Nov. 30, 1846, Julie Bernat Judith made her début at the Théâtre-Français as *Emma* in Alexandre Duval's "Fille d'Honneur." In 1851 she married Bernard-Derosne and in 1852 became "Sociétaire" of the company. Her chief rôles were: *Rosine*, in "Le Barbier de Séville"; *Pénélope*, in Ponsard's tragedy "Ulysse"; *Laurence Verdier*, in Etienne Arago's comedy "Aristocraties"; *Mathilde*, in Alfred de Musset's "Un Caprice"; *Antonia*, in "Mensonge et Vérité"; *Charlotte Corday*, in Ponsard's drama of that name; and *Gabrielle*, in Théodore Barrière's drama "Lis dans la Vallée." In 1866 she left the stage, and has since resided in Paris, where she, with her husband, Bernard-Derosne, has translated several English novels into French. Julie Bernat Judith is remotely related to the famous actress Rachel Felix.

JUDITH MONTEFIORE COLLEGE: Theological seminary founded in 1869 by Sir Moses Montefiore in honor of his wife, Lady Judith Montefiore, at Ramsgate, Kent, England, near his residence, East Cliff Lodge. It mainly took the form of a bet ha-midrash attended by elderly men of learning who studied the Talmud there. The first principal was Dr. L. Löwe; after his death, in 1888, it languished for a time, till an attempt was made to convert it into a modern theological seminary under the principalship of Dr. M. Gaster, who largely increased the library by judicious purchases. The experiment lasted from 1891 to 1896; but it proved unsuccessful. The college was then restored to its original object; and the buildings are now occupied by six collegians who study the Law and Talmud and deliver public lectures once a month. Part of the library has been transferred to Jews' College, London.

JULIAN THE APOSTATE (FLAVIUS CLAUDIUS JULIANUS): Roman emperor; born Nov. 17, 331; reigned from Nov., 361, till June, 363.

The recognition of Christianity as the religion of the state by Constantine the Great, uncle of Julian, about the year 312 had resulted in an increase of persecution for the Jews of the Roman empire; but Julian, immediately upon his accession to the throne, issued a proclamation extending freedom and equal rights to all sects and beliefs, Jewish, pagan, and Christian. In his passionate devotion to paganism, which he vainly sought to reestablish, Julian vehemently opposed Christianity; but for Judaism and the Jew he showed every consideration. His knowledge of Jewish affairs was extensive. In his writings he refers to the Sabbath, the Passover, the dietary laws, the laws of sacrifice, circumcision, and other Jewish practises. He is said to have established among the Jews of Palestine an order of patricians, who exercised judicial functions, and whom he entitled "primates" (called in the Talmud "aristoi").

His Views on Judaism.

His views upon Judaism are set forth at length in his polemic against Christianity. He regards Judaism as inferior to Hellenism, but vastly superior to Christianity. He is particularly severe upon the Jewish doctrines of monotheism and the election of Israel. He inveighs against the narratives of the Creation, the garden of Eden, the Flood, etc., with the same arguments as were employed at a much later date by Voltaire. Throughout his polemic (only extant in St. Cyril's works) he displays an accurate knowledge of the Old Testament, often quoting it with fluency. His acquaintance with the text was, however, limited entirely to the version of the Septuagint: he knew little or no Hebrew.

The most important incident in his career that is associated with Jewish history is his proposal to rebuild the Temple in Jerusalem. This novel suggestion was propounded by him in a letter addressed to the "Community of the Jews," at the beginning of the year 363. In this epistle Julian alludes to his abolition of the heavy taxes which had been imposed upon the Jews and to his desire to treat them amicably.

Promise to Restore the Temple.

> "Desiring to extend yet further favors to you, I have exhorted my brother, the venerable Patriarch Julos [*i.e.*, Hillel II.], to put a stop to the collection of the so-called Apostolé [see Jew. Encyc. ii. 20, *s.v.*] among you; and henceforward no one will be able to oppress your people by the collection of such imposts, so that everywhere throughout my kingdom you may be free from care: and thus enjoying freedom, you may address still more fervent prayers for my empire to the Almighty Creator of the Universe, who has deigned to crown me with his own undefiled right hand. . . . Thus should you do, in order that when I return safely from the Persian war, I may restore the Holy City of Jerusalem, and rebuild it at my own expense, even as you have for so many years desired it to be restored; and therein will I unite with you in giving praise to the Almighty."

This promise of the emperor, which must have raised joyous hopes in the hearts of the Jews, was destined not to be realized. The work probably was never commenced; for Julian fell in the war against Persia, and with his death the condition of Israel changed for the worse.

Many eminent writers upon Jewish and Church history, however, believe that the work of rebuilding the Temple was commenced immediately after the above-mentioned letter was written, but that, owing to certain strange causes which are explained in different ways, it was unexpectedly interrupted. Grätz, Gibbon, and Milman accept this view; but a careful inquiry into the evidence for the opinion results in tracing its origin to a fanciful legend first narrated by a bitter Christian enemy of Julian, Gregory Nazienzus. This fable is the source of the account given by the heathen historian Ammianus

Marcellinus, and of the various versions detailed by the Church chroniclers. The only references in Jewish writings to the project of the emperor are to be met with in works of the sixteenth century, which references are without independent value.

[The cause of the almost complete silence of the Jerusalem Talmud on Julian is supposed by Grätz ("Gesch." 2d ed., iv. 372) to have been the fact that the restoration of the Temple was not thought of otherwise than in connection with the appearance of the Messiah, as whom a Roman emperor could not be considered. Bacher has shown that the Palestinian amora R. Aḥa (see Jew. Encyc. i. 276, *s.v.* Aḥa [Aḥai] III.), who was a contemporary of Julian, voices a different sentiment, and that he possibly refers to the plan of Julian in such sayings as: "The Temple will be rebuilt before the appearance of the Davidic kingdom" (Yer. Ma'as. Sh. 56a); "Five things were missing in the Second Temple: fire, the Ark, Urim and Thummim, anointing-oil, and the Shekinah"—hinting that the Third Temple might be built even without these (Yer. Ta'an. 65a). Julian is also mentioned by name in Yer. Ned. 37d, where the expedition of לולינוס against the Persians is referred to. There is no need to change the reading to דיוקלוטיאנוס, as Grätz (*l.c.* p. 492) has done (see "J. Q. R." x. 168).—G.]

G. M. Ad.

JULIAN OF TOLEDO: Primate of Spain; born in Toledo (where he was also baptized); died in 690. He was the first of the long list of ecclesiastical princes who were of the Jewish race and who opposed and persecuted their former coreligionists. That he was "of Jewish origin" is stated by Isidor de Beja and Paul de Burgos. He was a man of great sagacity and discretion, prudent in judgment, very charitable, tempering severity with mildness. Nevertheless he was a party to the violent act committed by the Visigothic king Erwig, by which King Wamba was robbed of the crown—the same king whose memory Julian perpetuated in his history of Wamba. As a reward for his services Julian was raised to the primacy of Spain, which caused as much dissatisfaction among the Spanish clergy as the views formulated by him concerning the Trinity caused offense and anger at Rome.

At the Councils of Toledo.

It was Julian who induced King Erwig to pass the severe laws against the Jews at the twelfth Council of Toledo, over which he presided. In 686, at the request of Erwig, he wrote "De Comprobatione Ætatis Sextæ Contra Judæos," intended to combat Judaism and to convert the Jews. The work deals with the Messianic prophecies of the Bible. Julian is honest enough to own in his dedication of the work to the king that "if the Jew be not improved by the book, at least the Christian may derive some benefit from it." He attempts to prove that Jesus was actually born in the sixth age, in which the Messiah was to come; "but," he adds, "this time should not be reckoned according to the Hebrew original, which has been falsified by the Jews, but according to the Septuagint, which is more trustworthy."

In spite of his enmity toward the Jews, Julian did not completely break off all association with them. He sent his book on the future life (written in 687) to Bishop Idalus of Barcelona, to whom it was dedicated, by a Jew named Restitutus. Idalus received the latter so ungraciously that he tore the gift from the hands of the bearer, and expressed his astonishment that Julian should have entrusted a book of spiritual content to an "unbelieving and godless Jew" and should have made "an animal a bearer of light."

G. M. K.

JULIANUS: Leader of a Samaritan rebellion at Nablus in 530 against the Romans; son of Samaron or Sabarona or, according to another reading, Sahir. Julianus took the title of king or emperor, and wore a diadem and other insignia of royalty. When the revolt was quelled he was executed, and his head was sent as a trophy to Constantinople. See Justinian.

G. S. Kr.

JULIANUS B. TIBERIANUS. See Luliani ben Tabrin.

JÜLICH (Latin, **Juliacum**; Hebrew, גילכא. יולכא): City of Rhenish Prussia, near Aix-la-Chapelle, situated on the Ruhr. In 1227 Emperor Frederick II. conferred upon Count Wilhelm of Jülich the right to dispose, without any interference on the part of the crown, of any Jews who should settle in his dominions. It can not be ascertained whether Wilhelm availed himself of this privilege and invited Jews to settle at Jülich; but that several Jewish families were living there at the end of the thirteenth or, at the latest, in the first year of the fourteenth century, is shown by the fact that a certain Simon and his wife Minna, living at that time in Cologne, were designated as natives of Jülich (comp. Stern and Höniger, "Das Judenschreinbuch der Laurenzpfarre zu Köln," p. 157). Like many other German communities, that of Jülich was wiped out in 1349 at the time of the Black Death. A seal of the fourteenth century preserved in the archives of Clervaux bears the Hebrew inscription יעקב בן הק"יואל גולכא (= "Jacob, son of the martyr Joel of Jülich").

In the following centuries the presence of Jews at Jülich is probable, though not certain. The same uncertainty prevails concerning the Jewish community of **Cleve**, which also was a dependency of the margraves of Jülich. In 1901 Jülich numbered 102 Jewish inhabitants in a total population of 5,385; Cleve, 145 in a total population of 14,684.

J. I. Br.

JULIUS III. (GIOVANNI MARIA DEL MONTE): Two hundred and twenty-eighth pope; born at Rome 1487; elected pope Feb. 8, 1550;

died March 22, 1555. Personally he was favorably inclined toward the Jews. He attached to his person a Jewish physician named Theodoro de Sacerdotibus; and during an illness he consulted two other Jewish physicians, Vitale Alatino de Pomis and Amatus Lusitanus. Julius prohibited the baptism of Jewish children without the consent of their parents, attaching a penalty of 1,000 ducats to the breach of this order. He also confirmed and increased the privileges of the Portuguese Jews of Ancona (March 20, 1553).

He yielded, however, to the influence of the reactionary party, by which he had been elected; and several of his edicts inflicted great suffering upon the Italian Jews. Upon the denunciation of the baptized Jews Ananel di Foligno, Joseph Moro, and Vittorio Eliano, Julius issued (Aug. 12, 1553) an edict enjoining the bishops and magistrates to seize and burn all copies of the Talmud, as containing slanderous attacks against Christianity. With premeditated malice this edict was to be carried into effect on the day of the Jewish New-Year (Sept. 9, 1553). In the following year (May 29) Julius issued the bull "Contra Hebraeos Retinentes Libros Thalmudis," in which the Jews were ordered, on pain of severe punishment, to give up within four months all books supposed to contain blasphemies against Jesus; such books to be revised by Christian censors, and the suspected passages expunged. By his edict of 1553 Julius imposed a tax of ten golden ducats on every synagogue in his domains, to be paid toward the support of the House of Neophytes.

D. I. BR.

JULIUS ARCHELAUS: Son of Chelcias ("Ant." xix. 9, § 1; xx. 7, § 1 [without "Julius"]), and, to judge from his name, a Hellenized Jew, probably of a rich and noble family. He was chosen by King Agrippa I. as husband for his first daughter, Mariamne (Josephus, "Ant." xix. 9, § 1). Mariamne was only ten years old at her father's death (44); and the marriage took place under her brother Agrippa II. (*ib.* xx. 7, § 1), a daughter, Berenice, being the result of the union. Mariamne subsequently left Archelaus and married the alabarch Demetrius (*ib.* § 3). Josephus refers, for the veracity of his history of the Jewish war, among others to Julius Archelaus, who was familiar with Hellenistic culture ("Contra Ap." i., § 9).

JULIUS, HENRIETTE. See JULIUS, NIKOLAUS HEINRICH.

JULIUS, NIKOLAUS HEINRICH: German physician and prison-reformer; born at Altona, Germany, Oct. 3, 1783; died at Hamburg Aug. 20, 1862. He received his early education at Hamburg and at the Graue Kloster at Berlin. He studied medicine at Heidelberg and Würzburg (M.D. 1809), and, after conversion to Christianity, settled in Hamburg as a physician. During the wars of 1813 and 1815 against France he served as surgeon to the Hanseatic Legion. In 1825 Julius traveled through England; in 1834 and the two following years, through the United States; and in 1836, through France and Belgium. His writings upon the necessity of improvement in the conditions of prisoners attracted the attention of the Crown Prince of Prussia (later Frederick William IV.) to the author, who was invited to Berlin in 1840. He was attached to the Department of the Interior and retained his position till 1849, when, under the parsimonious régime which curtailed the force employed in all offices, he was dismissed. He then returned to Hamburg, where he continued to reside until his death.

Julius took great interest in the condition of prisoners, and spent much time and money in his propaganda for bettering their lot. He was assisted in this work by his sister **Henriette,** an authoress.

Julius was the author of: "Bibliotheca Germano-Glottica," Hamburg, 1814; "Mitteilungen über die Morgenländische Brechruhr," *ib.* 1822–31; "An Essay on the Public Care for the Sick as Produced by Christianity," *ib.* 1825; "Die Weibliche Fürsorge für Gefangene und Kranke Ihres Geschlechts aus den Schriften der Elizabeth Frey und Anderer," Berlin, 1827; "Vorlesungen über die Gefängnisskunde," *ib.* 1828 (French transl. by Lagarmitte, Paris, 1831); "Amerika's Besserungs System und Dessen Anwendung auf Europa," Berlin, 1836; "Nordamerika's Sittliche Zustände," Leipsic, 1839; "Beiträge zur Britischen Irrenheilkunde," *ib.* 1844, etc. He translated belletristic literature, as Ticknor's "Geschichte der Schönen Litteratur in Spanien," Leipsic, 1852, etc.

From 1821 to 1835 he published, with Gerson, in Hamburg, the "Magazin der Ausländischen Literatur der Gesammten Heilkunde."

Julius was also editor of the "Jahrbücher der Straf- und Besserungsanstalten," Berlin, 1829–33, and, with Nöllner and Varrontrapp, of the "Jahrbücher der Gefängnisskunde und Besserungsanstalten," Frankfort-on-the-Main and Darmstadt, 1842–49.

JULIUS SEXTUS AFRICANUS. See SEXTUS JULIUS AFRICANUS.

JUMA-I-BALA: Turkish city on the Bulgarian frontier, four hours from Dubnitza. The community here dates from the middle of the eighteenth century, and must have been important and wealthy; for when the famous chief Pazvan-Oglu and his band of Kirjalis revolted against Sultan Salim III., the Jews of the city had to pay the bandits a ransom of six thousand silver aspers. The present community is very poor, and comprises no more than thirty families (1902). It has a small school, and services are held in a house which has been arranged to serve as a synagogue.

D. M. Fr.

JUNG-BUNZLAU: Town in northeastern Bohemia. Its Jewish community, one of the oldest in the province, was formerly one of the largest in Bohemia; it is first mentioned, under the name of נער בומסלא, in documents dated 1546. The communal records begin in 1562. A synagogue, modeled after the Meisel Synagogue at Prague, was built in the eighteenth century. An old cemetery contains the grave of Jacob Bassevi von Treuenberg, who died at Jung-Bunzlau in 1632.

The first rabbi of whom there is record was **Samuel b. Joseph** of Lublin, author of "Leḥem Rab" (published in 1609 with an approbation by Löw b. Bezaleel, chief rabbi of Prague). He was followed by **Abraham Samuel b. Isaac Bacharach.** Succeeding rabbis were: **Ḥayyim Feibel,** son-in-law of Isaiah Horowitz, and the compiler of the variants to Rashi's commentary on the Pentateuch; **Eliezer Lipmann,** son of Wolf Graetz (1679); **Moses Isaac Spira** (until about 1712; d. 1749), father-in-law of Jonathan Eybeschütz; **Moses Brandeis ha-Levi,** a descendant of Löw b. Bezaleel; his son **Bezaleel,** who, like his father, was district rabbi of Bunzlau (died June 4, 1767, in early manhood, his work "Ẓedah Baruk," Prague, 1786, being published posthumously); **Eliezer Bondy,** district rabbi of Bechin and Bunzlau (d. 1804); **Ezekiel Glogau** ("Schlesinger"; d. 1821), who was called by Napoleon I. to the Sanhedrin of Paris, and thereby became involved in political difficulties; author of "Mar'eh Yeḥezḳel" (Prague, 1822); **Isaac Spitz,** called in 1824 (d. May 6, 1842), son-in-law of Eleazar Fleckeles and grandfather of the poet Moritz Hartmann; and District Rabbi **Isaac Elbogen** (d. 1883).

With the death of the last-named the title of district rabbi ceased, and the succeeding incumbents—**Alexander Kisch,** at present (1904) rabbi of the Meisel Synagogue in Prague; **Moritz Grünwald** (d. 1895 as chief rabbi of Bulgaria); and **M. Klotz,** who held the office until 1901—have borne the title of rabbi.

In 1903 there were in Jung-Bunzlau 135 Jewish families in a total population of 13,479.

JUNIOR RIGHT (German, "Jüngsten-Recht"; French, "maineté"; in English law, "borough English"): System of tenure in which a father's property descends to the youngest son; ultimogeniture as opposed to primogeniture. It has been suggested that the custom arose during the pastoral or nomad period, when the eldest son would move on with his share of the flocks, while the youngest would be left behind to take up the father's position when he died.

In historic times among the Jews the preference in descent went with the eldest son (see Primogeniture); but in the early legends of the Hebrews there are indications that the youngest or the younger son had the birthright. All the patriarchs appear to be youngest sons. Jacob is the youngest son of Isaac, the younger son of Abraham, and of Rebekah, the youngest child of Bethuel, the youngest son of Nahor. The favorite wife of Jacob appears to be the younger daughter, Rachel, whose youngest son, Benjamin, is called by a name implying heirship. Joseph's youngest son, Ephraim, has the birthright, while Moses, David, and Solomon also appear to be youngest sons. It has accordingly been suggested by Jacobs that the conflict between these traditions and later legislation, which regarded the birthright as falling to the eldest son, explains many of the more puzzling stories of Genesis as being introduced in order to justify the seemingly anomalous inheritance of the youngest son; *e.g.*, the illegitimacy of Ishmael; the winning of the birthright by Jacob; the disgrace of Reuben; the offense of Simeon and Levi; and the blessing of Ephraim by Jacob (Gen. xlviii. 13-19). On this hypothesis these legends were introduced in order to explain the accounts of the passing of the birthright to the youngest son, which had been handed on by tradition.

One point in favor of this view is the fact that it is Rachel who takes away the teraphim or ancestral gods of the hearth (Gen. xxxi. 19, 30), a distinct connection with junior right (comp. Elton, "Origins of English History," pp. 211-216, 221). This theory, besides accounting for the above-mentioned legends of Genesis, would explain the jealousy with which the brothers regarded Joseph, who would be the heir under the system of junior right. It has not, however, gained any general acceptance.

JUNIPER: The traditional rendering of "rotem" in I Kings xix. 4, 5; Ps. cxx. 4; and Job xxx. 4, adopted by Aquila and the Vulgate, and followed by the English versions; while the Septuagint seem to have been at a loss regarding the exact meaning of the Hebrew term, and either transcribe it by *ῥαθμέν*, or render it by the general term *φυτὸν ἐρημικόν*, or *ξύλον*. As "rotem" is unquestionably identical with the Arabic "ratam," which means "broom" (comp. Löw, "Aramäische Pflanzennamen," p. 366), it must likewise be intended for some species of that shrub, probably the *Genista rœtam* (Forskal, "Flor. Eg.-Arab." lvi.), which is indigenous to the Sinaitic peninsula and to Arabia Petra, and is the most conspicuous shrub in the desert south of Palestine. Rising to a height of ten to twelve feet, and growing in clustered bushes, the broom affords a grateful shade in the desert, which fact is referred to in I Kings (comp. Vergil, "Georgics," ii. 434); while the allusion in Ps. cxx. 4 agrees with the fact that the coals of the broom burn a long time and emit an intense heat.

More difficult is the passage in Job, where the roots of the rotem are spoken of as "meat"; for, while the leaves and fruit of the broom are a favorite food of goats, the roots are inedible. It may be that the allusion is merely intended to depict extreme distress, unless for לַחְמָם ("their meat") is to be read לְחַמָּם ("to warm themselves"; so R. V. margin; comp. Isa. xlvii. 14). "Rithmah," a place-name derived from "rotem," is mentioned in Num. xxxiii. 18.

The juniper proper, *Juniperus Sabina*, or savin, is assumed to be intended by "'ar'ar" (Jer. xvii. 6, xlviii. 6 [A. V. "heath"; R. V. margin, "tamarisk"]), as that is the meaning of the identical term in Arabic. This tree grows to a height of ten to fifteen feet, and abounds in the rocks of Arabia Petra.

JURISDICTION: The authority of a court of law to decide cases of certain kinds. This depends on the kind of matter in dispute; on the locality of the subject; on the residence of the parties; and on their willingness to submit themselves to some local tribunal.

I. As to the kind of question, the Mishnah discusses the court of seventy-one elders, the intermediate courts, the criminal courts of twenty-three judges, the courts of three ordained judges for cases involving damages and penalties, and courts of three judges for ordinary civil cases, besides some special courts whose functions were rather religious or administrative than judicial. If the law-making and executive powers of the court of seventy-one be left out of view, the scheme is very much as follows:

The Sanhedrin.

The court of seventy-one alone has jurisdiction over a tribe accused of idolatry; the seduced city (Deut. xiii. 13-18) can be tried only by this court (such a trial never took place); the trial of a false prophet (Deut. xviii. 20-22) or of a rebellious elder (Deut. xvii. 8-13) must take place before it; also any proceeding in which the high priest is a defendant (Sanh. iii. 5, xi. 4).

This seems to be its only original jurisdiction; but the importance of the Great Sanhedrin as a court of justice is based on Deut. xviii. 8-11. Whenever an inferior court feels itself incompetent to decide a legal question, whether it arises in litigation or in a matter of ritual law, the judges of that court are to proceed to the religious center of Israel and to seek counsel there, and must then act upon the instruction there received. According to Sanh. xi. 2, there were at Jerusalem two intermediate courts each composed of twenty-three members, to which the judges of the country first submitted their doubts; and only if such courts could not satisfy them, would they together with these courts lay the matter before the supreme court.

The constitution of the local court of twenty-three and its jurisdiction in capital cases have been mentioned under Accusatory Procedure and Criminal Procedure. The trial of involuntary homicide, punishable by exile to the cities of refuge, also belonged to a court of twenty-three, as did that of an ox or any other privately owned animal that had killed a person, either free or slave (Sanh. i. 4).

According to the prevailing opinion in the Mishnah, only three judges were required for a court to try a criminal charge involving the punishment of stripes. Where a crime was punishable only by double or manifold restitution, like theft, or by a fixed mulct, the proceeding to ascertain the guilt of the accused was considered a civil action, and came before three judges.

The Mishnah mentions some procedures not of contested jurisdiction: the ordaining of elders and the inquest and expiation over the beheaded heifer should both be performed by five elders; the ceremonies of Ḥaliẓah and Mi'un must take place before three; redemption of the fourth-year fruit-tree and of the second tithe, before three; the appraisement of consecrated things for redemption, before three; Estimates, if to be paid out of movables, before three, one of them a kohen; if to be paid from land, before ten, one of them a kohen (Sanh. i. 3). Actions on contract (technically called "loans and admissions") were tried before three judges, who were not required to be ordained.

Venue.

II. In contradiction to modern Western notions, the plaintiff—which term in most cases meant the creditor—had the right to bring suit in the court of his own domicile. The Talmud (Sanh. 31b) has the following: "If two are in hot litigation, and one says, 'Let us plead here,' while the other says, 'Let us go to the place of assembly [בית הועד],' they compel him to plead in his own town; and if necessary to ask a question of law, they write it out and send for a decision and the reasons therefor." But the distinction is afterward made that if the creditor asks for it, on the principle laid down in Prov. xxii. 7, "the borrower is subject to the lender," the cause is thrown into the higher court, and the debtor is compelled to go there for trial. These views are copied by Maimonides and by the Shulḥan 'Aruk, Ḥoshen Mishpaṭ (14), where, however, the gloss of ReMA questions whether the demand for trial in a higher court is applicable in his day, when there is no patriarchate nor regular rank among rabbinical courts. The medieval authorities were much divided about the meaning of "Place of Assembly" and "Great Court" used in the same connection, and whether these words have the same meaning; but Maimonides says ("Yad," Sanh. vi. 9) that in Spain it was the custom for the defendant to follow the plaintiff to a court recognized as higher than that of the city of domicile.

However, at the very foundation of civil jurisdiction is the right of the parties to choose their judges among those who are qualified, which right is recognized by the Mishnah (Sanh. iii. 1; the grounds for challenge being regulated in the following sections). Hence, in a large community holding more than three men qualified by learning and character, a bench of judges for the cause would be made up under the initiative of the local rabbi, somewhat as a jury is made up in English and American courts by the presiding judge (for details of qualification and election, see Judge). At any rate, a court should not consist of less than three judges: if the parties agreed upon one, he would be only an arbitrator, whose award, based on their contract, might be enforced by a court (Ḥoshen Mishpaṭ, 3, following Sanh. i. 1). The exception that a single expert (מומחה) might try cases of contract ("loans and admissions") is no longer valid because ordination ("semikah"), which alone can make an expert, is no longer practised.

But both the Palestinian and Babylonian Talmuds, in commenting on Sanh. i. 1, give instances of prominent amoraim who sat as sole judges; and the latter states that a rabbi holding "authority," *i.e.*, one appointed for the purpose by the patriarch in Palestine or by the head of the Exile in Babylonia, might so sit.

JUS GAZAKA or **GAZAGA**: The usual Italian term for the right of Ḥazaḳah, especially with regard to the rent of houses in the ghetto of Rome. Clement VIII. made it part of the law relating to Jewish tenant-right there. Several publications containing cases bearing on this law are mentioned in Berliner, "Gesch. der Juden in Rom," ii. 225, Frankfort-on-the-Main, 1893 (see also Abrahams, "Jewish Life in the Middle Ages," pp. 68 *et seq.*).

D.

JUS PRIMÆ NOCTIS: Alleged seigniorial right to marital privileges. The feudal lords had the right of giving heiresses in marriage, and there appear to be traces of still more intimate rights over the daughters of tenants, though this has been disputed. An attempt has been made to prove that this right was claimed by either the Greeks or Romans over the Jews in Palestine, and led to the rising of the Maccabees and the institution of the feast of Ḥanukkah, in which Jewesses had a special interest (Shab. 23a). The Jerusalem Talmud (Ket. 25c) declares that owing to the claims of the strategus on betrothed girls they were married in their fiancés' houses. The Babylonian Talmud (Ket. 3b) says that it used to be a custom for maidens to marry on Wednesday and widows on Thursday, but that the marriage-day had been changed to Tuesday so as to avoid the right claimed by the "tafsar" or prince; and in a late scholium on the Megillat Ta'anit it is even declared that Mattathias the high priest began the war of independence in order to save his daughter from a similar outrage. A midrash on Ḥanukkah (ed. Jellinek, i. 137) also mentions this tradition, to which the Book of Judith may have some reference. S. Krauss suggests, further, that the right in question was put into force by the pretor Lucius Quietus about 117. Israel Lévi, however, has pointed out the absence of any corroborative evidence either for the Maccabean or the Roman period, and the improbability of such a barbarous custom having been raised into the force of law. A similar story is told by Rabbi Judan of the giants or Nefilim before the Deluge (Gen. R. xxvi.). Lévi suggests that it may have been derived from the Roman legend of Virginius.

JUSTIN MARTYR: Church Father, who in his works, written in Greek (the *Διάλογος πρὸς Τρυφῶνα* and *'Απολογία* are cited here as "Dial." and "Ap." respectively), makes frequent mention of the Jews and Judaism. He was born about the year 100 at Flavia Neapolis, the ancient Shechem and the present Nablus; executed about 165. His parents were pagans ("Dial." § 28). He became a Christian under Hadrian, perhaps at Ephesus (*ib.* §§ 2-8; "Ap." ii. § 12). There, in intercourse with Jews of Hellenic culture, he may have become acquainted with the Bible and, very slightly, with the doctrinal methods of the Rabbis. That he did not understand Hebrew is plainly evidenced by his writings.

Justin is more familiar with Greek philosophy, which he treats from a sophistical standpoint, than with the learning of the Jews. Of his authentic works which have been preserved the only ones which bear upon the Jews are the two Apologies—one addressed to Antoninus Pius, the other to Marcus Aurelius—and his Dialogue with the Jew Tryphon. Although in the Apologies, supposedly written in defense of paganism, he continually attacks Judaism, and brings forward from the Old Testament arguments for Christianity, the Dialogue is more especially devoted to this theme.

Dialogue with Tryphon.

The Dialogue was written shortly after the Bar Kokba war (about 135), to which he refers in several passages (Dial. § 108; Ap. i. 31). Tryphon, the representative of the Jews, is described (at the beginning of the Dialogue) as having fled to Ephesus to escape the hardships of the war and persecution. In that city the debate is supposed to have taken place; and Tryphon appears as a well-educated Jewish philosopher. On the first day of the dispute only he and Justin are present; but on the second day a few Jews from Ephesus take sides with Tryphon in the discussion (Dial. § 118). One is mentioned by the name of Mnaseas (= מנסיא; Dial. § 385). Many scholars deem the discussion to have been wholly imaginary, inasmuch as Tryphon makes concessions to Justin which would have been impossible in reality.

Identity of Tryphon.

Justin nowhere states that Tryphon was a celebrated rabbi; but Eusebius ("Hist. Eccl." iv. 18, § 6) says that he was the most eminent Jew of his day. Accordingly he has been identified by Grätz and others with R. Ṭarfon; but the latter, who was born before the destruction of the Temple, would have been too old at the alleged time of the Dialogue to have taken part in it. The supposition, however, is that Justin intentionally selected the name of the celebrated rabbi in order to boast of having defeated him in debate.

The writings of Justin contain some historical material, as, for example, the statement that Herod was a native of Ascalon (Dial. § 52); the account of the persecution of the Christians by the Jews in the Bar Kokba war (Ap. i. 31); the story of Simon Magus (*ib.* 26, 56); and in general much concerning the history of Samaritan sects, Justin being a Samaritan. Still he has no certain knowledge concerning antiquity, and he associates (*ib.* x. 31) the origin of the Septuagint with the reign of Herod (see Goldfahn in "Monatsschrift," 1873, p. 56).

Since he was unacquainted with Hebrew, all his arguments are based on the text of the Septuagint. He thinks that the name "Abraham" has had an "alpha" added to it (*'Αβραάμ*); "Sarah," a "rho" (*Σάῤῥα*); and that a wholly new name was given to Joshua ben Naue, whom he calls Αὐσή = "Hosea" (Dial. § 113). He had matter in his Bible text which the Jews did not have in theirs; and he urged this as a reproach against them. In Ps. xcvi. (xcv.) he read ἀπὸ τοῦ ξύλου (= "a ligno," "from the wood"), and saw therein a reference to the cross (Dial. § 73; Ap. i. 41; comp. Swete, "Introduction to the Old Testament in Greek," p. 424, Cambridge, 1900). He charges the Rabbis with having expunged from their Bibles much that is favorable for a conception of Christianity (Dial. §§ 72, 73); for example, the legend of the martyrdom of Isaiah (*ib.* § 120). That point of perpetual dispute between Jews and Christians, the interpretation of Isa. vii. 14—where the Septuagint has παρθένος ("virgin"), but the Rabbis give the meaning of νεᾶνις ("young woman")—was already familiar to this first controversialist of the Church (*ib.* § 43); but he did not know that the latter explanation originated with Aquila. It is also learned from Justin that the Rabbis attributed the prophecy in question (Isa. vii. 14–25) to Hezekiah (Dial. § 77). Another Messianic passage (Ps. cx.) was likewise attributed by them to Hezekiah (*ib.* § 83). On the other hand, Isa. liii. was interpreted by the Rabbis to refer to the suffering Messiah (*ib.* § 90). They taught, too, that Micah iv. 1–7 referred to the Messiah (*ib.* § 110), but that he had not yet come, and if he had come, he would have remained unrecognized (*ib.* § 8; comp. § 49), and Elijah would have had to precede him (*ib.* § 49). Justin's controversy with the representative of the Jews further extends over Ps. lxxii. (*ib.* § 34) and xxiv. (*ib.* § 36). The observations of Tryphon concerning Deut. iv. 19 (*ib.* § 121) and Gen. i. 26 (*ib.* § 62) are also interesting, as in them he opposes the Christian conception of those passages.

Haggadot Familiar to Tryphon.

Together with these examples of rabbinical exegesis, the haggadot on Biblical history transmitted by Justin deserve attention. He relates that the Rabbis arranged that the two goats used on the Day of Atonement should be alike (*ib.* § 40; comp. Jonah vi. 1); he evinces familiarity with the meaning of the three angels who appeared to Abraham, quite after the manner of the Haggadah (*ib.* § 56; comp. B. M. 86b); and the haggadah that the high priest Joshua (Zech. iii. 1) had not prevented his sons from marrying unworthy women (Sanh. 93a) also is reflected in a legend to the effect that Joshua himself had married a wanton (Dial. § 116). The story of the fall of the angels, which is related by many apocrypha and which Justin also teaches (Ap. ii. 5), is disputed by Tryphon. The Jew in this connection uses the following characteristic words: "God's words are holy; but your interpretations are artificial" (Dial. § 79). Such controversies are found in the writings of the other Church Fathers. Only in one particular does Justin stand alone, and that is in his accusation that the Jewish teachers permitted four and even five wives, and that they lusted after beautiful women (*ib.* § 144). Possibly this is an expression of the inborn hatred of the Samaritans toward the Jews.

K. S. Kr.

JUSTINIAN: Emperor of the Eastern, or Byzantine, Empire from 527 to 565. During his long reign he issued many decrees relating to the Jews, and his empire was the scene of bloody events which were of the greatest importance for both the Jews and the Samaritans. In his dealings with the Jews Justinian was guided, not by political and diplomatic principles, but rather by consideration for the Orthodox Church. The unfortunate history of the Samaritans under Justinian is noteworthy. Their rebellious attitude under Zeno continued unchanged under Justinian (Procopius, "De Ædificiis," v. 7 [p. 325, ed. Bonn]). The Christian church built on their sacred Mount Gerizim was especially an object of offense. They were apparently very restless at this time, for their name and deeds occur frequently in the contemporaneous history of the empire. A Samaritan from Palestine, Arsenius by name, rose to high honors through financial transactions with the empress Theodora, and was made senator after having accepted baptism. When his father and brother at Scythopolis oppressed the Christians, the Samaritans were cruelly killed by the angry populace, and all the other Palestinians also were harassed.

Rebellion of the Samaritans.

Although Arsenius was banished from the court, he did not suffer otherwise at the time, and he was crucified only after his intrigue at Alexandria (Procopius, "Historia Arcana," ch. 27, p. 150). Another Samaritan, Faustinus, was a senator and became proconsul; he managed the imperial domains in Palestine and Phenicia (*ib.* ch. 27, p. 153).

In consequence of their favorable position and their numerical strength, the Samaritans were emboldened to take up arms. The cause of this uprising is said to have been as follows: It was customary in Palestine and everywhere in the East, on every Sabbath, after the reading of the Gospel lesson in church, for the Christian young men to enter the synagogues of the Samaritans, mock them, and throw stones at their houses. This happened about 530 in the capital of the Samaritans, Neapolis, or Nablus, when the Christian young men were driven with swords and knives out of the synagogue, pursued to the Church of St. Basil by the furious Samaritans, and killed. When Justinian was informed of this occurrence, he ordered Irenæus, the commander of the town, to punish the Samaritans. Irenæus had to apply to the "dux" of Palestine, Theodorus the "great" (so called probably on account of his victory over the Samaritans). The governor killed many of them; others were sold throughout Palestine as slaves, and their houses demolished; Julian, son of Sabarona, or Samaron, whom the Samaritans had chosen as their "king," also was killed, and his head, together with the diadem and other insignia of royalty, was sent as a trophy to Justinian at Constantinople ("John of Antiochia," printed in "Hermes," vi. 376). This rebellion, but without the antecedent events, is similarly referred to in an almost contemporaneous chronicle ("Chronicon Paschale," 336 [p. 619, ed.

Bonn]). The chronicle adds: "and many of them accepted Christianity and were baptized, either from fear or by force; but even to-day they vacillate in their faith."

Malalas ("Chronicle," xviii. 445) has a different version; according to him, the quarrel broke out in the hippodrome of Nablus, where Jews and Samaritans were racing together, both of these combining against the Christians. "Dux" Theodorus immediately reported the quarrel to Justinian; the prefect Bassus, who could not quell the disturbance, was dismissed, and the insurgents were ultimately vanquished; 20,000 fell on the field, and 20,000 were presented to the Saracen Phylarchus, who had assisted in quelling the uprising. The final outbursts of revolt were suppressed by Dux Irenaeus. Malalas evidently refers to an entirely different event, and the story relating to the circus must be separated from that relating to the synagogue. Theophanes likewise ("Chronogr." i. 274) relates, not the rebellion beginning in the circus, but that under Julian, giving the year 521, which, probably, should be read 531. As an epilogue to the rebellion the fugitive Samaritans endeavored to incite the Persian king Chosroes to war against the Romans by offering him their country as well as an army of 50,000 Jews and Samaritans. Whatever may have been the details of these events, it is evident that the Samaritans offended grievously against the emperor and the empire. Procopius ("Historia Arcana," ch. 27, pp. 150–153) relates still another uprising, in which the Jews and Samaritans fell upon the Christians in a circus at Cæsarea and killed the governor Stephen; this uprising was suppressed in July, 556, by Adamantius, or Amantius.

Oppressive Legislation.

The consequences of persistent rebellion were soon felt. In 532 the emperor issued a decree to the effect that in cases of dispute the Jews could act as witnesses against one another, but not against Christians; heretics, including Samaritans, could not act as witnesses even against one another ("Corp. Juris," i. 5, 21). "The synagogues of the Samaritans shall be destroyed, and if they dare to build others, they shall be punished. They may have no testamentary or other legal heirs except Orthodox Christians" (*ib.* i. 5, 17; comp. i. 5, 18–19). They were forbidden to leave legacies or presents. In 551, Bishop Sergius of Cæsarea succeeded in softening the emperor's severity toward them and securing the repeal of these disgraceful laws (Novella 129). In other respects the status of the Jews and Samaritans was the same. Novella 45 of the year 537 begins as follows: "Relating to the law that Jews, Samaritans, or heretics are not to be exempt from the office of magistrate on pretext of their belief, but that, on the contrary, they shall bear the burdens of the magistracy without enjoying its privileges." In 545 it was ordained that no heretic should, under any circumstances, acquire real estate from a church or religious institution. "If an Orthodox Christian has sold or willed to a Jew or pagan or Arian a piece of land on which there is a church, the church of that locality shall seize such property." "Heretics may not build a 'spelunca' for their heresies, nor may the Jews erect any new synagogues" (Novella 131, ch. 14). The following decrees were issued in favor of the Orthodox Church in newly conquered Africa: "Jews may not keep Christian slaves, nor may they make proselytes by circumcision." "Their synagogues shall be rebuilt in the style of churches." "Jews, pagans, Arians, and other heretics may not have 'speluncas' nor observe any of the ceremonies of the Orthodox Church" (Novella 37, of the year 535).

The emperor interfered also with the religious life of the Jews. He forbade them to celebrate their Passover if it fell on the same day as the Christian Easter, because there was still a Christian sect, the Quartodecimani, that celebrated Easter at the time of the Jewish Passover. Jews in high positions who did not conform to this law were fined (Procopius, "Historia Arcana," ch. 28, p. 156).

Reading of Greek in the Synagogue.

The emperor's decree in regard to the reading of the Greek translation of the Bible throws light on the "Culturgeschichte" of the Jews of that time. Some of the communities in the Byzantine empire desired the lessons for the Sabbath and for festivals read only in Hebrew, while others desired them read in Greek also. As these two parties could not come to any agreement, they applied to the emperor, who decided in harmony with Christian views. In his first words he exhorts the Jews not to take the Bible literally, but in a prophetic sense, in order that they might believe in Jesus Christ. He recommended them to use the Greek translation of the Septuagint, to which he gave signal praise, but he permitted them to use also the version of Aquila, which apparently was preferred by the Jews. The Bible lessons should also be translated into other languages—for example, into Latin in the Italian countries. At the same time he forbids the heads of schools (*ἀρχιφερεχίται*) or the elders, who are called also teachers, to prevent this by cunning or excommunication. These shepherds of the people were furthermore forbidden to give the haggadic exposition (*δευτέρωσις*) following the public reading of the Torah lesson, since the spirit of Judaism was kept alive chiefly by this means. This decree was intended not only for those communities that had requested the Greek translation, but the emperor ordered his secretary Areobindus to proclaim it in all the provinces also (Feb. 13, 553; Novella 146, *περὶ Ἑβραίων*). The emperor had personal relations with one of the leaders of the Jews, a certain Theodosius, who was highly respected by the Christians; this Theodosius took part in a disputation on Jesus and refused to be converted (Suidas, *s.v.* *Ἰησοῦς*).

Attitude Toward Conversion.

Justinian was just enough not to force the Jews of his empire to accept baptism, with the single exception of the community of Borion, in a remote corner of the province of Africa. This community, which claimed to trace its origin and the building of its synagogue back to Solomon, had preserved its autonomy against the Romans as well as against the Vandals; Justinian, however, forced it to accept baptism and changed its synagogue into a church (Procopius, "De Ædificiis," vi. 2). When Belisarius conquered Africa, in 534, the sacred vessels of the Temple were carried to Constantinople; but when a Jew said that these vessels had brought misfortune upon all those that had possessed them, the superstitious Justinian sent them to a church at Jerusalem (Procopius, "Bellum Vandalorum," ii. 9). Since the Jews had good reason to fear the Byzantine rule, it is not surprising that they should oppose Justinian's armies at Naples.

Justinian, whose reign so greatly affected the Jews, is hardly mentioned in the Jewish sources. A passage in a responsum of the Geonim relating to the interdiction of the reading of the Torah refers, according to Grätz, to Justinian's decree, but it may be more correctly referred to Yezdegerd's interdiction (Halberstam, in Kobak's "Jeschurun," vi. 126). The Samaritans, for whom Justinian's reign became fateful, do not mention him at all in their chronicles. The Jewish chronicles copy from Christian sources the statement that he was a great and just ruler, and they know nothing whatever of his tyrannous treatment of the Jews. David Gans quotes from the "Yuḥasin" the statement that during one whole year in the time of Justinian the sun did not shine ("Ẓemaḥ Dawid," anno 566).

JUSTO (ẒADDIḲ), JACOB BEN ABRAHAM: Portuguese chartographer; flourished in Palestine (Wolf, "Bibl. Hebr." i., No. 1097) in the first half of the seventeenth century. He was the author of a chart of Palestine, written in Portuguese under the title "Relação do Citio de Terra de Israel" but published in Latin (Amsterdam, 1631 [Bartolocci: 1621]). It was accompanied with a number of historical data concerning the places noted in the map. Shabbethai Bass ("Sifte Yeshenim," מ, No. 271) mentions the work under the Hebrew title "Mappah," adding that in Latin it is called "Carta." It was afterward (1685) republished by order of Isaac b. Mattithiah Aboab, who himself wrote a preface, the author contributing an introduction, both in Portuguese. Hottinger quotes Justo's work in his "Historia Orientalis," i., ch. viii.

G.

JUSTUS, DR. (pseudonym of **Aaron Briman**, otherwise **Augustus Brimanus**): Convert to Christianity and writer against the Jews; born at Costinasti, Rumania, about 1860. Until the age of twenty he lived at Buczacz, a small village in eastern Galicia. Leaving his wife and children, he went to Berlin and studied rabbinica at the Rabbiner-Seminar, where he posed as strictly Orthodox; but, failing to obtain a position as rabbi, he became a convert to Protestantism. From Berlin he went to Paderborn and turned Roman Catholic. He published anonymous pamphlets against the Jews. In 1883 he wrote "Der Judenspiegel," a compilation of 100 laws taken from the Shulḥan 'Aruk, and purporting to show the animosity of the Jews against Christianity, of which book three editions were printed at Paderborn.

When a Catholic newspaper of Münster, which had published extracts from "Der Judenspiegel," was sued for libel, and Prof. Jacob Ecker was chosen by the court as an expert, Briman aided him in writing his opinion ("Gutachten"), "Der Judenspiegel und die Wahrheit"; but in order to disguise this fact, some criticisms of Briman's "Judenspiegel" were inserted. Afterward Ecker published "Die Hundert Gesetze des Judenkatechismus," a literal reprint of the "Judenspiegel." In his ignorance of Hebrew and of Talmudic writings, Ecker even copied the passages which he had declared in his opinion to be misinterpreted.

In 1884 Briman returned to Austria. He assisted Rohling by furnishing material from Talmudic sources for his anti-Semitic libels.

With the approbation of Archbishop Eder of Salzburg, Briman wrote under his true name a book about the Cabala in which he said that the whole anti-Semitic literature from Eisenmenger to the "Judenspiegel" (his own work!) had been written by stupid and ignorant people.

In March, 1885, Briman was arrested on charges of fraud not connected with his anti-Semitic writings. He was condemned to prison; and when his term was finished he was expelled from Austria. He then took up medical studies in Paris.

G. S. Man.

JUSTUS OF TIBERIAS: Historical writer and one of the leaders of the Jews against the Romans in Galilee in the year 66. What is known of him comes mostly from his political and literary enemy, Josephus Flavius; so that an exact biography of him can not be given. He was a man of Greek education and of moving eloquence. By his oratorical ability he prevailed on the Tiberians, who felt themselves slighted by the favor which Agrippa II. and Rome had shown at their expense to the people of Sepphoris, to revolt. An unnamed brother helped him in this task. With his followers Justus burned the villages that belonged to Gadara and Hippos (Josephus, "Vita," § 9), whose people had always been ill-disposed toward the Jews. Soon afterward Josephus came as governor to Galilee, and he persuaded the chief people of Tiberias, among them Justus, to demolish the palace of Herod the Tetrarch because it was ornamented with figures of animals. Josephus himself says he had to force the people to it (*ib.* § 12). From this it follows conclusively that the actual rebellion in Galilee was instigated mainly by Josephus rather than by Justus. Later, out of fear of the Romans, neither historian wished to admit in his writings his part in the matter; and each blamed the other. Even at the beginning of the war the Tiberians, and especially Justus and his father, Pistus, wished to break with Josephus and

With Josephus in Galilee.

to attach themselves to John of Giscala, but Josephus frustrated the plan (*ib.* § 17). At one time Josephus caused the Tiberians who had been arrested, among them Justus and Pistus, to be taken out of prison; and while eating with them he suggested that it would be wiser for them to surrender to the Romans at a suitable opportunity. He reminded Justus that before he (Josephus) had entered on his office, the brother of Justus had had his hands cut off by the Galileans, who claimed that he had forged letters, and that furthermore Jesus, Justus' sister's husband, had had to suffer from anarchy. The next day he let Justus and his followers go free (*ib.* § 35). Jesus and the sister of Justus were killed in Gamala (*ib.* § 37). Still Justus continued to agitate against Josephus (*ib.* § 54).

When Galilee was subdued, the inhabitants of Decapolis, primarily those of Gadara and Hippos, denounced Justus before Vespasian, and demanded his punishment. Agrippa was ordered to put him to death; but on the plea of his sister Berenice he merely imprisoned him (*ib.* §§ 65, 74). Justus had previously fled to Agrippa at Berytus (*ib.* § 70), and had apparently made himself so popular at court (*ib.* § 74) that Agrippa even gave him money (*ib.* § 65). For some unknown crime Agrippa twice put Justus in prison; and the latter was often advised to escape out of his native city. Nevertheless Agrippa made him his secretary (*τάξις ἐπιστολῶν*), but when he proved unreliable he was expelled by the king (*ib.*).

His History of the Jewish War.

During his enforced leisure he wrote his history of the Jewish war, in which, being a man of mean nature, he very likely out of revenge made Agrippa appear in a decidedly unfavorable light. This was probably the reason why he did not publish his work until after Agrippa's death (100), although he had then had it completed for twenty years (*ib.*). Josephus with justice charges him with not daring to publish his book during the lifetimes of Vespasian, Titus, and Agrippa, and also that he did not use the records of Vespasian. Even the events in Galilee, *e.g.*, the siege of Jotapata, are not exactly described; yet Justus thought himself to be the most reliable narrator of these events. The "Vita," the autobiography of Josephus, was directed against this very work of Justus (*ib.*). Justus' book was, of course, written in Greek, and was probably entitled *Ἱστορία ἡ τοῦ Ἰουδαϊκοῦ Πολέμου τοῦ κατὰ Οὐεσπασιανοῦ* (Stephanus of Byzantium, *s.v.* *Τιβεριάς*). It is mentioned by Eusebius ("Hist. Eccl." iii. 10, 8), by Jerome ("De Viris Illustribus," § 14), and by Suidas (*s.v.* *Ἰοῦστος*), probably not independently, but following Josephus, since the latter's work, approved by Titus, had caused that of his rival to be forgotten.

His Chronicle.

Furthermore, Justus was the author of *Χρονικὸν Ἰουδαίων Βασιλέων τῶν ἐν τοῖς Στέμμασιν*, a chronicle of the Jewish people from Moses to the death of Agrippa II. Photius ("Bibl." Cod. 33) describes it as being written in a very curtailed form. Use was probably made of this work by Sextus Julius Africanus, from whom Eusebius in his chronicle and the Byzantine historian Syncellus draw material. Certain notes in later historians which are not to be found in Josephus probably came from the chronicle of Justus through the excerpts of Africanus (*e.g.*, Syncellus, ed. Dindorf, i. 588). It has been supposed that the account of the heathen-Philistine origin of the Herodian house, related by Africanus, came originally from Justus ("R. E. J." xlv. 45).

If "Justus" is to be read in a corrupted passage of Suidas (*s.v.* *Φλέγων*), it would appear that the former treated Jewish history at greater length than Phlegon; also that Justus dilated upon the morality and other virtues of the Jews, whereas Josephus, according to Suidas, aimed to give the Greeks no offense. In Diogenes Laertius (ii. 5, § 41) is a quotation from Justus' chronicle in the form of an anecdote concerning Plato at the trial of Socrates. It would seem, then, that Photius had seen only an extract from the chronicle. If Justus arranged his book in the form of a royal genealogy (*ἐν τοῖς στέμμασιν*), he may have written objectionably of the Herodians. His remark about Plato seems to show that he shared the Hellenistic belief that Greek wisdom was borrowed from the Jews. Schlatter believes that even Josephus made use of Justus' work in his "Antiquities." Jerome (*l.c.*) mentions a third work by Justus, a short commentary on the Scriptures; but nothing further is known of it.

In Hebrew, Justus was probably called "Zadok," though the name "Justus" was very common among the Jews at that time. It is possible that, like Josephus, he lived in Rome toward the close of his life, and that he died there.

JUTRZENKA ("The Dawn"): Jewish weekly published at Warsaw in the Polish language. Its first number appeared July 5, 1861; and the paper continued to be issued until Oct. 23, 1863. Among its principal contributors were Ludwig Gumplowicz and Alexander Kraushar. The former published in it his "Prawodawstwo Polskie," etc., on Polish legislation concerning the Jews; Kraushar contributed poems on Jewish life and articles on the history of the Jews of Poland; and I. Rosenblatt wrote on slavery according to Roman and Mosaic law. Of its Christian contributors may be mentioned Mikulski and the poet Adam Maszewski. The discontinuance of the publication was due to the fatal end of the Polish insurrection.

KAB. See Weights and Measures.

KA'B AL-AḤBAR: One of the most prominent fathers of Moslem tradition, and one of those who introduced into this branch of Arab literature the method as well as many details of the Jewish Haggadah: died 32 or 35 A.H. (652 or 655 C.E.). Of his earlier life nothing is known except that he was a Jew, a native of Yemen. His complete name was Abu Isḥaḳ Ka'b b. Mati' b. Haisu (Hosea ?). A genealogy attributing to him a purely Arabic descent also exists; it was probably invented after he had embraced Islam. This he did during the califate of Abu Bakr (according to others, of Omar), whom he joined at Medina. On account of his theological learning he was styled "Al-Ḥibr" or "Al-Aḥbar," which is an adaptation of the Hebrew "ḥaber." He lectured on the Koran and the career of Mohammed, not from the merely exegetical and biographical points of view, but in a homiletic and haggadic manner, just as Abdallah b. Salam had done. Both these men laid the foundation for the legends which glorify Mohammed's youth and prophetic call.

The most prominent of Ka'b's disciples were Ibn 'Abbas and Abu Hurairah, prolific traditionists, who developed the art of apotheosizing the prophet's life to its utmost extent, and are therefore not very reliable authorities. Ka'b was a great favorite of the calif Omar, who frequently consulted him, chiefly on religious matters. As a politician Ka'b was a partizan of Othman, and was once even flogged by Abu Darr, who disapproved of the calif's administration. There are many sayings attributed to Ka'b, among them being the statement that "the world will last six thousand years" (comp. Sanh. 97). Several other sayings refer to the superiority of Egypt over other countries. Ka'b retired toward the end of his life to Emesa. He left a son named Tubai.

KA'B AL-ASHRAF: Jewish poet of Medina and an implacable enemy of Mohammed. His father was an Arab of the family of Nabhan (a branch of the tribe of Ṭayy), but his mother was a Jewess of the Banu al-Naḍir. His father having died early, Ka'b was brought up in his mother's family and in her faith. Tradition relates that at one time he confessed Islam, and even turned his face in prayer toward Mecca. After Mohammed's victory over the Meccans at Badr, Ka'b is supposed to have exclaimed that the interior of the earth would be pleasanter than its surface. He composed poems bewailing the defeat of the Meccans and exciting the Ḳuraish to revenge, but not all of these poems are properly authenticated.

It is but natural that Moslem authors should ascribe many evil deeds to their arch-enemy; their veracity is, however, questionable. Ka'b was charged with having maintained sinful relations with the wives of various Moslems, and with having gone to Mecca to induce the Ḳuraish to fight Mohammed once more. The latter, in order to nullify Ka'b's influence, hurled against him the following passage: "Recite to them the history of him to whom we have given our signs, but who turned away from them; had he wished, we would have exalted him thereby, but he crouched upon the earth and followed his own desire. He is likened unto a dog, which, if thou drivest him away, hangeth out his tongue, and if thou leavest him, hangeth out his tongue likewise" (Koran, vii. 174-175). There are two allusions to Ka'b in this passage; the first is contained in the reference to one possessing God's "signs" (*i.e.*, the Bible), the second in the word "kalb" (dog), which by alliteration suggests the name of the poet. Since he refused to be frightened, Mohammed asked his friends: "Who will rid me of the son of Ashraf?" One of them, Mohammed b. Maslamah, declared himself ready to murder Ka'b, but asked permission to tell a falsehood; this was readily granted. The murderer and two accomplices entered Ka'b's house under a pretext and murdered him. His death was bewailed in several poems by the Jewish poet Sammak, who described him as a man ever faithful to his word and never guilty of treachery. The expulsion of the Banu al-Naḍir followed soon after Ka'b's death.

KABOS, EDUARD: Hungarian journalist and writer; born Dec. 2, 1864, at Nagy-Karoly. He entered the University of Budapest for the purpose of studying modern philology, intending to become a teacher, but adopted journalism instead. He at first accepted a position on the "Egyetértés," but his abilities soon secured for him the position of parliamentary reporter and writer of feuilletons for the "Pesti Napló." In 1897 he became contributor to the "Országos Hirlap," and in 1898 editor of the parliamentary column of the "Budapesti Napló." In 1902 he was elected a member of the most prominent Hungarian literary society, Petöfi Társaság, in recognition of the services which he had rendered to Hungarian literature.

Kabos' works include: "Elzüllöttek" (1885), stories; "Vásáo" (1887), a novel; "A Kupéhau" (1888), a farce; "Evo" (1889), a drama; "Harakiri" (1889), stories; "Tantalusz" (1891), a drama; "Koldusok" (1893), stories; "Fehév Eprakák" (1893), a novel; "A Holló" (1895), a comedy; "Mab Királyno" (1895), a comedy; "Por" (1895), stories; "Vándorok" (1897), stories; "A Cseugeri Kalapok" (1898), stories; "A Verebek" (1900), a novel.

S. L. V.

ḲADDISH (lit. "holy"): Name of the doxology recited, with congregational responses, at the close of the prayers in the synagogue; originally, and now frequently, recited after Scripture readings and religious discourses in schoolhouse or synagogue. It is, with the exception of the last clause, composed in Aramaic. The following is the translation:

"Magnified and sanctified [comp. Ezek. xxxviii. 23] be His Great Name in the world which He hath created according to His will. May He establish His Kingdom during your life and during your days, and during the life of the whole household of Israel, even speedily and in a near time! So say ye 'Amen.'"

Response: "Let His Great Name be blessed forever and unto all eternity!"

"Blessed, praised, and glorified, exalted, extolled, and honored, uplifted and lauded, be the name of the Holy One, blessed be He! above all the blessings and hymns [benedictions and psalms], the praises and consolations [the prophetic words], which are uttered in the world. So say ye 'Amen.'"

"May the prayers and supplications of all Israel be accepted by their Father, who is in Heaven! So say ye 'Amen.'"

Ḳaddish di-Rabanan: "Upon Israel, and the masters and their disciples, and the disciples of their disciples, and upon all those that occupy themselves with the Torah, whether in this place or in any other place, come peace and favor, and grace and mercy, and a long life and ample sustenance, and redemption, from their Father, in Heaven. So say ye 'Amen.'"

"May there be abundant peace from Heaven and life [the Portuguese liturgy inserts: "and plenty, salvation and consolation, redemption and healing, forgiveness and pardon, freedom and safety"] for us and all Israel! So say ye 'Amen!'"

Response: "He who maketh peace in His Heights, may He make peace for us and all Israel! So say ye 'Amen!'"

In place of the first paragraph, the Ḳaddish recited after burial has the following:

"Magnified and sanctified be His Great Name in the world that is to be created anew when He will revive the dead and raise them up into life eternal, and when He will rebuild the city of Jerusalem and establish His Temple in the midst thereof, and uproot all false worship from the earth, and restore the worship of the true God. May the Holy One, blessed be He! reign in His sovereignty and glory during your life and in your days, and in the days of the whole household of Israel, speedily and at a near time. So say ye 'Amen!'"

Origin.

The Ḳaddish has a remarkable history. Originally, it had no relation whatsoever to the prayers, and still less to the dead. It was the doxology recited by the teacher or preacher at the close of his discourse, when he was expected to dismiss the assembly with an allusion to the Messianic hope, derived especially from the Prophets and the Psalms. Therefore Ezek. xxxviii. 23 is employed; and as the last redemption of Israel was, like the first, brought in connection with the Holy Name (see Pes. 50a; Pesiḳ. 92a; Ex. iii. 15), the emphasis was put upon the congregational response, "May His Great Name be praised for all eternity!" (see Sifre, Deut. 306). So great was the value attached to this response that the Talmud (Soṭah 49a) declares: "Since the destruction of the Temple the world has been sustained by the Ḳedushshah of the liturgy and the 'yehe shemeh rabba' [the Ḳaddish response] of the haggadic discourse." "Joining loudly and in unison in the congregational response 'yehe shemeh rabba' has the power of influencing the heavenly decree in one's favor, or of obtaining for one forgiveness," assert R. Joshua b. Levi and R. Johanan (Shab. 119b; comp. Midr. Mishle x. 10, xiv. 4). When Israel enters the synagogue or the schoolhouse and responds, "Let His Great Name be praised!" the Holy One, blessed be He! says: "Happy the king who is thus lauded in his house!" (Ber. 3a).

The name "Ḳaddish" for the doxology occurs first in Masseket Soferim xvi. 12, xix. 1, xxi. 6; the Ḳaddish at funerals is mentioned *ib.* xix. 12: being addressed to the whole assembly, it was spoken in the Babylonian vernacular (see Tos. Ber. 3a). The two paragraphs preceding the last, which is a late addition, were originally simple formulas of dismissal by the preacher (comp. M. Ḳ. 21a). The "Ḳaddish of the students" still shows its original connection with the schoolhouse, and is a prayer for the scholars; occasionally, therefore, special prayers were inserted for the "nasi" or the "resh galuta," or for distinguished scholars like Maimonides (see Ibn Verga, "Shebeṭ Yehudah," ed. Wiener; "Sefer Yuḥasin," ed. Filipowski, p. 219).

The Ḳaddish for the dead was originally recited at the close of the seven days' mourning, with the religious discourses and benedictions associated with it, but, according to Masseket Soferim xix. 12, only at the death of a scholar; afterward, in order not to put others to shame, it was recited after every burial (Naḥmanides, "Torat ha-Adam," p. 50; see Mourning).

In the course of time the power of redeeming the dead from the sufferings of Gehenna came to be ascribed, by some, to the recitation of the Ḳaddish.

Redeeming Powers Ascribed to the Ḳaddish.

In "Otiyyot de-R. 'Aḳiba," a work of the geonic time, it is said, under the letter "zayin," that "at the time of the Messiah God shall sit in paradise and deliver a discourse on the new Torah before the assembly of the pious and the angelic hosts, and that at the close of the discourse Zerubbabel shall rise and recite the Ḳaddish with a voice reaching from one end of the world to the other; to which all mankind will respond 'Amen.' All souls of Jews and Gentiles in Gehenna will respond with 'Amen,' so that God's mercy will be awakened and He will give the keys of Gehenna to Michael and Gabriel, the archangels, saying: 'Open the gates, that a righteous nation which observeth the faith may enter' [Isa. xxvi. 2, "shomer emumim" being explained as "one that sayeth 'Amen'"]. Then the 40,000 gates of Gehenna shall open, and all the redeemed of Gehenna, the wicked ones of Israel, and the righteous of the Gentiles shall be ushered into paradise." The following legend is later: Akiba met a spirit in the guise of a man carrying wood; the latter told Akiba that the wood was for the fire in Gehenna, in which he was burned daily in punishment for having maltreated the poor while tax-collector, and that he would be released from his awful torture if he had a son to recite the Bareku and the Ḳaddish before a worshiping assembly that would respond with the praise of God's name. On learning that the man had utterly neglected his son, Akiba cared for and educated the youth, so that one day he stood in the assembly and recited the Bareku and the Ḳaddish and released his father from Gehenna (Masseket Kallah, ed. Coronel, pp. 4b, 19b; Isaac of Vienna, "Or Zarua'," ed. Jitomir, ii. 11; Tanna debe Eliyahu Zuṭa xvii., where "R. Johanan b. Zakkai" occurs instead of "R. Akiba"; "Menorat ha-Ma'or," i. 1, 1, 1; Manasseh ben Israel, "Nishmat Ḥayyim," ii. 27; Baḥya ben Asher, commentary on Shofeṭim, at end; comp. Testament of Abraham, A. xiv.).

The idea that a son or grandson's piety may exert a redeeming influence in behalf of a departed father or grandfather is expressed also in Sanh. 104a; Gen. R. lxiii.; Tanna debe Eliyahu R. xvii.; Tanna debe Eliyahu Zuṭa xii.; see also "Sefer Ḥasidim," ed. Wiztinetzki, No. 32. In order to redeem the soul of the parents from the torture of Gehenna, which is supposed to last twelve months ('Eduy. ii. 10; R. H. 17a), the Ḳaddish was formerly recited by the son during the whole year (Kol Bo cxiv.). Later, this period was reduced to eleven months, as it was considered unworthy of the son to entertain such views of the demerit of his parents (Shulḥan 'Aruk, Yoreh De'ah, 376, 4, Isserles' gloss; see Jahrzeit). The Ḳaddish is recited also on the Jahrzeit. The custom of the mourners reciting the Ḳaddish in unison is approved by Jacob Emden, in his "Siddur," and that they should recite it together with the reader is recommended by Ẓebi Hirsch Ḥayot, in "Minḥat Ḳena'ot," vii. 1. That the daughter, where there is no son, may recite the Ḳaddish was decided by a contemporary of Jair Ḥayyim Bacharach, though it was not approved by the latter (Responsa, No. 123; "Leḥem ha-Panim," p. 376). A stranger, also, may recite the Ḳaddish for the benefit of the dead (Joseph Caro, in "Bet Yosef" to Yoreh De'ah, *l.c.*). For the custom in Reform congregations see Reform.

A. K.

——**Ritual Use:** There are five forms of the Ḳaddish: (1) Ḳaddish di-Rabanan (Scholar's Ḳaddish); (2) Ḳaddish Yaḥid (Individual, or Private, Ḳaddish); (3) Ḳaddish de-Ẓibbur (Congregational Ḳaddish; this form of the Ḳaddish has two divisions—the Ḥaẓi Ḳaddish [Semi-Ḳaddish] and the Ḳaddish Shalem [Full Ḳaddish]); (4) the Burial Ḳaddish (the Mourner's First Ḳaddish); (5) Ḳaddish Yatom (Orphan's Ḳaddish), or Ḳaddish Abelim (Mourner's Ḳaddish).

Forms of Ḳaddish and Their Use.

1. The Scholar's Ḳaddish is recited upon the completion of a division of the Mishnah or of a masseket of the Talmud, or of a lecture by the rabbi or maggid. The students of the various yeshibot, or private scholars, are frequently called upon to recite a chapter of the Mishnah, after which, as a rule, the baraita of R. Hananiah b. 'Akashya (end of Makkot) is read, followed by Ḳaddish di-Rabanan, for the repose of the souls of the dead.

2. The Ḳaddish Yaḥid usually preceded a supplication for the satisfaction of worldly needs. The beginning of the so-called "Lord's Prayer" is an example of the formula used in early times, and resembles that contained in Tanna debe Eliyahu Rabbah (*e.g.*, in ch. v. and xiv.). The Ḳaddish Yaḥid was also a response to the Ḳaddish recited by the synagogal reader. The prayer-book of Amram Gaon of the ninth century contains various forms (pp. 3, 10, 12, 13, 14, and 18, ed. Warsaw, 1865). The response of the congregation has since been curtailed to "Yehe Shemeh Rabbah."

3. The Ḳaddish de-Ẓibbur is recited by the ḥazzan at public prayer. This Ḳaddish consists of Ḥaẓi Ḳaddish and Ḳaddish Shalem. The Ḥaẓi Ḳaddish, up to "Titḳabbal," is said by the ḥazzan: (1) before "Bareku"; (2) after the morning "Taḥanun" (prostration); (3) after the "Ashre" of the "Minḥah" (afternoon prayer); (4) before "Wehu Raḥum"; (5) before the "'Amidah" (standing prayer), in the evening; (6) before "Wi-Yehi No'am," on Saturday night; (7) before the "Musaf" prayer; (8) after reading the Torah. The Ḳaddish Shalem is recited: (1) after "U-ba le-Ẓiyyon," at morning prayer; (2) after the "'Amidah" of "Minḥah"; (3) after the "'Amidah" for the evening; (4) before "Weyitten Leka," on Saturday night; (5) after the "Musaf" prayer.

4. The Burial Ḳaddish, recited immediately after the burial, is quoted in Soferim xix. (end). According to Maimonides this is the Rabanan Ḳaddish, and should be recited after study; this is the present practise of the Orient; but Western custom has reserved it for burials, at which the assembly joins in the recitation of the mourners up to the word "be-ḥayyekon" (Baer, "Seder 'Abodat Yisrael," p. 588).

5. The Ḳaddish Yatom, like the regular mourner's Ḳaddish, is the full Ḳaddish of the ḥazzan (with the exception of the "Titḳabbal" sentence), up to "Yehe Shelama." The Ḳaddish after the "'Alenu" is usually recited by the orphan. The Ḳaddish Yatom is said also after "Piṭṭum ha-Ḳeṭoret," "An'im Zemirot," the Daily Psalm, and "Bame Madliḳin" (on Friday night).

Rules of Precedence.

Concerning the precedence of the various classes of mourners as regards the right of saying Ḳaddish, there is a difference of opinion. The Ashkenazic custom gives the following order: (1) Jahrzeit; (2) the first seven days of mourning; (3) the first thirty days of mourning; (4) the first year, or rather eleven months, of mourning less one day. The Jahrzeit mourner has the precedence over all for one Ḳaddish. If several Jahrzeit mourners are represented, the Ḳaddishim are divided among them to the exclusion of others. If there are more Jahrzeit mourners than there are Ḳaddishim in the service, lots are drawn. After each of the Jahrzeit mourners has recited one Ḳaddish the rest go to the seven-day mourners. If there are no seven-day mourners, the thirty-day mourners recite them. The first-year mourner, in the absence of other mourners, recites one Ḳaddish after the Daily Psalm, and the Jahrzeit mourners all the rest. A minor who is an orphan takes precedence over an older person. A resident or a Jahrzeit mourner has the preference over a newcomer, unless the latter be a seven-day mourner, when their rights are equal. Mourners whose rights of precedence are equal decide among themselves by drawing lots.

The Sephardic minhag, however, allows the mourners to recite the Ḳaddish jointly, but they are so distributed in the synagogue that the congregation may distinguish their voices at various points and respond "Amen." This custom is gradually being accepted by the Ashkenazic synagogues.

In Seder R. Amram Gaon (p. 4) an explanation is given of the custom of bowing five times during the recital of Ḳaddish—at the words (1) "yitgadal," (2) "ba-agala," (3) "yitbarak," (4) "shemeh," (5) "'oseh shalom": the five inclinations correspond with the five names of God mentioned in Mal. i. 11. The seven synonyms of praise—"blessed," "praised," "glorified," "exalted," "extolled," "honored," and "uplifted" (the word "lauded" is omitted)—signify the seven heavens above. See JAHRZEIT.

A. J. D. E.

——**Musical Rendering:** From the position of the Ḳaddish at the conclusion of each service, and more particularly from the employment of its shorter form, "Ḳaddish Le'ela," as marking off each section of the service, more importance came to be attached to the particular form of its intonation as the accompanying circumstances varied, than was due even to the nature of the doxology and the responses necessitating its public intonation. Following, too, the fundamental constructive principle of all synagogal chants, explained under CANTILLATION and ḤAZZANUT, in consequence of which the same text varies alike in tonality and in melodic outline according to the importance of the occasion and to the esthetic expression associated with it, there have gradually shaped themselves in each of the traditional uses a number of tuneful renderings of the Ḳaddish which have become in themselves typical melodies of the day or of the service. As early as the fifteenth century such melodies were recognized; and the utmost importance was attached to their faithful reproduction at the point in the liturgy with which they had become traditionally associated (comp. MaHaRIL, ed. Sabbionetta, 43b, 49a, 61a, b, etc.).

Fixed Melodies.

These were probably the settings of the Ḳaddish, at least in outline, which are now most widely accepted: but most of those settings which exhibit formal construction are more likely later introductions due to the influence of contemporary folk-songs (see MUSIC, SYNAGOGAL). For, originally, the model vocal phrase which, when amplified and developed to the text of the particular 'AMIDAH (comp. ḤAZZANUT) with which it was associated, formed the intonation to which that prayer was recited, reproduced itself also in the Ḳaddish which immediately preceded the prayer. Such, indeed, still are the intonations in the ordinary week-day services, in the Sabbath afternoon service, those at the close of the Psalms, etc., in the morning service, or those before the "Musaf" of ṬAL and GESHEM or the Atonement NE'ILAH, in the Ashkenazic, as well as most of the intonations in the Sephardic use.

Other settings of this class continue the intonation of the passage immediately preceding the Ḳaddish, as that for Sabbath eve in the Sephardic use (comp. De Sola and Aguilar, "Ancient Melodies," No. 9, London, 1852), or those of the New-Year and Atonement evening service in the Ashkenazic use. Others, again, such as the powerful, if florid, recitative associated with the penitential "Musaf" (see music), have been developed from traditional material independently of the associated service.

More formal in structure, and thus more nearly allied to melody according to modern conceptions, are the later, and more numerous, settings of the Ḳaddish which have been adapted from, or built on similar lines to, contemporary folk-songs. Several are far from solemn in character, as, for example, national or patriotic airs (the "Marseillaise" was employed for the Ḳaddish in Lorraine about 1830; and still more incongruous tunes have been used), or mere jingles like the festival evening melodies still utilized in England (comp. Mombach, "Sacred Musical Compositions," pp. 115, 117, London, 1881) or that often used in Germany after the Festival of the Reading of the Law (comp. Baer, "Ba'al Tefillah," No. 825, Göteborg, 1877; Frankfort, 1883). Others, enriched with characteristically Hebraic adornment, majestic or pathetic in themselves, have in turn become representative themes, like the prayer-motives of the ḥazzanut, typifying the sentiment prominent in the service or occasion with which they are associated. Such, for instance, are the obviously Spanish air known among Sephardim as "La Despidida," and sung as a farewell on the last day of each festival, and the beautiful melodies employed after the reading of the lesson from the Law among the northern Jews (see music).

Representative Themes.

A very curious and unesthetic custom formerly prevailed among the Ashkenazim of chanting the Ḳaddish, after the lessons on the rejoicing of the law, to a cento of phrases from melodies in use throughout the rest of the year, the version once employed in London (comp. Mombach, "Sacred Musical Compositions," p. 137) introducing fragments of no less than twelve such airs.

The congregational responses were originally toneless, a mere loud acclaim. To Sulzer is due the casting of them into the generally accepted shape. Other composers also have presented suitable definite melodic phrases. The tendency is properly to model the responses upon the tuneful material of the particular Ḳaddish itself (comp. Baer, "Ba'al Tefillah," *passim*, and Cohen and Davis, "The Voice of Prayer and Praise," pp. xx. *et seq.*, London, 1899).

BIBLIOGRAPHY: Most collections of synagogal melodies present some form of the Kaddish or responses for it; see particularly those given in Baer, *Ba'al Tefillah*. Of especial interest, in addition to those enumerated above, are: Consolo, *Canti d'Israele*, Nos. 127, 302, Florence, 1892; קדיש נעילה as given in Sulzer, *Shir Ẓiyyon*, No. 128, Vienna, 1840; Naumbourg, *Aggudat Shirim*, No. 15, Paris, 1874; Baer, *l.c.* No. 1466 (both Polish and German forms); Marksohn and Wolf, *Synagogal-Melodien*, Nos. 11, 13, Leipsic, 1875; Naumbourg, *l.c.* No. 23; Pauer and Cohen, *Traditional Hebrew Melodies*, No. 11, London, 1892; Braham and Nathan, *Byron's Hebrew Melodies*, No. 3, London, 1815; Naumann, *History of Music*, Eng. ed., p. 82, London, 1886; *Young Israel*, i. 243, ii. 104 and 152, London, 1898-99; H. Zivi, *Der Jahrkaddisch für Simchasthora*, Leipsic, 1902; Nowakowsky, *Schlussgebet für Jom Kippur*, No. 1.

KADELBURG, GUSTAV: German actor and dramatist; born Jan. 26, 1851. He made his first appearance at Leipsic in 1869, and two years later played at the Wallnertheater, Berlin. He was very successful in comedy parts, but abandoned the stage to write comedies and farces. His best-known plays (some written in conjunction with Blumenthal and Von Schönthan) are: "In Civil"; "Die Berühmte Frau"; "Grossstadtluft"; "Die Orientreise"; "Der Herr Senator"; "Zwei Wappen"; "Der Wilde Baron"; "Migräne"; "Mauerblümchen"; "Zum Wolthätigen Zweck"; and "Im Weissen Rössl."

KADESH or **KADESH-BARNEA** (קדש [= "sanctuary"]; קדש ברנע): A place on the western frontier of Edom, in the "wilderness of Paran," "eleven days' journey from Horeb by the way of Mount Seir" (Num. xiii. 26, xx. 16; Deut. i. 2). In whole or in part, the same region was apparently known also as the "wilderness of Zin" (Num. xiii. 21, xx. 1), as the "wilderness of Kadesh" (Ps. xxix. 8), and as the "country of the Amalekites" (Gen. xiv. 7). The term "city" (עיר, Num. xx. 16) may possibly refer to an Amalekite encampment. The name "En-mishpat" = "well of judgment" (Gen. xiv. 7) seems to point to the existence of an ancient sanctuary which, as the seat of an oracle, was a place of judgment (comp. Ex. xxi. 6; xxii. 8, 9, where, also, the Hebrew sanctuary is the place of judgment). Just to the south, according to Num. xxxiv. 4 (P), ran the boundary-line of Judah (see also Josh. x. 40-42, xv. 3; Ezek. xlvii. 19, xlviii. 28). Hither the Israelites came in the second year of the Exodus (Num. xii. 16, xiii. 26; Deut. i. 19; but comp. Num. xx. 1, where the date given is, apparently, the first month of the fortieth year). From this place the spies were sent to "spy out the land of Canaan." Here occurred the rebellion of Korah, Dathan, and Abiram. Here, too, Miriam died and was buried. At one time the springs failed, and Moses, at the command of YHWH, "smote the rock twice; and the water came out abundantly." Owing to the rebellious conduct of the people on this occasion the name "water of Meribah" (= "strife") was given to the springs (Num. xx. 2-13; comp. Deut. xxxii. 51 and xxxiii. 2, where Wellhausen reads "Meribat Ḳadesh"). Moses and Aaron on account of the angry spirit they exhibited were forbidden by YHWH to lead Israel into the land of promise (Num. xx. 12; Ps. cvi. 32-33).

The site of Kadesh was discovered in 1842 by John Rowland, and has since been visited and described by Trumbull. It lies midway between Al-'Arish and Mount Hor in a great treeless limestone plateau. The spring of clear water, which rises at the foot of a limestone cliff, is still called "'Ain-Ḳadis" = "spring of Kadesh."

KADISCH, ZERAH B. MEÏR, OF PRAGUE: Teacher in Rechnitz, Hungary, in the first half of the nineteenth century. In the preface of his "Oẓar ha-Ḥayyim" (Prague, 1832) he states that, incapacitated by sickness after many years of teaching, he embodied the results of his experience in that book. The first and third parts give methods of teaching in Jewish schools and suggest a curriculum; they are written in German with Hebrew characters; the second part contains the 613 commandments in Hebrew and German.

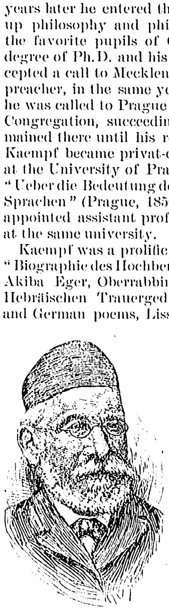
KAEMPF, SAUL ISAAC: Austrian rabbi and Orientalist; born at Lissa, Posen, May 6, 1818; died at Prague Oct. 16, 1892. He received his first lessons from his father, Aaron Jacob Kaempf, a Talmudic scholar, and then entered the gymnasium at

Berlin and continued the study of the Talmud under E. Rosenstein. In 1836 he returned to Posen and prosecuted his studies under Akiba Eger. Four years later he entered the University of Halle, took up philosophy and philology, and became one of the favorite pupils of Gesenius. He received the degree of Ph.D. and his rabbinical diploma, and accepted a call to Mecklenburg-Strelitz as teacher and preacher, in the same year (1844). Two years later he was called to Prague as preacher of the Temple Congregation, succeeding Michael Sachs; he remained there until his retirement in 1890. In 1850 Kaempf became privat-docent in Semitic languages at the University of Prague, his dissertation being "Ueber die Bedeutung des Studiums der Semitischen Sprachen" (Prague, 1850); eight years later he was appointed assistant professor of Oriental languages at the same university.



Saul Isaac Kaempf.

Kaempf was a prolific writer. His works include: "Biographie des Hochberühmten Hochseligen Herrn Akiba Eger, Oberrabbiner zu Posen, Nebst einem Hebräischen Trauergedicht" (with other Hebrew and German poems, Lissa, 1838); "Die Ersten Makamen aus dem Tachkemoni, oder Divan des Charisi" (Berlin, 1845); "Simrath Jah: Gottesdienstliches Gesangbuch, Eingeführt im Israelitischen Tempel zu Prag" (Prague, 1849); "Nichtandalusische Poesie Andalusischer Dichter aus dem Elften, Zwölften und Dreizehnten Jahrhundert" (vol. ii. printed under the title "Zehn Makamen aus dem Tachkemoni, oder Divan des Charisi," *ib.* 1858); "Suleiman: Dramatisches Gedicht" (*ib.* 1859); "Mamtik Sod: Beleuchtung des Frankelschen Werkes 'Hodegetik zur Mischna' in Dogmatischer Beziehung," a defense of Frankel in his controversy with S. R. Hirsch (*ib.* 1861); "Die Inschrift auf dem Denkmal Mesa's, König von Moab" (*ib.* 1870); "Phönizische Epigraphik: Die Grabschrift Eschmunazars, Königs der Sidonier" (*ib.* 1874); "Das Hohelied ins Deutsche Uebertragen" (*ib.* 1877). His collection of prayers for Jewish holidays and festivals, according to the ritual of the Temple Congregation of Prague (*ib.* 1854; also translated), has been frequently republished. In cooperation with L. Philippson and W. Landau he edited the Bible for the Jewish Bible Society.

In addition to many single sermons delivered at celebrations and on various special occasions, several treatises of larger scope were contributed by him to various periodicals: "Ueber die Vorstellung der Alten Hebräer von der Unsterblichkeit der Seele" (in "Orient, Lit." 1842, Nos. 7-27); "Ueber Spinoza's Theologisch-Politischen Traktat" (*ib.* 1842, Nos. 34-47); "Hillel der Aeltere" (*ib.* 1849).

S. M. K.

KAF (כ): Eleventh letter of the Hebrew alphabet. The name is generally taken to mean "hollow of the hand," to which the shape of the letter has a near resemblance (see Alphabet). Kaf belongs to the six consonants called "mutes," and has a twofold pronunciation: an explosive, which is indicated by the "dagesh lene" placed in the middle of the letter, and a spirant. In the former case it corresponds to the English "k," and in the latter nearly to the Greek χ (by which it is often represented in Greek transliteration) or the German soft "ch" (there is no English equivalent). As a palatal kaf is related to ג and ק, with which it sometimes interchanges; in some rare cases it passes into the harsh gutturals ח and ע. The syllable "ke" (כְּ) is a preposition, meaning "at," "as," and is prefixed to nouns and infinitives. At the end of a word kaf is written thus: ך. When used as a numeral it has the value for 20.

T. I. Br.

KAFFA or **FEODOSIA (THEODOSIA):** Town in the Crimea, Russia. It existed as a Greek colony at the beginning of the common era, and, like the rest of such colonies, it undoubtedly had some Jewish inhabitants. It was destroyed in the second century, and was rebuilt as Kaffa. Inscriptions bearing the dates 909 and 1018 have been found in the Rabbinite synagogue; from these it is seen that the older settlement had a well-organized Jewish community.

In 1266 the new town was established by the Genoese in the vicinity of the old one, and among its inhabitants were both Rabbinites and Karaites, as is indicated by an epigraph on a scroll of the Law, preserved in the Karaite synagogue, in which one Shabbethai, the son of Isaac, announces his gift of the scroll to the Karaite synagogue of Kirim (Sulchat) in 1274. The Ark of the Covenant of the Rabbinite synagogue of Kaffa bears the date 1309. Another scroll of the Law, preserved in the same synagogue, was dedicated by Eleazar ben Jacob to the community of Sulchat, and bears the date 1320-50.

An inscription in the Karaite synagogue, dated 1409, bears the signatures of Isaac, son of Moses, and Sarah, daughter of Moses. A tombstone, bearing the date 1457, is now used as a cover for the synagogue well at Kaffa. Another slab, preserved in the museum of Kaffa, once served as the gravestone of Rabbi Abraham, son of Naḥmu, who died Feb. 1, 1502. Still another tombstone, dated 1508, bears the name of Rabbi Joshua, son of Rabbi Meïr Ashkenazi of Taman. There are also gravestones dated 1540 and 1553.

Johann Schültberger, who from 1394 to 1427 traveled in Europe, Asia, and Africa, states in his description of Kaffa that there were two sects of Jews there with separate synagogues, and that there were 4,000 Jewish houses in the suburbs. In the constitution of the Genoese colonies on the Black Sea, issued at Genoa Feb. 28, 1449, the bishops of Kaffa are directed not to oppress the Greeks, Armenians, Jews, and peoples of other denominations, and not to interfere in the affairs of other confessions, but to be content with supervising the moral welfare of their own communicants. In the event of the failure of the bishops to comply with the decisions of the councils the latter and the board of elders will, it is announced, be required to furnish to Jews, Greeks, and Armenians protection from robbery and from unjust exactions.

Under the Tatars.

During the rule of the Tatars, the Russian czar Ivan III., Vassilivich, had his Jewish representative Khoza Kokos at Kaffa. Zacharias de Guizolfi also resided at Kaffa, as is seen from the letters of Ivan III. to his ambassadors. These letters show that the Kaffa Jews had intimate commercial relations with the Jews of Kiev.

Martin Bronevski, who visited the Crimea in 1578, in his "Tatariæ Descriptio" (Cologne, 1595), says that the inhabitants of Kaffa—Turks, Jews, and Christians—cultivated beautiful gardens and vineyards, extending over more than two miles. The khan collected annual tribute from the Tatars, Jews, Circassians, and others. For the ransom of prisoners of war the foreign ambassadors engaged the services of Jews and other merchants. The Dominican John de Luca (1625) states that in his time Kaffa was inhabited by Jews. The Crimean khan Mohammed Girai (1654–66) ordered his representative not to interfere with the Jew Mordecai, who intended to sell three slaves in Kaffa or in Karasu, and who had paid for his license.

H. R. J. G. L.

ḲAHAL: A Hebrew word meaning "assembly" or "community," and applied formerly to the local governments of the Jewish communities in Lithuania, Poland, and Russia. Its organization had, however, been established, in part at least, in western Europe before the Crusades (see Community). The foundations of the ḳahal organization were laid in the collective responsibility of the community to the government in all matters of taxation. The government preferred to deal with the ḳahal as a body and not with its individual members, granting it autonomy in matters concerning the component parts of the community. In its early history (15th cent.) the ḳahal organization of Poland was a popular institution. It watched over the interests of the Jewish masses, and it was comparatively free from administrative abuse. The Jewish communities had not had at that time a widespread recourse to the Ḥazaḳah, or the "ḥezḳat yishshub" (priority of holding property); they were still comparatively free from debt; and they were firmly bound to one another by a solidarity of interest. The purely administrative and the religious functions of the ḳahal were maintained distinct from each other, and when they did clash the differences were adjusted within its own organization and without recourse to the general government. Disputes between one ḳahal and another and disputes within the ḳahal itself between the administrative and religious officials were referred for adjustment to the Jewish synods or to the Council of Four Lands. In extreme cases, however, the ḳahal invoked the aid of the civil authorities.

Organization.

Originally the administrative bodies of the communities ("zbory zhidovskiye"), and later the ḳahals themselves, were regarded as the government's agents; and toward the end of the sixteenth century they developed into uniform organizations throughout the country. The more important communities each served as the center for a certain territory through which were scattered the smaller communities and isolated Jewish families. The administrative body of the central community was called "ḳahal," while those of the smaller dependent communities were designated "prikahalki." The ḳahal consisted of a certain number of persons, usually proportionate to the Jewish population. In Cracow it was composed of 40 members; in Wilna of 35; in the medium-sized communities there were from 22 to 35, and in the small communities not less than 8. Every ḳahal annually selected by lot from among its members five "electors," who in their turn elected the succeeding ḳahal, also by lot or by vote. These annual elections usually resulted in the mere rearrangement of the administrative functions among the officers of the preceding ḳahal, and the organization therefore assumed the character of an oligarchy. The administrative officers were divided into four classes. At the head were four elders ("rashim"), who were followed by from three to five "honorary" members ("tuvim," *i.e.*, "ṭobim"). These two classes formed the nucleus of the ḳahal and adjudged all communal affairs. To the number of at least seven they formed the official council of the ḳahal. The elders served by turns for a period of one month as treasurers ("parnasim") and, in general, as executive officers. In Lithuania there existed in the eighteenth century a third class of ḳahal officials, the active members ("'iḳḳarim"), who in White Russia were generally designated as headmen ("allufim"), their number varying from four to ten. From among their number were chosen the candidates who took the places of deceased or retired members of the first two classes. There were also officials assigned to specific duties, such as supervisors and judges ("dayyanim"). To these should be added the female members mentioned in the "pinḳeses" of the seventeenth century, who took part in the charitable affairs of the community and assisted illiterates in their synagogal devotions. There were also minor executive officers ("shammashim").

The Cracow ḳahal statutes of 1595 recognized three classes of ḳahal judges: the lower, middle, and higher, each composed of three persons. The first tried all suits wherein the amount involved did not exceed 10 gold ducats; the second, suits for amounts from 10 to 100 gold ducats. Both classes held daily sessions. The highest class of judges held at least two sessions every week, and tried suits for sums exceeding 100 gold ducats. Apart from the collection of taxes and the administration of communal institutions, the ḳahal also regulated affairs of commerce, the accuracy of weights and measures, the treatment of transient Jewish visitors, the cleaning of the Jewish streets, and the occupations of butchers, school-teachers, servants, wine-dealers, printers, and marriage-factors, as well as the office of the rabbi. It regulated also the relations of landlord and tenant.

Mode of Election.

The annual election of the ḳahal officers took place in the Passover week. The parnas called together the members of the ḳahal, who were required to declare before the casting of the ballot that they would choose according to their consciences without previous agreement among themselves. The minor executive officers of the ḳahal then placed in an urn slips of paper bearing the names of all persons subject to the burden of taxation and of the communal wants, and drew out the names of nine persons not related to one another by marriage ties. These nine persons were required under oath to select according to the dictates of their consciences five electors from the ḳahal administration; and these electors in turn chose the ḳahal elders.

The ḳahal organization was, as stated above, already established in Poland before the beginning of the sixteenth century. The Lithuanian ḳahal was organized, on the Polish model, in the middle of that century. In a short time it succeeded in developing along lines of its own a splendid administrative system. During the period of prosperity before the Cossack uprisings there were few complaints made by the poor against the rich, and the ḳahal machinery was still working rather smoothly. Toward the end of the seventeenth century there came into prominence the ḳahal debts, which strengthened still further the power of the ḳahal over the individual. Ruined by the Cossack wars, the Jews were in great financial distress, and were obliged to seek loans from the abbots, the only capitalists of that time. These were willing to make loans only on the responsibility of the entire ḳahal. The increasing debts of the communities led, among other things, to the abuse of the ḳahal prerogatives, and created much dissatisfaction. This resulted in a bitter struggle throughout the seventeenth century between the ḳahal and the prikahalki, and between the ḳahal elders and the Jewish masses. The Jews living in the villages, for the most part well-to-do, accused the ḳahal of placing the entire burden of the ḳahal taxes on their shoulders. During that time the ḳahal frequently found itself impotent to protect the property and even the persons of the Jews; its moral authority declined because of the cupidity of the ḳahal administrations.

Insolvency of the Ḳahal.

In the middle of the eighteenth century the ḳahals of Lithuania became insolvent. When in 1766 the commission appointed by the diet began the liquidation of the Jewish debts, it found the financial affairs of the communities in a very unsatisfactory condition. The ḳahal of Wilna, which community numbered 5,316 Jews, had a debt of 722,800 florins; that of Brest-Litovsk, with a Jewish population of 3,175, a debt of 222,720 florins; that of Grodno, with 2,418 persons, a debt of 386,571 florins; and that of Pinsk, with a population of 1,277, a debt of 309,140 florins. The resources of the ḳahals for the payment of these debts were but meager; the annual income of that of Wilna, for instance, was 34,000 florins, of Brest-Litovsk 31,200, of Grodno 21,000, and of Pinsk 37,500 florins. This income was derived mainly from indirect taxation, as, for instance, the duty on salt, tobacco, herrings, tar, and other merchandise; the graduated tax on dowries; the tax on Jewish artisans, on mill products (one out of three measures) of mills rented from the ḳahal, and on taverns and breweries; the meat monopoly, etc. From these sources the ḳahal had to cover all the government taxes, as the "giberna" (tax for maintaining the army), the poll-tax for the poor, etc. Then came the salaries for local Christian officials in charge of Jewish affairs. These received a fixed salary (780 florins in Wilna), and natural products, such as meat, fish, vegetables, etc. When soldiers were stationed in the neighborhood, the local ḳahal had to supply them with candles, paper, sealing-wax, meat, fish, etc. The ḳahal had to provide also for the salaries of the rabbis, dayyanim, and other members of the ḳahal administration. Unforeseen expenses were likewise devolved on the ḳahal. When a papal nuncio visited the city the ḳahal usually presented him with a loaf of sugar; a Catholic priest, with lemons and a pound of sugar; a constable, with a bottle of liquor. When troops entered a city the ḳahal had to supply them the items mentioned above, and also to furnish them with firemen, chimney-sweeps, etc., and even to provide money for the capture of deserters.

When the magistrates presented to the diet any project aiming to limit the rights of the Jews the ḳahal had to send delegates to watch the proceedings and to take the necessary steps to oppose the threatened legislation. Frequently the rabbi and the entire ḳahal administration had to journey to the capital or to the district center on matters concerning the community. For instance, in 1767 the whole ḳahal organization of Wilna had to go to Warsaw to protest against the intolerable burden of taxation and other impositions.

Various Payments.

The ḳahal had to pay for the maintenance of Jewish prisoners in the town prisons, and to defray the expenses of trial in case of acquittal. The ḳahal had to spend large sums of money for charitable purposes also, such as the release of insolvent debtors from jail, aid to local and wandering poor, etc. In order to meet all its expenditures the officers of the ḳahal were obliged to seek new sources of income, and to farm out various items of taxation. In this manner they made the constantly increasing burden of the poor almost unbearable. The sale of all objects of immediate necessity, particularly meat, was farmed out to monopolists. The sale of merchandise which brought the greatest profits was also in the hands of monopolists, who paid large sums for the privilege. The right of movement from place to place was greatly limited. Every newcomer had to pay a certain sum for the right of "ḥezḳat yishshub." These conditions made it practically impossible for the poor to change their residence.

The various taxes payable by the members of the community to the ḳahal included the poll-tax, the ten-per-cent property-tax, the taxes called "be-torat zakah," "buṭim," etc., besides compulsory loans to the ḳahal. There was no escape for the poor. The well-to-do, however, managed to secure from the ḳahal or from the civil government freedom from excessive taxation on payment of a certain consideration; they were thus invested with extraterritorial rights, and were not even responsible for the debts of the ḳahal. The administration of the ḳahal was also monopolized by the rich, who managed to remain in authority through ties of relationship and common interest. At times (*e.g.*, in the eighteenth century) the administrative authority was retained in the hands of a few powerful families.

In the Eighteenth Century.

Throughout the eighteenth century the Jewish masses persistently clamored for the abolition of the ḳahal as mediator between them and the general government, for the removal of the communal guaranty, for the abolition of the ḳahal control in the relation of landlord and tenants, and for the establishment of individual responsibility on the part of every Jew for the payment of taxes and the liquidation of ḳahal debts. These agitations of the Jewish masses resulted in the constitution of 1764, which prescribed a census of the entire Jewish population in Poland and Lithuania; the levy on the Jews of a poll-tax to be paid directly into the government treasury; and the appointment of a commission for the examination, consolidation, and liquidation of the ḳahal debts. It was found necessary, however, for the proper liquidation of these debts, to retain the ḳahal system of taxation for at least twenty years; and in 1775 the right was again given to the ḳahal to make loans under the guaranty of its entire body. From the constitution of the same year it appears that, notwithstanding the abolition of the collective ḳahal responsibility, the arrears of taxes were claimed from the ḳahal.

In the region which was transferred to Russia after the first partition of Poland the Jewish populace still continued to fight against the ḳahal. In the reign of Catherine II. it was ordered that the names of the Jewish residents be entered in the town records, the power of the ḳahal with reference to freedom of removal being thereby abolished. Questions on the validity of Jewish debts were referred to the courts; and the newly established county and state ḳahals were not allowed judicial functions except as regarded cases that concerned the rites of the Jewish law. On the other hand, the law of 1776 decreed that the poll-tax be paid by the ḳahal, and the latter was required to furnish passports to the members of the community. In this way the county and state ḳahals became, as it were, a continuation of the former ḳahal organization. The "Regulations" of 1804, while they took from the ḳahal its religious and judicial functions, assigning them to the rabbis, placed in its hands the supervision of the proper payment of the government taxes and the management of the funds entrusted to it by the community. Every town or village was to have one ḳahal only, even though its Jewish population was divided into several sects or denominations. The number of ḳahal representatives—elected with the sanction of the government for a period of three years—was not defined by the Russian law. The ḳahals were prohibited from levying new taxes without the knowledge of the government; and in 1818 they were supplied from the administrative offices with books in which to enter, among other things, the collection and expenditure of the Basket-Tax moneys, originally intended for the liquidation of the ḳahal indebtedness. To the ḳahal were also assigned the care of homeless Jews, the aid of Jewish emigrants, etc.

The regulations of 1835 reestablished in its complete form, within the Pale of Jewish Settlement, the Polish ḳahal organization. In virtue of these regulations every Jew, except those employed in agriculture, was compelled to register in the Jewish community of his township, even though his residence were in a village or hamlet. In the cities the Jews elected, with the sanction of the state administration, for a period of three years, three to five representatives who composed the ḳahal. The duties of the ḳahal included the supervision of the collection of government, city, and district taxes, as well as of the specifically Jewish taxes (basket-tax); the custody and expenditure of the ḳahal funds; the care of old, crippled, and poor Jews; and the discouragement of vagrancy. The conscript statute of 1827 decreed that the Jewish communities should supply their quota of conscripts apart from the Christian population, imposed on the Jewish communities the supervision of the supply of conscripts, and gave them the power to draft as a conscript any Jew in arrear with his taxes or guilty of vagrancy or any other offense. In this manner the ḳahal was given a power scarcely less extensive than that enjoyed by it under Polish rule.

In 1844 the ḳahals were abolished and their affairs transferred to the city administrations, except in Riga and the towns in the government of Courland, where the ḳahals continued to exist "for the administration of taxes and duties" until 1893.

Brafmann on the Ḳahal.

In 1869 a converted Jew, Jacob Brafmann, seeking notoriety, published "Kniga Kagala" (= "The Book of the Ḳahal"), in which he made many false statements with regard to the secret continuance of the ḳahal in Russia, and to its harmful influences on the native population. Although his falsehoods were exposed by Shereshevski in "O Knigye Kahala" (St. Petersburg, 1872), by I. Rabinovich, M. Morgulis, I. Orshanski, and by others, the anti-Semitic press of Russia made extensive use, for the purposes of its propaganda, of Brafmann's sensational inventions.

H. R.

KAHAN, ABRAHAM: Russian Hebrew author; born Dec. 19, 1874, at Skomorochy, near Jitomir. He has written or edited the following works: an anthology of S. D. Luzzatto's letters, translated from the Italian into Hebrew, Odessa, 1896; "Debar Shemuel," Cracow, 1896, a collection of letters from Samuel Vita Lolli to S. D. Luzzatto and I. S. Reggio, with the replies of Reggio and a biography of Lolli by Castiglioni; a Hebrew biography of Moses Ḥayyim Luzzatto, Warsaw, 1899; "Ḳorot ha-Yehudim be-Roma," *ib.* 1901; "Diḳduḳ Lashon 'Ibrit,"

after S. D. Luzzatto's Hebrew grammar, *ib.* 1901; "Rabbi Yisrael Ba'al Shem-Ṭob," Jitomir, 1901. He is also the editor of a critical commentary, in Hebrew, on the Bible, to which he contributed the matter on Genesis (Jitomir, 1904). Kahan (in Hebrew "Kahana") is a frequent contributor to the Hebrew periodicals "Ha-Meliẓ," "Ha-Zeman," and "Ha-Shiloaḥ," and is the editor of the literary reviews in "Ha-Dor."
D.

KAHANA, ABRAHAM ARYEH LÖB: Russian rabbi of the eighteenth century; author of "Or ha-Ne'erab," Talmudic commentary, with supplementary notes by his son Solomon Zalman Kahana (Ostrog, 1804). He also left in manuscript "Dibre Ḥemed," sermons, etc., and "Zer Zahab," a Biblical commentary.

Bibliography: Benjacob, *Oẓar ha-Sefarim*, p. 27; Fuenn, *Keneset Yisrael*, p. 34.

H. R. J. G. L.

KAHANA, DAVID. See Kohn (Kahana), David.

KAHANA, ELIEZER BEN REUBEN: Preacher and homiletic exegete in Karlin at the beginning of the eighteenth century. He wrote: "Siaḥ Sefunim" (Zolkiev, 1751–52), a commentary on the Five Rolls, each of them having its special subtitle; and "Ṭa'ame Torah" (*ib.* 1752–65), on the accents, the Masorah, and the recitation of the Pentateuch.

Bibliography: Fuenn, *Keneset Yisrael*, i. 125; Benjacob, *Oẓar ha-Sefarim*, pp. 211, 572.

S. S. M. Sc.

KAHANA, JACOB BEN ABRAHAM: Rabbinical author; died in Wilna 1826. His father was rabbi at Brestowitz, government of Grodno. Jacob was the son-in-law of R. Issachar of Wilna, brother of Elijah Wilna. He lived with his father-in-law, and was supported by him for many years, so that he was able to devote his time to the study of the Law; and he became one of the leading Talmudical scholars in Wilna. After Issachar's death Jacob was appointed trustee of the charities of the city.

Jacob was the author of "Shiṭṭot," a commentary on the tractate 'Erubin. The work is divided into three parts, the first consisting of novellæ on the Gemara, the second of novellæ on the Tosefta, and the third of novellæ on the corresponding tractates in the Yerushalmi. The manuscript was revised and the work published in Lemberg, 1863, by Raphael Nathan Rabbinowicz.

Bibliography: Fuenn, *Keneset Yisrael*, p. 550; idem, *Ḳiryah Ne'emanah*, p. 240.

KAHANA, RAB (popular name of **Ḥayyim ha-Kohen**): Grand rabbi of Constantinople (1854–1860); born 1785; died 1860 (Franco, "Hist. des Isr. de l'Empire Ottoman," 1897).

S. M. Fr.

KAHANA B. TAḤLIFA: Babylonian amora of the third century. He is mentioned only twice in the Babylonian Talmud; viz., in Men. 66b, where he refutes R. Kahana, and in 'Er. 8b, where he quotes a sentence of R. Kahana b. Minyomi, who seems to have been his teacher.

Kahana b. Taḥlifa apparently emigrated to Palestine, perhaps in company with R. Zera; for Yer. 'Ab. Zarah ii. 9 mentions him together with Zera and with Hanan b. Bo. This is not certain, however; for the passage reads: "R. Zera, Kahana b. Taḥlifa, and Hanan b. Bo," which may be rendered also "R. Zera Kahana" ("the priest"), since Zera was a priest (Yer. Ber. iii. 5). On this assumption Bar Taḥlifa can not be identical with Kahana b. Taḥlifa.

S. S. J. Z. L.

KAHINAH DAHIYAH BINT THABITAH IBN TIFAN: Jewish princess of a Berber tribe likewise called Kahinah; lived in the second half of the seventh century. According to the Mohammedan historians, the most powerful tribe at the time of the Arab invasion of the Maghreb was the Jewish one named Kahinah (probably from the Hebrew כהן), which extended its domination over nearly all the Berbers. It occupied Mount Aures (Atlas) and was governed by the princess Kahinah Dahiyah, who covered herself with glory in her fight against the invading army. She defeated the Arabian general Ḥassan ibn al-Nu'man, and compelled the Arabs to withdraw. When, five years later (694), Ḥassan received a large reenforcement, and advanced against the Berbers, Kahinah ordered all the Berber cities to be destroyed, hoping that the Arabs would then renounce fighting for the conquest of a waste land. But they persisted in their attack; and Kahinah fell near a well which, in memory of the heroine, is still called "Bir al-Kahinah."

KAHIYA: Title of a political representative in Turkey. The word, pronounced "kehya" or "kyahya," is Turkish and is a corruption of the Persian "ketkhoda." It means "head man," or representative in a small village where the people usually appoint the oldest and richest one among them to represent them in matters of state. He collects the taxes, entertains any government officials who may visit the village, and in return receives annually a certain part of the crops and live stock of the villagers. In every larger town and city of Turkey each nation has a kahiya in its own quarter. Under him are subordinate officials, called "mukhtar"; and no police officer may enter a house unless he is accompanied by one of the latter. In addition, every state in Turkey is represented at Constantinople by its kahiya, who receives a regular salary from the Porte and is known in official circles by his original name "ketkhoda." For example, the ketkhoda of Egypt receives £100 a month.

In connection with the Jews the office is first heard of under Sulaiman the Magnificent. In his time the kahiya was a person named Shealtiel. His position appears to have been an honorable one; he was a favorite at court, and had free entry to the palace. If an injury or injustice was done to Jews anywhere in the empire, no matter by whom, whether by government official, private citizen, or foreigner, it was Shealtiel's duty to defend their rights. The office has been continued ever since the days of Sulaiman, but in a considerably modified form. At present in

Constantinople the kahiya is little more than a guardian of the peace; the same office being found in the Jewish, Greek, and Armenian quarters.

KAHN, JOSEPH: German rabbi and preacher; born at Wawern, a small village near Treves, Sept. 2, 1809; died at Amsterdam July 10, 1875. He lost his father, the village teacher and cantor, early in life, and, probably, would have lived and died a cattle-dealer had not a fall from a horse permanently unfitted him for any active physical occupation. Kahn went to Metz, where for four years he studied Talmud under Meïr Lagard; at Mannheim he continued his studies under Jacob Ettlinger; he then attended successively the universities of Heidelberg and Bonn. In 1841 he was appointed chief rabbi of Treves, where he officiated for more than thirty years.

Kahn took part in the rabbinical conferences at Frankfort-on-the-Main, Breslau, and Cassel. He was an eloquent preacher, and a number of his sermons have been published, including his "Antrittsrede, 18 Dez. 1841" (Treves, 1842) and "Die Feier der Einweihung der Neuen Synagoge in Trier am 9. und 10. Sept. 1859" (*ib.* 1860), both being especially noteworthy.

Bibliography: Kayserling, *Bibliothek Jüdischer Kanzelredner*, ii. 298 *et seq.*, Berlin, 1872.
S. S. Sa.

KAHN, LEHMAN: Belgian educationist and writer; born Sept. 9, 1827, at Breisach, Baden, Germany; educated at the Progymnasium of Breisach and at the polytechnic school and the pedagogic seminary of Carlsruhe. After occupying the position of teacher in his native country and at the Jewish school of Hegenheim, Alsace, he was called to Brussels as principal of the Jewish school there (1855). In Oct., 1863, he founded L'Institut International Kahn, a school of commerce and modern languages, which is still in existence.

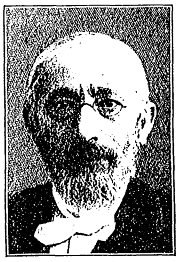
Kahn wrote: "Série de Lettres sur le Mariage Mixte" (1877; translated into Dutch, English, and German); "Le Droit Social, Appliqué à la Question des Cimetières" (1878; two pamphlets against the plan of the Brussels city administration to close the Jewish cemeteries); "Romains et Juifs, Etude Critique sur les Rapports Publics et Privés Qui Ont Existé Entre les Romains et les Juifs Jusqu'à la Prise de Jérusalem par Titus" (1894; this won a prize awarded by the Academy of Sciences of Brussels); "Ecole Confessionnelle ou Neutre?" two pamphlets (1896-97); "Assimilation" (1900); "Conciliation" (1901).
S. S. Man.

KAHN, ROBERT: German composer and pianist; born at Mannheim July 21, 1865; a pupil of Ernst Frank and Vincenz Lachner (Mannheim), Friedrich Kiel (Berlin), and Joseph Rheinberger (Munich). After living for some time at Vienna and Berlin he went in 1890 to Leipsic, where in the following year he founded a ladies' choral union and gave concerts. In Oct., 1898, he was appointed teacher of theory and composition at the Königliche Hochschule für Musik, Berlin.

Kahn has written a serenade for orchestra; three pianoforte quartets, opp. 14, 30, and 41; three pianoforte trios, opp. 19, 33, and 35; a string quartet in A major; two sonatas for violin and pianoforte, opp. 5 and 26; "Mahomet's Gesang," for mixed chorus and orchestra, op. 24; and some excellent terzets and quartets for female voices.

Bibliography: Riemann, *Musik-Lexikon*; Baker, *Biog. Dict. of Musicians.*
S. J. So.

KAHN, ZADOC: Chief rabbi of France; born Feb. 18, 1839, at Mommenheim, Alsace. In 1856 he entered the rabbinical school of Metz, finishing his theological studies at the same institution after it had been established at Paris as the Séminaire Israélite; and on graduation he was appointed director of the Talmud Torah, the preparatory school of the seminary. In 1867 he was appointed assistant to Chief Rabbi Isidor of Paris, whom he succeeded in the following year, when Isidor became chief rabbi of France. As Kahn had not yet reached the prescribed age of thirty, he had to obtain a dispensation before he could accept the office, his election to which had been largely due to his thesis "L'Esclavage Selon la Bible et le Talmud" (1867; later translated into German and Hebrew). The community of Paris attained to a high degree of prosperity and enlightenment under Kahn's administration.



Zadoc Kahn.

On Chief Rabbi Isidor's death in 1889 Kahn was unanimously elected chief rabbi of France, and was inducted March 25, 1890. He then entered upon a period of many-sided philanthropic activity. He organized the relief movement in behalf of the Jews expelled from Russia, and gave much of his time to the work of the Alliance Israélite Universelle, which elected him honorary president in recognition of his services. He aided in establishing many private charitable institutions, including the Refuge du Plessis-Piquet, near Paris, an agricultural school for abandoned children, and the Maison de Retraite at Neuilly-sur-Seine, for young girls. He was appointed Chevalier of the Legion of Honor in 1879 and Officer in 1901, and is Officer of Public Instruction.

Zadoc Kahn was one of the founders, the first vice-president, and, soon after, president, of the Société des Etudes Juives (1879). He is a brilliant orator, and one of his most noteworthy addresses was delivered on the centenary (May 11, 1889) of the French Revolution—"La Revolution Française et le Judaïsme." He has published the following works: "Sermons et Allocutions" (1875, 1886, 1894); "Sermons et Allocutions Adressés à la Jeunesse Israélite" (1878); "Etudes sur le Livre de Joseph le Zélateur," a collection of religious controversies of the Middle Ages (1887); "Biographie de M. Isidore Loeb"; "Discours d'Installation" (March 25, 1890); "Religion et Patrie," addresses; "Souvenirs et Regrets," funeral orations.

KAIDANOVER, AARON SAMUEL BEN ISRAEL (known also as **Samuel Kaidanover**): Polish rabbi; born at Wilna 1614; died at Cracow Dec. 1, 1676 (Michael; but Azulai and Horovitz give 1679; see bibliography). Among his teachers were Jacob Hoeschel and his son Joshua Hoeschel. During the Chmielnicki revolution (1648–49) the Cossacks plundered Kaidanover's possessions, his valuable library and his manuscripts among them, and killed his two little daughters, and he arrived in Moravia an impoverished fugitive. He was elected rabbi successively of Langenlois in Lower Austria, Nikolsburg, Glogau, Fürth, and Frankfort-on-the-Main, and then returned to Poland, where he died as rabbi of Cracow. He wrote: "Birkat ha-Zebaḥ," annotations to the Talmudical tractates of Ḳodashim (except Ḥullin and Bekorot), with a preface in which he narrated the remarkable events of his life (edited by his son-in-law Nahum Kohen, brother of Shabbethai Kohen [ש״ך], Amsterdam, 1669; another edition, with the commentary "'Omer Man," appeared [at Berlin?] in 1773); "Birkat Shemuel," derashot on the Pentateuch, partly cabalistic, with additions by his son Ẓebi Hirsch, its editor (Frankfort-on-the-Main, 1682); "'Emunat Shemuel," sixty responsa on matrimonial cases, edited by his son (*ib.* 1683); "Tif'eret Shemuel," novellæ to various Talmudic tractates, also edited by his son (*ib.* 1692). The annotations to Ḥoshen Mishpaṭ contained in the last-named work were printed in "Ṭure Zahab" (Hamburg, 1692).

D. S. MAN.

KAIDANOVER, ẒEBI HIRSCH: Native of Wilna; died at Frankfort-on-the-Main March 23, 1712; son of Rabbi Aaron Samuel Kaidanover; pupil of Joseph ben Judah Jeidel, rabbi of Minsk and later of Dubno. Rabbi Joseph's teaching exercised a considerable influence upon his pupil, especially in the cabalistic trend of his studies; whereas in the Halakah, Kaidanover followed more closely his father.

In his native place Kaidanover, with his whole family, was thrown into prison on account of a base denunciation, and was forced to languish in chains for years until he was pardoned, his son being retained in prison at Slutsk. Fearing another imprisonment, he decided to settle in Frankfort-on-the-Main.

In Frankfort he recovered from the trials through which he had passed and found leisure to engage in literary pursuits. Besides publishing his father's works, which he in part accompanied with notes (as in the case of "Birkat Shemuel"), he wrote a book on morals entitled "Ḳab ha-Yashar," being a combination of ethics and asceticism. It has passed through numerous editions since its first appearance at Frankfort in 1705. The book contains 102 chapters, corresponding to the numerical value of קב. "Ha-Yashar" (הישר) is an anagram of the author's name (הירש). Kaidanover also made a Judæo-German translation of his work which has often been published together with the Hebrew text (as ed. Sulzbach, 1815). A similar book on morals was written by his son-in-law, Rabbi **Manoah Hendel Kirchhahn**, under the title "Simḥat ha-Nefesh."

The epitaph on Kaidanover's tombstone is given in Horovitz, "Frankfurter Rabbinen," ii. 99.

BIBLIOGRAPHY: Fürst, *Bibl. Jud.* i. 200; Horovitz, *Frankfurter Rabbinen*, ii. 49 *et seq.*; prefaces to *Ḳab ha-Yashar*, *Tif'eret Shemuel*, and *'Emunat Shemuel*.

KAIDANSKY. See SACHS.

K'AI-FUNG-FOO. See CHINA.

KAINAN: Son of Arphaxad and father of Salah; mentioned only in Gen. xi. 13 (LXX.), Book of Jubilees, viii. 1–4, and Luke iii. 36; omitted in all other versions of Gen. xi. 13, Salah being given as the son of Arphaxad. According to the Book of Jubilees (*l.c.*), Kainan, taught the art of writing by his father, found carved on the rocks by former generations an inscription preserving the science of astrology as taught by the rebel angels, the Watchers, who descended from heaven in the days of Jered and led mankind away from God. Similarly, Josephus ("Ant." i. 2, § 3) speaks of pillars of brick and stone upon which the children of Seth had inscribed their astrological knowledge for future generations. The "Sefer ha-Yashar" describes Kainan, the possessor of great astrological wisdom, which had been inscribed on tables of stone, as the son of Seth and not of Arphaxad.

KAIRWAN (Arabic, **Al-Ḳairuwan**; Hebrew, קירואן; called also **Afrika**, or, more correctly, **Afriḳiya**, in Hebrew sources): City in the regency of Tunis, thirty miles inland from Susa, and about eighty miles south of the capital. Next to Tunis, it is the largest and most populous city in the country, and is the "Mecca" of North Africa. Kairwan, which soon became the metropolis of the province, was founded in the year 670 by 'Uḳba ibn Nafi', the conqueror of the Maghreb, as a "fortified camp": hence its name, for "Ḳairuwan" is connected by the Arabian geographers with the Persian "karawan" (camp protection). Arabian, Egyptian, and Cyrenian Jews hastened at once to the newly founded city, and Arabian historians relate that the Ommiad calif 'Abd al-Malik ibn Marwan (684–705) requested his brother, 'Abd al-'Aziz, governor of Egypt, to send 1,000 Coptic or Jewish families to settle there. At the end of the seventh century a second band of Jewish immigrants appears to have gone to Kairwan under Ḥasan ibn Nu'man, the conqueror of the Berber Kahinah, and to have fused with the first settlers.

Foundation of City.

The Jews of Kairwan, like those of the rest of the Maghreb, doubtless had to suffer, in the following period, from the oppression of the governor Abu Jafar, and from the fanaticism of the vindictive Imam Idris after his victory over his opponent Al-Mahdi (see Tunis). In 793 Imam Idris was poisoned at the command of the calif Harun al-Rashid—it is said, by the governor's physician in ordinary, Shamma, probably a Jew (Al-Ḳairuwani, "Histoire de l'Afrique," transl. Pelissier and Rémusat, p. 170, Paris, 1845, in "Exploration Scientifique de l'Algérie," vol. vii.). Since the Jews had lost their political power in consequence of their subjection by Iman Idris, the freer tribes of the open country settled in the larger cities and devoted themselves to trade. Thus Kairwan again received an addition to its Jewish population. About the year 800 the Aghlabite dynasty was founded; and in 909 their supremacy passed to the Fatimites. In 972 the whole province declared itself independent under the Berber Zirites, who, in 1045, ruled over the entire Maghreb.

Under the Abbassids.

The period of greatest prosperity for the Jewish community in Kairwan extended from the end of the eighth to the beginning of the eleventh century, that is, during the rule of the Abbassids, Aghlabites, Fatimites, and Zirites. The community was highly reputed among the Jews of the East. It possessed a synagogue, a seminary (the president of which was called "rosh kallah," or simply "rosh"), a cemetery, a poor-fund, and various other institutions. It ransomed Jewish captives and contributed toward the support of the academies of Sura and Pumbedita as long as those academies were in a flourishing condition, and was an important intermediary point in the transmission of money from Spain to those academies. Scholars in Kairwan studied the Bible and both the halakic and haggadic departments of the Talmud; an old commentary to Chronicles speaks incidentally of the "great scholars of Kairwan" (R. Kirchheim, "Commentar zur Chronik aus dem Zehnten Jahrhundert," p. 18, Frankfort-on-the-Main, 1874). In questions of religious and civil life, during this period, appeal was made, from Kairwan as from other places, to the authority of the geonim in Babylon. In fact, a very active correspondence was carried on between the geonim and the scholars of Kairwan, and successive discoveries of fragments of these letters in the genizot have thrown more and more light on the intellectual activities of the city.

Visit of Naṭronai b. Ḥabibai.

It has been stated, with much probability, that Naṭronai b. Ḥabibai, defeated as a candidate for the exilarchate, and whom the Sherira letter (Neubauer, "M. J. C." i. 36) describes as having gone to the "West" (מערבא), went to Kairwan (Grätz, "Gesch." v. 175; F. Lazarus, in Brüll's "Jahrb." x. 176). There he is said to have written the entire Talmud from memory, and to have sent the congregations in Spain a copy. While Naṭronai b. Hilai was gaon of Sura (853–856), Nathan b. Ḥanina and Judah b. Judah b. Saul were judges in Kairwan (comp. "Sha'are Ẓedeḳ," p. 84a, No. 3; Zunz, "Ritus," p. 190), both of whom corresponded with Naṭronai (on the former, see the additions of Samuel ibn Jama' to the 'Aruk, *s.v.* אבאם [published by Dukes in "Orient, Lit." 1851, p. 358]; Solomon Buber in "Grätz Jubelschrift," p. 17, Hebr. part; on the latter, see S. D. Luzzatto, "Bet ha-Oẓar," i. 59b). In 880 the remarkable Eldad ben Mahli ha-Dani appeared in Kairwan, and attracted much attention not only by his accounts of his travels and by his new and unusual Hebrew expressions, but especially by the halakic innovations in his ritual. In response to the appeal of the perplexed Jews of Kairwan for enlightenment in regard to these changes, Ẓemaḥ ben Ḥayyim, gaon of Sura (882–887), merely assured them that they need not feel disquieted (see E. Epstein, "Eldad ha-Dani," pp. 4 *et seq.*, 83 *et seq.*, Presburg, 1891). It was probably in Kairwan that Eldad met the philologist Judah ibn Ḳuraish, who appears to have removed to Kairwan from his native city, Tahort.

Isaac Israeli.

In five exegetic citations from scholars of Kairwan contained in the old commentary on Chronicles mentioned above (R. Kirchheim, *l.c.* pp. 16, 18, 22, 27), Judah ibn Ḳuraish is named in close association with their authors. Isaac b. Solomon Israeli (832–932; according to others, 832–942), who was born in Egypt, also removed to Kairwan. In 904 he was court physician to the last Aghlabite in Kairwan, Ziyadat Allah, retaining that position under the first Fatimite ruler, 'Ubaid Allah al-Mahdi. From Kairwan, Israeli corresponded on scientific subjects with Saadia, before the latter was called as gaon to Babylonia in 928 (Commentary on the "Sefer Yeẓirah"; see "Orient, Lit." 1845, p. 563). A famous pupil of Israeli was the physician and philologist Dunash ibn Tamim, who was born at Kairwan about the beginning of the tenth century and lived there all his life. Like his teacher, he was physician in ordinary at the court of the Fatimites; he dedicated an astronomical work to one of them. Besides these physicians, philosophers, and philologists, there were, doubtless, others whose very names, like the titles of their books, are scarcely known (Abraham ibn Ezra, Commentary on Esth. vii. 4 [ed. Jos. Zedner, London, 1850], and Judah Hadassi, "Eshkol ha-Kofer," p. 86a, No. 224). Al-Ḳairuwani (*l.c.* p. 170) mentions a Jewish historian by the name of Ibn al-Shamma. Saadia, who knew Kairwan well, speaks in his "Sefer ha-Galui" of a Hebrew book, written by scholars living in Kairwan in his day, concerning the "apocryphal writings" (if this be the correct reading of the difficult passage) which were to be found among them (see A. Harkavy, "Zikkaron la-Rishonim," v. 209, St. Petersburg, 1891). Unfortunately, in his desire for brevity, Saadia gave no citations, so that nothing more is known concerning this work.

Talmudic Study.

The study of the Talmud and of its ancillary literature was highly developed by scholars at Kairwan. It was probably there that a second recension of Simeon Ḳayyara's "Halakot Gedolot" was arranged about 900 (see "Zeit. für Hebr. Bibl." vi. 99). The banished exilarch 'Uḳba, who sought refuge there in 920 and remained there until his death, must, like Naṭronai b. Ḥabibai, have contributed to these studies (see Lazarus, *l.c.* p. 178). The Jews of Kairwan received him with great honor and made him their spiritual head (comp. "Ha-Manhig," p. 32a, § 58, with the "Sefer Yuḥasin," 120b). During the time of Sherira (930–1000), Ẓemaḥ b. Mar Bahlul was president of the seminary there (Harkavy, "Teshubot ha-Geonim," No. 48). Somewhat later Jacob b. Nissim ibn Shahin, the author of an Arabic commentary on the "Sefer Yeẓirah," occupied the same position. He corresponded frequently with Sherira Gaon and with Hai Gaon. At Jacob's request, Sherira sent him a letter concerning the composition of the Mishnah of the Talmud and the way in which it was transmitted to the Talmudic teachers (see Sherira; see also the interesting question addressed by Jacob's pupils to Hai concerning the miraculous power of the name of God, in "Ṭa'am Ẓeḳenim," p. 54; comp. also Harkavy, "Teshubot ha-Geonim," Nos. 230, 364).

Arrival of Ḥushiel b. Elhanan.

At the end of the tenth and the beginning of the eleventh century Talmudic study in Kairwan received an important stimulus by the arrival there of Ḥushiel b. Elhanan, who probably was born in Italy. He did not go there as a prisoner, as Abraham ibn Daud states ("M. J. C." i. 68), but as a visitor to his friends in Mohammedan lands, as is shown by an autograph letter published by Schechter in "J. Q. R." (xi. 643). He was persuaded to remain there by his friends and (probably immediately after Jacob b. Nissim's death) was made president of the academy. Ḥushiel left two pupils, his son Hananeel, and Nissim (son of the Jacob ben Nissim ibn Shahin mentioned above), both of whom became presidents of the academy after the death of their teacher. Hananeel, famous as a Talmudic commentator, aroused interest in the hitherto neglected Jerusalem Talmud. Nissim wrote the "Mafteaḥ," a methodological work on the Talmud, while his lost "Siddur" probably contained information concerning the ritual of Kairwan. The only things known concerning this service at this time are that Nissim had a seat of honor beside the Ark of the Law in the synagogue, and that, after the Kohen and the Levite had finished reading the weekly lessons, the scrolls of the Law were taken to him, although every one else was required to go to the scrolls (Zunz, "Ritus," pp. 54 *et seq.*). In other places references are made to the civic customs of the people of Kairwan (Harkavy, "Teshubot ha-Geonim," No. 1).

Decline in the Eleventh Century.

It is interesting to note, in connection with the extensive commercial relations consequent upon the city's importance as a caravan station on the route from Spain to Bagdad and Damascus, that letters and credentials given by the merchants of Kairwan to their business representatives in distant places, a custom existing "from most ancient times," empowered the latter to collect money from their debtors (Harkavy, "Teshubot ha-Geonim," No. 199). It is also worthy of mention that Samuel ha-Nagid of Cordova used his influence in behalf of the community of Kairwan ("Seder ha-Dorot," ed. Warsaw, i. 191). After the death of Hananeel and Nissim (1050) the academy was deserted, and the political events of the following period disorganized the community and its intellectual life (see Abraham ibn Daud in "M. J. C." i. 73). In 1045, under the Zirite Al-Ma'izz (1016–1062), all heterodox sects were severely persecuted, and the Jews, with the rest, suffered greatly. Five years later (1050) Kairwan was overrun and ravaged by hordes of Bedouins, under Hilal, from Upper Egypt. The Jews were much weakened by their depredations, and, in fact, the community, to a great extent, appears to have been dispersed. The steady increase in the Jewish population of the city of Tunis during the twelfth century was due largely to immigration from Kairwan.

Expulsion or Recantation.

The fanatical Almohads, whom Al-Ḥasan, the last of the Zirites, summoned to his aid in 1207, appointed Abu Muhammed al-Ḥafṣ governor over the province of Tunis. During the rule of the Ḥafṣite dynasty, which began in 1236, the Jews of Kairwan enjoyed a short respite. When, however, during the reign of Abu 'Abd-Allah Muhammed al-Mustanṣir Billah (1249–77), St. Louis of France undertook a crusade against Tunis (1270), the religious fanaticism of prince and people, already intense, was set aflame, and the Jews of Kairwan and Ḥamamat, the two holy cities, were required either to leave or to abandon their faith; some preferred the latter course and nominally embraced Islam. To-day there are said to be Mohammedans in Kairwan who close their shops on Saturday, clean the thresholds of their houses on Friday evening, and observe other customs which appear to indicate a Jewish origin. From that time until the conquest of Tunis by France, Jews and Christians were forbidden to pass the night in either Kairwan or Ḥamamat; and only by securing a special permit from the governor could they enter them during the day. The old Jewish tombstones still in existence there bear witness to the presence in Kairwan at one time of a flourishing Jewish community (Israel Chasan, "Iyye ha-Yam," No. 71, p. 30, Leghorn, 1869). See Tunis.

G. M. Sc.

KAISER, ALOIS: Ḥazzan and composer; born Nov. 10, 1840, at Szobotist, Hungary. He received his early education in the religious school of the Vienna congregation under Dr. Henry Zirndorf, and then studied at the Realschule and the Teachers' Seminary and Conservatory of Music, Vienna. From the age of ten he sang in the choir of Solomon Sulzer, and in 1859 became assistant cantor in Fünfhaus, one of the suburbs of the Austrian capital; from 1863 to 1866 he was cantor at the Neusynagoge at Prague.

Kaiser arrived in New York city in June, 1866, and in the following month was appointed cantor of the Oheb Shalom congregation in Baltimore, Md., which position he still (1904) occupies. He was for several years president of the Society of American Cantors. Since 1895 he has been honorary member of the Central Conference of American Rabbis, which (1892) entrusted him and William Sparger with the compilation of the musical portion of a Union Hymnal, published in 1897. With Samuel Welsh, Moritz Goldstein, and J. L. Rice, Kaiser published the "Zimrat Yah" (1871-86, 4 vols.), containing music for Sabbaths and festivals. Of his other compositions may be mentioned: "Confirmation Hymns" (1873); "Memorial Service for the Day of Atonement" (1879); "Cantata for Simḥat Torah" (1890; with William Sparger; preface by Cyrus Adler); "Souvenir of the Jewish Women's Congress at the World's Columbian Exposition" (1893).

ḲALA'I, BARUCH BEN SOLOMON: Rabbi of Sardokupis (Serai Keui?), Asia Minor; flourished at the beginning of the seventeenth century. He was the author of "Maḳor Baruk" (Smyrna, 1659), responsa arranged in the order of the four Ṭurim. This work was published by his son Solomon Ḳala'i, who added some responsa of Baruch's teacher Aaron Ḥason, some of his brother Mordecai Ḳala'i, and some of his own. In the introduction Solomon Ḳala'i declares that his father left a commentary on Yebamot, Ketubot, Baba Meẓi'a, and Shebu'ot, and a number of sermons.

ḲALA'I, MORDECAI B. SOLOMON: Turkish rabbi and author; lived in the first half of the seventeenth century. He was the pupil of R. Aaron Ḥason, R. Aaron Sason, and R. Isaac Franco, and was the chief teacher of the Portuguese yeshibah at Salonica. R. Daniel Estrumsa and R. David Conforte were among his scholars. All his responsa and sermons prior to 1625 were destroyed in the great fire which devastated Salonica in that year. Ḳala'i is mentioned in the responsa of Solomon ha-Levi (Nos. 10 and 29; Salonica, 1652), at whose funeral he delivered a sermon. He is also mentioned in the responsa "Mekor Ḥayyim" of his brother R. Baruch Ḳala'i (pp. 16, 17, 34, 45), and in those of R. Joseph di Trani (No. 81) and of Judah Lerma, rabbi at Belgrade ("Peleṭat Bet Yehudah," No. 2).

ḲALA'I, SAMUEL BEN JOSEPH: Karaite scholar of Chufut-Kale, Crimea; died Feb. 17, 1754. He was the author of a work entitled "Me'il Shemuel," a commentary on Aaron ben Joseph's "Ha-Mibḥar." Ḳala'i did not live to finish the work, and it was completed (Tuesday, Sept. 20, 1757) by Simḥah Isaac b. Moses, who wrote the preface to it.

KALAMAZOO. See MICHIGAN.

KALAẒ (KHALLAṢ), JUDAH: Cabalist and moralist; lived in Algeria, probably at Tlemçen, at the beginning of the sixteenth century. The surname "Kalaẓ" is derived from the Arabic "khallaṣ" (= "collector of taxes"). Kalaẓ was descended from a Spanish family, members of which settled in Algeria after the expulsion from Spain. A grandson of his, also named Judah, was rabbi at Tlemçen at the end of the sixteenth century. Kalaẓ was the author of a valuable work on ethics entitled "Sefer ha-Musar" (Constantinople, 1536-37). He frequently quotes the Zohar and other cabalistic works, which he held in great esteem.

KALBA SABUA'. See BEN KALBA SABBUA'.

KALIFA, MOSES BEN MALKA: Poet and controversialist; born at Safi, Morocco, toward the end of the seventeenth century. He belonged on his mother's side to the Bedersi family of Provence. Left an orphan at an early age with an income sufficient for his wants, Kalifa traveled through Morocco. He stayed some time at Fez and studied there under Judah ben 'Aṭṭar and his successor, Samuel Ẓarfati. On his return home he continued his studies with the rabbi Joseph Bueno of Mescuta. By his independence of language and manner, Kalifa had the misfortune to displease the governor of Safi, and was obliged to take refuge at Agadir, a fortress on the coast. In 1728 the plague devastated this place, and Kalifa lost in one day his wife Deborah and his daughter Estrella.

Kalifa was the author of two works still extant in manuscript: (1) "Kab we-Naḳi," a commentary on the prayer-book, and poems, several of which are connected with the author's personal adventures; (2) "Rak we-Ṭob," a treatise on religious controversy.

G. I. BR.

KALILAH WA-DIMNAH (known also as **Fables of Bidpai**): Book of Indian fables which has been translated into most of the languages of the Old World. It appears to have been composed in India, about 300 C.E., as a Brahmin rival to the Buddhist fable-books, and includes variants of several of the jatakas, or Buddha birth-stories. It was translated into Pahlavi about 570, and thence traveled westward through Arabic sources. According to Abraham ibn Ezra, quoted by Steinschneider ("Z. D. M. G." xxiv. 327), it was translated directly from the Sanskrit into Arabic by the Jew (Joseph?) who is said to have brought the Indian numerals from India. Whether this be true or not, the passage from Arabic into the European languages was, in each of the three chief channels, conducted by Jewish scholars. The Greek version was done by Simeon Seth, a Jewish physician at the Byzantine court in the eleventh century (see, however, Steinschneider, "Hebr. Uebers." p. 873, No. 148), and from this were derived the Slavonic and the Croat versions. The old Spanish version was probably translated about 1250 by the Jewish translators of Alfonso the Good; this led to a Latin version. But the chief source of the European versions of Bidpai was a Hebrew one made by a certain Rabbi Joel, of which a Latin rendering was made by John of Capua, a converted Jew, under the title "Directorium Vite Humane"; from this were derived Spanish, German, Italian, Dutch, and English versions. In addition to this of Rabbi Joel's, another Hebrew version exists—by Rabbi Eleazar b. Jacob (1283); both these versions have been edited by Joseph Derenbourg (Paris, 1881), who issued also an edition of the "Directorium Vite Humane" (*ib.* 1887).

It has been claimed that nearly one-tenth of the most popular European folk-tales are derived from one or other of these translations of the "Kalilah wa-Dimnah," among them being the story of Patty and her milk-pail ("La Perrette" in Lafontaine), from which is derived the proverb, "Do not count your chickens before they are hatched." Many of the popular beast-tales and some of the elements of Reynard the Fox also occur in this Indian book of tales. Much learning has been devoted to the investigation of the distribution of these tales throughout European folk-literature, especially by Jewish scholars: by T. Benfey, in the introduction to his translation of the "Pantchatantra," a later Sanskrit edition of the "Kalilah wa-Dimnah"; by M. Landau, in his "Quellen des Decamerone"; by Derenbourg, in his editions of the Latin and Hebrew texts; and by Steinschneider. The Hebrew versions are quoted by Zerahiah ha-Yewani, Kalonymus (in the "Eben Boḥan"), Abraham b. Solomon, Abraham Bibago, and Isaac ibn Zahula (who wrote his "Meshal ha-Ḳadmoni" to wean the Jewish public away from "Kalilah wa-Dimnah").

J.

ḲALIR, ELEAZAR (more correctly **Eleazar be-Rabbi Ḳalir,** or **Ḳallir,** or **Ḳillir**; later called also **ha-Ḳaliri** [הקלירי] and less correctly **the Ḳalir** [הקליר]): One of the earliest and the most prolific of the payyeṭanim or liturgical poets. In the acrostics of his hymns he usually signs his father's name קליר, but three times he writes קיליר. Eleazar's name, home (קרית ספר), and time have been the subject of many discussions in modern Jewish literature, and some legends concerning his career have been handed down. The author of the "'Aruk" (*s.v.* קלר, 3) derives the name "Ḳalir" from the Greek *κολλύρα* = "a small cake," and reports that the poet obtained his name from a cake, inscribed with Biblical verses, which was given him to eat as a talisman for wisdom when he began to go to school. His scholarship having been attributed later to that talisman, he was called "Eleazar the Cake." While such a custom is known to have existed among the western Syrians and the Jews, the explanation put forward by the "'Aruk" is not acceptable, since "Ḳalir" is not the name of the poet, but that of his father. Others see in the name that of the Italian city Cagliari, or the Latin name "Celer." The city קרית ספר has been identified both with Cagliari (Civitas Portus), in Italy, and with the Babylonian Sippara. In addition to Italy and Babylonia, Mesopotamia and Palestine have been claimed by different scholars as Ḳalir's native land. His time has been set at different dates between the end of the seventh and the end of the tenth century of the common era. Older authorities consider him to have been a teacher of the Mishnah and identify him either with Eleazar b. 'Arak or with Eleazar b. Simeon. He has been confounded with another poet by the name of Eleazar b. Jacob; and a book by the title of "Kebod Adonai" was ascribed to him by Botarel.

Place and Date Doubtful.

Ḳalir's hymns early became an object of study and of cabalistic exegesis, as his personality was a mystery. It was related that heavenly fire surrounded him when he wrote the "Ḳedushshah"; that he himself ascended to heaven and there learned from the angels the secret of writing alphabetical hymns; and that his teacher YANNAI, jealous of his superior knowledge, placed in his shoe a scorpion, which was the cause of his death. Modern research points to the probability that he and his teacher were Palestinians; and since Yannai is known to have been one of the halakic authorities of Anan, the founder of Karaism, and must therefore have lived a considerable time earlier than Anan, Ḳalir's time may be fixed with some probability as the second half of the seventh century.

Sources and Style.

Ḳalir was the first to embellish the entire liturgy with a series of hymns whose essential element was the Haggadah. He drew his material from the Talmudim and Midrashim, some of which latter are now probably lost. His language, however, is not that of his sources, but Biblical Hebrew, enriched with daring innovations. His predilection for rare words, allegorical expressions, and haggadic allusions makes his writings hard to understand. His linguistic peculiarities were followed by many a succeeding payyeṭan; and they influenced to some extent even early prose, especially among the Karaites. With the awakening of linguistic studies among the Jews and with the growing acquaintance of the latter with Arabic, his linguistic peculiarities were severely criticized (*e.g.*, by Abraham ibn Ezra on Eccl. v. 1); but the structure of his hymns remained a model which was followed for centuries after him and which received the name "Ḳaliric" (קלירי). While some of his hymns have been lost, more than 200 of them have been embodied in the Maḥzorim, *i.e.*, prayer-books for the cycle of the festivals.

[The earliest references to Ḳalir seem to be in a responsum of Naṭronai Gaon (*c.* 853; Weiss, "Dor," iv. 118), in the "Yeẓirah" commentary of Saadia (see Gräber, in "Oẓar ha-Sifrut," i., v.) and in his "Agron" (Stade's "Zeitschrift," 1882, p. 83), as well as in the writings of Al-Ḳirḳisani (Harkavy, in "Ha-Maggid," 1879, No. 45, p. 359a). The early

"Hekalot Rabbati" of the Merkabah Riders were used by Ḳalir, traces of their mystic ideas and even of their language being found in his poetry ("Monatsschrift," xxxvii. 71). The theory that he lived in Italy is based upon the fact that he wrote double "Ḳerobot" for the festivals (Berliner, "Gesch. der Juden in Rom," ii. 15; Einstein, in "Monatsschrift," xxxvi. 529).

A peculiar development of the Ḳalir legend is seen in the story that Saadia found in the tomb of Ḳalir a recipe for making "ḳame'ot" in the form of cakes (Goldziher, in "Berliner Festschrift," p. 150). On a piyyuṭ found in the Maḥzor Vitry and ascribed by Brody ("Ḳonṭres ha-Piyyuṭim," p. 67, Berlin, 1894) to Ḳalir, see Max Weisz in "Monatsschrift," xli. 145. Solomon Delmedigo warns the student against the writings of Ḳalir because "he has cut up the Hebrew language in an arbitrary way" (Geiger, "Melo Chofnajim," p. 15). Translations of some of Ḳalir's hymns into German will be found in Zunz, "S. P." pp. 75 *et al.* (Berliner, "Synagogal-Poesieen," p. 24; De Lagarde, "Mittheilungen," ii. 138), in Sachs's edition of the prayer-book, and in Karpeles' "Zionsharfe," pp. 10-17; some have been rendered into English by Nina Davis in "J. Q. R." ix. 29, and by Mrs. Lucas in "Songs of Zion," p. 60.—G.]

G. C. L.

KALISCH, BERTHA: Austrian actress; born at Lemberg; made her début in 1893 at the Scarbeck Theater, Lemberg, in a minor rôle in "Mignon" (given in Polish), her success winning her an engagement shortly after at the Jewish theater there. She next appeared in Budapest and Bucharest, at the latter place attracting the attention of Wachman, the director of the Imperial Theater, who engaged her for Rumanian plays. In 1895 she went to New York city to act in Yiddish plays at the Thalia Theater. Her greatest successes were made in Jacob Gordin's plays.

S. E. Ms.

KALISCH, DAVID: German playwright and humorist; born at Breslau Feb. 23, 1820; died at Berlin Aug. 21, 1872. His infancy and early childhood were spent in a home of comfort and culture; but when he was only seven years old his father died, leaving the family without any means of support, and Kalisch was compelled to add to the family resources by entering the employment of a dealer in small wares, who later on entrusted him with the management of a branch establishment in Ratibor. In 1843 he returned to Breslau, and in Oct., 1844, went to Paris, where he gradually became on terms of intimacy with a group of poets and socialists that included Heine, Herwegh, Karl Grün, Proudhon, Karl Marx, and Albert Wolff. He made at Leipsic his first attempts as a farce writer with his "Die Proletarier" and "Auf der Eisenbahn."

Kalisch was still bound to a mercantile career, however, as neither literature nor the stage had yet made a place for him; and so in 1846 he found his way to Berlin and took another position as salesman. He found time to continue his literary efforts by writing a number of the peculiar verses which, under the name of "Couplets," were first employed by him, and which he afterward utilized with great success in his stage pieces. He also tried his hand at adaptation from the French, the little farce "Ein Billet von Jenny Lind" being produced at the summer theater at Schönberg, near Berlin; the principal result of this was that it secured for him an invitation to write for the Königsstädter Theater, where his "Herr Karoline" was produced, and later (Dec. 23, 1847) his "Einmal Hunderttausend Thaler," which at once achieved a veritable triumph. There followed in quick succession "Berlin bei Nacht," "Junger Zunder, Alter Plunder," "Aurora im Oel," "Münchhausen," "Peschke," "Ein Gebildeter Hausknecht," "Der Aktienbudiker," "Berlin, Wie es Weint und Lacht," "Einer von Unsere Leut," "Berlin Wird Weltstadt," "Die Berliner in Wien," "Der Goldonkel," and "Musikalische Unterhaltung."

Very soon he practically dominated the German farce stage of his time. At the old Wallner Theater in Berlin and in the great comedy houses throughout Germany there were years when none but his pieces were produced, some of them having runs of hundreds of performances. Nor was it in Germany alone that his plays became famous, for by adaptation and translation they were produced throughout the world. A collection of his celebrated "Couplets" was produced under the title "Berliner Leierkasten" (3 vols., Berlin, 1857; 5th ed., 1862; new series, 1863 and 1866), while a number of his farces were issued as "Berliner Volksbühne" (4 vols., *ib.* 1864) and "Lustige Werke" (3 parts, *ib.* 1870).

Just as Kalisch was entering upon the successful phase of his dramatic career he made another fortunate bid for fame by establishing (1848) the celebrated humorous sheet, "Kladderadatsch," the publication of which was suggested during his work on the little paper issued by and for the members of the "Rütli," a club composed of humorists. The well-known "Müller und Schulze" couple, which have become proverbial among Germans throughout the world, and "Karlchen Miessnick" are among the best of his contributions to the "Kladderadatsch." In its early history he had many strange experiences as its editor. He was prosecuted; the paper was prohibited; several times he had to fly to Leipsic, Dessau, or Neustadt, and yet it survived. Later he shared the editorial work with Ernest Dohm. In 1852 he embraced Christianity in order that he might marry a lady of that faith.

S. M. Co.

KALISCH, ISIDOR: American rabbi and author; born Nov. 15, 1816, at Krotoschin; died May 11, 1886, at Newark, N. J.; studied theology, philosophy, and philology at the universities of Berlin, Breslau, and Prague. In consequence of giving public expression to his too liberal views, in poems and articles, he was compelled to leave Germany, and after staying for a short time in London he went to the United States (New York, 1849).

Kalisch occupied rabbinates at Cleveland, Ohio (Tifereth Israel); Cincinnati, Ohio (Ahabath Achim); Milwaukee, Wis. (B'ne Jeshurun); Indianapolis, Ind.; Leavenworth, Kansas; Detroit, Mich. (Beth El); Newark, N. J. (B'nai Abraham); and Nashville, Tenn. (Ohavai Shalom). He lectured frequently, especially after 1875, when he had retired from the ministry. He wrote a number of essays, monographs, discourses, and disquisitions. In Leeser's "Occident" (1851–52) he published a series of "Exegetical Lectures on the Bible"; in the Cincinnati "Israelite" (1854–55), "Contributions to Philosophical Literature." The London "Jewish Chronicle," the "Jüdisches Literatur-Blatt" of Magdeburg, the Vienna monthly "Beth Talmud," and other periodicals, published articles from his pen. Kalisch's first work, "Wegweiser für Rationelle Forschungen in den Biblischen Schriften" (Cleveland, Ohio, 1853), was translated into English by M. Mayer under the title "A Guide for Rational Enquiries into the Biblical Writings" (Cincinnati, 1857); "Die Töne des Morgenlandes," a collection of his German poems, appeared at Detroit in 1865; in 1868 he produced an English translation of Lessing's "Nathan der Weise"; in 1877 an English translation of the "Sefer Yeẓirah," with preface, notes, glossary, and a "Sketch of the Talmud"; in 1881 he translated into English S. Munk's "Philosophie et Ecrivains Philosophes des Juifs." His last work was a translation into English of "Ha-Tappuaḥ," a treatise on the immortality of the soul, supposed to be by Aristotle. He translated from the Hebrew "The Book of Antiochus" also, and a "Discourse on the Advantages of the Mosaic Law" (delivered in 1267 before King Jacob at Saragossa). Kalisch was one of the leading spirits of the rabbinical conference held at Cleveland in 1855, and one of the editors of the "Minhag America" prayer-book.

A. S. MAN.

KALISCH, LUDWIG: German novelist; born Sept. 7, 1814, at Lissa; died March 3, 1882, at Paris. When only twelve years of age he left his home and became successively pedler, merchant, and teacher. He saved enough money to carry him through matriculation and the study of medicine and, later, languages and literature in Heidelberg and Munich. Settling in Mayence in 1843, he became editor of the "Narrhalla" (1843–46). A participant in the revolution of 1848–49, he was forced to leave Germany. He went to Paris, in 1850 to London, and from 1851 onward lived in Paris.

Kalisch's forte was the humorous ballad. Many of his writings appeared in the feuilletons of the newspapers and in magazines. Of those published separately may be mentioned: "Das Buch der Narrheit," Mayence, 1845; "Schlagschatten," *ib.* 1845; "Poetische Erzählungen," *ib.* 1845; "Shrapnels," Frankfort-on-the-Main, 1849; "Paris und London," *ib.* 1851; "Heitere Stunden," Berlin, 1872; "Bilder aus Meiner Knabenzeit," Leipsic, 1872; "Gebunden und Ungebunden," Munich, 1876; "Pariser Leben," Mayence, 1881, 2d ed. 1882.

S. F. T. H.

KALISCH, MARCUS M.: Hebraist and Bible commentator; born at Treptow, Pomerania, May 16, 1828; died in Derbyshire, England, Aug. 24, 1885. He was educated at Berlin University, where he studied classics, philology, and the Semitic languages, and at the Rabbinical College of Berlin. In 1848 he obtained degrees at Berlin and at Halle, and in the same year took part in the European struggle for freedom that resulted in the émeute of 1848. Going to England, Kalisch contributed to the periodicals of Great Britain and the Continent, and delivered lectures on secular and archeological topics before various learned bodies. He then obtained a permanent appointment as secretary to Chief Rabbi N. M. Adler. This position he held from 1848 to 1853, and was then engaged as tutor and literary adviser to the Rothschild family. In this capacity he found leisure to produce a considerable amount of erudite work.

Kalisch's special object was to write a full and critical commentary on the Old Testament, and at this task he labored with indefatigable energy. In 1855 he published the first volume, entitled "An Historical and Critical Commentary on the Old Testament, with a New Translation—Exodus"; the second, "Genesis," appeared in 1858; the third, "Leviticus," part i. and part ii., in 1867 and 1872 respectively. These contain a résumé of all that Jewish and Christian learning had accumulated on the subjects up to the dates of publication. In his "Leviticus" Kalisch anticipated Wellhausen to a large extent. The interval between the issue of "Genesis" and that of "Leviticus" was occupied with the preparation of a "Hebrew Grammar" in two parts, the second dealing with the more difficult forms and rules. In 1877 Kalisch issued the first part of "Bible Studies," comprising annotations on "The Prophecies of Balaam." The second part, on "The Book of Jonah," preceded by a treatise on "The Hebrew and the Stranger," was issued in the following year. In 1880 appeared his comprehensive work entitled "Path and Goal: A Discussion on the Elements of Civilization and the Conditions of Happiness," consisting of an attempt to bring together representative utterances of adherents of all the chief religions of the world.

Kalisch was a writer of exceptional erudition, without, however, possessing an equal power of using his resources for literary purposes. His views on Biblical and Jewish subjects generally were of an advanced type. He was prevented from completing his projected comprehensive commentary on the entire Pentateuch by the ill health which attended his last years.

KALISCH, MOSES BEN BENJAMIN WOLF MESERITZ: Polish physician of the seventeenth century. He was the author of: "Yerushat Mosheh" (2 vols., Frankfort-on-the-Main and Wilmersdorf, 1677), a medical work in Judæo-German describing remedies for various diseases;

and "Yarum Mosheh" (Amsterdam, 1679, and frequently reprinted).

KALISCH, PAUL: German singer; born at Berlin Nov. 6, 1855; son of David Kalisch, founder of the "Kladderadatsch." Kalisch was destined for an architect's career, but at a gathering at the home of his brother-in-law Paul Lindau, where Kalisch sang a few selections from Schubert and Wagner, his voice so impressed Pollini and Adelina Patti that they urged him to go on the stage. Shortly afterward Kalisch went to Italy to study under Leoni and Lamperti, and he made his début at Varese in 1880 as *Edgardo* in "Lucia di Lammermoor." After a most successful tour through Italy and Spain he sang in 1883 at the royal operas at Munich, Berlin, and Vienna, and at the Stadttheaters of Hamburg, Leipsic, and Cologne.

He stayed a short time in Germany, and then together with Lily Lehmann, whom he later married, went to London, where he sang in "Tristan and Isolde" at Her Majesty's Theatre. From England Kalisch went to the United States, where he spent six winter seasons: four seasons at the Metropolitan Opera House, New York, while for two seasons he toured the country together with Anton Seidl, singing in many of Wagner's operas. Upon his return to Europe he again toured Germany, and also sang at Vienna, Budapest, Paris, and London; but he achieved his greatest success at the Wiesbadener Festspiele, where he sang before the royal family. He was made "Kammersänger" by Duke Ernst of Saxe-Coburg. Kalisch's most successful rôles are *The Prophet*, *Eleazar*, *Othello*, *Siegmund*, *Siegfried*, *Tannhäuser*, and *Tristan*. Kalisch again appeared in "Tristan" at Paris and Cologne in 1901.

KALISCHER, JEHIEL MICHAEL BEN ARYEH: Polish rabbi of the seventeenth century; died in 1713 at an advanced age. The name "Kalischer" indicates either that he was born in Kalisch, Poland, or that he acted as rabbi there. He was the author of: "Sha'are Ẓiyyon" (Prague, 1657), being the first and only published part of his ethical work entitled "Sha'are Ḥokmah"; "Sha'are Shamayim" (*ib.* 1675), miscellaneous sermons and novellæ. Kalischer included in the latter work novellæ of his father and grandfather, and of his uncle Samuel Edels.

KALISCHER, JUDAH LÖB BEN MOSES: German Talmudist; died April 18, 1822, at Lissa, where he was dayyan. Kalischer was the head of the yeshibah of Lissa for more than fifty years, during which time he had a great number of pupils. He wrote "Ha-Yad ha-Ḥazakah" (Breslau, 1820), novellæ on the laws of Ḥazakah.

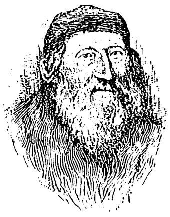
KALISCHER, SOLOMON: German composer, pianist, and physicist; born Oct. 8, 1845, at Thorn, West Prussia. He studied at the Jewish Theological Seminary of Breslau and the universities of Breslau and Berlin (Ph.D. 1868, his dissertation being "De Aristotelis Rhetoricis et Ethicis Nicomacheis et in Quo et Cur Inter Se quum Congruant tum Differant," awarded a prize by the philosophical faculty of the University of Berlin). After acting as tutor for a year at Amsterdam he returned to Berlin to study physics and chemistry. In 1876 he established himself as privat-docent at the Bauakademie of Berlin, subsequently connecting himself in the same capacity with the Technische Hochschule at Charlottenburg, at which institution he was appointed lecturer (1894) and professor (1896) of physics. He has edited Goethe's scientific works, with notes and introduction (ed. G. Hempel, vols. xxxiii.–xxxvi., 1877–79); translated Faraday's "Experimental Researches in Electricity" into German (3 vols. 1889–91); and has published many essays on physics, chemistry, and electricity in scientific periodicals. He wrote also "Teleologie und Darwinismus" (1878); "Die Farbenblindheit" (1879), etc.; and contributed the chapter on "Goethe als Naturforscher" to Bielschowsky's "Goethe-Bibliographie" (ii. 412–460, Munich, 1904). S.

KALISCHER, ẔEBI HIRSCH: German rabbi and colonizer; born March 24, 1795, at Lissa, Posen; died Oct. 16, 1874, at Thorn, on the Vistula. Destined for the rabbinate, he received his Talmudic education from Jacob of Lissa and Akiba Eger of Posen. After his marriage he left Lissa and settled in Thorn, where he spent the rest of his life. Here he took an active interest in the affairs of the Jewish community, and for more than forty years held the office of "Rabbinatsverweser" (acting rabbi). Disinterestedness was a prominent feature of his character; he refused to accept any remuneration for his services, his wife, by means of a small business, providing their meager subsistence.



Ẓebi Hirsch Kalischer.

In his youth he wrote "Eben Boḥan," commentary on several juridical themes of the Shulḥan 'Aruk, Ḥoshen Mishpaṭ (Krotoschin, 1842), and "Sefer Moznayim la-Mishpaṭ," commentary, in three parts, on the whole Ḥoshen Mishpaṭ (parts i. and ii., Krotoschin and Königsberg, 1855; part iii. still in manuscript). He also wrote: glosses on Shulḥan 'Aruk, Yoreh De'ah, published in the new Wilna edition of that work; "Sefer ha-Berit," commentary on the Pentateuch; "Sefer Yeẓi'at Miẓrayim," commentary on the Pesaḥ Haggadah; "Ḥiddushim" on several Talmudical treatises; etc. He also contributed largely to Hebrew magazines, as "Ha-Maggid," "Ẓiyyon," "Ha-'Ibri," and "Ha-Lebanon."

Inclined to philosophical speculation, Kalischer studied the systems of medieval and modern Jewish and Christian philosophers, one result being his "Sefer Emunah Yesharah," an inquiry into Jewish philosophy and dogma (2 vols., Krotoschin, 1843, 1871); an appendix to vol. i. contains a commentary (incomplete) on Job and Ecclesiastes. In the midst of his many activities, however, his thoughts centered on one idea—the colonization of Palestine, in order thereby to provide a home for the homeless Eastern Jews and transform the many Jewish beggars in the Holy Land into a useful agricultural population. He proposed to collect money for this purpose from Jews in all countries; to buy and cultivate land in Palestine; to found an agricultural school, either in Palestine itself or in France; and to form a Jewish military guard for the security of the colonies. He thought the time especially favorable for the carrying out of this idea, as the sympathy of men like Crémieux, Montefiore, Rothschild, and Albert Cohn rendered the Jews politically influential. To these and similar Zionist ideals he gave expression in his "Derishat Ẓiyyon" (Lyck, 1862), containing three theses: (1) the salvation of the Jews, promised by the Prophets, can come about only in a natural way—by self-help; (2) colonization in Palestine; (3) admissibility of the observance of sacrifices in Palestine at the present day. The appendix contains an invitation to the reader to become a member of the colonization societies of Palestine.

Palestine Colonization.

This book made a very great impression, especially in the East. It was translated into German by Poper (Thorn, 1865), and a second Hebrew edition was issued by N. Friedland (*ib.* 1866). Kalischer himself traveled with indefatigable zeal to different German cities for the purpose of establishing colonization societies. It was his influence that caused Ḥayyim Lurie, in Frankfort-on-the-Main in 1861, to form the first society of this kind, and this was followed by others. Owing to Kalischer's agitation, the Alliance Israélite Universelle founded the Palestinian colony Miḳweh Yisrael (see AGRICULTURAL COLONIES), the rabbinate of which was offered to him, but he was too old to accept it. Although all these endeavors were not attended with immediate success, Kalischer never lost hope. By exerting a strong influence upon his contemporaries, including such prominent men as Heinrich Grätz, Moses Hess (see "Rom und Jerusalem," pp. 117 *et seq.*), and others, he is considered to have been one of the most important of those who prepared the way for the foundation of modern Zionism.

S. M. SC.

KALISKER, ABRAHAM BEN ALEXANDER HA-KOHEN: Rabbi of Kaliska, Prussia, in the eighteenth century. Kalisker studied successively under Elijah Wilna and Bär of Meseritz, becoming a fervent leader of the Ḥasidic party. After the death of Bär of Meseritz, Kalisker settled with a senior fellow pupil, Menahem Mendel of Vitebsk, at Horodok, and in 1777 accompanied him to Palestine as his assistant in the leadership of the Ḥasidim; he was very active in the propagation of Ḥasidism. They settled first at Safed; obliged to leave that town, they settled, about 1783, at Tiberias. After the death of Menahem Mendel (1788) Kalisker succeeded him as leader of the Ḥasidim in Palestine. He maintained at that time an active correspondence with his former fellow pupil Sheneor Zalman of Ladier; and when, a little later, Kalisker was suspected by the Ḥasidim of Volhynia and Podolsk of having used improperly the funds entrusted to him for distribution among the poor, Sheneor Zalman defended him vigorously.

Kalisker wrote mystical novellæ to the Pentateuch, which form the second part of the "Ḥesed le-Abraham" (Lemberg, 1858). Some of his letters are to be found at the end of the "Peri ha-Areẓ" (Kopys, 1814) and in the "Iggeret ha-Ḳodesh" (Warsaw, 1850).

KALISZ (German, **Kalisch**): City in the government of the same name in Russian Poland; situated on the River Prosna, near the Prussian frontier. Its Jewish community is one of the oldest in Poland. In 1264 Boleslaw the Pious granted the Jews of Kalisz charters of privileges which were used as models for similar charters by Casimir the Great in 1334 and by Duke Withold in 1388.

During the fourteenth century the Jews of Kalisz, like those of other cities near the German frontier, suffered greatly from the attacks of mobs which accused the Jews of having poisoned the wells in times of epidemics; and Casimir the Great handed to the Jew Falk of Kalisz the charter of privileges securing to him and his coreligionists protection from these false accusations (July 15, 1364).

The Jews of Kalisz are mentioned in an edict of King Sigismund August, dated Sept. 16, 1549, imposing a head-tax of one Polish florin on the Jews of several communities ("Metrika Koronnaya," No. 77, fol. 214, v.). In 1666 the troops of the Polish general CZARNIECKI killed 600 members of the Kalisz community.

The earliest mention of Kalisz in Hebrew literature is probably that made by Solomon Segal, dayyan at Kalisz in the first half of the thirteenth century, in Menahem b. Solomon's "Sekel Ṭob," section "Wayiḳra" (Dyhernfurth, 1735). Joel Sirkes in his responsa "Bet Ḥadash" (ed. Cracow, 1617, No. 43) refers to an accusation against the Jews of Kalisz of stealing a small image of "the Redeemer" ("ha-Go'el"). A Jewish hospital was founded at Kalisz in 1863 by Louis Mamrath; and a new synagogue was built in 1879.

An anti-Jewish riot broke out in the city June 23, 1878, due to the erection of an "'erub" by the ultra-Orthodox rabbi Ḥayyim Wachs, which displeased the Christian inhabitants. A mob from the neighboring villages demolished the synagogue, the residence of the rabbi, and part of the Jewish hospital; three Jewish children were killed, several Jews were wounded, and Jewish property to the amount of about 200,000 rubles was stolen or destroyed. The riot was suppressed by the military the same evening. The city was placed under martial law, and was condemned to pay damages to the amount of 80,000 rubles, while the surrounding villages had to pay 40,000 rubles. Rabbi Ḥayyim was forced by the Jewish community to resign.

The best-known rabbis of Kalisz have been: **Solomon Segal** (13th cent.); **Judah Nissan** (17th cent.), author of "Bet Yehudah"; **Jehiel Michael b. Aryeh** (second half of 17th cent.), author of "Sha'are Ḥokmah" (Prague, 1657), on religious ethics, and of "Sha'are Shamayim," a collection of sermons, in two parts (part i., *ib.*, 1675); **Moses b. Benjamin Wolf Rofe,** author of "Yerushat Mosheh" (Frankfort-on-the-Main, 1677), and of "Yarim Mosheh" (Amsterdam, 1679); both books contain medical prescriptions and "segulot" written in Judæo-German (Benjacob, "Oẓar ha-Sefarim," p. 230); **Abraham Abele Gumbiner; Eleazar Lazar** (second half of 18th cent.); **Abraham Abele** (end of 18th cent. and beginning of 19th); **Elijah Ragoler** (born at Neustadt-Sugind 1794; became rabbi at Kalisz 1840; died there 1849); **Ẓebi Hirsch Chajes** (died at Lemberg Oct. 12, 1855); **Meïr b. Isaac Auerbach** (born at Dobia, near Kalisz, Feb. 10, 1815; held the rabbinate of Kalisz from 1855 to 1860, when he went to Palestine; died at Jerusalem May 8, 1878); **Ḥayyim Eleazar Wax** (died at Kuznitza, near Kalisz, June 30, 1889); **Samson Ornstein** (born 1822; rabbi of Kalisz from 1886 until his death, Dec. 1, 1903).

Other prominent Jews of Kalisz were Jacob Prague, Lazarus Gutman, Wolf Lewi, Tobias Koppel, Elias Koppel, Meïr Sachs, Matthias Mann, Joseph D. Seizner, David Stein, Ezekiel Steinman, and Wolf FRÄNKEL, the philanthropist.

In 1897 the Jewish inhabitants in the city numbered 8,026 in a total population of 21,680; in the government, 70,907 in a total population of 846,719. The community possesses the usual charitable organizations, which are in a prosperous condition.

H. R. J. D. E.—J. G. L.

KALKAR, CHRISTIAN ANDREAS HERMAN: Danish convert to Protestantism; born Nov. 27, 1802, at Stockholm; died at Gladsaxe, near Copenhagen, Feb. 3, 1886. He received his early education from his father, a rabbi, and at the schools of Copenhagen, where in 1818 he became a student of law. In 1823 he became a Protestant and studied theology, passing his examination in 1826. In 1833 he received the degree of Ph.D. From 1827 to 1841 he was teacher at Odensee; in 1842 he visited Spain; and from 1844 was a minister at Gladsaxe and Herloi.

Among Kalkar's many works may be mentioned: "Evangelische Missionsgesch." 1857; "Gesch. der Römisch-Katholischen Mission," 1862 (German transl., Erlangen, 1867); "Die Mission Unter den Juden," 1868 (German transl., Hamburg, 1869); "Gesch. der Christlichen Mission Unter den Heiden," 1879 (German transl., Gütersloh, 1879); "Israel og Kirken," Copenhagen, 1881.

From 1871 to 1880 Kalkar was editor of the "Theologisk Tidskrift."

S. F. T. H.

KALLAH: Name of a teachers' convention which was held in Babylonian academies, after the beginning of the amoraic period, in the two months Adar and Elul. The original meaning of the word is not known. It is always written with ה (כלה), as the Hebrew word for "bride"; but the manner in which this meaning has been connected with a convention of teachers (Levy, "Neuhebr. Wörterbuch," ii. 321) has not been satisfactorily explained. Perhaps the word is merely another form of the Aramaic כְּלָלָא = "totality," although this word never occurs in traditionary literature as a designation for a collection or assembly of people. It may be connected also with the Aramaic כְּלִילָא = "garland," the assembly of teachers being thought of as a garland adorning the academy (comp. "Ḥazi ha-Goren" and "Kerem" as designations of the circle which the Sanhedrin formed). In Latin, also, "corona" means "circle," "assembly." Kohut ("Aruch Completum," iv. 428a) has a similar explanation, although he adds an incorrect comparison with a Persian word.

The importance of the Kallah (referred to under another name) is extolled in the Midrash Tanḥuma (Noaḥ, § 3): "God has appointed the two academies ["yeshibot"] for the good of Israel. In them day and night are devoted to the study of the Torah; and thither come the scholars from all places twice a year, in Adar and Elul, and associate with one another in discussions on the Torah." The greater the attendance at the convention, the greater was the renown of the academy. Hence Abaye says (Ber. 6b): "The most important part of the Kallah is a crowd." The unpleasant side of this crowd is characterized by Abaye's colleague Raba as follows (*ib.* 6a): "The crowd at the Kallah is caused by the mazziḳim" (the unseen tormenting spirits which hover around people). There was a saying in Babylonia that whoever dreamed of going into a forest would become president of the Kallah (the Kallah being likened to a forest).

That treatise of the Mishnah which formed the subject of explanation and discussion at each separate Kallah was called "the treatise of the Kallah" according to Ta'an. 10b (see R. Hananeel in Kohut, *l.c.* iv. 227b). The sentence in question is a tannaitic maxim, the latter part of which is: ". . . among the scholars is to be counted he who is able to answer every question concerning every halakah which he has studied"; to this the words אפילו במסכת כלה ("even that referring to the treatise of the Kallah") are added on account of Babylonian conditions. In Palestine there was no Kallah. It is true that A. Schwarz ("Jahrbuch für Jüdische Gesch. und Litteratur," 1899, ii. 102) claims that this can not be asserted with certainty; but the sources show that the Kallah was purely a Babylonian institution. As a matter of fact it resulted from the circumstance that the Babylonian Jews were scattered over an unusually extensive territory, and felt the need of coming together at stated times to study in common. See ACADEMIES IN BABYLONIA; GAON.

G. W. B.

KALLIR, ELEAZAR B. ELEAZAR: Hungarian rabbi and author; died at Kolin, Bohemia, in 1805; grandson of Meïr Eisenstadt, author of "Panim Me'irot." Kallir, who was rabbi of Rechnitz and of Kolin, wrote: (1) "Or Ḥadash," in three parts:

(*a*) commentary on the Pentateuch which forms a part of his grandfather's work "Kotnot Or" (Fürth, 1766); (*b*) novellæ on Pesaḥim; and (*c*) novellæ on Ḳiddushin (Frankfort-on-the-Oder and Vienna, 1766–99); (2) "Ḥawwot Ya'ir Ḥadash" (Prague, 1792), sermons; (3) "Ḥeḳer Halakah," part i. (Vienna, 1838), responsa.

S. S. N. T. L.

KALMAN VERMEISA (OF WORMS): Polish rabbi; died in Lemberg on April 28, 1560; the first known rabbi of that community and one of the earliest great rabbis of Poland. Though probably a native of Worms, as his surname suggests, he was rabbi and head of a yeshibah in Lemberg for forty-two years, and is mentioned in responsa and by his contemporaries as one of the foremost Talmudical authorities of his time. R. Joseph ha-Kohen of Cracow, author of "She'erit Yosef," states in that work that he submitted a question to him and was sustained in his opinion (Responsum No. 1, where R. Eliezer b. Manoah, his son-in-law, is also cited). One responsum by R. Kalman (dated 1558) and another by R. Eliezer (Nos. 15 and 16 in the responsa of R. Moses ISSERLES) contain all that has been preserved of their writings.

KALMANKES. See JAFFE.

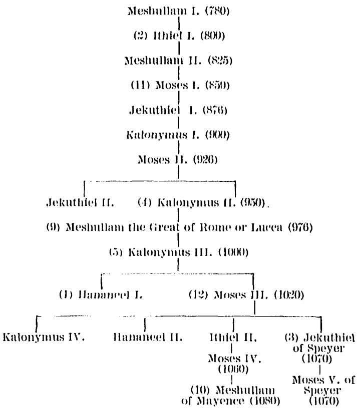
KALOMITI, ABRAHAM BEN MOSES: Turkish scholar of the fifteenth century. To him is attributed the rationalistic commentary on Job found in manuscript in the Bodleian Library (Neubauer, "Cat. Bodl. Hebr. MSS." No. 2243). In this commentary (fol. 57) the author quotes the "Sefer ha-Middot," a work of his on the "Ethics" of Aristotle. Kalomiti's claim to its authorship is, however, questioned by Steinschneider, who supposes that the commentary on Job was only copied for Kalomiti.

The surname "Kalomiti," which is the equivalent of the Hebrew אף נעים, was borne by several prominent Turkish Jews. A certain David אף נעים and one Samuel אף נעים are highly praised by Ephraim ben Gershon ha-Rofe in his sermons.

BIBLIOGRAPHY: Steinschneider, in *Hebr. Bibl.* xvii. 111, 135; xix. 31; idem, *Hebr. Uebers.* p. 219, note 807b.

G. I. BR.

KALONYMUS: A prominent family (originally from Lucca, Italy), which, after the settlement at Mayence and Speyer of several of its members, took during many generations a leading part in the development of Jewish learning in Germany. The name ought really to be spelled "Kalonymos," as Kalonymus b. Kalonymus and Immanuel of Rome both rime it with words ending in "-mos" (see Zunz in Geiger's "Zeitschrift," iv. 199). The origin of the name, which occurs in Greece, Italy, and Provence, is uncertain. Wolf thought it a translation of the Hebrew "Shem-Ṭob" (Zunz, "G. S." ii. 33); Zunz, that it represented the Latin "Cleonymus" (Geiger's "Zeitschrift," ii. 316). See also Steinschneider, "Cat. Bodl." col. 1372. Traces of the family in Italy may be found as early as the second half of the eighth century. As to the date of the settlement of its members in Germany, the opinions of modern scholars are divided, owing to the conflicting statements of the Jewish sources (Eleazar of Worms, "Maẓref ha-Ḥokmah," p. 14b; Solomon Luria, Responsa, No. 29; Joseph ha-Kohen, "'Emeḳ ha-Baka," p. 13). Rapoport, Zunz, and many others place the settlement in 876, believing the King Charles (קארלו), mentioned in the sources as having induced the Kalonymides to emigrate to Germany, to have been Charles the Bold, who was in Italy in that year; Luzzatto and others think that it took place under Charlemagne, alleging that the desire to attract scholars to the empire was more in keeping with the character of that monarch; still others assign it to the reign of Otto II. (973–983), whose life, according to the historian Thietmar von Merseburg, was saved in a battle with the Saracens by a Jew named Kalonymus. The following table, compiled from the accounts of Eleazar of Worms and Solomon Luria, gives the Italian and German heads of the family, which produced for nearly five centuries the most notable scholars of Germany and northern France, such as Samuel he-Ḥasid and Judah he-Ḥasid (for another genealogical tree, see KALONYMUS BEN ISAAC THE ELDER):



Although all of them are mentioned as having been important scholars, the nature of the activity of only a few of them is known.

1. Hananeel I. (ben Kalonymus): Liturgical poet; flourished at Mayence or Speyer in the eleventh century; brother of Moses III. He was the author of the piyyuṭ חרשו יושבי חרושת to the ḳerobot of the last day of Passover, to which his brother wrote the איכות נוראותיך.

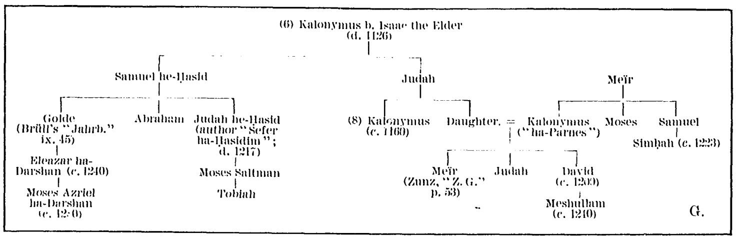
2. Ithiel I.: A short seliḥah in eight strophes, beginning with תבלת משחרי בניך and concluding with הצליחה נא היום, bears the name of Ithiel without any other indication as to its authorship. It was translated into German by Zunz ("S. P." p. 289).

3. Jekuthiel ben Moses: Liturgical poet; flourished at Speyer in 1070. He was the author of the reshut יראתי to Ḳalir's ḳerobah for the feast of New-Year. A son of Jekuthiel named Moses of Speyer is quoted as a high Talmudical authority ("Pardes," p. 48a; "Roḳeaḥ," p. 311; "Pirḳe Reḳanaṭi," p. 189; "Maimoniyyot," שבת, xxx.; "Shibbole ha-Leḳeṭ," p. 89, where the name is erroneously given as Simḥah instead of Moses).

4. Kalonymus II. (ben Moses): Halakist and liturgical poet; flourished at Lucca or at Rome about 950. He was consulted on ritual questions by Gershon Me'or ha-Golah; and twelve responsa of his are included in the collection compiled by Joseph ben Samuel 'Alam Ṭob and published by D. Cassel under the title "Teshubot Geonim Ḳadmonim" (Nos. 106–118). Gershon Me'or ha-Golah remarks ("Shibbole ha-Leḳeṭ," § 18) that there exists in rabbinical literature a confusion concerning the identity of Kalonymus and his son Meshullam the Great, and the saying of one is sometimes attributed to the other. Thus Rashi quotes three emendations in the Talmudical text in the name of R. Meshullam (Zeb. 45b), while Jacob Tam (Tos., Men. 109b) gives them in the name of R. Kalonymus. Kalonymus was the author of a ḳerobah for feast-days ("Ma'aseh Geonim," § 172). To him probably belong the rehiṭim מילא יראך which bear the signature "Kalonymus" or "Kalonymus the Elder." Eleazer of Worms attributes also to him the piyyuṭ מלכותו בקהל עדתו.

5. Kalonymus III. (ben Meshullam): Liturgical poet; flourished at Mayence about 1000. He figures in the Amnon legend as having written the "U-Netanneh Toḳef," which had been revealed to him in a dream by the martyr Amnon of Mayence.

6. Kalonymus ben Isaac the Elder: German halakist; lived at Speyer in the eleventh and twelfth centuries; father of Samuel he-Ḥasid, grandfather of Judah he-Ḥasid, and great-grandfather of Judah ben Kalonymus, as the following pedigree shows:



Kalonymus is quoted in the Tosafot (Ḥul. 47b), and a responsum of his is included in the collection of responsa of Meïr of Rothenburg (No. 501). From the account of Kalonymus given in the "Mordekai" (Pes. סדר של ליל פסח, end), in the "Pardes" (§§ 75, 88, 245, 290), and in the "Mazref la-Ḥokmah" (p. 14a), it may be inferred that he was rabbi in Mayence, and that during the First Crusade (1096) he was compelled to flee to Speyer. He died in Dec., 1127. His body could not be buried because of the investment of the city by Lothar, the burial-ground being outside of the place. At a later time it was interred at Mayence.

Bibliography: Michael, *Or ha-Ḥayyim*, p. 572; Wiener, in *Monatsschrift*, xii. 164; Epstein, *ib.* xli. 448.

7. Kalonymus b. Judah or **Kalonymus the Elder:** Lived in Mayence at the beginning of the twelfth century. He was a contemporary of Eliakim b. Joseph, the teacher of Eleazar b. Nathan (RaBaN).

8. Kalonymus ben Judah or **Kalonymus the Younger:** Liturgical poet; flourished at Speyer (?) about 1160; probably a grandson of Kalonymus ben Isaac the Elder. He was a contemporary of Isaac b. Shalom, grandfather of Isaac Or Zarua', and was the author of many liturgical poems in various styles, *e.g.*, ofan, zulat, and reshut, and especially of seliḥot. Thirty of his poetical productions have been incorporated in the Maḥzor. Among his seliḥot the most noteworthy are: את הקול, in which the author describes the readiness shown by the Jews, in the persecutions of the Crusades, to die for the faith of their fathers; the ḳinah מי יתן ראשי מים, on the sufferings of the Jews during the persecutions of 1147 ("Monatsschrift," xx. 257); and ארחות ישרים, on the fate of the Jews from the times of the Pharaohs to the destruction of the Temple by Titus. The whole of the first seliḥah and the end of the second have been translated into German by Zunz.

Bibliography: Zunz, *S. P.* pp. 16, 196; idem, *Literaturgesch.* pp. 164–166, 255; Epstein, in *Monatsschrift*, xli. 449.

9. Meshullam the Great (called also **the Roman, איש רומי**): Halakist and liturgical poet; flourished at Rome or at Lucca about 976. He carried on with Gershon Me'or ha-Golah and Simon the Great a scientific correspondence, which is included in the "Teshubot Geonim Ḳadmonim" (13a), and was the author of a commentary on Abot ("'Aruk," *s.v.* סעד). Meshullam engaged in polemics with the Karaites. From the Bible text he demonstrates that, contrary to their opinion, one may quit one's house on Sabbath and have one's house lighted on the night of Sabbath ("Semag," No. 66; "Sefer Ḥasidim," No. 1147). Meshullam was a prolific liturgical poet. Of the piyyuṭim contained in the ḳerobah of the "Shaḥarit" service of the Day of Atonement, at least twenty (possibly thirty-two) belong to him. He wrote also: an "'Abodah," recited after the prayer for the synagogue reader and containing a cursory review of Biblical history from Adam down to Levi; a yoẓer for Passover; and two zulot. Altogether thirty-eight piyyuṭim are attributed to him. Although their language is labored, they are distinguished by their elevation of thought and conciseness. There was another payyeṭan called "Meshullam the Great," to whom probably belongs the Aramaic poetical Targum on the Decalogue which is generally attributed to Meshullam the Great ben Kalonymus (comp. Landshuth, "'Ammude ha-'Abodah," *s.v.*).

10. Meshullam ben Moses: Liturgical poet; lived at Mayence in 1080. He was the author of the following five piyyuṭim: (1) אפדתה אהלי רום למכון, a yoẓer for a marriage Sabbath, based upon I Chron. xxix. 11-12; (2) סגולתי מלוכה אזרתיך, in seven-lined strophes; (3) an Elijah poem, איש אומין קנא; (4) an Aramaic illustration of the third commandment, beginning with אזדהר מסהדות שקר; and (5) a ḳedushshah for the Musaf service.

Meshullam was among those who killed themselves May 27, 1096, in order not to fall into the hands of the Crusaders (Neubauer and Stern, "Hebräische Berichte über die Judenverfolgungen," p. 6).

11. Moses I. (ben Meshullam): Liturgical poet; lived at Rome or at Lucca about 850. Two taḥanunim of his are incorporated in the Maḥzor: one, beginning with אנא ה׳ אלהי תשועתי, comprises thirty-eight lines of four words each; the other, beginning with מקור ישראל, consists of forty-six lines, with a double acrostic on the name of the author at the beginning of the line; translated into German by Zunz ("S. P." p. 193).

12. Moses ben Kalonymus: Liturgical poet; flourished at Mayence in 1020. He was the author of אימת נוראותיך and of a ḳerobah consisting of various poems for the seventh day of Passover, which used to be recited in the congregations of Mayence. Citations from several of the ḳerobah poems are given in various earlier Bible commentaries. (On the confusion existing in the rabbinical sources concerning the identity of the author of the אימת נוראותיך, see Zunz, "Literaturgesch." pp. 104-108.)

KALONYMUS. See Beaucaire.

KALONYMUS BEN DAVID BEN TODROS: French translator; lived in the first half of the fourteenth century. He translated (after 1328) from the Arabic into Hebrew, under the title "Happalat ha-Happalah," the treatise of Averroes against Ghazali's "Tahafut al-Falasifah." The translation is preceded by an introduction in rimed prose, in which Kalonymus excuses himself for having undertaken to propagate a work written by such a heretic as Averroes, and alleges that the arguments of the latter are sometimes so weak that they serve to strengthen Ghazali's attacks against the philosophers. Moreover, having been urged by his friends to give a Hebrew version of the work, he felt unable to refuse, although there already existed a Hebrew translation made by Isaac, or Bonisaac, דנחנה, and another had been commenced by Kalonymus ben Kalonymus. The introduction was published by Steinschneider in the catalogue of the Berlin Library. Kalonymus has been confounded by many bibliographers with the Venetian physician of the same name, who was also a translator.

G. I. Br.

KALONYMUS BEN GERSHON: German Talmudist of the thirteenth century. He was a contemporary of Eleazar of Worms and Menahem ben Jacob, with whom he disputed concerning a halakic decision. The controversy is quoted by Mordecai ben Hillel ("Mordekai," Yebamot ix., end) and in the "Haggahot Maimoniyyot" ("Hilkot Gerushim," xiii.).

BIBLIOGRAPHY: Michael, *Or ha-Ḥayyim*, p. 572.

G. I. Br.

KALONYMUS BEN JUDAH (known as **Maestro Calo**): Italian physician; born in Naples; lived at Venice in the first half of the sixteenth century. He attained a high reputation in the Christian world by the following translations into Latin made by him: Zerahiah ha-Levi's Hebrew version of Ghazali's "Tahafut al-Falasifah," published under the title "Destructio" (Venice, 1527); Samuel ibn Tibbon's Hebrew version of Averroes' treatise on the intellect, published under the title "De Conversione Intellectus" (*ib.*); Moses ibn Tibbon's Hebrew version of Alpetragius' treatise on astronomy (Venice, 1531). Kalonymus also translated into Hebrew, probably from Latin, Johannes Regiomontanos' "Fundamentis," which is still extant in manuscript (Parma MS. No. 336, 9). He was the author of a treatise on the Hebrew accents, entitled "Sha'ar ha-Ṭa'amim," written as a supplement to Abraham de Balmes' grammar, "Miḳneh Abram" (Venice, 1523).

BIBLIOGRAPHY: Steinschneider, *Cat. Bodl.* col. 1575; idem, *Hebr. Uebers.* pp. 333, 311, 551, 611; Mortara, *Indice*, p. 9.

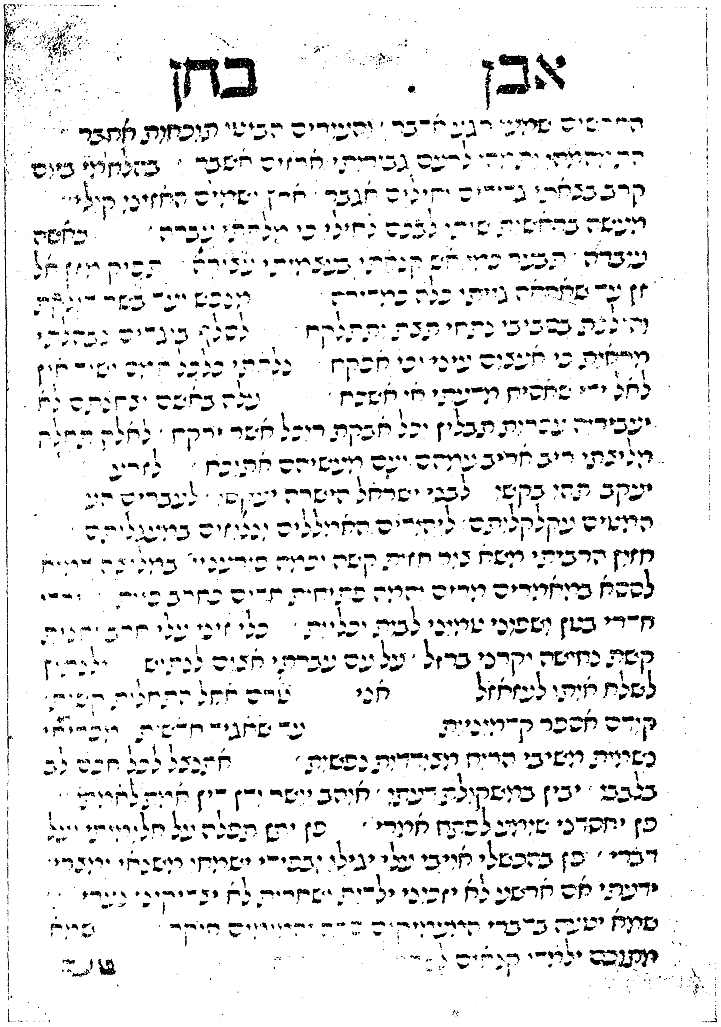
KALONYMUS BEN KALONYMUS BEN MEÏR (called **Maestro Calo**): Provençal philosopher and translator; born at Arles 1286; died after 1328. He was a descendant of a prominent Provençal family, several members of which held high positions among the Jews. The father of Kalonymus and Kalonymus himself each bore the title "Nasi" (prince). The latter studied philosophy and rabbinical literature at Salonica, under the direction of Senior Astruc de Noves and Moses ben Solomon of Beaucaire. He also studied medicine, although he seems never to have practised it.



אבן . בחן

FIRST PAGE FROM THE FIRST EDITION OF KALONYMUS' "EBEN BOḤAN," NAPLES, 1489.

(From the Sulzberger collection in the Jewish Theological Seminary of America, New York.)

At Rome.

About 1314 Kalonymus settled at Avignon, where he later became associated with Robert of Anjou, who sent him, provided with letters of recommendation, on a scientific mission to Rome. Kalonymus' learning and character gained for him the consideration of the Roman Jewish notables; and when his family, finding that his sojourn at Rome was longer than had been anticipated, recalled him, the poet Immanuel ben Solomon of Rome wrote a letter to Nasi Samuel of Arles, protesting in the name of the Jewish community of Rome against Kalonymus' return ("Maḥberot," p. 23). According to Steinschneider and Gross, Kalonymus was the poet referred to by Immanuel (*ib.* p. 28) as having pleaded the cause of the Roman Jews before the pope at Avignon in 1321. But this assertion needs confirmation, inasmuch as the exact dates of Kalonymus' stay in Rome can not be ascertained. Graetz and, after him, Neubauer believe that Kalonymus went to Rome after his sojourn in Catalonia, which was in 1322; and the fact that he does not mention Rome in his "Eben Boḥan" confirms their supposition. In 1328 Kalonymus was in Arles, where he probably remained until his death, the exact date of which is unknown.

Kalonymus acquired a high reputation both as an original writer and as a translator. He began his literary career when only twenty years old. His translations, which, with the exception of one that was printed, are all still in manuscript, include the following (arranged in chronological order, the Hebrew titles being those of the translations):

Ha-‘Ammud be-Shoroshe ha-Refuah, translation of the Arabic work "Kitab al-‘Imad fi Uṣul al-Ṭibb" of ‘Ali ibn Riḍwan. This translation, completed at Arles Oct. 10, 1307, was the second made by Kalonymus, the first having been lost in 1306 during the banishment of the Jews from France.

Sefer Galyanus be-Ḥaḳna ube-Kulga, Galen's work on clysters and colic, from the Arabic version of Ḥunain ibn Isḥaḳ.

Sefer Galyanus be-Haḳḳazah, Galen's work on bleeding, probably made from the Arabic version of Ḥunain ibn Isḥaḳ.

Treatise on the five geometrical bodies by Euclid, in relation to the theory of Apollonius, and the commentary of Simplicius.

Ha-Dibbur ha-Meshullash, treatise on the triangle, by Abu Sa‘adan.

Sefer Meshalim be-Tishboret, on mathematical propositions.

Sefer ha-Temunah ha-Ḥittukit, a work on geometry, entitled "Fi al-Shakl al-Ḳuṭṭa," by Thabet ibn Kurrah.

Ma'amar be-Iẓṭawwonot ube-Ḥiddudim, treatise on cylinders and cones.

Bi'ur Sefer Ṭobiḳi, Averroes' commentary on the topics.

Bi'ur Sufisṭiḳi, Averroes' commentary on sophisms.

Bi'ur Sefer ha-Mofet, Averroes' large commentary on the second analytics.

Sefer ha-Ẓemaḥim, treatise on the plants, attributed to Aristotle, with the commentary thereon by Averroes.

Ma'amar be-Sekel weha-Muskal, treatise on the intellect and the intelligible, by Al-Farabi.

Ma'amar be-Mispar ha-Ḥokmot, on the division of the sciences, by Al-Farabi.

Sefer ha-Peri ha-Niḳra Meah Dibburim, commentary on the Καρπός of Ptolemy, translated from the Arabic version of Abu Ja‘far Aḥmad ben Yusuf ben Ibrahim.

Iggeret be-Ḳiẓẓur ha-Ma'amar be-Moladot, short treatise on nativities, by Al-Kindi.

Iggeret be-‘Illot, treatise on the influence of the heavenly bodies on rain, by Al-Kindi.

The middle commentary of Averroes on physics.

Sefer ha-Hawayh weha-Hippased, Averroes' middle commentary on generation and corruption.

Sefer Otot ha-Shamayim, Averroes' middle commentary on meteors.

Iggeret Ba'ale Ḥayyim, "treatise on animals," translated from the twenty-first treatise of the encyclopedia of the Brethren of Sincerity, published in 1557 at Mantua, and in 1701 at Frankfort-on-the-Main. This translation was rendered into Judæo-German by Enoch ben Ẓebi (Hanover, 1718) and into German, under the title "Abhandlung über die Thiere," by Julius Landsberger (Darmstadt, 1882).

Sefer Maḥ-she-aḥar ha-Ṭeba‘, Averroes' middle commentary on metaphysics.

Treatise on arithmetic by Nicomachus of Gerasa, accompanied by a commentary of Abu Sulaiman Rabiya ibn Yaḥya.

Be-‘Inyane ha-Kokabim ha-Nebukim, translation of Ptolemy's treatise on the planets.

Sefer Arshmidah, Archimedes' treatise on the sphere and the cylinder, translated from the Arabic version of Costa ibn Luḳah.

Iggeret be-Laḥlyt ube-Maṭar, Al-Kindi's treatise on humidity and rain.

Averroes' dissertations on the first book of the First Analytics.

Iggeret be-Siddur Ḳeri'at ha-Ḥokmot, Al-Farabi's treatise on the method of studying philosophy.

Destructio Destructionis, a Latin translation from the Arabic "Tahafut al-Tahafut," written by Averroes against Al-Ghazali.

Kalonymus' original works are as follows:

Original Works.

(1) An answer in Hebrew addressed to En Bonafoux ibn Caspi, in opposition to the latter's "Ḳundreṣim" ("Quinterniones"). The answer refers chiefly to Ibn Caspi's work on the Bible, entitled "Ṭirat Kesef," or "Sefer ha-Sod." After having paid homage to the talent and learning of Caspi, Kalonymus criticizes the book, in which he claims to have detected many errors. He states that in any case, even if the work were perfect, it ought not to have been published, on account of its disrespectful treatment of Biblical personages. The answer was published by Perles under the title "Kalonymos ben Kalonymos Sendschreiben an Joseph Caspi" (Munich, 1879).

(2) "Sefer Melakim," a treatise on arithmetic, geometry, and astrology, of which only a fragment has been discovered by Steinschneider (Munich MS. No. 290). This treatise was composed at the request of a "great king," whom Steinschneider believes to have been Robert of Anjou.

The "Eben Boḥan."

(3) "Eben Boḥan," an ethical treatise composed in the year 1322. The treatise is written in cadenced prose, imitating, though with less elegance, the style of Jedaiah Bedersi in his "Beḥinat ‘Olam." The author intended in the "Eben Boḥan" to show the perversities of his contemporaries, as well as his own. He passes in review all the social positions of which men are proud, and proves their vanity. At the end he enumerates the sufferings of Israel and expresses the hope that God will have pity on His people who, in three years—1319–22, during which time the "Eben Boḥan" was written—had suffered persecution at the hands of the shepherds and of the leprous, besides an auto da fé of the Talmud at Toulouse. The "Eben Boḥan" was first published at Naples in 1489, and passed through many editions. It was twice translated into German, first by Moses Eisenstadt, or, according to Zedner, by Katzenellenbogen (Sulzbach, 1705), and then in cadenced prose by W. Meisel (Budapest, 1878).

(4) "Masseket Purim," a parody for the Feast of Purim, written at Rome. Caricaturing the rabbinical style of argument, the author humorously criticizes every one, not excluding himself. Later this kind of parody found many imitators. The "Masseket Purim" was first published at Pesaro (1507–20).

A great number of works have been wrongly attributed to Kalonymus ben Kalonymus.

S.* iii. 150-155; Kayserling, *Leben Kalonymus ben Kalonymus*, prefixed to Meisel's German transl. of the *Eben Boḥan*; Gross, in *Monatsschrift*, 1879, pp. 470 *et seq.*; idem, *Gallia Judaica*, p. 84; Steinschneider, in Ersch and Gruber, *Encyc.* section ii., part 28, pp. 169-175; Grätz, *Gesch.* vii. 288; Renan-Neubauer, *Les Ecrivains Juifs Français*, pp. 71 *et seq.*

G. I. Br.

KALONYMUS BEN MESHULLAM: Head of the community of Mayence at the time of the first Crusade. He is said to have sent a messenger to King Henry IV. in Italy, in consequence of which the king promulgated an order throughout his realm to the effect that the Jews were not to be molested. On May 27, 1096, however, he, together with fifty-three others, who had taken refuge in the bishop's palace from the Crusaders, put themselves to death rather than fall into the hands of the enemy.

G.

KALONYMUS NASI: Provençal liturgical poet; flourished at Beaucaire in the middle of the thirteenth century. He was the author of a liturgical poem beginning בנים שמעו לי for the Sabbath preceding the Feast of Passover ("Shabbat ha-Gadol"), in which are given all the ritual laws to be observed at Passover. The poem contains thirty-nine alphabetically arranged strophes, each of which begins with a Biblical verse and concludes with the pizmon מינך אל נגלתה. A dirge on Kalonymus' death is found in the diwans of Abraham Bedersi.

Bibliography: Zunz, *Literaturgesch.* p. 479.

G. I. Br.

KALONYMUS BEN SHABBETHAI (called also **Kalonymus of Rome,** איש רומי): Halakist, exegete, and liturgical poet; born at Rome about 1030. His father was president of the Jewish community, and his reputation as a Talmudic authority extended far beyond the boundaries of his native country. Halakic questions were submitted to him from Worms, Arles, and many other places ("Pardes," p. 48b; "Mordekai," ii. 1175). At the death of Jacob bar Yaḳar, in 1070, Kalonymus was called to the rabbinate of Worms, which he held until 1096, in which year he seems to have fallen a victim to the persecutions of the Crusaders (comp. Kohut, "Aruch Completum," Introduction, p. xxxviii., where are described the relations that existed between Kalonymus and Jehiel of Rome). Conjointly with Eleazar ben Judah, Kalonymus directed the rabbinical school of Worms, and had among his pupils Yaḳar ben Samuel ha-Levi and the French exegete Joseph Kara.

Kalonymus wrote commentaries on the Talmud which are now no longer in existence, but are quoted by Rashi (Beẓah 24b; Pes. 74a), Samuel ben Meïr (Tos. 'Er. 65a), Jacob Tam ("Sefer ha-Yashar," 16a, § 116), Eliezer ben Nathan ("Eben ha-'Ezer," §§ 24, 243, 281), and by many other rabbinical authorities. He was the author also of commentaries on the Bible, from which citations are made by Rashi (Deut. xxviii. 2; I Sam. xxv. 18; Isa. vii. 8), Joseph Kara (Job xxxii. 25), and Samuel ben Meïr (Num. xi. 35). A seliḥah by Kalonymus in thirteen strophes, beginning אועק אליך מלכי, is incorporated in the Maḥzor.

Bibliography: Zunz, *Literaturgesch.* p. 250; idem, *S. P.* p. 203; Luzzatto, *Naḥalat Shadal*, in Berliner and Hoffmann, *Oẓar Tob*, v. 39; Michael, *Or ha-Ḥayyim*, No. 1175; Vogelstein and Rieger, *Gesch. der Juden in Rom*, i. 255, and Index.

G. I. Br.

KALONYMUS BEN TODROS: French scholar; flourished at Narbonne in the second half of the twelfth century. He bore the title "Nasi," and was the leader of the community when Benjamin of Tudela visited Narbonne in 1165. He and his cousin Levi b. Moses were jointly leaders at a later time. From certain letters of Sheshet Benveniste to Kalonymus, it seems probable that the latter died in 1194. The letters are contained in a manuscript of the historian Joseph ha-Kohen. Gross believes that Kalonymus is identical with "Clarimoscus filius Tauroscii," mentioned in a deed of conveyance of 1195 reproduced by Saige ("Les Juifs du Languedoc," p. 70).

Bibliography: Gross, *Gallia Judaica*, p. 407; Kaufmann, in *R. E. J.* xxxix. 62.

KALTI, JOSEPH. See Joseph b. David ha-Yewani.

KALVARIYA: District town in the government of Suwalki, Russian Poland. In 1897 it had a total population of 8,420, including about 7,000 Jews. The Jewish community was established there in 1713, as appears from a charter of privileges granted to the Jews of the town on Aug. 8 of that year. According to Poluganski, in his historical notes on Kalvariya published in 1857, Jewish weavers lived in the place before it became a town and while it was still known as the village of Traby. The present synagogue, built of stone, was constructed in 1803. Another house of prayer, also of stone, was built in 1865: it contains a Talmud Torah established by the widow of Asriel Sobolevich. The community supports a number of charitable institutions.

Among its rabbis have been: Ẓebi ben Simḥah ha-Kohen, brother of Rabbi Naphtali of Shaty; Aaron Broda of Grodno (d. 1798); his son Löb (d. 1837); Isaac Slonimer, author of "'Emeḳ Yehoshua'"; Löb Shapiro Smorgoner, a pupil of Manasseh Iliyer; Mordecai Klaczko (called also "Mordecai Melzer"), author of "Tekelet Mordekai"; and Jacob ben Solomon (d. 1835), who did much toward beautifying the synagogue.

Other prominent scholars and communal workers were: Arele Natas, ancestor of Mordecai Aaron Ginzburg; Isaac ben Israel Laskes; Mordecai Ẓebi Grodzinski; Nata Reinherz, descendant of Joel Sirkes; Menahem Efrat, brother of David Tebele Efrat; Israel ben Jeremiah Ratner; Isaac Sterling and Jacob Rosenthal, both poets; Zundel Grodzinski; Eliah ben Mordecai Margoliot, rabbi at Rakishek; his son Asher; Rabbi Jacob Wolfkovich (d. in Jerusalem); Nahum Rotstein, dayyan at Kalvariya, and later rabbi at Simva; Isaac Rittenberg, author of "Nimuḳim 'al Sefer ha-Maklul," and a prolific writer for Hebrew periodicals; Isaac ben Elihu Margoliot, author of "Ma'oz ha-Talmud"; Bär Ratner, author of an introduction to and commentaries on "Seder 'Olam" and of scholia to the Palestinian Talmud; Isaac ben Meïr Margoliot, author of "Har Ẓalmon"; Moses Aaron Vizanski, author of "'Eẓ ha-Da'at"; Samuel ben Nata Reinherz; Meïr ben Ḥayyim; and Isaac Freid.

H. R. J. G. L.

KAMANKER, MOSES MEÏR: Polish Shabbethaian; lived at Zolkiev in the first half of the eighteenth century. An excellent Talmudist, and possessing in the highest degree the art of dissimulation, he was sent by the Polish Shabbethaians as a secret emissary to Moravia, Bohemia, and Germany, to establish relations with their sympathizers in those countries. Kamanker visited Prague—where he associated with Jonathan Eybeschütz—and many other communities, endeavoring everywhere to spread secretly Shabbethaian writings, and probably also to collect money for the leaders of the sect. His mission came to an abrupt end in Frankfort-on-the-Main. Betrayed by a Polish rabbi to whom he had confided his schemes, Kamanker was induced by specious promises to visit that city, where he was publicly exposed and put under the ban by the rabbinate.

KAMENETZ-PODOLSK: Russian city; capital of the government of Podolia. In 1900 it contained a population of 34,483, about half being Jews. Among its public edifices, the numerous Jewish institutions for charity and learning are conspicuous. During the Cossack uprising (1648-58) the Jewish community there suffered much from Chmielnicki's Cossacks on the one hand, and from the attacks of the Crimean Tatars (their main object being the extortion of ransoms) on the other. Kamenetz-Podolsk witnessed, also, the execution of Chmielnicki's son Yuri for his atrocious murder of a rich Jewess, because her husband, relying upon the influence of his friends, had refused to pay a tax imposed by him upon the Jews. The husband effected the seizure of Yuri and took him before the Turkish pasha then governing; Yuri confessed, and was executed.

About the middle of the eighteenth century Kamenetz-Podolsk became celebrated as the center of the furious conflict then raging between the Talmudic Jews and the Frankists; the city was the residence of Bishop Dembowski, who sided with the Frankists and ordered the public burning of the Talmud, which sentence was carried into effect in the public streets (1757).

Kamenetz-Podolsk was also the residence of the wealthy Joseph Yozel Günzburg. During the latter half of the nineteenth century many Jews emigrated from that city to the United States, especially to New York, where they organized a number of societies; among these are the Kamenetz Ḥebra Ḳaddisha and the Kamenetz-Podolsk and Kamenetz-Podolia Krankenverein.

KAMINER, ISAAC BEN ABRAHAM: Russian physician and Hebrew poet and satirist; born at Levkiev, near Jitomir, in 1834; died at Bern, Switzerland, March 30, 1901. His parents gave him an exclusively religious education, and caused him to marry when he was scarcely sixteen years old. Soon after his marriage Kaminer began to acquire secular knowledge, and sojourned for a certain time at Wilna, where he associated with the MASKILIM. Compelled to earn a livelihood for his family, Kaminer returned to his native place, and after many struggles succeeded in obtaining the position of Hebrew teacher at the rabbinical seminary of Jitomir. In 1857 Kaminer, although then the father of five children, gave up his position, and entered the University of Kiev, whence he graduated as M.D. For fifteen years he served as assistant to Professor Mering at Kiev. About 1875 Kaminer was appointed physician at Monasterishche, government of Chernigov. A few years later he was made a member of a commission for the investigation of the conditions of the Russian Jews, and he so displeased the officials by his impassioned defense of his coreligionists that he was ordered back to the government of Kiev. In 1901 Kaminer's health broke down, and he went for medical treatment to Bern, where he died as the result of an operation.

Kaminer was an able Hebrew writer, and an especially talented satirist; and his numerous contributions to Hebrew periodicals became very popular. Among these the most noteworthy were: "Baraitot de Rabbi Yiẓḥaḳ," a series of satirical articles, published in "Ha-Ḳol"; "Mi-Sidduro Shel Rabbi Yiẓḥaḳ," in "Ha-Shaḥar"; and a series of elegies bewailing the sufferings of the Russian Jews, in "Ha-Asif." In addition to his poetical contributions to the Hebrew periodicals, Kaminer wrote: "Ḳinot mi-Sidduro Shel Bene Dan" (Vienna, 1878), a satirical poem on the social condition of the Russian Jews, and "Seder Kapparot le-Ba'al Ṭaḳsi" (Warsaw, 1878), a satirical poem against the farmers of the meat-tax in Russia. A poem written by him on his death-bed, and entitled "Widdui," was published in "Ha-Shiloaḥ," Jan., 1902.

KAMINKA, ARMAND: Russian scholar; born at Berdychev May 5, 1866; educated at the rabbinical seminary of Israel Hildesheimer, Berlin (1880), at Hamburg, Riga, Berlin University (philosophy, Oriental languages, political economy; Ph.D.), at the Berlin Hochschule für die Wissenschaft des Judenthums (theology), and at the Sorbonne and the Ecole des Sciences Politiques, Paris, whither he went in 1887. In 1893 he became acting rabbi of the congregation at Frankfort-on-the-Oder, and in the same year (Sept.) succeeded S. I. Kämpf as rabbi of the Tempelgemeinde at Prague. From 1897 to 1900 he was rabbi at Esseg, Slavonia, and in 1901 went to Vienna, where he became preacher, secretary of the Israelitische Allianz, and lecturer at the bet ha-midrash. In 1903 he was sent by the Israelitische Allianz of Vienna to Kishinef to investigate the Jewish massacres.

Kaminka wrote: "Poésies Hébraïques" (Paris, 1888); "Studien zur Gesch. Galiläas" (Berlin, 1890); "Die Geonim und Ihre Schriften" (Treves, 1892); "Die Litteratur der Geonäischen Zeit, 638-1038" (Treves, 1894); "Der Diwân des Salomo Bonfed" (1894); "Kritische Ausgabe des Tachkemoni von Alcharisi" (1899). To Winter and Wünsche's "Die Jüdische Literatur" he contributed the article "Die Rabbinische Literatur der Spanisch-Arabischen Schulen." "Keneset Yisrael," 1897, vol. ii., contains an introductory essay by him on Greek poetry, with a Hebrew translation of the twenty-first song of the "Iliad."

KAMMERKNECHTSCHAFT: Expression for the political condition of the Jews in the German empire, signifying that the revenue derived from them was a royalty of the emperor and belonged to his private treasury ("camera"). Consquently the emperor not only possessed jurisdiction over them, but was also bound to grant them protection. The first mention of the "Kammerknechtschaft" occurs in the document (1157) in which Frederick I. ratifies the charter granted to the Jews of Worms by Henry IV. in 1090; in this document he confirms their privileges "cum ad cameram nostram attineant" ("Mon. Germaniæ, Scriptores," xvii. 178; "Zeitschrift für die Gesch. der Juden in Deutschland," i. 139). The same expression is used by Frederick in a privilege granted to the church of Arles in 1177, and in a charter granted (1182) to the Jews of Regensburg ("qui ad imperialem cameram nostram dinoscuntur pertinere"). His grandson Frederick II. was the first to use the expression "servi cameræ nostræ," in a charter granted to the Jews of Sicily in 1234 and in one granted to the Jews of Vienna in 1238 (Scherer, "Die Rechtsverhältnisse der Juden in den Deutsch-Oesterreichischen Ländern," p. 135). From that time on the expression was commonly used in speaking of the political condition of the Jews, authority over whom the emperors claimed, notwithstanding the opposition of the feudal lords.

Duke Frederick II. (the Warlike) of Austria, in his charter of 1244, was the first to claim this jurisdiction (see JEW. ENCYC. ii. 322–323, *s.v.* AUSTRIA). Similarly, Albert I. issued an order to the citizens of Dortmund, in 1299, to receive the Jews, who were under his, not under the city's, jurisdiction ("cum vos noscatis, ipsos Judeos esse camere nostre servos"; "Zeit. für die Gesch. der Juden in Deutschland," iii. 245). Charles IV. declared in 1347 that all Jews came under his jurisdiction ("all Juden mit Leib und mit Güt in unser Kameren gehören"; Scherer, *l.c.* p. 80). As, however, Charles, in his "Golden Bull," granted to the electors the control of the Jews (*ib.* p. 375), and as such grants became more and more frequent, whereas previously they had been exceptional (*e.g.*, as a compromise by Louis III., in 1331, when the Austrian dukes recognized him as German king), the condition of Kammerknechtschaft gradually became merely a nominal one. It was treated as an actual one only at the Diet of Augsburg, in 1550, when it was decided that no state should have the right to expel the Jews when the latter had received the privilege of residence from the imperial authorities. Otherwise, the Kammerknechtschaft meant that the Jews paid taxes to the German emperor in addition to the taxes they paid to local territorial authorities.

With the gradual decline of the imperial jurisdiction even the term fell into oblivion, although it was used occasionally by the territorial powers; *e.g.*, Frederick the Warlike, of Saxony, in a document dated 1425, speaks of the Jews as his "Kammerknechte" (Levy, "Gesch. der Juden in Sachsen," p. 32, Berlin, 1901). As the Jews ceased to be Kammerknechte, and their political condition was determined by the local authority which gave them protection, they were called SCHUTZJUDEN of this or that state ("Oettingen-Wallersteinsche Schutzjuden," for example); and their status as such was abolished only through modern liberal legislation, in some instances not until the second half of the nineteenth century.

Origin.

The medieval state was based on the feudal principle by which every one was a member of an order first and a citizen of the state next. The Jews, being of no recognized class or order, were aliens, and as such the property of the king, like wayfaring foreigners or wild game. On this principle, most likely, the Frankish kings had granted safe-conducts to individual Jews, copies of which are preserved in the books of "Formulæ" dating from the time of Louis I. (le Débonnaire; 814–840), who took certain Jews under his protection ("sub mundebordio et defensione nostro suscepimus"; Roziéres, "Recueil Général des Formules Usitées dans l'Empire des Francs," i. 41–43, Paris, 1859; Simson, "Jahrb. des Fränkischen Reichs Unter Ludwig dem Frommen," i. 393–396). Later on the historic argument was adduced that the German king, possessing the title of Roman emperor, and being the political heir of the Roman emperors, was lord over all Jews, inasmuch as his predecessor Vespasian had taken them captive. In this sense, according to a somewhat legendary report, Albert I. (1306) claimed jurisdiction over the Jews of France (Grätz, "Gesch." vii. 244). There was, however, no derogatory meaning connected with the word "Kammerknechtschaft," contrary to the opinion of many people unacquainted with medieval terminology.

G. D.

KAMNIAL (KAMBIL), ABRAHAM B. MEÏR IBN (known in Arabic as **Abu al-Ḥasan**): Spanish physician and patron of poetry and literature; protector of the Jewish communities in Spain, Babylonia, and Egypt; lived in Saragossa about the year 1100. He is known in the history of Hebrew grammar by the mnemonic sentence הוכן שביל אמת ("the way of truth was established"), in which he joined the eleven servile letters of the Hebrew alphabet. The poet Moses ibn Ezra lauds him extravagantly in his "Tarshish," or "'Anaḳ," which is dedicated to Kamnial, and in which the whole of the first poem dilates upon his benevolence and upon the honor generally shown him. Judah ha-Levi praised him in several poems and composed his epitaph. Of his relatives, Abu Omar Joseph ben Ḳamnial, also a physician, is known. Moses ibn Ezra composed a wedding-poem for him, and, perhaps, also dedicated to him his work on poetics—"Kitab al-Muḥadharah."

ḲAMẒA and **BAR ḲAMẒA:** Two persons who, according to a Talmudic legend (Giṭ. 55b–56a), were the cause of the destruction of Jerusalem. A certain man, having prepared a banquet, sent an invitation by his servant to his friend Ḳamẓa. The servant, by a mistake, delivered the invitation to his enemy Bar Ḳamẓa, who came and was expelled by the master of the house. Bar Ḳamẓa sought revenge for the outrage by denouncing the Jews of Jerusalem as having revolted against the Roman emperor, declaring, in support of his allegation, that if the emperor were to send an offering to the Temple, the priests would refuse to accept it. The emperor therefore sent him with a calf which he ordered to be sacrificed on the altar, but Bar Ḳamẓa made a blemish in the calf which caused it to become unfit for the altar. The result was the siege of Jerusalem by the Romans.

The identification of Ḳamẓa and Bar Ḳamẓa with Hanania and Eliezer ben Hanania by Zipser was shown by J. Derenbourg to be improbable. The latter recognizes in it the name of Κομψός, who, according to Josephus ("Vita," § 9), was one of the notables of Tiberias and a strong adherent of the Romans.

ḲANAH ABIGDOR (ABENGDOR or **ABENGEDOR):** A cabalistic writer of the fifteenth century, who lived either in Spain (Graetz) or in Italy or in Greece (Jellinek). In the introduction to his book "Sefer ha-Ḳanah," he describes himself as "Ḳanah Abengedor, son of Nahum, of the Ram family"; but in the preface to his other work, "Sefer ha-Peli'ah," he styles himself "Elkanah, son of Jeroham, son of Abigdor, of the Ram family," and claims to be a descendant of the Mishnah teacher Neḥunyah b. Haḳana. The chief rôle in both works (the texts of which are very poor) is played by a prodigy named Nahum (see NAHUM KATOFA), who, at the age of three, together with his father, was taught the Cabala by his grandfather, the last-named receiving the assistance and cooperation of the prophet Elijah and various heavenly voices. From these circumstances it has been suggested that Nahum was the real name of the author. Abigdor's works are: (1) "Sefer ha-Peli'ah," printed in 1784 at Korez under the double title of "Sefer ha-Ḳanah, wehu Sefer ha-Peli'ah" and containing observations on the account of the Creation in Genesis and on the Decalogue. (2) "Sefer ha-Ḳanah," printed in 1786 at Poretzk. This work, which has become extremely rare, is an explanation of the two hundred and forty-eight affirmative precepts of Judaism. The introduction was published separately, under the title of "Sefer Ḳeneh Binah," at Prague in 1610 by Eleazar Perles, son of Abraham Enoch. Although the author of the "Ha-Ḳanah" never mentions the Zohar, he makes use of all its methods, delighting in manipulations of the names of God and of angels, and in the symbolism of numbers and letters, quite in the style of Abraham Abulafia. His purpose is to show that the difficulties in Bible, Talmud, and ritual can be solved only by the teachings of the Cabala; whereas the rabbinical teachers, he claims, often fall into absurdities in their explanatory attempts. He assails the rabbis and Talmudists of his period so vigorously that it would appear they had been taking energetic steps to prevent the spread of the Cabala, thereby leading him to plead energetically for its value and necessity. Abigdor seems to have been the first to give a cabalistic turn to Talmudical hermeneutic rules and maxims. For the rest, both of his works are little better than compilations. In "Sefer ha-Peli'ah" are liberal excerpts from Jonah Gerondi, Abraham Abulafia, Recanati, Joseph ha-Aruk's commentary on the "Yeẓirah," and the "Ṭurim" of Jacob ben Asher. "Ha-Ḳanah" follows closely the "Semag" of Moses of Coucy, and cites a portion of the "Sha'are Orah" of Joseph Gikatilla. See CABALA.

KANITZ, AUGUST: Hungarian botanist; born April 25, 1843, at Lugos; died July 12, 1896, at Klausenburg. While a student at the University of Vienna he wrote "Geschichte der Botanik in Ungarn" (Hanover and Budapest, 1863), and soon after, "Versuch einer Geschichte der Ungarischen Botanik" (Halle, 1865). In 1866 he published a work on the flora of Slavonia; in 1877 one on that of Montenegro, Bosnia, and Servia; and in 1879 one on that of Rumania. For the last-named work he was elected (1880) a member of the Academy of Sciences of Budapest, and was made Knight of the Order of the Crown of Rumania. He embraced Christianity.

In 1872 Kanitz was appointed professor of botany in the University of Klausenburg. In 1877 he founded the "Magyar Növénytani Lapok" (Journal of Hungarian Botany), which he edited until 1892.

KANITZ, FELIX PHILIPP: Hungarian archeologist and ethnographer; born at Budapest Aug. 2, 1829; died at Vienna Jan. 8, 1904. When only seventeen years of age he entered the University of Vienna, where he studied art. After 1850 he traveled extensively and visited Germany, France, Belgium, and Italy. Settling in Vienna in 1856, he made journeys through Dalmatia, Herzegovina, Montenegro, Servia, Bulgaria, Bosnia, and Macedonia. These travels through the Balkan provinces led him to become the ethnographer of the Southern Slavs. He embraced Christianity.

Kanitz is the author of: "Die Römischen Funde in Serbien," Vienna, 1861; "Serbiens Byzantinische Monumente," *ib.* 1862; "Reise in Südserbien und Nordbulgarien," *ib.* 1868; "Serbien, Historisch-Ethnographische Reisestudien aus den Jahren 1859–1868," Leipsic, 1868; "Donau-Bulgarien und der Balkan, Historisch-Geographisch-Ethnographische Reisestudien aus den Jahren 1860–1875," *ib.* 1875–79 (3d ed., 1882); "Katechismus der Ornamentik," 4th ed., *ib.* 1891; "Römische Studien in Serbien," Vienna, 1892.

KANN, ÈDOUARD: French musician; born at Paris Feb. 28, 1857; pupil of Massenet and Duvernoy. In 1895, at Lyons, he produced "Ruth," an oratorio. This was followed by "Gaitanne," a two-act opera (1898), and "Maritorne," a one-act comic opera. Since then he has brought out several musical compositions, among which may be mentioned: "Le Baptême du Printemps," "La Syrinx," and "Le Lion Amoureux."

Bibliography: Curinier, *Dictionnaire Nat. des Contemporains*, ii. 271.
S. F. T. H.

KANN, MOSES: German rabbi; born at Frankfort-on-the-Main; died there Dec. 1, 1762; son of Löb Kann. He was chief rabbi of Hesse-Darmstadt and head of the Talmudical school at Frankfort, which had been founded and richly endowed by his father-in-law, Samson Wertheimer, of Vienna. For over half a century this school flourished under Kann's guidance, and maintained the high reputation of Frankfort as a seat of Talmudic study. By his energy and activity in behalf of the Jews, Moses Kann's name became celebrated throughout German Jewry. He and his father-in-law furnished the means for the publication of a new edition of the Talmud (the Frankfort-Amsterdam edition); but through the denunciations of a baptized Jew, Paul Christian, this edition and a number of prayer-books were confiscated. By the testimony of the Berlin court preacher Jablonski and the consistorial councilor Scharden of Halle, supported by the opinion of twenty-four Christian professors and preachers who, in 1728, had declared that "neither the Jewish prayer-book nor the Talmud contained anything derogatory to Christianity," Moses Kann proved before the Elector of Mayence the bad character of the apostate. On Aug. 1, 1753, the Imperial Court rescinded the order of confiscation of these books.

Moses Kann's name is perpetuated in the memor-book of the Frankfort congregation; Meïr ben Eliakim Götz, in "Eben ha-Shoham," responsa, praises him as his benefactor, and Eleazar Kallir, in his preface to "Or Ḥadash," mentions him in terms of admiration.

Jacob Joshua was called from Metz to the rabbinate of Frankfort (1741) chiefly through Kann's influence. The latter's sons **Moses Kann** and **Bär Kann** administered the charitable foundations which he had established during his life, in addition to his bequest of $10,000, from the interest of which students of the Torah were to be supported. In 1763 the sons turned over this fund in trust to the congregation, the semiannual interest, $275, to be distributed among beneficiaries proposed by the brothers Kann and approved by the board of the congregation.

ḲANNA'IM. See Zealots.

KANSAS: One of the northern central states of the United States; admitted to the Union in 1861. In 1830 immigrants settled in a spot which they named "Kansas City." It is supposed that Jews also settled there at an early date; and they probably joined the other immigrants of Kansas City, Mo., in religious affairs.

Leavenworth was the first city in the state which had a Jewish congregation. Its first town lots were sold Oct. 9, 1854. Within a year there were enough Jews to form a minyan, and in 1859 they organized a congregation under the name "B'nai Jeshurun," renting a room on Delaware street for the purposes of worship. A lot five miles west of the city was purchased at the same time and converted into a cemetery. In 1864 a lot was purchased at Sixth and Osage streets and a synagogue erected on it; later, accommodations for a Sabbath-school and vestry-rooms were added. The name of Henry Ettenson has been closely connected with the synagogue from the beginning to the present day. The following rabbis have officiated: Jacobs, Kalish, Machol, Brill, Saft, Raphael, Stemple, Meyers, Rubenstein, Rosenspitz, Marks, Frey, and Kahn. The Hebrew Ladies' Benevolent Society was organized in 1861. In 1881 an Orthodox congregation was formed under the name "House of Jacob," the older congregation having adopted the Reform method of worship and the Jastrow prayer-book. The Jewish population of Leavenworth is about 400.

Topeka, the capital of the state, has a small number of Jews; and services are held on holy days. The community possesses a school, a cemetery, and a ladies' benevolent society. A congregation was organized at **Kansas City** under the name of "Ohabei Sholem" in 1900.

In **Atchison, Cawker City, Hutchinson, Lawrence, Salina,** and **Wichita** there are but few Jews, holding holy day services only. At Atchison there is a Jewish cemetery. At **Holton, Wyandotte City,** and some other places there are three or four Jewish families, which attend holy day services at the places named or at Kansas City.

The present (1904) Jewish population of the state of Kansas is estimated at 3,000.

KANSAS CITY. See Missouri.

KANSI, SAMUEL (Provençal, **Samiel Astruc d'Escola** or **Dascala**): French astronomer of the fourteenth century. The surname "Kansi" (כנסי) is an incorrectly formed adjective of the Hebrew noun "keneset" (כנסת), and is the equivalent of "D'Escola" (דאישקולא), a name borne by several

Provençal Jews. Kansi wrote the introduction to the astronomical work "Shesh Kenafayim" of Immanuel ben Jacob of Tarascon. He is supposed to be identical with Samuel Nasi d'Escola, whose commentary on the astronomical tables of Jacob ben David ben Yom-Ṭob Bonet (Bonjorn) is still extant. A certain Samuel d'Escola, perhaps identical with Kansi, copied, in 1406, at Avignon, the "Mishneh Torah" of Maimonides.

KANTOR, JUDAH LÖB B. JOSEPH: Russian journalist; born in Wilna 1849; government rabbi of Libau, Courland. For a short time he studied at the rabbinical school of Wilna and later at that of Jitomir, where he graduated as teacher. He also studied medicine in Berlin, where he obtained his doctor's degree; but he never practised. Kantor early evinced considerable literary talent and soon became known as a writer, in both Russian and Hebrew. He contributed to "Ha-Ẓefirah" from Berlin, and after he had settled in St. Petersburg as a teacher in one of its gymnasiums he became a constant contributor to, and the editor of, "Russki Yevrei" (1883-84). He edited also, with H. M. Rabinovitsch, the Russian monthly "Yevreiskoe Obozryenie," of which only seven numbers appeared (St. Petersburg, 1884). In Feb., 1886, Kantor started the publication of "Ha-Yom," the first Hebrew daily newspaper in St. Petersburg, and remained its editor until its suspension (1887). In 1890 he was assistant editor of "Ha-Meliẓ," and about 1892 became rabbi of Libau, which position he still (1904) occupies.

Kantor was the editor also of a Hebrew monthly entitled "Ben 'Ammi," of which four numbers appeared in 1887. He contributed to the "Voskhod" and to other Russian-Jewish periodicals, as well as to the purely Hebrew press, especially to "Ha-Shaḥar," in which he wrote under the pseudonym "Naḥum ben 'Ozer ha-Ẓiyoski." He was one of the committee that published the jubilee edition of J. L. Gordon's poetical works, and is the author of the biography of L. Rosenthal published in vol. ii. of the records of the Society for the Spreading of Knowledge Among the Jews of Russia (St. Petersburg, 1890), of which society he is an active member.

H. R. P. Wi.

KANTOR, DER JÜDISCHE, Wochenblatt für die Gesammt-Interessen Aller Kantoren und Cultusbeamten: Weekly; published at Bromberg, Prussia, beginning in 1879. Its editor is A. Blaustein, the founder of the German Israelitish Cantors' Society. It deals with matters of interest to cantors (ḥazzanim), and contains articles on synagogue music and Jewish pedagogics.

G. A. M. F.

KAPLAN, ABRAHAM: Russian Hebrew writer; born at Wilke July 25, 1839; died at Vienna Feb. 2, 1897. Having acquired a reputation as a good Hebrew writer at home, he removed to Vienna, where he followed the profession of a publicist until his death.

Kaplan was the author of the following works: "Mistere ha-Yehudim" (Warsaw, 1865), a Hebrew translation of the first volume of the historical novel "Die Geheimnisse der Juden" of Hermann Reckendorf; "Ḥayye Abraham Mapu" (Vienna, 1870), a biography of the Hebrew writer Abraham Mapu, with two appendixes containing "Mosheh 'Immanu," a poem in praise of Moses Montefiore, and "Se'u Zimrah," a hymn in honor of the choral society Ḳol Zimrah of Cracow; "Ẓarah we-Neḥamah" (*ib.* 1872), a Hebrew adaptation from the German novel "Die Falsche Beschuldigung" by L. Weisel (*ib.* 1872); "Dibre Yeme ha-Yehudim" (*ib.* 1875), a Hebrew translation of the third volume of Grätz's "Gesch. der Juden" (*ib.* 1875); "Kelimah we-Belimah" (*ib.* 1882), two satirical poems; "Mosheh Mosheh" (*ib.* 1884), poem on the celebration of the centenary of Moses Montefiore; and "Ha-Shemesh" (Cracow, 1889), reflections on the sun, its nature and substance.

Kaplan frequently contributed to the Hebrew periodicals, and was involved in press polemics on the merit of the works of Smolenskin, which he defended against their critics. Kaplan's defense provoked the publication of the pamphlet "Kohen lelo-Elohim" (Warsaw, 1878), in which Kaplan was violently attacked.

H. R. I. Br.

KAPLAN, JACQUES: Russian painter and designer; born at Sebastopol July 19, 1872. He went to Paris, and in 1885 entered the Paris Ecole des Arts Décoratifs, and, three years later, the Ecole des Beaux-Arts. Kaplan was a pupil of Bonnat, and in 1890 exhibited at the Salon of the Société des Beaux-Arts. In 1894 a special exhibition of his paintings was given, his "Champ de Blé" and "Soleil Couchant," landscapes, and "Etudes de Femmes," a charcoal drawing, being especially praised. At the Société Nationale des Beaux-Arts Kaplan has exhibited many works of noteworthy coloring. In 1901, with "Le Terrassier," he obtained admission to the Société des Artistes Français. Among his paintings may be mentioned the trio "L'Attente," "Le Retour," and "La Rencontre," and many portraits and pastels, including representations of the Prince de Soltikoff, Carlès, former minister of the Argentine Republic, Henri Brisson, Henri Fouquier, and Mme. Réjane. Kaplan has also attracted attention by his miniatures and his illustrations, among the latter being those for the works of Guy de Maupassant.

S. V. E.

KAPLAN, WOLF HA-KOHEN: Russian teacher and Hebrew poet; born at Trishki, government of Kovno, in 1826; died at Riga June 14, 1888; pupil of M. A. Ginzburg. Kaplan was an able educator, and his school at Riga became the model for all the Jewish educational establishments in Russia. He was an indefatigable communal worker and was the very soul of the Progressive congregation of Riga, to which he acted as secretary until his death.

To Kaplan's intervention with Count Shuvalov in 1864 was due the liberal treatment by the authorities of the Lithuanian Jews residing at Riga, who had thitherto been persecuted by the Germans. Kaplan carried on a correspondence with the eminent Russian publicist Katkov, whom he persuaded to undertake the defense of the Jews in the Russian paper "Russkiya Vyedomosti." Kaplan was an able Hebrew writer and contributed regularly to the Hebrew periodicals. The most noteworthy of his contributions was "Ereẓ ha-Pela'ot," a poetical vision in 124 six-lined strophes with a prologue, published in the "Keneset Yisrael," ii. (1887). Kaplan is known in the Hebrew press under the anagram יקן.

Kaplan maintained a correspondence with the Maskilim of his time, and especially with Leon Gordon. From the answers of the latter, found in the "Miktabe Yalag," can be seen Kaplan's importance as a classical writer of Hebrew and as a promoter of the Russian Haskalah.

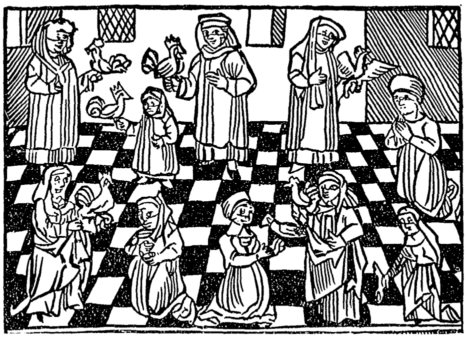
KAPOSI (כאפוסי), ḤAYYIM: Dayyan in Egypt about 1600. He became known later as the "Ba'al ha-Nes," through a miracle which is said to have happened to him. He became blind. Some time afterward, being suspected of having taken bribes, he called upon Heaven, in the presence of the assembled congregation, to witness to his integrity. "If I have done this," he said, "may my blindness continue forever; but if not, may my vision be restored." "Whereupon," writes Meïr Gavison, "his sight came back to him." Azulai asserts that he saw Ḥayyim's signatures written both while the latter was blind and after he had recovered. His grave is still venerated in Cairo (see Egypt). Ḥayyim wrote: "Sifre Ḥayyim," a commentary on the Mekilta, the Sifra, and the Sifre, mentioned in Judah Najjar's "Shebut Yehudah" (Leghorn, 1801); responsa, contained in Meïr Gavison's "Teshubot" (still in manuscript), in "Teshubot RaDBaZ," v. (Leghorn), and in "Teshubot Yom-Ṭob Ẓahlun" (No. 129, Venice, 1694).



Kapparot Ceremony Before the Day of Atonement.

S. S. M. Sc.

KAPÓSI (KOHN), MORIZ: Austrian dermatologist; born at Kaposvár, Hungary, Oct. 23, 1837; died March 6, 1902. After graduating (M.D., 1861) from the university at Vienna, he settled there as a physician. He became privat-docent in 1866; assistant professor in 1875; professor and chief of the dermatological clinic and hospital in 1879, in succession to Hebra. In 1899 the title of "Hofrath" was conferred upon him. He was a convert to Christianity.

Kapósi published over one hundred essays in the leading medical journals, especially on dermatology and syphilis: about lupus erythematosus, frambœsia, rhinoscleroma, xanthoma, zoster, etc. Among his works may be mentioned: "Die Syphilis der Schleimhaut der Mund-, Nasen- und Rachenhöhle," Stuttgart, 1866; "Die Syphilis der Haut und der Angrenzenden Schleimhäute," Vienna, 1875; "Lehrbuch der Hautkrankheiten," Stuttgart, 1876; "Pathologie und Therapie der Hautkrankheiten," Vienna, 1879 (5th ed., 1899; it has been translated into French, Russian, and English); "Pathologie und Therapie der Syphilis," Stuttgart, 1891. In 1881 he published in the "Wiener Medizinische Wochenschrift" a biography of his teacher, entitled "Gedächtnissrede auf Hebra."

S. F. T. H.

KAPPARAH (plural, **kapparot** = "means of atonement"): An animal used as a sort of vicarious sacrifice on the day previous to the Day of Atonement. As a rule, a cock is taken by a male, and a hen by a female person, and after the recitation of Ps. cvii. 17-20 and Job xxxiii. 23-24 the fowl is swung around the head three times while the right hand is put upon the animal's head. At the same time the following is thrice said in Hebrew: "This be my substitute, my vicarious offering, my atonement. This cock [or hen] shall meet death, but I shall find a long and pleasant life of peace!" After this the animal is slaughtered and given to the poor, or, what is deemed better, is eaten by the owners while the value of it is given to the poor.

The custom has been strongly opposed by such authorities as Naḥmanides, Solomon ben Adret, and Joseph Caro as a pagan one in conflict with the spirit of Judaism, which knows of no vicarious sacrifice. But it was approved by Jehiel b. Asher and by his son Jacob (Ṭur, Oraḥ Ḥayyim, 95), and by Samson b. Zadok and others who followed the authority of Hai Gaon and other geonim (see the literature in "Bet Yosef" to Ṭur, *l.c.*). The ritual appealed especially to cabalists, such as Isaiah Horowitz and

Isaac Luria, who recommended the selection of a white cock with reference to Isa. i. 18, and who found other mystic allusions in the prescribed formulas. Consequently the practise became general among the Jews of eastern Europe (see Isserles, "Darke Mosheh" on Ṭur, *l.c.*), and the word "kapparah," as a connotation for a thing that is sacrificed, is quite prominent in the Judæo-German dialect (see Tendlau, "Sprichwörter und Redensarten," 1860, No. 198).

Sacrificed by an Elder.

As the reason for the particular preference for a chicken as a vicarious offering, it is stated by the Geonim (quoted by Asheri on Yoma viii., No. 23) that it was suggested by the use of the Aramaic word "geber" for both "man" and "cock." Some rich people, however, would occasionally take a ram instead, with reference to the ram of Isaac (Gen. xxii. 13). It appears, moreover, from the passage last cited that originally a "sheliaḥ" (="an elect officer of the community") officiated as the atoning priest at the ceremony. Accordingly a saint or elder of mystic power is still recommended for the purpose in "Kol Bo," lxviii.

Another and apparently an older practise in geonic times was that of planting beans or peas in palm-leaf baskets for each child in the house two or three weeks before the New-Year. Then on the day before New-Year the children would swing the baskets containing the ripened plants around their heads three times, saying, "This be in lieu of me; this be my substitute and my exchange," and would then throw them into the water (Rashi, Shab. 81b). This is obviously a survival of the pagan rite connected with the so-called "Adonis gardens," 'Αδώνιδος κῆποι = "niṭ'e na'amanim" (Isa. xvii. 10; see Marti's and other commentaries). In Solomon b. Adret's time the kapparot ceremony was performed for the youths only (see "Bet Yosef," *l.c.*). According to S. I. Curtiss, "Primitive Semitic Religion To-Day," p. 203, Chicago, 1902, the Moslems of the villages of the Syrian desert still sacrifice a cock for each new-born son and a hen for each daughter born.

Common practise has established the rule that in case chickens can not be procured, geese or fish or even plants may take their place; but doves or other animals that were brought upon the altar of the Temple should not be used (Abraham Abele, in "Magen Abraham"; Shulḥan 'Aruk, Oraḥ Ḥayyim, *l.c.*).

K.

KAPPER, SIEGFRIED: Austrian poet and physician: born at Smichow near Prague, March 21, 1821; died at Pisa June 7, 1879; educated at the gymnasium and University of Prague, and at the University of Vienna (Ph.D. 1847). Starting in life as a physician, he later embraced a literary career.

Kapper's more important works are: "Slavische Melodien," Leipsic, 1844; "České Listy," Prague, 1846; "Befreite Lieder dem Jungen Oesterreich," Vienna, 1848; "Lazar der Serbenzar," *ib.* 1851; "Die Gesänge der Serben" (in two parts), *ib.* 1852; "Fürst Lazar," Leipsic, 1853; "Falk," Dessau, 1853; "Südslavische Wanderungen," 2 vols., Leipsic, 1853; "Christen und Türken," 2 parts, *ib.* 1854; "Die Böhmischen Bäder," *ib.* 1857; "Die Handschriften Altböhmischer Poesien," Prague, 1859. In his "Geneda" (printed 1846) Kapper pictured early Jewish life in Prague. His "Wanderlied für Israelitische Handwerker" and a number of his lyrical poems were set to music by Solomon Sulzer and Josef Dessauer.

ḲARA, ABIGDOR BEN ISAAC: Bohemian cabalist and liturgical poet; died at Prague April 10, 1439. He lived for a time at Ratisbon, but settled permanently at Prague after 1409. Ḳara enjoyed a high reputation and associated with King Wenceslaus, who liked to converse with him on religious matters. Ḳara nevertheless led a life of poverty, and collections were made in several Jewish communities to provide him with a livelihood. He was the author of the following works, still extant in manuscript: haggadic notes and gemaṭriot on the Pentateuch (Neubauer, "Cat. Bodl. Hebr. MSS." No. 2273); notes on Isaiah xlvi. 18 (*ib.* 186, 2); "She'elot u-Teshubot," responsa, allegorical in character (*ib.* 1598, 4); "Ḳodesh Ḥillulim," a cabalistic work (MS. Fuenn). Kara's liturgical productions are: a seliḥah, written on the occasion of the persecutions of the Jews of Prague in 1389, beginning with את כל התלאה (inserted in the Maḥzor for the Minḥah prayer of the Day of Atonement); a hymn beginning אחד יחיד ומיוחד, on the unity of God; "Shelosh 'Esreh Hishtaḥawayot," a seliḥah beginning with אדני בוקר תשמע קולי (inserted in the ritual "Zebaḥ Pesaḥ," published at Prague in 1615); a poem beginning with אדוני אל אמת, on the thirteen articles of belief (Neubauer, *l.c.* Nos. 2256 *et seq.*).

ḲARA, ABRAHAM BEN ABIGDOR: Bohemian chief rabbi, rosh yeshibah, and liturgist; died at Prague Oct. 7, 1542. He wrote a supercommentary on Rashi to the Pentateuch, mentioned by David Gans ("Ẓemaḥ Dawid," p. 44a); and glosses to the "Ṭur Oraḥ Ḥayyim" (see Zunz, "Z. G." p. 273). According to Michael ("Or ha-Ḥayyim," p. 11), Ḳara wrote glosses to all the four Ṭurim, a part of which was printed in the Augsburg edition of the Ṭurim in 1540; and a seliḥah beginning with the words "Ana Elohe Abraham," the verses of which are in alphabetical order; at the end an acrostic gives the author's name.

BIBLIOGRAPHY: Michael, *Or ha-Ḥayyim*, No. 31; Landshuth, *'Ammude ha-'Abodah*, p. 2.

S. S. M. Sel.

ḲARA, JOSEPH BEN SIMEON: French Bible exegete; lived in Troyes, where, probably, he was born about 1060-70; died between 1130 and 1140. His uncle and teacher was Menahem ben

Ḥelbo, whom Ḳara often cites in his commentaries, these quotations being almost the only source of knowledge concerning Menahem's exegesis. Ḳara frequented Rashi's house; it is even possible that he was Rashi's pupil (Zunz, "Z. G." p. 68), though this is denied by Epstein. At least they quote each other (comp. Joseph Ḳara on Prov. iv. 4, v. 14, vi. 23, xviii. 22; Rashi on Judges iii. 26; Num. xvii. 5, xxiv. 14; Isa. x. 24). In Rashi's house Ḳara also made the acquaintance of Samuel ben Meïr (comp. RaSHBaM on Gen. xxxvii. 13). They likewise quote each other (comp. RaSHBaM on Gen. xxiv. 60 and Num. iv. 10; Rosin, "R. Samuel ben Meïr," pp. 12 *et seq.*, 72 *et seq.*; Joseph Ḳara on Amos iii. 12; Job xi. 17; Gen. x. 15; Porges, in "Monatsschrift," 1883, p. 169). Isaac Ḳara, of whose exegesis specimens are given in "Monatsschrift," 1864, p. 219; 1865, p. 384 (comp. Rosin, *l.c.* pp. 24 *et seq.*), may be a son of Joseph.

The surname "Ḳara" is usually taken to be a professional name, meaning "reader" or "interpreter of the Bible" (see Jew. Encyc. iii. 168, *s.v.* Bible Exegesis). A. Jellinck points out, however ("Commentarien zu Esther, Ruth," etc., p. vi., Leipsic, 1855), that "Ḳara," as contrasted with "Darshan," means the representative of the "Peshaṭ" ("Pashṭan").

Ḳara was a prolific exegetical writer. When he copied Rashi's commentary on the Pentateuch he added numerous glosses and remarks in order to supplement and revise it; and these glosses were inserted by the scribes in the text of Rashi. They have been collected by Geiger in "Niṭ'e Na'amanim," i. 1 *et seq.*; *idem* in "Parschandatha," pp. 21 *et seq.*; and by Berliner in "Pletath Soferim" (Hebr. part), p. 12.

The original or independent Bible commentaries of Ḳara are:

(1) According to Berliner (*l.c.* p. 16), a commentary on Deut. i.-iv. (printed *l.c.* [Hebr. part], pp. 6 *et seq.*).

Ḳara's Commentaries.

(2) Commentaries on the Prophets published in "Miḳra'ot Gedolot," Lublin, 1897 (see Poznanski in "Zeit. für Hebr. Bibl." v. 68); extracts from these commentaries were published by Wolf in "Ha-Shaḥar," ii. 289, iii. 688, iv. 55 (see, also, Dukes in "Orient, Lit." 1847, p. 344); by Littmann in "Josef ben Simeon Kara," pp. 26-32 (from Isaiah and Ezekiel). Those on Samuel and most of the Minor Prophets are not genuine (Porges, in "Monatsschrift," 1883, p. 170; Rosin, *l.c.* p. 72, note 2). The Jeremiah commentary was published separately by Schlossberg ("Commentaire sur Jerémie," Paris, 1881; comp. Brüll's "Jahrb." vii. 170 *et seq.*; see, also, Zunz, "Z. G." p. 68; Geiger, *l.c.* i. 18); that on Hosea, Breslau, 1861.

(3) Commentaries on most of the Hagiographa; namely: (*a*) Proverbs; see the quotation in Ḳara's commentary on Eccl. vii. 12. (*b*) Job, published in "Monatsschrift," vols. v., vi., and vii. (see, also, Luzzatto in "Kerem Ḥemed," vii. 61 *et seq.*; Geiger, *l.c.* [Hebr. part], pp. 11 *et seq.*). (*c*) Canticles (i. 1-vii. 13), published by Hübsch ("Ḥamesh Megillot," Prague, 1866; see Salfeld, "Das Hohelied Salomo's," p. 49). (*d*) Ruth, published by Hübsch, *l.c.*, and by A. Jellinck, *l.c.* (comp. A. Epstein in "Ha-Ḥoḳer," i. 31, note 2). (*e*) Lamentations, published in Naples in 1486, and by Hübsch (*l.c.*), Jellinek (*l.c.*), and E. Ashkenazi ("Dibre Ḥakamim," pp. 17 *et seq.*, Metz, 1849), and by S. Buber in two different recensions in "Kaufmann Gedenkbuch," pp. 8 *et seq.* (*f*) Ecclesiastes, published by Hübsch (*l.c.*) and Einstein (in Berliner's "Magazin," xiii. ["Oẓar Ṭob"]). (*g*) Esther, published by Hübsch (*l.c.*), Jellinck (*l.c.*), and Berliner (*ib.* 1878; comp. *ib.* 1876, p. 158).

It is quite possible that Ḳara wrote also commentaries on Ezra and Nehemiah, but that the commentaries on these books as contained in MS. Saraval No. 27, and ascribed to Joseph Ḳara, are not genuine (Geiger, in "Oẓar Neḥmad," iv. 43 *et seq.*).

Some comments of Ḳara on Chronicles must have existed, as is proved by the quotations in pseudo-Rashi to those books (see II Chron. iii. 15, v. 9, xxv. 24).

According to Epstein (*l.c.* i. 29 *et seq.*), Ḳara wrote (4) glosses to the pseudo-Rashi commentary on Genesis Rabbah, and (5) a commentary on the Maḥzor (comp. Zunz, "Ritus," p. 198).

Characteristics.

While in his glosses on the Pentateuch and in his commentaries on the Prophets Ḳara depends upon Rashi to the greatest extent, his explanations of the Hagiographa are more original. He quotes Menahem ben Saruḳ, Dunash ibn Labraṭ, Judah and Moses ha-Darshan, Ḳalir, Meïr Sheliaḥ Ẓibbur, Kalonymus, and others. In his commentary on Job he frequently uses the writings of Shabbethai Donnolo, and gives very valuable extracts from the lost Baraita of Samuel with Donnolo's commentary (comp. Epstein, *l.c.* pp. 34 *et seq.*). His grammatical standpoint is that of Rashi. Whole Hebrew sentences are sometimes translated into French. In his expressions he is not as terse as Rashi. He is bold enough to express the opinion that the Book of Samuel was not written by the prophet himself, but later (Commentary on I Sam. ix. 9). He does not go into grammatical or philological research, and cares more for the sense of the whole sentence than for a single word. He shows more common sense than depth, and though he does not altogether hold aloof from haggadic interpretations, he takes a leading place among the exegetes of northern France, who in general preferred the rational exegesis.

G. M. Sc.

ḲARA, MENAHEM BEN JACOB: Bohemian scholar; flourished at Prague in the first half of the fifteenth century. He was a near relative, perhaps a half-brother, of Abigdor ben Isaac Ḳara, whom he quotes in his writings as "my brother." Ḳara was the author of the following works, which are extant in manuscript: a commentary on Prov. xxx., written at the request of Abigdor Ḳara, who thought he recognized in אגור בן יקה the initials of his own name (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1649, 7); a commentary on the "Mar'ot Elohim" of Enoch al-Ḳusṭantini (*ib.* 1649, 1); a commentary on Ghazali's "Kawwanot ha-Pilusufim" and on various parts of the "Moreh Nebukim." The author quotes in the last-named commentary Samuel and Moses ibn Tibbon, Moses of Narbonne, Levi ben Gershon, and his own contemporary Moses כ׳ן. On fol. 13 he mentions his imprisonment during eighteen months (*ib.* 1649, 2).

Bibliography: Zunz, *Z. G.* p. 165; Steinschneider, *Jewish Literature*, pp. 99, 115.
K. I. Br.

ḲARA, SIMEON: French rabbi; lived in Mans in the eleventh century; brother of Menahem ben Ḥelbo and father of Joseph Ḳara. For the meaning of his surname see Ḳara, Joseph. Isaac de Lattes, in his "Ḳiryat Sefer," counts Ḳara among the prominent French rabbis, although no work of his has survived. Rapoport identified him with the compiler of the Yalḳuṭ Shim'oni, on account of the similarity of some Midrashic quotations in this work with citations in Rashi's Bible commentary. Abraham Epstein has, however, shown that in the manuscripts the name "Ḳara" does not occur, and in place of "Simeon" the reading "Simson" at times is found.

Bibliography: Zunz, *G. V.* p. 313; idem, *Z. G.* p. 61; Rapoport, *Kerem Ḥemed*, vii. 4 *et seq.*; Kirchheim, in *Orient, Lit.* iv. 253; Geiger, *Niṭ'e Na'amanim*, German part, p. 8; *idem*, in *Z. D. M. G.* xxviii. 300; Weiss, in *Bet Talmud*, ii. 35; Brüll's *Jahrb.* viii. 113; Abraham Epstein, in *Ha-Ḥoḳer*, i. 85 *et seq.*
G. I. Br.

KARAITES AND KARAISM: The Karaites (קראים, בני מקרא, בעלי מקרא = "Followers of the Bible") were a Jewish sect, professing, in its religious observances and opinions, to follow the Bible to the exclusion of rabbinical traditions and laws. But Karaism in fact adopted a large part of rabbinical Judaism, either outright or with more or less modification, while at the same time it borrowed from earlier or later Jewish sects—Sadducees, Essenes, 'Isawites, Yudghanites, etc.—as well as from the Mohammedans. The founder of the sect being Anan, his followers were at first called Ananites, but as the doctrines of the sect were more fully developed, and it gradually emancipated itself from Ananism, they took the name of "Karaites," a term first used by Benjamin al-Nahawendi ("Ba'ale Miḳra" at the end of his "Sefer Linim") and in a quotation in "Yefet."

On Anan's death, between 780 and 800, his son Saul, and then his grandson Josiah, succeeded him as head of the sect, but both of them were too insignificant intellectually to leave many traces in Karaism. But between 830 and 890 men of greater mark appeared among the Karaites, who, while differing among themselves and creating various subdivisions in the new sect, agreed in diverging from Anan's doctrines, and even from his methods of teaching. The leaders of that time whose names have come down to us are: Benjamin al-Nahawendi, Ishmael of 'Akbara, Musa al-Za'farani (called also Al-Tiflisi), Mashwi al-'Akbari, and Daniel al-Ḳumisi (called also Al-Damaghani). Anan was an eclectic, borrowing various regulations of his code (a large part of which has recently been discovered and published by A. Harkavy) from rabbinical Judaism and from Jewish sects; but he attempted to base all this borrowed material, as well as the regulations which he himself drafted, on the Biblical text, resorting with that end in view to the most curious etymologies and exegetical rules. His ascetic views throughout were, moreover, so ill adapted to practical life that an unhampered secular life in agreement with Anan's code was entirely impossible. Anan's successors, therefore, set themselves the task of removing or modifying these shortcomings of Ananism, thus insuring the practical existence of the sect. While the strict Ananites lost more and more ground in the course of the ninth century in consequence of their asceticism, subsisting merely for a time at Jerusalem as strict hermits and mourners for Zion (see Abele Zion), and while Ananism entirely disappeared in the tenth century, Karaism still exists, though it is stricken with intellectual impotence.

Modifications of Ananism.

Anan's eclecticism, which at first did good service to the heretic, since the members of various anti-rabbinical sects apparently found congruous ideas in the new heresy, caused after a time dissatisfaction in different quarters. While the liberals did not take kindly to the aggravations and rigorous ordinances of the new code, which entirely lacked the sanction of national tradition, this code was not strict enough for the rigorists in the sect, and throughout the ninth century and the first half of the tenth there were continuous dissensions, as appears from the detailed accounts of Al-Ḳirḳisani and Saadia. In some Karaite circles of the ninth and tenth centuries there arose, perhaps under Gnostic influence, an antagonism to the ceremonial law and the dogma of traditional Judaism similar to the inimical attitude toward Jewish law found among the first Christian Gnostic circles (the echo of which still appears in the attacks of Christian theologians on Jewish "legalism," although no one religion is exempt from nomism). This antagonism went so far, for instance, that the Sabbath and the feast-days were regarded merely as memorial days during the existence of the Jewish state, their observance being no longer obligatory in the exile, the resurrection of the dead was interpreted in an allegorical and rationalistic sense, as Israel's deliverance from exile, this view being probably borrowed from Sadduceeism; and the advent of the Messiah, as well as the restoration of the Temple, was referred to the past epoch of the Second Temple. The rigoristic Karaites, on the other hand, even forbade any one to leave the house on the Sabbath, to carry anything from one room into another, to wash the face, to wear a coat, shoes, girdle, or anything except a shirt, to make a bed, to carry food from the kitchen into another apartment, etc. In time, however, the extremists, such as the Ananites, 'Isawites, Yudghanites, and Shadganites, disappeared, and the moderate party in the sect organized itself under the name of Karaites.

Gradually the Karaite leaders abandoned their con-

Development of Dogma.

troversies relating to individual laws and details referring to the cult, and turned their attention to principles concerning dogma and the Mosaic Law in contradistinction to rabbinical oral law, visibly proceeding under the influence of the Islamic "kalam" and "mu'tazilah," especially the "uṣul al-fiḳh" of the Mohammedans. Although Anan commonly applied the rabbinical rules of Biblical hermeneutics ("middot"), yet even he borrowed from Islam, chiefly from his contemporary and fellow sufferer, Abu Nu'man Thabit Abu Ḥanifah, the founder of the theological school of the Hanafites, and also from the then newly-founded Mohammedan sect of the Rawandites, who transplanted the doctrine of the transmigration of souls from India to Bagdad. This attitude of Anan was closely connected with his personal circumstances at the time of the founding of the new sect (see Jew. Encyc. i. 554, *s.v.* Anan). Benjamin al-Nahawendi (*c.* 830–850), the first noteworthy Karaite teacher in the period following Anan, did not directly borrow from Mohammedan theology anything relating to the religious law, being probably too far removed from Bagdad, then the center of Arabic scholarship; he borrowed instead the allegorical method of Scriptural interpretation of the Judæo-Alexandrian (Hellenistic) school. This method was at that time known partly through Hebrew works still extant in the beginning of the tenth century, and partly through Greek sources made available by the Syrians, these works being ascribed to the sect of the Maghariyyah (Al-Maghariyyah = "cave-dwellers," as the Essenes were then called). Nahawendi even borrowed Philo's doctrine of the Logos. Anan's and Nahawendi's differing opinions regarding the Law have been noted elsewhere (see Benjamin ben Moses Nahawendi). The list of these differences can be materially increased from the recently published fragments of Nahawendi's code (A. Harkavy, "Studien und Mittheilungen," viii. 175–184), and also from quotations of Al-Ḳirḳisani, Al-Baṣir, Abu al-Faraj Furḳan, and later authorities.

Benjamin Nahawendi.

Although no derogatory remarks referring to Anan have been found in Nahawendi fragments, it is yet evident that Nahawendi silently disapproved of Anan's extraordinary interpretation of Biblical words and his glaring abuse of the rabbinical hermeneutic rules, although he himself is not free from eccentricity. Nor is his attitude toward Rabbinism so harsh and absolutely inimical as that of Anan. Nahawendi shows no trace of Anan's artificial opposition to the Talmud; on the contrary he often defends the Talmudists against Anan's attacks. He occupies a highly important position in the history of Karaism, and he did much for the consolidation of the new sect. He was, moreover, the first Karaite writer to use the Hebrew language; as far as is known, he composed at least three of his works in Hebrew—"Sefer Dinim," "Sefer ha-Miẓwot," and the commentary on Genesis. He marks, therefore, a new epoch in the development of Karaism.

Contemporaneously with Nahawendi and somewhat later in the ninth century appeared Karaite writers and leaders who violently attacked the founder of the sect and heaped vituperation upon his method. Ishmael of 'Akbara, after whom a subdivision of the sect, the Okbarites ('Akbarites), was named, did not hesitate, for instance, to call Anan "asinine." This contemporary of Nahawendi, who took his name from 'Akbara, a place near Bagdad, abrogated several of Anan's severe measures; and he was the only one among the Karaites who had aptitude or liking for Biblical criticism. He did not hesitate to say that errors had crept into the traditional text of Scripture and that some of the readings of the Samaritan text and the Septuagint were preferable to the Masoretic text. Other subdivisions of the Karaite sect, as the Mashwites (*c.* 850; so called after their founder Mashwi al-Ba'labakki, a pupil of Ishmael of 'Akbara), the Tiflisites (the followers of Al-Tiflisi, *c.* 850), the Ramlites or Malikites (called after their founder Malik al-Ramli), and various other smaller groups, which have been fully described by A. Harkavy in his Karaite studies (in "Voskhod," 1898–99), differed considerably from Anan not only in regard to single religious laws, but also in leading doctrines. A somewhat later and very important Karaite writer, Daniel ben Moses al-Ḳumisi (toward the end of the ninth century), who at first was an enthusiastic follower of Anan, and called him "Head of the Sages" ("Rosh ha-Maskilim"), subsequently felt entirely disillusioned, and then styled Anan "Head of the Fools" ("Rosh ha-Kesilim"). On his divergences from Anan in detail see Jew. Encyc. iv. 433, *s.v.* Daniel ben Moses al-Ḳumisi; the account there can now be supplemented in agreement with recently published fragments of his code (idem, "Studien und Mittheilungen," viii. 187–192). His leaning toward rationalism in theological matters is noteworthy.

Flood-Tide.

Abu Yusuf al-Ḳirḳisani.

These divergences contributed not a little to the undermining of Anan's authority among the Karaites, and his faithful followers, the Ananites, were pushed to the wall; as their rigorous observances were entirely unsuited to ordinary life, they were finally obliged to emigrate to Jerusalem and adopt the hermit life of the old Essenes, as mourners for Zion. Gradually disappearing, they left the field free for the great noontide of Karaism in the tenth and eleventh centuries. The representatives of this epoch are: Abu Yusuf Ya'ḳub al-Ḳirḳisani, Sahl ibn Maẓliaḥ, Solomon ben Jeroham, Yafith ibn 'Ali, David al-Fasi, Abu al-Faraj Harun, Yusuf al-Baṣir and his pupil Abu al-Faraj Furḳan. The first-named, Abu Yusuf Ya'ḳub al-Ḳirḳisani (called incorrectly by later authors and even by Steinschneider, "Yusuf" instead of "Abu Yusuf"), wrote in the third and fourth decades of the tenth century; he is a unique figure in Karaite literature on account of his historical sense, his comprehensive survey of the development of the Jewish sects, and his acute, even if partial, criticism of his predecessors. For the historical part of his work he consulted the works of David ibn Merwan al-Muḳammaṣ (see Jew. Encyc. iv. 466, where he is confounded with a later David al-Muḳammaṣ) and the accounts of Mohammedan writers, whose works, however, have not been handed down. Although a great admirer of Anan, whom he frequently defends, Ya'ḳub seldom agrees with him, and generally endeavors to mitigate the severity of the heresiarch's legal interpretations. Al-Ḳirḳisani went very far in regard to forbidden marriages, being one of the chief representatives of the so-called "system of extension" ("rikkub").

Al-Ḳirḳisani was, so far as is known, the first Karaite writer to defend the dictates of common sense and of knowledge in religious matters; the second part of his chief work, "Kitab al-Anwar" (Book of Lights), treats of the necessity of investigation and of reason, and of the determination of the proofs of reason and analogical conclusions. He adopts for Karaism without modification the views of the Motekallamin and the Motazilites. Since that time there has been a wide schism in Karaism between the followers of scientific investigation, who patterned their theology on the Mohammedan kalam and the Motazilite doctrines, and the Orthodox, who would have nothing to do with philosophy and science. Among the former are some Karaite scholars of the tenth century mentioned by their contemporary the Arabian polyhistor ‘Ali al-Mas‘udi, and Yusuf al-Baṣir, the foremost Karaite philosophical writer, together with his pupil Abu al-Faraj Furḳan (Jeshua b. Judah; about the middle of the eleventh century). Among the latter are the important Karaite authors Sahl ibn Maẓliaḥ, Solomon ben Jeroham, and Yafith ibn ‘Ali, all three of whom lived during the middle and the end of the tenth century. The Karaites produced no original author in this field after the middle of the eleventh century, but merely translators from the Arabic, compilers, and imitators, such as Israel Maghrabi and his pupil Yafith ibn Saghir (13th cent.), Solomon Nasi (Abu al-Faḍl; 13th cent.), Samuel Maghrabi (14th cent.), and others.

The following Karaite writers of this epoch cultivating other fields are noteworthy: *Exegetes:* Al-Ḳirḳisani, Sahl ibn Maẓliaḥ, Solomon ben Jeroham, Yafith ibn ‘Ali, and Yusuf ibn Nuḥ (10th cent.); Abu al-Faraj Harun, Abu al-Faraj Furḳan, and ‘Ali ibn Sulaiman (11th cent.). *Lexicographers:* Abu Sulaiman Daud al-Fasi (end of the 10th cent.) and his editors Abu Sa‘id (probably identical with Levi ha-Levi, beginning of the 11th cent.) and ‘Ali ibn Sulaiman; the first-named knows nothing as yet of the triliteral roots of the Hebrew language, and the last-named hardly uses the new system, although acquainted with Ḥayyuj's works. As Hebrew grammarians, only the above-mentioned Yusuf ibn Nuḥ and Abu al-Faraj Harun (called "the grammarian of Jerusalem" by Ibn Ezra) need be noted; the latter wrote first his "Kitab al-Mushtamil," a comprehensive work in seven parts, which also includes a large part of Hebrew lexicography, and then made a compendium, "Kitab al-Kafi," so that (1026) Ibn Ezra mentions eight works. *Codifiers* (of Karaite religious law): Ya‘ḳub al-Ḳirḳisani, in the third and fourth decades of the tenth century, whose "Kitab al-Anwar" may be considered as the most important Karaite work written in the Arabic language; Sahl (called "Ben Zita" by Ibn Ezra), whose code was entitled "Sefer Dinim," although written in Arabic; Yafith ibn ‘Ali, known only through citations, and his son Levi ha-Levi, one of the most noteworthy codifiers, who often agrees with the Rabbinites; Yusuf al-Baṣir, author of the "Kitab al-Istibṣar," of which the "Sefer ha-Abib" and "Sefer ha-Mo‘adim," mentioned by Pinsker, are subdivisions; Abu al-Faraj Furḳan, Sahl ibn Faḍl Tustari (called in Hebrew "Yashar b. Ḥesed"; end of the 11th cent.), and others.

Although the Oriental Karaite authors since Nahawendi wrote in Hebrew with more or less fluency, there were no noteworthy poets among them. The orthodox and ascetic views of the earlier Karaites did not encourage secular poetry, which was held to profane the holy language; nor did they produce anything noteworthy in liturgical poetry ("piyyuṭim"), for according to Anan, with the exception of short benedictions, prayers could be taken only from the Psalter (see specimens in Harkavy, "Studien und Mittheilungen," viii.). Even in later times they generally either borrowed Rabbinite poems or resorted to imitations of them. The only Karaite poet who left secular poems, Moses Dar‘i (13th cent.), either imitated or simply borrowed from the Judæo-Spanish poets. It goes without saying that polemics against Rabbinism were obligatory upon every Karaite author in the period of propaganda and extension. The writers mentioned herein attacked the Rabbinites on every occasion and in almost all their works, and also wrote special polemical pamphlets, as Solomon ben Jeroham against Saadia Gaon, Sahl and Yafith against Saadia's pupil Jacob b. Samuel, Yusuf al-Baṣir against Samuel ibn Ḥofni. Some Karaite writers may also be noted who are known only as polemicists, as Ibn Mashiaḥ and Ibn Sakawaihi; some details have recently been discovered regarding the latter's "Kitab al-Faḍa'iḥ" (Book of Infamies), which was refuted by Saadia.

Principles of Karaism.

In formulating the principles of primitive Karaism concerning the doctrine of the Law the leaders of the sect generally followed Mohammedan patterns. Anan, as has been seen, was influenced by Abu Ḥanifah, and added to the three sources of Islamic law—the Koran, the "sunnah" (tradition), and "ijma‘" (the agreement of all Islam)—a fourth source, namely, "ra'y," *i.e.*, speculation, or the speculative opinions of the teachers of the Law and of the judges, which are deduced by analogy ("ḳiyas"; Talmud, "heḳḳesh") from the laws originating in the other three sources. Anan, opposed on principle to Rabbinism, could not recognize tradition as a source of law, nor could he, the founder of a new sect, consider agreement as a basis for religious law; hence he found it all the more necessary to seize upon analogical speculation. But he introduced two important modifications, based on rabbinical precedent, into the principle of Abu Ḥanifah: (1) instead of logical analogy, of chief importance with Abu Ḥanifah, Anan gave preference to verbal analogy (the rabbinical "gezerah shawah"), and frequently even resorted to literal analogy; (2) for the religious laws which he based on his speculations he endeavored to deduce support from the Biblical text: he did not hesitate at the most forced interpretations, but followed rabbis who made deductions ("asmakta") in support of ancient traditions. Hence this heresiarch believed himself justified in asserting that he took all his teachings directly from the Bible. Later, however, when Ananism with its opposition to traditional Judaism and its artificial system was gradually disappearing, and Karaism was so well established that it need hesitate no longer to call things by their right names, the Karaite leaders adopted openly the Mohammedan principles concerning canons of the Law. Thus Sahl ben Maẓliaḥ, according to Judah Hadassi, adopted outright Abu Ḥanifah's principles, with the single modification that instead of tradition he considered speculation and analogy as authoritative. Yusuf ibn Nuḥ entirely rejected speculation, like the non-Ḥanifitic Mohammedan theological schools; Levi ha-Levi (probably the reading in Hadassi should be "Abu Sa'id" instead of "Sa'id"), again, agrees with Abu Ḥanifah, though of course excluding tradition. Abu al-Faraj Furḳan similarly determines three categories of the Law, which agree with Abu Ḥanifah's categories, exclusive of tradition. However, many Mohammedan faḳihs also have excluded tradition from the so-called roots of the doctrine of the Law ("uṣul al-fiḳh"). Tradition was included among the nomocanons, under the curious designation "the inherited burden" ("sebel ha-yerushshah"), at a much later date, during the Byzantine epoch of Karaism.

During the first centuries of the existence of the sect, Karaism was widely extended among the Jews, and could boast of making many converts among the followers of the parent religion, gathering them in Egypt, Palestine, Syria, Babylonia, and Persia.

Expansion of Karaism.

Several circumstances contributed to its success. Firstly, sectarianism was then rife in the East in consequence of the great changes brought about by Islam, and numbers of the adherents of different confessions throughout the califate eagerly accepted any new departures. In the second place, Anan's proclamation of the unrestricted study of the Bible as the only source of religion was most attractive, not only to the members of earlier anti-rabbinic sects, which had by no means been uprooted, but also to the more liberal elements within traditional Judaism that were dissatisfied with the stagnation shown in the methods of the Babylonian academies. In the third place, the directors of the academies (the Geonim), who were at that time out of touch with science and all secular matters, were too short-sighted to recognize the dangers threatening traditional Judaism on the part of the new sect, and believed that by simply ignoring it they could destroy it. They were, moreover, incapable of engaging in religious polemics with their adversaries, as they were familiar only with weapons which the latter refused to recognize, namely, arguments taken exclusively from the traditional writings, and did not distinguish critically between halakic and haggadic and mystical elements in rabbinical literature. Hence none of the attacks on traditional Judaism, not even those that were unfounded, were properly refuted, nor was the true state of affairs explained. Small wonder, then, that the new sect, filled with the zeal of propaganda, generally had the upper hand and went from victory to victory.

Reaction or Rabbinism —Saadia.

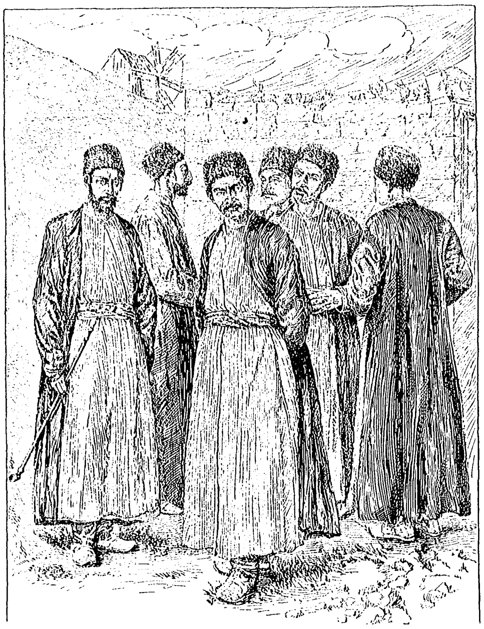
At the end of the ninth and in the tenth century, however, there was a decided change, for several rabbinical scholars took up the study of the Biblical books, Hebrew grammar, and secular science, as in the case of Saadia's teacher Abu Kathir Yaḥya ibn Zakariyya of Tiberias (d. 932), David ibn Merwan al-Muḳammaṣ, and other Jewish scholars of that time. Men like these, who were well fitted to take up the systematic defense of their belief, presumably did engage in that work. Thus it has recently been discovered that a Palestinian scholar, Jacob b. Ephraim by name, of the beginning of the tenth century, wrote at least one polemic in Arabic against Karaism and in behalf of Rabbinism, and he probably was not the only one in the field. All these Jewish scholars, however, were eclipsed by Saadia al-Fayyumi (892–942), who subsequently became famous as the director of the Academy of Sura. As in many other branches of Jewish science, he was successful also in his polemics against the Karaites, which he began in 915, returning to the subject again in 926, and also, probably, later. Thanks to his forceful intellect and his scientific attainments, he entirely averted the danger threatening traditional Judaism and assured its victory over Karaism; he has therefore been the object of attack by all the leading Karaite writers, even of later periods. Saadia's pupils followed in his footsteps. One of these, Jacob b. Samuel (*c.* 950), wrote polemical works in Hebrew, and possibly also in Arabic, against the Karaites, calling forth replies by Sahl and Yafith.

With the beginning of the second half of the eleventh century the field of Karaite activity was transferred from Asia to Europe by Abu al-Faraj Furḳan's (Jeshua b. Judah's) pupils from Spain and Byzantium. Karaism had been introduced into Spain by a certain Ibn Altaras, who carried it to Castile, where his successors, and chiefly his widow (!), apparently were too outspoken in their attacks upon Rabbinism, for the new heresy was soon suppressed by two influential Judæo-Spanish statesmen—Joseph Farissol and Judah ibn Ezra. This is the sole instance in Jewish history where the temporal powers interfered on behalf of the faith. This ephemeral appearance of Karaism on Spanish soil was fruitful for Jewish historical literature, for it induced the philosophically trained Abraham ibn Daud of Toledo to write his "Sefer ha-Ḳabbalah" (1161), which is invaluable for the history of the Jews in Spain. The new sect enjoyed a longer life at Byzantium. Two pupils of Abu al-Faraj of Constantinople, Tobias b. Moses (called "the Translator") and Jacob b. Simon, devoted themselves after their return home to translating into Hebrew the Arabic works of their teacher Abu al-Faraj Furḳan, those of the latter's teacher Yusuf al-Baṣir, and other works, adding glosses of their own and their teacher's replies to their questions.

It seems that these scholars in turn had pupils and imitators. Although the translators were very unskilful, interpolating many Arabic or Greek words and phrases, their work was yet important for the European Karaites, who were unacquainted with Arabic. Karaism owes to these translations

Karaism in Europe.

its original Hebrew style—on the whole an acquisition of doubtful value—and the appearance of its leading European exponents. Among these are Judah Hadassi (beginning in 1149), Jacob b. Reuben (12th cent.), Aaron b. Joseph (end of the 13th cent.), Aaron of Nicomedia (about the middle of the 14th cent.), Elijah Bashyaẓi and his brother-in-law Caleb Afendopolo (second half of the 15th cent.), and Moses Bashyaẓi (first half of the 16th cent.). The first-named is the author of the "Eshkol ha-Kofer," a comprehensive work in the form of a commentary on the Decalogue, arranged alphabetically and in acrostics, and written in quasi-rime, all sentences riming with "kaf." As the author intended this to be a kind of encyclopedia, he not only included all the opinions and doctrines of religious law of Karaite authors known to him, together with the continual attacks upon the Rabbinites, but he also covered the entire field of Karaite dogmatics, religious philosophy, hermeneutic rules, Hebrew grammar (with unacknowledged borrowings from Ibn Ezra's grammatical works), etc.; he included also passages relating to natural science, partly fabulous, from Arabic and Byzantine sources. This work was until recently the chief authority for information regarding the earlier Karaite writers, and it has still some value, although the original sources of a large portion of the encyclopedia are now accessible. Hadassi composed, in addition, a few smaller works, including a compendium of the Karaite religious laws, of which there have been preserved only fragments—unless these fragments represent all that the author had accomplished. Jacob b. Reuben, whose birthplace and circumstances of life are unknown, used, in his Hebrew commentary on the Bible ("Sefer ha-'Osher"), the exegetical works of Yafith, Abu al-Faraj Harun, Abu al-Faraj Furḳan, and 'Ali ibn Sulaiman. As the last-named flourished at the end of the eleventh and the beginning of the twelfth century, Jacob can not have written his book before the twelfth century. He consulted also Ibn Janaḥ's lexicon. The Greek words occurring in his commentary point to his Byzantine origin; he frequently uses the current technical terms of the Byzantine Karaite translators, although his Hebrew style is in general more fluent and developed.



Karaite Types.
(From Artamof, "La Russie Historique," 1862.)

Aaron ben Joseph (called "the Elder") is more independent in his exegesis than his predecessor, although in his Bible commentary ("Sefer ha-Mibḥar") he follows earlier scholars, chiefly Ibn Ezra, whose pregnant style he endeavors to imitate. He often quotes early rabbinical views, without polemical intention, salving his Karaite conscience with the saying of Nissi b. Noah (a Karaite author of Persia; 11th cent.) that it was obligatory upon the Karaites to study early rabbinical literature, as the larger part of their teachings was based on the true national tradition (on his theology see Jew. Encyc. i. 14-15). He is also highly esteemed for his arrangement of the Karaite liturgy, being called "the Holy" by his coreligionists in recognition of this work. Nothing is known of the circumstances of his life except that he disputed in 1279 at Solchat (now Stary Krüm), then the Tatar capital in the Crimea, with the Rabbinite Jews of that city, and that fourteen years later, in 1293, he wrote his commentary on the Pentateuch. He probably lived at Constantinople.

Aaron ben Elijah.

Aaron ben Elijah of Nicomedia (called "the Younger") was born in 1300 at Nicomedia, in Asia Minor. He composed his first work, dealing with religion and philosophy, entitled "'Eẓ Ḥayyim," in 1346; his second work, the Karaite code, entitled "Gan 'Eden," in 1354; and the "Keter Torah," a commentary on the Pentateuch, in 1362. Some liturgical and secular poems by him or relating to him are printed in the Karaite prayer-book and in the editor's preface to his works. His system of religious philosophy, in which, while imitating Maimonides, he attempts to refute his "Moreh Nebukim," is discussed by Franz Delitzsch in the introduction to "'Eẓ Ḥayyim" and in Jew. Encyc. i. 9–10. Aaron's return to Yusuf al-Baṣir's Motazilism, for Karaite patriotic reasons, in opposition to the Judæo-Spanish Aristotelianism, must be considered as a retrogression. His above-mentioned code was entirely displaced by the works of his successors, especially of Bashyaẓi, this being the common fate of the earlier codifiers.

Elijah b. Moses Bashyaẓi (1420–90), the scion of a family of Karaite rabbis, studied first with the famous rabbinical scholar Comtino, from whom he derived his love for secular science. In 1460 he began to officiate as a Karaite rabbi, first as the successor of his grandfather and father in his native city, Adrianople, and then in Constantinople, where he founded a kind of Karaite academy. In his chief work, the Karaite code of laws ("Adderet Eliyahu"; for its contents see Jew. Encyc. ii. 574–575), he collected all the views known to him of Karaite legalists, attempting to glean and harmonize the most expedient of them. And he likewise endeavors to justify, by means of Nissi's saying, quoted above, the Karaite borrowings from Rabbinism. This work, written in the last decades of the fifteenth century, left incomplete by the author, and then partially continued by his brother-in-law and pupil, Afendopolo, is still considered by the Karaites as the final and most important authority in religious matters. Elijah carried on an extensive correspondence with his coreligionists in eastern Europe, and at his instance several young Karaites from Lithuania and southern Russia were sent to Constantinople to be educated by him. In the Imperial Public Library at St. Petersburg there are several polemical letters by Bashyaẓi against contemporary rabbinical scholars, and some which he induced his brother-in-law Afendopolo to write (see "Ḥadashim gam Yeshanim," i., No. 2, pp. 13–16).

Caleb Afendopolo.

Caleb b. Elijah Afendopolo (end of the 15th cent.) lived first at Adrianople, and subsequently in Constantinople. He is the author of various theological, homiletic, mathematico-astronomical, and polemical treatises, and liturgical and poetical works. His moderate attitude toward Jesus he borrowed from Hadassi, who in turn had borrowed it from Ḳirḳisani; this attitude had previously been taken by the heresiarch Abu 'Isa and, following him, by Anan, to attract the good will of the Mohammedans, who worship Jesus as a prophet. His poetic compositions contain interesting details of contemporaneous history—as the references in the elegies (in "Gan ha-Melek") to the expulsion of the Jews from Spain (1492) and Lithuania (1495); in the "Patshegen Ketab ha-Dat" to the forcible transposition of the Jews of Adrianople and Provato to Constantinople (1455)—and various personal details referring to contemporary Karaites, Karaite customs and observances, etc.

Moses b. Elijah Bashyaẓi (1544–72), great-grandson of the above-mentioned Elijah Bashyaẓi, was a man of great mental activity, who in a short life of twenty-eight years (later Karaites say eighteen years) produced a goodly number of works (on his literary activity see Jew. Encyc. ii. 575–576). On his travels through the East, especially Egypt, he had the opportunity of learning Arabic, becoming acquainted with various old Karaite works in the Arabic original, and translating passages from them into Hebrew. He succeeded in finding and copying fragments of Anan's code, though it seems not in their original form. He also studied rabbinical literature. These favorable opportunities, however, did not improve his historical judgment, for he, too, blindly accepted the untruthful inventions of the later Karaites as well as their spurious genealogies.

The Byzantine Period.

Abraham ben Jacob Bali, contemporary of Elijah Bashyaẓi, and his opponent in the question of the burning of candles on Friday evening, and Judah Gibbor, a liturgical poet of the beginning of the sixteenth century, are also of some importance in the Karaite literature of the Byzantine period; as also are Judah Poki Tchelebi (*c.* 1580), author of "Sha'ar Yehudah," on marriage prohibitions among the Karaites, and others. The friendly intercourse between Byzantine Rabbinites and Karaites during the fifteenth and sixteenth centuries is noteworthy, the latter not seldom being instructed by Rabbinic Jews. Comtino's pupils have been mentioned above; Abraham Bali studied with the Rabbinite Shabbethai b. Malchiel. Afendopolo refers to a Karaite ceremony (1497), on the occasion of the dedication of a Pentateuch roll, in which several Rabbinites took part. The more moderate views regarding the Karaites held by the famous rabbi of Constantinople, Elijah Mizraḥi, are known from his responsa; nor was he the only rabbi holding such views, for as early as the beginning of the fourteenth century Shemariah of Crete endeavored to incorporate the Karaites with the Jewish nation.

The Oriental Karaites were rapidly declining during the Byzantine period, especially after Moses Maimonides went to Egypt, at that time the chief seat of Karaism in the East. Although this famous scholar was on the whole tolerant toward the Karaites, permitting, for instance, the Rabbinite Jews to circumcise Karaite children on Saturday according to the rabbinic ritual, he yet endeavored to keep Karaite influences away from his congregation and to abolish the Karaite customs which had crept in among the ignorant Jews. Maimonides' influence on the Oriental Karaites was so great that his code (under the title of "Ḥibbur," without any specification) is often quoted as a fully recognized authority in the Karaite religio-legal works of that time. The authority and reputation which Maimonides enjoyed among the Jews and Mohammedans had a depressing and disintegrating influence on Oriental Karaism; the few Oriental writers of that period were frequently obliged to borrow from the Byzantine authors the same material which the latter had previously borrowed from the earlier Oriental Karaites. Henceforth Karaism, of course, could no longer gain ground by new acquisitions; on the contrary, various Karaite communities in Egypt, Palestine, Syria, Babylonia, Persia, and northern Africa gradually disappeared, partly by being converted to Islam—in itself a sign of internal weakness and intellectual decay—but mostly through being annexed by Rabbinism. Estori Farḥi mentions a wholesale conversion of Egyptian Karaites to Rabbinism in 1313, when a descendant of Moses Maimonides was Jewish governor ("nagid").

Lithuanian Epoch.

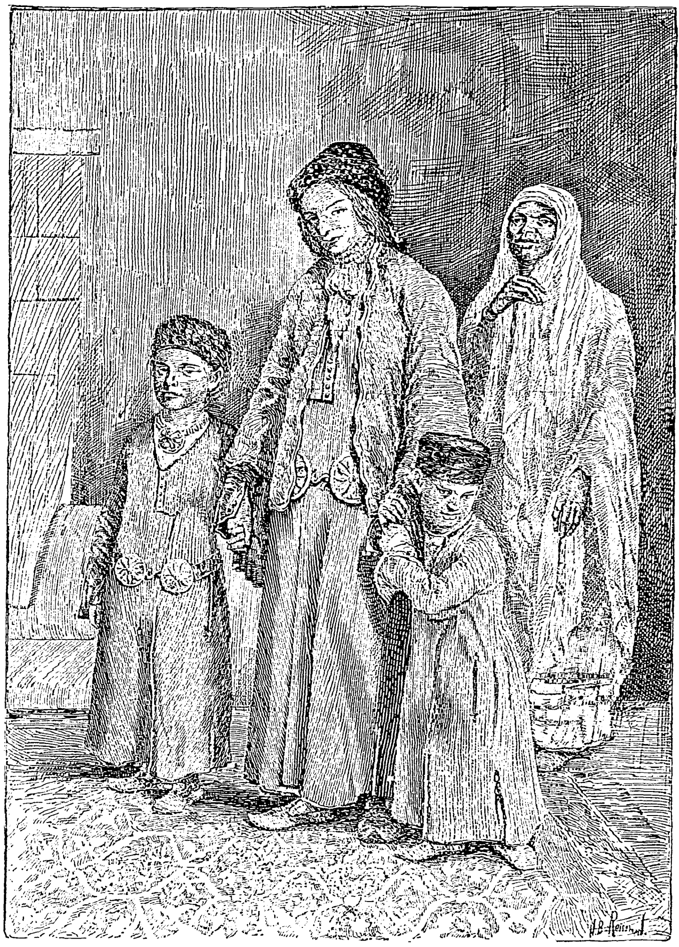
The third and last epoch of Karaism is the Lithuanio-Russian epoch. As early as the twelfth century the traveler Pethahiah of Regensburg found Ananite rigorists in southern Russia, occupied at that time by Mongolian Tatars. After the Taurian peninsula was conquered by the Mongols in the thirteenth century, several Oriental Rabbinites and Karaites, and the so-called "Krimchaks," settled there. The epigraphs at the end of some Pentateuch rolls now in the St. Petersburg Imperial Public Library, and dating from the fourteenth century, are the earliest Crimean documents. At the end of that century the Lithuanian grand duke Witold settled some Crimean Karaites, together with captive Crimean Tatars, as colonists in Lithuania. A part of the city of Troki, in the government of Wilna, was assigned to these settlers, whence some of them subsequently emigrated to other Lithuanian cities, to Lutsk, in Volhynia, then belonging to Lithuania, and to Halitsch, in Galicia. These Karaites, on coming in contact with the European Rabbinites and developing their literary taste, began to correspond with their Byzantine coreligionists, and at the end of the fifteenth century Lithuanian pupils were studying with Elijah Bashyaẓi.

The Karaites of Troki were the first to achieve distinction, among the most noteworthy of them being Isaac b. Abraham Troki (1533–94), pupil of Zephaniah Troki and author of the well-known anti-Christian "Ḥizzuḳ Emunah" (1593), which was completed by his pupil Joseph Malinowski. This work evidences the author's acquaintance with the doctrines of the Christian churches and sects, Isaac acquiring this knowledge chiefly through his acquaintance with the clericals and theologians of the various Christian confessions. Apart from this book, which in Wagenseil's Latin translation made the author's name famous, Isaac's work is unimportant, including only some liturgical hymns, and compendiums of the religious laws in Aaron ben Elijah's "Gan 'Eden." His above-mentioned pupil, Joseph Malinowski of Troki, produced the same kind of mediocre work. Zerah b. Nathan, a contemporary and correspondent of the polyhistor Joseph Solomon Delmedigo, studied mathematics and physics, and by his questions induced Delmedigo to write the "Iggeret Aḥuz." Solomon Troki wrote for Professor Puffendorf a detailed treatise on Karaism entitled "Appiryon" (*c.* 1700), and also some polemical essays against Rabbinism and Christianity. Abraham ben Josiah of Jerusalem, who lived in the Crimea, was also probably a native of Troki; he is the author of a work on Karaite dogmatics which contains many polemical passages against Rabbinism ("Emunah Omen," 1712).

The example of the Karaites of Troki was followed by the Karaites in Galicia and Volhynia, and by some in the Crimea, most of the latter having come from the two former countries. Among the best-known of these is Mordecai b. Nisan Kokisow, who replied to questions regarding the nature of Karaism addressed to him by the Swedish king Charles XII. ("Lebush Malkut") and by Professor Trigland ("Dod Mordekai," 1699), these answers, in the commonplace Karaite style, being for the greater part compilations from Afendopolo and Moses Bashyaẓi. Simḥah Isaac Lutski (flourished *c.* 1740–1750) went from Lutsk to the Crimea, where he composed his works, compiling a bibliographical summary of Karaite literature ("Oraḥ Ẓaddiḳim"), which is noteworthy as a first attempt in this direction, in spite of its many shortcomings. Isaac b. Solomon, Karaite ḥakam living at Chufut-Kale in the beginning of the nineteenth century, wrote several books, including a work on Karaite dogmatics ("Iggeret Pinnat Yiḳrat"), and a work on calendar science ("Or ha-Lebanah") after Immanuel's "Shesh Kenafayim." Joseph Solomon Lutski, ḥakam at Eupatoria in the third and fourth decades of the nineteenth century, annotated the works of both the Aarons, and wrote an account of the exemption of the Russian Karaites from military service ("Teshu'at Yisrael," 1828), and some hymns. The publication of several earlier Karaite works, part of them for the first time, is due chiefly to him. David b. Mordecai Kokizow wrote on calendar science and Karaite marital law, and also composed liturgical hymns and various treatises ("Ẓemaḥ Dawid," ed. 1897). Mordecai b. Joseph Sultanski, ḥakam at Chufut-Kale in the fifth and sixth decades of the nineteenth century, is the author of two works, "Petaḥ Tiḳwah" and "Teṭib Da'at" (1857–58). Solomon Beim, ḥakam at Odessa, wrote in Russian a historical treatise on Chufut-Kale and the Karaites (1862), in which the spurious and forged documents are treated as genuine history. Elijah Kasas published Hebrew poems ("Shirim Aḥadim," 1857) and a Hebrew grammar in the Tatar Karaite dialect ("Le-Regel ha-Yeladim," 1869), and translated various works from the French. Judah Sawuskan published two works by Aaron ben Elijah of Nicomedia, for which he wrote introductions (1866); some Hebrew essays and poems by him have also been printed in Hebrew periodicals.

Abraham Firkovich.

All these writers were, however, surpassed by Abraham Firkovich (1786–1874), whose literary activity covered nearly fifty years, and who calls for more extended notice, because his name is closely associated both with the development of Karaite science and with one of the greatest historical forgeries. The finding of Karaite antiquities in the Crimea happened as follows, according to impartial accounts (comp. Harkavy, "Altjüdische Denkmäler aus der Krim," 1876, pp. 206 *et seq.*): When Emperor Nicholas I. visited the Crimea for the first time, in 1836, the governor-general of southern Russia, Prince Michail Woronzow, undertook to restore and furnish in truly Oriental style the old castle of the khans at Bakhchiserai. He entrusted the necessary purchases to the Karaite merchant Simhah Bobowitsch, a man of affairs who had business relations in Constantinople. Bobowitsch went to that city and received during an audience with the sultan permission to select what he needed from the sultan's castles and warehouses. On his return to Bakhchiserai, Bobowitsch also had charge of furnishing the castle, remaining even after the czar had arrived. At that time a deputation of the Crimean Rabbinite Jews (the Krimchaks) was presented to the czar, and, like the other natives of the Crimea, they submitted their petition to be released from military service. The czar asked the delegates: "You believe in the Talmud?" "Yes, your majesty; we believe in it," they replied. "Then you must furnish soldiers," the czar replied curtly. On this occasion Prince Woronzow said to Bobowitsch: "You see, Bobowitsch, that you Karaites have done a very sensible thing in cutting loose from the Talmud; when did this happen?" Bobowitsch thereupon replied that the Karaites never had had anything to do with the Talmud, that their religion was older than the Jewish religion, that the Karaites had taken no part in persecuting and crucifying Jesus, and made other statements current among the Karaites. "Can you prove this?" asked the prince. "Certainly," replied Bobowitsch.



Karaite Mother and Children.

(From Artamof, "La Russie Historique," 1862.)

When subsequently, in 1839, a society for history and antiquities was formed at Odessa, Woronzow remembered Bobowitsch's promise. Bobowitsch had in the meantime been elected chief of the Crimean Karaites, and commissioned his tutor Firkovich, who was known as an inveterate foe of Rabbinism, to furnish the necessary documents proving the great age of Karaism, especially in the Crimea, giving him, in addition to traveling expenses, a definite salary while occupied in this work. He furthermore procured for Firkovich an authorization from the government to collect all the necessary records and historical documents among the Karaites and Jews. Armed with this authority Firkovich traveled through the Crimea and the Caucasus; he took from their owners whatever documents he deemed necessary, plundering especially the rabbinic Krimchaks; fabricated various epitaphs (among them that of Isaac Sangari and his wife) and epigraphs in manuscripts; tampered with the dates of documents, and interpolated the names of Crimean localities and Karaite personages in many of them. He did all this for the sole purpose of representing the Karaites in the Crimea as a highly developed people dwelling there since the time of the Assyrian king Shalmaneser, in the seventh century B.C., and of proving that the Rabbinite Jews owed all their culture to the Karaites, especially Hebrew grammar, punctuation, Masorah, poetry, etc. Extravagant and surprising as these alleged facts seem nowadays, they yet found credence at that time in Russia, especially in government circles, though not for unselfish reasons. Attempts were even made to defend these forgeries on quasi-scientific grounds. They paved the way for the emancipation of the Russian Karaites, who according to the alleged documentary evidence were shown to have lived in Russia long before the birth of Jesus, and had therefore taken no part in the cru-

The Argument from Antiquity.

cifixion. This argument, however, is not original with the Karaites, for it is well known that various old Jewish communities in Spain and Germany brought it forward in their defense during the Middle Ages. In several cases the Russian Karaites had resorted to it previously, of course backing it with silver, to advance their separation from the Rabbinites—in 1795, for instance, when they were exempted from the double taxation imposed upon the Rabbinite Jews at the instance of the venal Count Zubow, and in 1828, when they were exempted from military service. But in general they were considered in Russia, as everywhere else, as a relatively late Jewish sect, until Firkovich, on the strength of his "discoveries," renounced all connection with Jews and Judaism, and even with the name of "Hebrew," claiming the name of "Russian Karaite." Thanks to his labors and pretensions, which, as was then customary, were accompanied by considerable gifts to influential persons, the Russian Karaites received full civic liberty in 1863, which was confirmed with special emphasis in 1881 by the well-known anti-Semitic minister Nicholai Ignatieff.

The recognition of the human and civic rights of the followers of any confession need not be deprecated; yet it is deeply to be regretted that the foremost champions of the rights of the Russian Karaites and their Christian fellows at the same time endeavored, and still endeavor, to cast slurs upon Judaism and to vilify the Rabbinite Jews, emphasizing the weak points of Rabbinism in order to show the alleged superiority of Karaism to better advantage. This inimical attitude of Russian Karaism and its paid protectors was occasioned by Firkovich. Nevertheless, it must be noted that Firkovich, with his industry in collecting much valuable material, rendered great services not only to Karaite literature (the material discovered by him and edited scientifically by S. Pinsker and others marking an important epoch of this literature), but also to the history and literature of the Rabbinite Jews and Samaritans. In conclusion it may be observed that Karaism, in opposing and criticizing the party of the Rabbinites, has done good service to the latter. The Karaites are estimated to number about 10,000 in Russia and about 2,000 in other countries.

Firkovich's collection of Tatar documents and Russian laws for Karaites (1891, with introduction by a Judæophobe entirely incompetent to deal with the subject). Karaite texts have been edited also by Franz Delitzsch, Bargès, Margoliouth, Poznanski, Schreiner, and others. Statistical notes are given by Frankl in Ersch and Gruber, *l.c.*, to which the notes in Schudt's *Jüdische Denkwürdigkeiten* must be added. On the latest organization of Karaite religious matters in Russia see *Entziklopedicheski Slovar*, xiv. 431–432.

K. A. H.

Rules of Cleanliness.

Karaism is not, as asserted by its opponents, the outcome of mere personal ambition, but the natural reaction and counter-movement against Talmudism brought to a state of stagnation in the Saborean and early geonic period. In pointing to the written Law or Scripture as the only divine source of authority, it gave to Judaism a healthy stimulus in the direction of renewed Bible study and research and inaugurated a new epoch in Jewish history. Its weakness, however, consisted in its being an altogether retrogressive movement, deriving support from remnants, literary or otherwise, of seemingly long extinct Sadducean and Essene doctrines, and ignoring the progressive element represented by the rabbinic Halakah, in favor of Sadducean adherence to the letter of the Law (see Geiger, "Gesammelte Schriften," iii. 283 *et seq.*; Grätz, "Gesch." iii. 413–429). However bold and original Anan's combination of the Sadducean and rabbinic methods in his system of hermeneutics, the longing for the past glory of Zion, for the restoration of the Temple with its sacrificial and Levitical laws of purity, lent Karaism a somber, ascetic, and world-shunning character. "Only when and where wine and meat can be offered upon the altar may they be used at the table," was made the maxim of the Karaite "mourner for Zion," even though later Karaism did not adhere to it (Harkavy, "Liḳḳuṭe Ḳadmoniyyot," ii. 1903, Nos. 4, 128, 138); jurisdiction in civil as well as in criminal cases, outside the Holy Land, is suspended, though he who does not act in conformity with the Law should be excommunicated (Nos. 14–18); perfect separation from the Gentiles is enjoined, and no meal prepared in any form by them should be eaten (Nos. 6–7, 196). Rigorous Essene rules are inculcated in regard to married life; menstrual fluid, human excrement, blood, and any other unclean issue must be covered with earth; privies must be kept distant from the limit of human dwellings; ablution of both hands and feet after every casement of the body, and before entering the synagogue or reading from the Law, is required; both the water and the laver must be kept holy (Nos. 22, 26–34, 130, 200–204). None is allowed to enter the synagogue or read from the scroll of the Law with shoes on his feet, or after having taken wine; to irreverent treatment of a single Law there is attached the penalty of death by God's hand or of excommunication by man (Nos. 13–17, 21–22, 198). Tefillin are not recognized as Biblical, Deut. vi. 8 and xi. 18 being taken symbolically; all the more sacredness is ascribed to the ẓiẓit, which must be twisted, spun, and attached by an Israelite expressly trained for the purpose (Nos. 8–10, 196). Circumcision must be performed by a Jewish believer, with a consecrated instrument (scissors), and after the person has been consecrated; for proselytes the eighth, and for other adults the eleventh, day of the month is set apart, and in the case of both Periah is omitted (Nos. 75–89).

Regarding the Sabbath, the rules enforced are the same as those of the Samaritans and Falashas, and as those prescribed in the Book of Jubilees: No light or fire is allowed; marital intercourse and leaving the house are forbidden (later, it was permissible to go as far as 2,000 yards); light burdens, however, may be carried in the hand (No. 69). No kind of work may be done by a non-Jew for a Jew (No. 189). The act of circumcision on the eighth day should be performed upon the child at the close of the Sabbath, so that the work of healing may take place on Sunday (Nos. 76–77); nor may the Passover lamb be sacrificed on a Sabbath (Nos. 72, 130). All work except preparation of food is prohibited also on the holy days; so is the slaughtering of animals (No. 74). The "mazzah," as the bread of affliction, should be made of barley (Nos. 129, 133). Shabu'ot must always be observed on the day after Sabbath, as the Sadducees and Samaritans interpret the Biblical "the morrow of the Sabbath" (Lev. xxiii. 16). The "Sukkah" should be made of the plants mentioned in Lev. xxiii. 40 and Neh. viii. 15. The 1st of Tishri is a day of "contrition," not of the blowing of the shofar; the beginning of the year is the 1st of Nisan; and a second Shebaṭ (not Adar) is the intercalary month in a leap-year. Ḥanukkah is not celebrated; Purim is a two days' fast; and there is a seventy days' fast in remembrance of the Haman persecution, and a fast on the seventh day of every month (Nos. 130, 149; the source is unknown as yet). Instead of the 9th, the 10th of Ab is the fast-day in memory of the destruction of Jerusalem. The New-Moon is fixed by observation.

Marriage and Dietary Laws.

The levirate marriage is extended to the wife or rather the betrothed of any deceased relative (Nos. 106–112); the refusal to marry her entails "nezifah" (seven days' confinement). Both man and woman must be willing, as in any other marriage (No. 113). The number of incestuous marriages in Lev. xviii.–xx. (to which popular or Soferic rule added "secondary incests"; "sheniyyot"; Yeb. ii. 4; Tosef., Yeb. iii. 1; Yeb. 21a, b) Karaism extended upon the principle of equal relationship of the agnates and cognates in the ascending and descending scales ("rikkub"), so that later authorities opposed the prohibitive system as unbearable; in regard to a niece, however, Anan was less rigorous (Nos. 90–106, 129). Priestly sanctity is attached to the rite of slaughtering (No. 57; but see No. 144); none but a perfectly healthy animal is permitted; defiling contact with the carcass must be avoided. Among fowls, for which the sacrificial "meliḳah" (the pinching off of the head with the nails) is prescribed, only the dove and the turtle-dove should be eaten; the male bird is forbidden (Nos. 141, 144, 155, 159, 164, 188). The prohibition against the eating of the ischiatic sinew (Gen. xxxii. 33; Ibn Ezra, *ad loc.*) or of meat with milk is not recognized as Biblical (Ex. xxiii. 19; No. 151; see Ibn Ezra, *ad loc.*); all the more importance is attached to the prohibition against mixing together wool and linen and other stuffs ("shaaṭnez" and "kila'im"; Nos. 5, 195).

Liturgy.

Tithes should be given from everything the soil offers, including metals (No. 131). God alone should be sought as physician, and no human medicine should be resorted to (No. 148). Before and after reading from the Law, as well as before and after eating and drinking, benedictions are recited, but always with reference to Zion (Nos. 12–19). Instead of the traditional liturgy, the Psalms of David and other portions of the Bible should be used for prayer and song, and the Law should be read each day (Nos. 20, 158, 200). Simple Hebrew formulas for divorce (No. 119) and for the marriage ceremony are prescribed (No. 112).

In the course of time the innovations of Anan have been greatly altered and modified, and later Karaism adopted many rabbinical customs. The liturgy especially, originally based more or less upon the Temple "Ma'amadot," was greatly augmented and enriched by compositions made after the pattern of the Rabbinite liturgy. On the whole, Karaism lacks the element of poetry and inspiration, and is merely imitative when it is not in opposition. Instead of the thirteen Maimonidean "articles of faith," Karaism, since Judah Hadassi, has had only ten. See Articles of Faith. K.

KARAMZIN, W. M. See Russia.

KAREIS, JOSEF: Austrian electrician and deputy; born at Semic, Bohemia, Feb. 14, 1837; studied at the technical institute in Prague. From 1858 till 1896 he was in the service of the state, first in the department for triangular survey in Tyrol and Croatia until 1863, and thereafter in the telegraph service in nearly all the provinces of Austria. When electrotechnics first became known, Kareis devoted himself to its study, and from 1883 to 1896 edited the "Zeitschrift für Elektrotechnik." He also wrote several treatises on the subject, founded the Elektrotechnische Verein in Vienna, and busied himself with many undertakings along this line. He represented his native country in 1883 as secretary of the Internationale Elektrische Ausstellung in Vienna, and in 1889 as vice-president of the International Electrotechnical Congress in Paris.

From 1890 to 1896 Kareis represented Leopoldstadt in the city council, and from 1897 until the end of 1899 was delegate from the same district to the Reichsrath.

KARET. See Excommunication.

KARFUNKEL, AARON BEN JUDAH LÖB HA-KOHEN: Bohemian rabbi. After having successively filled the rabbinates of Gawartschew, Lask, Dasparschi, and Widowa, he was called in 1801 to Nachod, where he remained until 1806. Karfunkel was the author of "She'eltot ABiYaH," containing dissertations on Talmudical subjects, and divided into twelve parts, having for their respective titles the names of the precious stones in the high priest's breastplate. Of these parts only two have been published (Berlin, 1806). They are divided into "kelalim," subdivided into paragraphs, with glosses entitled "Millu'at Eben" and dissertations called "Meshuaḥ Milḥamah." Karfunkel was the author also of "Ẓanif Ṭahor," a commentary on Ecclesiastes, a manuscript of which is in the British Museum.

Bibliography: Fürst, *Bibl. Jud.* ii. 171; Zedner, *Cat. Hebr. Books Brit. Mus.* p. 409.

KARFUNKELSTEIN, SIEGFRIED: German soldier; born at Beuthen, Silesia, Feb. 21, 1848; died on the field of battle at Le Bourget Oct. 30, 1870. He volunteered in 1866 and went through the Six Weeks' war. In the Franco-Prussian war he distinguished himself so conspicuously that on Oct. 28, 1870, he was decorated with the Iron Cross of the second class. Two days later he was mortally wounded while rescuing the regimental flag from the hands of the enemy. He was, however, able to hand it to General Budrisky.

Bibliography: *Juden als Soldaten*, 1897, p. 104.

s. J.

KARGAU, MENDEL: German Talmudist; born 1772 at Prostibor, Bohemia; died 1842 at Fürth. He was a disciple of Ezekiel Landau in Prague and of Phinehas Horwitz in Frankfort-on-the-Main. He lived for some years in Paris, where he was in business as a merchant; the rest of his life he passed in Fürth, where by his lectures he greatly promoted the study of the Talmud. His work "Giddule Ṭohorah," edited after his death by Jonah Rosenbaum and Anschel Stern (later chief rabbi of Hamburg), treats of the laws relating to the ritual bath ("mikweh"). In 1840 he celebrated in a Hebrew poem the return of Sir Moses Montefiore from Damascus.

KARIGEL. See Carregal.

KARLIN. See Pinsk.

KARLSBAD: Town in Bohemia; famous for its mineral springs; first made popular by the emperor Charles IV. in 1350. When King Ladislaus II. confirmed, in 1499, the privilege granted to the town by Charles IV., he added, "as an especial favor," that no Jew should be allowed to settle there; this feature in the privilege remained in force until 1793, when the emperor Francis II. enjoined the city to obey the general laws of the country in its attitude toward the Jews; the city, however, paid little attention to this new decree. The "Patent" of Feb. 18, 1860, removed most of the Jews' disabilities. The records and documents of the town give ample evidence of the rigor with which it opposed the settling of the Jews within its walls. The neighboring Jews of Lichtenstadt especially made many futile efforts to enter. Although they were permitted to stay at Karlsbad during the summer on pedlers' licenses or for treatment, no Jew was allowed there from Sept. 15 to May 15 except for treatment and with a physician's certificate, the police being commissioned to pay special attention to such "winter Jews." The only other exception was in favor of the farmer of the government tobacco monopoly. In 1830 the restaurant-keeper David Moser of Lichtenstadt succeeded in obtaining permission, not from the city, but from the government, to settle at Karlsbad for the sake of the Jews who might repair to the city during the winter for treatment. But down to 1860 the other Jews doing business in Karlsbad lived at Lichtenstadt.

In 1847 philanthropists of Prague, by special permission of the government, founded the first Jewish hospital at Karlsbad. In this hospital services were held on Sabbaths and festivals, notwithstanding the objections of the municipal authorities; the hospital became, also, the meeting-place of the first Jewish families settling after 1860. The first rabbi of the growing community, Dr. J. H. Oppenheim, was elected in 1870. He was succeeded by Dr. Rudolf Plaut (1872–82), Dr. Nathan Porges (1882–88), and Dr. Ignaz Ziegler (present incumbent). The synagogue was dedicated in 1877. In 1901 the community founded the Kaiser Franz Josef Regierungs-Jubiläum Hospiz, which was opened May 1, 1903. The societies include a B'nai B'rith lodge, a women's philanthropic society, several religious and educational societies, a choral society in connection with the synagogue, and a Zionist society. In 1903 the community numbered 500 tax-paying members.

D. I. Z.

KARLSRUHE (CARLSRUHE): German city; capital of the grand duchy of Baden. Jews began to settle there soon after its foundation (1715) by Margrave Carl Wilhelm of Baden-Durlach; they were attracted by the numerous privileges granted by its founder to settlers, without discrimination as to creed. Official documents attest the presence of several Jewish families at Karlsruhe in 1717. A year later the city council addressed to the margrave a report in which a question was raised as to the proportion of municipal charges to be borne by the newly arrived Jews, who in that year formed an organized congregation, with Rabbi Nathan Uri Kohen of Metz at its head. A document dated 1726 gives the names of twenty-four Jews who had taken part in an election of municipal officers. As the city grew permission to settle there became less easily obtained by Jews, and the community developed more slowly.

In 1750 there were seventy-five Jewish families in Karlsruhe; in that year Nathan Uri Kohen died, and was succeeded in the rabbinate by Jacob Nathanael Weil, who held the office until 1769. A memorable date in the annals of the Jews of Baden, especially memorable to the Jews of Karlsruhe, was the year 1783, when, by a decree issued by Margrave Carl Friedrich (1746–1811), the Jews ceased to be serfs, and consequently could settle wherever they pleased. The same decree freed them from the "Todfall" tax, paid to the clergy for each Jewish burial. In commemoration of these happy changes special prayers were prepared by the acting rabbi Jedidiah Tiah Weill, who, succeeding his father in 1770, held the office until 1805.

In 1808 the government issued regulations concerning the administration of the spiritual affairs of the Jewish community, by which the chief rabbi of Karlsruhe became the spiritual head of the Jews of the country. The first chief rabbi was Asher Löw, who was nominated in 1809 and held the office until 1837. The community of Karlsruhe took a leading part in the long struggle for the emancipation of the Jews of Baden, which ended successfully in 1860: at that time the community numbered 1,062 persons. A new synagogue was erected in 1875; its services are liberal in tendency. Since the death of Asher Löw, the office of chief rabbi has been successively held by Elias Willstädter, Adolf Schwarz, and Meyer Appel. About 1870 the Orthodox members seceded and formed an Israelitische Religionsgesellschaft, with a roll of about one hundred families, the present (1904) rabbi of which is **Sinai Schiffer.** Karlsruhe has a population of 94,030, including about 2,300 Jews.

E. C. I. Br.

——**Typography:** The first Hebrew book issued at Karlsruhe was printed in 1755 in Jacob Held's printing establishment; it was the chief work of Rabbi Nathanael Weil and was known as "Ḳorban Netanel." In 1757 the same establishment printed Hezekiah da Silva's commentary on the first part of the Shulḥan 'Aruk. After Held's death the privilege went to his young children, for whom Lotter conducted the business, issuing in 1763–77 several valuable works, including Jehiel Heilprin's historical work and two books by Jonathan Eybeschütz. When Lotter fled from his creditors in 1777, the court printer Michael Maklot, and Judah Löw Wormser, a printer employed formerly by Lotter, contended for the latter's privileges. After eighteen years the matter was decided in Wormser's favor, who printed chiefly ritual and Biblical works. The "Privileged Hebrew Printing-Press" was discontinued in 1793, but was afterward started again by an enlarged company, which continued printing until 1839. From 1814 David Raphael Marx conducted a second "privileged press," which in 1836 issued the Rosenfeld-Willstätter edition of the Bible. Since 1839 Marsch and Vogel have printed Hebrew books at Karlsruhe.

KARLSTADT. See Croatia.

KÁRMÁN, MORITZ (originally **Kleinmann**): Hungarian educator; born Dec. 25, 1843, at Szegedin. He was brought up under the influence of Leopold Löw. While preparing for the rabbinical career he studied philosophy and philology at the University of Budapest (Ph.D. 1866). Deeply interested in pedagogics, he was sent (1869) by the minister of education, Baron Joseph Eötvös, on a scholarship to Leipsic, to study methods of training teachers for secondary schools. Returning to Hungary in 1872, he established himself at the University of Budapest as privat-docent in pedagogics, ethics, and psychology, and was appointed at the same time professor at the Mittelschullehrer-Bildungsanstalt there. He induced the government to establish a gymnasium in connection with this school for the practical training of teachers, of which he was appointed director. This marked the beginning of Kármán's great influence on the education of the entire country through the numerous pupils who disseminate his ideas. Since 1903 Kármán has been "pädagogischer Berater" in the Ministorium für Culten und Unterricht.

Kármán has translated into Hungarian the following works: Jolly's "Philosophische Propädeutik" (1883); Lotze's "Logik" (1884); Browning's "History of Education" (1885); "Psychologie" (1887); Gow's "Greek and Roman Antiquities" (1890); Wilkins' "History of Roman Literature" (1894).

His "Beispiele eines Rationellen Lehrplans für Gymnasien" (Halle, 1890) has been published in Frick's "Sammlung Pädagogischer Abhandlungen."

KARMEL, HA-. See PERIODICALS.

KARMI: Family name, the Biblical "Carmi" (Num. xxvi. 6); it was used, according to Gross, as a gentilic adjective to the French "Crémieu" or "Crémieux" (= "Kerem Ṭob"), name of a county of the department of Isère, where many Jews were living in the Middle Ages, and to "Cremiacum," a place in the Dauphiné; it was changed at the beginning of the seventeenth century to "Crémieux."

Karmi: Copied, in 1583, MS. No. 1424 of the Codex de Rossi.

Abraham Karmi. See JASSUDA and ABRAHAM KARMI.

David ben Joseph Karmi: Lived at Carpentras, France, where he often delivered public discourses in the synagogue on the Sabbath, in 1621 and 1622, during the rabbinate of his teacher Solomon Ezobi.

Elhanan David Karmi: Died at Reggio, Kislew 8, 1643. He wrote glosses to the Shulḥan 'Aruk, which were praised by Benjamin Coen in the funeral oration which he preached at Elhanan's death ("Gebul Binyamin," p. 29).

D. A. PE.

Elijah Karmi: Teacher at Carpentras, France; lived at the end of the seventeenth century. Elijah Karmi collected, under the title "Seder Tamid," the prayers in use among the Jews of the four communities of Avignon, Carpentras, L'Isle, and Cavillon (Avignon, 1767).

BIBLIOGRAPHY: Fürst, *Bibl. Jud.* i. 143; Gross, *Gallia Judaica*, pp. 262, 263.

S. S. I. BR.

Isaiah Karmi: Lived at Reggio about the same time as Jacob Israel Karmi; pupil of R. Israel Benjamin Bassan, who died there about 1790. Isaiah was, apparently, a teacher of the Talmud. He is praised as a poet and preacher by his pupil Hananiah Elhanan Hai Coen, rabbi of Florence.

Jacob Israel Karmi: Rabbi at Reggio in the eighteenth and nineteenth centuries; pupil of Jacob Moses 'Ayyas, rabbi at Ferrara, in whose house he met Hananeel Neppi, subsequently rabbi of Ferrara, who was an intimate friend of Jacob.

Jassuda and **Abraham Karmi:** Two wealthy and educated brothers living at Carpentras about the middle of the eighteenth century. Abraham, rabbinical judge there, devoted himself throughout his life to the development of Hebrew poetry.

Joseph Jedidiah ben Benjamin Jekuthiel Karmi: Went to Modena in 1612; in 1623 was appointed ḥazzan and teacher at the synagogue of the brothers Ausilio in that city. Although his brother-in-law Aaron Berechiah had published at this time a collection of prayers for vigils, Joseph undertook a similar work, but consisting of his own compositions only, to which he added a commentary, printing the book at his own expense under the title "Kenaf Renanim" (Venice, 1626). These prayers have a haggadic, mystical tinge, and are for all the week-days and festivals.

Leon Karmi of Hamburg: Wrote the apologetic work entitled "De Charitate et Benevolentia a Christianis erga Judæos Habenda ab Evangelica Lege Extractus" (Amsterdam, 1643).

Menahem Karmi: Author of Talmudic collectanea contained in Luzzatto's MS. No. 66.

Mordecai Karmi: Son of Abraham Karmi; died at Aix in 1825. He was one of the most learned rabbis of France, and was distinguished for the nobility of his character as well as for his writings. His "Ma'amar Mordekai" is a commentary on Shulḥan 'Aruk, printed at Leghorn in 1784. His "Dibre Mordekai," a Talmudic polemic against his friend Azulai, was also printed at Leghorn, according to Nepi.

Moses Karmi: Son of Solomon Karmi; died at Aix in 1837. In 1790 he accompanied his father and his uncle Mordecai ben Abraham, who was also his father-in-law, to Aix, where he was appointed rabbi. Between 1829 and 1836 he was engaged on his "Ho'il Mosheh Be'er," written in rabbinical Hebrew. Vols. i.-vi. contain a commentary on the daily prayers and the prayers for special occasions; vols. vii.-x. form a supercommentary to Ibn Ezra on Genesis, Exodus, Numbers, Proverbs, and Job. The whole work has not yet been printed.

Samuel ben Yoma Karmi: Was living at Carpentras in 1631.

Saul Raphael Karmi: Jonah Gerondi dedicated to him, in 1586, his "Iggeret ha-Teshubah."

Simson Karmi: Emigrated in the fifteenth century from Chambéry, department of Savoy, to Italy.

Solomon Karmi: Son of Abraham Karmi; rabbi of Carpentras after the death of his father. At the age of eighteen he wrote "Ḥesheḳ Shelomoh," notes to Rashi's commentaries and to the Pentateuch Midrashim (Leghorn).

D. A. PE.

ḲARMION (ḲIRMION): One of the four principal rivers of Palestine (Yer. Kil. ix. 5; Yer. Ket. xii. 3; B. B. 74b). Owing to its small tributaries, its water is turbid and consequently unfit for sacrificial use (Parah viii. 10; comp. Tos. to B. B. 74b). Schwarz ("Das Heilige Land," p. 31) identifies the Ḳarmion with the Biblical Amana, the modern Baradah; but Neubauer ("G. T." p. 32) supposes that "Ḳarmion" should be amended either into "Ḳadmion," the Talmudic equivalent of "Naḥal Ḳedumim," the Biblical "Kishon" (Judges v. 21), or into "Ḳarsion" (Χαρσέον), which also seems to be another name for "Kishon."

S. S. M. SEL.

KARP (*née* **SEGAL**), **SOFIA:** Rumanian Jewish actress; born at Galatz, Rumania, 1861; died in New York March 31, 1904; the first actress to appear on the Yiddish stage. She made her début in 1877, in Goldfaden's "Die Bobe mit'n Enikel," and soon won distinction in the dramas and operas that author produced at Bucharest, Jassy, Galatz, and other cities. Sofia Karp then went to Russia, and appeared at Odessa in the Maryinski and the Royal theaters, taking part in the classical plays "Zhidovka," "Uriel Acosta," and "Deborah." She played also in various cities in Germany and Galicia. In 1882 she went to New York, where she appeared first at the Rumanian Opera-House, then at the Oriental Theater. In 1902 she established there, in conjunction with other actors, the Grand Theater.

H. R. A. S. W.

KARPELES, ELIEZER (generally called **R. Lazar Karpeles**): Austrian rabbi; born at Prague about 1754; died April 27, 1832, at Lieben, near Prague. For nearly forty years he was district rabbi of Kaurzim, with residence at Lieben. Karpeles was the author of "Me-Abne ha-Maḳom," novellæ, chiefly to Horayot and to some passages of Maimonides (Prague, 1801), and "'Erki 'Alai," notes to 'Arakin and Ḥullin (*ib.* 1815).

BIBLIOGRAPHY: Fürst, *Bibl. Jud.* ii. 177; *'Erki 'Alai*, Preface.

S. S. E.

KARPELES, GUSTAV: Historian of literature; editor; son of Elijah Karpeles; born Nov. 11, 1848, at Eiwanowitz, Moravia; studied at the University of Breslau, where he attended also the Jewish theological seminary. He embraced the profession of journalism, and was successively attached to the editorial staffs of "Auf der Höhe," the "Breslauer Nachrichten," the "Breslauer Zeitung," the "Deutsche Union," and Westermann's "Deutsche Monatshefte"; in 1870 he was also coeditor with S. Enoch of the "Jüdische Presse." In 1883 Karpeles settled in Berlin, where in 1890 he became editor of the "Allgemeine Zeitung des Judenthums."

Karpeles stimulated into active life the Jewish literary societies in Germany, but has made himself most widely known through his writings on Heinrich Heine. In addition to several editions of Heine's works (1885, 1887, 1888, 1902) he has published the following monographs: "Heinrich Heine und das Judenthum" (Breslau, 1868); "Heinrich Heine, Biographische Skizzen" (Berlin, 1869); "Heinrich Heine und Seine Zeitgenossen" (*ib.* 1887); "Heinrich Heine und der Rabbi von Bacharach" (Vienna, 1895); "Heinrich Heine's Autobiographie" (*ib.* 1898); "Heinrich Heine: aus Seinem Leben und aus Seiner Zeit" (Leipsic, 1899). The following are among his general writings: "Ludwig Börne" (Leipsic, 1870); "Goethe in Polen" (*ib.* 1890); "Allgemeine Gesch. der Weltliteratur" (*ib.* 1891); "Literarisches Wanderbuch" (Berlin, 1898). He also edited the works of Schiller (Leipsic, 1895), Lenau (*ib.* 1896), and Eichendorff (*ib.* 1896). His special contributions to Jewish literature include: "Die Frauen in der Jüdischen Literatur" (Berlin, 1870; 2d ed., *ib.* n.d.); "Gesch. der Jüdischen Literatur" (*ib.* 1886); "Die Zionsharfe" (*ib.* 1889); "Ein Blick in die Jüdische Literatur" (Prague, 1895); "Jewish Literature and Other Essays" (Philadelphia, 1895); "A Sketch of Jewish History" (*ib.* 1897).

Karpeles also entered the dramatic field, in which he has written: "Deutsches Leben" and "Deutsche Liebe," comedies (1873); "Im Foyer" (1876); and a dramatization of Grabbe's "Don Juan und Faust" (1877).

S. M. K.

KAṢABI (קצבי), JOSEPH BEN NISSIM: Turkish Talmudist of the seventeenth century; died between 1696 and 1698. In 1650 he is mentioned as a distinguished dayyan ("Pene Mosheh," ii., § 77). He seems to have been a pupil of Joseph Trani (Responsa, No. 1), and his halakic discussions with Abraham Rosanes evidence the acuteness of his mind (Azulai, "Shem ha-Gedolim," *s.v.* "Rosanes"). He was known for the liberality of his decisions; he endeavored, for example, to secure permission for the remarriage of an 'agunah, and permitted the drinking of wine that had been prepared by a convert to Islam. Kaṣabi was arbitrator in matters of taxation at Salonica and Soria (Responsa, Nos. 18–19). In 1680 he was chief rabbi at Constantinople, succeeding Moses Benveniste. His responsa and sermons, annotated by Jacob Alfandari, were published by his grandson Moses Kaṣabi ("Rab Yosef," Constantinople, 1736). A responsum of his is printed in the "Pene Mosheh" of Moses Shilton (*ib.* 1712).

BIBLIOGRAPHY: Steinschneider, *Cat. Bodl.* col. 1496; *J. Q. R.* xi. 607; Fürst, *Bibl. Jud.* ii. 181.

G. H. HIRS.

KASHER (כשר): Original meaning, "fit," "proper" (as in Esth. viii. 5; Eccl. x. 10, xi. 6); later, in rabbinical literature, it took the meaning of "fit," "permitted," in contradistinction to "pasul" and "terefah" (= "unfit," "forbidden"). Extensively used in the Halakah, the word crept into the common parlance of the Jews, and the verb "kasheren" was formed to denote any process by which food or vessels for food are made ritually fit for use. Thus the process of cleansing vessels used for the Passover festival (see LEAVEN) is known by that term; also the process of immersing in a ritual bath new metal vessels bought from a non-Jew (see PURITY). "Kasheren" is especially applied to the ritual preparation of meat. In order to soften meat before it is salted, so as to allow the salt to extract the blood more freely, the meat is soaked in water for about half an hour. It is then covered with salt for about an hour, and afterward washed three times (Shulḥan 'Aruk, Yoreh De'ah, 69; see MELIḤAH). This whole process is designated by the term "kasheren." See also DIETARY LAWS.

K. J. H. G.

ḲASMUNAH (sometimes called **Xemone**): Jewish poetess, Andalusian by birth; lived in the twelfth or thirteenth century and wrote in Arabic. Al-Maḳḳari included her in his list of Arabian poets in Spain. According to him Ḳasmunah's father, Ishmael, also was a poet and took great pains with the education of his daughter. He was in the habit of beginning a strophe and calling on her to finish it. Al-Maḳḳari has preserved only two of her verses.

G. M. W. M.

KASSOWITZ, MAX: Austrian physician; born at Presburg, Hungary, Aug. 14, 1842; M.D., Vienna, 1863. For many years assistant to L. Politzer in Vienna, he became his successor as chief of the First Children's Hospital in 1881. In 1885 he became privat-docent, in 1891 assistant professor in paidology at the Vienna University. Kassowitz has written many essays for the medical journals and is editor of the "Beiträge zur Kinderheilkunde aus dem Ersten Oeffentlichen Kinderkrankeninstitute zu Wien." Among his works may be mentioned: "Die Normale Ossification und die Erkrankungen des Knochensystems bei Rachitis," etc., Vienna, 1881–85; "Die Symptome der Rachitis," Leipsic, 1886; "Vorlesungen über Kinderkrankheiten im Alter der Zahnung," Vienna, 1892; "Allgemeine Biologie," *ib.* 1899.

KATSCHER, BERTHA (pseudonyms: **Ludwig Ungar**; **Albert Kellner**; **Ludwig Kölle**; **Ludmilla Kölle**): Hungarian writer; born at Treutschin, Hungary, June 12, 1860. She was educated by her aunt, by whom she was taken to Herzegovina, where in 1881 she was married to her cousin Leopold Katscher, the novelist. Up to this time her mind and time had been occupied mostly with household affairs, but at the wish of her husband she embarked on what proved to be a successful literary career. Her first attempts were fairy-tales for children, but she soon turned her efforts to the advocacy of universal peace and various economic reforms. She wrote also against cruelty to animals. She has contributed articles on a great variety of subjects to the "Frankfurter Zeitung," the "Wiener Mode," "Die Heimat," "Münchener Allgemeine Zeitung," "Kölnische Zeitung," "Prochaska's Monatsbände," etc. Her first work in book form was "Die Kunst ein Mensch zu Sein," written in 1887 with John Hardy. Her other works are: "Weinachtsgeschichte" (1890); "Aus Bädern und Sommerfrischen" (1890); "Hermann Vámbérys Leben und Reiseabenteuer" (1892); "Soldatenkinder," a romance of universal peace (1897); "Die Studentin" (1900); and "Der Stychoos" (1901). She has also translated novels by Hardy, Donnelly, Boyesen, Meadows, Stevenson, and Buckley.

ḲAṬṬINA: Babylonian amora of the second generation (3d cent.); known both as halakist and as haggadist. He was a pupil of Rab (Abba Arika); and his halakot are frequently mentioned in the Babylonian Talmud, as transmitted either by himself (Ta'an. 7b; Yoma 54a; *et al.*) or in his name by Ḥisda (Bek. 35a; 'Ar. 32a) and Rabbah b. Huna (Bek. 44b). It was Ḳaṭṭina who inferred from Isa. xii. 11 that the existence of the world is divided into periods of 6,000 years each, with intervals of 1,000 years of chaos (R. H. 31a; Sanh. 97a).

KATZ, ALBERT: Rabbi and author; born July 17, 1858, at Lodz (Russian Poland). He studied at the yeshibot of Lublin and Wilna and then (1881) went to Berlin, where he still resides. He officiated as preacher at Fürstenwalde from April, 1883, to 1886, and in the Congregation Ohel Yiẓḥaḳ at Berlin from April, 1886, to 1887. Since 1887 he has devoted himself exclusively to writing.

He was one of the founders of the Verein für Jüdische Geschichte und Literatur of Berlin, and of the Verband der Literatur-Vereine at Hanover (1894), whose secretary he still is.

Katz's works include: "The Jew and the Country of His Fathers" (in Hebrew), Berlin, 1883; "Die Seele des Jüdischen Volkes," Fürstenwalde, 1886; "Die Blutlüge" (transl. of I. B. Levinson's "Efes Damim"), Berlin, 1892; "Der Wahre Talmudjude," *ib.* 1893; "Die Juden im Kaukasus," *ib.* 1894; "Aus Alter und Neuer Zeit" (a collection of stories), Prague, 1896; "Die Juden in China," Berlin, 1900.

S.

KATZ, LUDWIG: German otologist and laryngologist; born at Loslau Jan. 1, 1848; graduated (M.D.) from Berlin University in 1872. He began to practise as a specialist in Berlin in 1878. In 1892 he became privat-docent at the University of Berlin.

Katz is the author of "Atlas der Normalen und Pathologischen Anatomie des Ohres," Berlin, 1890, and "Stereoscopischer Atlas des Menschlichen Ohres nach Durchsichtigen Macroscopischen Präparaten," *ib.* 1892.

Bibliography: Pagel, *Biog. Lex.* s. v.

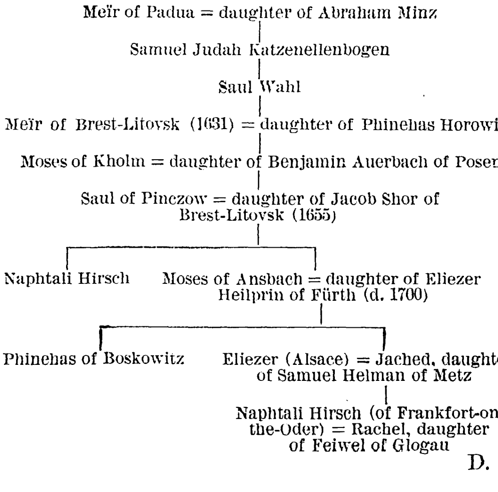
KATZENELLENBOGEN (more correctly **Katzenelnbogen**, sometimes with the epithet **Ashkenazi**): An old, widely ramified family counting many rabbis among its members, who were and are still found in Italy, Poland, Germany, Alsace, and also in America. It derived its name from the locality of Katzenelnbogen in the Prussian province of Hesse-Nassau. In 1312 Count Diether of Katzenelnbogen received permission from Emperor Henry VII. to keep twelve Jews at Katzenelnbogen; and Ludwig the Bavarian in 1330 permitted Count Wilhelm and his heirs to keep twenty-four Jews in their dominions (Böhmer, "Regesten," No. 501; Wiener, "Regesten," pp. 23, 33). M. K.

The following pedigree of this family is given on the title-page of Naphtali Hirsch Katzenellenbogen's "Sha'ar Naftali" (1797):



Meïr of Padua = daughter of Abraham Minz
Samuel Judah Katzenellenbogen
Saul Wahl
Meïr of Brest-Litovsk (1631) = daughter of Phinehas Horowitz
Moses of Kholm = daughter of Benjamin Auerbach of Posen
Saul of Pinczow = daughter of Jacob Shor of Brest-Litovsk (1655)
Naphtali Hirsch
Moses of Ansbach = daughter of Eliezer Heilprin of Fürth (d. 1700)
Phinehas of Boskowitz
Eliezer (Alsace) = Jached, daughter of Samuel Helman of Metz
Naphtali Hirsch (of Frankfort-on-the-Oder) = Rachel, daughter of Feiwel of Glogau

D.

Abraham Abush ben Ẓebi Hirsch Katzenellenbogen: German Talmudist of the eighteenth century. Katzenellenbogen had been a wealthy merchant, but, having been impoverished by a fire, he accepted the office of preacher at Sachtschew. He wrote, in 1784, a work entitled "Birkat Abraham," a philosophical commentary on Ecclesiastes (Warsaw, 1815). In this work he mentions two unpublished works, "Yen ha-Reḳaḥ," a mystical commentary on Esther, and "Darke No'am."

Bibliography: Michael, *Or ha-Ḥayyim*, No. 210; Fürst, *Bibl. Jud.* ii. 178.

M. Sel.

Abraham ben David Katzenellenbogen: Polish rabbi; born about the beginning of the eighteenth century; died after 1787. His father was the son of Ezekiel Katzenellenbogen, rabbi of Keidani, Lithuania, and later of the Three Communities (Altona-Hamburg-Wandsbeck). In 1726, when Abraham was in Wilna, living under the roof of his father-in-law, Joseph Etkes, he met there the child Elijah b. Solomon, who later became the famous gaon. Abraham took young Elijah home with him to Keidani to his father's house, and kept him there several months. In 1746 Abraham was rabbi of Slutsk, and at the synod held at Mir, in 1752, signed, as rabbi of Slutsk, the proposition to excommunicate R. Jonathan Eybeschütz. He became rabbi of Brest-Litovsk about 1760, and his name occurs in the approbations to various works, the latest being dated 1787. He had seven sons, one of whom, Joseph, succeeded him as rabbi of Brest-Litovsk and was in turn succeeded by his son Aryeh Löb Katzenellenbogen. A "hesped" or sermon preached on the occasion of Abraham's death is contained in Eliezer ha-Levi's "Reaḥ ha-Sadeh" (Shklov, 1795).

Bibliography: Feinstein, *'Ir Tehiliah*, pp. 30, 170, 204, Warsaw, 1886; Lewin, *'Aliyyot Eliyahu*, ed. Stettin, p. 55; Eisenstadt-Wiener, *Da'at Ḳedoshim*, pp. 14-15.

P. Wi.

Abraham (Joseph Jacob) ben Joel Katzenellenbogen: Polish rabbi; born in 1549; died at Lemberg April 30, 1637; grandfather of Ezekiel Katzenellenbogen, author of "Keneset Yeḥezḳel." Together with his brother Mattithiah Liebermann he studied under his uncle Isaac Katzenellenbogen, rabbi of Neustadt, and author of "Moledot Yiẓḥaḳ." At first rabbi of Yanow, near Lemberg (*c.* 1593), he was elected in 1615 at Lemberg, to succeed Moses Ḥarif, who, recognizing Katzenellenbogen's scholarship, voluntarily resigned. Katzenellenbogen remained in Lemberg till his death. Some of his novellæ are quoted in "Birkat Ṭob" by R. Moses of Metz, and he is mentioned in the responsa of Meïr of Lublin and in the "Etan ha-Ezraḥi" of Israel Jehiel Rapoport.

Bibliography: Michael, *Or ha-Ḥayyim*, No. 118; Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 6; Buber, *Anshe Shem*, pp. 2-4, Cracow, 1895; Eisenstadt-Wiener, *Da'at Ḳedoshim*, pp. 87, 92, 93.

Aryeh Löb b. Joseph Katzenellenbogen: Russian rabbi; born at Brest-Litovsk, where he died Aug. 13, 1837. Both his grandfather and father were rabbis there; he succeeded the latter in 1797, while still a young man, and held the position until his death. He was considered one of the great rabbis of his time. He left no written works, but his name is found appended to a large number of approbations to works of contemporary authors. His signature is second on the resolution adopted by the convention that assembled at Wilna in 1818 to select, by order of Alexander I., three Jewish deputies to reside in St. Petersburg as representatives of the Jews.

Bibliography: Feinstein, *'Ir Tehillah*, p. 30, Warsaw, 1886; Fuenn, *Ḳiryah Ne'emanah*, pp. 35, 47-48, Wilna, 1860.

M. K.—N. T. L.

Benjamin b. Saul Katzenellenbogen: Rabbinical author of the eighteenth century; a pupil of Samuel Heilman and later rabbi of Samter, Prussia. He wrote: "Or Ḥakamim" (Frankfort-on-the-Oder, 1752) and "Leb Ḥakamim," both novellæ (the second ed. of the latter was republished, with additions, at Dyhernfurth in 1773); and "Menorat Zahab," a general title, the work including "Or 'Olam," commentary on the Pentateuch, "Or Ḥadash," commentary on the Hafṭarot, and "Or Torah," sermons on the Pentateuch (*ib.* 1775).

Bibliography: Zedner, *Cat. Hebr. Books Brit. Mus.* p. 410.

S. S. N. T. L.

Ezekiel b. Abraham Katzenellenbogen: Polish-German rabbi; born in Lithuania about 1670; died at Altona July 9, 1749. At first rabbi at Keidani, he was called to Altona in 1714. This call he owed to the efforts of Issachar Kohen, an influential member of the Altona congregation; and Katzenellenbogen in return secured the election of Issachar Kohen's son-in-law to the rabbinate of Keidani. Jacob Emden, who reports this story in his "Megillat Sefer" (pp. 121-140), seems, however, to have been prejudiced against Katzenellenbogen, whom he describes as a man of very low moral character, an ignoramus, and a poor preacher.

Ezekiel ben Abraham Katzenellenbogen's descendants for four generations occupied rabbinates in various Polish communities. His epitaph is found in Blogg's "Sefer ha-Ḥayyim" (p. 337; Hanover, 1862). He wrote: "Keneset Yeḥezḳel," responsa, Altona, 1632; "Tefillot le-Yarẓait," prayers and rituals for Jahrzeit, *ib.* 1727; "Ẓawwa'at R. Yeḥezḳel," his will, Amsterdam, 1750; "Mayim [Mi-Yam?] Yeḥezḳel," homilies on the Pentateuch, Porick, 1786; "Leḥem Yeḥezḳel," Talmudic novellæ (mentioned in his preface to "Keneset Yeḥezḳel," but never published). According to Steinschneider ("Cat. Bodl."), Katzenellenbogen is probably the author of the "Me'orer Zikkaron" (Altona, 1727), an index to Talmudic passages with an abstract of the decisions of Rashi, the tosafists, etc.

Bibliography: Emden, *Megillat Sefer*, pp. 121-140, Warsaw, 1897; Fürst, *Bibl. Jud.* ii. 179; Grätz, *Gesch.* x. 375; Kohan (Kahana), in *Ha-Shaḥar*, 1874, p. 299; Steinschneider, *Cat. Bodl.*; Walden, *Shem ha-Gedolim he-Ḥadash*, p. 29, Warsaw, 1864; Duckesz, *Iwwah le-Moshab*, Cracow, 1903; Benjacob, *Oẓar ha-Sefarim*.

D. H. M.

Ḥayyim Löb b. Hirsch Katzenellenbogen: Russian Jewish educator; born in Wilna about 1814; died Jan. 13, 1876. He was one of the foremost teachers in the rabbinical school of Wilna, where he taught Bible, Talmud, and theology in the two highest classes. He succeeded his father, who died in 1868, as inspector of that institution, holding the position until the school was closed in 1873. Later he became financially embarrassed and went to Vilkomir, where he died in abject poverty. With S. J. Fuenn he compiled the Hebrew original of the "Mirovozzreniye Talmudistov" (Talmudist's View of the World), which was translated into Russian under the editorship of L. Lewanda and J. L. Gordon (3 vols., St. Petersburg, 1876). He also contributed articles to "Ha-Karmel" and other Hebrew periodicals.

BIBLIOGRAPHY: Gurland, *Kebod ha-Bayit*, p. 32, Wilna, 1858; *Ha-Karmel*, viii., No. 23; *Iggerot YeLaG* (J. L. Gordon's letters), No. 321.

H. R. P. Wi.

Ḥayyim ben Moses Katzenellenbogen: Physician; son of the physician Moses Katzenellenbogen, who received the title of "gaon" on account of his profound knowledge of rabbinical writings. Ḥayyim ben Moses, who practised his profession in Lublin, united worldly wisdom and prosperity with rabbinical scholarship. He had already been robbed of all his property when the second Cossack persecution of the Jews broke out, during which he nearly lost his life. The Cossacks had given him six hours to raise the sum demanded as a ransom; at the end of that time, the ransom not being forthcoming, he and his whole family were to be slaughtered in the public shambles of the city. He was saved by the proprietor of the Zamosc estate, eight miles distant from Lublin, who brought the requisite sum, twenty thousand gulden, and removed Ḥayyim, his mother, three brothers and three sisters, as well as other relatives, to a place of safety at Zamosc. Ḥayyim, who formerly had himself assisted the poor, was now obliged to appeal to the charity of his coreligionists. In 1656 he went to Lemberg, whence, provided with letters of introduction from the rabbi there, and from some physicians, he went (1657) to Italy, where he found ample support, being warmly recommended by the physician Samuel Meldola in Mantua, Abraham Joseph Graziano in Modena, Moses Zacuto in Venice, and Abraham Ortona in Verona. He at last returned to Lublin and resumed his medical practise.

J. M. K.

Isaac b. Moses Katzenellenbogen: Rabbi; lived at Prague, where his work "Moledot Yiẓḥaḳ," on the computation of the calendar, appeared in 1623. He says in the preface that he lost all his manuscripts through the soldiers of Count Mansfeld (Zunz, "Z. G." p. 232).

Jacob Katzenellenbogen: President of the bet din and head of the yeshibah of Lemberg in 1648; died Feb. 28, 1660; son and successor of Abraham (Joseph Jacob) Katzenellenbogen of Lemberg.

Jacob Katzenellenbogen: Rabbi at Oettingen and then at Lemberg; son of Phinehas Katzenellenbogen; left five large collections of novellæ and ritual decisions, which are still extant in manuscript at Oxford.

BIBLIOGRAPHY: Edelmann, *Nir le-Dawid*, p. 34b, London, 1852; Buber, *Anshe Shem*, pp. 101, 110.

Jacob Katzenellenbogen: Suffered martyrdom in early manhood; son of Saul Katzenellenbogen, rabbi of Pinczow. He left novellæ and ritual decisions, under the title "Naḥalat Ya'aḳob."

D. M. K.

Meïr ben Isaac Katzenellenbogen (Meïr of Padua): Italian rabbi; born at Katzenellenbogen, Germany, about 1482; died at Padua Jan. 12, 1565 (see his epitaph in "Kokbe Yiẓḥaḳ," xv. 14). Meïr ben Isaac, who was generally called after his native town, was the founder of the Katzenellenbogen family. After studying at Prague under the well-known casuist Jacob Polak, he went to Padua and entered the yeshibah of Judah Minz, whose granddaughter he afterward married. He succeeded his father-in-law, Abraham Minz, in the chief rabbinate of Padua, which office he held until his death. Meïr was also nominal rabbi of Venice, whither, as appears from his Responsa (Nos. 43, 48, etc.), he went several times a year; but he had his fixed residence at Padua. Meïr was considered by his contemporaries a great authority on Talmudic and rabbinical matters, and many rabbis consulted him, among them being Moses Alashkar, Obadiah Sforno, and his relative Moses Isserles (who addressed him as "rabbi of Venice"). It may be seen from his responsa (ninety in number, published by himself, with those of Judah Minz, under the title of "She'elot u-Teshubot," Venice, 1553), as well as from those of Isserles, that he was disposed to be liberal in his decisions. Another indication of his leaning toward liberalism was his use in his Responsa (Nos. 38, 49, 72) of the civil names of the months, a thing not done by other rabbis of his time.

Joseph b. Mordecai Gershon says ("She'erit Yosef," No. 1) that Meïr, in one of his responsa, told him not to rely at that time on his opinion, because he could not verify his decision by the Talmud, all the copies of which had been burned. This burning is mentioned by David Gans ("Ẓemaḥ Dawid," p. 56, Warsaw, 1890) and by Heilprin ("Seder ha-Dorot," i. 245, ed. Maskileison) as having occurred in 1553 or 1554 under Pope Julius III., at the instigation of certain baptized Jews. Meïr states also (Responsa, No. 78) that in Candia the hafṭarah for Yom Kippur Minḥah was, with the exception of the first three verses, read in Greek (comp. Zunz, "G. V." p. 413, note). In Responsum No. 86 he speaks of the plague that raged at Venice, but without indicating the year. Many of his responsa are to be found in the collection of Moses Isserles. Meïr added to the edition of his responsa his father-in-law's "Seder Giṭṭin wa-Ḥaliẓah," and a detailed index. He edited also Maimonides' "Yad," with some commentaries, to which he added notes of his own (Venice, 1550; see ISSERLES).

M. SEL.

Moses ben Saul Katzenellenbogen: Polish rabbi and author; born at Pinczow 1670; died at Fürth 1733; grandson of Moses Katzenellenbogen, rabbi of Kohlm. At the age of twenty-four he became rabbi at Podhajce, Galicia. In 1699 he was imprisoned in consequence of a charge of murder against the Jews of Podhajce. On being released he was elected to the rabbinate of Schwabach, Bavaria. He left in manuscript halakic novellæ and responsa, now in the Bodleian Library at Oxford (collections of Heimann Michael). Moses had four sons, three of whom entered the rabbinate: Phinehas, rabbi at Leipnik, author of "Yesh Manhilin," the history and genealogy of the Katzenellenbogen family; **Eleazar,** rabbi of Bamberg, Bavaria; Naphtali Hirsch, rabbi at Heidelberg.

Bibliography: Eisenstadt-Wiener, *Da'at Kedoshim*, p. 100; Edelmann, *Gedullat Sha'ul*, pp. 34b, 35a.

S. S. N. T. L.

Naphtali Hirsch Katzenellenbogen: German rabbi; died after 1813; son of Eliezer (Lazarus) Katzenellenbogen of Bamberg and subsequently of Hagenau, 1755–71. He was educated by his grandfather R. Samuel Helmann of Metz, and was rabbi (1794) at Frankfort-on-the-Oder and then at Winzenheim, Alsace, and at the same time president of the consistory of the Upper Rhine. He was one of the rabbis at the Paris Sanhedrin, 1806, and had the reputation of being an excellent preacher. He published "Sha'ar Naftali" (Frankfort-on-the-Oder, 1797), a commentary to a part of Eben ha-'Ezer, together with seventeen responsa. On the title-page he traces his descent through nine generations. He left in manuscript "Sha'are Binah," a commentary to Hoshen Mishpat, and another commentary to Eben ha-'Ezer, as well as a volume of sermons and ritual decisions, which are still in manuscript in the Strasburg Library.

Bibliography: Nepi-Ghirondi, *Toledot Gedole Yisrael*, pp. 275 *et seq.*; *R. E. J.* xli. 125.

Naphtali Hirsch Katzenellenbogen: Author and poet; born in 1796; died at Wilna March 10, 1868; son of Simhah Katzenellenbogen. He was the editor of the baraita of the thirty-two middot, which appeared with notes under the title "Netibot 'Olam," Wilna, 1832. He published also "Gib'at Sha'ul," a funeral oration on the death of his relative Saul Katzenellenbogen (*ib.* 1825); "Nahal Dim'ah" (*ib.* 1821), dirges on the death of the learned Hayyim Volozhin, with notes on the Pentateuch, entitled "Nahal 'Adanim"; and "Megillat Sefer" (*ib.* 1825), elegies on the death of Hayyim Farhi.

Bibliography: Fürst, *Bibl. Jud.* ii. 178; Zedner, *Cat. Hebr. Books Brit. Mus.* p. 411; Zunz, *Monatstage des Kalenderjahres*, p. 12.

Naphtali Hirsch Katzenellenbogen: German rabbi; born at Schwabach, where his father, Moses Katzenellenbogen, was rabbi. He attended the yeshibah of R. Jacob Kohen Poppers of Frankfort-on-the-Main, where he distinguished himself for his ability, gaining the favor of his teacher, who gave him his only daughter in marriage. In 1741 he was appointed rabbi of Mergentheim and of the communities of the Tauber and Neckar districts, holding this office down to 1763, when he was elected chief rabbi of the Jews of the Palatinate, with his seat at Leimen, which in 1768 he transferred to Mannheim. In the latter city he, in spite of his age and ill health, was surrounded by many pupils. While still living with his father-in-law he published Moses b. Nahman's novellæ to Yebamot, after an old manuscript, under the misleading title "Toledot Adam" (Homburg, 1740). For a large collection of his responsa in manuscript see Neubauer, "Cat. Bodl. Hebr. MSS." No. 2190.

Bibliography: Löwenstein, *Gesch. der Juden in der Kurpfalz*, pp. 240, 242 *et seq.*, Frankfort-on-the-Main, 1895 (gives his epitaph).

Phinehas Katzenellenbogen: Rabbi successively at Leipnik, Boskowitz in Moravia, Wallerstein, and Markbreit in Bavaria; born 1691; died about 1760; son of Moses Katzenellenbogen of Schwabach. His derashot, Pentateuch commentaries, novellæ to Talmud treatises, responsa, etc., are extant in manuscript at Oxford.

Bibliography: Edelmann, *Gedullat Sha'ul*, p. 1; *Nir le-Dawid*, p. 34b; Walden, *Shem ha-Gedolim*, i. 64.

Phinehas Katzenellenbogen: Rabbi at Krakowie and then for thirty-one years preacher at Lemberg; died in the latter city March 19, 1750; son of the martyr Jacob Katzenellenbogen.

Bibliography: Buber, *Anshe Shem*, pp. 184 *et seq.*

Phinehas Katzenellenbogen: Rabbi at Hegenheim from 1821 to about 1828; son of Naphtali Hirsch Katzenellenbogen of Winzenheim.

Samuel Judah Katzenellenbogen: Italian rabbi; born in 1521 at Padua; died there March 25, 1597; son of R. Meïr b. Isaac of Padua (Meïr Padua). He was distinguished even in his youth for his scholarship and his oratorical gifts. He was associated, both as rabbi and as writer, with his father, after whose death, in 1565, he was elected rabbi at Venice. He had many pupils, one of whom had a bust made of his beloved teacher, who was of imposing appearance, and set it up in the schoolhouse so as to have it constantly before his eyes (Eisenstadt-Wiener, "Da'at Kedoshim," p. 82, St. Petersburg, 1897–98). Azulai ("Shem ha-Gedolim," *s.v.*) speaks of this fact in connection with Samuel Judah Katzenellenbogen's great-grandfather, Judah Minz.

Katzenellenbogen was highly respected by his coreligionists throughout Italy, and, because of his wide scholarship, was honored by Joseph Caro, Solomon Luria, and Moses Isserles. Non-Jews also esteemed him highly: Paul Weidner, a converted Jew, dedicated his works to him. He is said to have accorded a hospitable reception to the Polish prince Radziwill when the latter visited Padua. When the prince found himself in need of money he appealed to Katzenellenbogen, who lent him the necessary funds for continuing his journey, requesting in return that he deal leniently with the Jews in his country, and protect them against the accusation of ritual murder.

On Katzenellenbogen's death Leo Modena delivered the funeral oration, which has been printed in the "Mibhar Yehudah" (p. 63b). Samuel left one son, who is known under the name of **Saul Wahl.** Katzenellenbogen is the author of several responsa, which are included in the responsa collection of Moses Isserles (Nos. 23, 126, 127, 129) and in that of Samuel Kala'i; and of twelve derashot, published by his pupil (Venice, 1594; reprinted Lemberg, 1811, where the author's name is erroneously given as J. Minz). Katzenellenbogen also contributed some of the notes to the annotated edition of Maimonides' "Yad ha-Hazakah" (Venice, 1550), which notes Azulai ("Shem ha-Gedolim," *s.v.*) ascribes to Meïr of Padua.

Bibliography: *Kerem Hemed*, iii. 94 *et seq.*; Steinschneider, *Cat. Bodl.* No. 7047; Edelmann, *Gedullat Sha'ul*, pp. xiii. (where Katzenellenbogen's epitaph is quoted), 2b, 29 *et seq.*, London, 1854; Fürst, *Bibl. Jud.* ii. 179; Zunz, *Monatstage des Kalenderjahres*, p. 15; S. Kahan, *'Anaf 'Ez Abot*, p. 31, Cracow, 1903; Eisenstadt-Wiener, *Da'at Kedoshim*, pp. 82 *et seq.*

D. M. K.

Saul b. Joseph Katzenellenbogen: Russian rabbi; born at Brest-Litovsk about 1770; died at Wilna Jan. 12, 1825. He was one of the four sons of Rabbi Joseph b. Abraham Katzenellenbogen of Brest-Litovsk. After living for some time in Polotzk, he went to Wilna, and became a disciple of R. Elijah Gaon and one of the assistant rabbis of Wilna.

He was also a prominent communal leader, and the stories which are still related about him, especially in connection with the gaon, by the older inhabitants of Wilna bear testimony to his great popularity, which is made evident also by the two special works about him that appeared after his death: "Ebel Kabed," by the poet A. B. Lebensohn (Wilna-Grodno, 1825), and "Gib'at Sha'ul," by a relative, Hirsch Katzenellenbogen (*ib.* 1825). R. Saul was a man of ascetic habits and ruined his health by much fasting. He is the author of annotations on the Babylonian Talmud, which appeared in the first Wilna edition and were republished in most of the subsequent editions. He wrote also several approbations of the works of others. Some of his novellæ appeared in Hirsch Katzenellenbogen's "Netibot 'Olam" (Wilna, 1822, 1858).

H. R. P. Wi.

KATZENELSON, JUDAH LÖB B. ISRAEL (pen-name **Bukki ben Jogli**): Russian physician; born in Bobruisk 1848. He studied in the rabbinical school of Jitomir and in the Imperial Medico-Surgical Academy of St. Petersburg, and graduated from the latter in 1877. He took part in the war against Turkey and was twice decorated by the czar. After serving some time in the clinical hospital attached to the Voyennaya Akademia, he was appointed physician in ordinary to the Aleksandrovski Hospital of St. Petersburg. He wrote: "Svyedyeniye o Gemofilyi v Talmudye" (St. Petersburg, 1884); "ReMaH Ebarim," on anatomy (*ib.* 1888); "Anatomiya v Dreynoyevreiskoi Pismennosti" (his dissertation on taking his doctor's degree; *ib.* 1889); "Die Rituellen Reinheitsgesetze in der Bibel und im Talmud," in "Monatsschrift," xliii. and xliv.; "Vavilonskoye Plyeneniyl," on the Babylonian dispersion, in "Voskhod," 1900; "Religiya i Politika v Istorii Drevnikh Yevreyev," in "Sbornik Budushchnosti," vol. i. He wrote also, in Hebrew, "Shirat ha-Zamir," a novel, Warsaw, 1895.

Katzenelson has contributed numerous articles to Russian and Hebrew periodicals, especially to the "Russki Yevrei," "Ha-Shiloaḥ," "Budushchnost," and "Ha-Yom," most of them being signed "Bukki ben Yogli."

KAUDERS, SAMUEL JUDAH LÖB BEN DAVID: Bohemian rabbi; born at Prague about 1762; died there May 6, 1838. After having finished his studies in that city, he devoted his time to Talmudics without holding a rabbinical position. About 1810 he was called to Kaladei as district rabbi of Budweis, and in 1834 he succeeded Samuel LANDAU as "Oberjurist" (acting chief rabbi) of Prague, a position which he held until his death. While a Talmudist of the old school and rigorously Orthodox, he was tolerant in his views and favored secular education. He was the author of: "'Olat Shemuel," responsa on Shulḥan 'Aruk, Oraḥ Ḥayyim, of which the first part only, containing 112 responsa, has been published (Prague, 1823); "Pe'ullat Emet," halakic essays in two parts (*ib.* 1828-29); "Ahabat Emet," homilies and essays (*ib.* 1829).

S. S. M. SEL.

KAUFMAN, ALEXANDER ARKADYEVICH: Russian political economist; born 1864. After graduating in law from the University of St. Petersburg, he was commissioned (1887-90) by the minister of domains to investigate the economic life of the peasants in the governments of Tobolsk and Tomsk. In 1894 he made a study of the economic condition of the new settlers in a part of the government of Tomsk, and published his investigations under the title "Materialy dlya Isucheniya Ekonomicheskavo Byta Gosudarstvennykh Krestyan Zapadnoi Sibiri." Kaufman likewise contributed to, and edited, "Krestyanskoye Zemlepolzovaniye i Khozyaistvo v Tobolskoi i Tomskoi Guberniyakh" (St. Petersburg, 1894). Other works by Kaufman are: "Khozyaistvennoye Statisticheskoye Izslyedovaniye Tobolskoi Gubernii" ("Yuridicheski Vyestnik," 1890, vol. x.); "Ocherk Obschinnykh Poryadkov Ishimskavo Okruga" ("Russkaya Mysl," 1890, vol. xi.); "Vliyanige Pereselencheskavo Elementa na Razvitiye Selskavo Khozyaistva i Obschinnoi Zhizni v Zapadnoi Sibiri" ("Syeverny Vyestnik," 1891, vol. iv.); "Zastyvshaya Istoriya Obschiny" ("Vyestnik Yevropy," 1893, vol. vi.); "Obzor Sposoba Polevodstva i Syevooborotov v Zapadnoi Sibiri" ("Selskoye Khozyaistvo i Lyesovodstvo," 1893, vol. vi.); "Ocherk Krestyanskavo Khozyaistva v Sibiri" (Tomsk, 1894); "Obschina i Uspyekhi Selskavo Khozyaistva v Sibiri" ("Russkoye Bogatsvo," 1894, vol. x.). Kaufman's investigations have won him the gold medal of the Imperial Geographical Society.

H. R. J. G. L.

KAUFMAN, ARKADYA (AARON): Russian communal worker; born at Grodno early in the nineteenth century; died at St. Petersburg April 19, 1893. While receiving a thorough Talmudic education he acquired also by his own unassisted efforts the French and German languages. He made a study of forestry in its relation to shipbuilding and was appointed by the government overseer of shipyards. Kaufman was an authority on sculpture and painting, and possessed a valuable art collection, as well as a collection of rare Hebrew books and manuscripts. He took a deep interest in the affairs of the St. Petersburg community, and it was as a result of his efforts that it received permission to establish a Jewish cemetery and erect a synagogue.

BIBLIOGRAPHY: *Ha-Asif*, iv. 164.

H. R. J. G. L.

KAUFMAN, ILLARION IGNATYEVICH: Russian political economist; born at Odessa 1847. He graduated from the University of Kharkof, and entered the government service in 1870.

Kaufman's writings deal chiefly with problems of currency and loans, especially of state debts. When he became connected with the central statistical commission Kaufman's investigations were first published in the "Vremennik" of the commission (series ii.). They contain much valuable material on the history of Russian finance, particularly his "Statistika Gosudarstvennykh Finansov Rossii v 1862-1884" (St. Petersburg, 1886). Among his other writings may be mentioned: "Teoriya Kolebaniya Tsyen," Kharkof, 1867; "K Ucheniyu o Dengakh i Kredit ye," *ib.* 1868; "Statistika Russkikh Bankov," St. Petersburg, 1872–76; "Kreditnyye Bilety, Ikh Upadok i Vozstanovleniye," *ib.* 1888; "Vekselnyye Kursy Rossii za 50 Lyet, 1841–90," *ib.* 1892. He has also published a number of articles in "Vyestnik Yevropy" (1872–85).

Since 1893 Kaufman has been professor of statistics in the University of St. Petersburg. He was a member of the board of directors of the Landowners' Bank for fifteen years, and is at present (1904) a member of the directorate of the Imperial Bank, St. Petersburg.

KAUFMANN, DAVID: Austrian scholar; born at Kojetein, Moravia, June 7, 1852; died at Karlsbad, Bohemia, July 6, 1899. He was educated at Kojetein; and from 1861 to 1867 he attended the gymnasium at Kremsir, where he studied the Bible and Talmud with Jacob Brüll, rabbi of Kojetein, and with the latter's son Nehemiah. In 1867 he went to the Jewish Theological Seminary at Breslau, where he studied for ten years, attending at the same time the university of that city. In the summer of 1874 he received his Ph.D. from the University of Leipsic; and on Jan. 29, 1877, he was ordained rabbi. In the latter year he declined the offer of a professorship at the Jewish Theological Seminary, Cincinnati, preferring to accept instead the chairs of history, philosophy of religion, and homiletics at the newly founded rabbinical school at Budapest, which he continued to hold till his death. He also at the same time taught Greek and German in the preparatory school of the same institution, carrying on this work in the Hungarian language, which he had rapidly mastered. As librarian of the seminary he acquired the large library of Lelio della Torre of Padua, the library of the seminary becoming by this addition one of the most valuable Hebrew libraries of Europe. As a teacher Kaufmann was highly successful; and his relation to his students was that of friendly adviser. He maintained a lively correspondence not only with the most eminent Jewish scholars, but also with the leaders in other branches of science. Kaufmann was a corresponding member of the Royal Academy of Sciences of Madrid and a member of the executive committee of the Budapest branch of the Alliance Israélite Universelle.

David Kaufmann.

His Life.

His Works.

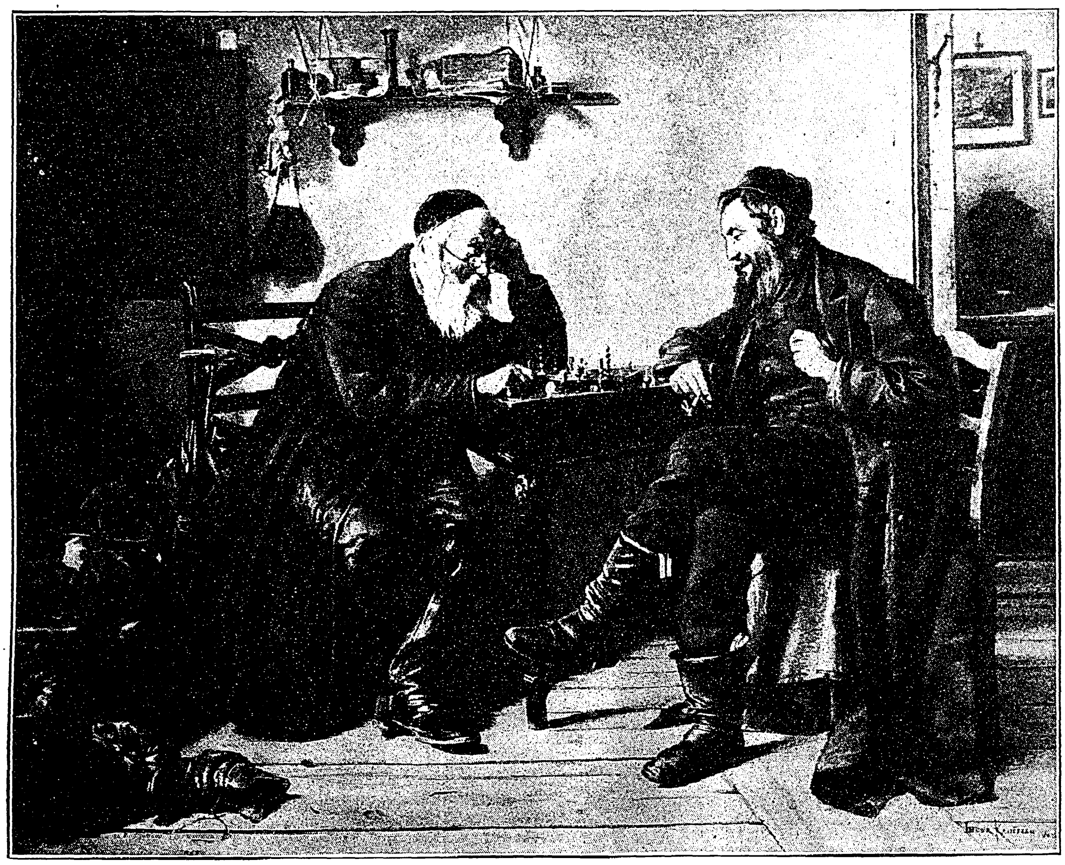
Kaufmann displayed a many-sided literary activity. The bibliography of his works which M. Brann compiled for the "Gedenkbuch zur Erinnerung an David Kaufmann" (ed. M. Brann and F. Rosenthal, Breslau, 1900) includes 546 items, covering nearly every branch of Jewish science. His voluminous contributions to the periodical literature of the last two decades of the nineteenth century show him as a finished writer both of German and of Hebrew. His first and most important works, dealing with the philosophy of religion, include: "Die Theologie des Bachja ibn Pakuda, Verfasser des חובות הלבבות," a prize essay written while a student at the seminary (in "Berichte der Kaiserlichen Akademie der Wissenschaften," Vienna, 1874); "Geschichte der Attributenlehre in der Jüdischen Religionsphilosophie des Mittelalters von Saadia bis Maimuni" (Gotha, 1877–78), his chief work, being a survey of the Jewish and Arabic religious philosophy of the Middle Ages; "Die Spuren al-Batlajusi's in der Jüdischen Religionsphilosophie Nebst einer Ausgabe der Hebr. Uebersetzung Seiner Bildlichen Kreise" (Budapest, 1880; also in Hungarian); "Die Sinne. Beiträge zur Gesch. der Physiologie und Psychologie im Mittelalter. Aus Hebräischen und Arabischen Quellen" (Budapest, 1884; also in Hungarian); an edition of the "Minḥat Ḳena'ot" of Jehiel b. Samuel Pisa (Berlin, 1898, forming a part of the Meḳiẓe Nirdamim collection); "Studien über Salomon ibn Gabirol" (Budapest, 1899; also in Hungarian); a large number of essays in various periodicals, noteworthy among which is the paper "Der Führer Maimuni's in der Weltlitteratur" (reprinted from "Archiv für Gesch. der Philosophie," by L. Stein, xi., No. 3).

Contributions to Jewish History.

His most important historical monographs are: "Die Letzte Vertreibung der Juden aus Wien, Ihre Vorgeschichte (1625–70) und Ihre Opfer" (Vienna, 1889; also in Hungarian); "Zur Gesch. Jüdischer Familien: Samson Wertheimer, der Oberhoffactor und Landesrabbiner, 1658–1724, und Seine Kinder" (Vienna, 1888); "Urkundliches aus dem Leben Samson Wertheimers" (Budapest, 1891; also in Hungarian); "Die Familien Prags nach den Epitaphien des Alten Jüdischen Friedhofs in Prag, Zusammengestellt von Simon Hock, aus Dessen Nachlasse Herausgegeben, mit Anmerkungen Versehen und Biographisch Eingeleitet von Prof. Dr. D. Kaufmann" (with Hebrew title-page, Presburg, 1892); "Zur Gesch. Jüdischer Familien: I., R. Jair Chajjim Bacharach, 1638–1702, und Seine Ahnen" (Treves, 1894); "Dr. Israel Conegliano und Seine Verdienste um die Republik Venedig bis nach dem Frieden von Carlowitz" (Budapest, 1895; also in Hungarian); "Die Erstürmung Ofens und Ihre Vorgeschichte nach dem Berichte Isaak Schulhofs [Megillat Ofen], 1650-1732; Herausgegeben und Biographisch Eingeleitet" (Treves, 1895); "Aus Heinrich Heine's Ahnensaal" (Breslau, 1896); "Die Memoiren der Glückel von Hameln" (Frankfort-on-the-Main, 1896, with Hebrew title-page); "Die Chronik des Achimaaz aus Oria" (reprint from "Monatsschrift," 1896).

On Jewish Art.

Kaufmann was the first to take up the history of art in the synagogue. The following works of his in this field may be mentioned: "Zur Gesch. der Kunst in den Synagogen" (Vienna, 1897); "Zur Gesch. der Jüdischen Handschriften-Illustration" (contribution to the édition de luxe of "Die Haggada von Sarajewo" by D. H. Müller and I. v. Schlossar, Vienna, 1898); "Sens et Origines des Symboles Tumulaires de l'Ancien Testament dans l'Art Chrétien Primitif" ("R. E. J." xiv. 33, 217).



THE CHESS-PLAYERS.
(From the painting by Isidor Kaufmann.)

Kaufmann also polemized much in behalf of Judaism. Noteworthy among his writings along this line are: "Ein Wort im Vertrauen an Herrn Hofprediger Stöcker von Einem, Dessen Name Nichts zur Sache Thut" (Berlin, 1880); "Paul de Lagarde's Jüdische Gelehrsamkeit" (Leipsic, 1887), a defense of his friend and master Zunz; "Wie Heben Wir den Religiösen Sinn Unserer Mädchen und Frauen" (Treves, 1893); introduction to S. Heller's "Die Echten Hebräischen Melodien" (*ib.* 1893). He was also an active member of the Meḳiẓe Nirdamim, a society for the publication of old Hebrew manuscripts.

Kaufmann was the possessor of a large library, which contained many valuable manuscripts, incunabula, and first editions, and of which the Marco MORTARA library, acquired by Kaufmann, formed the nucleus.

BIBLIOGRAPHY: An entire Kaufmann literature has arisen, of which the following works may be mentioned: F. Rosenthal, biography in the *Kaufmann Gedenkbuch*; S. Krauss, *David Kaufmann*, Berlin, 1902; H. Bloch, in *Abendblatt* of the *Pester Lloyd*, July 10, 1899; D. H. Müller, in *Jahrb. des Vereines für Jüd. Gesch. und Literatur*, Berlin, 1900; L. Blau, in *Jahresbericht der Landesrabbinerschule*, 1900.

S. M. W.

KAUFMANN, ISIDOR: Hungarian painter; born March 22, 1853, at Arad. He was originally destined for a commercial career, and could fulfil his wish to become a painter only later in life. In 1875 he went to the "Landes-Zeichenschule" in Budapest, where he remained for one year. In 1876 he went to Vienna, but being refused admission to the

Academy of Fine Arts there, he became a pupil of the portrait-painter Aigner. He then entered the "Malerschule" of the Vienna Academy, and later became a private pupil of Professor Trenkwald. He devoted himself especially to genre painting. Particularly noteworthy are his paintings from Polish Jewish life. Among his works the following may be mentioned: "Der Besuch des Rabbi" (the original of which is in possession of the emperor Francis Joseph, in the court museum of Vienna); "Schachspieler"; "Der Zweifler" (for which he received the gold medal at the Vienna exhibition). Some of the other honors awarded to him are: the Baron Königswarter Künstler-Preis; the gold medal of the Emperor of Germany; a gold medal of the International Exhibition at Munich; and a medal of the third class at Paris.

KAUFMANN, MOSES JEKUTHIEL (known also as **Kaufmann Kohen Krotoschin**): Polish Talmudist; born at Krotoschin about the middle of the seventeenth century. He was a son-in-law of Abraham Abele Gombiner, and was rabbi at Kutno, Poland. He wrote "Ḥuḳḳat Torah," or "Yismaḥ Yisrael," annotations to Shulḥan 'Aruk and to later halakic works, in four parts, published between 1693 and 1701 at various places. He wrote also "Leḥem ha-Panim I.," annotations to Yoreh De'ah (Hanau, 1716; twice reprinted), and "Leḥem ha-Panim II.," a new recension, with additions, published by his son Abraham and printed with Abraham Abele Gombiner's glosses to Tosefta Neziḳin (Amsterdam, 1732). He left in manuscript: "Ḥayyim Arukkim," on Oraḥ Ḥayyim; "Ḥuḳḳat ha-Pesaḥ," on the Pesaḥ Haggadah; "Kele ha-Dayyanim," on Ḥoshen Mishpaṭ.

D. S. MAN.

KAULA AL-YAHUDI: Jewish general of the eighth century; appointed by Tariḳ; fought valiantly at Xerez against the Visigoths at the head of his army of Jews and Berbers, and occupied a part of Catalonia. He rose against the tyrannical Al-Ḥurr ibn 'Abd al-Raḥman, governor of Spain. Al-Ḥurr attacked him with a superior army and compelled him to retreat toward Lerida. There he was defeated, taken, and executed (718). The Jews in his army, pursued by Al-Ḥurr, were hospitably received by their coreligionists in the cities of Catalonia.

G. M. K.

KAULLA: Württemberg family, distinguished for patriotism and benevolence. The leading members have been:

Jacob Raphael Kaulla: German court banker; born at Buchau on the Feder-See about the middle of the eighteenth century; died at Hechingen May 1, 1810. By a decree dated June 27, 1806, King Frederick of Württemberg, "in view of the various services that the Kaulla family has rendered to the country in critical periods," conferred upon Jacob and a number of his immediate relatives and their descendants of both sexes all rights of citizenship in Württemberg. Jacob Kaulla and his sister Frau **Kiefe Auerbacher** (d. Hechingen March, 1809) were distinguished as philanthropists.

Leopold von Kaulla: Attorney at the supreme court of Bavaria; director of the Hofbank at Stuttgart; born March 25, 1813; died Jan. 16, 1886. He reorganized some of the institutions founded by his family, transferring them to Stuttgart, where they were incorporated under the name of "Kaulla'sche Familien-Stiftung" by King William I. of Württemberg March 18, 1856. He was an honorary member of the Jewish consistory of Württemberg.

S. J. STOS.

KAVALA or **CAVALA**: Settlement in Macedonia, on the Ægean Sea opposite the island of Thasos. It is nine miles southwest of Old Kavala, the ancient Neapolis. Kavala has 4,000 inhabitants, one-fourth of whom are Jews, originally from Salonica and Serres. The community was founded in 1860. It possesses a Jewish school attended by forty boys; a synagogue, erected in 1883; and a benevolent society, Ahawat ha-Ger. The Jews of Kavala are engaged mostly in the manufacture of tobacco products, the work being done only during the summer. The industry is fostered and subsidized by Jewish firms in Salonica. The rabbi (Abraham Molko in 1901) is also reader in the synagogue, mohel, and shoḥeṭ.

D. E. MS.

KAWWANAH (plural, **kawwanot**): Aside from the general idea of devotion conveyed by this Hebrew word (see DEVOTION), the term is used in the plural form by cabalists to denote ideas suggested by certain letters and words. In some prayer-books these are contained in marginal notes; in others they are inserted in the body of the text. They are generally traced to Rabbi Isaac Luria (16th cent.); and the title of such prayer-books contains the phrase כונות על פי האר"י ז"ל = "thoughts according to the view of R. Isaac Luria of blessed memory" (*e.g.*, "Seder 'Abodah u-Moreh Derek," Stawita, 1821; and "Seder Tefillah mi-Kol ha-Shanah ke-Minhag Ḳehillot Sefaradim," Vienna, 1819).

With regard to certain religious acts prescribed by the Law, kawwanah (*i.e.*, the intention to carry out a divine precept) is required; and the question arises whether, for example, one who has accidentally heard the sounding of the shofar on the first day of Tishri without thinking of the divine command (Num. xxix. 1) may be considered as having satisfied the Law (being "yoẓe"). The Talmudical authorities are divided on the question (R. H. iii. 7-8; Ber. 13). All agree, however, that kawwanah in the performance of a "miẓwah" is desirable; wherefore it became a general custom before saying the blessing to make a distinct declaration, "I am ready and prepared to perform the divine command of . . ." Regarding intention as a decisive factor in violations of the Law, see IGNORANCE OF THE LAW; INTENTION.

K. M. F.

KAYSER, PAUL: German jurist and diplomat; born at Oels, Silesia, Aug. 9, 1845; died at

Leipsic Feb. 13, 1898. He was admitted to the bar in 1872; became city judge in Berlin in 1875; was appointed "Regierungsrath" in the department of justice in 1880, and "Geheimer Regierungsrath" in the imperial department of insurance ("Reichsversicherungsamt") in 1885. In that same year he was transferred as "Wirklicher Legationsrath" and "Vortragender Rath" to the department of state. He became "Geheimer Legationsrath" in 1888, assistant chief of the colonial department in 1890, and "Wirklicher Geheimer Legationsrath" in 1891. In 1894 he was made chief of his department. Having been connected for more than ten years with the colonial department, he received (1896) the appointment of "Senats-Präsident" in the "Reichsgericht" (the highest judicial court of Germany) at Leipsic. He embraced the Protestant faith. Kayser wrote: "Abhandlungen aus dem Prozess- und Strafrecht," Berlin, 1873; "Die Strafgerichtsverfassung und das Strafverfahren," Paderborn, 1879; "Die Gesamten Reichsjustizgesetze," Berlin, 1879–80, 5th ed. *ib.* 1894; "Die Aktiengesetznovelle von 18 Juli, 1884, mit Erläuterungen," *ib.* 1884, 2d ed. 1891; "Die Gewerbeordnung mit Erläuterungen," *ib.* 1883, 2d ed. 1884.

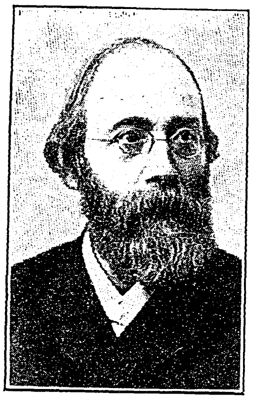
KAYSERLING, MEYER: German rabbi and historian; born in Hanover June 17, 1829; educated at Halberstadt, Nikolsburg (Moravia), Prague, Würzburg, and Berlin, in the university of which last-named city he devoted himself to history and philosophy. Encouraged in historical researches by Leopold von Ranke, Kayserling turned his attention to the history and literature of the Jews of the Pyrenean peninsula. In 1861 the Aargau government appointed him rabbi of the Swiss Jews, which office he held until 1870. During his residence in Switzerland he developed a zealous activity in favor of civil equality for his coreligionists, both then and later valiantly facing the charges brought against them. In 1870 he accepted a call as preacher and rabbi to the Jewish community of Budapest. Kayserling, who is a member of the Royal Academy in Madrid, of the Trinity Historical Society, etc., is the author of the following works:



Meyer Kayserling.

Moses Mendelssohn's Philosophische und Religiöse Grundsätze mit Hinblick auf Lessing, Leipsic, 1856.

Sephardim. Romanische Poesien der Juden in Spanien. Ein Beitrag zur Literatur und Gesch. der Spanisch-Portugiesischen Juden, Leipsic, 1859; Hebrew transl. in "Ha-Asif," iv., v.

Ein Feiertag in Madrid. Zur Gesch. der Spanisch-Portugiesischen Juden, Berlin, 1859.

Gesch. der Juden in Navarra, den Baskenländern und auf den Balearen, oder Gesch. der Juden in Spanien, I., Berlin, 1861.

Menasse ben Israel. Sein Leben und Wirken. Zugleich ein Beitrag zur Gesch. der Juden in England, Berlin, 1861; English transl. by F. de Sola Mendes, London, 1877.

Moses Mendelssohn. Sein Leben und Seine Werke, Leipsic, 1862; a second edition of this work, enlarged and revised, bears the title "Moses Mendelssohn. Sein Leben und Wirken," Leipsic, 1888.

Der Dichter Ephraim Kuh. Ein Beitrag zur Gesch. der Deutschen Literatur, Berlin, 1864.

Zum Siegesfeste. Dankpredigt und Danklieder von Moses Mendelssohn, Berlin, 1866.

Gesch. der Juden in Portugal, Berlin, 1867.

Die Rituale Schlachtfrage, oder Ist Schächten Thierquälerei? Aargau, 1867.

Bibliothek Jüdischer Kanzelredner. Eine Chronologische Sammlung der Predigten, Biographien und Charakteristiken der Vorzüglichsten Jüdischen Prediger. Nebst einem Homiletischen und Literarischen Beiblatte, 2 vols., Berlin, 1870–72.

Die Judeninsel und der Schiffbruch bei Koblenz, Baden, 1871.

Die Jüdischen Frauen in der Geschichte, Literatur und Kunst, Leipsic, 1879; translated into Hungarian by M. Reismann, Budapest, 1883.

Das Moralgesetz des Judenthums in Beziehung auf Familie, Staat und Gesellschaft, published anonymously, Vienna, 1882.

Die Blutbeschuldigung von Tisza-Eszlár Beleuchtet; also in Hungarian, Budapest, 1882.

Der Wucher und das Judenthum; also in Hungarian, Budapest, 1882.

Moses Mendelssohn. Ungedrucktes und Unbekanntes von Ihm und über Ihn, Leipsic, 1883.

Refranos é Proverbios de los Judios Españoles, Budapest, 1889.

Biblioteca Española-Portugueza-Judaica. Dictionnaire Bibliographique, Strasburg, 1890.

Dr. W. A. Meisel. Ein Lebens- und Zeitbild, Leipsic, 1891.

Sterbetage aus Alter und Neuer Zeit, Prague, 1891.

Gedenkblätter. Hervorragende Jüdische Persönlichkeiten des Neunzehnten Jahrhunderts. In Kurzen Charakteristiken, Leipsic, 1892.

Christopher Columbus and the Participation of the Jews in the Spanish and Portuguese Discoveries, translated from the author's manuscript by Charles Gross, New York, 1894; German ed., Berlin, 1894; Hebrew transl., Warsaw, 1895.

Die Jüdische Litteratur von Moses Mendelssohn bis auf die Gegenwart, reprinted from Winter and Wünsche, "Die Jüdische Litteratur seit Abschluss des Kanons," Treves, 1896.

Ludwig Philippson. Eine Biographie, Leipsic, 1898.

Die Juden als Patrioten, a lecture, Berlin, 1898.

Die Juden von Toledo, a lecture, Leipsic, 1901.

Isaak Aboab III. Sein Leben und Seine Dichtungen, in Hebrew, Berdychev, 1902.

Besides these works and a number of sermons published at different times, Kayserling has contributed to the different Jewish magazines published in Hebrew, German, English, and French; he has also issued a new revised edition of Hecht's "Handbuch der Israelitischen Gesch." (1874; 7th ed., 1901); and since 1884 he has prepared that part of the "Jahresberichte der Geschichtsforschung" (Berlin) which treats of the Jews.

S.

KAYSERLING, SIMON: German educator and writer; born at Hanover Aug. 31, 1834; died there April 22, 1898; brother of Meyer Kayserling. He attended the Talmud school in Würzburg and the University of Berlin. He was the principal teacher and inspector of the M. M. David'sche Freischule from 1861, and taught for several years in the Jewish teachers' seminary in Hanover.

Kayserling translated into German from a French version, which had been corrected by Lelewel, J. J. Benjamin's "Yewen Mezulah" (Hanover, 1863), an account of the Polish-Cossack war and of the sufferings of the Jews in Poland during the period

1648–53; also F. D. Mocatta's "The Jews of Spain and Portugal and the Inquisition" (*ib.* 1878).

s. M. K.

ḲAYYARA, SIMEON: Babylonian halakist of the first half of the ninth century. The early identification of his surname with "Ḳahirah," the Arabic name of Cairo (founded 980), was shown by Rapoport ("Teshubot ha-Ge'onim," ed. Cassel, p. 12, Berlin, 1848) to be impossible. Neubauer's suggestion ("M. J. C." ii., p. viii.) of its identification with Ḳayyar in Mesopotamia is equally untenable. It is now generally and more correctly assumed that "Ḳayyara" is derived from a common noun, and, like the Syro-Arabic "ḳayyar," originally denoted a dealer in pitch or wax.

The "Halakot Gedolot."

Ḳayyara's chief work was the "Halakot Gedolot," or, as it is called by some Spanish authors, to distinguish it from later halakic codices of a similar nature, "Halakot Rishonot" (see "Ha-Ma'or," Ket. v.; Ḥul. i.; RaMBaN, "Milḥamot" to Shab. iii.; I. Halevy, "Dorot ha-Rishonim," iii. 103). It gives the entire halakic and practical material of the Talmud in a codified form, and seems to represent the first attempt to treat it according to its contents rather than according to the arrangement of its treatises (for further details see Law, Codification of).

As to the time of its composition all the older authorities are silent. Abraham ibn Daud alone has an allusion to this problem, which has caused much perplexity. According to him ("Sefer ha-Ḳabbalah," in "M. J. C." i. 63), "Simeon Ḳayyara wrote his work in the year 741, and after him lived Yehudai Gaon, author of the 'Halakot Pesuḳot,' which he compiled from Simeon's 'Halakot Gedolot.'" According to Epstein, there can be no doubt that Simeon Ḳayyara wrote the "Halakot Gedolot," although some authors ascribe this work to Yehudai Gaon. Ancient authorities, like the geonim Sherira and Hai ben Sherira ("Teshubot ha-Ge'onim," ed. Harkavy, No. 376; Isaiah di Trani, "Ha-Makria'," No. 36; "Teshubot Ge'onim Ḳadmonim," ed. Cassel, No. 87, Berlin, 1848), Samuel ben Jacob נאמע, of Kabez, author of Arabic rules for slaughtering (see Steinschneider in Geiger, "Jüd. Zeit." ii. 76), Israel ben Abba Mari of Marseilles ("'Ittur," ed. Warsaw, p. 65a; comp. "Halakot Gedolot," ed. Warsaw, 191b; ed. Hildesheimer, p. 387), and others, testify to this fact. It is also evident from the statements of these authorities that Simeon Ḳayyara's chief sources were the "She'eltot" of R. Aḥa of Shabḥa and the "Halakot Pesuḳot" of Yehudai Gaon.

Sources.

The Hildesheimer edition of the "Halakot Gedolot," Index, p. 140, gives no less than eighty-three passages in which the "She'eltot" has been cited (Reifmann, in "Bet Talmud," iii. 111 *et seq.*, gives 109 passages); and it has in addition more than forty literal though unacknowledged quotations from this same source. It is more difficult to trace material borrowed from Yehudai Gaon's "Halakot Pesuḳot," since the original form of that work has been lost. A comparison with the redaction of Yehudai Gaon's composition, which has been preserved as the "Halakot Pesuḳot" or "Hilkot Re'u" (ed. Schlossberg, Versailles, 1886), shows that most of the halakot in that recension are found in the "Halakot Gedolot," although they deviate from it both in wording and in arrangement. Simeon Ḳayyara, however, used yet another recension of the "Halakot Pesuḳot," and at times cites both. There were of course other sources at his disposal which have not been preserved. Not only does the fact that both the "She'eltot" and the "Halakot Pesuḳot" were used, but also certain passages in the "Halakot Gedolot" of themselves, prove that the work was composed about the year 825, apparently at Sura, since many explanations and usages of the "Halakot Gedolot" are elsewhere cited under the names of Geonim of that place.

Interpretations and Redactions.

In the course of time the "Halakot Gedolot" underwent many changes. In Spain and in North Africa the legal decisions of the Geonim were incorporated into the book, and its whole appearance was so changed that gradually a different recension was developed. The original or Babylonian redaction exists in printed form in the editions of Venice (1548), Amsterdam (1762), Vienna (1810), etc., and finally in that of Warsaw (1874, with an index of passages and notes by S. A. Traub). This redaction was used by the Babylonian geonim and by the German and northern French scholars; for the citations of the latter from the "Halakot Gedolot," which work they ascribe to Yehudai Gaon, refer to this recension. The second or so-called Spanish redaction (מהדורת אספמיא) exists in a manuscript in the Vatican, and has been edited by I. Hildesheimer in the collection of the Meḳiẓe Nirdamim (Berlin, 1888–92). The material of this recension is much richer and more comprehensive, since it contains many passages from the Talmud, mnemonic introductory words ("simanim"), the order of the weekly lessons, and, most important of all, legal decisions of the Geonim, usually indicated by the term "shedar" (= "he sent"), which are lacking in the earlier redaction (see I. Hildesheimer, "Die Vaticanische Handschrift der Halachoth Gedoloth," in "Beilage zum Jahresberichte des Rabbinerseminars zu Berlin," 1885–96, and Schorr in "He-Ḥaluẓ," xii. 100). The first gaon of whom a "teshubah" is mentioned in this recension is Yehudai Gaon; the last, Ẓemaḥ ben Palṭoi (d. 890). Epstein has concluded, accordingly, that this redaction was made, or rather finished, about the year 900, in some place where the Jews were in close literary correspondence with the Babylonian seminaries. This was either in Spain or in northern Africa—probably in Kairwan, the center of Talmudic studies at that time. Evidence in favor of Kairwan is supplied by a passage in the "Halakot Gedolot" (ed. Hildesheimer, p. 175), which mentions a usage as being common among the "Bene Afriḳa"; for it is known that "Afriḳa" frequently connotes Kairwan. From northern Africa or Spain this recension was carried into Italy: it was used by the scholars of these three countries; and all of them regarded Simeon Ḳayyara as its author.

In the twelfth century the recension was brought to northern France, and in the thirteenth to Germany, where it is sometimes cited by the scholars of both countries as "Halakot Gedolot shel Aspamia" (see R. Tam, "Sefer ha-Yashar," No. 509; "Or Zarua," B. M. No. 276; Sanh. No. 23). On the other hand, the Babylonian redaction in the thirteenth century reached Italy, where it was used by Isaiah di Trani (see "Ha-Makria‘," No. 31).

G. M. Sc.

KAẒ: A frequent Jewish family name, spelled also "Katz," and found in similar forms, such as "Katzer." It is an abbreviation formed from the initials of the name "Kohen Ẓedeḳ" (כ"ץ), and has been used since the seventeenth century, or perhaps somewhat earlier, as an epithet of the supposed descendants of Aaron. The collocation is most likely derived from Melchizedek ("king of righteousness"), who is called "the priest [" kohen "] of the most high God" (Gen. xiv. 18), or perhaps from Ps. cxxxii. 9: "Let thy priests be clothed with righteousness [" ẓedeḳ "]."

If the reading is correct, this abbreviation occurs on a tombstone, dated 1536, in the cemetery of Prague (Hock, "Die Familien Prag's," p. 175); it is found also on a tombstone of the year 1618 in Frankfort-on-the-Main (M. Horowitz, "Die Inschriften des Alten Friedhofes der Israelitischen Gemeinde zu Frankfurt-a.-M." 1901, p. 63), in the books of the Soncino family of Prague of the seventeenth century (Zunz, "Z. G." p. 262), and in one of the prefaces to Shabbethai ben Meïr ha-Kohen's notes on the Ḥoshen Mishpaṭ (Amsterdam, 1663). See Cohen.

KAZIMIERZ. See Cracow.

KEAN, EDMUND: English actor; born in London Nov. 4 (?), 1787; died at Richmond, near London, May 15, 1833. He was the natural son of Aaron Kean, a Jew (Stirling, "Old Drury Lane," ii. 131). Contemporary writers have alluded frequently to Kean's Jewish physiognomy. Kean was deserted by his mother in infancy and was reared by a Miss Tidswell, while his uncle Moses gave him perfunctory instruction in mimicry. In May, 1801, Kean appeared in "King John" as *Prince Arthur* to the *King John* of Kemble and the *Constance* of Mrs. Siddons. Finding his mother, Kean went into the provinces with her; later he was adopted by a Mrs. Clark, but ran away in 1803 and joined a traveling circus, in which he broke both his legs. On his recovery he was summoned to Windsor to recite before the king. Refusing an offer to join the Drury Lane Theatre on the ground of lack of experience, he traveled through the provincial towns, at one time with Mrs. Siddons. The turning-point of Kean's career occurred on Nov. 14, 1813, when his acting drew the attention of Dr. Arnold, a director of the Drury Lane Theatre, who engaged him for three years at a salary ranging from eight to twelve guineas weekly. On Jan. 26, 1814, Kean appeared in "The Merchant of Venice." His performance of the part made him famous immediately. He took rank as the first actor of the day, and even displaced John Philip Kemble, whose powers were now declining. For eleven years he maintained his position, but in 1825 was made corespondent in a divorce suit instituted by Alderman Cox, and when he next appeared before the public he was hooted off the stage; from this period his popularity sensibly declined.

In 1820 Kean went to America, and appeared in New York (Nov. 29). He scored great successes in New York, Boston, and Philadelphia. In 1825 he returned to America to escape the unpopularity which the suit had created, but Boston mobbed and stoned him, and he had to be smuggled out of the city at night. He remained in America, however, to the end of 1826; on his return to England he was cordially received, but dissipation had wrecked his health, and on March 25, 1833, he broke down while playing *Othello* to the *Iago* of his son Charles. He died a few weeks later. Kean was a master of high-tensioned emotion. In level scenes he was very indifferent. He was admirably adapted for such characters as *Shylock*, *Othello*, and *Richard III.* *Romeo*, as he himself confessed, was beyond his powers.

KECSKEMÉT. See Hungary.

KEDAR: One of the sons of Ishmael (Gen. xxv. 13; I Chron. i. 29). The name is also applied in Scripture to the tribe that sprang from him, and is likewise used for the Bedouins generally, whose characteristic traits are ascribed to Kedar (Cant. i. 5; Isa. xxi. 16, xlii. 11, lx. 7; Jer. ii. 10, xlix. 28; Ezek. xxvii. 21). While very little is known of Kedar, the head of the tribe, his posterity, called also the "Bene Kedar" (Isa. xxi. 17), are described as barbarous tribes in connection with Mesech. "Woe is me," says the Psalmist (Ps. cxx. 5), "that I sojourn in Mesech, that I dwell in the tents of Kedar!" According to other passages, they appear to have been rich in flocks of sheep and goats, in which they traded with the Syrians (Ezek. xxvii. 21; Jer. xlix. 49). They dwelt in tents of black hair (Cant. i. 5) in the midst of the wilderness of Arabia, and were known as skilful archers (Isa. xxi. 17). But they also settled in villages or towns (Isa. xlii. 11). According to Mohammedan tradition, Kedar ("Ḳaidhar") was the ancestor of Mohammed; and it is through him that Mohammed's descent is traced to Ishmael (Caussin de Perceval, "Essai," i. 175).

E. G. H. B. P.

ḲEDESHAH (plural, **Ḳedeshot**)**:** The ḳedeshot were sacred prostitutes attached to the Temple as priestesses of Ashtoreth or Astarte. The worship of Ashtoreth was introduced by Solomon (I Kings xi. 5); and it is possible that the obscene rites connected therewith were practised near the Temple, which was practically a chapel royal while the kingdom lasted. It is even stated that Tamar adopted the professional dress of a ḳedeshah to ensnare Judah (Gen. xxxviii. 21). The male counterparts of the ḳedeshot, the ḳedeshim, are mentioned in the reign of Rehoboam (I Kings xiv. 24); they were removed by Asa (*ib.* xv. 12) and by Jehoshaphat (*ib.* xxii. 47); and Josiah even found it necessary to break down their houses at the time of his reforms (II Kings xxiii. 7). Hosea (iv. 14) refers to ḳedeshot. The Deuteronomic legislation, which represents Josiah's reformation, declared against the practise of such rites. "There shall be no ḳedeshah of the daughters of Israel, nor a ḳadesh of the sons of Israel" (Deut. xxiii. 18, Hebr.). It is doubtful, however, whether the rites were altogether abolished; for Ezekiel gives a full account of them, obviously from scenes witnessed during his lifetime (Ezek. xxiii. 36–48). It is even probable that there was reversion to these rites by Jehoiakim (II Kings xxiii. 37), Jehoiachin (*ib.* xxiv. 9), and Zedekiah (*ib.* 19). It has been suggested by Jacobs that the NETHINIM were the descendants of these ḳedeshot.

E. G. H. J.

ḲEDUSHSHAH (lit. "holiness"): The third benediction of the 'Amidah is called "Holiness of the Name" (R. H. iv. 4), to distinguish it from "Holiness of the Day," the benediction which refers to the Sabbath or a festival; but "Ḳedushshah" in popular speech means the body of the Third Benediction, as recited aloud by the reader in the 'Amidah, with the responses, in which the congregation joins. Of responses there are at least three: (1) "Holy, holy, holy, is the Lord of hosts: the whole earth is full of his glory" (Isa. vi. 3); (2) "Blessed be the glory of the Lord from his place" (Ezek. iii. 12); (3) "The Lord shall reign for ever, even thy God, O Zion, unto all generations. Praise ye the Lord" (Ps. cxlvi. 10). In the Additional Service for Sabbaths and festivals, and in all the Atonement services, there are two further responses, evidently of later origin: (4) "Hear, O Israel, the Lord our God, the Lord is One," and (5) "I am the Lord your God." The privilege of joining in these responses is considered to be among the chief inducements for worshiping in public. The authorities speak of three kinds of Ḳedushshot—the Ḳedushshah Me'ummat, the Ḳedushshah Meyushshab, and the Ḳedushshah de-Siddur, each of which has a separate history (for which see Zunz, "G. V." p. 382 [2d ed., Note D], and Baer's "Prayer-Book").

The shortest form of the Ḳedushshah, that for work-days and for the afternoons of Sabbaths and festivals, runs thus:

Reader: "We will hallow Thy Name in this world, as they hallow it in the heavens on high [so the Germans; the Sephardim use words nearly like the German form for the Additional Service for Sabbaths]; as it is written by the hand of Thy prophet: 'And one calls to the other and says'":

Congregation: Resp. 1;

Reader: "Opposite to them they say [Sephardic form, "praise and say"]":

Congregation: Resp. 2;

Reader: "And in Thy holy words it is written thus":

Congregation: Resp. 3.

In the Morning Service for Sabbaths and festivals the Germans enlarge the introduction to the second and third responses in a devout and poetic vein; while their Ḳedushshah for the Additional of Sabbaths and festivals runs thus:

"We will revere and sanctify Thee, as in the secret whisper of the Holy Seraphim, who sanctify Thy Name in holiness, as it is written . . ." (Resp. 1). "Of His glory the earth is full; His ministers ask each other, Where is the place of His glory? Opposite . . ." (Resp. 2). "May He from His place turn in mercy and show favor to the people who unify His name, who evening and morning, each day, unceasingly in love cry twice, Hear!" (Resp. 4). "One is our God; One, our Father; One, our King; One, our Saviour; He will proclaim to us in His mercy again in the presence of all that liveth; to be your God" (Resp. 5). "And in Thy holy words . . ." (Resp. 3).

The Sephardim introduce the first response in the Additional Service thus:

Sephardic Form.

"The crown ["keter"], O Lord, our God, the angels, the throngs on high, offer to Thee; also Thy people Israel, who are gathered below; all of them, as one, sound the 'Thrice Holy' to Thee, as it is written," etc. The ḤASIDIM and the South-Russian Jews have adopted this among other features of the Sephardic ritual. After the last response the reader proceeds, in the German ritual: "To all generations we will tell of Thy greatness, and to all eternity we will sanctify Thy holiness; and Thy name, our King, shall never cease from our mouth; for Thou art a great and holy God and King; blessed . . ."; while among the Sephardim the reader proceeds with the benediction as in the silent prayer.

Neither the Mishnah in the above-cited section, nor the Babylonian Talmud, which (Meg. 17b) sets forth the order and contents of all the benedictions, nor the Palestinian Talmud says anything about the responses; and the references in Mishnah and Gemara to the "Holiness of the Name" would be satisfied by the benediction in the silent prayer: "Thou art holy and Thy Name is holy, and the Holy Ones praise Thee every day; Selah; blessed . . . be the Holy God." But it is highly probable that the responsive Ḳedushshah in the modern sense is very old, and that it was known to Hillel and Shammai; for it could not have been introduced later on without causing a dispute that would have left its traces in the Talmud. Moreover, the Jerusalem Talmud (Ber. v. 4), in referring to the passage in Ezekiel known as "Ofannim" (wheels), speaks of a benediction before the morning Shema' in which the first and second responses are introduced as coming from two classes of angels; this passage must therefore have been written in or before the third century, probably in order to give to the private worshiper some substitute for the Ḳedushshah, which is recited only in public. An idea of the importance attached to it may be gathered from the statement (Soṭah 49a), "Since the destruction of the Temple the world is sustained by the Ḳedushshah." Moreover, the "Thrice Holy" is found in the earliest Christian rituals, and must have been borrowed by the Church from the Synagogue at an early day (see DIDASCALIA and LITURGY).

In the Siddur of R. Amram not only is the Ḳedushshah fully developed, but much space is given to wildly legendary compositions, for the use of those who miss hearing it at the synagogue. The collection "And a Redeemer cometh to Zion," in which the verses containing the three responses (Ex. xv. 20 taking the place of the third) are recited along with an Aramaic paraphrase, was put at the end of the morning services to console those who miss the Ḳedushshah.

KEEFAR-NAHUM. See Capernaum.

KEFAR-SALAMA (CAPHAR-SALAMA): Scene of Nicanor's unsuccessful attack upon Judas Maccabeus (I Macc. vii. 31; comp. Josephus, "Ant." xii. 10, § 4). The exact site is somewhat doubtful. There are several names of places in modern Palestine between Jaffa and Jerusalem which may be identified with this one. Kefar-Salama has been supposed to be identical with the Carva Salim mentioned just before the Crusades as being near Ramleh, where later was a casal of the Knights Hospitalers. It has been identified also with the Kefar Shalem mentioned in the Talmud ('Ab. Zarah 31a); but this latter is regarded by Neubauer as the place Salim near which John was baptizing (John iii. 23).

ḲEHILLAH. See Community, Organization of.

KEILAH (Hebr. קעילה): **1.** A city of Judah in the Shephelah, commonly identified with the modern Khurbat Kila, seven miles east of Eleutheropolis. The city is first mentioned in the Bible in the list of Judah's cities "in the valley" (Josh. xv. 44). The city, threatened by the Philistines, was taken by David (I Sam. xxiii. 1-13). Nehemiah (iii. 17, 18) incidentally mentions Keilah, naming among those who assisted in building the wall at Jerusalem the rulers of the two parts into which the city was divided in his day.

2. A Garmite (I Chron. iv. 19). His name was more properly Abi-Keilah (Hebr. אבי קעילה). He is mentioned in a chronological list in conjunction with Eshtemoa the Maachathite as a son of Hodiah, the sister of Naham. The passage is obscure; "Garmite" (Hebr. הגרמי) occurs here only.

E. G. H. C. J. M.

KELIM ("Utensils"): Treatise in the Mishnah and in the Tosefta, dealing chiefly with a more precise definition of the rules in Lev. xi. 32 *et seq.*, Num. xix. 14 *et seq.*, and xxxi. 20 *et seq.* The name "Kelim" is found in the Mishnah itself (Kelim xxx. 4). In most editions of the Mishnah, and in the Tosefta, this treatise stands first in the series Ṭohorot, and is divided into thirty chapters, containing altogether 252 paragraphs.

Ch. i.: The chief kinds of unclean things ("abot ha-ṭum'ot") which defile men and vessels when these touch them, but not when carried (§ 1). Different degrees of uncleanness, the highest being that of a corpse, which defiles everything in the same room with it (§§ 2-4). The ten degrees of uncleanness in connection with the person (§ 5). The ten degrees of sanctity—from the Holy Land to the Holy of Holies (§§ 6-9).

Ch. ii.: Utensils of wood, leather, bone, and glass that can become unclean; those that can not. How earthen vessels may become unclean (§ 1). How large an earthen vessel must be before it becomes susceptible of defilement (§ 2). Earthen vessels that can not become unclean (§§ 3-6); those that can (§§ 7-8).

Ch. iii.: How large a hole must be made in an unclean earthen vessel in order to render it clean (§§ 1-2). Conditions under which a vessel ceases to be legally a "utensil," and becomes, therefore, incapable of defilement (§§ 3-8).

Clean and Unclean Earthenware.

Ch. iv.: Details concerning broken earthenware vessels. How long earthen vessels may be used before they should be discarded as liable to defilement.

Ch. v.: The size and duration of an oven in regard to its liability to defilement (§ 1); the size of a fireplace (§ 2). Further details concerning ovens (§§ 3-6). How a defiled oven may be purified (§§ 7-9). The oven of Akhnai; the baking-holes of the Arabs; the oven of Ben Dinai (§ 10). Stone and metal ovens (§ 11).

Ch. vi. and vii.: Further details concerning ovens and fireplaces; how the Nazarite fireplaces in Jerusalem were made.

Ch. viii.: How the oven may become unclean, and when its contents also become unclean (§§ 1-11).

Ch. ix.: Regulations concerning objects which are contained within other objects (*e.g.*, liquids held in sponges), which come within the area contaminated by an unclean vessel, or which are in a tent containing a dead body.

Ch. x.: Vessels which, by means of a cover fastened over them (comp. Num. xix. 15), protect their contents from defilement (§§ 1, 7-8). How such a cover must be secured to the vessel (§§ 2-6).

Ch. xi.-xiii.: Metal vessels that can be defiled and metal vessels that can not.

Metal Vessels.

Ch. xiv.: How large metal vessels must be before they are liable to defilement (§ 1). Other kinds of metal utensils, some of which can become unclean, while others can not (§§ 2-6). When a metal vessel that has been broken becomes clean again (§§ 7-8).

Ch. xv.: The shapes and sizes in vessels of wood, leather, bone, and glass which render them liable to defilement. In this connection it is stated that all copies of the Scriptures, with the exception of that in the forecourt of the Temple, rendered the hands unclean.

Ch. xvi.: The period of time after which various wooden utensils may become unclean (§§ 1-3); the period after which various utensils of leather may become unclean (§ 4). An enumeration of different utensils, some of which can become unclean, while others can not (§§ 5-8).

Ch. xvii.: The size of the hole in various utensils which will render them clean. The dates, olives, pomegranates, etc., used as measures must be of medium size (§§ 1-8). In this connection it is noted that both cubit measures in the Temple were larger than those in use at the time of Moses (§ 9). Further details concerning measures (§§ 10-12). Vessels made from the skins of marine animals, excepting the seal, can not become unclean (§ 13). Other utensils. Regarding utensils made for purposes of deceit, R. Johanan b. Zakkai says: "Wo is me if I mention these things [because many may thus learn how they are made]! Wo is me if I mention them not [because it must be known how such utensils are to be used to avoid defilement]!"

Beds and Furniture.

Ch. xviii.-xx.: Beds and other objects which may become unclean through "midras" (*i.e.*, through lying, sitting, or stepping upon them), and the various utensils which may become unclean in other ways.

Ch. xxi.: On composite utensils—looms, plows, saws, and carpenters' presses.

Ch. xxii.: On tables, benches, bridal seats, etc.

Ch. xxiii.: Enumeration of those articles used in riding which may become unclean. Difference between their uncleanness when so used and their uncleanness when used as seats.

Ch. xxiv.: On those things which, according to their composition, become thrice liable to defilement.

Ch. xxv.: The outside and the inside, the stands, edges, and handles of utensils. Utensils may become unclean merely by being intended for a certain purpose, losing their uncleanness only when a material change is made in them.

Ch. xxvi.: On sandals, pouches, skins, and coverings. Cases in which the mere intention to use certain vessels for certain purposes renders them unclean; other vessels that can not become unclean because of such intention.

Clothing.

Ch. xxvii.-xxviii.: How large clothing, sacks, skins, etc., must be in order to become capable of defilement; further details concerning uncleanness in these and similar objects.

Ch. xxix.: To what extent a cord shares the uncleanness of the object to which it is attached; details concerning the measuring of cords. Particulars concerning the dimensions of the handle of an ax, of a spade, etc.

Ch. xxx.: Regulations concerning utensils of glass. The treatise concludes with an exclamation of R. Jose: "Hail to thee, O Kelim! Thou beganest with 'Impure' and endest with 'pure.'" This sentence is of interest as showing that Kelim in its present form was written before Judah ha-Nasi, since Jose belongs to the generation next to the last of the Tannaim.

Tosefta.

In the Tosefta the treatise Kelim, probably because of its size, is divided into three parts ("babot"), comprising twenty-five chapters in all. The Tosefta Kelim contains much that may serve to elucidate the Mishnah; for example, in Tosef., B. Ḳ. i. 14 the exegetical basis of Mishnah i. 8 is given. Especially noteworthy is the saying of R. Jose (B. M. v. 2), which attempts to explain the contradiction between I Kings vii. 26 and II Chron. iv. 5.

KELLER, NAPHTALI: Austrian scholar; born at Tarnow, Galicia, Jan. 25, 1834; died at Rožnau, Moravia, Aug. 5, 1865; son of Israel Mendel Keller, a well-to-do innkeeper. Naphtali as a mere youth practised speaking Hebrew with his friend M. Weissmann and began to write poems in that language. He also acquired a certain amount of modern culture by means of Hebrew educational literature. After losing in business the marriage portion given him by his father-in-law, he went with his wife and four children to Vienna, and there eked out a toilsome existence as a broker.

In 1864 he published with great care and impartiality the first volume of the Hebrew periodical Bikkurim. In the spring of 1865, on the advice of his physician, he went to Rožnau, a watering-place, to seek relief from an illness which had attacked him in the previous year; but he died there.

Keller was the author of two stories: (1) "Sullam ha-Haẓlaḥah," written in imitation of the "David Barnay" of Julius Rodenberg, and first printed in "Ha-Maggid" (1863), and (2) "Debeḳ lo Ṭob," a tale of Galician Jewish life, which first appeared in "Bikkurim" (1866). These stories were published at Warsaw in 1880 under the collective title "Sippure Naftali."

Bibliography: *Bikkurim*, ii., pp. xvi. *et seq.*; Szántó, *Jahrbuch für Israeliten*, 1866-67, p. 52; M. Weissmann, in *Ha-Maggid*, 1869.

S. M. Sc.

KELLNER, LEON: Austrian scholar; born at Tarnow 1859. He studied Bible and Talmud up to the age of eighteen, then academic subjects at the Jewish Theological Seminary of Breslau and at the gymnasium of Bielitz, and subsequently Germanic philology, especially English, at the University of Vienna (Ph.D. 1884). In 1890 he became privat-docent in English philology at the University of Vienna, being at the same time professor at a "Realschule" in Vienna. In 1904 he was appointed assistant professor of English language and literature at the University of Czernowitz.

Kellner's works include an edition of Caxton's "Blanchardyn and Eglantine" (for the Early English Text Society), 1890; "Historical Outlines of English Syntax," London, 1892; "Shakespeare," Leipsic, 1900; "Ein Jahr in England," Stuttgart, 1900; and a new edition of Thieme's "Englisches Wörterbuch," Brunswick, 1903. S.

KELMER MAGGID. See Moses Isaac of Chelm.

KELTER, ARTHUR: American athlete; born in New York city March 3, 1869; went to San Francisco, Cal., when nine years old. Kelter became a gymnast and also took up roller-skating as a profession. He holds the record for jumping on skates, which he established at San Francisco in 1887, when in a competition he cleared twenty-two chairs at one jump. Kelter was the winner of the all-round gymnastic competition of the state of California for five years in succession (1887-91), and in 1890 he also won the wrestling championship of that state at 125 lbs. Subsequently Kelter took to running, jumping, pole-vaulting, and putting the shot.

In Oct., 1897, Kelter accepted the management of the new Manhattan Athletic Club in New York city, and retained his position until the club closed its doors. He then took charge of the Educational Alliance Gymnasium, New York, where he has been active during the past five years. He is now engaged as a professional wire-walker.

A. F. H. V.

KEMPNER, FRIEDERIKE: German poet; born at Opatow, Posen, June 25, 1836; died at Friederikenhof Feb. 23, 1904. She early developed an interest in general humanitarian questions and especially in hygiene, and urgently advocated the introduction of morgues and crematories, and the abolition of solitary confinement. Some years before her death she was stricken with blindness. She resided on her estate of Friederikenhof, near Reichsthal, where she wrote: "Gedichte," 2d ed., Breslau, 1852 (frequently republished); "Novellen," 1861; "Denkschrift über die Nothwendigkeit einer Gesetzlichen Einführung von Leichenhäusern," 1867 (republished five times); "Nettelbeck als Patriot und Kosmopolit," a novel, 1868; and the following dramas: "Berenice," 1860; "Rudolf der Zweite," 1867; "Antigonos," 1880.

Bibliography: Brümmer, *Lexikon Deutscher Dichter und Prosaisten des Neunzehnten Jahrhunderts*, p. 409; *Allg. Zeit. des Jud.* March 18, 1904.
s. M. K.

KEMPNER, GABRIEL: Polish jurist and author; born at Kalisz, Poland, July 4, 1855. After having finished his curriculum at Kalisz he studied law in the University of Warsaw, where he was graduated.

Kempner has written lyric verses and translated the works of Heine, Richepin, Shelley, De Amicis, Ibsen, and others, and also Byron's "Manfred," Ponsard's "Enamored Lion," and Fulda's "Talisman." He is the dramatic critic of the "Przeglad Tygodniowy."
H. R. S. Po.

KEMPNER, MAX (pseudonyms: **Max Hochstädt, Max Kempner-Hochstädt, Eckart**): German author; born at Breslau March 5, 1863. He began his literary career when twenty-five, with a volume of poems, "Buch der Liebe," published in 1888. His next venture was "Warbeck," a tragedy, published in 1891. Then followed "Briefe der Zeitgenossen" (1892); "Feine Havanna" (1893); "Sünden Unserer Gesellschaft" (1894); "Studierten-Proletarier" (1894); "König Rhampsinit" (operetta, 1894); "Unsere Lieblinge" (1895); "Medea" (drama, 1895); "Harakiri" (drama, 1895); "Mon Plaisir" (1896); "P. Krafft" (comedy, 1897); "Der Herr von Pilsnitz" (farce, 1898); "Die Jahreszeiten" (dramatic poem, 1898); "Dorawskys Eheglück" (1899). At present (1904) Kempner is editor of the "Grosse Modenwelt" and publisher of "Mode und Haus."

Bibliography: Adalbert von Hanstein, *Das Jüngste Deutschland*, 1901, p. 316.

KEMPNER, STANISLAW ALEXANDER: Polish economist and publicist; born in 1857 at Kalisz, Poland; studied law in the University of Warsaw, and was graduated thence in 1882. While at the university he employed part of his time during 1879–81 in journalism. He subsequently became chief editor of the "Gazeta Handlowa," which he still (1904) conducts and in which he publishes numerous political and economic articles. Kempner is specially active in matters concerning commerce and commercial associations. He takes a lively interest also in the welfare and reform of the Jews.

Among the numerous writings of Kempner are: "Bismarck," a political sketch (1890); "Money" (1897); and "Monetary Crises," an economic sketch; and he has also contributed many important articles on different subjects to various encyclopedias. He is coeditor of the "Encyklopedja Powszechna" and of the "Encyklopedya Rolnicza," and editor of the economic department of the "Illustrated Universal Encyclopedia."
H. R. S. Po.

KENAZ (קנז): **1.** Son of Eliphaz, and grandson of Esau; one of the dukes of Edom (Gen. xxxvi. 11, 16, 42). His clan, called "the Kenizzite" (הקנזי), is mentioned once only, after the Kenites (Gen. xv. 19). **2.** A descendant of Judah, and father of Othniel (I Chron. iv. 13). "Father" here certainly means "ancestor"; for Othniel's elder brother, Caleb (Judges i. 13), is several times called "the Kenizzite" (A. V. "Kenezite," Num. xxxii. 12; Josh. xiv. 6, 14), that is, "descendant of Kenaz." **3.** A grandson of Caleb (I Chron. iv. 15).

KENEZITES. See Kenaz.

KENITES.—Biblical Data: A tribe of Palestine, mentioned in the time of Abraham as possessing a part of the promised land (Gen. xv. 19). At the Exodus it inhabited the vicinity of Sinai and Horeb; and to it belonged Jethro, the father-in-law of Moses (Judges i. 16). In Ex. iii. 1 Jethro is said to have been "priest of Midian" and a Midianite (Num. iv. 29); hence the conclusion seems justified that the Midianites and Kenites are identical. The Kenites journeyed with the Israelites to Palestine (Judges i. 16); and their encampment, apart from the latter's, was noticed by Balaam (Num. xxiv. 21–22).

At a later period some of the Kenites separated from their brethren in the south, and went to northern Palestine (Judges iv. 11), where they existed in the time of Saul. The kindness which they had shown to Israel in the wilderness was gratefully remembered. "Ye showed kindness to all the children of Israel, when they came up out of Egypt," said Saul to them (I Sam. xv. 6); and so not only were they spared by him, but David allowed them to share in the spoil that he took from the Amalekites (*ib.* xxx. 29).
E. G. H. B. P.

——**Critical View:** According to the critical interpretation of the Biblical data, the Kenites were a clan settled on the southern border of Judah, originally more advanced in arts than the Hebrews, and from whom the latter learned much. In the time of David the Kenites were finally incorporated into the tribe of Judah (I Sam. xxx. 29; comp. *ib.* xxvii. 10). Their eponymous ancestor was Cain (Kain), to whose descendants J in Gen. iv. attributes the invention of the art of working bronze and iron, the use of instruments of music, etc. Sayce has inferred (in Hastings, "Dict. Bible," *s.v.*) that the Kenites were a tribe of smiths—a view to which J's statements would lend support.

Jethro, priest of Midian, and father-in-law of Moses, is said (Judges i. 16) to have been a Kenite.

This indicates that the Kenites originally formed part of the Midianite tribe or tribes. In Ex. xviii. 12 *et seq.*, according to E, Jethro initiates Moses and Aaron into the worship of YHWH. Several modern scholars believe, in consequence of this statement, that YHWH was a Kenite deity, and that from the Kenites through the agency of Moses his worship passed to the Israelites. This view, first proposed by Ghillany, afterward independently by Tiele, and more fully by Stade, has been more completely worked out by Budde; and is accepted by Guthe, Wildeboer, H. P. Smith, and Barton.

The Kenites, then, were a nomadic tribe, more advanced in the arts of life than Israel. Their habitat, according to the first Biblical reference to them, was in the Sinaitic peninsula (unless Horeb is to be sought in Edom), and a part of them, viz., Jethro and his family (Num. x. 29-32; Judges *l.c.*), migrated with the Israelites to the neighborhood of Jericho, afterward settled in the south of Judah, and were finally absorbed by that tribe.

E. G. H. G. A. B.

KENNICOTT, BENJAMIN: English Christian Hebraist; born at Totness, England, April 4, 1718; died at Oxford Aug. 18, 1783. He was, at first, master of the "Blue Coat," or charity, school at Totness. Attracting the attention of the local gentry by some poems, he was sent to Wadham College, Oxford, where he became interested in Hebrew through the lectures of Professor Hunt, becoming Hody (Hebrew) Exhibitioner (1745-47) and taking the degree of B.A. (1747). He took holy orders, and ultimately became canon of Christ Church, Oxford (1770), and vicar of Mynhenyote, Cornwall (in the same year). Soon after he had taken his degree, Dr. Lowth suggested (1751) to him that he should do for the Old Testament what Mills had done for the New, and collect the "variæ lectiones" of the text. He set to work, and in 1753 published a pamphlet on "The Study of the Hebrew Printed Text of the Old Testament," which attracted attention, and caused a number of persons to agree to supply him with funds for the collection and collation of Hebrew manuscripts. He began serious work in this direction in 1758, after nearly £10,000 had been collected from numerous patrons of learning, including the kings of Denmark and Sardinia, and the stadholder of Holland. In 1760 and 1769 he printed reports for them on "The Collation of the Hebrew Manuscripts of the Old Testament," and in 1776 published at Oxford the first volume of his "Vetus Testamentum"; the publication of the second volume, with a "Dissertatio Generalis" on the text, in 1780, completed the work. The "Dissertatio Generalis" was republished separately by Bruns, at Brunswick, in 1783.

Kennicott's collations were by no means thorough, and were later supplemented by De Rossi, but they represented the first systematic examination of the manuscripts, and brought out clearly the practical uniformity of the Masoretic text. In England his method of editing was attacked by several persons, including Julius Bate, Fowler Comings, George Horne, and Prof. T. Rutherford, all of whom were answered by Kennicott or his friends. On the Continent his methods were severely criticized by O. C. Tychsen, and by J. D. Michaelis in his "Bibliotheca Orientalis" (part 11). In Paris a number of letters attacking Kennicott's text were published in 1771, and were said to have been written by a Jew named Dumay, who had assisted Kennicott in his work: an English translation of these letters appeared in 1772.

KENTUCKY: One of the south central states of the United States; admitted in 1792. Its most important Jewish community is at **Louisville** (population, in 1900, 204,731, of which about 7,000 are Jews). Two brothers named Heymann, or Hyman, from Berlin, seem to have been the first Jews in Louisville (about 1814). An organized Jewish society appears in the directory for 1832: there are ten names, but no family of the present time claims descent from them. About 1836 there arrived some Polish Jews from Charleston, S. C., and some German Jews from Baltimore, Md., and some direct from Germany; they united in religious work, bought a graveyard, built a miḳweh, and engaged a shoḥeṭ. A few wealthy Jews came from Richmond, Va., but they did not associate with the others and were absorbed by the non-Jewish element.

The first regular minister was J. Dinkelspiel, whose signature to a neatly written "ketubah" dated 1841 is still shown. In 1842 the Adas Israel congregation was chartered; the family names of its incorporators still survive. In 1848 it elected B. H. Gotthelf as cantor and shoḥeṭ, and when a secular school was established in 1854 he became its Hebrew teacher. In 1850 a synagogue was built on Fourth street between Green and Walnut streets, which was consumed by fire in 1866. A regular preacher, L. Kleeberg, from Elberfeld, Prussia, was then engaged, who remained till 1878. The secular school was abandoned in 1868, in which year a temple was finished, with a sexton's dwelling, and with Sabbath-school and meeting-rooms. In 1878 Dr. E. G. Hirsch became its preacher, but left in 1880, and, after a short interval, was succeeded by Dr. Adolph Moses (d. 1902). The present (1904) incumbent, Dr. H. G. Enelow, for a short time Dr. Moses' assistant, succeeded him.

Synagogues.

Adas Israel began with the West German minhag, but went further and further in the direction of Reform. It now uses the Union Prayer-Book, and has Sunday services in addition to the Sabbath worship. In 1851 the legislature granted a charter to "The Polish House of Israel"; but it was not until 1856 that a congregation availed itself of it, changing the name to "Beth Israel." From 1876 to 1881 only it had a regular preacher. A secession from it in 1880 of its West German members led to the formation of the B'rith Sholom congregation (Conservative), of which Dr. Ignatius Mueller is rabbi and preacher, and which worships in perhaps the finest church edifice in Louisville, at the corner of Second and College streets. A secession from Beth

Israel of some Russian members in 1881 led to the establishment of the Bnai Jacob congregation. The Beth Israel synagogue was sold in 1894; the remaining members reorganized as the Adas Jeshurun congregation, acquiring a small church building at the corner of Chestnut and Floyd streets. Their minister, Dr. S. F. Salinger, conducts a Hebrew school for the sons of the members. The old B'rith Sholom synagogue, on First street, near Walnut street, has been acquired by the Anshei Sfard, most of whom are South-Russians, worshiping after the ritual of the Ḥasidim. There is also, besides the five congregations owning their synagogues, a Russian "Minyan," with daily services. A. L. Zarchi of Des Moines, Iowa, acts as rabbi for four congregations, including this minyan.

There are at Louisville an active section of the Council of Jewish Women, two lodges of the I. O. B. B., many lodges of the smaller insurance orders, and a Young Men's Hebrew Association. A Jewish hospital is being built. There is a social settlement founded by Christians, though Jews share in its activities and largely contribute to its funds; most of its "neighbors" are Jewish, but there is no trace of attempts to proselytize.

The proportion of manufacturers and mechanics, professional men (mainly lawyers), and wholesale and retail traders among the Jews of Louisville is about the same as in other American cities; but there are no Jewish bankers, and the manufacturers are mainly distillers. There is no very great wealth in the city and comparatively little poverty.

A. L. N. D.

In **Owensboro,** in 1865, the Adath Israel congregation was founded (present rabbi, Nathan Krasnowitz); at **Paducah,** in the same year, the Temple Israel congregation was established (present rabbi, David Alexander). **Henderson** has a congregation that was founded in 1879, and **Bowling Green, Lexington,** and **Shelbyville** have holy day services. There are several smaller communities.

Kentucky has a total population of 2,147,174, about 12,000 being Jews. L. N. Dembitz, lawyer and scholar, is a well-known Jewish resident of the State.

KEPHAS. See Peter.

ḲERE AND KETIB. See Masorah.

KEREM. See Periodicals.

KEREM ḤEMED (for the name see Amos v. 11): Hebrew periodical, edited and published in Vienna in 1833 and 1836 (vols. i. and ii.) and in Prague from 1838 to 1843 (vols. iii. to vii.) by Samuel Löb Goldenberg. A continuation or new series was edited and published in Berlin from 1854 to 1856 (vols. viii. to ix.) by Senior Sachs, having also a German title, "Briefe und Abhandlungen, die Jüdische Literatur und die mit Ihr Verwandten Wissenschaften Betreffend." The "Kerem Ḥemed" was intended to be the continuation of the periodical "Bikkure ha-'Ittim," which ceased to appear in 1832. In the introductory statement contained in the first number Goldenberg announced that the publication would be devoted primarily to Hebrew literature, and that its articles would be written in the form of letters: his idea in choosing this form was, doubtless, that articles so published would be less subject to the severities of the censor. The "Kerem Ḥemed" contains studies in Biblical and Talmudical criticism, archeology, and poems, the history of literature, and critical reviews of new books. It is opposed to Ḥasidism and pilpulism, the spirit of the Austrian Haskalah being predominant.

A rival Galician annual, "Ro'eh," published in Lemberg, had only a short existence.

KERMANSHAH (Persian, **Kermanshahan**; Arabic, **Ḳarmisin**): Capital of the Persian province of Ardilan, on the road between Bagdad and Hamadan. Benjamin II. found there forty Jewish families ("Eight Years in Asia and Africa," p. 205, Hanover, 1859). About the year 1894, through the persecutions of the governor Ziah al-Daulah, the Jewish quarter was sacked and twenty families of Jewish physicians became Moslems ("Jadidis"). In Oct., 1902, two Jews of Kermanshah were assassinated near Feruzi Abad, and the community was in great danger. The matter was taken up by the Alliance Israélite Universelle, and representations were made to the grand vizier at Teheran.

In 1903 there were 1,406 souls in the Jewish community. The Jewish quarter is situated near the eastern wall and is separated from the rest of the city by a stream which carries off the general sewage. There are 135 houses in the quarter; the Jews are not allowed to acquire property beyond the stream. There are three synagogues, a Talmud Torah, but no charitable society. Together with other non-Moslems the Jews are presided over by a "karguzar," or special envoy of the minister of foreign affairs. The community pays no special tax. The Jews are largely occupied in spinning; only about thirty are active in commerce. In the street the women cover their faces with a thin black net—a Bagdad custom. In case a husband divorces his wife, he must pay her 12 tomans (about $12). There are a number of Jewish physicians in the city.

Near Kermanshah there are certain hamlets which contain Jewish families, *e.g.*, **Gavareh** (18 families), **Kerrideh** (30), **Ḳaṣr** (12), **Zoab** (16), and **Sarpol** (14).

G.

ḲEROBOT (lit. "prayers of approach," *i.e.*, to God"; comp. Jer. xii. 2; Yer. Ber. 8b: "bo we-ḳareb"; Lev. R. xxx.: "ḳarob u-payyeṭan"; comp. Jastrow, "Dict." cols. 1410 and 1413): A term applied to the scheme of Piyyuṭim in the earlier part of the repetition of the morning 'Amidah on special Sabbaths, on the Three Festivals, and on New-Year, in the Ashkenazic liturgy. The Neo-Hebraic verses in the repetition of the "'Amidot" on the Day of Atonement follow the same scheme. The word is sometimes spelled "KeROBoZ," utilizing the initials of the Hebrew of Ps. cxviii. 15a. The scheme developed between the tenth and fifteenth centuries, as the ḥazzanim introduced their rimes into the public recital of the prayer (comp. Zunz, "S. P." pp. 60, 113). R. Jacob ben Moses Mölin ha-Levi of Mayence (MaHaRIL, 1365–1427) gave the final redaction. He laid down the principle for the officiant at divine worship that "the tradition must not be varied in any place, even in regard to melodies to which the people there are not accustomed" (ed. Sabbionetta, p. 61b).

Antiquity of Melodies.

The living tradition evidences a well-grounded stability, as might have been expected from the authority attached to MaHaRIL's liturgical decisions by the standard code of the Shulḥan 'Aruk (see Moses Isserles on Oraḥ Ḥayyim, 619, 1). The traditional melodies for the Ḳerobot, indeed, are distinguished from all other strains associated with piyyutim in that while the latter are usually derived from the folk-song of late medieval or modern Europe, the former have a more ancient character of their own. This distinction was already noted by Simeon b. Ẓemaḥ Duran ("Magen Abot," p. 52b) about the year 1400. The melodies, too, which are named in the rubric to so many hymns in the older liturgies (comp. Zunz, "S. P." p. 116) refer more often to verses in the Ḳerobot than to any others.

"Reshut."

The scheme of the Ḳerobot always opens with a "reshut," or prayer of the cantor for divine guidance and an expression of consciousness on his part that he is unworthy of fulfilling his task. The strain in which the reshut is intoned runs through the whole Ḳerobah, reappearing in the final verselets of each poem, which, since the printing of the Maḥzor placed copies of the text in the hands of ordinary congregants, have alone been chanted at length, the body of the piyyuṭ being read through in an undertone. Such silently read verses form the main succeeding portion of the Ḳerobot, but were originally chanted at length. Some older tunes, quoted as models for later introductions, were lost when the excessive length of the cantor's chanting led to complaints and to the omission of the time-absorbing singing (Güdemann, "Quellenschriften zur Gesch. des Unterrichts und der Erziehung bei den Deutschen Juden," pp. 85, 105, 118, 300).

Versicle Themes.

The strain for the reshut and the versicles following it is, whether festival or penitential, a melody of definite character and antique tonality. The festival form is obviously based on the Oriental chromatic scale (Bourgault-Ducoudray, "Melodies Populaires de Grèce et d'Orient," p. 21) in which the Sabbath service (Ḥazzanut) is chanted, a prayer-motive utilized on the festivals as well. The versicle theme for New-Year and Atonement is not so closely allied to the ḥazzanut of the day, which is in the third mode ("E" to "e") of the Catholic plain-song; for it falls in the first church mode ("D" to "d" in the natural scale). But this last was the favorite scale-form for melody generally in northern Europe during the early Middle Ages, from which the strain obviously dates. It will be noticed in the accompanying example how much beauty is added by the accidental, which the church musicians, who deemed this mode adapted to "grave, majestic, and sublime" subjects, would not have permitted, even as a grace-note.

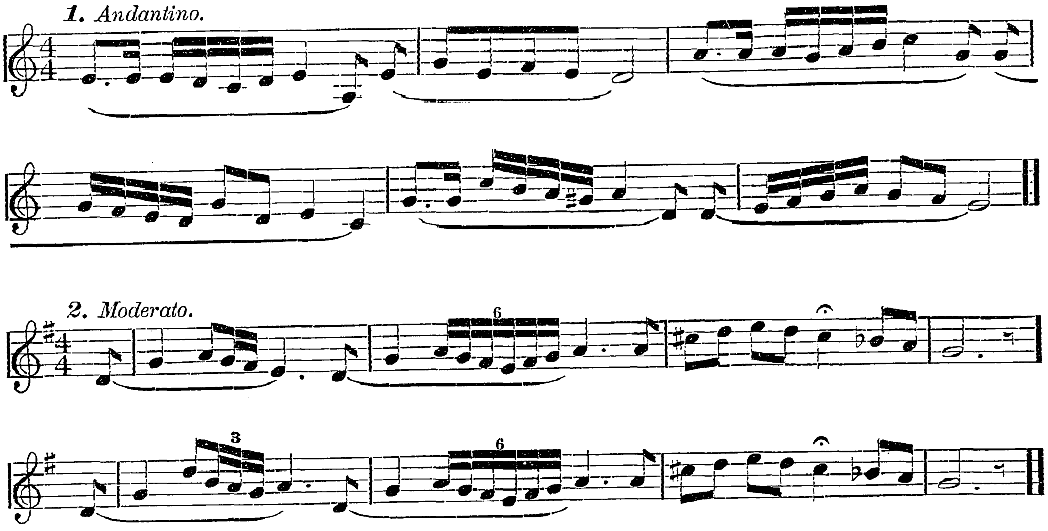
KEROBOT (Refrain Triplets Ending in Ḳadosh)



Kaliric Forms.

Model Melody.

Versicles founded on Ps. cxlvi. 10 and xxii. 4 lead to the next division of the Ḳerobot scheme, which is pervaded by verse-forms due to Eleazar Ḳalir (*c.* 800), and presents, from internal evidence, some of the antique melody which Duran (*l.c.*) attributed to him. The section is ushered in by a short group of triplets concluding with the word קדוש. These are followed by acrostic strophic hymns written by Ḳalir or his imitators, in which, on the penitential days, after the rime scheme, "a a *a*, b b *b*, c c *c*" (the italicized member being recited by the congregants in response to the two members chanted by the officiant), the triplet ending in "ḳadosh" is introduced as a refrain. For all such hymns, and others from the same sources chanted at this point in the Ashkenazic liturgy, there are utilized traditional melodies which, although divergent in a number of variants, bear traces of a common early medieval origin, and of a primal tonality agreeing with the third mode of the Catholic plain-song ("E" to "e" in the natural scale), with the semitones characteristically falling between the first and second and between the fifth and sixth degrees. This quaint archaic scale-form ("tertius mysticus") is that in which the prayers for the penitential mornings are, in the northern tradition, likewise cast. The original model tune was most probably due to one of the earliest writers of synagogal hymnody, who, like Ḳalir himself, composed and recited both verses and melody, and handed them on to distant congregations by means of their ever-wandering pupils (Zunz, "Ritus," pp. 7 *et seq.*). In one form it was particularly widely quoted in old ritual manuscripts as an inherited air to be utilized also for other poems (Zunz, "S. P." p. 115; Dukes, in "Orient, Lit." iv. 540), the rubric בנגון אאפיד ("to the tune of A'apid,'" which happens to be among the first of this class of piyyuṭim met with as the liturgy is gone through) being one of the most frequent of such superscriptions. Another variant of the melody is known and prized in the Reform liturgy. It is the original of the tune for the hymn "To Thee We Give Ourselves To-Day," No. 103 in the American "Union Hymnal."

But these original melodies, whose identity is plain under all their modern variations, are not the only melodies which have been followed in the chant for the refrain triplets ending in "ḳadosh," since Polish cantors often utilize a later but not less effective secondary theme, recalling Levantine tonality as the other also does.

The Ḳerobot finally come to an end in a long meditation ushering in the Ḳedushshah, which is aptly entitled the "Silluḳ" (= "conclusion" or "cessation," *i.e.*, of the singing).

Bibliography: The chants are assembled in Baer, *Ba'al Tefillah*, Nos. 650-660, 1057-1107, *et passim*, Göteborg, 1887, Frankfort, 1883. The two forms of the refrain triplet are contrastingly arranged in *The Voice of Prayer and Praise*, Nos. 202 and 203, by F. L. Cohen and D. M. Davis, London, 1899. For the variants of the antique hymn-tune see especially Baer, *l.c.* Nos. 1099, 1102, and 1274; Marksohn and Wolf, *Synagogal-Melodien*, No. 12, Leipsic, 1875; Pauer and Cohen, *Traditional Hebrew Melodies*, No. 17, London, 1897.

A. F. L. C.

KERTCH: Russian seaport at the eastern extremity of the Crimean peninsula; the ancient Panticapæon. A Greek inscription on a marble slab found in Kertch and preserved in the Imperial "Ermitage" in St. Petersburg shows that a Jewish community and synagogue existed in Kertch in 80-81 B.C. A number of tombstones unearthed near Kertch in 1867 bear the representation of a "menorah," with Greek inscriptions, showing that they belonged to Jews. In a message of the patriarch Fotius to Archbishop Antony of Kertch (858-891), the former thanks the archbishop for his efforts to convert the

Jews of Kertch. In a letter of Joseph, king of the Chazars, to Ḥasdai ibn Shaprut (*c.* 960), Kertch is mentioned as among the possessions of the Chazars. The presence there of Jews in the seventh century is confirmed by inscriptions found in the earliest Christian catacomb known in that region (Brun, "O Raznykh Nazvaniakh Kertchi," etc., p. 13, Odessa, 1877).

With the addition of Kertch to the territories of the Chazars the condition of the Jews there was markedly improved. The Chazars established a military post there to guard against the attacks of the Russians and Uzes. In 1318 Kertch was ceded to the Genoese, but in 1340 it was compelled to acknowledge the supremacy of the Mongols, who offered the Venetians the privilege of settlement in Bosporus under the same conditions that the Genoese were offered in Kaffa. In the fifteenth century Kertch was taken by the Turks; in 1773 it was added to the territory of Russia. During the Crimean war it was destroyed by the French and the English.

Kertch has a total population of 28,982, including 2,650 Jews, about 40 of whom are Karaites. Its Jewish community is well organized, and possesses a large synagogue and a number of charitable institutions. Its members are prominently connected with the oil-refineries and with the salt and dried-fish industries.

KESITAH. See Numismatics.

KETUBAH (or **Ketubbah**).—**Legal**: A marriage contract, containing among other things the settlement on the wife of a certain amount payable at her husband's death or on her being divorced. This institution was established by the Rabbis in order to put a check on freedom of divorce, to obtain which no consent is required on the part of the woman (see Divorce). Some of the rabbis considered the ketubah of a virgin to be of Mosaic origin (Yeb. 89a; Ket. 10a; Tos. *s.v.* "Amar"; comp. Tobit vii. 14).

The minimum amount payable under a ketubah was 200 zuz (a zuz = about 15 cents) for virgins, and 100 zuz for women who were not virgins at marriage; the priests and the noble families of Jerusalem doubled these sums (Ket. 12a). The amount could be increased by the husband and mentioned either in the ketubah itself or in a special deed (Tosafot Ketubah; Ket. 54b; Shulḥan 'Aruk, Eben ha-'Ezer, 66, 7). Besides these items, the ketubah mentioned also the amount of the dowry and the addition thereto made by the husband (the custom at present is to add 100 per cent to the amount of the dowry), as well as the ordinary obligations of a husband to his wife.

The ketubah, like other legal documents, was written in Rabbinic language. It is given in full in Maimonides, "Yad," Yabam, iv. 33; and with a few unimportant modifications occasioned as by slips of copyists it reads as follows (for Hebrew text see Betrothal):

Form of Ketubah.

"On . . . [day of the week], the . . . day of the month . . . in the year . . . since the creation of the world, the era according to which we are accustomed to reckon here in the city of . . . how . . . son of . . . said to this virgin . . . daughter of . . . 'Be thou my wife according to the law of Moses and Israel, and I will work for thee, honor, support, and maintain thee in accordance with the custom of Jewish husbands who work for their wives, honor, support, and maintain them in truth. And I will set aside for thee 200 zuz, in lieu of thy virginity, which belong to thee (according to the law of Moses), and thy food, clothing, and necessaries, and live with thee in conjugal relations according to universal custom.' And . . . this virgin consented and became his wife. The dowry that she brought from her father's house, in silver, gold, valuables, dresses, and bedclothes, amounts to . . . [100 silver pieces], and . . . the bridegroom consented to increase this amount from his own property with the sum of . . . [100 silver pieces], making in all . . . [200 silver pieces]. And thus said . . . the bridegroom, 'I take upon myself and my heirs after me the responsibility of this marriage contract, of the dowry, and of the additional sum, so that all this shall be paid from the best part of my property, real and personal, that I now possess or may hereafter acquire. All my property, even the mantle on my shoulders, shall be mortgaged for the security of this contract and of the dowry and of the addition made thereto.' . . . the bridegroom has taken upon himself the responsibility for all the obligations of this ketubah, as is customary with other ketubot made for the daughters of Israel in accordance with the institution of our sages—may their memory be for a blessing! It is not to be regarded as an illusory obligation or as a mere form of document. We have followed the legal formality of symbolical delivery ["ḳinyan"] between . . . son of . . . , the bridegroom, and . . . daughter of . . . , this virgin, and have employed an instrument legally fit for the purpose to strengthen all that is stated above, and everything is valid and established.

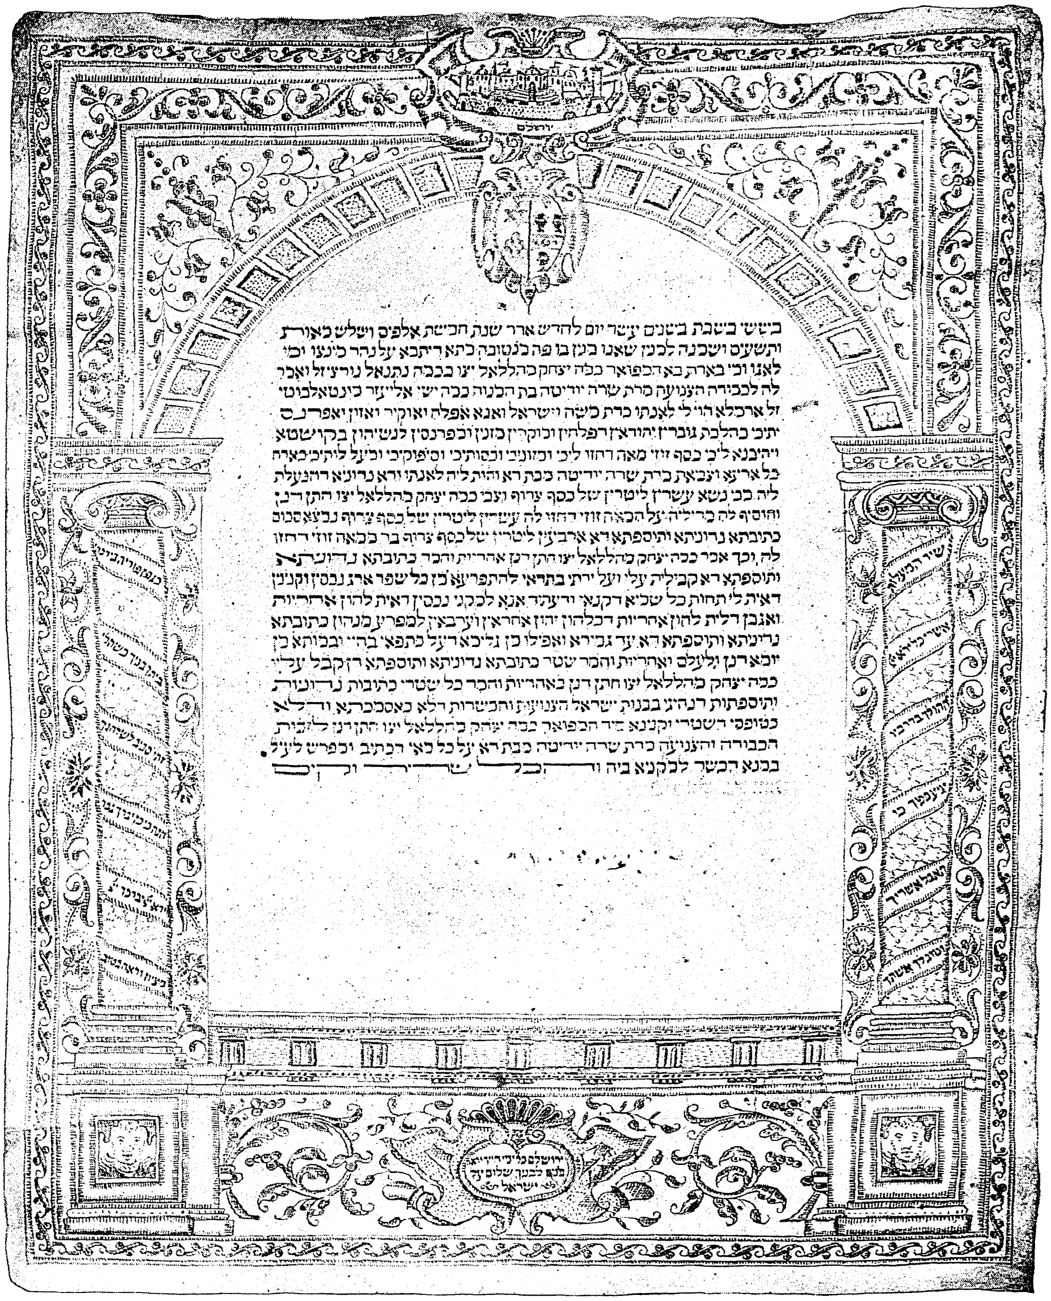
..............Bridegroom. ....
.... } Witnesses."

Lien on Husband's Property.

Thus the ketubah formed a lien upon all real estate owned by the husband during his lifetime, and if at his death, or when he divorced his wife, he possessed no estate, it could be collected out of any property he had sold or gifted since the ketubah had been written (Giṭ. 48b, 55b; Eben ha-'Ezer, 100, 3). This, however, was not originally the case; and it was only after a series of changes, tending toward the restriction of arbitrary divorce, that this became the rule. At first the marriage settlement was deposited with the wife's father; then it was converted into some valuable household utensil, of which the husband also could make use, and entrusted to the wife; and when this regulation also was found unsatisfactory, Simeon b. Sheṭaḥ ordained that the amount of the ketubah should remain with the husband, but become a lien on his property (Ket. 82b; Tosef., Ket. xii. 1; comp. commentaries *ad loc.*). The Geonim still further strengthened the security of the ketubah by making his personal estate also liable for the ketubah ("Yad," Ishut, xvi. 7; "Maggid Mishneh," *ad loc.*; Eben ha-'Ezer, 100, 1).

There could be no conjugal relations between husband and wife before the ketubah was prepared, or if it contained a sum less than that stipulated by the Rabbis (Ket. 54b). If the ketubah was lost, a new one had to be written. In such a case, the document to replace the lost one (כתובה דאירכסא) was drawn up by two (according to some authorities, three) witnesses, constituting a court, who were required to sign the document and to record the fact that the original ketubah was lost and that the husband had asked them to write another. If the date of the first ketubah was known, the same date had to be given in the second document; but if it was not known, the date of the preparation of the second ketubah was inserted ("Naḥalat Shib'ah," § 13 and notes; Adler, "Tiḳḳun Sheṭarot," § 9; comp. Eben ha-'Ezer, 66, 3, Isserles' glosses and commentaries).

The ketubah was the inalienable right of the woman, and even if she possessed no written document, she could collect the minimum sum (Ket. 16b). In a case where the husband refused the wife her conjugal rights, the amount of the ketubah was increased by the court thirty-six grains of silver every week during the time of his default. If the wife spitefully refused her husband conjugal rights, the



KETUBAH, OR MARRIAGE CONTRACT, DATED MANTUA, 5398 = 1638.
(In the New York Public Library.)

Although the woman could sell or give away her right to a stranger, she could not release her husband from his obligation or even from part of it (Ket. 51a; "Yad," *l.c.* x. 10; Eben ha-'Ezer, 66, 9).

court sent her warning that if she persisted in her spitefulness she would lose her ketubah; and if she still remained obdurate, the fact was announced in the synagogue for four successive Sabbaths. Another warning was then administered, and if she still persisted, the husband was relieved from his duty to support her, and after twelve months he might divorce her. There were, however, various modifications made by later authorities with regard to such a case, which took into consideration the conditions and circumstances that induced the wife to take such a persistent course (Ket. 63a; "Yad," *l.c.* xiv. 8–15; Eben ha-'Ezer, 77, 1–3, Isserles' gloss, and commentaries *ad loc.*).

Ketubah Forfeited.

The woman forfeited her right to the settlement made upon her in the ketubah not only when she was found guilty of adultery or of antenuptial incontinence, but also when she committed wrongs or follies of a less serious character. If she gave her husband food that was ritually forbidden, or if she permitted cohabitation during the period when she was ritually unclean, or if she broke her vows, her husband could divorce her and was not obliged to pay her the amount of the ketubah. Similarly, if she transgressed the laws of decency—*e.g.*, if she went with uncovered head in the street, or if she flirted with strangers, or if she cursed her husband's parents in his presence—she forfeited her right to the ketubah. If she had subjected herself to vows before her marriage and did not speak of them to her husband, or if she had physical defects of which the husband had no knowledge before marriage, she also lost her ketubah. The woman who refused to follow her husband from one place to another in the same country, or from any country to Palestine, or from any city in Palestine to Jerusalem, lost her ketubah (Ket. 72a, b, 110b; "Yad," *l.c.* xxiv. 10–25, xxv.; Eben ha-'Ezer, 115–117; see DOMICIL).

Conditions of Collection.

With the ketubah in her possession, the woman could collect the amount many years after her husband's death or her divorce, even after she had been married to another. If she did not have the ketubah, and if she left his house or was married to another, she could collect the money only within twenty-five years after her husband's death, and not after that; for it was presumed that if she did not collect it during that period, she waived her claim. In case of divorce, however, this presumption did not hold good, and she might always collect the amount due to her by the ketubah (Ket. 104a; "Yad," *l.c.* xvi. 23; Eben ha-'Ezer, 101, 1, 4). When the widow came to collect her ketubah, the court made her swear that her husband had not given her anything in payment thereof and that she had not taken anything without his knowledge. The heirs, however, could relieve her from this oath (Ket. 87a; "Yad," *l.c.* xvi. 16–19; Eben ha-'Ezer, 96, 1–3).

There were various conditions included in the ketubah, or implied in it by the decree of the Rabbis, which had to be fulfilled by the husband or by his heirs; for example: the male children inherited the ketubah even if their mother died before the death of their father; if there were children by other wives, the amounts of the ketubah were first subtracted from the inheritance and distributed among the respective heirs on the mother's side, the residue of the property being then divided equally among all the sons ("ketubat benin dikrin"; Ket. 52b; see INHERITANCE); the daughters had to be supported from the estate until they were married or until they reached their majority (*ib.*; see DAUGHTER); the widow also had to be supported from the estate until she remarried or until she left the husband's house. In some places the phrase "until the heirs shall be willing to pay her the amount of the ketubah" was inserted in the contract (*ib.*; "Yad," *l.c.* xii. 2; Eben ha-'Ezer, 69, 2; 93, 3; 94, 1; 111; 112). By a decree of the sages of Toledo (חכמי טוליטולה) the widow could collect only one-half of the property, even when her ketubah amounted to much more. The second half was divided among the heirs (Eben ha-'Ezer, 118).

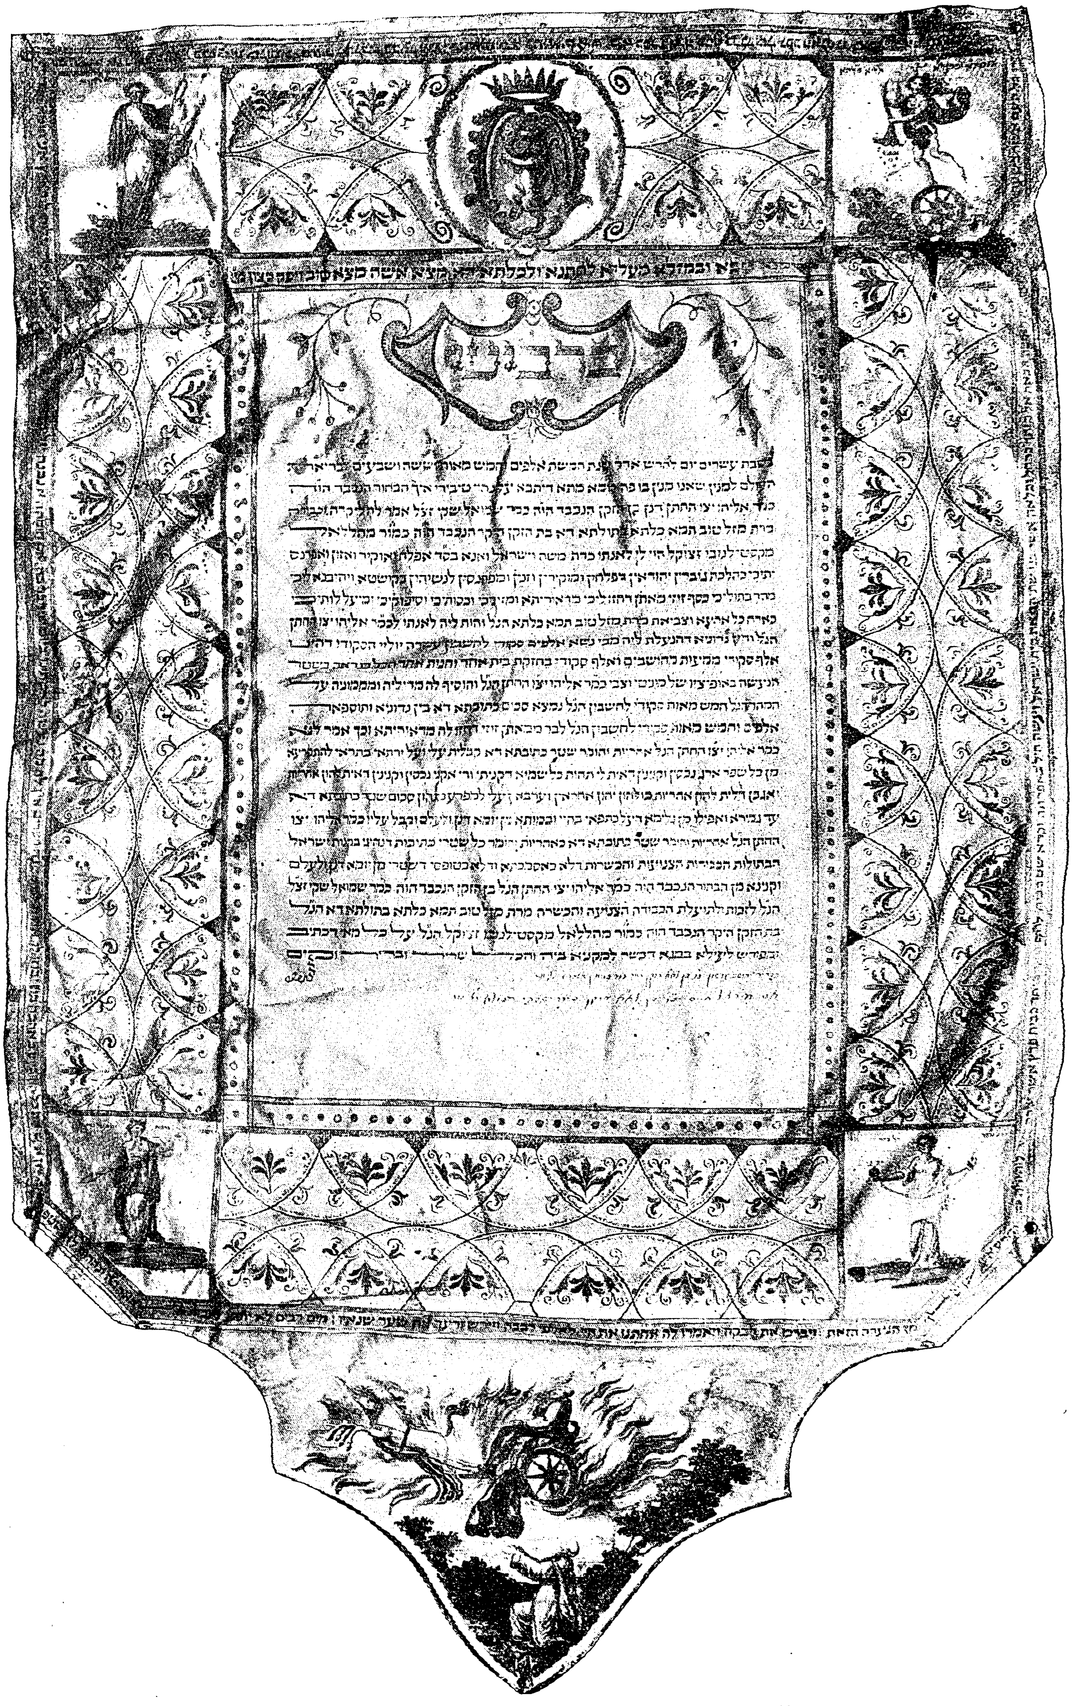
A. J. H. G.

——**Archeologic and Paleographic:** It is difficult to trace the origin of the ketubah. Rashi (on Gen. xxv. 6) claims that the difference between the status of Keturah's sons and that of Isaac consisted merely in that the latter's mother, as the lawful wife, had a ketubah while Keturah had none—a distinction drawn in the Talmud (Sanh. 91a) also between David's wives and his concubines.

Early History.

Tobit (vii. 14) bids Edna, his wife, bring him a tablet, on which he writes the deed of marriage, sealing it before witnesses. This συγγραφή, Grätz suggests, was the ketubah which differentiated the marriage from an ἄγραφος γάμος (Neubauer's Chaldaic text reads "ketubta"). The whole Talmudical treatise Ketubot deals chiefly with this subject, and pages 10a and 82b record that "the wise men, long before Simeon b. Sheṭaḥ, instituted the ketubah for the daughters of Israel." Maimonides ("Yad," Ishut, xvi.) also refers to it as having been established by "the Great Sanhedrin in order that a Jewish wife should not be light in her husband's eyes."

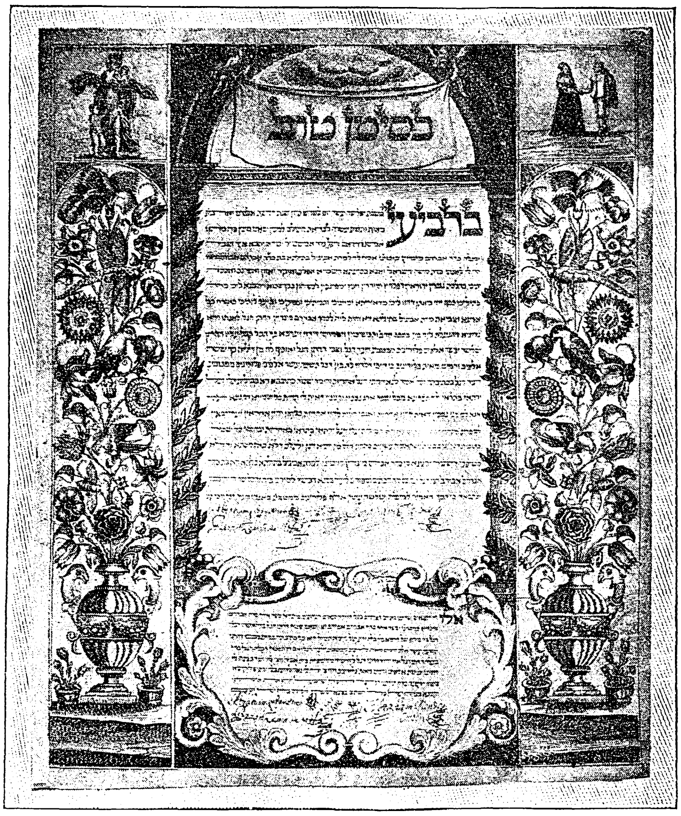
An early form of Palestinian ketubah, though not the earliest, is quoted in Tosef., Ket. xi. 9, and B. M. 104a, with the suggestion that Hillel the elder adopted it as a safeguard against the matrimonial irregularities of the Alexandrians. The Mishnah (Ket. iv. 9-11) distinguishes the forms used respectively by the men of Jerusalem, Galilee, and Judah. The Jerusalem form provided for the succession of the wife's property to her male children, and contained an additional proviso compelling the husband to redeem his wife if taken captive by Gentiles, and to take her back. It is thus clear that the ketubah was a regular institution among the Jews even in pre-Christian times; but there can be no doubt that its language became settled under Greco-Roman



KETUBAH, OR MARRIAGE CONTRACT, DATED ROME, 5576 = 1816.

(In the United States National Museum, Washington, D. C.)

influence. In the "Corpus Papyrorum" of the archduke Rainer several Greek contracts dating between the second and sixth centuries are given. In a pagan marriage contract of the earlier date the husband agrees to give his wife the necessaries of life, clothes, and what beseems a wife, who, on her part, must conduct herself blamelessly and without reproach. A Christian formula, four centuries later, follows this, but adds an obligation on the wife's part to "love, cherish, and honor" her husband, who has to do all that "beseems a free-born wife from a worthy husband." Substituting "Jewish" for "free-born" and "worthy," this is the Aramaic formula, still in vogue among Jews, an almost literal translation of its prototype in Roman law. That there is extant no Byzantine marriage contract after the sixth century is not surprising, as the emperor Justinian did away with "dotalia instrumenta" ("Const." 22, 23, vii. c. 54), though they were afterward regarded as necessary in the case of marriages between persons of high rank. The Jews, conservative in all things, have proved themselves especially so in the matter of marriage settlements.



Ketubah Blank, Amsterdam, 5419 = 1659.

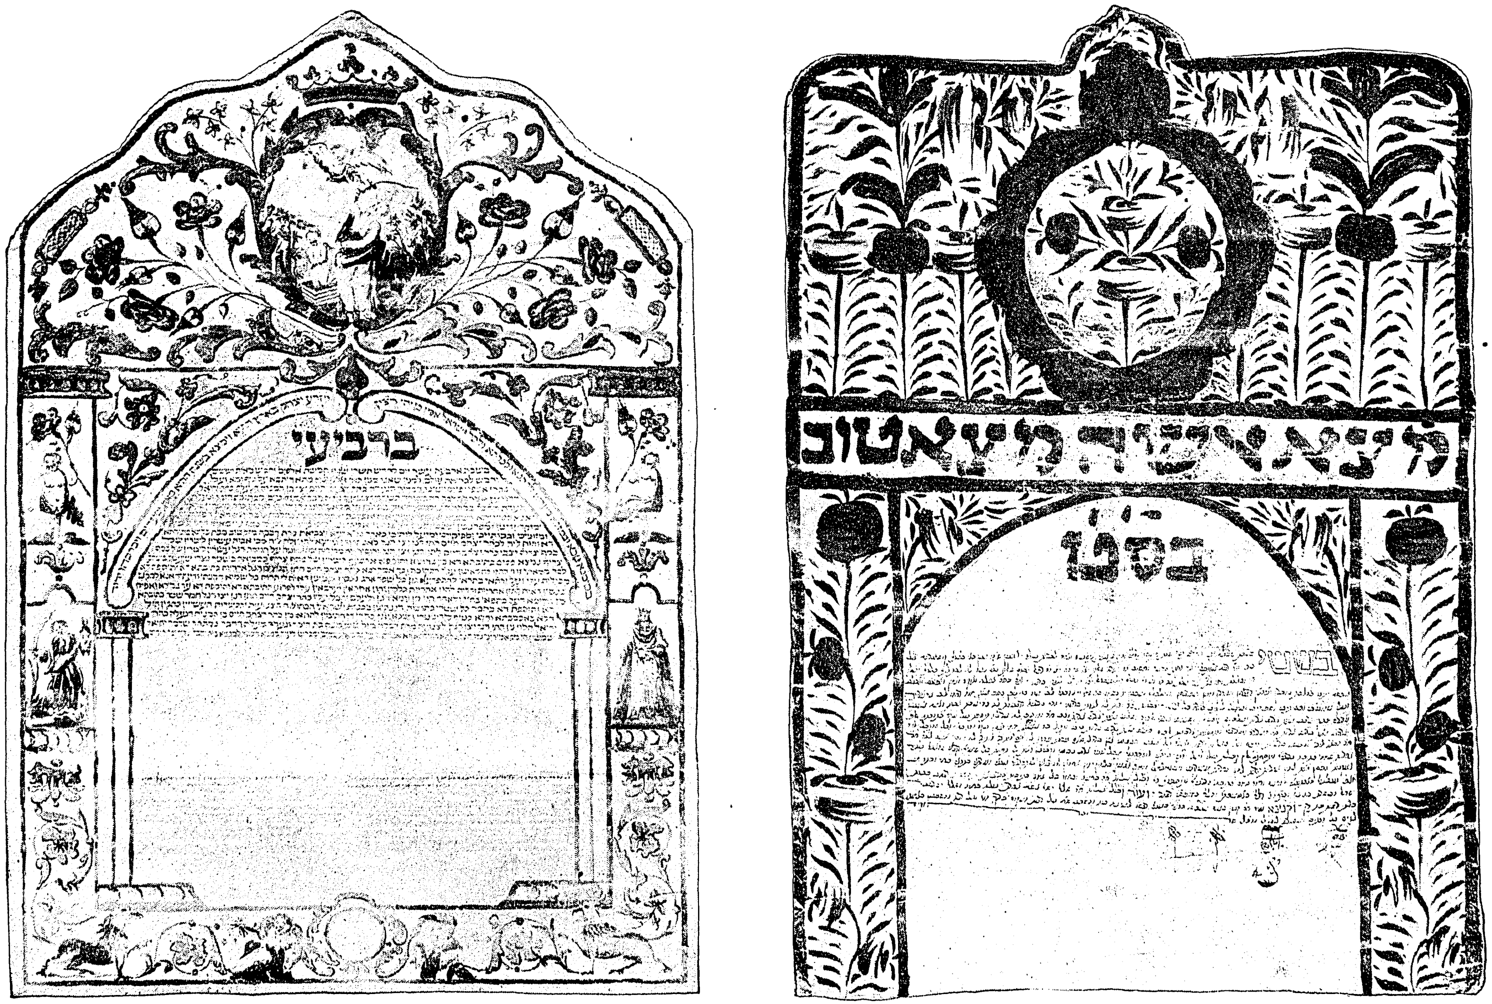
(In the possession of A. Wolf, Dresden.)

The spoils of the Cairo Genizah contain numerous examples of ketubot from the tenth century downward. These Egyptian documents often add some relic of the early Roman empire in a detailed list of the bride's paraphernalia; but such lists were afterward discarded for the sake of uniformity and to avoid shaming the poor. During the height of Karaite controversy Maimonides introduced a clause obliging the parties to observe the "dine ṭohorah" or traditional rules of ritual purification (Maimonides' Responsa, No. 149). A manuscript in the Cambridge Library, written in 1295, contains such a ketubah. The concerning clause runs: "And we, the undersigned, have warned the bride and made known to her that she shall keep the purification regulations according to Rabbinite rules, and that if she does not she will lose the whole ketubah." In this document there is also a clause in which the bridegroom pledges himself not to take another wife, nor to keep in the house a servant-girl of whom the bride disapproves.

Another important ketubah from the Cairo Genizah is that marked T. S. 141, also in the Cambridge Library (published by Schechter in "J. Q. R." v. xiii. 122). It is dated 1082, and is a contract between the Rabbinite, the nasi David, and the daughter of the Karaite Moses ben Aaron ha-Kohen. In this the bridegroom pledges himself not to compel his future wife to have light on Friday eve (which is forbidden according to the Karaite interpretation of Ex. xxxv. 3), nor to eat certain kinds of animal fat, prohibited by the Karaites; while the bride pledges herself to observe with him the feasts according to the Rabbinite calendar without profaning her own.

The Preamble.

A peculiar characteristic of many ketubot is a more or less elaborate preamble; but there does not seem to have been any uniformity in this regard. Thus ketubot of 1034 and 1242 have none, nor has an ancient Egyptian formulary, nor the Maḥzor Vitry, nor the "'Eẓ Ḥayyim" of R. Jacob ben Judah Ḥazzan of London of the thirteenth century. And when there is a preamble it varies from the most ornate poetry to the simplest brevity. A ketubah of 1079 has five words which may be translated "In the Creator's name may they build their house and prosper"; another, only two, signifying "In a good hour." Others, and those the most common in modern times, especially in Italy, have three letters, בס"ט, meaning "With good luck." A Cretan one of 1856 is headed by verse 22 of Prov. xviii., "Whoso findeth a wife findeth a good thing." The Yemenite formulas of modern times, like the Persian ones of medieval days, and



בי״ע

בס״ט

KETUBOT, OR MARRIAGE CONTRACTS.

1. Ancona, 5565 = 1805. 2. Constantinople, 5591 = 1831.

(In the British Museum.)

those of the Egypt of Saadia and Maimonides, are generally much more elaborate, and combine a prayer for good luck with one of good wishes for the rosh yeshibah or nagid of the time and his college with those for the bride and bridegroom.

Date and Ornamentation.

The date given in the ketubah is in Oriental countries invariably the "minyan sheṭarot"—the Seleucidan era, beginning 312 B.C. In Europe it is generally the "annus mundi" which is used; but in a ketubah executed in Metz in 1820 the year (6th) of Napoleon is given, showing an apparent intention to start a new era with him as the modern Alexander.

The place of the marriage is always given with geographical accuracy. Thus in preexpulsion times Paris is stated to be on the rivers Seine and Bièvre; London, on the Tamesis and Galbrook (= Walbrook).

The ketubah, as the external symbol of so auspicious an event among so domestic a people, lent itself to decoration of the most varied kind. The Italian specimens of the seventeenth and eighteenth centuries were specially ornate. Some choice examples are in the Musée Cluny and in the Smithsonian Institution. Earlier ornamentation was generally in the nature of illumination, writing in gold, etc., and calligraphy. Sometimes, as in Masoretic Bibles, the decoration is supplied by designs in which lines are replaced by minuscule writing. Thus in one beautiful specimen of a marriage contract at Colorno near Parma of 1688 the whole of Canticles makes up the elaborate floral design surrounding the body of the deed. Turkish ketubot generally rely on the embellishment provided by Moorish and Mosaic designs. Later Italian specimens often incorporate illustrations more or less appropriate to the contracting parties. Thus, where the bride is named Esther, a picture of Ahasuerus holding out his scepter to Queen Esther is given. So, too, when an Isaac is the bridegroom, there is given a representation of the sacrifice of Abraham's son of that name. Occasionally, however, conventional pictures of two hearts pierced by a dagger, a pair of love-birds, or a true-lovers' knot take the place of such personal pictorial allusions. But angels and coronets, flowers and fruits, are the most usual of the Italian decorations. Often "tena'im" or pecuniary stipulations, more or less complicated, are written alongside of the ketubah.

KETUBIM. See Hagiographa.

KETUBOT: Treatise in the Mishnah, the Tosefta, and in the Babylonian and Jerusalem Talmuds. In the Mishnaic order of the Seder Nashim, Ketubot stands second. It is divided into thirteen chapters, containing in the aggregate 101 paragraphs, of which the following is a synopsis:

Ch. i. and ii.

Ch. i.: Wednesday is the appointed wedding-day for virgins, and Thursday for widows (§ 1); the amount of the settlement is 200 zuzim if the bride be a virgin on her wedding-day, and 100 zuzim in other cases (§§ 2–4); in the case of the marriage of a priest's virgin daughter the amount of the ketubah is fixed by the court of the priests at 400 zuzim (§ 5); the credibility of a woman regarding her own statement as to the loss of her virginity (§§ 6–7); whether a woman may be believed concerning the lineage of the man with whom she has had intercourse or concerning the paternity of her child (§§ 8–9).

Ch. ii.: How far the ceremonies observed at the wedding of a virgin serve as evidence when she comes to demand her ketubah (§ 1); credibility of those who declare an act to be invalid or annulled by another in case the act in question is known only through their own statements (see Miggo; §§ 2–5); credibility of those who testify to their own or to one another's advantage (§§ 6, 7, 9); credibility of a witness in regard to priestly descent (§ 8); cases in which adults may be trusted to testify to what they saw when they were minors (§ 10).

Ch. iii.-v.

Ch. iii.: Punishments for seduction of a virgin (Ex. xxii. 15–16) and for assault on one (Deut. xxii. 25 *et seq.*); the classes of women to which the laws contained in Deut. xxii. 28–29 are applicable (§§ 1–3); difference between a seducer and one who commits assault (§§ 4–6); method of estimating the fine (§ 7); certain civil laws varying with the age of the victim (§ 8); how far punishment is reducible by voluntary confession (§ 9).

Ch. iv.: To whom the fine belongs (§§ 1–2); of the female proselyte (§ 3); rights of a father; rights and duties of a husband (§ 4); when the husband's duties begin (§ 5); duties of the husband to the wife or her heirs; what belongs to the widow and her daughters after the death of the husband and father, even when there is no distinct provision (§§ 6–12); differences in the form of the ketubah adopted respectively by the people of Judea and by the Galileans (§ 12).

Ch. v.: Additions made by the husband to the minimum amount of the ketubah, mentioned above (§ 1); the time to be allowed the woman wherein to prepare for the wedding (§§ 2–3); extent of the control of the husband over the earnings of his wife, and whether he may assign them to the Temple (§ 4); what work must be performed by the wife, since it is considered advisable that she have some employment lest idleness lead her to an evil life (§ 5); the mutual duties of husband and wife in their conjugal and other relations (§§ 6–9).

Ch. vi.-ix.

Ch. vi.: To what extent a husband is entitled to share in money belonging to his wife, whether earned by work or acquired by inheritance (§ 1); the wife's dowry; the responsibility of the husband for the dowry brought to him is decided by the custom of the land (§§ 2–4); dowry of a daughter (§§ 5–7).

Ch. vii.: The following are grounds for the dissolution of marriage: vows, certain diseases, faithlessness to the marriage vow on the part of the wife (§§ 1–8); by transgression of certain Mosaic laws or Jewish customs, the wife forfeits all rights to her ketubah (§ 6); cases in which marriages may be annulled in consequence of the sickness or disreputable status of the husband (§§ 9–10).

Ch. viii.: Property of the woman before and during wedlock, and the rights of the husband over it (§§ 1–5); of the rights of the man over the property of his deceased brother's widow with whom he has contracted a levirate marriage (§§ 6–7).

Ch. ix.: How the husband may surrender his rights to his wife's possessions (§ 1); rights of the wife to property left by her husband, and the cases in which she must take oath that she has not received her ketubah (§§ 2–8); cases in which the wife may obtain her ketubah without showing her bill of divorce (§ 9).

Ch. x.: Laws applicable to cases where the husband dies and leaves more than one wife.

Ch. x.-xiii.

Ch. xi.: Rights of the widow to property of the heirs (§ 1); right of the widow to sell, pawn, or give away her ketubah (§§ 2–4); cases in which sales by auction are invalid (§ 5); what women have no claims to the ketubah (§ 6).

Ch. xii.: The rights of an adopted daughter (§§ 1–2); right of a widow to remain in her husband's house or to be supported in her father's house by her husband's heirs (§ 3); cases in which the requirements of the ketubah lapse.

Ch. xiii.: Opinions and maxims of Admon and Hanan, judges of Jerusalem (§§ 1–9); cases in which the wife is obliged to follow her husband to foreign lands; superiority of the land of Israel over other lands, and of Jerusalem over the other cities of Palestine (§§ 10–11).

Tosefta and Gemara.

The Tosefta contains much which serves to illustrate and supplement the Mishnah. Especially noteworthy is its description of the ancient marriage customs of Judea and Galilee (i. 4), the peculiar mode of betrothal in Alexandria (iv. 9), and the plan of Simeon b. Sheṭaḥ to make divorces more difficult (xii. 1).

Both Gemaras discuss and explain the statements of the Mishnah, and contain, moreover—especially the Babylonian Gemara—a mass of stories, legends, aphorisms, and proverbs, as well as other important haggadic interpretations and comments.

Maxims and Haggadot.

The following passages from Ketubot may be cited: "When impure words are spoken, close thine ears" (5b); "He who useth impure speech will forfeit all the rewards of his life" (8b); "The creditor need not keep the paid bill" (19b); "Thou shouldest have neither a savage dog nor a broken stairway in thy house, lest people come to harm" (41b); "'His righteousness endureth for ever' (Ps. cxii. 3) refers to him who learns the Torah and teaches others, and to him who has books and lends them to his fellow students in order to make their study easier" (50a); "Do not act as judge in the case either of thy friend or of thine enemy, for thy sentiments will not allow thee to be just to both" (105b); "It were better to submit thyself to the torture of a death by fire than to cause shame to thy neighbor in public" (67b).

Special mention should also be made of the enumeration of the benedictions customary at a wedding (7a–8b), of the Hebrew words of consolation (8b), of the catalogue of the ordinances which were established at Usha (49b–50a), of the narratives of several teachers who were absent from their families an unusually long time for the sake of study (62b–63a), of the detailed account of the death of R. Judah ha-Nasi (103a–104a), and of the words of many teachers who extolled the superiority of Palestine, expressing their longing for the land of their fathers, and who, when they had reached their goal, kissed the stones and cast themselves in the dust (110b-112b).

S. S. J. Z. L.

KETURAH (קטורה, lit. "incense"): Abraham's second wife, whom he married after the death of Sarah (Gen. xxv. 1; I Chron. i. 32). She was the ancestress of sixteen tribes, among which were Arabian and Midianite ones. In I Chron. i. 32 Keturah is called "the concubine of Abraham," and, probably for this reason, she is identified in the Midrash (Gen. R. lxi., quoted also by Rashi) and in the Palestinian Targumim with Hagar, who was the first concubine of Abraham. The Midrash explains the name "Keturah" as based on her acts, which were pleasant like frankincense. In Gen. xxv. 5 the Midrash (*l.c.*) reads the term "ha-pillagshim" (= "the concubines") without the yod, which is the sign of the plural (הפלגשם), explaining that there was only one concubine, as Hagar and Keturah were one person. Still it seems that such was not the opinion of the Talmudic doctors; for the children of Ishmael and the children of Keturah are kept distinct in the story of their complaints against the Jews before Alexander the Macedonian (Sanh. 91a).

Bolt and Key Used in Modern Syria.
1. Locked. 2. Unlocked.

KEY (מפתח): In Biblical times the key, as its Hebrew name indicates ("mafteaḥ" = "the opener"), was used chiefly to open the door which was locked by means of a bolt ("beriaḥ"). This bolt, like that used in the Orient to-day, had a number of holes into which fitted iron points in the door-post, so arranged that they dropped into the corresponding holes as soon as the bolt was pushed into the opening made for it in the door-post. The key, made of wood, was provided at the end with a similar number of nails, arranged to correspond with the iron points holding the bolt. Introducing the key from the side into the run of the bolt, one was able by these nails to push up from below the iron points and then draw the bolt back. Thus Ehud could lock the door of Eglon's palace without the aid of a key, while only Eglon's servants "took the key and opened" (Judges iii. 25). The expression "to bear the key on his shoulder" denotes possession of office (comp. Isa. xxii. 22). In the time of Ezra, four Levites, the chief porters, were in charge of the key of the Temple (I Chron. ix. 27). The key as a symbol of authority is also met with in the Talmud: "Three keys are in God's own hand which He never entrusteth to any angel: the key of rain; that of childbirth; and that of the resurrection of the dead. The Western (Palestinian) Talmudists say also the key of nourishment" (Sanh. 113a; Ta'an. 2a).

E. G. H. M. Sel.

KEYSER, EPHRAIM: American sculptor; born at Baltimore, Md., Oct. 6, 1850; educated at the City College of Baltimore and at the art academies of Munich (where he won a silver medal for a bronze statue of a page) and Berlin. In 1880 he settled in Rome, Italy, where he maintained a studio for six years and where he received a prize for a statue of Psyche. In 1887 he returned to the United States, and lived in New York until 1893. Since then he has resided in Baltimore, where he is now (1904) instructor in modeling at the School of Fine Arts. Among his works may be mentioned: the statue of General de Kalb, erected by the government at Annapolis, Md.; the design for the tomb of Chester A. Arthur, President of the United States, at Albany, New York; and various busts, among them those of Cardinal Gibbons, Sidney Lanier, and Henry Harland.

A. F. T. H.

KHAIBAR: Fortified town of Arabia in the district of Hejaz, and four days' journey northwest of the city of Medina. In the time of Mohammed, the name "Khaibar" was borne by a whole province, which was inhabited by various Jewish tribes; the name became famous in consequence of the prominence of the town in the Islamic wars. According to Mohammedan historians, the first inhabitants of the district of Hejaz were the Amalekites, who had been expelled by the Israelites. There are various traditions in regard to the settlement of Khaibar by the Jews: that they settled there in the time of Moses; of Joshua; of Saul (who was sent by Samuel to exterminate the Amalekites); of David, when he fled before his son Absalom. But the most probable supposition is that of Rapoport (in "Bikkure ha-'Ittim," 1824, p. 53), that the Jews of Khaibar are the descendants of Jonadab b. Rechab, on whose recommendation they continued to live like nomads. They settled in that fertile place after the destruction of the First Temple, and, having no intercourse with Jews in other parts, they were entirely ignorant of the existence of the Talmud. As the

Rechabites were of one family with the Kenites (I Chron. ii. 55), Rapoport identifies the name "Khaibar" (חיבר) with "Heber" (חבר), the name of the chief of the Kenites. The Jews in the province of Khaibar in the time of Mohammed had seven fortresses or castles, similar to those of the Christian knights (the Arabian geographers, among them Yaḳut, derive the name from a Hebrew word meaning "fortress"), the strongest of which was Ḳamuṣ, built by the chief Ibn Ḥuḳaiḳ; these fortresses protected the Jews against the predatory incursions of the Bedouins.

In regard to the history of Khaibar prior to Mohammed, the historians report only the single fact that Al-Ḥarith al-A'raj, King of Ghassan, made an incursion into it in 524. One hundred years later, during Mohammed's war in Hejaz, a Jewish tribe, the Banu Naḍir, deserted the prophet's camp and sought refuge in the town of Khaibar. This warlike tribe exhorted its coreligionists there to resist Mohammed in the event of his besieging them. Mohammed invaded the district in 628, and the Jews retreated to their fortresses, where they bravely defended themselves. Their leaders were Kinanah ibn Rabi', a Naḍirite, and Marḥab, of Himyarite origin. The greatest resistance was offered by the fortress of Ḳamuṣ, which, in spite of the overwhelming numbers of Mohammed's forces, held out two months. Finally, the Jews capitulated, but they were allowed to remain on paying a certain tribute.

Omar, the second calif, violated the treaty of Mohammed and drove the Jews from Khaibar about 640, assigning them a strip of land near Al-Kufah, on the Euphrates. Benjamin of Tudela reports 50,000 Jews in the city of Khaibar, among whom were many learned scholars; but Ibn Sappir (book i., ch. xv.) corrects his mistake. It is hardly probable that Jews ever returned to the place. The expression "Yahud al-Khaibar" has remained as a term of reproach. Travelers of the eighteenth century, as Niebuhr and Seetzen, reported merely hearing of Jewish nomads in Khaibar.

G. M. Sel.

KHERSON: Russian city; capital of the government of the same name; situated on the right bank of the Dnieper, near its mouth. It was founded by Prince Potemkin in 1778. When permission was given the Jews to settle in New Russia by a ukase of Nov. 16, 1769, a number established themselves in the district which later included Kherson; some of these were among the first inhabitants of Kherson. By 1781 the Jews in Kherson had become numerous enough to organize a community, and the pinḳeses show that the by-laws of the ḥebra ḳaddisha were prepared in that year. According to these records, the head of the brotherhood was elected for life, and the governing body was chosen from among the members by ballot. From 1839 to 1859 there were ninety-three members. When a commission was organized (Aug. 1, 1840) in Odessa by order of the government to consider the feasibility of establishing the office of government rabbi, the Kherson community voluntarily elected Moses Warshavski, a local merchant, as delegate to represent it before the commission. According to the official report (1856) of the "learned Jew" Marcus Gurovich to the governor-general of New Russia, there were at that time in the city of Kherson eight Jewish prayer-houses, including one large new synagogue, one Talmud Torah supported by private funds, and one Jewish hospital supported partly by the contributions of the wealthy merchant Feker and partly from funds derived from the basket-tax. The Talmud Torah was founded in 1860; its course of instruction at first included Hebrew subjects only, but later, owing to the efforts of the young rabbi, Faitel Blumenfeld, a graduate of the Jitomir rabbinical school, was expanded to include the study of general non-Hebrew subjects. In 1865 Blumenfeld succeeded in adding industrial classes to the Talmud Torah, and in 1867 he secured permission to open a technical school in Kherson, though, in consequence of the indifference of the community, it was never opened.

The income of the community in 1881 from its meat-tax was 31,000 rubles; from this sum 3,800 rubles were assigned to the two large synagogues, and an equal sum to the ten prayer-houses. A fixed proportion of the meat-tax was assigned for the use of the Jewish hospital. On Oct. 6, 1881, a commission of twenty-eight, appointed to consider "the Jewish question," was convened in Kherson. It included three Jewish members—Dr. Zetkin of Yelisavetgrad, Blumenfeld of Ananyev, and Bunzelman of Kherson. In a paper presented to the commission by the Christian merchants of the government, the latter praise the Jewish agriculturists of Kherson as peaceful and honest neighbors, who till the soil by their own labor, show no disposition to evade military service, and are seldom guilty of insubordination. They perform their duties faithfully, and furnish the smallest proportion of criminals. The commission voted in favor of permitting to Jews unrestricted rights of residence throughout Russia.

Institutions.

The Jews of Kherson have contributed to the development of the trade in timber and other forest products with White Russia, and have been influential in the expansion also of the export trade in grain. In 1881 there were in the city 4 Jewish merchants of the "first gild" in a total of 6; 66 Jewish merchants of the "second gild" in a total of 136; 55 Jewish merchants licensed for retail trade in a total of 134; and 54 Jewish clerks in a total of 139. Of the 40 lumber-yards of Kherson, 36 were owned by Jewish merchants. The lumber trade in 1880 amounted to 2,500,000 rubles. The members of the Kherson community are distinguished for their progressive spirit and their recognition of the value of a modern education. In 1899 Kherson had eight prayer-houses, five synagogues (one of them Karaite), one Jewish technical school, one Talmud Torah, one Jewish dispensary, and a number of ḥadarim. Among the prominent members of the Jewish community in Kherson have been Nahum Finkelstein, Julius Kranzfeld, Julius and Solomon Rosenthal, Tobias Felzer, Dr. Marcus Popich, Dr. Herzenstein, Mordecai Feker, Jacob Reznikov, Moses Hyam Serebrennik, Jacob Posner, Eliezer Lipman Golizki, Rabbi Faitel Blumenfeld, his son Herman Blumenfeld, Rabbi Isaac Judah Deutschman, Rabbi Pesker, P. Bunzelman, Nahum Gorodetzki (who was made hereditary honorary citizen), Abraham Jacob Bruk (who from 1861 was for many years teacher of the Hebrew government school, and who in 1862 founded on very liberal lines a Jewish school for girls ["Ha-Maggid," 1862, p. 300]), and Judah Behak, the writer (who went to Kherson in 1856). Behak exerted a beneficial influence on the education of the Jews in the city; the community erected a school in commemoration of his eightieth birthday, and named it Bet Yehudah. In 1890 Kherson had a total population of 72,451, of which about 25,000 were Jews.

H. R. J. G. L.

KHIN, RACHEL MIRONOVNA: Russian authoress; born in White Russia in 1863; educated at the Women's gymnasium, Moscow; studied medicine at St. Petersburg and history and literature at Paris. Her novels and sketches first appeared in the "Vyestnik Yevropy," "Russkaga Mysl," "Nedyelya," and "Voskhod," and were later issued in book form under the titles "Siluety" (Moscow, 1894) and "Pod Goru" (*ib.* 1900).

Her novels deal mostly with the life of the middle-class Russian landlords and the wealthier Jewish merchants. She vigorously criticizes the tactless manners of the Jewish upstarts, and pictures the unenviable position of the intelligent Jew who has to choose between the love of Russian culture, in which he has been educated, and the love of his downtrodden coreligionists, who are deprived of their rights.

Bibliography: *Entziklopedicheski Slovar*, xxxvii., St. Petersburg, 1903.

H. R. M. R.

KHOLM (CHELM): Russian district town in the government of Lublin. Its Jews are mentioned in various documents of 1550 to 1569. In the latter year the delegate from Kholm to the Diet of Lublin complained of the growing power of the Jews and proposed that "the Jews and Gipsies be treated according to the Constitution." On Easter Day, 1580, while a church procession was in progress the burgher Timosh, with many companions, all armed with various weapons, attacked the synagogue during religious service. They threw stones through the windows, fired shots into the building, broke down the doors, damaged the roof, and wounded many of the congregation. A formal complaint against the rioters was lodged by the Jewish elders Pinkus, Saul, Avram Pestich, and Kalman, their statement being corroborated by the noble Foma Stano. The estimated loss to the synagogue was 2,000 gold ducats.

On May 1, 1582, Saul Novakhovich, Shlioma Yakubovich, Marek, Jacob the Doctor (Rabbi), and Bysko complained of the principal of the Kholm school, stating that he came drunk to the synagogue while the Jews were engaged in prayer, and that he shouted, mocking the singing.

During the Cossack uprising of 1648–49 most of the inhabitants of Kholm were killed, among them about 400 Jews. In 1666 the delegate from Kholm to the Diet of Warsaw was instructed to demand the confiscation of land owned by the Jews without legal title thereto, and formerly the property of the Dominican monks.

In 1897 the Jews of Kholm numbered about 12,500 in a population of 19,236. The town is a commercial center of considerable importance; and practically all the commerce is in the hands of Jews.

H. R. J. G. L.

The following is a list of the rabbis who officiated in Kholm since the second half of the sixteenth century:

Simon Auerbach; Solomon Zalman (mentioned in Solomon Luria's Responsa, No. 101); Elijah b. Judah Aaron (called Elijah Ba'al Shem; pupil of Solomon Luria); Samuel Edels (1610–14); Eliezer Perles; Isaac b. Samuel ha-Levi (until 1627); Moses Katzenellenbogen (son of Meïr Wahl; d. 1689); Saul Katzenellenbogen (son of Moses Katzenellenbogen; d. 1691); Jekuthiel b. Hosha Aaron of Lublin (d. 1697); Hillel b. Jonah ha-Levi (called from Kholm to Wilna in 1690; grandson of Eliezer Ashkenazi; d. 1690); Meïr b. Benjamin Wolf (d. 1718); Solomon b. Simḥah Rapoport (d. 1763); Ẓebi Hirsch b. Selig; Saul Margolioth (d. 1801); Samuel (gave his approbation to the "Leḥem Yehudah" in 1704); Solomon (author of "Merkebet ha-Mishnah"; d. 1756); Isaac b. Mordecai ha-Levi (until 1776; d. 1799; grandson of Joshua Reitzes, "the martyr"); Hirsch b. Joseph (author of a treatise on the improvement of the position of the Jews in Poland and on the ways to make them useful citizens of their fatherland; 1789); Ḥayyim b. Jacob (author of "Kokebe Ya'aḳob"; d. 1820); Isaac b. Joseph (author of "Mishnat Ḥakamim"); Joseph Kezis (d. 1830); Löb Neuhaus (son of Joseph Kezis).

H. R. V. R.

KHORASAN ("The Land of the Sun"): One of the five great divisions of Persia, bounded on the east by Afghanistan; on the north by Zakaspie, the transcaspian territory of Russia; and on the south by Kirwan. In ancient times it was the territory immediately east of that ruled by the Sassanids, who occasionally exiled political offenders thither. Thus, in 930 Saadia's friend Josiah the anti-exilarch was banished to Khorasan.

The cities of the province in which Jews are most numerous are Meshed and Herat. In Meshed there is a colony of about 2,000 crypto-Jews, known as "Jadidin," who were nominally converted to Islam early in the nineteenth century under the cruel reign of Shah Nur al-Din's father. Some have migrated to transcaspian territory, and practise Judaism at Merv, Aschabad, Bokhara, and Samarcand.

KHUDAIDAD. See Judæo-Persian Literature.

KHURILKAR, JOSEPH DANIEL: Beni-Israel soldier; bahadur subahdar in the Anglo-Indian army. He enlisted in the Sixteenth Regiment Bengal Native Infantry, and was successively promoted to the ranks of jemidar (July 14, 1856), subahdar (Jan. 1, 1858), and subahdar major (Jan. 1, 1872). He was decorated with the Indian Mutiny medal (1857), and with the star of the Order of British India (2d class).

J. J. Hy.

KHURILKAR, SAMUEL EZEKIEL: Beni-Israel soldier; subahdar in the Anglo-Indian army. He enlisted in the Sixteenth Native Infantry of Bengal in 1790, and was made subahdar May 21, 1802. He was decorated with a bronze medal dated May 4, 1799, on one side of which is the figure of the British Lion subduing the Indian Tiger (Tipu Sahib); the reverse represents the entry of a British army into Seringapatam, and bears an inscription in Persian, dated "27 Zilkad, A.H. 1213."

Bibliography: *Catalogue of Anglo-Jewish Historical Exhibition*, p. 45, London, 1887.

J. J. Hy.

KIAMIL PASHA: Turkish official; born at Nicosia, Cyprus, in 1832. Educated on that island and in Egypt, he at the age of seventeen entered the service of the Egyptian government, afterward passing into that of Turkey, under which he has successively held the following important political positions: mayor of Touzla (1859); president of the administrative council of Saida; subprefect of Beirut, of Damascus (1866), of Aleppo (1867), of Philippopolis (1868), of Jerusalem, of Cyprus (1874), and again of Beirut (1875); and vali of Aleppo (1876). Resigning in 1878, he returned to office in 1881, being successively appointed councilor to the ministry of the interior, minister of pious foundations (1882), and minister of public instruction (1883). In 1884 he was elevated to the rank of grand vizier ("Sadriazam"). He resigned, but was recalled to the same functions in 1891.

Kiamil Pasha.

Kiamil Pasha is now (1904) governor of the vilayet of Aidin, with residence at Smyrna. In recognition of his services he has received the Turkish orders of Imtiaz, Osmanie, and Medjidie, the medal of Crete, and other decorations. Born in the Jewish faith he has been a professed Mohammedan since his boyhood.

S. M. Fr.

KIBROTH-HATTAAVAH (קברת התאוה): A station of the Israelites in the wilderness on the journey from Sinai to Kadesh (Num. xi. 34, xxxiii. 16). The name, which means "the graves of lust," was given to the place on account of its being the burial-ground of the multitudes that died through glutting themselves with quail flesh (Num. xi. 34). It would seem from Num. xi. 3, 4, that Kibroth-hattaavah was identical with Taberah, which was three days' journey from Sinai (comp. *ib.* x. 33). In Deut. ix. 22, however, the two stations are mentioned as distinct places. Kibroth-hattaavah is identified by Schwarz ("Das Heilige Land," p. 213) with the modern 'Ain al-Shihabah, in the interior of the desert (comp. Robinson, "Researches," i. 264).

KID. See Goat.

ḲIDDUSH: Ceremony and prayer by which the holiness of the Sabbath or of a festival is proclaimed. For the Sabbath the Scripture imposes this duty in the words: "Remember the Sabbath day to keep it holy," which, according to Shab. 86a, means that its holiness must be recognized in speech during the day. It is a positive duty and connected with a set time; yet women as well as men are bound by it; for the "remember" of Ex. xx. 8 is coextensive with the "keep" of Deut. v. 12 (see Ber. 20a). The middle benediction of the prayer ends with the words: "Blessed . . . who sanctifieth the Sabbath; blessed . . . who sanctifieth Israel and the seasons . . .; blessed . . . the King over all the earth who sanctifieth Israel and the day of Memorial"; this is deemed a fulfilment of the Scriptural command as to the Sabbath (Ber. 52b). However, under an old custom, recognized by the Mishnah (Ber. viii. 1), the Sabbath and the festivals are sanctified in another cheerful and impressive way—over a glass of wine before the evening meal, even though the benediction has already been recited in the prayer. The drinking of the wine, with the recitation of the accompanying words, constitutes the ceremony of Ḳiddush, in which husband, wife, children, and dependents take part together. According to Ber. 33a, the origin of the Ḳiddush can be traced back to the time of the Great Synagogue; indeed, from the controversies between the schools of Shammai and Hillel on various points connected with the Ḳiddush, it is clearly seen that the ceremony is very old. For Passover evening the Yemenite prayer-book has a different Ḳiddush, reproduced in the "Eben Sappir" of the traveler Jacob Safir.

Substitutes for Wine.

Although the Talmud (Pes. 107a) declares strong drink other than wine improper for the Ḳiddush, such drink, of necessity, takes the place of wine to a great extent in northeastern Europe. It is regarded, however, as more dignified, where wine can not be had, to pronounce the Ḳiddush over the bread (see Shulḥan 'Aruk, Oraḥ Ḥayyim, 271, 26) than to substitute beer or brandy. At the beginning of Sabbath two whole loaves of bread are laid down in memory of the double measure of manna that was gathered on Friday (Shab. 117b), with a white cloth under and over them (Oraḥ Ḥayyim, 271, 9). There is no true Ḳiddush except at the place of the meal (implied in Ber. viii. 2, and expressly asserted by Samuel in Pes. 101a). However, there is a custom (which Samuel reproves) of pronouncing the Ḳiddush at the end of the evening service in the synagogue. Abudarham, in his work on the services, in the chapter on the beginning of Sabbath, wonders how this custom ever took root, and quotes Hai Gaon, the last of the Geonim, against it. It was defended on the ground that at one time travelers were housed and took supper in a room adjoining the synagogue, and that thus the Ḳiddush was really celebrated near the place of the meal; the custom persisted among the Ashkenazim because no one would take the responsibility of abolishing it, though the occasion for it had long ceased. The Ḳiddush for the Sabbath is made up of two benedictions: that for the wine (or bread, when wine is not used) and that for the day. Following the opinion of Hillel's school, that for the wine is said first: "Blessed be Thou, O Lord, our God, King of the World, the Creator of the fruit of the vine. Blessed be thou, O Lord, our God, King of the World, who hast sanctified us by Thy commandments and wast pleased with us, and hast given us for a heritage, in love and favor, Thy holy Sabbath, a memorial of the work of creation. For it precedes all the holy convocations in memory of the going forth from Egypt. Thou hast indeed chosen us above all nations, and hast given us, in love and favor, Thy holy Sabbath for a heritage. Blessed be Thou, O Lord, who hallowest the Sabbath."

The Benedictions.

Before these benedictions it is customary to recite Gen. ii. 1–3, the account of the Sabbath of Creation, in obedience to the saying of the Talmud (Shab. 119b) that one who recites it makes himself, in a sense, a partner with God in the work of creation. In the German ritual these verses are preceded in a low voice by the last words of Gen. i.: "And the evening and the morning were the sixth day." The indirect reference to the departure from Egypt is probably based on Pes. 117b, though this is primarily meant for the Ḳiddush on the Passover. On the three festivals the benediction for the day takes this form, the words in brackets being inserted on the Sabbath: "Blessed . . . , who hast chosen us from every tribe and lifted us over every tongue; Thou gavest us, O Lord, our God [in love Sabbaths for rest,] set times for gladness, feasts, and seasons for joy, [this Sabbath day and] this . . . day of the feast of unleavened bread, the season of our liberation . . . in memory of our going forth from Egypt; for Thou hast chosen us, and hast hallowed us, and hast given us [in love and favor] in gladness and joy [the Sabbath and] Thy holy set times for a heritage; blessed be Thou, O Lord, who hallowest [the Sabbath and] Israel and the seasons." (On Pentecost, the Feast of Booths, and the eighth day of Solemn Assembly necessary changes in wording are made.) On New-Year's night the benediction proceeds thus: "Blessed . . . Thou gavest us . . . this Day of Memorial, a day of sounding the shofar, a holy convocation, in memory of the going forth from Egypt; and Thy word is true and standeth forever; blessed be Thou, O Lord, King over all the earth, who hallowest [the Sabbath and] the Day of Memorial."

On all the festivals other than the last days of Passover, the celebrant thus gives thanks for having reached the joyful time: "Blessed . . . who hast let us live and sustained us, and made us reach this season." When the festival night follows the Sabbath, the Ḳiddush embraces two other benedictions by way of "separation" ("habdalah") between the higher sanctity of the Sabbath and the lower one of the festival, the place of these benedictions being before the giving of thanks for having reached the day: "Blessed be . . . , Creator of the light-rays of the fire. Blessed be . . . , who distinguishest between holy and profane, between light and darkness, between Israel and the nations, between the seventh day and the six work-days. Between the holiness of the Sabbath and the holiness of the holy day Thou hast distinguished, and Thou hast distinguished and hallowed Thy people Israel in Thine own holiness. Blessed be Thou, O Lord, who distinguishest between Holy and Holy." See Habdalah.

The full text of this benediction is not given in the Talmud, but its nature is discussed (Pes. 102b, 105a). The idea of distinguishing between Holy and Holy is derived from the veil in the Temple which divided the Holy from the Holy of Holies. After reciting the Ḳiddush the master of the house sips from the cup, and then passes it to his wife and to the others at the table; then all wash their hands, and the master of the house blesses the bread, cuts it, and passes a morsel to each person at the table.

Beside the Ḳiddush at the evening meal there is another of later origin and of less importance, called, by inversion, the "Great Ḳiddush." It consists simply of the recitation of some Bible verses referring to the Sabbath or the current festival, and of the benediction for wine, and precedes the first morning meal (see Oraḥ Ḥayyim, 271–272). Regarding the origin of the Ḳiddush see Liturgy.

A. L. N. D.

ḲIDDUSH LEBANAH. See New-Moon.

ḲIDDUSH HA-SHEM and **ḤILLUL HA-SHEM** ("Sanctification" and "Desecration of the Name"): Terms denoting the highest positive and negative standards of Jewish ethics, the one indicating that everything within man's power should be done to glorify the name of God before the world, the other that everything should be avoided which may reflect discredit upon the religion of Israel and thereby desecrate the name of God (see L. Lazarus, "Zur Charakteristik der Talmudischen Ethik," p. 40). The terms are derived from Lev. xxii. 32: "Neither shall ye profane my holy name; but I will be hallowed among the children of Israel; I am the Lord which hallow you"—the verse called by Jellinek ("Predigten," 1862, i. 225 *et seq.*) "Israel's Bible in miniature." Referring in the text to the priests as the appointed guardians of the Sanctuary, the commandment, in its positive and in its negative forms, was applied at an early time to the whole people of Israel as the priest-people, whose very lives and history stand for the belief in the world's holy God. Sifra, Emor, xiii. reads: "I have brought you out of Egypt upon the condition that you sacrifice your very lives should the honor of My name require it"; hence every Israelite is enjoined to surrender his life rather than by public transgression of the Law desecrate the name of God (Sanh. 74a, b; Shulḥan 'Aruk, Yoreh De'ah, clvii.).

Jewish Martyrdom.

Throughout Jewish history martyrdom in the cause of religion is called "sanctification of God's name." Hananiah, Mishael, and Azariah (Dan. iii.; Pes. 53b; Sanh. 93a; Soṭah 10b), the men who in Maccabean times were "for the Lord's sake killed all day long" (Psalms xliv. 23 [A. V. 22], lxxix. 2), the generation of martyrs in Bar Kokba's time (Ber. 20b; Midr. Teh. to Ps. xvi. 4), are singled out as preeminent among those who glorified the name of God by their death, and as models for all the coming generations of Israel, the martyr-people. Only of the non-Jew, even when an observer of the Noachian laws common to all humanity, it is not expected that he sanctify the name of God by martyrdom (Sanh. 74b). Very dramatically R. Nathan describes the Jewish sentiment prevailing in a time of (Hadrianic?) persecution: "Why art thou brought out to be killed?"—"Because I have performed the rite of circumcision upon my son." "Why art thou to be stoned to death?"—"Because I have observed the Sabbath." "Why art thou led out to die by fire?"—"Because I have studied the Law." "Why art thou to be crucified?"—"Because I have observed the law of the unleavened bread on Pesaḥ." "Why art thou to be beaten with sticks?"—"Because I have swung the lulab on sukkot. All these things happen to me because I am the beloved one of my Father in heaven" (Mek., Yitro, 6; Midr. Teh. to Ps. xii. 5). After martyrdom had begun to imperil the existence of the Jewish nation in Palestine the council of Lydda decreed that only with regard to the three fundamental laws, against idolatry, incest, and murder, should death be preferred to transgression (Sanh. 74a). But when the transgression is demanded as a public demonstration of apostasy or faithlessness the rule is that death should be preferred for the sake of the sanctification of God's name (see Maimonides, "Yad," Yesode ha-Torah, v.). The 'Aḳedah read on New-Year was taken by the Jewish people as a pattern of martyrdom which Isaac was to offer to all his descendants (Giṭ. 57b; IV Macc. xiv.-xvii.; Lam. R. i. 16; Schreiner, "Die Jüngsten Urtheile über das Judenthum," 1902, pp. 179-180).

Works a Powerful Spell.

But the familiar term Ḳiddush ha-Shem assumed for the Jew in the course of time a still wider meaning. Every act of humanity and generosity done to the non-Jew appeals to the Jew as dictated by the impulse to hallow God's name before the Gentiles. Just as the prophet Ezekiel (xx. 31, xxxix. 27) emphasizes the necessity to hallow God's name in the eyes of the nations, so did the Jew at all times pay especial regard to what the people around him would say (Gen. xxxiv. 30-31; Ex. xxxii. 12; Ps. cxv. 2); and he felt all the more constrained to observe the law of integrity and purity in the sight of the non-Jewish world. Simeon b. Sheṭah was held up for an example; when he bought an ass from the Arabs and his servants expressed delight at discovering a necklace of jewels around its neck, he immediately returned the necklace to the owner, who exclaimed: "Blessed be the God of the Jews, who renders His people so scrupulous in their dealing with other men!" (Yer. B. M. ii. 8c; Deut. R. iii.). It is the Jew's deep feeling of responsibility for his religious faith that works such a powerful spell upon him and inspires him to manifest by noble deeds of righteousness and love his allegiance to the God of his fathers.

Ḥillul ha-Shem.

Still more powerful as a deterrent from evil acts is the expression "ḥillul ha-shem," instilling fear lest the name of Israel and of Israel's God be brought into contempt by the misconduct of the Jew. A theft committed against the non-Jew is more heinous than a theft against the Jew, because to the transgression of the Law is added the sin of desecrating the Name (Tosef., B. Ḳ. x. 15). "All sins may be atoned for by repentance, by means of the Day of Atonement, or through the chastening power of affliction, but acts which cause the desecration of the name of God will not be forgiven, for "Surely this iniquity shall not be purged from you till ye die, saith the Lord God of hosts" (Isa. xxii. 14; Mek., Yitro, 7; Yoma 86a; Matt. xii. 32 *et al.* has, for "the Holy Name," "the Holy Ghost"). The greater the man, the more he must guard against causing ḥillul ha-shem by the slightest deviation from the path of strictest rectitude and moderation (Yoma 84a, 86a; Pes. 49a). To this day the warning against ḥillul ha-shem tends to keep the commonest Jew from committing any act that might disgrace the Jewish community.

K.

ḲIDDUSHIN (קדושין = "Betrothal"): Name of a treatise in the Mishnah, Tosefta, and the Babylonian and Jerusalem Talmuds; it is devoted chiefly to discussion of the various modes of betrothal and the conditions which must be fulfilled to make a marriage valid. "Ḳiddushin" is the rabbinical term for betrothal, because the wife becomes thereby the sacrosanct possession of the husband. In the mishnaic order of Seder Nashim this treatise is the seventh and last. Strictly, it should precede Giṭṭin, but the Mishnah follows the Scriptural order, which mentions marriage after divorce (Deut. xxiv. 1-2). In the Mishnah, Ḳiddushin is divided into four chapters, and comprises, in all, forty-seven paragraphs.

Contents.

Ch. i.: The husband obtains his wife in three ways: by money, however small the sum; by a written announcement; by sexual intercourse; the wife becomes free by divorce or the death of her husband (§ 1). This leads to a discussion of the acquisition and emancipation of Jewish and heathen slaves of both sexes (§§ 2-3), of the acquisition of cattle (§ 4) and real or personal property (§§ 4-6), and of the distinctions between man and woman regarding fulfilment of the laws, those pertaining only to a definite time not being binding on a woman (§§ 7-8); laws dealing with real estate apply only to Palestine (§ 9).

In the last paragraph, which is haggadic in nature (§ 10), the reward for the observance of a law is described, and it is further stated that he who is learned in the Scriptures, possesses a knowledge of the Mishnah, and has good manners is fairly guarded against sin, whereas he that knows neither the Scriptures nor the Mishnah, and is devoid of manners, can not be regarded as a civilized being.

Marriage by Proxy.

Ch. ii.: Rules and conditions for marriage by proxy. A man may wed through a representative; so may a woman (§ 1); but any error or fraud on the part of either invalidates the union (§§ 2–3, 5–6); so does any failure of the proxy to follow exactly his instructions (§ 4). In case the marriage is effected by the gift of some article of value, it must be an object the use of which is not forbidden (§§ 8–10).

Ch. iii.: Further rules and conditions for marriage by proxy (§§ 1–7); regulations for cases in which a father betroths one of his daughters while they are yet minors, but without stating definitely which one (§ 9), or in case either the man or the woman denies that a marriage ceremony has been performed (§§ 10–11); circumstances under which the custody of the child is granted to the man (or the woman), or under which the child is regarded as illegitimate (§§ 12–13).

Ch. iv.: Enumeration of the ten families of diverse origin that removed from Babylonia to Palestine, and as to which of them may intermarry (§§ 1–3); the tests by which purity of lineage is proved (§§ 4–5); rules for the attestation of marriages contracted in distant lands (§§ 10–11). Ethical injunctions: a man must not remain alone with a woman (§§ 12–13); a father must teach his son one of the honorable trades enumerated and discussed, though the preeminence of the study of the Law over every other occupation is emphasized (§ 14). Special interest attaches to the exclamation of Simeon b. Eleazar: "The beasts, created to serve me, find nourishment easily; therefore I, created to serve God, should find nourishment still more easily; yet, for my sins, it is hard for me to gain my food." The chapter closes with the statement that Abraham had observed all the precepts of the Torah even before it was revealed.

In the Tosefta this treatise is divided into five chapters. Particularly noteworthy are the eulogy of craftsmanship (i. 11) and the assertion which was made by Akiba that the Biblical prohibition against intermarrying with certain nations even after conversion to Judaism (see Deut. xxiii. 4–9) had been abrogated, since the conquests and deportations by the Assyrian kings (comp. II Kings xvii.) had so dispersed the peoples that none of them remained in its original abode (v. 4).

Both the Jerusalem and the Babylonian Gemaras contain elucidations of the individual mishnayot, in addition to discussions and decisions of questions not contained in the Mishnah itself. The Babylonian Gemara has, furthermore, numerous interesting comments and maxims, of which the following specimens may be cited: "Who teacheth not his son a trade teacheth him robbery" (29a); "Rewards for good deeds come not in this world" (39b); "It is the duty of a father to have his son instructed in the Scriptures, the Mishnah, and the Talmud, as well as in halakot and haggadot." The ancients were called "Soferim" because they counted the letters of the Torah; they said that the "waw" in the word גחון (Lev. xi. 42) divided the letters of the Torah into two equal groups, as does the "'ayin" in the word מיער (Ps. lxxx. 14). The word דרש (Lev. x. 16) divides the words, and Lev. xiii. 43 the verses, of the Pentateuch in half, while Psalm lxxvii. 38 plays a similar part in the Book of Psalms (30a).

Masoretic Divisions.

These Masoretic observations are of special importance, inasmuch as they differ from the present Masorah (comp. the marginal notes to the Wilna edition of the Talmud). A very interesting characterization of certain nations is found in 49b, which says that the highest wisdom is the possession of Israel, and the most perfect beauty the heritage of Jerusalem; the ancient Romans possessed the greatest wealth, while the direst poverty is found in Babylon; the Persians are the bravest nation; magic flourishes best in Egypt, and wantonness in Arabia; women are most inclined to loquacity and slaves to laziness. There is an account of the conflict between John HYRCANUS (here called "Yannai") and the Pharisees in 66a, and in 72b it is related that when Akiba died, Judah ha-Nasi was born; when he died, Rab was born; when Rab died, Raba was born; and when Raba died, Ashi was born. Another reference to Akiba is found in 81b, where it is related that whenever he read Lev. v. 17 he wept: "If he that has unwittingly transgressed must make atonement for his transgression, how much more he that has sinned consciously." It must be noted that the passage from "Ha-ishah niknit" (2a) to "We-en dabar aḥer kortah" (3b), at the beginning of the Gemara to the first chapter, is a later addition of the Saboraim (comp. the letter of Sherira Gaon in Neubauer, "M. J. C." p. 26).

KIDNAPING.

See ABDUCTION.

KIDRON (קדרון):

A ravine on the east of Jerusalem, separating the city from the Mount of Olives (comp. II Sam. xv. 23, 30). Except in II Kings xxiii. 4, "Kidron" is always preceded by "Naḥal," which, like the Arabic "Wadi," has the double meaning of "brook" and "valley." For a part of the winter only, after heavy rains, the Kidron indeed is a torrent, for which reason it is called by the Septuagint *Χειμάῤῥους Κεδρών*. The latter word, which means "dark," relates to the dark color of the stream or ravine; but the translation of the Septuagint in II Sam. xv. 23 and I Kings xv. 13, *Χειμάῤῥους τῶν Κέδρων*, suggests a Greek name given to the place on account of the cedars abounding there.

The Kidron is first mentioned in the Old Testament as having been crossed by David in his flight (II Sam. xv. 23); then as having been indicated by Solomon to Shimei as the limit beyond which he might not go, under penalty of death (I Kings ii. 37). Later it became the repository of the implements of idol-worship when removed from the Temple. It was there that Asa burned his mother's idols

(I Kings xv. 3; II Chron. xv. 16) and that Josiah destroyed the Asherah (II Kings xxiii. 4, 6, 12; II Chron. xxix. 16, xxx. 14). It would appear that in the time of Josiah, Kidron was the cemetery of the common people (II Kings xxiii. 6; comp. Jer. xxxi. 39 [A. V. 40]), hence the statement of Josephus ("Ant." ix. 7, § 3) that Athalia was executed in the Valley of Kidron. It is also mentioned as having been crossed by Jesus on his way to Gethsemane (John xxiii. 1, A. V. Cedron). The Valley of Kidron is generally identified with the Valley of Jehoshaphat (see Jehoshaphat, Valley of). For the Hebrew inscription found there in 1880, see Siloam Inscription.

KIERA (ESTHER): Jewish favorite of the sultana Baffa, who was the wife of Murad III. and the mother of Mohammed III. (not, as Graetz designates her, the mother of Mohammed IV.); died 1600. The widow of one Elias Chandali, Esther gained great influence in the palace as the protégée of Baffa. In a firman of Osman II. issued in 1618 the privileges granted to Esther by his predecessors are confirmed and secured to her grandchildren. From this firman it appears that Esther was first rewarded by Sultan Sulaiman II. in 1548 for services rendered by her to his mother.

Her Influence.

The extent of Kiera's influence with Baffa may be seen from the following facts, undoubtedly authentic: When Catherine de Medici wrote in 1584 to Baffa asking her support for the promotion of the waywode of Wallachia, Esther was employed by Baffa to see that the Turkish translation accompanying the Italian text of the letter was correct. Again in 1587 Baffa wrote a letter of recommendation and approval in regard to a certain lottery started by Kiera. The favorable attitude of the Venetian republic toward this lottery was the cause of the issuance of seven firmans granting certain privileges to the republic. This shows that the business transactions carried out by Esther were made possible by the cooperation of the harem through the personal influence of Baffa.

Many important diplomatic transactions and many appointments to military and administrative offices were made through Kiera; and her long career under three sultans testifies to her ability and ingenuity. The representatives of the European powers often applied to Kiera and secured concessions through her. They variously refer to her in their writings as "Kiera," "Chiera," "Chierara," "Chirazza," or "Chiarazza" The name "Kiera" is of Turkish origin, Kiera's Jewish name being Esther; and it appears that toward the end of her life she adopted the Mohammedan faith and was then given the name "Fatima," as she is so styled in the firman of Osman II. Her sons were not converted with her, as is shown by the statement that one of them later saved his life by becoming a Mohammedan (he was called "Aksak Mustafa," and he died in the reign of Ibrahim I. [1640-49]); and her grandchildren also are styled Jews in the firman referred to.

Kiera was not always scrupulous in her dealings. Many of the appointments made through her involved bribery and created bitter animosity. The Turkish soldiers known as the Spahis resented the appointment through her of some military officers, and plotted to kill her. Gathering near the palace they demanded her surrender to them, and the deputy grand vizier Khalil, wishing to save her life, ordered her and her sons to be brought to his own palace. The mob, led by the Spahis, overcame the guard, and taking Kiera and her sons (Aksak Mustafa excepted) from the very steps of the palace killed them (1600). Cutting off Kiera's limbs they nailed them to the doors of the dwellings of those officials who had obtained positions through her influence. The sultana Baffa was very indignant and accused Khalil of unwillingness to protect her favorite, and in consequence he was removed. The historian Katib Tshelebi, in his "Pheslike" (ed. Constantinople, i. 128), gives a somewhat different version of the affair. According to him, Khalil Pasha had Kiera brought to his palace and with his own hand thrust a dagger into her and killed her. Her entire fortune (estimated at about 100,000 ducats) was confiscated by the Turkish government.

Her Assassination.

The contemporary Jewish historians speak highly of Kiera for her readiness to help her coreligionists. While there was a considerable number of well-to-do Jewish merchants in Constantinople in those days, they were always subject to the greed of the sultan's body-guard, which plundered the Jewish houses in times of municipal disorder and at fires. At such times Kiera came to the aid of the sufferers. She also very generously aided Hebrew writers in publishing their books. The Spanish physician Samuel Shulam published Zacuto's chronicle "Yuḥasin" at Kiera's expense.

Kiera became the heroine of European fiction. Thus she undoubtedly appears in "Byegly Vzglyad na Nastoyashchi i Prezhni Seral" in Chistyakov's "Zhurnal Dlya Dyetei," 1864, Nos. 5 and 6.

H. R. J. G. L.

KIEV: "The mother of Russian cities"; situated on the right bank of the Dnieper, in the government of the same name. In 1902 it had a population of 249,830, including about 20,000 Jews.

It is difficult to decide when Jews first settled in Kiev. The city was probably built by the Chazars not later than the eighth century, and it is likely that Jews from the Byzantine empire, the Crimea, Persia, and the Caucasus settled there with the Chazars about the same time (see Malishevski, in "Trudy Tretyavo Arkheologicheskavo Syezda," Feb. 12, 1878; "Kievskiya Gubernskiya Vyedomosti," 1878, No. 24). Brunn is of the opinion that the Chazars derived "Kiev" from "Kioba" or "Kiaba," the name of three brothers ("Trudy Tretyavo Arkheologicheskavo Syezda," Feb. 12, 1878, p. 89). Zakrevski (in "Opisaniye Kieva," p. 311, Moscow, 1868) is also of the opinion that the Chazars were the means of bringing the Jews to

Kiev; this being so, the Jews antedate the Russians as citizens of that place. Malishevski, in "Yevrei v Kievye i na Yugye Rossii," published in the "Trudy Kievskoi Dukhovnoi Akademii," says that Jews from the Orient (776) and from the Caucasus emigrated to Chazaria, and thence to Kiev, where they found a community of Crimean Jews. Joseph ha-Kohen (in "'Emeḳ ha-Baka") is authority for the statement that Jews entered Russia in 690, after the defeat of the Persians by the Arabs. When Kiev was taken by the Varangians many of the Jews escaped to Chazaria and to the countries on the Volga and the Don, and after the defeat of the Chazars by Svyatoslav in 969 many Jews emigrated to the Crimea. According to Theophanus a numerous Jewish community existed in Kiev in the eighth century (Malishevski: 10th cent., *ib.* p. 44).

Settled Under the Chazars.

The Grand Duke Vladimir found there a large Jewish community, and although he was averse to adopting their religion, yet, according to the Arabic writer Ibn Ḥauḳal, he was favorably inclined toward the Jews. In the chronicles whose authorship is ascribed to Nestor it is related that Chazarian Jews went to Kiev in 986, immediately after the Bulgars and Germans, in order to induce Vladimir to accept their religion. Tatishchev remarks in regard to this that it does not exclude earlier arrivals of Jews, for the Jews taken captive by Svyatoslav were settled by him in Kiev, on the River Ross, and in numerous other places, and that their number was considerable ("Istoriya Tatishcheva," ii., note 176). Unfortunately there is no other source to corroborate Tatishchev's statement, as Harkavy has already pointed out ("Voskhod," 1881, i.).

Gatzuk mentions the current traditions according to which settlements of Jews in the vicinity of Kiev existed in the tenth century. In the eleventh century Jews from Germany settled in Kiev. When Russia celebrated the one thousandth anniversary of the founding of Kiev (1865), the Jews in an address mentioned that Jews had lived in Russia before the empire was founded. During the reign of Vladimir (d. 1015) and under Svyatopolk after him the Jews lived in Kiev undisturbed. The first bishop appointed by Yaroslav, in 1035, was called "Lucas, the Little Jew" ("Luka Zhidyata"), who evidently was either of Jewish descent or had some connection with the history of the Jews in Kiev. He always preferred in his teachings to dwell on the Decalogue, and often used Biblical quotations common among the Talmudic Jews (Harkavy, in "Voskhod," 1881, i. 73).

A Russian cleric, Philaret, in a review of Russian theological literature (in "Uchonyya Zapiski II Otdelyeniya Akademii Nauk," iii. 8, St. Petersburg, 1865), remarks that from the work of Illarion of Kiev it is evident that the Jewish missionaries from the Chazars, who had failed to convert him to Judaism, did not relinquish their hope of making proselytes among the Russians. Feodosi Pecherski (1057–74) certifies to the existence of a considerable Jewish community in Kiev in his time. During the reign of Grand Duke Izyaslav, the bazaar of Kiev was removed from the lower part of the city ("Podol") to the Kiev heights, where the Jews were settled. At that time the Jewish community was augmented by new arrivals, probably driven from Germany and other western countries by the persecutions of the Jews immediately before the First Crusade. In 1097 the Jews of Kiev are mentioned in connection with the salt monopoly, when Svyatopolk closed the road from Galicia and the Jews increased the price of salt (Zakrevski, *ib.* p. 28; Malishevski, *ib.* p. 102). Benjamin of Tudela (12th cent.), in his "Massa'ot shel Rabbi Binyamin," refers to Kiev.

In the Twelfth Century.

In the "Sefer ha-Yashar" (pp. 52a, 522, Vienna, 1811) Rabbi Moses of Kiev is mentioned as one of the pupils of the tosafist Jacob Tam (d. 1170), the grandson of Rashi. This shows that in the twelfth century Russian Jews studied at the famous Talmudic academies of northern France. It is known that the Russian Grand Duke Svyatopolk (1093–1112) held the Jews of Kiev in favor. After his death, the rabble revolted against his widow and the supporters of her husband and attacked the Jews of Kiev (1113), but Vladimir Monomach induced the rioters to disperse. In 1124 the Jewish quarter in Kiev was destroyed by fire. In the "Ipatiev Chronicle" the "Jewish Gate" is mentioned (1146 and 1151). From facts collected from different sources it is quite evident that in the twelfth century Kiev was the center of trade between the East and the West, and that the Jews and the Italians controlled most of it. From the histories of South Russia it appears that Jews lived in Kiev in the thirteenth century, but when in 1239 the Tatars overwhelmed the southwestern cities of Russia and destroyed them the Jews shared the fate of the other inhabitants. In the following year (Dec. 6, 1240) Batu Khan captured and destroyed Kiev, which resulted in the subjection of Russia to the Tatar yoke. The Jews of Kiev suffered with the rest of the inhabitants, but when the "Grand Khan," after conquering South Russia, appointed the Russian Prince Daniil Romanovich as the regent of Kiev and South Russia, Daniil called (1259) Germans, Jews, Poles, and other foreigners to settle in Kiev. His son Mstislav Daniilovich also invited Germans and Jews to settle in his land. That Vladimir Vasilkovich also favored the Jews is evident from the fact that, according to the chronicles, in 1288 they were among those that lamented his death "as much as they had lamented the capture of Jerusalem." Kiev being a Tatar dependency at that time, the Jews there were allowed the privileges given them in other Tatar countries, and for this reason the other inhabitants of Kiev were ill-disposed toward the Jews.

When the Lithuanian Grand Duke Gedimin (d. 1325) conquered (*c.* 1320) South Russia, including Kiev, and founded the Lithuanian Russian empire, the Jews received many privileges (Solovyev, "History," book i., part iv., ch. iii.). According to Zakrevski (*ib.* ii. 216), the number of Jews in Kiev at that time increased considerably. During the reign of Withold (1392–1430), who granted privileges to all the Jews of Lithuania, they enjoyed great prosperity. Casimir IV. (1444–92) granted them additional privileges, knowing that through their commercial skill they would replenish his depleted funds (Zakrevski, *l.c.* ii. 313). In 1486 Mordecai Gadayevich and Perka Yudinovich, Jews of Kiev, are mentioned as the farmers of the customs duties at Bryansk.

In the Fifteenth Century.

In 1488 the Jewish tax-farmers Simkha, Ryabichka, Daniilovich, and Samodyelka are mentioned in a message of Czar Ivan Vasillivich to King Casimir, in which the czar complains that the Moscow merchants were taxed too heavily ("Sbornik Imp. Istoricheskavo Obschestva," xxxv. 10-12). About 1425 the Judaizing Heresy originated among the Russians in Kiev, and spread thence to Novgorod and Moscow through Zechariah of Kiev, who went from Kiev to Novgorod in the suite of the Prince Mikhail Alelkovich (Solovyev, *ib.* book i., part v., ch. v.; see Aleksei). In the fifteenth century the Jewish community of Kiev contained many scholars, and the saying became current that "from Kiev learning is spread." Among these scholars was Moses ben Jacob Ashkenazi ha-Gole (b. 15th Kislew, 1449; d. Kaffa 1529). He wrote in Kiev his notes to "Gan 'Eden" and his work "Shushan Sodot." When the Jews were expelled from Lithuania by Alexander Jagellon in 1495, Moses ha-Gole with the rest of the Kiev Jews emigrated to the Crimea. As is evident from the statement of Abraham ha-Rofe of Troki, the Tatars invaded and plundered Kiev (1482) and carried many Jewish captives to the Crimea.

In the sixteenth century (according to Zakrevski, *ib.* ii. 317) Jews lived in Kiev in great numbers. Zakrevski mentions also the grant to them by King Sigismund I. of Poland of a tract of land for burial purposes near the gate of Lvov, formerly known as the "Jewish Gate," by the bazaar which is even now called the "Jewish Bazaar." The Jewish quarter was at that time in the portion of the city known as "Stary-Gorod," extending as far as the Kudryavetz Hill. By a deed dated Cracow, March 4, 1507, King Sigismund farmed out the taxes of Kiev to the Jew Shamak Daniilovich, who farmed the taxes also of Lutsk and other places. In the same year Abraham Jesofovich is mentioned as tax-collector of Kiev; he was made a member of the hereditary nobility. In the latter half of the sixteenth century the condition of the Jews of Kiev underwent a change for the worse. Thus in 1576 King Stephen Bathory had to remind the waywode of Kiev, Prince Ostrovski, not to place foreign merchants, Christians as well as Jews, under the jurisdiction of the local castle court, since, according to the Magdeburg Rights granted to them by Alexander, they were under the jurisdiction of the municipal authorities. The foreigners had no right to conduct a retail business in Kiev, for that right belonged only to the citizens of Kiev ("Sbornik Mukhanova," No. 221; "Acty Zapadnoi Rossii," iii. 97).

During the Sixteenth and Seventeenth Centuries.

In 1585 the noblemen of the Greek Orthodox faith made a complaint before the Metropolitan of Kiev about the disorder reigning in his bishopric, and petitioned him to protect their coreligionists from the oppressions of the Roman Catholics and the Jews ("Acty Zapadnoi Rossii," iii. 88, Govorskavo, 1865). In 1618, and again in 1619, the merchants of Kiev made complaint to King Sigismund III. that the Jewish merchants who arrived in Kiev did not stay at the "Gostinny Dom" (the inn assigned to them) and trade with other outside merchants; that they had built houses in Kiev, had taken the local trade in their hands, and were getting rich at the expense of the local merchants. In response to this petition the king decided that as the frontier town of Kiev would be protected, not by Jews, who would do nothing to repel the enemy, but by the Ukrainian merchants, and since Jews had not before lived in Kiev, where they had no right to live, "they must henceforth stay at the town inn to trade exclusively with local merchants; that they may not remain more than one day; and that they may not settle there permanently, on penalty of losing their merchandise, half of which would be turned over to the crown and the other half to the merchant gild of the place." Notwithstanding these restrictions and the privileges granted the Christian merchants, the Jews gained possession of the most important trade of Kiev and other South-Russian cities. Being excluded from participation in the affairs of the city by the Magdeburg Rights, the Jews were placed directly under the jurisdiction of the waywode. In the frequent absence of this official his power reposed in his assistant, who regarded it as a source of income; in this way the Jews managed to attain their ends in spite of the restrictions ("Starozytnosci Polskie," ii. 257).

In 1628 a decree of Sigismund III. in part confirmed the decision of the Kiev municipal court in the suit of the Jew Missan Josephovich, the farmer of the water-taxes, against the burgher Khmel for unpaid water-taxes. By this decision Missan's demands were partly allowed, and Khmel appealed to the king, who confirmed the decision of the court. It is well known that, notwithstanding the restrictions imposed upon them, Jews lived in considerable numbers in Kiev during the first half of the seventeenth century, owning lands, houses, and factories there (Zakrevski, *ib.* ii. 315).

Ruined by Chmielnicki.

The uprising under Chmielnicki destroyed the Jewish community in Kiev. Samuel Phoebus, the author of "Ṭiṭ ha-Yawen," is the only Jewish writer who mentions Kiev among the cities which suffered in the Chmielnicki uprising. He states that Chmielnicki went to the "great city of Kiev," where he found a man named Eliezer who was very wealthy ("like Korah"); that the Cossacks killed him and his family and took all his property. From Russian sources it is known that Chmielnicki and his Cossacks raged in Kiev for four days and killed off most of the Poles and the Jews. Even the graves in the cemeteries were opened and the bones thrown to the dogs. Only those Jews and Poles who had hidden in the vaults of the Greek Orthodox monasteries escaped death (Solovyev, *ib.* ii., book x., ch. iii.). According to the truce concluded by Chmielnicki with King John Casimir, the Jews were not to be permitted to live in Kiev or in the Ukraine. In the peace agreement made in 1661 at Byelaya Tzerkov, the king demanded that the Jews be allowed to return to the Ukraine and to own property in Kiev. The Jews returned accordingly, but Chmielnicki soon turned over the Ukraine to Czar Alexis Mikhailovich, and they were again driven out from Kiev and the Ukraine. Thus from 1655 until near the end of the eighteenth century only a small number of Jews were to be found in Kiev, or in any part of the Ukraine.

Toward the end of the reign of Catherine II., by an order dated June 23, 1794, Jews were again permitted to settle in Kiev, and even to acquire property, conditionally, however, on their paying double the tax imposed on the Christians. From that year the Jews began to resettle in Kiev, and in the reign of Catherine's son Paul Petrovich the Jewish community numbered 452. At that time Judah Löb Löwenberg was granted by the governor-general Sherkov a tract of land for a cemetery; the governor-general, upon his representations, gave permission also for the building of a synagogue. The tract known as "Zwyerinetz," just outside of Pechersk, was assigned for a cemetery. At that time also a ḥebra ḳaddisha was organized and a constitution adopted (1797 or 1798). Among those resting in the old Kiev cemetery may be mentioned Meïr Lebush Malbim and Raphael Nata Rabbinovicz, author of the "Diḳduḳe Soferim."

Under Alexander I.

With the accession to the throne of Alexander I. Jews were permitted to reside in Kiev unhindered by any restrictions. They were registered by the city magistrates with other citizens and received passports from them. As the Jews increased rapidly the Christian citizens of Kiev petitioned the government in 1810 to expel them, claiming that the privileges granted to the citizens of Kiev by Sigismund in 1619 excluded the Jews from residence in Kiev. Notwithstanding this petition and the money spent in its furtherance by the citizens (see Baratz, "Den," iii., No. 22), their attempts were not successful. The reply which they received (Jan. 13, 1810) pointed out that in the fifteen years which had elapsed since the permission of settlement by Catherine the Great the Jews had acquired property, and that justice did not permit the government to expel them, since they would thereby have lost their possessions: it is the business of government to see that justice is done between man and man. The conflicts between the Jews and Christians of Kiev were found by the government to be due more often to the Christians than to the Jews, and the administration of Kiev was ordered to see that no disturbances occurred between Jew and Gentile (*ib.*). The anti-Semites of Kiev made no further complaint for the time being.

In 1815 the Jewish population of Kiev numbered 4,500, and then a synagogue was built by special permission of the emperor. At the head of the Jewish community at that time stood Judah Löb ben Jacob Löwenberg, Ozer ben Bezaleel Rosenfeld, and Zeeb ben Abraham Segal. At the head of the ḥebra ḳaddisha was Moses ben Abraham. Beside the synagogue, the Jewish community built at that time two large houses of prayer, one on the Podol near the Prolovski monastery, and the other on the Pechersk, not far from the synagogue that burned down in 1829 (Zakrevski, *ib.* ii. 316). When Nicholas I. ascended the throne in 1825 he withdrew from the Jews the right of residence in Astrakhan and the concessions granted them in 1804 by Alexander I. The Christian inhabitants of Kiev availed themselves of the opportunity to petition the czar to expel the Jews from Kiev, basing their petition on the same ground as in 1810; the petition was granted, and a ukase was issued by Nicholas on Dec. 2, 1827. It reads as follows:

> "(1) Jews are strictly prohibited from building any house of prayer in Kiev, and the old building is to be sold at auction at once; (2) Jews who are registered with the city magistrates of Kiev must immediately leave the city and register in some town inside of the Pale. Those Jews who have residences, business houses, or factories in Kiev are given two years in which to settle their affairs; all the others to leave the city within six months."

Under Nicholas I.

The governor-general Zheltukhin did all he could to render unbearable the life of the Jews remaining in Kiev; the latter, however, applied to the czar through two of their prominent merchants, Berner and Kerner, and received permission to settle outside the city limits in the village of Lyebed; and through the efforts of the new governor-general, Levashev, who pointed out their usefulness in the development of commerce in Kiev, the czar was induced to write in his own hand a permit for them to stay until Feb., 1835, but he withdrew permission from them to settle in Lyebed. When Feb. 1, 1835, arrived, the Jews, who had hoped for a change for the better, were greatly disappointed. The administration would make no further concessions, and they were compelled to leave Kiev immediately and to sell their property for whatever they could get. Exception was made only in favor of the few Jewish contractors who had built the fortress of Kiev and the University of St. Vladimir.

The next governor-general, Bibikov, watched carefully to see that no Jews settled in Kiev. He organized a special gendarmerie to look after the Jews who came there on business, and who received permits to stay only from one to five days. To facilitate police supervision, two exclusively Jewish hotels were established, one in the Podol and the other in the Lyebedskaya; and all incoming Jews were compelled to stay in one of the two. The guests were obliged to pay exorbitant prices for food and drink, and the hotel-keepers, both Christians, could afford to pay the heavy license, which was soon raised from 3,600 to 6,500 rubles. When a Jew was found in the city without a permit to reside there he was dealt with as a criminal without passport. At ten in the evening every Jewish guest was obliged to return to the hotel, where as many as ten would be crowded into one room, and when the time of departure came the hotel servants would rudely hurry them out.

In 1856, about a year after Alexander II. ascended the throne, the condition of the Jews throughout Russia began to improve, and those of Kiev, in particular, felt the liberal spirit of the new legislation. The regulation requiring incoming Jews to stay at specified hotels was abolished and Jewish artisans were permitted to establish themselves in the city. Prince Vasilchikov, the governor-general, and Hesse, the civil governor of Kiev, advocated warmly the amelioration of the Jews' condition, and the abolition of Jewish disabilities in so far as circumstances would permit. An edict was issued Oct. 30, 1861, which made it permissible for Jewish graduates of universities, Jewish merchants of the first gild, and foreign Jewish merchants, with their families, clerks, and servants, to establish themselves in Kiev. The community of Kiev received a still larger accession through the ukase of 1866, which granted Jewish artisans the right to reside outside the Pale. The prosperity of the Jewish community added materially to the prosperity of the entire city. The activity of the Jewish merchants of Kiev stimulated the development of the sugar industry. Kiev became a prominent sugar market and an important general commercial center. Its Jewish merchants played a leading part in the establishment of banks, stimulated the development of navigation on the Dnieper, increased the export trade in grain, and thereby conferred a direct benefit on the farming communities of the entire government.

Under Alexander II.

This prosperity continued until the outbreak of the anti-Jewish riots in South Russia. On May 8, 1881 (April 26) anti-Jewish riots broke out in Kiev, as they had elsewhere, and there is sufficient evidence to show that the riots were premeditated. Prominent members of the Jewish community had been warned personally by Von Hübbenet, the chief of police, who advised them to take measures for their protection, and even offered, in some cases, to place cannon at their doors. Rumors that anti-Jewish riots were being planned were circulated in Kiev several weeks before Easter, and Von Hübbenet himself had informed members of the community that a trainload of Great Russians, all wearing red shirts, had arrived in the city, the purpose of their coming being the organization of the riots. The police in the synagogues on May 7 thought it would not be safe for the Jews to keep their stores open on the following day. When the outbreak began on that day the police and military were evidently in sympathy with the rioters, and some of the Christian merchants looked on with pleasure while property valued at about 2,000,000 rubles was being destroyed. This does not take into account the enormous loss incurred through the enforced idleness of the Jewish artisans. Not content with the destruction of stores and houses, the rioters attacked the synagogue and tore into shreds the scrolls of the Law. Thousands were rendered homeless, men once wealthy were reduced to poverty and despair, and many were seriously injured. In all 3,150 persons, or 750 families, were reduced to absolute want, among them being 403 families of artisans and laborers. The riots spread to the neighboring towns and villages, particularly Smyela, where 20 Jews were killed and 40 wounded.

The riots were followed by repressive police measures—directed against the victims of the riots. The military tribunal, whose duty it was to examine the persons accused of attacking the Jews, openly sympathized with the suspects instead. The procureur général, Major Strielnikov, repeatedly evaded his duty during the trials, and instead of raising his voice against the authors of the disorders spoke against the victims. He went so far on one occasion as to express a desire to see all the Jews driven over the frontier. The openly expressed wish of the procureur général was followed by numerous expulsions, by the police, of Kiev Jews. A deputation of Jews from Demiyevka, a suburb of Kiev, which went to seek the intervention of Drenteln, the governor-general, was dismissed with the sneering remark that they were at liberty to emigrate to Jerusalem if not satisfied with existing conditions. A member of the deputation retorting that they could not even leave the country without the permission of the government, the governor-general replied hastily that the government was quite ready to grant the authorization.

The measures of the police authorities led to the emigration of a considerable number of Jews from Kiev and vicinity in July and August of the same year (1881). Some of these were enrolled as members of the first Jewish agricultural colony established in Louisiana in the fall of 1881. Forced emigrations continued throughout the latter part of 1881 and during 1882, and factory employees and artisans were continually expelled by the police without any authorization by existing laws. The emigration assumed much larger proportions after the issue of the "May Laws" in 1882.

Since 1881 the condition of the Jews in Kiev has not improved. A large proportion of the Jewish population is subject to expulsion at the pleasure of the police authorities, and the Jews are often in dread of anti-Jewish disorders, as at the time of the Kishinef massacre (1903), when the members of the Kiev community entertained well-grounded fears of similar disorders.

Among the Hebrew scholars of Kiev may be mentioned Herman (Hirsh) Baratz, Abraham Baer Dobsewitch, Judah Löb Levin (now resident at Tomashpol), Max Mandelstamm, M. A. Shatzkes, Eliezer Schulman, Isaac Jacob Weissberg, Joshua Zuckerman (government rabbi). Among other prominent members of the Kiev community may be mentioned the Brodski family, Abraham Kupernik and his son Lev, Moses Weinstein, Max Rathaus, Mayer Greben, and Leon Ashkenazi.

H. R.

KIHAYA or **KAPU KIHAYA:** Title of the political representatives of the rayas, *i.e.*, the non-Mohammedan Turkish subjects, at the Porte. The Jewish representative is proposed by the chief rabbi of the central consistory of the Jews of Constantinople, his nomination being confirmed by the minister of public worship. The Jewish Kapu Kihaya accompanies the chief rabbi on all his visits to the palace or to the ministers, speaking in his name and presenting the official petitions of the Jewish community to the grand vizier or to the other ministers at the palace. At the instance of his colleagues he receives honorary insignia from the sultan. Formerly, when the chief rabbis were unable to speak Turkish, the functions of the Kapu Kihaya were more important than at present.

The office was created about 1530 by Sultan Sulaiman the Magnificent; and the first incumbent was Rabbi Shalṭiel, who rendered invaluable services to the Ottoman Jews on various occasions by making use of his privilege of free entry into the palace. No list of the Jewish Kapu Kihayas has been preserved. A certain Jacob Gabbai held the office in the reign of Sultan 'Abd al-'Aziz (1861–73) and at the beginning of that of Sultan 'Abd al-Ḥamid II. He was succeeded by Joshua Agiman, who is still in office (1904).

KIKKAR (ככר, "round"): **1.** The central and more extensive part of the Jordan valley, referred to in Gen. xiii. 10, 12; xix. 17, 25, 28, 29; Deut. xxxiv. 3; II Sam. xviii. 23; I Kings vii. 46; II Chron. iv. 17; Ezek. xlvii. 8. At a later period Kikkar may have included the neighborhood of Jerusalem (Neh. iii. 22, xii. 28 [A. V. "plain," "plain country"]; see Buhl, "Geographie des Alten Palästina"; Driver, "Commentary on Deuteronomy," xxxiv. 3; Hastings, "Dict. Bible," *s.v.*; Ridgeway, "Origin of Metallic Currency").

2. Talent (apparently the "gaggaru" of the El-Amarna tablets; in Greek, *τάλεαντον*), a Babylonian denomination of weight = 60 minas = 3,600 shekels; the heavy talent weighing about 130 lbs. avdp., and the light, about 65 lbs. avdp. As a medium of exchange among the ancient Hebrews, for which purpose both gold and silver were used, the heavy gold talent contained 758,000 grs. troy, or about 103 lbs.; the light contained 397,000 grs. troy, or a little over $54\frac{1}{7}$ lbs. The heavy silver talent contained 673,500 grs. troy, or about $96\frac{1}{5}$ lbs. avdp., and the light, 336,750 grs., or about $48\frac{3}{28}$ lbs. avdp. The Mishnaic ככר contained 315,000 grs., or 45 lbs.

E. G. H. A. R.

KIL'AYIM ("Of Two Sorts"; "Heterogeneous"): Name of a treatise of the Mishnah, Tosefta, and the Palestinian Talmud. It belongs to the order Zera'im, and deals with the exact definition of the Pentateuchal prohibitions (Lev. xix. 19; Deut. xxii. 9–11) which forbid the mingling of different kinds of seeds and vegetables, the pairing of different kinds of animals, the mixture of wool and flax in the same garment, etc.

In the Mishnaic order this treatise is the fourth, and is divided into nine chapters, containing seventy-seven paragraphs in all.

Ch. i.: Enumeration of the different sorts of grain, legumes and other vegetables, herbs, and trees, which do not constitute kil'ayim together (§§ 1–4); herbs and animals which do form kil'ayim (§§ 5–6); how the different trees form kil'ayim with one another and with plants, and how the plants form kil'ayim with one another (§§ 7–9).

Ch. ii.: What is to be done when different seeds are mixed; concerning the merging of one variety in the other (§§ 1–2); what must be done when one desires to plant grain in a field already sown with different grain, or to plant trees in a grain-field (§§ 3–5); the distances to be observed between the different beds, when one wishes to plant different things in separate beds in the same field (§§ 6–11).

Ch. iii.: Of the distances between beds of cabbage, onion, and other vegetables (§§ 1–6); of the distances between grain and herbs (§ 7).

Ch. iv.: Of vineyards: how large a space must be left in the middle of the vineyard or between the vineyard and its hedge if other seed is to be sown here (§§ 1–3, 8–9); how the hedge must be made, so that one may plant outside it (§ 4).

Vineyards.

Ch. v.: The vineyard continued: cases in which a ruined vineyard may still be used (§§ 1–4); how far the herbs in a vineyard spoil the taste of the wine (§ 5); what herbs must be removed from a vineyard when they grow wild there, and the cases in which this must be done (§§ 6–8).

Ch. vi.: The vineyard continued: concerning the vine-rows, and the leaning of a vine against a tree that bears fruit or one that bears no fruit.

Ch. vii.: Vines and cuttings: vines which do not spoil the grain, although one may not plant the two together (§§ 1–3, 7–8); payment of damages for spoiling another's grain by planting vines (§ 4).

Ch. viii.: How far the various forms of kil'ayim are forbidden (§ 1); animals which constitute kil'ayim and may not, therefore, be harnessed together either to the plow or to carts (§§ 2–4); concerning hybrids and other animals (§§ 4–6).

Ch. ix.: Kil'ayim of clothing: goods or stuffs which constitute kil'ayim with one another (§§ 1–2); articles of clothing forbidden on account of kil'ayim (§§ 3–4); concerning clothes-dealers, tailors, and imported ready-made clothing (§§ 5–7); explanation of the word "sha'atnez" (Deut. xxii. 11); how stuffs must be sewed together to become kil'ayim (§§ 8–10).

Jerusalem Gemara.

In the Tosefta, Kil'ayim is the sixth treatise, and is divided into five chapters. The Gemara of the Jerusalem Talmud (there is no treatise Kil'ayim in the Babylonian Talmud) discusses the definitions contained in the Mishnah, and explains also many of the names of plants and animals which are mentioned there. It contains, moreover, many interesting comments, two of which may be cited here. "By the term 'statutes' in the passage, 'Ye shall keep my statutes' [Lev. xix. 19], are meant the natural laws which God has established. Kil'ayim is forbidden, therefore, because a mixture of things different by nature is unnatural, and is a transgression of the law of nature" (i. 7). "Although R. Judah ha-Nasi was very modest, he said he was ready to obey everybody in everything, and to perform every command, except to renounce his rank as patriarch and to consecrate another, as the sons of Bathyra once did in favor of his grandfather Hillel" (iii. 3).

For Jewish "Kulturgeschichte" this treatise contains much of interest, especially concerning agriculture, viticulture, and costume.

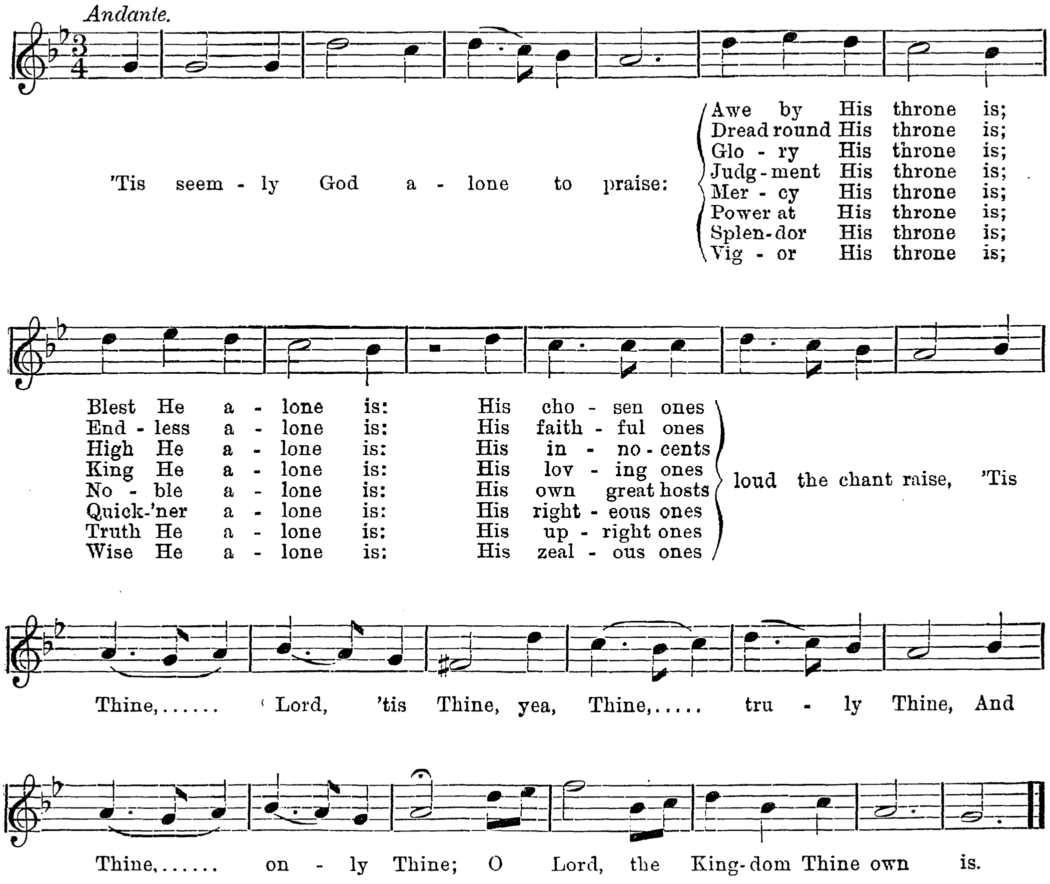
KI LO NA'EH: A hymn, beginning thus, in the home-ritual for Passover eve, and one of the latest constituents of the Seder Haggadah, dating from the fifteenth century (see Haggadah). It was originally intended for the first night of the Passover only, and Addir Hu was selected as its pendant for the second night; but, as shown in connection with that hymn (see Jew. Encyc. i. 186), for more than two centuries both hymns have been used together on each occasion. Somewhat similarly to "Addir Hu," "Ki lo Na'eh" is constructed in eight stanzas, identical save for the three varying words which successively bear as their initials the twenty-two (or, with the last thrice utilized, twenty-four) letters of the Hebrew alphabet.

In strange contrast to "Addir Hu," "Ki lo Na'eh" has been associated with but one all-pervading tune, despite the melodious value of several of the airs to which it has been traditionally sung. The melody in Rittangel's "Haggadah" of 1644 is the most alluring of these, and is therefore given here in modern notation, with an English paraphrase that may serve to make clear the alphabetical scheme of acrostic employed by the composer of the Hebrew verses.

KI LO NA'EH



Andante.
'Tis seem - ly God a - lone to praise:
Awe by His throne is;
Dread round His throne is;
Glo - ry His throne is;
Judg - ment His throne is;
Mer - cy His throne is;
Power at His throne is;
Splen - dor His throne is;
Vig - or His throne is;
Blest He a - lone is: His cho - sen ones
End - less a - lone is: His faith - ful ones
High He a - lone is: His in - no - cents
King He a - lone is: His lov - ing ones
No - ble a - lone is: His own great hosts
Quick-'ner a - lone is: His right - eous ones
Truth He a - lone is: His up - right ones
Wise He a - lone is: His zeal - ous ones
loud the chant raise, 'Tis
Thine,...... Lord, 'tis Thine, yea, Thine,..... tru - ly Thine, And
Thine,...... on - ly Thine; O Lord, the King - dom Thine own is.

KIMBERLEY. See South Africa.

ḲIMḤI: Name of a family of scholars, the earliest known members of which lived at the end of the eleventh and in the twelfth century. The name was so common that it was used by R. Michael in his "Seder ha-Geṭ" as a paradigm word. It is evidently not unconnected with the feminine form "Ḳimḥit" in the Talmudic literature (see Yer. Meg. i. 72a; "Ben Ḳimḥit" and "Simeon b. Ḳimḥit," Yer. Yoma, iii. 47d. v. 42b; "Ishmael b. Ḳimḥit," Tosef., Yoma, p. 189, l. 13 [ed. Zuckermandel]). In a punning way it is connected by Zacuto ("Sefer Yuḥasin," p. 225, ed. London) with the verse in Pirḳe Abot, "Im en Ḳemaḥ en Torah," and Joseph b. Todros wittily calls David Ḳimḥi "Ha-Ḥitti." In a manuscript of the commentary of David Ḳimḥi to the Prophets, dated 1347, in the National Library at Madrid, the name is punctuated "Ḳamḥi" (Steinschneider, "Hebr. Bibl." xi. 133), as also in three manuscripts of the "Miklol" in the Bibliothèque Nationale of Paris. This must have been the pronunciation in Arabic-speaking countries (from the Arabic "Ḳamḥ"). Steinschneider has called attention to the Arabic name "Al-Ḳamḥi" found in a Bodleian manuscript ("Monatsschrift," xxxiv. 528). The Hebrew pronunciation was "Ḳimḥi" (from "Ḳemaḥ"), as was perhaps indicated by the fact that Immanuel of Rome rimed it with "Simḥi" (see the discussion in the "Athenæum," March 22, 1884; "Hebraica," ii. 116; B. Felsenthal, in the Kohut Memorial Volume, p. 126). The modern Italian form of the name is "Chimichi." In Provence the name "Petit" was added to "Ḳimḥi." From Spain and Provence the family spread into Italy, Turkey, Syria, and England. The genealogy of its remotest members runs as follows: Isaac (*c.* 1090); Joseph (*c.* 1125); David (*c.* 1160); Isaac; Mordecai (*c.* 1290); Solomon (*c.* 1300); Joseph; Isaac (*c.* 1400). The more important of the later members of the family are noted below, in alphabetic order:

Abraham Ḳimḥi: Rabbi in Constantinople (1710–20; see Roest, "Cat. Rosenthal. Bibl." i. 265, 524, 579, 986).

Benjamin Ḳimḥi: Printer and editor at Salonica about 1770. He edited and annotated the "Sha'are Raḥamim" of Ḥayyim ha-Kohen and Solomon Abbadi (Nepi-Ghirondi, "Toledot Gedole Yisrael," p. 62; Benjacob, "Oẓar ha-Sefarim," p. 605, No. 1139).

Conprado (?) Ḳimḥi: Rabbi in Constantinople during the first half of the eighteenth century. Frankl identifies him with the Samuel Ḳimḥi mentioned in the "Shem ha-Gedolim."

G.

David Ḳimḥi (ReDaḲ; surnamed Maistre Petit): French grammarian; born in Narbonne 1160; died there 1235; youngest son of Joseph Ḳimḥi, and brother of Moses Ḳimḥi. His father having died while David was yet a child, the latter was brought up by his elder brother Moses. Later he supported himself by teaching Talmud to the young. He was well versed in the whole range of Hebrew literature, and became the most illustrious representative of his name. Later generations applied to him the saying from Abot (iii. 21), "Without ḳemaḥ [= "flour," the etymon of the name "Ḳimḥi"] no Torah"; and he exerted an influence which is felt even to-day.

As Grammarian.

Ḳimḥi's most important work is his "Miklol," in two parts: the first containing a comprehensive exposition of Hebrew grammar; the second, a dictionary of the Bible. The second part, however, having been later considered as a separate work, under the title "Sefer ha-Shorashim," the title "Miklol" has been given exclusively to the grammar. In these works Ḳimḥi, while not original, can not be considered a mere compiler. He digested and assimilated his material most thoroughly; and everywhere there is evident the remodeling and rearranging hand of one who is conversant with the entire range of his science and who surveys the whole with the glance of an adept. Above all he possesses in a high degree the power of systematization and of popular exposition. He excerpted from his predecessors copiously and circumspectly, and arranged his material with such comprehensiveness, clearness, and lucidity of exposition that, while he popularized the opinions of his illustrious forerunners, he at the same time made their works superfluous and helped to sink them into an oblivion from which they were not rescued until the nineteenth century.

Ḳimḥi was, however, conscious of his position as an epigone, as is evident from his short preface to the "Miklol." His grammatical material is drawn chiefly from the works of Ḥayyuj and Ibn Janaḥ and from the writings of his own father. He tries to understand the language from itself, seeking analogies in later Hebrew, less frequently in Aramaic and Arabic. Joseph Caspi and Profiat Duran frequently attack him, but Elisha b. Abraham defends him in his work "Magen Dawid" (Constantinople, 1517). The "Institutiones" and the "Thesaurus" of Sanctus Pagninus are essentially nothing else but elaborations of Ḳimḥi's "Miklol"; and Reuchlin and Sebastian Münster have also made considerable use of his work. The latest important work on Hebrew grammar, by E. König, is written "with constant reference to Ḳimḥi."

Also connected with grammar is Ḳimḥi's work "'Eṭ Sofer," containing rules for the writing of Bible-rolls, Masoretic notes, and accents.

As Lexicographer.

His "Book of Roots," the second part of the "Miklol," shows Ḳimḥi to be even more independent. Although based primarily on the dictionary of Ibn Janaḥ, he is quite self-reliant in the treatment of his subject. Besides Ibn Janaḥ he quotes as authorities Jacob b. Eleazar and his own father. He refers frequently in his dictionary to Masorah and grammar. He increased lexicological material through numerous fresh etymologies as well as through new comparisons with modern Hebrew and Aramaic. Many words he translates into his Provençal vernacular, and at times compares this latter with Hebrew.

As Exegete.

Ḳimḥi wrote commentaries on Genesis, the Prophets, the Psalms, and Chronicles. Some scholars ascribe to him also commentaries on the remaining books of the Bible. He wrote, too, a philosophic explanation of the cosmogony and of Ezekiel's vision. In the introduction to his commentary on the Prophets he explains the duty of expounding the Bible from a religious standpoint. In a general way he adheres to the literal meaning of Scripture; and his exegesis is based on grammar and rationality. At times, however, he introduces into his explanations philosophy; and some Biblical narratives he, following Maimonides, explains as visions. His commentary on the Psalms is especially noted for its polemics against Christianity. The numerous quotations from the Targumim scattered throughout his writings furnish valuable material for a future critical edition of these works. In the Middle Ages Ḳimḥi's commentaries were held in high repute among Christians as well as Jews, and numerous Latin translations were made of them: the influence of his commentaries on the English Bible is evident on every page (comp. Abrahams, "Jewish Life in the Middle Ages," ch. xix.). Besides his commentaries he wrote "Bi'ur Shemot ha-Nebu'ah" and "Bi'ur Sheloshah 'Asar 'Iḳḳarim."

As Controversialist.

Ḳimḥi's polemics against Christianity, contained in his commentary on the Psalms, were, after they had been omitted by the censor in later prints, published separately under the title "Teshubot la-Noẓerim." His "'Wikkuaḥ," against Christianity, is contained in "Milḥemet Ḥobah" (Constantinople, 1790). In the quarrel between the Maimonists and the anti-Maimonists, Ḳimḥi took a very active part, defending Maimonides. At an advanced age he traveled as a delegate from the cities of Lunel and Narbonne to Spain to induce the Jewish communities there to side with the Maimonists. Having fallen sick in Avila he could not complete his journey, and entered into correspondence with Judah al-Fakhkhar, but with little success.

G. C. L.

David Ḳimḥi: Lived in France about 1350; for him Moses b. David Ḳimḥi (see below) wrote, in 1383, Vatican Manuscript No. 221, 4 (Steinschneider, "Hebr. Bibl." xi. 135).

David Ḳimḥi: Lived in Constantinople prior to 1738.

David b. Joseph Ḳimḥi: Lived at Frascati, Italy, in 1326 (Berliner's "Magazin," i. 45).

Flaminio Ḳimḥi: Died in Rome in 1717; his epitaph was published by Berliner in "Monatsschrift" (xxxiv. 382) and in "Hildesheimer Jubelschrift" (p. 105).

Ḥayyim Ḳimḥi: Father of Sinai Ḳimḥi; rabbi in Constantinople about 1700.

Isaac Ḳimḥi: Lived in Castiglione, Italy, about 1378 (see Buber, "Sifre de-Agudta," p. 1b, Wilna, 1880; Berliner, in "Monatsschrift," xxxiv. 382).

Isaac b. David Ḳimḥi: Rabbi in Constantinople, where, in 1736, he wrote an approbation for the "Reshit Ḥokmah" (Roest, *l.c.* p. 337).

Isaac b. Joseph Ḳimḥi: Lived in Arles in 1394 (Gross, "Gallia Judaica," p. 89).

Isaac b. Joseph Ḳimḥi: Lived in Arles about 1393 (see Gross in "Monatsschrift," xxix. 174).

Isaac b. Mordecai Ḳimḥi: Casuist and liturgist at Nyons (France) during the fourteenth century; known also as **Mestre Petit de Nyons.** He was the author of a responsum, of "azharot" found in the Avignon and in the Carpentras maḥzors, and of a commentary upon the azharot of Solomon ibn Gabirol. A number of responsa of Solomon b. Adret are addressed to Isaac. He is said to have written other Talmudic works, and is in general highly spoken of by his contemporaries (see Zunz, "Z. G." p. 466; Landshuth, "'Ammude ha-'Abodah," p. 124; Renan-Neubauer, "Les Rabbins Français," p. 680; Gross, "Gallia Judaica," p. 385).

Isaiah Solomon Ḳimḥi: Rabbi in Hebron about 1783.

Israel Ḳimḥi: Author of "'Abodat Yisrael" (Smyrna, 1736), of an explanation of the 'Abodah of the Day of Atonement, and of a responsum found in "Mayim Rabbim" (see Azulai, "Shem ha-Gedolim," ii. 50; Benjacob, "Oẓar ha-Sefarim," p. 427).

G.

Jacob Ḳimḥi: Hebraist and pedler; born at Constantinople 1720; died in London about 1800; a son of Samuel Ḳimḥi, and a descendant of the ancient and noted family of Ḳimḥi. He was a well-known character in the city of London, where, as an itinerant vender of Oriental slippers, he frequented the vicinity of the Royal Exchange.

Ḳimḥi was the author of "Shoshannat Ya'aḳob," a commentary on the tractates Beẓah and Ta'anit (Constantinople, 1748). His portrait was painted by Oseas Humphreys (1799), who was attracted by Ḳimḥi's picturesque appearance.

J. S. LE.

Joseph b. Isaac Ḳimḥi (RIḲaM; surnamed Maistre Petit): Grammarian, exegete, poet, and translator; born in southern Spain about 1105; died about 1170. Forced to leave his native country owing to the religious persecutions of the Almohades, he settled in Narbonne, Provence, where he probably spent the rest of his life. The report that he was buried in Mayence deserves no credit.

He lived in poor circumstances, and in addition to his literary labors he was active as a teacher. Of his many students the names of only a few have come down. Besides his own son Moses there are mentioned R. Joseph ibn Zabarah, R. Menahem b. Simon of Posquières, and R. Solomon b. Isaac ha-Nesiah. His son David, though but a child at the time of his father's death, may also be considered one of Ḳimḥi's pupils, either directly through his works, or indirectly through the instruction he (David) received from his elder brother Moses.

Abraham ibn Ezra, who in his wanderings visited

Relations with Ibn Ezra.

Narbonne in 1160, must have met Joseph. The latter followed Ibn Ezra in some particulars, *e.g.*, in the use of the stem שמר for the paradigm of the verb. Ibn Ezra, on the other hand, quotes Ḳimḥi in his commentaries on the Bible. Both scholars worked at the same time and along the same lines to popularize Judæo-Arabic science among the Jews of Christian Europe by excerpting from and translating Arabic works. Although Ibn Ezra was Ḳimḥi's superior in knowledge, the latter can rightly claim to have been the first successful transplanter of Judæo-Arabic science in the soil of Christian Europe. His diction is elegant and lucid, the disposition of his material scientific, his treatment of his subject even and without digressions; so that his works are much better adapted for study than those of Ibn Ezra, which lack all these qualifications.

R. Tam.

Another famous contemporary of Ḳimḥi was R. Jacob b. Meïr, surnamed "R. Tam," of Ramerupt, who was the greatest Talmudic authority of the day. This scholar, wishing to settle the literary quarrel between the followers of Menahem b. Saruḳ and of Dunash b. Labraṭ, had written a book of "hakra'ot" (decisions), in which he took the part of Menahem. These decisions did not satisfy Ḳimḥi; and, feeling himself better able than R. Tam to pass judgment in the case, he wrote (1165) his "Sefer ha-Galui." This work falls into two parts: the first treats of the differences between Menahem and Dunash; the second contains independent criticisms on the former's dictionary. In the introduction Ḳimḥi apologizes for daring to come forward against so eminent a man as the leading Talmudic authority of his time. Hearing that the ignorant among the people will attack him on that account, he puts into their mouths the words which Abner, the captain of Saul, spoke, when David cried out to the king: "Who art thou that criest to the king?" (I Sam. xxvi. 14). His fears were realized; for Benjamin of Canterbury, a pupil of R. Tam, made observations on the "Sefer ha-Galui," defending his teacher. He also called Ḳimḥi in a contemptuous sense "Ha-Ḳore" (= "The Crier"), because the latter ventured to cry his contradictions to the "king," *i.e.*, R. Tam.

As Grammarian and Lexicographer.

In Ḳimḥi's grammatical works "Sefer Zikkaron" (edited by Bacher, Berlin, 1888) and "Sefer ha-Galui" (edited by Matthews, *ib.* 1887) he is dependent on Ḥayyuj for the treatment of his subject, but in his explanations of words he relies mainly on Ibn Janaḥ. On the whole, he is not original; in minor points, however, he goes his own way, becoming therein the model for future generations. Thus he was the first to recognize that the hif'il has also a reflexive and an intransitive meaning; he was also the first to arrange a list of nominal forms, to indicate eight verb classes, and to classify the vowels into a system of five short and five long ones. In his works he pays frequent attention also to the language of the liturgy. In his etymological explanations he seeks for analogies in Bible, Talmud, Targum, and in Arabic. In cases where such analogies are wanting or unsatisfactory he is guided by the principle, "The unknown must be deduced from the known." Not seldom he explains difficult words on the basis of phonetic laws laid down by himself.

As Exegete.

Of his exegetical works few have been preserved. Mention is made of his "Sefer ha-Torah," a commentary on the Pentateuch; his "Sefer ha-Miḳnah," a commentary on the Prophets; and his "Ḥibbur ha-Leḳeṭ," of unknown contents. A commentary by him on Canticles exists in manuscript; his commentary on Proverbs has been published by Bär Dubrowo under the title "Sefer Ḥuḳḳah" (Breslau, 1868); and variants to the badly printed text are given by Eppenstein in "Zeit. für Hebr. Bibl." v. 143 *et seq.* A fragment of his commentary on the Book of Job has been published by Schwarz in his "Tiḳwat Enosh" (Berlin, 1868); the remaining portions, by Eppenstein in "R. E. J." xxxvii. 86 *et seq.* Many exegetical remarks are scattered throughout Ḳimḥi's grammatical works. His method is mostly that of the peshaṭ, *i.e.*, literal interpretation. He frequently follows the Spanish school, without, however, reading into the Scriptural text the scientific knowledge of his own time. He pays a great deal of attention to the context, a point usually neglected by haggadists. His explanations are short and terse. While criticizing at times some untenable explanations of his predecessors, he accepts such as seem to him to be correct. He is the first eclectic of the Provençal school of exegetes.

As Poet.

Ḳimḥi tried his hand also at writing poetry. His liturgical hymns and other poems which have come down are indeed distinguished by beauty of form and elegance of language. In spirit, however, they can not be compared with the works of the great Spanish poets. Nevertheless he retains importance as one of the Provençal poets. His poems met with consideration at the hands of later generations and were frequently quoted by them.

As Translator.

He translated Baḥya ibn Paḳuda's ethical work "Ḥobot ha-Lebabot" from Arabic into Hebrew; and he turned Ibn Gabirol's "Mibḥar ha-Peninim" into metrical form under the title "Sheḳel ha-Kodesh." Of the translation only a fragment has been preserved, which has been published by Jellinek in Benjacob's edition of Ibn Tibbon's translation of that work (Leipsic, 1846); the "Sheḳel" is still unprinted. In his translation, aiming chiefly at elegance of expression, Ḳimḥi does not keep to the original. He works too independently and, carrying into the work his own spirit, he often obscures the thought of the author. Notwithstanding its defects, his translation is not without merit. It has contributed to a better understanding of the Arabic authors, and is, therefore, to be considered in a certain sense as supplementing the works of the Tibbonides.

Finally mention must be made of Ḳimḥi's apologetic work "Sefer ha-Berit," a fragment of which was published in "Milḥemet Ḥobah" (Constantinople, 1710). This work was written at the request of one of his pupils who wished to have a collection of all the prophetic passages in Scripture that might serve as aids in refuting those persons

As Apologete.

who denied the Torah. It is in the form of a dialogue between a loyal Jew and an apostate. The loyal Jew claims that the true religion of the Jew may be recognized by the moral conduct of the individual; all Jews are intent on carrying out in their lives the Decalogue; they give no divine honors to any one besides God; do not perjure themselves; commit no murder; and are not robbers. Their children are educated in the fear of God; their women are chaste; the Jews are hospitable toward one another, perform works of charity, and redeem captives—all virtues which are not found in such a high degree among non-Jews. The apostate admits all these claims, but points out that Jews demand high interest on loans. This objection the loyal Jew meets with the statement that non-Jews also are usurers, and that they impose upon members of their own faith, while rich Jews lend money to their coreligionists without any interest whatever. The "Sefer ha-Berit" is of importance as showing the moral condition of the Jews at that time, and as bearing testimony to the conditions of those days, in which the Jews in the Provence could freely express themselves not only with regard to their own religion, but also with regard to the religion of their neighbors.

BIBLIOGRAPHY: Blüth, in Berliner's *Magazin*, xviii. 1, xix. 89; Eppenstein, in *Monatsschrift*, xl. 173, xli. 83; *R. E. J.* xxxvii. 86; *Zeit. für Hebr. Bibl.* v. 143.

G. C. L.

Joseph b. Saul Ḳimḥi: Author of a commentary to the astronomical tables of Jacob Bonet (1361; Renan-Neubauer, "Ecrivains Juifs," p. 701).

Judah Raphael Ḳimḥi: Lived about 1671, in the East. A responsum of his is cited in Moses Benveniste's "Pene Mosheh," ii., § 123 (see Benjacob, *l.c.* p. 30).

Mordecai b. Isaac Ḳimḥi: Grandson of David Ḳimḥi; lived in Provence toward the end of the thirteenth century. For him the cabalist Jacob b. Jacob ha-Kohen wrote his "Perush ha-Otiyyot" (see Steinschneider, in "Monatsschrift," xxxiv. 528).

G.

Moses Ḳimḥi: Father of Samuel; perhaps identical with Moses ha-Zaḳen Ḳimḥi; lived about 1342 in Sicily (see Zunz, "Z. G." p. 516; Steinschneider, "Hebr. Bibl." xi. 135).

Moses b. Abraham Ḳimḥi: His epitaph, dated Rome, 1726, has been published by Berliner, in "Monatsschrift" (xxxiv. 382), and in the "Hildesheimer Jubelschrift" (p. 105).

Moses b. David Ḳimḥi: Wrote the Vatican manuscript No. 221, 4, in 1383, in Rodez, France (Steinschneider, *l.c.* xi. 135).

Moses b. Joseph Ḳimḥi (ReMaḲ): Commentator and grammarian; elder brother and teacher of David Ḳimḥi. He presumably lived together with his father and his brother in Narbonne, and must have died about 1190. The works of his which have been preserved are: commentaries on Proverbs, Ezra, and Nehemiah, printed in the rabbinic Bibles as the work of Abraham ibn Ezra; a commentary on Job, published by Schwarz in his "Tiḳwat Enosh" (Berlin, 1868); "Sekel Ṭob," a grammatical treatise, published by Castelli in "R. E. J." xxviii. 212, xxix. 100; and "Mahalak Shebile ha-Da'at," the first concise methodical text-book of Hebrew grammar. His terminology deviates in some essential points from that of his father, a phenomenon probably due to the influence of Ibn Ezra. As paradigm for the verb appears here for the first time the verb "paḳad"; also the following order of the conjugations: "ḳal," "nif'al," "pi'el," "pu'al," "hif'il," "hof'al," "po'el," "hitpa'el." Both these innovations influenced the later text-books on Hebrew grammar.

Ḳimḥi's "Mahalak" became of importance in the first half of the sixteenth century, when it formed the shortest and most useful text-book for the study of Hebrew by non-Jews. It was edited many times, and was translated into Latin by Sebastian Münster. Elijah Levita wrote annotations to it. Besides the works enumerated above, some liturgical poems of Ḳimḥi's have been preserved. Mention is made of his "Sefer Taḥboshet," probably a work on anomalous grammatical forms, and of "Ta'anug Nefesh," a work on ethics.

G.

ḲIMḤI, SOLOMON: Turkish rabbinical author; lived at Constantinople in the middle of the nineteenth century. In 1862 he published "Meleket Shelomoh," in which he tried to prove that the Karaites are animals, that it is forbidden to teach them the Law, and that it is permitted to kill them. When the Karaites protested, the chief rabbi of Constantinople commanded that all the copies of the work which could be found should be burned. Ḳimḥi wrote two other works: "Yaḥel Shelomoh "(Smyrna, 1870) and "Yeme Shelomoh" (Salonica, 1874).

s. M. Fr.

ḲINAH (plural, **ḳinot**): Lamentation chanted in honor of the dead; it has a halting movement peculiar to itself, and ranges from a dirge or wail to the elegiac form (comp. David's elegies on the deaths of Saul and Jonathan [II Sam. i. 17] and on the death of Abner [*ib.* iii. 33]). The term is derived, according to Wetstein, from the Arabic "ḳana" (= "to form artistically"); it occurs once, in Ezek. ii. 10, as "ḳinim." Among the Hebrews, as in many Semitic lands at the present day, the ḳinah was sung by professional mourning-women (Jer. ix. 17). In prophetic literature such elegies were chanted also over inanimate objects poetically personified. To this class belong the ḳinot on the arid plains, deserted by all living things (Jer. ix. 10), on fallen cities (Ezek. xxvi. 17, xxvii. 1), and on lands and peoples (see Budde, "Das Hebräische Klagelied," in Stade's "Zeitschrift," ii. 1 *et seq.*; idem, "The Folk-Songs of Israel in the Mouths of the Prophets," in "The New World," pp. 28 *et seq.*, Boston, 1893).

Classes of Ḳinot.

Even in the Talmudic period a ḳinah was sung at a burial by at least one mourning-woman, who was accompanied by two flute-players (Yer. M. Ḳ. i. 5; Ket. 46a; comp. Shab. 153a). Fragments of elegies of this period, composed by the "safdana" (funeral orators), have been preserved (M. Ḳ. 28b; comp. I. Perles, "Die Leichenfeierlichkeiten im Nachbiblischen Judenthume," in "Monatsschrift," x. 382 *et seq.*). To the ḳinah was soon added the Funeral Oration, which steadily increased in importance as compared with the ḳinah, until the latter was omitted entirely. But although the ḳinah was thus excluded from the public funeral rites, it still survived as an individual expression of grief for the loss of friends or kinsmen (see Poetry, Biblical).

From the individual, or personal, ḳinah must be distinguished the national, or general, ḳinah, the subject of which is the misfortune of the whole nation or of a single community. The national ḳinah was created by Amos, the oldest of the prophets whose writings have survived, on the occasion of a harvest festival in Beth-el, about 760. Foreseeing the impending destruction of the Northern Kingdom, he chanted in the midst of the populace, as though destruction had already overtaken it, "The virgin of Israel is fallen; she shall no more rise" (Amos v. 2). But the national ḳinah found its most perfect expression in the "lamentations" which both Talmud and Midrash ascribe to the prophet Jeremiah (B. B. 14b; Yer. Shab. xvi. 15c; Lev. R. xv. 4).

National Ḳinot.

Even as early as the Talmudic period, the ḳinot of Jeremiah were recited on the eve of the 9th of Ab, the anniversary of the destruction of the Temple and of the Jewish state (Yer. Shab. *l.c.*; Lev. R. *l.c.*). It seems that, at least in Palestine, the Epistle of Baruch (the portion of the Book of Baruch written originally in Hebrew—i. 1–iii. 8), which was a national confession of sins and a justification of the divine punishment, was read also during the public service of this day (see Jew. Encyc. ii. 557, *s.v.* Baruch).

The more intolerable conditions became for the Jew in the following centuries the more he loved to commemorate the events of the happier past. New wos created new ḳinot, and therefore the Jew could not confine himself to the recitation of the Lamentations of Jeremiah on the 9th of Ab. Even the Hellenistic period, poor as far as national poetry is concerned, brought into existence an elegy on the destruction of Jerusalem (Greek Apoc. Baruch, x. 6–8). This was originally written in Hebrew, but it is not known that it had a place in the ritual of the Synagogue (see Jew. Encyc. ii. 556, *s.v.* Baruch).

Early in the geonic period the poets of the Synagogue began to compose seliḥot, ḳinot, and hosh'anot, although very little of that literature has survived (Delitzsch, "Zur Gesch. der Jüdischen Poesie," p. 51; Maḥzor Vitry, ed. Hurwitz, p. 226). Among the older Spanish, North-African, and Provençal poets the national or general elegies for the service of the 9th of Ab were the product of innate poetical feeling, while among the Roman-German poets it was distress and desperation that brought new ḳinot into existence. "I must speak; I must have air; my soul, embittered by grinding slavery, is overwhelmed," says the German synagogal poet of the thirteenth century (Zunz, "S. P." p. 176). Thus the essence of the ḳinot consists in a lamentation over the loss of the nation's past greatness, as well as (in the Roman-German rites and among the younger poets) over the disastrous events of the present.

Early Use in Ritual.

In the Siddur of Amram Gaon (ed. Warsaw, 1884, p. 43b), aside from the Lamentations of Jeremiah, there are no special ḳinot prescribed for the 9th of Ab, although, according to Luzzatto, some of the ḳinot contained in the present ritual were probably used in Amram's time; they are not mentioned by Amram because, perhaps, their recitation was not obligatory (see Luzzatto, "Amram Gaon Baruch ben Sheshna," in "Orient, Lit." viii. 296). According to Amram and other reliable sources, in the geonic period in Babylon, however, seliḥot were read on the morning of the 9th of Ab, since that fast-day was dedicated to penitence and contrition (see Zunz, "Ritus," p. 125). Saadia's prayers for this day likewise are called "seliḥot," though in content and form they are very similar to the ḳinot of Ḳalir. But even the seliḥot were afterward replaced by the more melancholy ḳinot. Traces of these seliḥot are preserved in the Sephardic ritual.

Ḳalir, however, was probably the first to give the name of ḳinot to some parts of the great elegy which he composed for the 9th of Ab. At any rate, they were so called not later than the eleventh century. Beginning with the contrast between the happiness of the past and the misery of the present, Ḳalir describes in this elegy several scenes from the history of the destruction of the Jewish state, such as the burning of the Temple, the slaughters in Jerusalem, and the death of King Josiah. Sometimes, breaking out into prayer and lamentation, the poet expresses his conviction of his own guiltiness and of the justice of the Lord, laments the power of Edom, and mourns the misery of Zion, for the restoration of which he prays; he closes with a description of the final redemption of Israel and the future salvation. This elegy, consisting of about 12,000 words, beginning with the Eighteen Benedictions ("Ḳerobah") and concluding with prayers of comfort ("neḥamot"), has been preserved almost in its original form in the older Roman rite. Whereas the latter uses Ḳalir's ḳerobah "Zekor Ekah," the German ritual has Ḳalir's second ḳerobah, beginning with "A'abik," which is of a more general character, and which was, perhaps, originally destined by Ḳalir for the service on the afternoon of the 9th of Ab. Moreover, in the German rite consolations are wanting; they are replaced, however, by other ḳinot composed between the twelfth and sixteenth centuries. In the German rite then follow the "Zionides," which are named after the well-known elegy on Zion of JUDAH HA-LEVI, beginning with "Ẓiyyon Halo Tish'ali." This elegy is to be found in every Jewish ritual for the 9th of Ab, and from it a special "Zionide" meter and rime have been developed (see Dukes, "Zur Kenntniss der Neuhebr. Religiösen Poesie," p. 71; Delitzsch, "Zur Gesch. der Jüdischen Poesie," pp. 159–163). The "Zionides" are not usually recited by the ḥazzan himself, but by members of the congregation, alternately; at one time they were recited by the most prominent member.

In the German Maḥzor are to be found sixty ḳinot for the 9th of Ab, and the authorship of about fifty of them is known. The more important are as follows:

Abraham Ḥozeh ("Astronomer"): "Ẓiyyon Ḳeḥi Kol Ẓori Gile'ad" (Zunz, "Literaturgesch." p. 490; translated into German by J. Freund, in Karpeles, "Zionsharfe," p. 43). By some scholars this elegy is ascribed to Solomon ibn Gabirol, and by others to Elijah ha-Zaḳen.

Abraham ben Jacob: "Ẓiyyon Asher Yomeru" (Zunz, *l.c.* Supplement, p. 26).

Abraham ben Meïr (perhaps a contemporary of Abraham ben David): "Esh'ag mi-Nahamat Libbi we-Et'onen," describing the punishment of a Jewish community such as was often visited upon the communities of Germany and England in the twelfth and thirteenth centuries (Zunz, *l.c.* p. 464).

Eleazar ha-Ḳalir: "Ḳerobah" and the first seventeen ḳinot (from "Shabat Suru Menni" to "Amarti She'u Menni"; see Luzzatto, "Mebo le-Maḥzor ke-Minhag Bene Roma," pp. 24 *et seq.*).

Eleazar b. Judah b. Kalonymus of Worms (author of "Ha-Roḳeaḥ"): "Ẓiyyon Halo Tish'ali li-Shelom 'Alubayik" (first Zionide), on the slaying of his wife and children in Erfurt in 1214 (Zunz, *l.c.* p. 320).

Eleazar b. Mosheh ha-Darshan of Würzburg: "Ẓiyyon 'Aṭeret Ẓebi Simḥat Hamonayik" (Zionide).

Baruch b. Samuel (died in Mayence in 1221): "Eẓbe'otai Shafelu we-Oshyotai Nafelu, Oyah."

David ha-Levi ben Samuel (contemporary and correspondent of Rashi): "Emunim Shararu be-Tok Yam 'Aberu" (Zunz, *l.c.* p. 164).

David b. Alexander (date unknown): "Ezkerah Neginotai" (Zunz, *l.c.* p. 483).

Judah b. Moses ha-Kohen (*c.* 1240; German rabbi): "We-Et'onen wa-Aḳonen Marah," on the riot in Frankfort-on-the-Main in 1241 (Zunz, *l.c.* p. 479).

Judah ha-Levi of Castile: "Ẓiyyon Halo Tish'ali" (Zionide); "Yom Akpi Hikbadti" (Zunz, *l.c.* p. 206).

Joel ha-Levi ben Isaac of Bonn: "Yibkeyun Mar Mal'ake ha-Shalom," lamentation for the victims of the Second Crusade, which occurred during his lifetime (Zunz, *l.c.* p. 269).

Joseph ben Kalonymus ha-Naḳdan (*c.* 1238): "Amorer ba-Beki" (Zunz, *l.c.* p. 98).

Jehiel b. Jacob of Eisenach (who witnessed the persecution at Fulda): "Asirim be-Shir Yeẓe'u," contrasting the time of the wandering of the Israelites in the desert and that of the destruction of the Temple (Zunz, *l.c.* p. 29).

Jacob: "Ẓiyyon Yedidut Yadid" (Zionide).

Isaac (12th or 13th cent.): "Azkir Rahab" (Zunz, *l.c.* p. 552).

Yaḳar ben Samuel ha-Levi (contemporary of Meïr of Rothenburg; lived in Cologne and Mayence): "Ẓiyyon Adonai Lakem."

Kalonymus ben Judah of Mayence (11th cent.): "Mi Yitten Roshi Mayim"; "Amarti She'u Menni"; both dedicated to the victims of the Second Crusade (Zunz, *l.c.* p. 166).

Meïr b. Baruch of Rothenburg: "Sha'ali Ṣerufah," on the public burning of the scrolls of the Law in Paris about 1254 (see Grätz, "Gesch." vii. 405; translated into German by A. Geiger, "Jüdische Dichtungen," Leipsic, 1856). Having the strophic rhythm of the Zionides, it found a place among them.

Meïr ben Jehiel: "Arze ha-Lebanon," describing the death of the ten martyrs and based upon Midrash Eleh Ezkerah (Zunz, *l.c.* p. 489; Landshuth, "'Ammude ha-'Abodah," p. 161).

Michael b. Perez (before 1550): "Ẓiyyon Menat Shalom"; "Ẓiyyon Ḳedosh Mishkene 'Elyon" (Zionides; Zunz, *l.c.* p. 580).

Menahem ben Jacob of Worms (d. 1203): "Me'one Shamayim" (Zunz, *l.c.* p. 294).

Menahem b. Makir of Regensburg (survived the First Crusade): "Ebel A'orer" (Zunz, *l.c.* p. 158).

Menahem Zion b. Meïr (*c.* 1430; author of the "Ẓiyyuni"): "Ẓiyyon Me'on Ḥeshḳi" (Zunz, *l.c.* p. 523; *idem*, "S. P." p. 110).

Moses ben Jacob: "Ẓiyyon Me'oz Ḳiryat Melek" (Zionide; Zunz, "Literaturgesch." p. 388; Landshuth, *l.c.* p. 225).

Solomon ibn Gabirol: "Shomeron Ḳol Titten" (Zunz, "Ritus der Synagoge von Avignon," in "Allgemeine Zeitung des Judenthums" [1838], ii. 454; comp. also J. L. Gordon, "Letters," pp. 98, 216); "Shekurat Lo mi-Yayin."

This list is based upon Baer's edition of the ḳinot; see especially the introduction, Berlin, 1865.

Ḳinot of Spanish Maḥzor.

The ḳinot of the Spanish, North-African, and Provençal rites, again, form a group by themselves. In the simpler Spanish rite, especially, several Psalms have been used for the ritual for the 9th of Ab, among them Ps. lxxix. and cxxxvii. ("By the rivers of Babylon, there we sat down, yea, we wept, when we remembered Zion"). They are composed in the rhythm of the ḳinah, and are used to open the service on the eve of that fast-day in the Sephardic ritual. The ḳinot of this group of rituals confine themselves on the whole to the themes furnished by the history and legends of the destruction of Jerusalem. The rite of Fez, however, contains a ḳinah on the persecutions of the Jews in Toledo, Seville, Majorca, etc., in 1391.

With the exception of the rite of Avignon, the seliḥah "Eleh Ezkerah" is common to all these rites, as is the "Zionide" of Judah ha-Levi. In the former each chapter of the Lamentations of Jeremiah is preceded by small poems (see Zunz, "Ritus der Synagoge von Avignon," in "Allg. Zeit. des Jud." 1838, ii. 454). In Jerusalem an Arabic elegy was recited, and in Persia Hebrew-Persian ḳinot were used (Zunz, "Ritus," p. 89). As writers of ḳinot for these rites may be mentioned:

Abba Mari b. Moses Yarḥi of Montpellier (lived in Arles in 1306): "Abo Le'esof Maḥanot" (Avignon; Zunz, "Literaturgesch." p. 492).

Abraham ha-Levi ben Isaac: Three ḳinot (Zunz, *l.c.* p. 513).

Isaac ben Sheshet of Valencia (died in Algiers about 1406): Four ḳinot (Zunz, *l.c.* p. 514).

Isaac ibn Zabarra (*c.* 1400): "Ẓiyyon ha-Tede'i Zeman" (Zionide; Zunz, *l.c.* p. 514).

Israel Najjara (rabbi of Gaza in the sixteenth century): One ḳinah (Zunz, *l.c.* p. 419).

Joseph (date not known): Two ḳinot (Avignon; Zunz, *l.c.* pp. 569–574).

Judah ben David Yaḥya (lived in Castile about 1400): "Yehudah we-Yisrael De'u Mar Li Me'od" (Sephardic; Provençal; Zunz, *l.c.* p. 514; Landshuth, *l.c.* p. 67).

Judah b. Jacob: "Yomam we-Layelah Ebkeh" (Carpentras; Zunz, *l.c.* p. 567).

Judah ha-Levi: The same as in the Roman-German ritual.

Moses Nathan: "Mi-Gam Bakem" (Avignon; there are two synagogal poets of this name; Zunz, *l.c.* p. 517).

Moses Zacuto (of Spanish descent; lived and died in Italy): "Arim Ḳol Bikyi" (Sephardic; Zunz, *l.c.* p. 440; Landshuth, *l.c.* p. 218).

Samuel (time unknown): "Oyah Ereẓ Ẓilẓul" (Avignon; Zunz, *l.c.* p. 593).

Sheshet: "Ekah Ya'ib" (Avignon; Zunz, *l.c.* p. 475).

Simeon ben Ẓemaḥ Duran (lived in Algiers, 1361-1444): Three ḳinot (Zunz, *l.c.* p. 522).

Solomon ibn Gabirol: "Shomeron Ḳol Titten" (Avignon, Roman-German, Polish, etc.).

Solomon b. Bonfed: Six ḳinot (Zunz, *l.c.* p. 518).

Zerahiah ben Isaac Gerundi of Lunel (author of the "Ma'or"): "Ze'ebe 'Ereb" (Provençal; Sephardic; Zunz, *l.c.* p. 461; Landshuth, *l.c.* p. 63).

In the Karaite ritual also are found ḳinot for the anniversary of the downfall of the Jewish state. Local history and local preferences operated to vary the selection of ḳinot, so that those preferred in one synagogue or district were comparatively unused in another.

By no means all national or general ḳinot found a place in any single maḥzor, and not all the ḳinot found in the maḥzor of any congregation were recited: a selection was made, as the heading "Ḳinah Aḥeret," sometimes attached to the collection, may indicate. Nor was it only on the 9th of Ab that ḳinot were read in the synagogue; on the three—in the Karaite ritual on the five—preceding Sabbaths also piyyuṭim or ḳinot were recited (Zunz, "Ritus," p. 88; *idem*, "S. P." p. 72).

The "Tiḳḳun Ḥaẓot," the ritual of which was established in Palestine about three hundred years ago, whence it spread over Europe, also contains several ḳinot. One of them, used in all Italian and German rituals, was composed by R. Moses Alsheh ben Ḥayyim, who flourished in Safed in the sixteenth century.

In the Reform congregations, which still celebrate the 9th of Ab, only a very few of the ḳinot for that day are recited. Geiger, in his "Plan zu einem Neuen Gebetbuche," p. 15, includes only Ibn Gabirol's "Shomeron Ḳol Titten" for the evening service, and Judah ha-Levi's "Ẓiyyon Halo Tish'ali" and Meïr of Rothenburg's "Sha'ali Serufah" for the morning service. For editions and translations of ḳinot see Steinschneider, "Cat. Bodl." cols. 452 *et seq.*; Zedner, "Cat. Hebr. Books Brit. Mus." pp. 469 *et seq.*; Van Straalen, "Cat. Hebr. Books Brit. Mus." pp. 148-151 *et seq.* See Ab, Ninth Day of.

G. M. Sc.

KINANAH: Opponent of Mohammed; son of the poet Al-Rabi' ibn Abu al-Ḥuḳaiḳ, who flourished at Medina in the seventh century, prior to the appearance of Mohammed at that town. He had two brothers—Al-Rabi' and Sallam; all three were declared enemies of the Prophet. Kinanah is said to have urged Mohammed to give up the custom during prayer of turning his face toward Mecca ("ḳiblah") in favor of Jerusalem, as had been the custom in Islam at first. After the expulsion of the Banu al-Naḍir, of which tribe he was a member, he and his family retired to Khaibar, where they possessed a castle called Ḳamus. The Jewish strongholds at Khaibar were soon after conquered by Mohammed, and Kinanah was made a prisoner of war. There were two reasons why Mohammed desired Kinanah's death: Kinanah was accused of having hidden the treasure of the Banu al-Naḍir, and Mohammed coveted his wife Ṣafiyyah, the daughter of Ḥuyayy, a rabbi who had been murdered on a previous occasion. Kinanah died under torture. He is erroneously confounded by Ṭabari with Kinanah ibn Rabi', the brother-in-law of Mohammed's wife Zainab.

KINDBETTBRIEF. See Childbirth.

KINDERFREUND, ARYEH LÖB: Polish scholar; born at Zamosc, government of Lublin, 1798; died at Lemberg 1873. In the earlier part of his life he was in very good circumstances, but he soon lost his fortune and had to make use of his knowledge of classical philology and the modern languages. He went to Galicia, where he earned his livelihood by teaching.

Kinderfreund was the author of "Shirim Shonim" (Lemberg, 1834), poems relating to various subjects, and distinguished both for purity of style and for richness of ideas. In addition Kinderfreund left in manuscript the following works: Hebrew poems, among which one compares the Jewish New-Year with that of other creeds; a work in Latin in which is demonstrated the priority of the Hebrew language; an apologetical treatise in which are reproduced religious controversies between the author and a prominent Christian whose children he instructed.

KINDLING OF LIGHTS. See Lights.

KING: Chief ruler of a nation.—**Biblical Data:** In Jewish history the first ruler called "king" was Saul, son of Kish, but in Palestine almost every chieftain bore this title. According to Josh. xi. 1-2, the country contained numbers of kings, and in the Song of Deborah (Judges v. 19) reference is made to the "kings of Canaan." These can have had little more power than a modern sheik. Some of them, doubtless, held more extensive sway than others, and the ruler of the federation of the five cities of the Philistines might more deservedly be dignified with the name. The special need of a military leader in primitive times was due to the constant warfare in which even the more settled population of the country passed its existence, and while in the nomad state the Israelites needed a warrior chief like Moses or Joshua to keep them united and under discipline. As soon as the Israelites were settled in the Holy Land decentralizing tendencies became paramount, and the local jurisdiction of the elders superseded the earlier régime. This led to various attempts at reconstruction under the Judges. In two cases, those of Gideon and Abimelech, attempts were made to found petty kingdoms. Similarly, Jephthah seems to have established a minor kingdom east of the Jordan, in Gilead (Judges xi. 6-11); but none of these attempts were sufficient to unite the whole of the Israelitish tribes for warlike purposes against their enemies in plain and mountain.

In the time of Samuel, however, the tribes were for a time united. The manifest advantages of this union led Samuel himself to arrange later for a secular head of the Israelite forces, who should be sanctified by the choice of the oracles of God; Saul, therefore, became, by election, the first King of Israel. Dissatisfied with Saul's conduct, the imperious Samuel selected David to replace him, who, after Saul's death, immediately succeeded in ruling over Judah, and some years later was acknowledged king of all Israel. David had taken possession of the great fortress of Jerusalem, and, possibly influenced by the career of the king-maker Samuel, attempted to combine the ecclesiastical and the military headship by making his chapel royal, or Temple, the center of the national worship. This policy was carried out by his son Solomon, who attempted further to break down the old tribal divisions by dividing the whole country into twelve or thirteen districts (I Kings iv. 7), severally presided over by one of his officers; each of these officers, it has been conjectured, was required to supply the court or the army with provisions during one month of each year. But this attempt proved premature, and after Solomon's death his kingdom was divided into two parts (see Israel; Judah). The advantages of a rallying-point for the national forces was nevertheless thenceforth clearly recognized, and both divisions were ruled by kings till the superior forces of the surrounding nations destroyed for a time the national independence.

Functions.

As indicated by the sketch above, the chief duty of the king was to act as war-lord and commander-in-chief of the army. One result of the establishment of the kingship was the foundation of a standing army, which began with the three thousand men kept by Saul in the field against the Ammonites (I Sam. iii. 2). The "Gibborim," or the mighty men who formed the body-guard of the king, constituted the nucleus of this force. War being regarded by the Hebrews as a sacred occupation (see Schwally, "Kriegsaltertümer," 1901), the king was intimately connected with the religious organization of the people, and it is possible that at an early stage he was regarded as the center of it, though there are no such traces of taboos around Hebrew royalty as are found among other primitive nations (see Frazer, "Golden Bough," i., *passim*). It is certain that the king performed priestly functions. Saul offered sacrifices (I Sam. xiii. 9-11), and David wore the ephod (I Sam. vii. 19); Solomon addressed the people in the Temple (I Kings viii. 14); the high priests received their appointment from the king, at any rate in the earlier stages of the monarchy (II Sam. viii. 17; I Kings ii. 26-27). The fact that Solomon built a temple and dedicated it shows the intimate relation of the king with the national sanctuary, which was attached to his palace. In addition to their military and ecclesiastical functions, the Jewish kings, like all Oriental monarchs, discharged those of judges (comp. I Kings iii. 16 *et seq.*), and in the palace there was a special porch for judgment (I Kings vii. 7). How far the king had the right to originate laws is doubtful. Later legislation required him to agree to abide by the Deuteronomic Law (Deut. xvii. 18, 19), but he must have had considerable latitude in interpreting it.

Selection and Anointing.

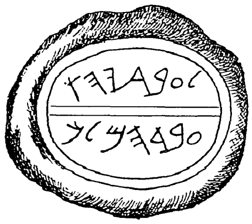
In the cases of Saul and David, the fact that they had already proved themselves redoubtable leaders in warfare was doubtless the reason why Samuel chose them for the kingly office when he had reluctantly come to the conclusion that such a head for the nation was necessary. When once the kingship had been established, the hereditary principle arose naturally. For nearly eight years Saul's son Ishbosheth retained the position of his father among the more northern tribes. The king appears to have had the right to select his successor from his descendants, as was done by David in the case of Solomon (I Kings i.), who seems to have been the youngest among his sons (see Junior Right). Although the act of selection was the monarch's, the priestly caste seems to have had some voice in the decision, while the elders and the people generally expressed by acclamation their satisfaction at the result (II Kings xiv., xxi., xxiii.; see also Josephus, "B. J." i. 33, § 9).

The chief ceremony by which a ruler was consecrated king was that of anointing, mentioned in the cases of Saul (I Sam. x. 1), David (II Sam. ii. 4), Jehu (II Kings ix. 6), and Joash (II Kings xi. 12). In all these cases, excepting the last, the function appears to have been a private one, and hence it has been suggested that it was performed with the beginning of a new dynasty. The general reference to the king as "the anointed one," or "the Lord's anointed" (I Sam. ii. 10; Ps. ii. 2; Lam. iv. 20), seems to show that anointing was the normal and characteristic part of a king's inauguration, though it occurred also in the appointment of a high priest (see Anointing; Messiah; see also Wellhausen in "Archiv für Religionswissenschaft," 1904).

The chief external signs of dignity were the crown (II Kings xi. 12), which was worn by Saul even on the battlefield (II Sam. i. 10; see Crown), and the scepter (Ps. xlv. 7 [A. V. 6]). It is doubtful whether the spear, so often mentioned in connection with Saul (I Sam. xx. 33, xxii. 6, xxvi. 7), was used by him as a sign of his dignity; it is not mentioned elsewhere in connection with the kings, though modern sheiks use it for that purpose (Tristram, "Land of Israel," p. 59). Naturally, the king's house was of larger dimensions and of more pretentious architecture than that of any of his subjects, and special accounts are given of the palaces of Solomon (I Kings vii.), Jehoiakim (Jer. xxii. 13, 14), and Ahab (I Kings xxii. 39). The king's seat was known as the "throne" or "judgment-seat." An elaborate description is given of that of Solomon (I Kings x. 18 *et seq.*; see Throne).

Officers.

The chief officer of the king was the "captain of the host" (II Sam. ii. 8). Another high military officer was the captain of the body-guard (II Sam. viii. 16, xx. 23), who, for prudential reasons, was not placed under the orders of the commander-in-chief. Of the officials connected with the royal household the chief appears to have been the high chamberlain, or the officer "over the household" (II Kings xviii. 18). Next come the "sofer," or scribe, who acted as secretary of state (*ib.*), and the "mazkir," or historiographer (*ib.*). An official less frequently mentioned was the "king's servant" (II Kings xxii. 12); a seal that belonged to one of these king's servants, whose name was Obadiah, has recently been discovered. Besides these, several minor officials, as "keeper of the wardrobe" (II Kings xxii. 14) and "chamberlains" (II Kings xxiii. 11), were connected with the royal household. Other titles, like those of "king's friend" and "counselor," can scarcely be regarded as official.



Seal of Obadiah, "Servant of the King."
(After Benzinger.)

The means by which this state was maintained were various, and doubtless differed with the period.

Revenue. The royal domains and flocks (partly obtained by escheat) must have contributed much to its support (I Chron. xxvii. 25–28). The kings may have claimed a tithe of the produce of the land (I Sam. viii. 15–17), but no later evidence is given of this, and such a claim would conflict with the similar claims of the priesthood. Regular presents, doubtless, were made by the king's chief vassals (I Kings x. 25), and tributes were brought in by conquered tribes (I Kings iv. 21; II Chron. xxvii. 5). Solomon probably derived some profit from his trading ventures (I Kings ix. 28), as well as from the customs levied on the foreign merchants trading in Palestine (I Kings x. 14). Resources such as these enabled the king to keep up considerable state. He dressed in royal robes (I Kings xxii. 10; II Chron. xviii. 9), drank from gold vessels (I Kings x. 21), and possessed a large harem (II Sam. xvi. 21). All who approached him bowed down and touched the ground with the forehead (I Sam. xxiv. 8; II Sam. xix. 24). After the destruction of the monarchy, memories of its glory still remained in Israel, and Ezekiel regarded royalty as inseparable from the ideal Jewish state (Ezek. xlvii.). The term "king" was applied symbolically to any great leader, even to death (Job xviii. 14); but above all it was applied to God as the "King of Kings" (see Theocracy). It is likewise applied to a crocodile (*ib.* xxiv. 34).

E. G. H. J.

——**In Rabbinical Literature:** In Talmudic times every official position on earth was regarded as of divine appointment, and the rule of the king was compared with that of God (Ber. 58a). One had, therefore, to pray for a good king (Ber. 55a) and for the good of the king (Abot iii. 2). The office was regarded as hereditary (Hor. 11b; comp. Zeb. 102a). There was a special benediction to be pronounced on seeing a king, and no one should avoid greeting him appropriately (Ber. 58a). Even prayers may in certain cases be interrupted to answer a king (Ber. 32b). Intriguers against the royal majesty lost in certain cases their property and were put to death (Sanh. 48b), while any disrespectful gesture was punished (Pes. 57b). To defraud the customs was a great crime against the king (Ned. 28a), and he received one-thirteenth of all booty captured in war (B. B. 122a). The anointing of the king was done with balsam before he was crowned (Hor. 12a).

But a king must stand during the reading of the Law (Soṭah 41b), and must not arise from his knees until he has finished his prayer (Ber. 34b). The glory of a king is truth (Ta'an. 32a), and, therefore, his word must be irrevocable (B. B. 3b). He should set an example to all in his obedience to the Law (Suk. 30a).

The relations of a king to his courtiers was a favorite subject of the Rabbis in their parables. I. Ziegler has collected no less than nine hundred and thirty-seven parables of this kind, scattered through Midrashic literature, but it is clear from the descriptions of the king's regalia that the model before the Rabbis was the Roman emperor with his purple mantle, laurel crown, and curule chair. These parables, though interesting in their way, seldom throw light upon the rabbinical views about kings, being more of the nature of folk-tales.

S. S. J.

KINGDOM OF GOD ("Malkuta de-Adonai": Targum to Zech. xiv. 9 and Ob. 21; "Malkut Shaddai": 'Alenu; and "Malkut Shamayim": Ber. ii. 2, and elsewhere in Mishnah and Haggadah): Reign or sovereignty of God as contrasted with the kingdom of the worldly powers. The hope that God will be King over all the earth, when all idolatry will be banished, is expressed in prophecy and song (Ex. xv. 18; Zech. xiv. 9; Isa. xxiv. 23, lii. 7; Micah iv. 7; Ps. xxix. 10), and with special emphasis in the later Psalms (xciii.–xcix.). God's Kingdom is spoken of in Ps. xxii. 29 (A. V. 28), ciii. 19, cxlv. 11–13; Ob. 21; Dan. iii. 33 (A. V. iv. 3); Tobit, xiii. 1; Sibyllines, iii. 47–48, 767; Psalms of Solomon, xvii. 3; Wisdom, x. 10; Assumptio Mosis, x. 1; Song of the Three Holy Children, 33; Enoch, lxxxiv. 2. The words "The Lord shall be King" are translated in the Targum, "The Kingdom of God shall be revealed"; and the ancient liturgy culminates in the prayer that "God may establish His Kingdom speedily" (see 'Alenu; Ḳaddish). The Kingdom of God, however, in order to be established on earth, requires recognition by man; that is, to use the Hasidæan phrase borrowed from Babylonia or Persia, man must "take upon himself the yoke of the Kingdom of God" ("'Ol Malkut Shamayim"; "Heaven" is a synonym of "God"; see Heaven). This the Israelites do daily when reciting the Shema' (Ber. ii. 2); so do the angels when singing their "Thrice Holy" (Hekalot); and in the future "all men shall take upon themselves the yoke of the Kingdom of God when casting away their idols" (Mek., Beshallaḥ, 'Amalek, 2). Accordingly, says the Midrash (Cant. R. ii. 12), "when the Kingdom of Rome has ripened enough to be destroyed, the Kingdom of God will appear."

Upon the Red Sea, Israel first sang the praise of God's Kingdom (Ex. R. and Targ. Yer. to Ex. xv. 19), and at Mount Sinai they accepted the yoke of God's Kingdom (Sifra, Ḳedoshim, xi.), just as Abraham did (Book of Jubilees, xii. 19), making

Him King upon earth (Sifre, Deut. 313); each proselyte, in joining Judaism, "takes upon himself the yoke of God's Kingdom" (Tan., Lek Leka, ed. Buber, p. 6). The Hebrew slave who declares his wish to be a slave for life has his ear pierced, because "he casts off the yoke of God's Kingdom to bend to the yoke of another sovereignty" (Tosef., B. K. vii. 5; Yer. Ḳid. 59b). The yoke of God's Kingdom—the yoke of the Torah—grants freedom from other yokes (Abot iii. 4). Especially was it the principle of one party of the Hasidæans, the Zealots, not to recognize as king any one except God (Josephus, "Ant." xviii. 1, §§ 1, 6; comp. Philo, "Quod Omnis Probus Liber," §§ 12-13, and the prayer Abinu Malkenu—"Our Father, our King, we have no King except Thee!"

Christian and Jewish Conceptions.

The greater, then, the oppression of the Worldly Kingdom (Rome), the more eager the Jewish people, particularly the pious ones, were for "the Kingdom of Heaven," as they called it, to come speedily. This is the ever-reiterated object of the prayers in the liturgy (Masseket Soferim, xiv. 12; *et al.*). It was even laid down that no benediction would be effective without reference to the Kingdom (Ber. 12a). It is the approach of this Kingdom of Heaven, in opposition to the Kingdom of Rome, which John the Baptist announced (Matt. iii. 2; comp. Luke i. 71-74, iii. 17). Jesus preached the same Kingdom of God (Matthew has preserved in "Kingdom of Heaven" the rabbinical expression "Malkut Shamayim"), and when he said, "the kingdom of God cometh not by observation [that is, calculation] . . . for, behold, the kingdom of God is among [not within] you" (Luke xvii. 21, Syriac version), he meant, "It does not come through rebellion or by force" (see Jew. Encyc. iv. 51, *s.v.* Christianity).

When, however, the trend of events led early Christianity to make a decided disavowal of all political expectations antagonistic to Rome, the conception of the Kingdom of God was made an entirely spiritual one, and was identified with the "'olam ha-ba" (= "the world to come"), the spiritual life, in which "there is no eating and drinking, but righteousness and peace and joy in the holy spirit" (Rom. xiv. 17, Greek; comp. John xviii. 36). Rab speaks of it in the same way: "In the world to come there is neither eating, nor drinking, nor procreation, nor strife; but the righteous sit encrowned and enjoy the splendor of the Shekinah" (Ber. 17a).

K.

KINGS, BOOKS OF.—Biblical Data: Fourth book of the second canonical division of the Hebrew Bible, the Prophets (נביאים). It contains a history of the kings of Judah and of Israel from the last days of David till the capture of Zedekiah by Nebuchadnezzar. This work is divided into two books, I Kings (מלכים א׳) and II Kings (מלכים ב׳); the former consisting of twenty-two, the latter of twenty-five, chapters.

The following is a synopsis of their contents:

First Book of Kings: Ch. i.: David having grown old, his son Adonijah forms a plot with Joab and Abiathar to seize the kingdom. But Solomon's mother, Bath-sheba, helped by Nathan the prophet, baffles Adonijah's design, and Solomon is anointed and crowned with great solemnity. Hearing of this, Adonijah and his guests, who are banqueting at the time, retire precipitately.

Ch. ii.: David's charge to Solomon, whom he enjoins to let neither Joab nor Shimei die a natural death. On the other hand, he is to show kindness to the children of Barzillai the Gileadite. Adonijah asks Solomon for David's concubine Abishag, and pays for his imprudence with his life. Abiathar is deposed from the high-priesthood, and Joab is killed by Benaiah at the command of Solomon. Shimei, ignoring a command of the king, is killed by Benaiah in fulfilment of David's charge to Solomon.

Solomon.

Ch. iii.: Solomon marries the daughter of the King of Egypt. God appears to him in a vision by night at Gibeon, and promises him extraordinary wisdom and great riches. Solomon's judgment in the case of the two harlots, in which he discovers the real mother of the living child.

Ch. iv.: Solomon divides his kingdom into twelve commissariat districts, and appoints officers over them; each district being required to support the royal house during one month every year.

Ch. v.: Account of Solomon's kingdom, his daily provision, the number of his horses, his great wisdom, the prosperous state of Israel under his rule, his alliance with Hiram, and his preparations for the construction of the Temple.

Ch. vi.: A full account of the Temple, the construction of which lasted seven years.

Ch. vii.: Description of Solomon's palace, the erection of which occupied thirteen years, and of the Temple vessels made by Hiram the artificer.

Ch. viii.: Inauguration of the Temple. After the Ark and the vessels are brought in, Solomon addresses to God a long prayer and blesses the people. He then dedicates the Temple with numerous peace-offerings, and the people hold a feast of fourteen days.

Ch. ix.: Second appearance of God to Solomon. He admonishes the king to observe His commandments, otherwise the Temple will be of no avail. Solomon makes another treaty with Hiram, builds several cities, and imposes a heavy tribute on the descendants of the former inhabitants of the land. Solomon's navy, under the direction of Tyrians, sails to Ophir for gold.

Ch. x.: The Queen of Sheba comes to Jerusalem and admires Solomon's wisdom; she gives him costly presents. A description of his golden targets, his ivory throne, his vessels, the great number of his chariots and horses.

Ch. xi.: Decline of Solomon; his numerous wives and concubines draw him into idolatry, for which God threatens him with the loss of his kingdom. An account of Solomon's adversaries; namely, Hadad, who flies to Egypt; Rezon and Jeroboam, to the latter of whom Ahijah prophesies that he will become king. Solomon dies after a reign of forty years, and is succeeded by his son Rehoboam.

Ch. xii.: Division of the kingdom. The Israelites assemble at Shechem for the purpose of crowning Rehoboam. Headed by Jeroboam, they ask the king to relieve them of the burdens placed on them by his father. Rehoboam, refusing the advice of the old men, and following that of the young ones, answers the people roughly. All the tribes of Israel, with the exception of Judah and Benjamin, revolt; they kill Adoram, and cause Rehoboam to flee. The latter is made king over Judah and Benjamin, while the other ten tribes follow Jeroboam, who strengthens himself by building Shechem and Penuel and places therein two golden calves as objects of worship.

Kings and Prophets.

Ch. xiii.: Jeroboam's hand, as he is about to strike a man who has prophesied against the altar, withers, but at the prayer of the prophet is restored. This same prophet, deceived by an old prophet of Beth-el, eats at the latter's house in defiance of God's command and is slain by a lion. He is buried by the old prophet, who directs his children when he himself shall die to bury him by the prophet's side. Jeroboam, in spite of the miraculous restoration of his hand, persists in his idolatry.

Ch. xiv.: Abijah, Jeroboam's son, being sick, Jeroboam sends his wife, disguised, with presents to the prophet Ahijah of Shiloh. The latter, on seeing Jeroboam's wife, announces to her the extermination of Jeroboam's family and the death of Abijah. Jeroboam is succeeded by his son Nadab. Rehoboam, falling into idolatry, is attacked by Shishak, King of Egypt, who despoils the Temple and the royal house. Rehoboam is succeeded by his son Abijam.

Ch. xv.: Abijam, during a wicked reign of three years, is continually at war with Jeroboam. He is succeeded by his son Asa. The latter, a worshiper of YHWH, is forced on account of his war with Baasha, King of Israel, to make a league with Ben-hadad. He is succeeded by his son Jehoshaphat. Nadab, after a wicked reign of two years, is assassinated by Baasha, who succeeds him and whose reign is an evil one.

Ch. xvi.: Jehu prophesies against Baasha, who after a reign of twenty-four years is succeeded by his son Elah. The latter is assassinated by Zimri, who succeeds him and exterminates the whole family of Baasha, thus carrying out Jehu's prophecy. Seven days later the soldiers make their general Omri king, who forces Zimri to destroy himself by fire. The kingdom of Israel is divided between Omri and Tibni, the former of whom finally becomes sole king. After a sinful reign of twelve years, during which he builds Samaria, Omri is succeeded by his son Ahab, who does "evil in the sight of the Lord above all that were before him."

Ch. xvii.: Elijah the Tishbite, having foretold a drought, hides himself at Cherith, where he is fed by ravens. He is then sent by God to Zarephath; he sojourns at the house of a widow, whose son he raises from the dead.

Ch. xviii.: Elijah is commanded to go to Ahab to announce that God will send rain; he meets Obadiah, who brings Ahab to him. Elijah, having reproved Ahab for his wickedness, convinces him of the superiority of YHWH by calling down fire from heaven. Having slain all the prophets of Baal, Elijah obtains rain by prayer and accompanies Ahab to Jezreel.

Elijah and Elisha.

Ch. xix.: Elijah, threatened by Jezebel, flees to Beer-sheba; he then goes into the wilderness, where, being weary of his life, he is comforted by an angel. At Horeb God appears to him and sends him to anoint Hazael, Jehu, and Elisha. The last-named takes leave of his parents and friends and follows Elijah.

Ch. xx.: Ben-hadad besieges Samaria, demanding of Ahab all that he possesses. Encouraged by a prophet, Ahab is successful in two battles, slaying many Syrians. The Syrians submit to Ahab. Ahab sends Ben-hadad away free with a covenant, and in consequence a prophet pronounces God's judgment against Ahab.

Ch. xxi.: Ahab, demanding Naboth's vineyard, meets with a refusal. At Jezebel's instigation, Naboth is condemned to death for blasphemy, and Ahab takes possession of the vineyard. Elijah foretells God's judgment against Ahab and Jezebel, but as Ahab repents, the punishment is deferred.

Ch. xxii.: Ahab, visited by Jehoshaphat, urges the latter to accompany him to the war with Aram. Encouraged by false prophets, Ahab, contrary to the advice of Micaiah, starts for the war, and is slain at Ramoth-gilead. He is succeeded by his son Ahaziah. A summary of Jehoshaphat's beneficent reign and acts; he is succeeded by his son Jehoram; short account of Ahaziah's evil reign.

Second Book of Kings: Ch. i.: Moab rebels after Ahab's death. Ahaziah, being sick, sends to Baal-zebub; the messengers meet Elijah, who foretells Ahaziah's death. Elijah, sent for by Ahaziah, destroys by fire from heaven two captains of fifty with their men; he spares the third captain and his fifty, and comes to Ahaziah, whose death he foretells.

Ch. ii.: Account of Elijah's translation. Having divided the Jordan with his mantle, the prophet takes leave of Elisha, granting him his request that a double portion of Elijah's spirit may rest upon him; Elijah is then taken up in a fiery chariot to heaven. Elisha is acknowledged as Elijah's successor; he heals the waters of Jericho, curses children who mock him, and returns to Samaria.

Ch. iii.: Jehoram, Ahab's second son, succeeds his brother Ahaziah, and, accompanied by Jehoshaphat and the King of Edom, marches against Moab. Being distressed for lack of water, the allied kings obtain it through the intervention of Elisha, who also promises them victory. The Moabites, deceived by the color of the water, come to plunder the allied armies, and are overcome. The King of Moab, by sacrificing his eldest son, raises the siege.

Ch. iv.: Account of the miracles performed by Elisha. He multiplies the widow's oil; gives a son to a Shunammite woman; brings to life her dead son; heals at Gilgal the deadly pottage; and satisfies 100 men with twenty loaves.

Ch. v.: Naaman, on the advice of a captive maid, asks Elisha to cure him of his leprosy. Elisha sends him to bathe in the Jordan; Naaman does so and is cured. Elisha refuses Naaman's gifts, but his servant Gehazi takes them, for which he is smitten with leprosy.

Elisha's Career.

Ch. vi.: Elisha, giving leave to the young prophets to build a dwelling, causes the ax of one of them, which has fallen into the Jordan, to float on the surface of the water. He discloses to the King of Israel the Syrian king's secrets; he smites with blindness the army sent to apprehend him, brings it to Samaria, and then dismisses it in peace. Samaria, besieged by Ben-hadad, suffers from a severe famine in which women eat their children. The king sends a messenger to slay Elisha.

Ch. vii.: Elisha foretells plenty in Samaria; but announces to an officer, who expresses disbelief in the prophecy, that he shall not participate therein. Four lepers, having visited the camp of the Syrians, bring word of their flight. The King of Israel sends men to spoil the tents of the enemy; abundance of food is secured. The officer who has doubted Elisha's prophecy is trodden to death.

Ch. viii.: The Shunammite, in order to avoid the predicted famine, leaves her country for seven years; when she returns she finds her land seized by other people. The king, in recognition of Elisha's miracles, orders her land to be restored to her. Ben-hadad, being sick, sends Hazael with presents to Elisha, who prophesies that Hazael will succeed his master. Hazael kills Ben-hadad and ascends the throne. Short account of the evil reign of Jehoram, King of Judah. Edom and Libneh revolt. Jehoram is succeeded by his son Ahaziah; account of his sinful reign.

Ch. ix.: Elisha sends a young prophet to anoint Jehu at Ramoth-gilead. Jehu, made king by the soldiers, kills Joram, Ahab's son, in the field of Naboth, and Ahaziah in Gur. Jezebel is thrown out of a window and eaten by dogs.

Jehu's Iniquities.

Ch. x.: Jehu exterminates Ahab's family; he causes seventy sons of Ahab to be beheaded, kills forty-two of Ahaziah's brothers, takes up Jehonadab into his chariot with him, and destroys all the worshipers of Baal. Jehu himself follows the sinful practises of Jeroboam, as a punishment for which Israel is oppressed by Hazael. Jehu is succeeded by his son Jehoahaz.

Ch. xi.: Athaliah destroys all the royal family with the exception of Joash (Jehoash), who is hidden by his aunt Jehosheba in the house of God for six years. In the seventh year Joash is anointed king by Jehoiada, and Athaliah is slain. Jehoiada restores the worship of Yhwh.

Ch. xii.: Joash is a worshiper of Yhwh all the days of Jehoiada. Account of Joash's activity in repairing the Temple. Hazael is diverted from Jerusalem by a present from the sacred treasury. Joash, after a reign of forty years, is assassinated by his servants and succeeded by his son Amaziah.

Ch. xiii.: Account of Jehoahaz's evil reign. Jehoahaz, oppressed by Hazael, prays to God, who relieves him. He is succeeded by his son Joash, who, after a wicked reign of sixteen years, is followed by his son Jeroboam. Elisha dies; his bones, by the touching of them, bring to life a dead man. Hazael is succeeded by his son Ben-hadad, from whom Joash recovers the cities which his father lost.

Ch. xiv.: Amaziah's reign; his victory over Edom, and his defeat by Joash. Amaziah, slain by conspirators, is succeeded by his son Azariah. Account of Jeroboam's reign; he is succeeded by his son Zechariah.

Ch. xv.: Short account of Azariah's good reign; he dies a leper, and is succeeded by his son Jotham. Zechariah, the last of Jehu's dynasty and an idolater, is slain by Shallum, who succeeds him and who, after a reign of one month, in turn is slain by Menahem. Account of Menahem's victories; he secures the assistance of Pul, King of Assyria. Menahem, dying, is succeeded by his son Pekahiah. The latter is slain by Pekah, during whose reign Tiglath-pileser seizes a part of the land of Israel. Pekah is slain by Hoshea and is succeeded by him. Jotham after a good reign of sixteen years is succeeded by his son Ahaz.

The Later Kings.

Ch. xvi.: Account of Ahaz's wicked reign. Assailed by Rezin and Pekah, he bribes Tiglath-pileser to help him against them. Account of the altar built by Uriah for Ahaz and of the latter's spoliation of the Temple. Ahaz is succeeded by Hezekiah.

Ch. xvii.: Account of Hoshea's wicked reign. Being subdued by Shalmaneser, he conspires against him, the result of which is the capture of Samaria as a punishment for the sins of Israel. Account of the strange nations transplanted in Samaria by the King of Assyria; lions being sent among them, they make idols and set them in the high places.

Ch. xviii.: Account of Hezekiah's beneficent reign; he destroys idolatry and prospers. Israel is carried away into captivity. Sennacherib, invading Judah, is at first pacified by tribute; but he afterward sends Rab-shakeh, who reviles Hezekiah and incites the people to revolt (see Isa. xxxvi.).

Ch. xix.: Hezekiah requests Isaiah to pray for his kingdom, and is comforted by the prophet. Sennacherib, obliged to leave Jerusalem in order to encounter Tirhakah, sends a blasphemous letter to Hezekiah. Hezekiah's prayer and Isaiah's prophecy are followed by the annihilation of Sennacherib's army (see Isa. xxxvii.).

Ch. xx.: Hezekiah, being sick, is told by Isaiah that he will die; in answer to his prayer his life is lengthened. The shadow goes ten degrees backward. Merodach-baladan's embassy to Hezekiah, and Isaiah's prophecy with regard to it (see Isa. xxxviii.–xxxix.). Hezekiah is succeeded by his son Manasseh.

Ch. xxi.: Account of Manasseh's reign and of his flagrant idolatry. He is succeeded by his son Amon, who, after a reign of two years, is slain by his servants; he is succeeded by his son Josiah.

Ch. xxii.: Josiah during his long and good reign is very active in repairing the Temple. Hilkiah having found a scroll of the Law, Josiah sends to consult Huldah concerning it; she prophesies the destruction of Jerusalem, but not until after Josiah's death.

Ch. xxiii.: Josiah, having read the Law in a solemn assembly, renews the covenant of Yhwh. Josiah's activity in the destruction of idolatry; he celebrates the Passover. Having provoked Pharaoh-necboh, Josiah is slain by him at Megiddo. Jehoahaz, Josiah's son, succeeds to the throne. Pharaoh-necboh, having imprisoned Jehoahaz, makes Jehoiakim king; the latter reigns indifferently for eleven years.

Ch. xxiv.: Jehoiakim, subdued by Nebuchadnezzar, rebels against him. He is succeeded by his son Jehoiachin, during whose wicked reign the King of Egypt is vanquished by the King of Babylon, Jerusalem also is taken, and the royal family, including the king, and most of the inhabitants are carried captive to Babylon. Zedekiah is made king and reigns till the destruction of Judah.

Ch. xxv.: Account of the siege of Jerusalem and of the capture of Zedekiah. Nebuzar-adan destroys the city and the Temple, carries away the Temple vessels, and deports most of the people to Babylon. Gedaliah, who has been made ruler over those who remain in Judah, is slain, and the rest of the people flee into Egypt. Evil-merodach, King of Babylon, releases Jehoiachin from prison; and the latter is honored at court.

s. M. Sel.

——**Critical View:** A superficial examination of the Books of Kings makes clear the fact that they are a compilation and not an original composition. The compiler, or editor, constantly cites certain of his sources. In the case of Solomon it is "the book of the acts of Solomon" (I Kings xi. 41); for the Northern Kingdom it is "the book of the chronicles of the kings of Israel," which is cited seventeen times, *i.e.*, for all the kings except Jehoram and Hoshea (see, *e.g.*, *ib.* xv. 31); and for the kings of Judah it is "the book of the chronicles of the kings of Judah," which is cited fifteen times, *i.e.*, for all the kings except Ahaziah, Athaliah, Jehoahaz, Jehoiachin, and Zedekiah (see, *e.g.*, *ib.* xv. 7). Whether the editor had access to these "chronicles," as they were deposited in the state archives, or simply to a history based upon them, can not with certainty be determined. It is generally assumed that the latter was the case (comp. Kuenen, "Historisch-Kritische Einleitung in die Bücher des Alten Testaments," p. 68, and Cornill, "Einleitung in das Alte Testament," p. 123).

Object and Method of Work.

It was not the purpose of the compiler to give a complete history of the period covered by his work; for he constantly refers to these sources for additional details. He mentions as a rule a few important events which are sufficient to illustrate the attitude of the king toward the Deuteronomic law, or some feature of it, such as the central sanctuary and the "high places," and then proceeds to pronounce judgment upon him accordingly. Each reign is introduced with a regular formula; then follows a short excerpt from one of his sources; after which an estimate of the character of the monarch is given in stereotyped phraseology; and the whole concludes with a statement of the king's death and burial, according to a regular formula (comp., *e.g.*, I Kings xv. 1-9 for the formula used for the kings of Judah, and *ib.* xv. 25-32 for that used for the kings of Israel).

The standpoint of the judgments passed upon the various kings as well as the vocabulary of the compiler (comp. Driver, "Introduction," 1891, p. 190, for a list of his words) indicates that he lived after the reforms of Josiah (621 B.C.) had brought the Deuteronomic law into prominence. How much later than this the book in its present form was composed, may be inferred from the fact that it concludes with a notice of Jehoiachin's release from prison by Evil-merodach (Amil-Marduk) after the death of Nebuchadnezzar in 562. The book must have taken its present form, therefore, during the Exile, and probably in Babylonia. As no mention is made of the hopes of return which are set forth in Isa. xl.-lv., the work was probably concluded before 550. Besides the concluding chapters there are allusions in the body of the work which imply an exilic date (see, *e.g.*, I Kings viii. 34, xi. 39; II Kings xvii. 19, 20; xxiii. 26, 27). To these may be added the expression "beyond the river" (I Kings v. 4), used to designate the country west of the Euphrates, which implies that Babylonia was the home of the writer.

Time of Redaction.

On the other hand, there are indications which imply that the first redaction of Kings must have occurred before the downfall of the Judean monarchy. The phrase "unto this day" occurs in I Kings viii. 8, ix. 21, xii. 19; II Kings viii. 22, xvi. 6, where it seems to have been added by an editor who was condensing material from older annals, but described conditions still existing when he was writing. Again, in I Kings xi. 36, xv. 4, and II Kings viii. 19, which come from the hand of a Deuteronomic editor, David has, and is to have, a lamp burning in Jerusalem; *i.e.*, the Davidic dynasty is still reigning. Finally, I Kings viii. 29, 30, 31, 33, 35, 38, 42, 44, 48; ix. 3; and xi. 36 imply that the Temple is still standing. There was accordingly a pre-exilic Book of Kings. The work in this earlier form must have been composed between 621 and 586. As the glamour of Josiah's reforms was strong upon the compiler, perhaps he wrote before 600. To this original work II Kings xxiv. 10-xxv. 30 was added in the Exile, and, perhaps, xxiii. 31-xxiv. 9. In addition to the supplement which the exilic editor appended, a comparison of the Masoretic text with the Septuagint as represented in codices B and L shows that the Hebrew text was retouched by another hand after the exemplars which underlie the Alexandrine text had been made. Thus in B and L, I Kings v. 7 follows on iv. 19; vi. 12-14 is omitted; ix. 26 follows on ix. 14, so that the account of Solomon's dealings with Hiram is continuous, most of the omitted portion being inserted after x. 22. II Kings xxi., the history of Naboth, precedes ch. xx., so that xx. and xxii., which are excerpts from the same source, come together. Such discrepancies prove sufficient late editorial work to justify the assumption of two recensions.

Sources.

In brief outline the sources of the books appear to have been these: I Kings i. and ii. are extracted bodily from an early court history of David's private life, which is largely used in II Sam. ix.-xx. The editor (Rd) has added notes at ii. 2-4 and 10-12. For the reign of Solomon the source is professedly "the book of the acts of Solomon" (xi. 41); but other sources were employed, and much was added by Rd. Ch. iii. is a prophetic narrative of relatively early origin, worked over by Rd, who added verses 2, 3, and 14, 15. Ch. iv. 1–19 is presumably derived from the Chronicle of Solomon. Ch. iv. 20–v. 14 contains a small kernel of prophetic narrative which has been retouched by many hands, some of them later than the Septuagint. The basis of v. 15–vii. 51 was apparently a document from the Temple archives; but this was freely expanded by Rd (comp. Stade in his "Zeitschrift," 1883, pp. 129 *et seq.*), and vi. 11–14 also by a later annotator. Ch. viii. 1–13, the account of the dedication of the Temple, is from an old narrative, slightly expanded by later hands under the influence of P. Ch. viii. 14–66 is in its present form the work of Rd slightly retouched in the Exile. Ch. ix. 1–9 is the work of Rd, but whether before the Exile or during it is disputed. Ch. ix. 10–x. 29 consists of extracts from an old source, presumably "the book of the acts of Solomon," pieced together and expanded by later editors. The order in the Masoretic text differs from that in the Septuagint. For details see Kittel, "Die Königsbücher," in Nowack's "Handkommentar." Ch. xi. 1–13 is the work of Rd; xi. 14–22 is a confused account, perhaps based on two older narratives (comp. Winckler, "Alttestamentliche Forschungen," pp. 1–6); and xi. 26–31 and 39, 40 probably formed a part of a history of Jeroboam from which xii. 1–20 and xiv. 1–18 were also taken. The extracts in ch. xi. have been set and retouched by later editors (comp. Kittel on I Kings xi. 23–43).

Narratives and Epitomes.

From ch. xii. of the First Book onward these books are characterized by an alternation of short notices which give epitomes of historical events, with longer narratives extracted from various sources. The following sections are short epitomes: I Kings xiv. 21–xvi. 34; xxii. 41–53; II Kings viii. 16–29; x. 32–36; xii. 18–xiii. 13; and xiii. 22–xvii. 6. In some cases short extracts are even here made in full, as in xiv. 8–14 and xvi. 10–16.

The longer narratives, which are frequently retouched and expanded by Rd, are as follows: I Kings xii. 1–20, xiv. 1–18, from an older narrative of Jeroboam, to which xii. 21–32 and xiv. 19, 20 are additions; xii. 33–xiii. 34, a comparatively late story of a prophet; xvii.–xix. and xxi., an early prophetic narrative written in the Northern Kingdom (comp. xix. 3); xx. and xxii. 1–40, an early north-Israelitish history of the Syrian war in which Ahab lost his life; II Kings i.–viii. 15 and ix. 1–x. 31, north-Israelitish narratives, not all from one hand, which are retouched here and there, as in iii. 1–3, by Rd; xi. 1–xii. 17, a Judean narrative of the overthrow of Athaliah and the accession of Joash; xiii. 14–21 and xiv. 8–14, two excerpts from material written in the Northern Kingdom (comp. xiv. 11); xvii. 7–23 is Rd's commentary on the historical notice with which the chapter opens; xvii. 24–41 is composite (comp. verses 32, 34, and 41), probably written in the Exile and retouched after the time of Nehemiah; xviii.–xx. is compiled by Rd from three sources (comp. Stade, *l.c.* vi. 174), Rd himself prefixing, inserting, and adding some material; xxi. is, throughout, the work of Rd; xxii.–xxiii. 25 is an extract from the Temple archives with slight editing; and xxiii. 29–xxv. 30, the appendix of the exilic editor, is based on Jer. xl. 7–xliii. 6. From Jeremiah, too, the exilic editor drew his information, which he presented in briefer form.

KINGSTON. See Jamaica.

ḲINNIM ("Birds' Nests"). Name of a treatise of the Mishnah in the series Ḳodashim. The Pentateuchal law ordains the sacrifice of two turtle-doves or of two young pigeons for a person that has been cured of an issue (Lev. xv. 14–15, 28–29). A similar sacrifice is prescribed for poor lepers when they have become clean again (Lev. xiv. 22, 30), for poor women after childbirth (Lev. xii. 8), and for such of the poor as have trespassed in regard to Lev. v. 1 *et seq.* Of the two turtle-doves or pigeons of which this sacrifice consists, the one is for a sin-offering, the other for a burnt offering. The Law furthermore provides (Lev. i. 14) that one who has vowed an offering of fowls may bring turtle-doves or young pigeons. This is the so-called "free-will offering." The treatise Ḳinnim discusses these regulations in detail. In this connection are instanced a number of cases, some of them being hypothetical and carefully elaborated, of confusing pigeons brought by different persons for different sacrifices.

In the Mishnah of the Babylonian Talmud this treatise is the ninth in the series Ḳodashim, but in most editions of the Mishnah it is the eleventh and last. It is divided into three chapters, containing fifteen paragraphs in all.

Ch. i.: The blood of a sin-offering of fowls is sprinkled below the line which divides the altar, that of a burnt offering of fowls, above; the free-will dove-offerings can be brought only as burnt offerings; difference between the vowed offering ("neder") which, if it dies or is stolen, must be replaced, and the free-will offering ("nedabah"), which can not be replaced (§ 1). Concerning the confusing of a sin-offering with a burnt offering, and vice versa, and concerning the confusing of different pairs of sacrificial birds (§§ 2-4).

Ch. ii.: Cases in which one of a pair of fowls for sacrifice flies away before it has been decided which was to be the sin-offering and which the burnt offering (§§ 1-3); cases in which one escapes after the decision has been made (§ 4). An offering may consist either of turtle-doves or of young pigeons, but not of one turtle-dove and one young pigeon. Cases in which heirs must supply the offering (§ 5).

Ch. iii.: Further details concerning the confusion of different sacrifices; a more precise treatment of matter discussed in ch. i. (§§ 1-5). R. Joshua explains the proverb, "The ram has one voice during its life, and seven after its death," by pointing out that his horns, skin, thigh-bones, and intestines are used in the making of musical instruments (§ 5). The chapter, and the treatise, ends with a saying of

R. Simeon ben 'Aḳashya, that "the folly of the ignorant increases with age, while the intellect of scholars becomes clearer and firmer." This haggadic conclusion is a confirmation of the view that the treatise Ḳinnim terminated the series Ḳodashim.

KIR: A people and country subject to the Assyrian empire. In II Kings xvi. 9 and Amos i. 5, ix. 7, Kir is mentioned as the place whither the Syrians went before they settled in the regions north of Palestine, and to which Tiglath-pileser sent the prisoners after the conquest of Damascus. In Isa. xxii. 6 Kir is mentioned in connection with Elam: "And Elam bare the quiver with chariots of men and horsemen, and Kir uncovered the shield." The Septuagint translates the last clause *συναγωγή παρατάξεως*, omitting "Kir" altogether and taking ערה for עדה, hence *συναγωγή*. Hitherto it has not been possible to identify the place.

E. G. H. B. P.

KIRALFY, IMRE: Musical composer; born in Budapest, Hungary, Jan. 1, 1845. He received his musical education at Budapest, Vienna, and Paris. Kiralfy, who commenced composition of music at the age of twelve, is the author, originator, and producer of a series of spectacular exhibitions given in the United States and in England. Among these may be mentioned: "America," produced at the Columbian Exposition at Chicago, 1893; "Venice in London," 1895; "Victorian Era Exhibition," 1897; "Military Exhibition," 1901; "Paris in London," 1902. He is also the author of: "Our Naval Victories," produced in New York, 1898; "Women of all Nations," 1900; "China, or the Relief of the Legations," 1901. Of his compositions the following have been published: "Nero," "Venice, the Bride of the Sea," "Columbus," "Our Naval Victories," "America," "China," and "India."

Kiralfy, who now (1904) resides in London, has two brothers, **Arnold** and **Bolossy Kiralfy,** who are both conducting theatrical companies, with which they are touring the United States. The Kiralfy Brothers built in 1876 the Alhambra Palace, the present South Broad Street Theater, in Philadelphia, where until the early part of 1877 they produced their spectacular exhibitions.

A. F. C.

KIRCHHEIM, RAPHAEL: German scholar; born in Frankfort-on-the-Main 1804; died there Sept. 6, 1889. For some time he was shoḥet in the Orthodox congregation of Samson Raphael Hirsch in Frankfort, in which city he spent his whole life. He assented to the protest of the seventy-seven Orthodox rabbis against the decrees of the Rabbinical Conference at Brunswick (1844), and attacked in an open letter ("Offener Brief," 1845), signed "K——m," A. Adler, rabbi of Worms. When Abraham Geiger became rabbi at Frankfort, Kirchheim developed into a radical partizan of Reform. He had then to give up his position as shoḥet, but being a partner in a banking firm he had ample means. Kirchheim was of a pugnacious disposition and took a very active part in the general attack on the Amsterdam administration of the Ḥaluḳḳah in 1843-44, which was especially directed against Hirsch Lehren of Amsterdam, president of the board of administration (see "Orient," iv. 391 *et seq.*). Kirchheim severely criticized Samson Raphael Hirsch's "Der Pentateuch" in a pamphlet entitled "Die Neue Exegetenschule: Eine Kritische Dornenlese" (Breslau, 1867).

Kirchheim published: S. L. Rapoport's "Tokaḥat Megullah, Sendschreiben an die Rabbinerversammlung zu Frankfurt-am-Main" (Hebr. and German, the translation being by Kirchheim himself), Frankfort-on-the-Main, 1845; Azulai's "Shem ha-Gedolim" and "Wa'ad la-Ḥakamim" with the annotations of A. Fuld and E. Carmoly, *ib.* 1847; "Karme Shomeron," an introduction to the Talmudical treatise "Kutim," with an additional letter by S. D. Luzzatto, *ib.* 1851 (the appendix gives the seven smaller treatises of the Jerusalem Talmud, according to a Carmoly manuscript); Eliezer Ashkenazi's "Ṭa'am Zeḳenim," *ib.* 1854; B. Goldberg's edition of Jonah ibn Janaḥ's "Sefer ha-Riḳmah," with additional notes of his, *ib.* 1856; "Perush 'al Dibre ha-Yamim, Commentar zur Chronik aus dem X Jahrhundert," *ib.* 1874; Abraham Geiger's "Nachgelassene Schriften," v. 1, Berlin, 1877.

He wrote also additional notes to: A. Ginzburg's "Perush ReDaK 'al ha-Torah," Presburg, 1842; S. Werblumer's edition of Joseph ibn Caspi's "'Ammude Kesef," *ib.* 1848; and Filipowski's "Sefer Teshubot Dunash ben Labraṭ." Besides he published many articles in German magazines.

Kirchheim left a valuable collection of Hebraica and Judaica, which at present belongs to the religious school of the M. Horovitz Synagogue at Frankfort.

S. M. Sc.

KIRIMI, ABRAHAM: Crimean rabbi of the fourteenth century. According to Firkovitch ("C. I. H." No. 50), Kirimi was a proselyte and a pupil of Aaron ben Joseph the Karaite. He derived his name from his native town Kirim, or Sulchat, in the Crimea.

Kirimi was the author of "Sefat Emet," a commentary on the Pentateuch, in which he tries to refute the interpretations of the Karaites when they are in contradiction to those of the Rabbinites. Kirimi says in the preface that he wrote the work at the request of many notable Jews and especially of his Karaite pupil Hezekiah b. Elhanan ha-Nasi, whom he held in high esteem. A part of the preface is in verse, the last two lines of which may be translated: "To the one who asks for the author's name, answer 'Abraham who was born at Kirim. His date is 5118 [1358].'" Steinschneider and

Fuenn consider this date to be that of the composition of the work; but it seems rather to be that of the author's birth.

BIBLIOGRAPHY: Steinschneider, *Hebr. Bibl.* xi. 38, 39; Fuenn, *Ha-Karmel*, iii. 53 *et seq.*; idem, *Keneset Yisrael*, p. 62.

S. S. M. SEL.

KIRJATH-ARBA. See HEBRON.

KIRJATH-JEARIM ("city of forests"): **1.** A descendant of Caleb, the son of Hur (I Chron. ii. 50, 52, 53). **2.** One of the towns of the Gibeonites (Josh. ix. 17), which belonged to the tribe of Judah (*ib.* xv. 60; Judges xviii. 12), on the border of Benjamin (Josh. xviii. 15; I Chron. ii. 50), to which it was finally assigned (*ib.* xviii. 28). At Kirjath-jearim the Ark was kept before its removal by David to Jerusalem, having been brought from Beth-shemesh after its return from the land of the Philistines (I Sam. vii; I Chron. xiii.). After the Captivity Kirjath-jearim was repeopled (Ezra ii. 25; Neh. vii. 29). Its site appears to have been not far from Beeroth (Ezra ii. 25). The prophet Urijah, the son of Shemaiah, put to death by King Jehoiakim, was a native of Kirjath-jearim (Jer. xxvi. 20 *et seq.*). Other names for the same place are "Baalah" (Josh. xv. 9, 10; I Chron. xiii. 6) and "Kirjath-baal" (Josh. xv. 60).

E. G. H. B. P.

KIRJATH-SEPHER: City in the hill-country of Judah (Josh. xv. 49), situated to the south of Hebron (x. 38), on a prominence not very far from that city (*ib.* xv. 15). It was the former name of Debir (*ib.* xv. 15; Judges i. 11), and was also known as "Kirjath-sannah" (Josh. xv. 49), for which the Septuagint gives *πόλις γραμμάτων* ("city of letters"), the usual translation of "Kirjath-sepher." Debir was among the cities which were assigned to the priests (Josh. xxi. 15; I Chron. vi. 58). It is identified with the present Al-Ḍahariyyah. The name seems to indicate that it was the "city of the roll," *i.e.*, for enrolment or enlisting purposes; but the second element, "sepher," may possibly be the name of a deity. To explain it as "Library-city" appears to be assuming too much.

E. G. H. B. P.

KIRJATHAIM (R. V. **Kiriathaim**, קריתים = "two cities"): **1.** City on the Moabite plateau, assigned by Moses to Reuben; mentioned with Heshbon and Elealeh (Num. xxxii. 37) as well as with Kedemoth and other cities which had previously belonged to Sihon (Josh. xiii. 18-20). It is spoken of as a Moabite town in Jer. xlviii. 23, Ezek. xxv. 9, and in the inscription of Mesha (line 10), who, calling it "Ḳiryatan" (קריתן), declares that he had built or fortified it. Kirjathaim gave its name to the plain Shaveh Kiriathaim (Gen. xiv. 5). In the "Onomasticon" (*s.v.* *Καριαθαείμ*, *Καρίαθα*) it is described as a Christian village situated ten Roman miles west of Medeba. It is identified by many scholars with the ruins now called "Ḳariyah," southwest of Machærus (see Conder in Hastings, "Dict. Bible," and the bibliography there given).

2. A city in Naphtali assigned to the Gershonite Levites (I Chron. vi. 61 [A. V. 76]). In the parallel list of Josh. xxi. 32, it is called "Kartan."

E. G. H. M. SEL.

ḲIRḲISANI, ABU YUSUF YA'ḲUB AL- (according to Steinschneider, **Yusuf Abu Ya'-ḳub**): Karaite dogmatist and exegete; flourished in the first half of the tenth century; a native of Circassia (whence the name of Ḳirḳisani). He seems to have traveled throughout the Orient, visiting the centers of Mohammedan learning, in which he was well versed. In 937 Ḳirḳisani wrote an Arabic work on the precepts—under the title "Kitab al-Anwar wal-Marakib" (known in Hebrew as "Sefer ha-Me'orot," or "Sefer ha-Ma'or"), with the subtitle "Kitab al-Shara'i'" ("Sefer Miẓwot Gadol")—and a commentary entitled "Al-Riyaḍ wal-Ḥada'iḳ" ("Sefer ha-Gannim we-Pardesim," or "Sefer ha-Niẓẓanim"), on those portions of the Pentateuch which do not deal with the laws.

Contents of "Kitab al-Anwar."

Of these two volumes the more interesting is the former, which not only provides valuable information concerning the development of Karaism, but throws light also on many questions in rabbinical Judaism. It comprises thirteen treatises, each divided into chapters, and the first four treatises form an introduction to the whole work. In the first treatise, of eighteen chapters, Ḳirḳisani gives a comprehensive survey of the development of the Jewish sects, the material for which he drew not only from the works of his predecessors, as David ibn Merwan al-Muḳammaṣ, whom he mentions, but also from his personal experiences in the learned circles in which he moved. The enumeration of the sects is given in chronological order, beginning with the Samaritans, and concluding with the sect founded by Daniel al-Ḳumisi. Ḳirḳisani declares the Rabbinites to be a Jewish sect founded by Jeroboam I., although it did not make its appearance until the time of the Second Temple. Zadok, the founder of the Sadducean sect, in his excursuses against the Rabbinites, revealed part of the truth on religious subjects, while Anan disclosed the whole. However, in spite of Ḳirḳisani's admiration for Anan, he often disagrees with him in the explanation of the precepts.

View of Christianity.

It is noteworthy that Ḳirḳisani includes Christianity among the Jewish sects. In the third treatise (ch. xvi.) he says that "the religion of the Christians, as practised at present, has nothing in common with the teachings of Jesus." It originated with Paul, who ascribed divinity to Jesus and prophetic inspiration to himself. It was Paul that denied the necessity of carrying out the Commandments and taught that religion consisted in humility; and the Nicene Council adopted precepts which occur neither in the Law, nor in the Gospels, nor in the Acts of Peter and Paul. Ḳirḳisani devotes a great portion of the first treatise to attacks upon the Rabbinites, in which he does not show himself impartial; but he is not blind to the faults of the Karaites. In the last chapter he draws a sad picture of the spiritual condition of Karaism in his time. "You can scarcely find two Karaites of one and the same opinion on all matters; upon almost any point each has an opinion different from those of all the rest." He deplores the neglect by the Karaites of the study of rabbinical literature, which, according to him, would furnish them with weapons for their controversies with the Rabbinites. Here Ḳirḳisani is referring to the discrepancies frequent in haggadic and mystic literature, such as the "Shi'ur Ḳomah," which, indeed, he often uses in his attacks against the Rabbinites.

The second treatise, of twenty-eight chapters, discusses the duty of applying critical methods to the study of religious matters. Ḳirḳisani is the first Karaite known to have been a firm believer in the study of the sciences, and he criticizes those who, although accepting the fundamental principle of independent inquiry and research, are against the demonstrative sciences of dialectics and philosophy. Reason is the foundation upon which every article of faith is based, and from which all knowledge flows. The third treatise, of twenty-three chapters, is a critical review of adverse religious sects and Christianity. In the seventeenth and eighteenth chapters Ḳirḳisani refutes the doctrine of metempsychosis, though among its exponents was Anan, who wrote a work on the subject. For Ḳirḳisani, the solution of the question, much debated by the Motazilite Kalam, concerning the punishments inflicted upon children is not to be found in the doctrine of metempsychosis, but in the belief that compensation will be given to children in the future world for their sufferings in this.

In the fourth treatise Ḳirḳisani expounds, in sixty-eight chapters, the fundamental principles leading to the comprehension of the particular religious prescriptions. The remaining treatises are devoted to the precepts themselves, which are arranged in systematic order. Ḳirḳisani quotes the views of the earliest Karaite authorities (as Anan, Benjamin Nahawendi, Daniel al-Ḳumisi, etc.), which he often refutes. Belonging to the Ba'ale ha-Rikkub, he is particularly severe in his views on the laws of INCEST, and he combats the opinion of his contemporary Jacob ben Ephraim al-Shami, who permitted marriage to the daughter of one's brother or sister.

Extant Manuscripts.

Most of the "Kitab al-Anwar" and the beginning of the "Al-Riyaḍ wal-Ḥada'iḳ" are still extant in manuscript, in the Firkovich collection in the Imperial Library of St. Petersburg (Nos. 1142-1444). The first treatise of the "Kitab al-Anwar," dealing with the Jewish sects, was published by A. Harkavy in the memoirs of the Oriental section of the Archeological Society (viii. 1849). Various fragments of seven treatises (ii.-vi., viii., ix.-xii.) are found in the British Museum (Oriental MSS. Nos. 2,524, 2,526, 2,578-2,582). They were analyzed by Poznanski, who published the text of chapters xvii. and xviii. of the third treatise, dealing with the doctrine of metempsychosis, and chapter xxxv. of the fifth treatise, in which Ḳirḳisani discusses the question whether it is permitted to read on the Sabbath books written in other than Hebrew characters (Kohut Memorial Volume, pp. 435-462; "Steinschneider Festschrift," pp. 195 *et seq.*). The text of the sixteenth chapter of the third treatise, dealing with the criticism of Christianity, was published by H. Hirschfeld in his chrestomathy. A dissertation on the Decalogue by Ḳirḳisani, and which Steinschneider supposes to be the first chapter of the sixth treatise, beginning with proofs of the existence of God, is found in the Bibliothèque Nationale (No. 755). Both the "Kitab al-Anwar" and the "Al-Riyaḍ wal-Ḥada'iḳ" were abridged, the former by a certain Moses ben Solomon ha-Levi הצבני. Harkavy deduces from quotations that Ḳirḳisani translated the Bible into Arabic, wrote commentaries on the Book of Job and on Ecclesiastes, and wrote a work on the unity of God ("Kitab al-Tauḥid").

K. I. BR.

KIRK-KILISSEH: City in Thrace, European Turkey, 102 miles north of Constantinople. The name signifies in Turkish "forty churches."

Kirk-Kilisseh is an ancient Greek city, and it contained no Jews when Sultan Murad II. conquered it in 1436. Archbishop Melissinos Christodoulo relates that in 1674 Sultan Mohammed IV., after having taken Bessarabia from the Poles, brought a large number of Jews from Kaminiec to Kirk-Kilisseh, where he placed a garrison of 2,000 spahis. The descendants of these Jews are called "Eskenazi," which seems to prove that Kirk-Kilisseh originally contained Jews of Spanish-Italian origin, if one may judge from their names—Mitrani (from Trani in Italy), Rodrigue, Castiel, Ḥasdai, and Shaprut. The oldest epitaph in the local cemetery, dated 5423 (=1663), is that of a rabbi, Abraham Molina, originally from Uskup.

During the Turco-Russian war of 1877-78, the Jews of Kirk-Kilisseh joined with their fellow citizens, and with the Jews from Yambol who had taken refuge in the city, in bravely defending the place against the attacks of Circassian pillagers.

At present the community numbers about 1,000 Jews in a total population of 15,000. It possesses an ancient synagogue, two schools containing 200 pupils (boys and girls), two benevolent societies, and a reading-room.

Kirk-Kilisseh being very rich in vineyards, the Jews, like their fellow citizens, are engaged in the autumn in wine-making. During the remainder of the year they follow different trades. Three Jews of the city are officials of the local government.

At Lule-Burgos in the neighborhood of Kirk-Kilisseh there are sixty Jewish families, and at Baba-Eski ten families.

D. M. FR.

KIRSCHBAUM, ELIEZER SIMON: Austrian physician and writer; born at Sieniawa, Galicia, 1797; died at Cracow 1860. After studying philosophy and medicine in Berlin, he settled as a physician in Cracow, and as "Der Berliner Doctor" soon acquired an extensive practise and accumulated a considerable fortune.

In order to be able to secure the estate of Siemota, near Chrzanow, he adopted the Christian religion, and assumed the name of "Sigismund." As a married man he permitted his wife to remain a law-abiding Jewess throughout her life.

Kirschbaum was the author of a long Hebrew essay, entitled "Hilkot Yeme ha-Mashiaḥ." In the German language he published "Der Jüdische Alexandrinismus," Leipsic, 1841, and "Der Familie Apotheose," Cracow, 1858.

s. M. We.

KIRSTEIN, MORITZ: German physician; born at Filehne 1830; died in Berlin July 12, 1896. He studied at the Gymnasium zum Grauen Kloster, in Berlin, and later at the university of that city, obtaining his M.D. degree in 1855. The same year he went to Vienna and Prague to take a post-graduate course under Oppolzer, Skoda, Dittel, Schuh, and Hebra. Kirstein then settled as a physician in Berlin, where, in 1860, he was the first practitioner to make use of the laryngeal mirror in exploration of the larynx and the thoracic cavities. At the time of his death he was a member of the Berlin board of health. He contributed to various specialist publications.

Bibliography: Anton Bettelheim, *Biographisches Jahrbuch*, 1897, p. 154.

s. E. Ms.

KISCH: Family of some distinction; migrated in the 16th century from Chiesch in Bohemia; the founder of the family lived in Prague in the eighteenth century, and the members are now spread throughout Europe. The most prominent members are:

Abraham Kisch: Physician, and one of the teachers of Moses Mendelssohn; born at Prague in the first half of the eighteenth century (1720?); died June 5, 1803. Compelled to leave Prague with his coreligionists in 1745, he went to Germany. During his sojourn at Breslau he founded a ḥebra ḳaddisha and a hospital, both of these being modeled after similar institutions at Prague. Thence he went to Berlin, where he completed his studies under the guidance of Aaron Gumperz; here he instructed Moses Mendelssohn in Latin. In 1749 he received from the University of Halle his degree of Ph.D., and in the same year that of M.D. for his dissertation, "Theoria et Therapia Phthiseos Pulmonalis."

The empress Maria Theresa having in the meantime permitted the Jews to return to Prague, Kisch was elected physician of the community and director of the Meisel Hospital. These offices he retained until 1763.

Bibliography: Kayserling, *Moses Mendelssohn*, p. 15; Hock-Kaufmann, *Die Familien Prags*, p. 314, Presburg, 1872; Carmoly, *Les Médecins Juifs*.

D. A. Ki.

Alexander Kisch: Austrian rabbi and writer; born Oct. 5, 1848, at Prague. From 1863 to 1872 he studied at the Jewish Theological Seminary of Breslau. He then went to Paris as tutor to the family of Baron Horace de Günzburg. In 1874 he was called as rabbi to Brüx, Bohemia, and subsequently to Zurich; in 1886 he was called to the Meiselsynagogue at Prague, succeeding Dr. A. Stein.

Kisch has published: "Der Septuagintal-Kodex des Ulfilas," Breslau, 1873; Prague, 1902; "Papst Gregor des IX. Anklage Gegen den Talmud," Leipsic, 1874; "Hillel I.," Prague, 1875; "Das Testament Mordecai Meisel's," Frankfort, 1893; "Das Mosaisch-Talmudische Eherecht R. Ezechiel Landau's," Leipsic, 1900. S.

Enoch Heinrich Kisch: Austrian balneotherapist; born at Prague May 6, 1841. He received his education at his native town, graduating as M.D. in 1862. The following year he established himself at Marienbad, where he is still (1904) practising. He became privat-docent in balneotherapeutics at Prague University in 1867, and was appointed assistant professor in 1884.

Since 1868 Kisch has edited the "Allgemeine Balneologische Zeitung" and the "Jahrbücher für Balneologie, Hydrologie und Kliniatologie," and is collaborator for balneotherapeutics to the "System of Physiologic Therapeutics," a cyclopedia published in Philadelphia, Pa. He has written several essays in the medical journals. Among his works may be mentioned: "Ueber den Einfluss der Fettleibigkeit auf die Weiblichen Sexualorgane," Prague, 1873; "Das Climacterische Alter der Frauen und die Behandlungen der Leiden der Menopause," Erlangen, 1874; "Handbuch der Allgemeinen und Speciellen Balneotherapie," Vienna, 1875; "Die Lipomatosis Universalis," *ib.* 1888; "Die Sterilität des Weibes," *ib.* 1895; "Grundriss der Klinischen Balneotherapie," *ib.* 1897; "Uterus und Herz," *ib.* 1898.

Hermann M. Kisch: Postmaster-general of Bengal; born in 1850. He was educated at Trinity College, Cambridge, and was called to the bar in 1883. Entering the Indian Civil Service in 1873, he became under-secretary to the Bengal government, and assisted in the work of relief in Bengal during the famine of 1874, and at Madras in the famine of 1877. As postmaster-general, to which position he was appointed in 1884, Kisch organized the posts for the Sikkim campaign of 1888. He represented India at the International Postal Congress of Vienna, 1891, and at that held at Washington in 1897. He attended also, in the same capacity, the Imperial Penny Postage Conference at London in 1898.

KISH: The father of Saul, the first king of Israel (I Sam. ix. 3, xii. 21, xiv. 51; I Chron. ix. 39, xii. 1, xxvi. 28). He was a wealthy and powerful Benjamite, the son of Ner (I Chron. viii. 33, ix. 39) and the grandson (I Sam. ix. 1 reads "son") of Abiel. The home of Kish and of his family was at Gibeah, according to I Sam. x. 5, 10 (rendered "the hill of God" and "the hill" in the English versions), but according to II Sam. xxi. 14, at Zelah, where the bones of Saul and Jonathan were buried "in the sepulcher of Kish." The text is no doubt corrupt. The only incident mentioned respecting Kish is that he sent Saul in search of some of his asses (I Sam. ix. 3). In the New Testament (Acts xiii. 21) Kish is called "Cis."

E. G. H. B. P.

KISHINEF (KISHINEV): Russian city; capital of the government of Bessarabia; it has a population of 147,962 (1904), including about 50,000 Jews. The Jewish community of Kishinef has taken an important part in the commercial and industrial growth of the city since the eighteenth century, when it became prominent as a trading center. Jewish merchants are intimately connected with the local and export trade in grain, wine, tobacco, lard, wool, hides, fruit, etc., and the trade with Odessa and Austria is largely controlled by Jews. Still more conspicuous is the part taken by Jews in the industries of the city. It appears from the reports of the Jewish Colonization Association (1898) that Kishinef has 6,837 Jewish artisans, of that number 2,115 being masters; and the total number of persons supported by their labor is at least 10,000. About one-third of the artisan population is composed of tailors and seamstresses, whose annual income does not average more than 250 rubles each. Numbers are engaged in shoemaking (925), cabinet-making (625), and in other crafts, their average income being between 250 and 300 rubles each per annum. Most of the other departments also of skilled labor are represented by Jews, as, for instance, photography, printing, engraving, watchmaking.

Commercial and Industrial Activity of Jews.

A large number of Jews (877) is employed as day-laborers, as porters, drivers, etc. During the harvest season many take charge of the thrashing-machines in the neighboring villages, and aid in the gathering of the harvest of grain and fruit, both in the gardens in the city and its environs, and in the neighboring villages. At least 500 are employed during the season in pressing grapes, and about 500 more work in their own vineyards and gardens, which comprise altogether about 377 deciatines of land. But the most important agricultural occupation among the Jews is that of market-gardening, which occupies about 200 families. About 115 are engaged in the cultivation of tobacco. The land used for this purpose is partly within the limits of the city (60 deciatines), but the majority of tobacco-growers living in the city own plantations outside it. Dairying occupies about 63 persons. The number of shops and factories belonging to Jews is about 35, and includes tobacco-warehouses, distilleries, vinegar-factories, cigar- and cigarette-factories, and flour-mills. The majority of the factories are small and employ from 20 to 30 hands; but a few of them employ 60 or more. There are in these shops and factories 598 Jewish laborers, almost exclusively men. The women and children take little part in the work of the factories.

The number of Jewish poor in Kishinef in proportion to the entire Jewish population is considerable, and increases from year to year. In 1895 the number of destitute Jewish families applying for aid was 808; the number in 1896 was 1,131; in 1897 it was 1,006. The increase of poverty appears even more clearly in the number of families that apply for aid for Passover: 1,200 in 1895; 1,142 in 1896; 1,450 in 1897; 1,494 in 1898; 1,505 in 1899; 2,204 in 1900.

This rapid increase in the number of Jewish poor is explained, aside from the legal and economic conditions of Jewish life in Russia, by personal administrative oppression at the hands of the governors of Bessarabia. Among the innumerable cases which illustrate the tyranny of the administration it is sufficient to cite one, in which Jewish merchants and laborers are prohibited from going to the stone-quarries situated ten versts from Kishinef, the prohibition being justified by the assertion that Jews have no right to live outside cities or boroughs!

In 1898 the various charitable institutions of Kishinef united, with official sanction, under the name of "the Society in Aid of the Poor Jews of Kishinef." The activities of the society include the supply of cheap fuel to the poor and the distribution of aid for the Passover. There are four committees of charity: the committee in charge of the dining-hall and tea-house for the poor; the orphan asylum committee; the committee for the care of sick women; and the committee for the care of poor children. The total income and expenditure of the society for 1900 were each 32,220 rubles. The sum assigned from the Basket-tax for charitable work in Kishinef (according to the census of 1900) was 58,526 rubles. Of this sum, 35,000 rubles were expended on the support of a Jewish hospital and dispensary, and about 10,000 rubles on the support of a Talmud Torah with its industrial school.

H. R. M. R.

Anti-Semitic Riots.

A serious anti-Jewish outbreak occurred in Kishinef April 19–20, 1903, during which 47 Jews were killed, and 92 severely, and 500 slightly, injured. Great material losses were inflicted on the Jewish community: 700 houses were destroyed; 600 stores were pillaged; 2,000 families were utterly ruined. The outbreak undoubtedly had been planned beforehand, and was not in any degree spontaneous. For six years previous to the outbreak a certain Pavolachi Krushevan, the Moldavian editor of the only daily paper in the city, the "Bessarabetz," had carried on a campaign against the Jews, publishing various false accusations against them, and not even hesitating to accuse them of ritual murder. Having poisoned the minds of the Christian population, Krushevan availed himself of the opportunity created by the murder of a boy (by his own relatives) in an adjoining village, and the suicide of a Christian girl in the Jewish hospital of Kishinef; he laid both tragedies at the door of the Jews, declaring emphatically that both were murders committed for ritual purposes; he described the incidents of these "ritual murders" with a wealth of sickening detail, and in inflammatory articles appealed to the people for vengeance.

The local government authorities, while aware of the utter falsity of the accusations and of the grave danger of such appeals to passion and ignorance, did nothing. That they were guilty of having contributed to the outbreak is evident, since the "Bessarabetz" was subsidized by the government for the printing of official news, and was thus made an official organ; the vice-governor, Ostrogov, while occupying the position of censor, was himself a collaborator on the paper; moreover, the police were in open sympathy with the rioters, and made no attempt to interfere; and Davidovich, one of the officials appointed to investigate into the causes and course of the outbreak, had himself participated in the formation of an anti-Jewish organization. The rioters were mostly Moldavians, with a small proportion of Great Russians; some of the latter undoubtedly had been sent to Kishinef for the occasion, under the leadership of a few seminarists and students disguised as laborers.

These events called forth expressions of indignation throughout the civilized world, and representations on the subject were made to the Russian government, which refused to take official notice of them. A petition to the czar was prepared in the United States, signed by many thousands of all beliefs, and entrusted to President Roosevelt for transmission to St. Petersburg. The petition, although its text was transmitted to the Russian government in an official despatch, was never sent, for the Russian Foreign Office intimated that it would not be received. During the trials of the numerous persons indicted as participators in the riots the judiciary was openly hostile to the Jews, and most of the rioters received trivial sentences. The unfair attitude of the government officials during these trials created grave apprehensions among the Jews of South Russia; great loss was inflicted upon commerce throughout that region, and hundreds of Jewish families were impelled to emigrate to other countries.

The cry of horror which went up from the whole civilized world in reference to the massacres at Kishinef was followed by a cry for justice and by a demand that the affair be investigated and the guilty ones punished. Public opinion in Europe and America was aroused to such a pitch that the Russian government was obliged to institute legal inquiries.

Trial of the Rioters.

"Justice will take its course," said Murawyev, minister of justice, who desired to pacify indignant Europe; but in this case justice could take only the course carefully marked out for it. Anything else would have meant disaster to the definite anti-Semitic policy of the government, and would have implicated high government officials. This, of course, was not to be thought of. Russian policy is known to be persistent, though it sometimes appears to give way to the representations of others. Accordingly legal proceedings were instituted, but the conduct of them proved only a mockery of justice.

The trial was to be kept strictly secret; and no newspaper might publish the slightest mention of the proceedings. Russian subjects were not to be led to doubt their right to persecute Jews with impunity, nor to conceive of any other explanation of the atrocities than that diligently spread by anti-Semitic papers in the pay of the government, namely, that the uprising at Kishinef was an outbreak of popular hatred against the Jews. The judge in charge of the case was ordered on no account to incriminate either the prime movers in the affair or the civil and military officials who were the real instigators of the riots. He was to punish only those persons who, as it appeared later, had received explicit secret instructions as to how they should act at the time of the riots. Finally, in order to remove all appearance of preconcerted action, the court, instead of treating all the events of April 19 and 20 as a single case, was ordered to deal with them as separate cases. The request of the lawyers on both sides to combine all accusations into a single case was refused by the president of the court, who, in order to minimize the importance of the trial, decided that it should be conducted as one involving twenty-two separate cases.

A session of the special department of the Odessa Chamber of Justice (Sudebnaya Palata) was held at Kishinef for the purposes of the trial from Nov. 19 to Dec. 21, 1903. The first case, the murders of the boy Baranovich and of Benzion Galanter, Drachmann, and others was begun on the first-mentioned date. Thirty-seven defendants, fifty-three injured persons, and 547 witnesses were cited. The public prosecutor stated that the crime had been perpetrated during the Christian Easter days. He pointed out also that the Christian populace was incited against the Jews by certain articles in the "Bessarabetz." He ignored the story given out by Minister von Plehve and published in the "Pravitelstvenny Vyestnik," the government organ, to the effect that the Jews themselves had caused the riot by jostling a Christian woman and her child near a carousel. It was brought out in the preliminary examination that the carousel was not in operation on that day, and that no such jostling took place.

From the evidence of the witnesses, including ex-Mayor Schmidt, who was in office at the time of the massacre and had filled the mayoralty for twenty-seven years; General Beckmann, commander of the garrison at Kishinef; Dr. Sizinsky, the mayor of Kishinef elected after the riots; the military surgeon Dr. Miller, and others, it was proved that the Jews and Christians in Bessarabia had always lived together in perfect harmony, and that the Moldavians—the native population of Bessarabia—even held the Jews in high esteem; that the hostility toward the Jews had manifested itself only since the foundation of the anti-Semitic paper, the "Bessarabetz"; that the riots had been planned beforehand and systematically arranged by the authorities; that the rioters were careful to spare Christian houses; and that Krushevan, the editor of the "Bessarabetz," had expressed himself as being sure of the protection of the government. It was further proved that during April 19 and 20 there had been in the city at least 5,000 soldiers, who could easily have quelled the riots had orders to that effect been given. Only when Governor von Raaben had expressed the fear that the rioters might attack even the Christian population were preventive measures taken; and order was then restored immediately. It was proved also that the accused were merely the tools of certain agitators belonging to the so-called cultured classes. On behalf of the Jews the advocate Zarudni demanded of the court that the real instigators of the riots should be brought to justice. He was joined by four lawyers for the defense. Only the anti-Semitic counsel, Shamakov, shared the view of the government prosecutor that the organization of the riots should in no case be inquired into. The court acceded to these demands. Attorney at Law S. Shamouin in his address said that the facts which had been brought out during the proceedings compelled the defense to request the court, in agreement with paragraph 549 of the criminal code, that the whole matter be referred back for preliminary examination. He pointed out that before April 19 the governor knew of the coming riots; that an anti-Jewish propaganda was encouraged, and proclamations inviting to lawlessness by the promise of indemnity to the participants in the outbreak, and by threatening those who kept aloof, were publicly distributed. The excesses, he said, began at the same hour in about 200 different places; the gangs of rioters were numbered; 120 young men were even armed in the same manner; the chief of police, Levendall, mingled with the gangs, exhorting them to attack the Jews. Levendall also kept troops for special purposes, and even terrorized the governor of Bessarabia, compelling him to do his bidding. Shamouin then announced his conclusion that Levendall himself had organized the excesses, and in doing so had merely carried out the plans of those in higher circles. It had been proved that the riots were permitted by the authorities, and that previous to Easter Day agents of the police had informed the populace that during three days the Jews were to be massacred. Attorney at Law Karabtschewski threw more light upon the instigators of the riots.

As the presiding judge emphatically denied the demands of counsel for both parties (with the exception of Shamakov and Romanenko) that the real instigators of the riots be cited, nearly all the lawyers retired from the case on Dec. 7. After this the examination of the numerous Jewish witnesses became a mere farce, as they were not permitted to say anything in reference to the general character of the riots, nor to the way in which they had been planned. Sentence was pronounced on Dec. 21 on the first group of the accused. Twenty-five out of the thirty-seven accused were found guilty of having attacked Jewish property with intent to rob, and of having made a compact to that effect with one another and with other persons whose guilt was not proved. Twenty-one of these twenty-five were charged with murder also, namely, Girtchin, the slayer of Baranovich, and Marasyuk, slayer of Galanter, who were sentenced to imprisonment at hard labor, the former for seven years, and the latter for five. Twenty-two of the accused were sentenced to hard labor for periods ranging from one to two years, and one was sentenced to six months' imprisonment. Twelve of the accused were discharged. No notice was taken of the forty-eight civil cases brought before the court.

The next session of the Chamber of Justice began on Feb. 22, 1904. A. Kuiban and K. Rotar, accused of murdering Abraham Cohen, were both acquitted on that charge, but were found guilty of taking part in the riots, and were sentenced to hard labor. The civil suit for damages was dismissed. Other cases were disposed of as follows:

Feb. 23, 1904. O. Dubchak and M. Polyakov, accused of murdering Kella Koza on April 20, 1903. Adjourned on account of the non-appearance of witnesses.

Feb. 24, 1904. Nikita Gutz and Isai Gitziu, convicted of inflicting heavy wounds upon Israel Ullman which caused his death. Gitziu was sentenced to imprisonment with hard labor for two and one-half years, and Gutz to imprisonment for one year. The civil suit for 25,000 rubles damages was won by the complainants.

Feb. 25, 1904. Jacob and Daniel Petresko, accused of murdering Judka and Itzek Cruchnikov, and of inflicting wounds upon Moisha Ushomirski. Sentenced to four years at hard labor in the mines.

Feb. 26, 1904. Fifty-eight persons, of whom nineteen were accused of taking part in the killing of Jankel Tupik Sura and Sisya Panarassi; the others, for taking part in the riots. The court adjourned without finishing the case. Six other cases of anti-Jewish riots in Kishinef were divided into three groups, and postponed until the next session of the court, May, 1904.

H. R.

KISHON (נחל קישון): River in central Palestine; it rises to the south of Mount Gilboa, flows through the middle of the plain of Esdraelon, traverses a narrow pass north of Mount Carmel, descends into the plain of Acre, and enters the sea a little north of Haifa. Its general course is northwestward. It drains nearly the whole of the fertile plain of Esdraelon and the adjacent hills, receiving its chief tributaries from the south. In Judges v. 19 it (or some of its tributaries) is spoken of as the "waters of Megiddo," and in Josh. xix. 11 (R. V.) it is, probably, the "brook that is before Jokneam" (comp. *ib.* xii. 22). The Arabs call it El-Muḳaṭṭa', a name which some identify with the ancient Megiddo (see G. A. Smith, "Historical Geography of the Holy Land," pp. 386–387; against this view see Moore, "Commentary on Judges," p. 158). The upper streams of the system are dry early in summer, except near the springs, much of the water being used in irrigation. After entering the plain of Acre, the Kishon flows sluggishly through thick jungles and extensive marshes. In the rainy season it is subject to sudden and dangerous floods, when the fords are often impassable.

The neighborhood of Megiddo (probably the modern Lejjun) is extremely treacherous. It was there that the host of Sisera was defeated by Barak, "in Taanach by the waters of Megiddo" (Judges v. 19). It was at the "brook Kishon," at the foot of Mount Carmel, that Elijah slew the prophets of Baal (I Kings xviii. 40). The place of Elijah's sacrifice has been identified with El-Maḥraḳah ("place of burnt sacrifice "), a rocky plateau near the east end of Carmel, from which a steep path descends to the river.

KISLEW: The ninth month of the Jewish calendar, corresponding to December. It has either twenty-nine or thirty days. In the Septuagint Kislew is called *Χασελεῦ*; in the Macedonian, *'Απελλαῖος*; on Palmyrene inscriptions, כסלול; and in Assyro-Babylonian, "Kislivu." Kislew is twice mentioned in the Old Testament; namely, in Zech. vii. 1 and Neh. i. 1. On the twenty-fifth of Kislew the Ḥanukkah festival (the *'Εγκαίνια* of the New Testament, see John x. 22) commences. According to II Macc. x. 6, the festival was celebrated in the manner of the Feast of Tabernacles; viz., by carrying branches and singing songs of praise; indeed, in II Macc. i. 9 the festival is specifically mentioned as "the feast of tabernacles in the month Casleu [Kislew]." According to the Mishnah (R. H. i. 3) the month of Kislew belongs to those six months in which messengers were sent out. See also I Macc. iv. 36-59; Josephus, "Ant." xii. 7, §§ 6-7.

E. G. H. B. P.

KISS, JOSEPH: Hungarian poet; born Nov. 8, 1843, at Mezöcsat. Being obliged by the death of his mother and financial ruin of his father to give up his college studies, he engaged in teaching. As tutor in the country he had an opportunity to become acquainted with the village Jews and the peasants; and this experience furnished him with the material for his poems. In 1868 he went to Budapest, as corrector in a printing-office; and in the same year he published a volume of poems, "Zsidó Dalok," or "Jewish Songs." Between 1870 and 1873 he edited a literary journal, "Képes Világ." This was suspended shortly after his marriage (April 28, 1873), and Kiss, desperately in need of money, wrote a sensational story, "Budapesti Rejtelmek," or "Secrets of Budapest," in eight volumes, under the pen-name "Szentesi Rudolf." Kiss's fortunes changed in 1875, when his ballad "Simon Judith" fell into the hands of the art critic and historian Franz Toldy, who introduced the unknown poet to the public. This poem marks the beginning of his popularity throughout the country.

From 1876 to 1882 Kiss was secretary of the Jewish community at Temesvár; then he accepted a position with the Hungarian-French Insurance Company, and on its failure, in 1889, he founded the popular literary periodical "A Hét" ("The Week"). His collected poems and his longer poetic tales have passed through numerous editions. Many of his poems have also been translated into German by Neugebauer, Albert Sturm, and especially by Joseph Steinbach, a physician at Franzensbad, who has issued two volumes of them, "Das Lied von der Nähmaschine" (Leipsic, 1884), and "Gedichte von Joseph Kiss" (Vienna, 1886, dedicated to Crown Prince Rudolph).

In his most important ballads Kiss deals chiefly with types of the Jewish and Hungarian people. The poem that Kiss wrote on the strong anti-Semitic movement in 1882, "Az ár Ellen" ("Against the Stream"), created such a sensation that it was translated by Max Falk into German, and found its way in a Hebrew translation into Russia, where it was sung even in many synagogues. Kiss's ballad "Jehova" also attracted unusual attention, being recited in 1893 by the actress Marie Jászai in thirty-five cities of Hungary.

S. L. V.

KISS AND KISSING: The custom of kissing is not found among savage races, among whom other forms of greeting, such as rubbing of noses, take its place. Among Orientals, who keep the sexes strictly separated, kissing on the mouth is not practised, except as an expression of strong affection (Cant. i. 2; comp. Gen. R. xc. 3). It is doubtful whether any reference to kissing on the mouth as a mere salutation can be found in the Old Testament, Gen. xli. 40 and Prov. xxiv. 26 being susceptible of another interpretation. The Oriental method was, and is, to kiss the cheeks alternately, placing the right hand sometimes upon the shoulder, sometimes under the chin, as did Joab with Amasa (II Sam. xx. 9). Kissing is, therefore, usually reserved as an expression of affection between relatives. Isaac desires to kiss Esau; Esau falls upon Jacob's neck and kisses him; Joseph kisses his brethren and the face of his dead father (Gen. xxvii. 27, xxxiii. 4, xlviii. 10, l. 1). Similarly, Orpah kisses Naomi (Ruth i. 14), and Laban his sons and daughters (Gen. xxxi. 55). Elisha desires to kiss his father and mother before following Elijah (I Kings xix. 20). Raguel kisses Tobit (Tobit vii. 6). The kiss occurs also, however, as a salutation between persons not closely related, but united by affection, as were Jonathan and David (I Sam. xx. 41). Hence royal or highly placed persons may desire to express their favor by kissing, perhaps the more formal salutation with the hand on the shoulder and the cheeks placed together, as in the case of Absalom or David (II Sam. xv. 5, xix. 39). The response to such a mode of salutation would be of the more respectful kind: in the case of Samuel kissing Saul (I Sam. x. 1) he may have kissed him either on the cheek as a mark of affection or on the hand as an expression of reverence. Kissing the feet is mentioned in the New Testament (Luke vii. 45), and, probably, is referred to in the Old Testament by the metaphorical expression to "lick the dust" (Ps. lxxii. 9; Isa. xlix. 23; Micah vii. 17; Isa. xlix. 23 seems to imply actual contact between feet and lips).

Biblical Instances.

The same reverence shown toward a king or conqueror was displayed toward gods as represented by their idols or symbols. Schwally ("Das Leben Nach dem Tode," p. 8) suggests that the kiss given by Joseph to Jacob when he saw that his father was dead was of the nature of worship of a divine being, as in Hosea xiii. 2, where reference is made to those who, when sacrificing, kissed the golden calf. According to I Kings xix. 18, Elijah could find only 7,000 men in all Israel that had not kissed Baal. A similar custom was found among the Arabs (see Wellhausen, "Reste," p. 109), and is retained to the present day in the Mohammedan ceremony of kissing the Kaaba at Mecca. When Job denies that his mouth has kissed his hand (Job xxxi. 27) he refers to an idolatrous practise in which the hand was kissed toward the object of worship, as the rising sun was greeted in ancient Greece. The idea appears to have been that in some way the breath was the life of man, and that giving a part of the breath to the object adored was in the nature of a sacrifice (comp. Adoration, Forms of).

According to the Rabbis, kissing was to be avoided as leading to lewdness; but it was permitted as an act of respect for dignity, as the kiss given by Samuel to Saul; after prolonged absence, as Aaron's kiss to Moses (Ex. iv. 27); and on parting, as in the kiss of Orpah (Gen. R. clxx.). Rabbi Tanḥuma added the kiss of relationship, as in the case of Jacob and Rachel (Gen. xxix. 11; Ex. R. v.). On the kiss as a salutation in the early Christian Church see Peace, Kiss of.

Death by God's Kiss.

By a beautiful image the death of God's favorites was supposed to be produced by a kiss from God ("bi-neshiḳah"). Abraham, Isaac, Jacob, Aaron, Moses, and Miriam were taken in this manner (B. B. 17a; Deut. R. xi.). This mode of departure is considered the easiest of all deaths, and is reserved for the most pious (Ber. 8a). According to the Rabbis, kissing an idol was not punishable by death (Sanh. 60b), and it would appear that the custom of kissing the feet, mentioned in the New Testament, was current among the Pharisees (B. B. 16a); it is mentioned that Rabbi Johanan was treated in this way (Yer. Ḳid. i. 61c). The Rabbis interpreted Cant. i. 2 as meaning that if one spends his time with teachers in whose presence he must keep his lips closed—the teachers of mystical law—all men will later kiss him on the mouth (Cant. R. 5b).

A curious explanation is given why every letter of the word וישקהו (Gen. xxxiii. 4) is marked by the Masorites with dots. Some of the rabbis explain that the kiss given by Esau was insincere (see Sifre, Num. 61), and even at the present day the expression "a kiss with dots" is used by Jews in Slavonic countries for an insincere kiss. According to Akiba the Medes kissed the hand only (Ber. 8b), and for this practise Simeon ben Gamaliel, who was opposed to kissing on the mouth, gives praise to all Oriental peoples (Gen. R. lxxiv. 1). The Zohar represents the son and disciples of Simeon b. Yoḥai as kissing his hand during life (i. 83b), while at his death his son Eleazar kissed his hand and Abba kissed the dust at his feet. The story is told that of two athletes who were struggling, the one about to be overcome kissed the hand of his adversary, and thereby saved himself by making the latter feel more kindly disposed (Tan., Wayiggash). Legend asserts that when Isaac Alfasi was at the point of death the young Maimonides, aged five, entered and kissed his hand (Gavison on Prov. xvii. 6). To this day it is customary in Smyrna for the relatives to kiss the hand of the dead when taking a last parting ("R. E. J." xxiv. 152).

Kissing still survives among Jews as a mark of reverence. It is a religious custom among them to kiss the ẓiẓit of the ṭallit when putting it on, the mezuzah at the door when entering and leaving, and the scroll of the Law when about to read or pronounce a blessing over it ("Bet Yosef," on Shulḥan 'Aruk, Oraḥ Ḥayyim, 28, in the name of Abudarham). On Simḥat Torah it is customary for the congregation to touch the scrolls of the Law with the ẓiẓit as they are being carried round, after which the ẓiẓit is kissed; in the old Sephardic ritual this was done when the scroll was carried round before Kol Nidre. Russian Jews are accustomed to use the index-finger for the mezuzah and the little finger for the scroll of the Law. If a Hebrew book is dropped it is customary, though not necessary, to kiss it.

A. J.

KISSINGEN: Bavarian health-resort; it has a total population of 4,024, including 333 Jews. Jews lived in Kissingen as early as the thirteenth century, and they suffered greatly from persecutions under Rindfleisch in 1298 (Salfeld, "Martyrologium," pp. 64-66).

In the town hall of Kissingen there is a helmeted and bearded figure of a man carved in stone. Report declares it to be in memory of a Jew who, during the siege of Kissingen by the Swedes, cast for the defenders bullets that never missed their mark. From that time he and his descendants went under the name of "Schwed." In 1650 and 1656 the Kissingen butchers complained in regard to the slaughtering of cattle and selling of meat by the Jews living in houses under the jurisdiction of the manorial lords; in 1725 the Kissingen citizens objected to the buying of property by the Jews. In 1775 and again in 1791 disagreements occurred between the Jews of the bishopric of Würzburg and the Jewish representative of Kissingen, Herz Löw.

There were three classes of Jews in Kissingen: Jews of the principality of Erthal, of Von Heller, and of the bishopric of Würzburg.

In 1792 the Jewish representative of Kissingen charged the Jews of Erthal with unwarranted interference, in matters of ritual, with the local synagogue; six years later the citizens of Kissingen complained of the increase in the Jewish population.

The present synagogue was dedicated in 1902. The synagogue built in 1853 is still standing, but is not used at present; it occupies the site of an earlier house of worship the history of whose origin is not known. In the year 1892 the Bavarian Jews of the district of Gersfeld were placed under the jurisdiction of that of Kissingen, which now includes about thirty communities. Of the rabbis who officiated there the names of the following are recorded: R. Moses (1799-1809), who was also ḥazzan; L. Adler (1840-52); Gabriel Hirsch Lippman (1852-64), who edited several works of Ibn Ezra; Moses Löb Bamberger (1867-99), who left many manuscripts (see the oration delivered at Rabbi Bamberger's funeral by Dr. S. Bamberger of Schrimm [Paks, 1900], his successor). The last-named edited the Midrash Leḳaḥ Ṭob to Ruth, and "Zikron Abraham," Abraham Bing's glosses to the Shulḥan 'Aruk, and wrote a commentary on the Pirḳe Abot, to be used as a text-book.

KITE. See Vulture.

KITTSEER, MICHAEL: Talmudic author; born in Kittsee (Köpcsény), Hungary, about 1775; died at Presburg Sept. 28, 1845. He was a disciple of Marcus Benedict, and, while not an officiating rabbi, he devoted his time to rabbinical studies. Strictly observant in his religious practise, he was tolerant of those who differed from him. He wrote "Shalme Nedabah" (see Ezek. xlvi. 12), Presburg, 1838, notes on various Talmudic treatises. The second part, published in Presburg in 1843, contains, besides notes on Talmudic treatises, notes on the Shulḥan 'Aruk and homilies.

BIBLIOGRAPHY: Benjacob, *Oẓar ha-Sefarim*, p. 589 (where the name is given as "Kitse"; the same spelling is found also in Zedner, *Cat. Hebr. Books Brit. Mus.* p. 414, and in Fürst, *Bibl. Jud.* ii. 190); *Allg. Zeit. des Jud.* 1845, p. 680; Weiss, *Abne Bet ha-Yoẓer*, pp. 63 *et seq.*, Paks, 1900.

D.

KITZINGER, JACOB BEN JOSEPH: Author and poet; lived in the second half of the sixteenth and at the beginning of the seventeenth century. He wrote "Ḥag ha-Pesaḥ" (Cracow, 1597), a commentary on the Passover Haggadah, with glosses by his father, a poem on the Passover ritual, and a long introduction. Thereto is added "Ḳeẓ ha-Pela'ot," on the end of the Exile and the coming of the Messiah.

BIBLIOGRAPHY: Fürst, *Bibl. Jud.* ii. 190-191; Benjacob, *Oẓar ha-Sefarim*, p. 169.

D. S. MAN.

KIẒWEH (= "Ḳiẓbah"): In popular parlance, the weekly portion allotted to the local poor; also charity in general. The word "ḳiẓbah," in New Hebrew (Pes. 71b), connected with the Biblical Hebrew "ḳeẓeb" (Jonah ii. 7), means "limit," so used of the toll (B. Ḳ. 113a) and of God's infiniteness (*e.g.*, "There is no limit to Thy years," in the "Musaf" prayer for New-Year). Lampronti does not give the word, nor does it occur in the older legal literature contained in the Shulḥan 'Aruk.

D.

KLAAR, ALFRED: Austrian writer; born at Prague Nov. 7, 1848; studied law and, later, German philology at the universities of Vienna and Prague (Ph.D. 1870). In 1868 he became assistant editor of the "Tagesbote aus Böhmen," and in 1873 was made dramatic and art critic of the "Bohemia" at Prague, in which city he settled. In 1885 he became privat-docent in German literature at the German technical high school at Prague. In 1901 he removed to Charlottenburg, near Berlin.

Of Klaar's numerous works may be mentioned: "Die Litteratur des Auslandes," Vienna, 1873; "Jos. Victor Scheffel," Prague, 1876; "Joseph II." *ib.* 1880; "Das Moderne Drama, Dargestellt in Seinen Richtungen und Hauptvertretern," Prague and Leipsic, 1883-84; "Franz Grillparzer als Dramatiker," Prague, 1891; "F. Schmeykal," *ib.* 1894; "Börne's Leben und Wirken," *ib.* 1899; "Der Faustcyclus," *ib.* 1899. He has written also several dramas, among which are: "Fahrende Komödianten," Prague, 1876; "Der Empfang," Dresden, 1888; "Diskretion," and "Wer Schimpft der Kauft," *ib.* 1890.

S. F. T. H.

KLACZKO, JULIAN (JUDAH): French publicist; born in Wilna, Russia, Nov. 6, 1825. His father belonged to one of the best Jewish families of Wilna, and instructed his son in Hebrew and in Polish. Klaczko early developed poetical ability, and a Hebrew song addressed to his parents, composed for the occasion of his bar miẓwah, was published as "Minḥat Todah" (Wilna, 1838). A collection of his Hebrew poems entitled "Ha-Duda'im," mostly imitations of Polish masters or direct translations, was published in Leipsic (1842), and a few songs from his pen appeared in "Pirḥe Ẓafon" (No. 2, 1844). He left Wilna, never to return, about 1840, and studied in Heidelberg and at the Königsberg University, graduating as Ph.D. (1846). Settling in Paris (1849), he became assistant librarian in the Bibliothèque du Corps Législatif and a constant contributor to the "Revue des Deux Mondes." His writings, in which he displayed great ability and an intense hatred for both Russia and Prussia, attracted the attention of the Austrian premier, Count Beust, who invited him to Vienna (1869) and appointed him Aulic Councilor in the Ministry of Foreign Affairs. Klaczko was also elected (1870) a member of the Galician Landtag, where he delivered a memorable speech advocating the cause of France and insisting that Austria should take her part in the war against Prussia. Failing in his purpose he left Austria in the same year and went to Italy, where he remained until 1875; then he returned to Vienna, where he now (1904) resides. In 1887 he was elected a corresponding member of the Académie des Sciences Morales et Politiques of the Institut de France. He severed his connection with Judaism early in his career.

Klaczko is considered one of the foremost representatives of Polish thought and aspiration in western Europe. He edited the weekly "Viadomosci Polski" in Paris (1858-60) and the correspondence of Mickiewicz; translated Piotrowski's "Memoirs of a Siberian"; and wrote: a short history of Polish literature in the nineteenth century, an English translation of which appears as an introduction to the English edition of Krasinski's "A Divine Comedy"; "Roczniki Polskie" (Polish Year-Book), a collection of his Polish writings in four volumes (Paris, 1865); "Etudes de Diplomatie Contemporaine" (1866); "Les Cabinets de l'Europe en 1863-64" (1866); "Une Annexion d'Autrefois: l'Union de la Pologne et de la Lithiouanie" (1869); "Les Préliminaires de Sadowa" (1869); "Les Deux Chanceliers" (1876); "Causerie Florentine" (1880); "Rome et la Renaissance, Jules II." (1898); etc.

H. R. P. WI.

KLACZKO, LEVI JERAHMEEL: Russian educator; born in Wilna June 28, 1840. Formerly a school-teacher in Berdyansk, Crimea, he now follows the same calling in Odessa. He wrote "'Erek Tefillah," a critical investigation of the history and the language of the prayers (Wilna, 1868); "Talmud Torah," a religious and historical primer in Hebrew and Russian (Warsaw, 1884; 4th ed., 1890); "Ha-Omen," elementary Hebrew primer, with a Russian glossary (*ib.* 1889); "Rishon le-Ḥinnuk," Hebrew and Russian (*ib.* 1892); and "Mesillat Yesharim," a Russian-Hebrew school-book (3d ed., *ib.*

1898). He has also contributed numerous articles to Hebrew and Russian periodicals, notably one on the Siddur of the Jews of Crimea, in "Ha-Karmel," viii. 133 *et seq.*

Bibliography: *Ha-Shaḥar*, ix. 136, 335; Sokolow, *Sefer Zikkaron*, p. 100, Warsaw, 1890; Zeitlin, *Bibl. Post-Mendels.* p. 173.
H. R. P. Wi.

KLAPP, MICHAEL: Austrian journalist and author; born in Prague 1834; died Feb. 25, 1888. He removed in 1855 to Vienna, where he devoted himself to journalism. In 1859–60 he was editor of the literary section of Kuranda's "Ostdeutsche Post," and later special correspondent in Italy and Spain of the "Neue Freie Presse." Subsequently, together with Jacob Herzog, he founded the "Montagsrevue," with which he continued to be associated till his death.

Of Klapp's works may be mentioned: "Komische Geschichten aus dem Jüdischen Volksleben," Berlin, 1859; "Die Flagellanten"; "In London Unter den Feniern," Troppau, 1869; "Revolutionsbilder aus Spanien," Hanover, 1869; "Reisetagebuch des Schah von Persien," 1874; the novels: "Zweierlei Juden," Vienna, 1870, and "Die Bankgrafen. Roman aus der Schwindelzeit," 2 vols., Bern, 1877. He wrote also several comedies, among which was "Rosenkranz und Güldenstern" (Vienna, 1885), which was produced on all the stages of Germany after its presentation at the Vienna Burgtheater, where it could be played only without mention of the name of its author.
S. L. Y.

KLATZKO, MORDECAI BEN ASHER (surnamed **Meltzer**): Russian rabbi and author; born in Wilna 1797; died in Lida July 2, 1883. He was a descendant of Rabbi Mayer Katzenellenbogen of Padua. Klatzko received the usual Talmudical education and soon distinguished himself by his keen mind and retentive memory. After lecturing privately for some time in his native city he was appointed (1831) chief teacher in the newly established yeshibah founded by Mayla. The stories circulated about difficulties between him and the great Talmudist Israel Lipkin, who for a short time was a subordinate teacher at the yeshibah, are now mostly discredited.

In 1844 Klatzko was chosen dayyan of Wilna; he retained his positions at the yeshibah and in the rabbinate until 1852, when he was called to Kalvariya, government of Suwalki, to succeed Löb Shapiro of that place, who had become rabbi of Kovno. Klatzko remained in Kalvariya till 1864, when he was elected to the rabbinate of Lida, government of Wilna, which position he held until his death.

Klatzko was considered one of the most eminent rabbis of Russia. He had many pupils, and probably ordained more young rabbis than any of his contemporaries. He was the author of novellæ on the Talmud and the Shulḥan 'Aruk, some of which were published posthumously by his son under the title "Tekelet Mordekai" (Wilna, 1889). This work contains his novellæ on Berakot, Mo'ed, and the first part of the Shulḥan 'Aruk. The work was compiled by his pupil Aba Joseph Triwosch, who wrote down what he received from him orally.

Bibliography: H. N. Steinschneider, in *Oẓar ha-Sifrut*, iv. 531–541; idem, '*Ir Wilna*; Triwosch, biography of Klatzko appended to *Tekelet Mordekai.*
L. G. N. T. L.

KLAUS (German, "Klause," from the medieval Latin "clusa" = cloister): An institution where Talmudic scholars are given free lodging, and often a stipend in addition, in order that they may devote all their time to the study of the Talmud (sometimes also to teaching and lecturing). From the seventeenth century it became a custom for wealthy people to donate funds for the perpetual maintenance of such institutions (called sometimes Bet ha-Midrash). It is said (Gans, "Ẓemaḥ Dawid," part i., ad 5352 [1592]) that Rabbi Löw ben Bezaleel founded the klaus of Prague, which is still in existence, though used only as a synagogue. The klaus at Vienna was founded by Zechariah Levi in 1656 (Kaufmann, "Letzte Vertreibung der Juden aus Wien," p. 67, Vienna, 1889); and a similar institution was established at Altona about 1690, when Ẓebi Ashkenazi was in office (Emden, "Megillat Sefer," p. 11, Warsaw, 1896), to which Benjamin Levy of London bequeathed a legacy in 1704 ("Jewish Chronicle," July 31, 1903). Bermann (Berent Lehmann) of Halberstadt founded in 1703 the klaus still existing in that city (Auerbach, "Gesch. der Jüdischen Gemeinde Halberstadt," pp. 61 *et seq.*, Halberstadt, 1866); Lemle Moses Reinganum founded that of Mannheim, 1706 (Löwenstein, "Gesch. der Juden in der Kurpfalz," pp. 170 *et seq.*, Frankfort-on-the-Main, 1895); its funds are at present used for the maintenance of a second rabbi. About the same time Samson Wertheimer founded a klaus at Frankfort-on-the-Main (Kaufmann, "Samson Wertheimer," p. 72, Vienna, 1888). Jost Liebmann and his wife, Esther, founded in Berlin a klaus for their nephew and son-in-law, Aaron ben Benjamin Wolf, about 1701, which was discontinued about 1712. Somewhat later Veitel-Heine Ephraim founded in the same city a klaus which is still in existence, although under entirely different rules, and known as the "Veitel-Heine Ephraim'sche Lehranstalt." The Breslau, Hanover, Lissa, and other German congregations possess institutions of the same kind. In Wolfenbüttel various members of the Samson family founded similar institutions; these in 1807 were united to form a school which is still in existence as a Jewish high school (Ehrenberg, "Die Samson'sche Freischule," in "Orient, Lit." 1844, No. 5; separately printed, Leipsic, 1844; Zunz, "Samuel Meyer Ehrenberg," Brunswick, 1853). In Leghorn, which had a wealthy Jewish community, various institutions existed intended to support prebendaries who should devote their lives to Talmudic studies, occasionally delivering lectures; as was often the case in other parts of Europe, with such an institution, called "midrash" or "bet ha-midrash," a synagogue was usually connected. In the midrash founded by Franco, Elijah Benamozegh held a position (Sokolow, "Sefer Zikkaron," pp. 128 *et seq.*, Warsaw, 1889). Wealthy members of the Leghorn community often supported such a midrash in Jerusalem (see Ḥagiz, Jacob, and Ḥa-

GIZ, MOSES), and Oriental Jews still maintain similar institutions there (Luncz, "Luaḥ Ereẓ Yisrael, 5661," p. 140, Jerusalem, 1900).

A modern institution of a similar character was founded by Sir Moses Montefiore in Ramsgate in 1869. It was for a short time a college for the education of rabbis; but now, although still maintained under the name "Judith Montefiore Theological College," it is merely a home for rabbinical scholars (Harris, "Jewish Year Book," 1903).

The Ḥasidim call their synagogue "klaus"; and each of their miracle-workers maintains a klaus of his own, as do also his followers in other cities.

D.

KLAUSENBURG (KOLOZSVÁR): Royal free city of Kolozs county, Hungary; formerly capital of the grand duchy of Transylvania (1691–1848). Until 1848 no Jews were legally allowed to live in Klausenburg; but the law of 1526, by which the Jews were expelled from Hungary and Transylvania, was not strictly carried out. In 1578 the Transylvanian Diet decreed that the Jews might stop temporarily in the cities when visiting the fairs. Goods are mentioned as being imported by Jews into Klausenburg as early as 1591. When Klausenburg was captured by the imperial general Georg Basta, Sept. 13, 1600, all the Jews in the city were slain. This did not deter others from visiting the fairs there; for in the annual balance of the city customhouse for the year 1631 the "Jews' linen" is especially mentioned. About the middle of the seventeenth century an edict of the ruler ("Approbatæ Constitutiones Regni Transylvaniæ," pars v., ed. 82) assigned to them for their exclusive habitation Carlsburg, the temporary residence of the princes of Transylvania. Thence they continued to visit the fairs of Klausenburg so frequently that the general city council on March 7, 1693, set apart for them an especial place in the market.

Beginnings of Jewish Residence.

With the act of exclusion still in force, a Jew, Löbl (Leopold) Deutsch by name, succeeded in settling in the city about 1770–80. This marks the beginning of a lengthy struggle for the right to settle and trade in Klausenburg between the Jews and the municipal authorities, the latter being in league with the state government. Supported by an imperial decree of 1781, which in accordance with one of an earlier date restricted the right of settlement of the Jews in Transylvania to Carlsburg, the authorities steadily refused to admit Jews into Klausenburg. But the latter had obtained a footing in the city. Although Löbl Deutsch and those that followed him even fifty years later were threatened with expulsion, this threat was only partially carried out, and a certain number of Jews remained permanently in the city, though merely on sufferance. This struggle ended only in the stormy days of 1848.

The number of Jews in Klausenburg gradually increased. In 1780 there is no official record of a single Jew in the city, although in the county of Kolozs eight Jews were found. But in 1785 there were twelve Jews in a population of 9,703 persons. Within fifty years (1835) the number rose to 109; in 1846 there were fifty-six Jewish families, sixteen of which, however, being new arrivals, were to be expelled. About fifty years later (1891) the Jews in Klausenburg numbered 2,414 in a population of 32,756, and in the county of Kolozs 4,313 in a population of 192,443. Ten years later again (1901) there were 4,730 Jews in the city in a population of 49,295.

Organization.

The first traces of communal life date from the second decade of the nineteenth century. At that time Joseph Kain, reputed to have been versed in the Talmud, is mentioned as "ecclesiasticus." An actual rabbi, however, was out of the question, since even in 1830 the community itself was not officially constituted. But since the ḥebra ḳaddisha was founded in 1837, the formal organization of the community must be placed somewhere between these two dates. It was only a branch congregation, which, like the other congregations of Transylvania since the middle of the eighteenth century, was subordinated to the general rabbinate of Carlsburg. When in 1852 Hillel (Heinrich) Lichtenstein was called as first rabbi to Klausenburg, the district rabbi, Abraham Friedmann, protested, recognizing Lichtenstein merely as deputy rabbi. The latter left Klausenburg two years later. Until 1861 the cantor, Marcus Klein, who was versed in the Talmud, officiated as rabbi. He was succeeded by Philipp (Feisch) Fischmann (1861–62). From 1863 to 1877 Abraham Glasner of Monor (formerly at Gyönk) filled the position. After his death there was a split in the community. At the time of the Jewish Congress of 1868–69, the members believing in Reform had separated from the rest of the congregation, which adhered to the Orthodox tenets, and had formed a distinct congregation, which, however, existed for a short time only. The present Reform congregation, founded in 1880 was served by Alexander Rosenspitz (formerly in America), 1887–88; by Jacob Klein, 1888–90; and since 1891 by Mathias Eisler. In the Orthodox congregation Moses Glasner succeeded his father. Their synagogue was built in 1851; the temple of the Reform congregation in 1887.

At the beginning of the nineteenth century the Jews of Klausenburg had no cemetery, since they could acquire no real estate. In 1843 they were allowed to fence in, together with an adjacent piece of land which they had purchased, the place where they buried their dead. The Reform congregation has its own cemetery.

The following institutions are supported by the Jews of Klausenburg: a parochial school (since 1860); a Talmud society, "ḥebrat shas"; a literary society; and a women's philanthropic society. It is worthy of notice that the University of Klausenburg is one among the few universities of Europe where lectures on post-Biblical Jewish literature are delivered; such lectures have been delivered there since 1893.

D. M. EI.

KLAUSNER, ABRAHAM: Austrian rabbi and ritualist; flourished at Vienna in the second half of the fourteenth century. He shared the rabbinical office at Vienna with Meïr b. Baruch ha-Levi (Jacob Weil, Responsa, No. 151). Aaron Blumlein and Shalom, rabbi of Wiener-Neustadt, were among his contemporaries. Two of his pupils were Isaac Tyrnau and Jacob Mölln. His collection of ritual customs ("minhagim"), with his notes, was published at Riva di Trento in 1559. The editor of Mölln's "Minhage Maharil" added in several cases some of the minhagim collected by Klausner. His responsa are referred to by Isserlein in his "Pesaḳim u-Ketabim" (No. 6).

G. M. Sel.

KLAUSNER, JOSEPH: Russian Hebrew writer; born at Olkeniki, government of Wilna, Aug. 14, 1874. In 1885 he went to Odessa and became a pupil in the yeshibah there, studying both Talmudic and secular subjects. From 1897 to 1902 he studied philosophy and Semitic languages at the University of Heidelberg, and, returning to Russia, became (1903) editor of the Hebrew monthly "Ha-Shiloaḥ" and of other publications of the Aḥiasaf Society. In 1904 he was appointed editor of the Warsaw department of the "Oẓar ha-Yahadut," a Hebrew encyclopedia. Klausner is a versatile and prolific writer and a sound critic, and there are few Hebrew publications to which he has not contributed. He is one of the champions of the modernization of the Hebrew language and literature.

Klausner has written the following: "Ẓiyyun la-Meshorer Gordon," on J. L. Gordon as a poet, 1895; "Sefat 'Eber Safah Ḥayyah," on Hebrew philology, in "Oẓar ha-Sifrut," Cracow, 1896; "Ruḥot Menashshebot," criticisms, in "Ha-Zeman," Warsaw, 1896; "Ha-Adam ha-Ḳadmon," on anthropology, Warsaw, 1900; "Millon shel Kis," pocket-dictionary of modern Hebrew (with Grazowski), *ib.* 1903. In Yiddish, he has written "Joseph Nassi," Berdychev, 1901; and in Russian, "Novo-Yevreiskaya Literatura," on the Hebrew literature of the nineteenth century, *ib.* 1900; "Duchovny Sionism," on spiritual Zionism, St. Petersburg, 1900. He is the author also of "Die Messianischen Vorstellungen des Jüdischen Volkes im Zeitalter der Tannaiten," Cracow, 1903.

H. R. A. S. W.

KLEEBERG, CLOTILDE: Pianist; born at Paris June 27, 1866, of German parents. She studied with Mmes. Retz and Massart at the Conservatoire, where, at the age of eleven, she received a medal as well as the highest honors in the competitive examination. The following year she made her début at the "Concerts Populaires," playing Beethoven's C Minor Concerto and several difficult compositions by Chopin. In 1881 she made a successful tour through Denmark, Russia, Austria, and Holland, and in 1883 appeared in London, where she soon became a popular favorite. After establishing her reputation abroad she, in 1887, made her début in Germany, where her graceful and poetic interpretation of the great masters insured her a warm welcome.

In 1894 she was named "Officier de l'Académie," and in 1898 she revisited England, where she achieved a series of brilliant triumphs. Her repertoire is very extensive, including works of composers ranging from Bach to Liszt.

Bibliography: Ehrlich, *Celebrated Pianists of the Past and Present Time*; Baker, *Biog. Dict. of Musicians*, New York, 1900.

S. J. So.

KLEEBERG, MINNA COHEN: German-American poetess; born in Elmshorn, Holstein, Germany, July 21, 1841; died in New Haven, Conn., Dec. 31, 1878. Her father, Marcus Cohen, a physician, gave her a careful education. Her poetic endowment showed itself early. At fourteen she wrote for a journal in Hamburg, and later for one in Budapest and for L. Stein's "Der Freitag-Abend." After her marriage in 1862 to Rabbi L. Kleeberg, she lived in Rhenish Prussia, where she moved in a circle of literary men, chief among them Emil Rittershaus.

In 1865 her poem, "Ein Lied vom Salz," a plea for the removal of the tax on salt in Prussia, spread her reputation to wider circles. Her abiding interest in public and patriotic questions was characteristic. The Franco-Prussian war, the Fifteenth Amendment, Friedrich Hecker, the emancipation of women, and the cause of liberty and democracy were among the themes that stimulated her muse. Jewish national and religious feelings were equally a source of inspiration. The aspersions cast upon the Jewish race by Wagner and Billroth she repelled with indignant vigor. The most attractive of her verses, however, are those on the joys and sorrows of domestic life, especially the poems addressed to her children.

In 1866 Minna Kleeberg emigrated to the United States, living until 1877 in Louisville, Ky., where Dr. Kleeberg had been elected rabbi of a congregation, and removing thence to New Haven. A collection of Minna Kleeberg's poems, "Gedichte," was published in 1877; and she was a frequent contributor to "Das New-Yorker Belletristische Journal."

Bibliography: *Appleton's Cyclopædia of American Biography*; Morais, *Eminent Israelites of the Nineteenth Century*; Nahida Remy, *Das Jüdische Weib*; Kayserling, *Die Jüdischen Frauen*, p. 243; *Das New-Yorker Belletristische Journal*, Jan. 10, 1879; *Deborah*, 1879.

A. H. S.

KLEIN, ADOLPH: German medical author; born at Merseburg-on-the-Saale May 18, 1829. He was educated at Leipsic (M.D. 1851), and practised medicine at Königsberg from 1859 to 1870. In the latter year he adopted a journalistic career, becoming successively editor of a large number of papers, among them "Das Rothe Kreuz," "Deutsche Frauenblätter," "Berliner Eisenbahn-Zeitung," and "Gross-Lichterfelder Wegweiser." Most of Klein's contributions to literature have been on medical and sociological topics. His more important writings are: "Anthropologie und Makrobiotik"; "Ueberwindung des Wissenschaftlichen Materialismus"; "Philosophie und Anthropologie"; "Der Chemisch-Mechanische Theil des Menschlichen Organismus und Seine Lebenskraft"; "Geheimnissvolle Funktionen der Sympathischen Ganglien"; "Die Magnetischen Funktionen des Eisengehaltes im Blute"; "Die Geistbewusste Persönlichkeit und Ihre Unvergänglichkeit als Weltprinzip"; "Wissenschaftliche Beiträge zum Hypnotismus"; "Religions-Einigung"; "Weshalb Theologie, Materialismus und Spiritualismus in Bezug auf das Menschenräthsel zu Falschen

Schlüssen Gelangen?"; "Sozialpolitische Beiträge zur Judenfrage."

A few of his works, of marked liberal tendencies, have been printed in New York under the pseudonym "Dr. Nielk Floda."

Bibliography: *Das Geistige Berlin*, i. 244-245, Berlin, 1897.

s. I. G. D.

KLEIN, CHARLES: English dramatist; born at London Jan. 7, 1867; educated at the North London Collegiate School. Klein is the author of "A Mile a Minute" (produced by Minnie Palmer); "The District Attorney"; the libretto of "El Capitan" (produced by De Wolf Hopper); "Dr. Belgraff" (produced by Wilton Lackaye); "Heartsease" (produced by Henry Miller); "The Charlatan" (produced by De Wolf Hopper); "Hon. John Grigsby" (produced by Sol. Smith Russell); "A Royal Rogue"; "The Auctioneer"; "Mr. Pickwick"; and a number of other plays.

A. E. Ms.

KLEIN, FELIX: German mathematician; born at Düsseldorf April 24, 1849; educated at the University of Bonn, where he became assistant in the institution of physics in 1866. In 1868 he received his degree of Ph.D. and took a postgraduate course at Berlin and Göttingen. He became privatdocent at Göttingen in 1871, and in the following year was elected professor of mathematics at the University of Erlangen. In a similar capacity he went to the technical high school at Munich in 1875, to the University of Leipsic in 1880, and to the University of Göttingen in 1886. In 1893 he represented the German empire as a member of the educational department at the Columbian Exposition at Chicago, and in 1898 he represented his country at the conference in London which established the International Catalogue of Scientific Literature.

Klein was appointed one of the editors for the publication of Plückler's unpublished works. Since 1875 he has been coeditor with A. Mayer of "Die Mathematischen Annalen." Of his many works may be mentioned: "Vergleichende Betrachtungen über Neuere Geometrische Forschungen," Erlangen, 1872; "Ueber Riemann's Theorie der Algebraischen Funktionen und Ihrer Integrale," Leipsic, 1882; "Vorlesungen über das Ikosaëder und die Auflösung der Gleichungen vom 5. Grad," *ib.* 1884; "Vorlesungen über die Theorie der Elliptischen Modulfunktionen," with Fricke, *ib.* 1890-91; "Einleitung in die Höhere Geometrie," Göttingen, 1893; "Vorträge über Ausgewählte Fragen der Elementar-Geometrie," Leipsic, 1895; with Sommerfeld, "Ueber die Theorie des Kreises," *ib.* 1897.

Bibliography: *Meyers Konversations-Lexikon*; *Brockhaus Konversations-Lexikon.*

KLEIN, HERMANN: English musical critic; born at Norwich July 23, 1856. He studied singing under Manuel Garcia from 1874 to 1877, and in 1888 was appointed professor of singing at the Guildhall School of Music, London. Having begun his career as a musical critic as early as 1876, he was appointed to "The Examiner" in 1879, and in 1881 to the "Sunday Times." He was also connected in a similar capacity with the "Manchester Guardian" and "The Scotsman." Klein is the author of "Musical Notes," London, 1886-89, and joint editor of Manuel Garcia's "Hints on Singing," 1894. Klein has composed several vocal pieces. He is a fellow of the Institute of Journalists of London. In 1902 Klein removed to New York.

Bibliography: Harris, *Jewish Year Book*, 1901-2.

J. M. W. L.

KLEIN, HUGO: Hungarian writer; born at Szegedin July 21, 1853; educated at the University of Budapest. He was for several years editor of the "Ungarische Lloyd," and later dramatic and art critic of the "Neue Pester Journal." In 1883 he removed to Vienna, where he became connected with the leading journals, and is at present (1904) editor of the "Schöne Blaue Donau."

Klein is the author of: "Das Rendezvous in Monaco" and "Der Blaustrumpf," operettas, 1883; "Im Puszta Lande," 1884; "Blinde Liebe" and "Zauberkünste," 1890; "Die Hexenpfeifer," 1900. He has written also the librettos to "Der Liebe Augustin" (music by Brandl) and "König und Spielmann" (music by Kerner), which latter has been translated into Hungarian. He embraced Christianity.

s. F. T. H.

KLEIN, JOSEPH. See Kiss, Joseph.

KLEIN, JULIUS: Hungarian rabbi; born Aug. 2, 1850, at Zichyfalva; died July 24, 1895, at Alt-Ofen; educated at the gymnasia at Kecskemet and Nagy-Károly, the Talmud schools of Mayer Perls and Israel Hildesheimer, and the universities of Vienna and Tübingen. At the age of twenty-two he was called as rabbi to Szigetvar, and thence, in 1887, to Alt-Ofen.

Klein was one of the first to introduce preaching in Hungarian into the synagogue service. His chief work, besides his collection of material for a history of the Jewish community of Alt-Ofen, which appeared in the periodical "Magyar Zsidó Szémle," was his translation of the Talmud into Hungarian, with notes. Of this only the first part, the treatise Berakot, was published (Budapest, 1885).

Bibliography: *Egyenlöseg*, 1895, No. 30.

s. L. V.

KLEIN, JULIUS LEOPOLD: Hungarian poet and writer; convert to Christianity; born at Miskolcz, Hungary, 1810; died at Berlin Aug. 2, 1876; educated at the gymnasium at Budapest and the universities of Vienna and Berlin. After an extended trip through Italy and Greece, he returned to Berlin, where he completed his studies and graduated as doctor of medicine. He established a practise in the German capital, but soon relinquished it and devoted his time entirely to literary work.

He wrote several dramas, which did not have much success. His influence as a critic was more pronounced, although his greatest work, "Gesch. des Dramas" (13 vols., Leipsic, 1865-76; Index by Ebner, 1886), was never finished. Klein's collected works appeared in seven volumes under the title "Dramatische Werke," *ib.* 1871-72. Among his tragedies may be mentioned "Maria von Medici," 1841; "Luines," 1842; "Zenobia," 1847; "Moreto," 1859; "Maria," 1860; "Strafford," 1862; and "Heliodora," 1867; and among his comedies, "Die Herzogin," 1848; "Ein Schützling," 1850; "Voltaire," 1852.

Bibliography: *Brockhaus Konversations-Lexikon*; *Meyers Konversations-Lexikon.*

S. F. T. H.

KLEIN, MAX: Hungarian sculptor; born Jan. 7, 1847, at Göncz; son of a poor country schoolteacher. He was apprenticed first to a grocer at Kaschau, and then to a watchmaker at Miskolcz; but his love for art caused him to give up his trade in 1861, and he went in the most indigent circumstances to Budapest, where he entered the studio of the sculptor Professor Sandház. In 1863 he went to Berlin, and then to Rome, and, in spite of the utmost difficulties, finally succeeded in achieving an honored position among modern sculptors. His group "Old Germans in the Roman Circus," exhibited at the Kunstausstellung at Berlin in 1878, created a sensation by the boldness and energy of its realism, which is a characteristic of Klein's work. This group attracted attention at the Paris Salon also, and was awarded a gold medal at the Internationale Kunstausstellung at Munich, assuring Klein's position in the art world. Klein's sketches received the first prize in the competition for statues, in heroic size, of the ancient philosophers, for the Joachimsthaler Gymnasium at Berlin. He executed also the two large busts of Field-Marshal Manteuffel and General Werder in the Ruhmeshalle at Berlin.

The following are the best known of Klein's works: "Hagar and Ishmael"; "Samson at the Feet of Delilah"; "The Anchorite"; "The Conquered"; "The Fisher's Dream"; "The Deluge"; and the fine fountain group in the court of the first National Savings-Bank building at Budapest.

Bibliography: *Pallas Lex.* x.

S. L. V.

KLEIN, MORITZ: Hungarian rabbi; born July 7, 1842, at Miskolcz; studied philosophy at the University of Prague, attending at the same time lectures on Jewish theology by Chief Rabbi Solomon Rapoport. In 1863 he received his Ph.D. degree and his rabbinical diploma, and was appointed director of the Jewish communal school in his native city, where he officiated also as preacher at the Great Synagogue. In 1869 he was called as rabbi to the Reform congregation ("Congress-Gemeinde") of Ungvar; in 1876 he went to Papa; and in 1880 he accepted a call as chief rabbi to Nagy-Becskerek, which office he still (1904) holds. He is a member of the board of examiners of the Rabbinical Seminary at Budapest.

Klein's works include Hungarian translations of (1) Maimonides' "Moreh Nebukim," under the title "A Tévelygök Utmutatója," in three volumes, with notes (1878–91), and (2) Jedaiah Penini's "Beḥinat 'Olam," under the title "A Lélek Tragediája" (1901).

S. L. V.

KLEIN, PHILIP: American rabbi; born May 22, 1848, at Baracska, Hungary. He was educated in the Talmudical schools of his native country and continued his studies in the gymnasium of Presburg and in the universities of Vienna, Berlin (Ph.D.), and Jena. After receiving his rabbinical diploma from B. H. Auerbach of Halberstadt, he became rabbi at Libau, in Courland, Russia (1880–90). In 1890 he emigrated to New York, where he was appointed rabbi of the Hungarian congregation Oheb Zedek, perhaps the most important position among the East Side congregations of New York. This position he still (1904) holds.

Bibliography: *American Jewish Year Book*, 1903–4, p. 69.

A.

KLEIN, SOLOMON: Austrian oculist; born at Miskolcz, Hungary, Aug. 12, 1845; M.D., Vienna, 1870. Since his graduation he has practised in the Austrian capital. In 1883 he became privatdocent of ophthalmology, and in 1895 department chief at the General Dispensary, and oculist at the Rothschild Hospital, as well as at the Institute for the Blind at the Hohe Warte, near Vienna. In 1902 he was appointed assistant professor at the University at Vienna.

Klein has written many papers in the medical journals, as well as articles for Eulenburg's "Real-encyklopädie der Gesammten Heilkunde," Nagel's "Jahrbuch für Ophthalmologie," etc. Among his independent works may be mentioned: "Die Anwendung des Augenspiegels," Vienna, 1876; "Augenspiegelstudien bei Geisteskranken," *ib.* 1877; "Grundriss der Augenheilkunde," *ib.* 1886; and "Das Auge und Seine Diätetik," Wiesbaden, 1892.

Bibliography: Pagel, *Biog. Lex.* 1901.

S. F. T. H.

KLEIN, SOLOMON: French rabbi; born at Bischheim, Alsace, Oct. 14, 1814; died at Colmar, Alsace, Nov. 10, 1867. He was successively district rabbi at Bischheim (1839–41), Durmenach (1841–48), and Rixheim (1848–50). From 1850 to 1867 he was grand rabbi at Colmar, which rabbinate had been occupied by Hirsch Katzenellenbogen, Simon Cahn, and Seligmann Goudchaux.

Klein was the author of the following works: "Nouvelle Grammaire Hébraïque Raisonnée et Comparée," Durmenach, 1846; "Traduction Française et Annotation du Sefer Yesodot ha-Maskil de R. David ben Bilia du Portugal, XIV^e Siècle," in the "Dibre Ḥakamim" of Eliezer Ashkenazi, Metz, 1849; "Notions Elémentaires de la Grammaire Hébraïque"; "Guide du Traducteur du Pentateuque," 1851; rules for the Ḥazzan and for the Shoḥeṭ, in Hebrew and German, 1855; "Le Judaïsme ou la Vérité sur le Talmud" (German transl. by Mannheimer), Mülhausen, 1859; "M. Philippson et Sa Traduction de la Bible," in "Univ. Isr." 1860; "Recueil de Lettres Pastorales et de Discours d'Inauguration," Colmar, 1863; "Cours de Thèmes et de Versions Hébraïques à l'Usage des Commençants," Mülhausen, 1866; "La Justice Criminelle chez les Hébreux," published posthumously in "Arch. Isr." 1898.

S. J. Ka.

KLEIN, THÉODORE: French physician; born in Durmenach, Upper Rhine, May 30, 1845; died in Paris May 4, 1902; son of the chief rabbi of Colmar. After completing his studies at the college of Colmar, Klein went to Paris, where he engaged in the study of medicine. While still a student he together with Emil Javal translated into French Helmholtz's "Handbuch der Physiologischen Optik." In 1873 he took his degree of M.D., his thesis being "L'Influence de l'Eclairage sur l'Acuité Visuelle," which was awarded a prize by the medical faculty of Paris. In 1871 he published "La Thérapeutique de l'Œil au Moyen de la Lumière Colorée," a French translation of the German work by Boehm. He contributed to "L'Opinion Nationale," editing its scientific page from 1872 to 1876, and also to the "Revue des Sciences Médicales" and other medical journals. He further wrote: "Le Diabète Sucré," 1876; "Le Psautier du Dr. Graetz," 1877; "La Circoncision," 1888; Sur l'Origine de Quelques Idées des Délirantes dans la Paralysie Générale," 1888; "Polémiques Nombreuses dans l'Univers Israélite." The minister of the interior decorated him in 1900 with the Golden Medal for his long and disinterested services in behalf of the poor.

Klein was a member of the Jewish Consistory of Paris, and during eighteen years president of the Société de l'Etude Talmudique. He was the representative, both within and without the consistory, of ultra-Orthodoxy; and as he was a profound Talmudist, his views carried great weight in the deliberations of the various societies of the Jewish community in the French capital.

KLEIN, WILHELM: Austrian archeologist; born Nov. 28, 1850, at Karánsebes, Hungary. He first studied Jewish theology and then philosophy at Vienna and Prague. The Austrian government subsequently sent him to Italy and Greece, where he engaged in archeological investigations, studying especially antique pottery. Klein is professor of archeology at the German University of Prague, and a member of the Gesellschaft zur Förderung Deutscher Wissenschaft, Kunst, und Literatur in Böhmen, as well as of the German Archeological Institute. He has published: "Euphronius" (1886); "Die Griechischen Vasen, mit Meisterinschriften" (2d ed., Vienna, 1887); and "Praxiteles" (1897).

S. A. Ki.

KLEMPERER, GEORG: German physician; born at Landsberg-on-the-Warthe May 10, 1865; son of Wilhelm Klemperer; studied at the universities of Breslau, Halle, and Berlin (M.D. 1885). From 1887 to 1896 he was assistant to Professor von Leyden; he was admitted, as privat-docent in 1889, to the medical faculty of the University of Berlin, where in 1895 he became professor.

Klemperer has written many essays in the professional journals, and since 1899 has been editor of the "Therapie der Gegenwart." Among his works may be mentioned: "Grundriss der Klinischen Diagnostik," Berlin, 1890 (8th ed. 1900); "Untersuchungen über Infection und Immunität bei Asiatischer Cholera," *ib.* 1894; "Untersuchungen über Gicht und Harnsäure Nierensteine," *ib.* 1896; "Justus von Liebig und die Medizin," *ib.* 1899.

BIBLIOGRAPHY: Pagel, *Biog. Lex.* 1901.

S. F. T. H.

KLEMPERER, GUTTMANN: Austrian rabbi; born 1815 at Prague; died at Tabor, Bohemia, Jan. 20, 1882. On his mother's side he was a descendant of Yom-Ṭob Lipmann Heller. He completed his Talmudic studies at Presburg as a pupil of Moses Sofer, and he also passed the gymnasium examinations at the lyceum (Protestant gymnasium) in the same place. On his return to Prague he attended courses in philosophy at the university and the Talmudic lectures of Solomon Judah Rapoport. In 1844 he went as rabbi to Tabor, where he labored until his death. At Tabor he introduced the regulated worship of the Prague Temple.

Of Klemperer's numerous published writings the following may be mentioned: (1) Speech on the occasion of the abolition of the Jews' tax in Bohemia, Prague, 1847; (2) "Ḥayye Yehonatan," biography of Jonathan Eybeschütz, *ib.* 1858; (3) "Jüdischer Geschichtskalender" ("Pascheles Volkskalender," 1855–59); (4) "Der Patriarch R. Juda II., ein Charakterbild," Prague, 1861; (5) "R. Salomo Luria," *ib.* 1862; (6) "Das Armengesetz nach Talmudischen Prinzipien," *ib.* 1863; (7) "Das Erziehungswesen nach den Prinzipien Unserer Altvordern," *ib.* 1864; (8) "R. Löwe ben Bezalel, Lebensbild eines Prager Oberrabbiners," *ib.* 1873; (9) "Das Wesen der Jüdischen Geheimlehre," *ib.* 1875–79. Of his German translation of David Gans's "Ẓemaḥ Dawid," with notes, only parts i. and ii. have been published, by Moritz Grünwald.

S. A. Ki.

KLEMPERER, WILHELM: German rabbi; born March 30, 1839, at Prague; son of Guttmann Klemperer. After attending the gymnasium of his native city, he studied (1856–1863) at the university and the Jewish theological seminary in Breslau (Ph.D., Leipsic, 1861) and was ordained rabbi in 1863. He was successively rabbi at Landsberg (1864–1885) and Bromberg (1885–91); he was called in 1891 as preacher to the Reform congregation of Berlin.

Klemperer has published: "Fest- und Gelegenheitspredigten," Breslau, 1866; "Christian Thomasius"; "Voltaire und die Juden"; "Beiträge zur Vergleichenden Gnomologie."

S. M. St.

KLETZK: Russian town, in the government of Minsk. It is believed to have been founded in the eleventh century, but the earliest known mention of the Jewish community there refers to 1522. A document dated Sept. 5, 1522, was issued by King Sigismund, in which he awarded for three years to Isaac Jesofovitch, a Jew of Brest-Litovsk, for the sum of 300 "kop groschen," a lease of the inns and other sources of revenue in Kletzk. The next mention of the Kletzk community is found in a document dated Jan. 21, 1529, which imposes military duties on its inhabitants, as well as on those of other towns. On June 15, 1542, the boyar Grishko Kochevich brought suit against Zachariah Markovich, a Jew of Kletzk, the latter's oxen having broken into Grishko's field and injured the growing grain; the court awarded to Grishko twelve "ruble groschen" damages. A census taken in 1552–55 shows that the Jewish householders lived chiefly on Wilna street, on the Sloboda, and owned gardens in the suburbs. Kletzk is mentioned in the assessment on the Lithuanian communities in 1566, and from its small proportionate assessment it appears that the community was not important at that time.

In 1670 the Jews of Kletzk were accused of having murdered a baptized Jewess, the wife of Geliash Yevchich. She had gone to the fair of Kletzk and had stopped first at the house of a Christian, and then at the house of the Jew Goshko Tzeperski, where she was last seen. At the time she disappeared she had a large sum of money in her possession. Her body was not found, and it is probable that she was induced by her former coreligionists to leave her husband and return to Judaism in some distant place, such cases having frequently occurred among the Jews of Lithuania after the Cossack uprising.

Until 1623 Kletzk belonged to the district of Brest-Litovsk. After that date it was transferred, together with the neighboring towns, to the district of Pinsk. According to tradition, the town originally was located on the opposite bank of the Vistula, on the road leading to Lyakhovich; but after the destructive fire of 1705 it was rebuilt, at the instance of the governor, on its present site. Thus the cemetery, formerly very near the town, is now two miles distant, and during the spring floods the Jewish community finds it difficult to provide for the burial of its dead. There is a large synagogue, built by Prince Radziwil in 1796; a bet ha-midrash fully two hundred years old; and fifteen smaller houses of prayer. The first rabbi of Kletzk was Judah ben Löb, who had under his jurisdiction also the community of Mechit. He was succeeded by Michael ben Meïr Eisenstadt, who in turn was followed, about 1762, by his son Moses Eisenstadt (d. Oct. 25, 1795). The old people of Kletzk still speak of the sojourn there of the philosopher Solomon Maimon, who lived there for several years, and was intimate with R. Moses Eisenstadt. In the nineteenth century the town was repeatedly destroyed by fire—in 1817, 1845, 1865, and 1886—yet the large synagogue always escaped the flames. In 1903 Kletzk had a total population of about 8,000, of which about 6,000 were Jews.

H. R. J. G. L.—B. Ei.

KLEY, ISRAEL (or **EDUARD** as he called himself): German preacher, educator, and writer; born at Bernstadt, Silesia, June 10, 1789; died at Hamburg Oct. 4, 1867. He attended the Wilhelm school at Breslau—in which he soon after gave instruction himself—and the gymnasium there. He studied also at the Berlin University under Fichte and Schleiermacher. In 1817 he accepted a call to Hamburg as head teacher and director of the free school, founded in 1815. This school gave the impulse to the founding of the temple at Hamburg, which inaugurated a reform in the liturgy and stood, in general, for the adaptation of Jewish worship to the spirit of the times. Kley, who had already officiated as preacher at the Jacobson Temple in Berlin together with Auerbach and Günsburg, was the first preacher at the Hamburg Temple, which position he retained for over twenty-one years, resigning it May 9, 1840. He was director of the free school until 1848. An institution bearing his name, for aged and destitute teachers, was erected in Hamburg.

Kley was a very prolific writer. Together with K. S. Günsburg he published "Erbauungen über Gottes Werk und Wort" (Berlin, 1813–14), and "Die Deutsche Synagoge" in 2 parts (*ib.* 1817–18). Several editions of his "Katechismus der Mosaischen Religionslehre" (Leipsic, 1814) were published, the last in 1850; also of his "Israelitisches Gesangbuch" (Hamburg, 1818), for which special melodies were written (*ib.* 1846). He published also a large number of sermons, either separately or in collections. Of the latter may be mentioned "Predigten in dem Neuen Israelitischen Tempel zu Hamburg" (*ib.* 1819–20); "Die Feste des Herrn"; "Israelitische Predigten für Alle Festtage des Jahres" (Berlin, 1824); "Sammlung der Neuesten Predigten Gehalten in dem Neuen Israel. Tempel zu Hamburg," edited by Ed. Kley and G. Salomon, 2 vols. (Hamburg, 1826–27); "Die Ruhe der Religion Mitten in der Welt Unruhe," five sermons (*ib.* 1831); "Blätter der Erinnerung: Letzte Kanzelvorträge im Neuen Israel. Tempel" (*ib.* 1844).

Kley, who is often called the Jewish Schleiermacher, published also sketches of sermons on the first Book of Moses (Grünberg-Leipsic, 1844), and on the second Book of Moses (Leipsic, 1856); further "Geschichtliche Darstellung der Israel. Freischule zu Hamburg" (Hamburg, 1841); "Die Erste Morgengabe zur Lehre und Bildung" (Grünberg, 1843); "Noch ein Wort zur Israel. Reformfrage" (Hamburg, 1845).

S. M. K.

KLEY, WILHELM: German economist and educator; born at Steinbach, district of Meiningen, Germany, June 25, 1869. He taught for several years at various schools, and then studied political economy, pedagogics, and philosophy at Giessen, Zurich, Basel, and Göttingen universities. After taking his doctor's degree he became teacher at the school for builders at Cassel. Since 1901 he has been director of the technical and commercial school of Harburg.

Kley has published: "Die Berufskrankheiten und Ihre Stellung in der Staatlichen Arbeiterversicherung in Nationalökonomischer Beleuchtung" (Cassel); "Die Schwindsucht im Lichte der Statistik und Sozialpolitik" (Leipsic); "Bei Krupp" (*ib.*); "Gesetzeskunde und Buchführung für Baubeflissene, Insbesondere zum Gebrauch an den Königlichen Baugewerkschulen" (Wittenberg); "Das Genossenschaftswesen im Handwerk"; "Warum Sollen und Müssen Sich die Handwerker zu Innungen und Genossenschaften Zusammenschliessen?" (Cassel, 1901); "Die Entwickelung des Geldwesens der Stadt Harburg," "Der Auf- und Ausbau der Deutschen Gewerbe- und Fortbildungschule" (*ib.*). Kley has also contributed articles to the "Zeitschrift für Sozialwissenschaft," edited by Wolf in Breslau.

KLINGER, GUSTAV. See Buchbinder, Bernhard.

KLOTZ, LOUIS LUCIEN: French journalist and deputy; born in Paris Jan. 11, 1868; of Alsatian descent. After his education was finished, he was enrolled as advocate at the Cour d'Appel in Paris. At the age of twenty, with a view to popularizing the Franco-Russian alliance, he founded the "Vie Franco-Russe," an illustrated paper. In 1892 he became editor of the "Voltaire," and commenced a campaign against the reactionary policy of Jules Ferry. In the following year he was an unsuccessful candidate for his Paris district at the legislatorial elections. Two years later he founded the "Français Quotidien," a paper devoted to national defense, with which the "Voltaire" was subsequently amalgamated.

After another failure at the polls, he was elected by an overwhelming majority for Montdidier at the general election of 1898 as a radical socialist. Klotz is a member of several communal and charitable societies, among which are the Society for the Defense of Children, the Prison Society, and the Central Committee for Labor.

KLUGER, SOLOMON BEN JUDAH AARON: Chief dayyan and preacher of Brody, Galicia; born at Komarow, Russian Poland, in 1783; died at Brody June 9, 1869. He was successively rabbi at Rawa (Russian Poland), Kulikow (Galicia), and Jozefow (Lublin), preacher at Brody, and rabbi at Brezany (Galicia) and, again, at Brody (where he held the offices of dayyan and preacher for more than fifty years).

During his long life Kluger wrote a great number of works — one hundred and sixty volumes. He wrote on all the branches of rabbinical literature as well as on Biblical and Talmudic exegesis; but only the following of his writings have been published: "Sefer ha-Ḥayyim" (Zolkiev, 1825), novellæ on Shulḥan 'Aruk, Oraḥ Ḥayyim (his novellæ on the other parts of the Shulḥan 'Aruk have not been published); "Me Niddah" (*ib.* 1834), halakic and haggadic novellæ on Niddah; "'En Dim'ah" (part 1; *ib.* 1834), funeral sermon on the death of Ephraim Solomon Margaliot; "Ebel Yaḥid" (Warsaw, 1836), funeral oration on Menahem Manis Mordecai Teomim; "Nidre Zerizin" (Zolkiev, 1839), novellæ on Nedarim; "Ebel Mosheh" (with "'En Dim'ah," part 2; Warsaw, 1843), funeral orations on Moses Schreiber (Sofer) and Jacob Lissa; "Shenot Ḥayyim" (Lemberg, 1855; the first part contains responsa on Shulḥan 'Aruk, Oraḥ Ḥayyim; the second, responsa and novellæ for scribes); "Sefer Setam" (*ib.* 1856), laws for scribes; "Moda'a le-Bet Yisrael" (Breslau, 1859), responsa, chiefly of other rabbis, concerning maẓẓot made by machine; "Ṭub Ṭa'am wa-Da'at" (Lemberg, 1860; the first part contains the laws of ṭerefah; the second, entitled "Ḳin'at Soferim," contains laws for scribes and various laws of the Yoreh De'ah); "Ḥiddushe Anshe Shem" (Leipsic, 1860), novellæ on Shulḥan 'Aruk, Eben ha-'Ezer; "Ma'aseh Yede Yoẓer" (Lemberg, 1863), commentary on the Pesaḥ Haggadah; "Sefer 'Abodat 'Abodah" (Zolkiev, 1865), novellæ on 'Abodah Zarah. Kluger's taḳḳanot concerning slaughtering are printed in Ganzfried's "Torat Zebaḥ" (Lemberg, 1848), and two of his responsa in David Solomon Eybeschütz's "Ne'ot Deshe" (*ib.* 1861).

KNEFLER, FREDERICK: American soldier; born in Hungary in 1833. He went to America, and when the Civil war broke out he enlisted as a private in the 79th Regiment Indiana Volunteer Infantry. He became successively captain, major, colonel, and brigadier-general. For meritorious service at Chickamauga he was promoted to the rank of brevet major-general. He participated in the engagements of the Army of the Cumberland and marched with Sherman to the sea. No other Jew attained such high rank in the army. After the war Knefler was made United States pension agent at Indianapolis.

KNOT: Some form of quipu or knot-alphabet appears to have been adopted in Biblical, or, at least, in Talmudical times, to judge from the form taken by the ẓiẓit. Whether any mystical influence was connected therewith is uncertain, but tefillin are not knotted, except with the permanent knot of the head phylactery. It was even disputed down to the time of R. Tam whether the head knot should be tied afresh every day (Responsa, No. 132). To the rigid Sabbatarians of the Talmudic period, to make a knot was an act of labor, and, therefore, forbidden on the Sabbath (Shab. 111b), and this forms part of the Jewish law to the present day. Not alone is the making of a knot forbidden, but also the loosing of one. Consequently ultra-Orthodox Jews who will not carry a handkerchief except in the form of a girdle merely twist it around and do not tie it in a knot. Children, however, might go out on the Sabbath with stalks of madder knotted together, seemingly as an amulet (Shab. 66b). In the discussion on the restriction of martyrdom some of the extremists held that one should suffer martyrdom rather than tie even the knots of one's shoes like the Romans (Sanh. 74b). It is stated that Ex. xxxiii. 23 really means that God showed Moses the knots of the tefillin (Ber. 7a); the passage, however, is interpreted by Ibn Ezra (*ad loc.*) as referring to the knowledge of the physical laws of nature (comp. Maimonides, "Moreh," i. 35).

In Jewish folk-lore knots play a certain part, though how far the folk-lore is Jewish in origin generally remains uncertain. Among the children of Kiev one of the ways of determining who shall be "it" is to tie a knot in a handkerchief; the children pick out the corners, and the one selecting the knotted corner is "it." In Kovno, when a wart is removed, a knot is tied around it with a thread, and this knot is placed under the threshold. To cure a person who is possessed one counts nine knots ("Sefer Ḥasidim," § 1159): this seems to be German (comp. Wuttke, "Deutscher Aberglaube," p. 157).

KOBER, GUSTAV: Austrian actor; born at Vienna April 21, 1849. He was trained for the stage by Emilie Dorr in that city and made his début at the Elysiumtheater, Stettin, in 1868. He then appeared at the following theaters: Budapest and Linz (1869-72), Thaliatheater in Hamburg (till 1877). In 1877 he joined the Meininger Company, remaining with this famous troupe of comedians until 1881, and accompanying them on their tours to Amsterdam and London. From 1881 to 1882 Kober played at the Berlin Residenztheater and the next two years at the Carltheater, Vienna; 1884-86 at the Thaliatheater, Hamburg; 1886-88 at the Landestheater, Prague; and 1888-89 at the Lessingtheater, Berlin. After a year devoted to a starring tour in various cities, Kober returned to the Lessingtheater, Berlin. He appeared also at the Irving Place Theater, New York city.

Kober's principal rôles are *Franz Mohr, Carlos* in "Clavigo," *Wurm, Richard III., Shylock, Iago, Mephisto,* and *Perin.*

KÖBNER, HEINRICH: German physician; born at Breslau Dec. 2, 1838. He studied medicine at Berlin and Breslau (M.D. 1859), taking post-graduate courses at Vienna and Paris in 1860 and 1861. Establishing himself as a physician in Breslau (1861), he founded a dispensary for dermatology. In 1869 he became privat-docent and in 1872 professor of dermatology and syphilology. Indifferent health forced him to resign all his positions in 1878. After spending some time in southern Europe, he settled in Berlin, where in 1884 he again founded a dispensary. In 1897 he received the title "Geheimer Medizinalrat."

Köbner has written many essays in the medical journals, among which may be mentioned: "Ueber Arznei-Exantheme, Insbesondere über Chinin-Exanthem," in "Berliner Klinische Wochenschrift," 1877; "Uebertragungsversuche von Lepra auf Thiere," in Virchow's "Archiv," 1882.

His works in book form include: "Klinische und Experimentelle Mitteilungen aus der Dermatologie," etc., Erlangen, 1864.

KÓBOR, TAMÁS. See Bermann, Adolf.

KOBRYN: District town in the government of Grodno, Russia; situated on the Muchavetz and Kobrynka rivers. In 1902 it contained more than 8,000 Jews in a total population of about 10,000. A Jewish congregation was in existence there at the beginning of the sixteenth century; it is mentioned among the Lithuanian Jewish congregations to which in 1514 Sigismund I. renewed privileges granted to them by his brother Alexander. The city and its suburbs, where the Jews had the right of residence, covered considerable space in the fifteenth and sixteenth centuries. The small town of Gorodetz, about five miles distant from Kobryn, once formed a part of the latter; but it was nearly ruined in 1653, when it was besieged by the Swedish army, the Jews and their property suffering greatly, especially at the hands of the Polish soldiers, who mutinied on account of non-payment of their salaries and compensated themselves at the cost of the Jews.

In 1766 Kobryn was officially reduced to the status of a village; but was restored in 1795 to the rank of a district town. The city was bombarded by the French army in 1812, and again suffered much, the Jews showing great courage.

In the old Jewish cemetery there are still legible some dates of the fifteenth century. The earliest known rabbi was Bezaleel b. Solomon Darshan (d. 1678). His successors have been: Jacob b. David Shapiro, or Spiro, the author of "Ohel Ya'aḳob," and founder of a yeshibah in Kobryn, where more than 400 pupils were instructed in his time (d. 1718); Minz (d. 1819); Shemariah, who was also a rabbi of the Ḥasidim of Riuboshow (d. 1835); Moses, rabbi of the Ḥasidim of Kobryn (d. 1858); Meïr Meïrim Shafit (d. 1873), author of the well-known work "Nir al-Yerushalmi"; Elijah, popularly known as "Rabbi Elinke Lider" (d. 1876); Saul Epstein (d. 1891); and last the present incumbent, Rabbi Meïr Atlas.

Kobryn has many charitable societies and institutions, a magnificent synagogue, two batte midrashot, and eleven houses of prayer of different Ḥasidic sects. Formerly the Jews were mostly engaged in agriculture and distilling; but in 1882, by a ukase of Alexander III., the renting of farms was prohibited to Jews, as was also residence outside the city limits. Further, in 1897 the distillery business was monopolized by the government. In consequence, the present economic position of the Kobryn Jews is very deplorable; and they are emigrating in large numbers to America and Africa.

ḲODASHIM: Name of the fifth of the six orders ("sedarim") of the Mishnah, so called because all the treatises belonging to it contain regulations and laws concerning sacrifices, priestly contributions, and other matters pertaining to the cult. Both the name of this order and its position as the fifth in the Mishnah are old, and are recorded at an early date. Simeon b. Laḳish (3d cent.), who considered the six orders of the Mishnah to be intended by the words "emunat, 'iteka, ḥosen, yeshu'ot, ḥakmat, wada'at" (Isa. xxxiii. 6), enumerates them in the following order and with the following names: "Zera'im, Mo'ed, Nashim, Neziḳin, Ḳodashim, Ṭohorot" (Shab. 31a). The sedarim are given in the same order and with the same names in Esth. R. i. 2 and in Num. R. xiii. Another amora, R. Tanḥuma, although deducing from Ps. xix. 8–10 a different order of the sedarim, likewise reckons Ḳodashim as the fifth (Yalḳ., Ps. xix. 8 *et seq.*). According to another version of Tanḥuma's statement, the order of the sedarim is as follows: Nashim, Zera'im, Mo'ed, Ḳodashim, Ṭohorot, and Neziḳin (Num. R. *l.c.*). In this passage, however, the order is evidently determined by that of the Biblical verses to which the treatises are there referred.

Position in Mishnah.

It may, therefore, be safely assumed that Ḳodashim has always been the fifth of the orders of the Mishnah. According to Maimonides, Ḳodashim comes after the first four sedarim because they have their exegetical basis in Exodus, whereas Ḳodashim has its foundation in Leviticus. On the other hand, Ḳodashim stands before Ṭohorot because the regulations concerning sacrifice (Lev. i.–x.) precede those on cleanness and uncleanness (*ib.* xi.–xv.). Another explanation is given by Zacharias Frankel in his "Hodegetica in Mischnam," p. 262.

With the exception of the 1559 edition of the Mishnah, which regards the two treatises Ḥullin and Bekorot as belonging to the sixth order, Ḳodashim in all editions of the Mishnah contains eleven treatises. It is doubtful whether Keritot originally belonged to the order Neziḳim, as Brüll supposes ("Einleitung in die Mischna," ii. 28).

In the following survey the eleven treatises are outlined in the order given by Maimonides (*l.c.*), which has been followed in the editions of the Mishnah since 1606.

1. **Zebaḥim** ("Bloody Sacrifice"), entitled also **Sheḥiṭat Ḳodashim** ("Killing of the Consecrated Animals"; B. M. 109b), and **Ḳorbanot** ("Sacrifice"; in the Tosefta); divided into 14 chapters. Contents: Regulations for killing sacrificial animals and for sprinkling their blood; how the sacrifice may become an abomination ("piggul"), or invalid ("pasul"); things consecrated by heathen; upon what the thoughts must be concentrated during the sacrifice; of the mingling of different sacrifices; from which sacrifices the priests receive meat; which priests partake of such flesh, and which have no share in it; what the altar, the steps, and the vessels sanctify and in how far that which has been placed on the altar may not be removed from it; sacrifice offered outside; history of places of worship.

Treatises.

2. **Menaḥot** ("Meal-Offering"), divided into thirteen chapters. Contents: Regulations concerning the intention required; the preparation of the meal-offering and its ingredients; places from which the materials for the meal-offering are to be brought; meal-offerings from which only a handful ("ḳomez") is to be taken, and those which are to be placed entire upon the altar; concerning the waving ("tenufah") of the meal-offering, and the laying of hands on the sacrificial victim ("semikah"); the peace-offerings, the wave-offerings, the showbread, the pentecostal bread, and the drink-offering; the temple of Onias.

3. **Ḥullin** ("Profane," "Unconsecrated"), called also **Sheḥiṭat Ḥullin** ("Killing of Unconsecrated Animals"), divided into twelve chapters. Contents: Regulations concerning slaughtering; who is permitted to slaughter, by what means, and when; cutting through the neck; the dam may not be killed on the same day with her young; covering up the blood after slaughtering; diseased cattle; what is fit to eat ("kasher"), and what is unfit ("ṭerefah"); clean and unclean animals; what meat may not be cooked in milk; the portions of the slaughtered animals which must be given to the priest; the first of the fleece.

4. **Bekorot** ("First-Born"), divided into nine chapters. Contents: Regulations concerning the first-born; how long the first-born of clean animals are to be kept before being given to the priest; hair and wool of the first-born of clean animals; blemished first-born of animals; blemishes which make the first-born unfit for sacrifice; rights of the first-born son in regard to inheritance; rights of the priest to the ransom for the first-born son.

5. **'Arakin** ("Estimations"), divided into nine chapters. Contents: Rules for determining the amount which must be given to redeem one pledged to God, or, in case his value has been vowed, for ascertaining its equivalent; who may make such valuations, and in regard to whom they may be made; on reckoning the equivalent according to the wealth and age of the person in question; valuation when a limb or the half of the value of a person has been vowed; obligations of heirs; distraint when the equivalent is not paid.

6. **Temurah** ("Exchange" [of a consecrated object]), divided into seven chapters. Contents: Mainly regulations concerning exchanges; objects exchange of which may be effected; concerning the young of the sacrificial victim when exchange has taken place; exchange in case of a sin-offering; formulas for exchange.

7. **Keritot** ("Extermination"), divided into six chapters. Contents: Enumeration of the sins to which the penalty of excision ("karat") is attached when they have been committed wittingly though without previous warning against them, but which require a sin-offering if they have been committed

inadvertently; different cases in which sacrifice is necessary; when a guilt-offering or sin-offering is respectively necessary.

8. Me'ilah ("Trespass" [on what has been consecrated]), divided into six chapters. Contents: Regulations especially concerning trespass; sacrifices in which trespass may occur, and when it begins; things in which no trespass can take place, although they may not be used; reckoning in cases of trespass, and the question whether several persons may trespass in connection with the same thing; trespass through an agent.

9. Tamid ("The Daily Offering, Morning and Evening"), divided into seven chapters, in most editions, but see below. Contents: The Temple organization and the apportionment of the various official duties among the different priests by lot; on bringing the sacrificial lamb, killing and dividing it, and placing its various parts on the altar; the morning prayer; the incense-offering; the priestly blessing; hymns of the Levites on the different days of the week.

10. Middot ("Measures" [of the Temple]), divided into five chapters. Contents: Descriptions of the arrangement of the Temple and the dimensions of the separate divisions of the porches; of the forecourt and its chambers.

11. Ḳinnim ("Birds' Nests"), divided into three chapters. Contents: The offering of pigeons, which was to be brought by indigent women after confinement and by such of the poor as had committed any of the trespasses enumerated in Lev. v. 1 *et seq.* There are also in passing discussions of various cases of confusion of birds belonging to different persons or to different offerings.

Arrangement of Treatises.

Maimonides (*l.c.*) endeavors to account for this arrangement of the treatises of Ḳodashim, but his arguments are artificial, while Frankel (*l.c.* p. 262) attempts to explain it logically. Apparently, however, there was no real reason for the order of the treatises, which were probably arranged according to the system of study adopted in the Palestinian and the Babylonian academies. The teachers there were naturally influenced by pedagogical considerations, and placed the longer tractates before the shorter ones (Hoffmann, in Berliner's "Magazin," 1890, p. 323). The treatises within the seder or order were thus arranged according to the number of chapters, the one containing the greatest number being placed first (Geiger, in his "Wiss. Zeit. Jüd. Theol." ii. 489-492). This supposition of Geiger's holds good for Ḳodashim, except that Tamid, with seven chapters, follows Me'ilah, which has but six. Originally, however, Tamid did not have this number of chapters. In Löwe's edition of the Mishnah this treatise has only six chapters, while Levi b. Gershon (RaLBaG), in his preface to the commentary on the Pentateuch, allows Tamid five only. In Ḳodashim there is, accordingly, the following arrangement of treatises with a diminishing number of chapters: Zebaḥim, 14 chapters; Menaḥot, 13; Ḥullin, 12; Bekorot, 9; 'Arakin, 9; Temurah, 7; Keritot, 6; Me'ilah, 6; Tamid, 6 or 8; Middot, 5; Ḳinnim, 3. Various other orders of arrangement are found in different editions, which have been described by Strack ("Einleitung in den Talmud," p. 11). Noteworthy is the sequence given by RaLBaG (*l.c.*), namely: Zebaḥim, Ḥullin, Menaḥot, Bekorot, 'Arakin, Temurah, Me'ilah, Keritot, Tamid, Middot, Ḳinnim. In every system of arrangement Zebaḥim is the first treatise and in Num. R. xiii. it is expressly designated as the beginning of the Seder Ḳodashim.

In Tosefta and Gemara.

In the Tosefta Ḳodashim has eight treatises only, Tamid, Middot, and Ḳinnim being omitted. The Babylonian Talmud has Gemara for the first nine treatises, but none for the last two, Middot and Ḳinnim. There is no Jerusalem Gemara for Ḳodashim, nor is there any citation from one in the older commentaries and decisions. Isaac Alfasi, who uses Yerushalmi frequently, does not cite it for the treatise Ḥullin, nor is it quoted by Maimonides, Asheri, or Solomon b. Adret. The supposed citations by other commentators have been shown by Frankel and Buber either not to refer to Ḳodashim or to be erroneous.

Jerusalem Gemara.

Maimonides, however, says (*l.c.*) that there was a Palestinian Gemara for five whole orders (thus including Ḳodashim), but only for Niddah in the sixth order. It is also known that much attention was paid in Palestine to the Seder Ḳodashim, for the treatises Zebaḥim and Ḥullin in the Babylonian Talmud contain many statements of Palestinian amoraim. It is evident, therefore, that there was once a Jerusalem Gemara to Ḳodashim, but that it was lost at an early period and was no longer used even by the oldest commentators. Maimonides, however, had heard of its existence and believed that it was still extant, as is clear from his statement (*l.c.*); but it is evident that he never saw it, since if he had seen it he would certainly have made citations from it.

ḲODESH HA-ḲODASHIM. See Holy of Holies.

KOENEN, HENDRIK JACOB: Dutch historian of the Jews; born at Amsterdam Jan. 11, 1809; died at Buitenrust, near Haarlem, Oct. 13, 1874. He was educated for the bar, and received his degree of doctor of law in 1831. For many years he was a member of the common council of his native town and of the provincial states of North Holland. He was the author of many works on history. His "Geschiedenis der Joden in Nederland" was awarded a prize, and was published by the Prov. Utrechtsch Genootschap van Kunsten en Wetenschappen, Utrecht, 1843. It is the first history of the Jews in Holland, and in it many hitherto unknown historical sources are cited.

S. J. E. B.

ḲOF (ק): Nineteenth letter of the Hebrew alphabet; for its form see Alphabet. The meaning of the name is uncertain. It corresponds in form to the Greek "koppa" and the English "q," and is distinguished in pronunciation from Kaf in that it is produced, with a glottal catch, from the rear of the palate. It interchanges, in related languages, with ג, כ, and ע. Ḳof occurs only as a root-letter, never as a prefix or suffix. As a numeral it stands, in later usage, for 100.

T. I. Br.

KOHATH (קהת); KOHATHITES: Kohath was the second son of Levi (Gen. xlvi. 11; Ex. vi. 16; Num. iii. 17; I Chron. vi. 1) and progenitor of the Levitical division of the Kohathites. Born in the land of Canaan, he was one of those who went with Jacob to Egypt (Gen. xlvi. 8, 11), where he died at the age of 133, leaving four sons (Ex. vi. 18). The division of the Kohathites was more important than the other two Levitical divisions. Even when wandering in the wilderness, the Kohathites were divided into four families (Num. iii. 27); the whole number of their males over a month old was 8,600 (*ib.* iii. 28) and from thirty to fifty years of age, 2,750 (*ib.* iv. 2, 3, 36). To them was entrusted the transportation of the sanctuary and its furniture (*ib.* iii. 31, iv. 4–15), a very honorable office, and one in which great precautions had to be taken not to touch the objects carried (*ib.* iv. 15, 18–20). In the camp their position was south of the Tabernacle (iii. 28); and when journeying they preceded the Gershonites (*ib.* iv.; Josh. xxi.). Owing to the great holiness of their burden, the Kohathites carried it upon their shoulders (Num. vii. 9). In the wilderness their chief was Elizaphan ben Uzziel (*ib.* iii. 30). After the settlement of the Israelites in the land of Canaan, thirteen cities out of Judah, Simeon, and Benjamin were allotted to the priests, descendants of Kohath (Josh. xxi. 4, 13–19), and ten others out of Ephraim, Dan, and western Manasseh to the rest of the Kohathites (*ib.* xxi. 5, 20–26; I Chron. vi. 57–61, 67–70).

Besides Moses and Aaron, there were other eminent Kohathites; *e.g.*, the prophet Samuel and his grandson Heman. In David's division of the Levites into groups, descendants of the four Kohathite families are mentioned as heads of fathers' houses (I Chron. xxiii. 12–20). They are described also as taking part in the Temple service in the time of Jehoshaphat (II Chron. xx. 19) and as cooperating in the cleansing of the Temple in the reign of Hezekiah (*ib.* xxix. 12, 14). There is no mention of the Kohathites after the Exile.

ḲOHELET MUSAR: Hebrew weekly; founded at Berlin in 1750 by Moses Mendelssohn (at that time he was not more than twenty-one) and T. Bock. Only two issues appeared; these contained philosophical and moral reflections of the Leibnitz-Wolff school.

Bibliography: Benjacob, *Oẓar ha-Sefarim*, p. 518; I. Davidson, *The Genesis of Hebrew Periodical Literature*, p. 3, Baltimore, 1900; F. Delitzsch, *Zur Gesch. der Jüdischen Poesie*, p. 100; Kayserling, *Moses Mendelssohn*, p. 99.

G. M. Sc.

ḲOHELET (ECCLESIASTES) RABBAH (called in ed. Pesaro, 1519, and in ed. Venice, 1545, **Midrash Ḳohelet**): Haggadic commentary on Ecclesiastes, included in the collection of the Rabbot. It follows the Biblical book verse by verse, only a few verses remaining without comment. In the list of the old sedarim for the Bible four sedarim are assigned to Ecclesiastes, namely, to i. 1, iii. 13, vii. 1, and ix. 7; and the Midrash Ḳohelet was probably divided according to these sections. This appears from the phrase "Sidra tinyana" inserted between the comments to Eccl. vi. 12 and to vii. 1, and the phrase "Sidra telita'a" between the comments to Eccl. ix. 6 and to ix. 7. These phrases occur at the end of the second and third midrash sections, in the same way that "Seliḳ sidra" indicates the end of sections in Ruth R. and Esth. R. in the earlier editions. The commentary to iii. 12 having been lost, the exposition of the conclusion of the first section is missing. Nothing remains to indicate where one section ends and another begins, as there is no introductory remark to the comment on ii. 13. But an introduction is also lacking to the comment on vii. 1 and ix. 7.

Adaptations from Earlier Midrashim.

The author confined himself chiefly to collecting and editing, and did not compose new introductions to the sections. He, however, used to a great extent the introductions which he found either in the earlier midrashim—Bereshit (Genesis) Rabbah, Pesiḳta, Ekah (Lamentations) Rabbati, Wayiḳra (Leviticus) Rabbah, Shir ha-Shirim (Canticles) Rabbah—or in the collections from which those midrashim were compiled. This shows the important part which the introductions to the earlier midrashim played in the later midrashim, in that they served either as sources or as component parts of the latter. For introductions to commentaries on the Bible text and for homilies on the sedarim and Pesiḳta cycle, it was customary to choose texts occurring not in the Pentateuch, but chiefly in the Hagiographa, including Ecclesiastes. This, even in very early times, gave rise to a haggadic treatment of numerous passages in Ecclesiastes, which in turn furnished rich material for the compilation of the Midrash Ḳohelet.

The longest passages in the Midrash Ḳohelet are the introductions to Pesiḳta and Wayiḳra Rabbah, all of which the author used. Some introductions were abbreviated, and introductions from different midrashim were combined in a comment on one passage of Ecclesiastes. For instance, the long passage on Eccl. xii. 1–7 is a combination of the introduction to Wayiḳra Rabbah xviii. 1 and the twenty-third introduction in Ekah Rabbati (ed. Buber, pp. 9a–12a). Of the ninety-six columns which the Midrash Ḳohelet contains in the Venice edition (fols. 66c–90b), nearly twenty are occupied by expositions which the author took from introductions in Bereshit Rabbah, Pesiḳta, Wayiḳra Rabbah, and Shir ha-Shirim Rabbah; namely, the comments to Eccl. i. 1, 3, 5, 18; ii. 2, 12b, 21, 23; iii. 1, 11, 15, 16; v. 4, 5, 8, 15; vi. 7; vii. 14, 23 *et seq.*; viii. 1; ix. 2, 15; x. 20; xi. 2, 6; xii. 1–7. Many other passages besides the introductions have been transferred from those sources to the Midrash Ḳohelet. Moreover, it contains several passages in common with Ruth R.; compare especially the comment on Eccl. vii.

8, which includes the story of R. Meïr and his teacher Elisha b. Abuya, with Ruth Rabbah vi. (to Ruth iii. 13), with which it agrees almost verbatim. In this case the story was not taken direct from its source in Yer. Ḥag. ii. 77b, c.

Passages from the Babylonian Talmud.

The author of the Midrash Ḳohelet of course frequently consulted the haggadah of the Palestinian Talmud. At the same time, it may be assumed that various passages were taken directly from the Babylonian Talmud; and this assumption would prove the relatively later date of Ḳohelet Rabbah, though the end of the midrash, which is taken from Ḥag. 5a, must be considered as an addition. A further characteristic indication of the late composition of the work is the fact that in the comments on Eccl. v. 5 and vii. 11 passages from Pirḳe Abot are quoted, with a reference to this treatise (comp. Wayiḳra R. xvi.), and in the comment on v. 8 several smaller treatises are mentioned. In the same comment on v. 8, at the beginning of a proem in Wayiḳra Rabbah xxii., a modification of the passage in the latter is made which gives ample proof that the Midrash Ḳohelet was written at a later time than the other midrashic works mentioned. In Wayiḳra Rabbah the passage reads: "Even what is superfluous on the earth is a part of the whole; and also the things which thou regardest as superfluous to the revealed Torah, as the prescriptions relating to fringes, phylacteries, and mezuzah, they also belong to the idea of the revealed Torah." In the Midrash Ḳohelet it reads: "The things which thou regardest as superfluous to the Torah, as the tosafot of Rabbi's school and those of R. Nathan and the treatise on proselytes and slaves ["Hilkot Gerim wa-'Abadim"], they also were revealed to Moses on Sinai, and treatises like 'Hilkot Ẓiẓit Tefillin u-Mezuzot' belong to the sum total of the Torah." As Zunz assumes ("G. V." p. 266), the Midrash Ḳohelet belongs to the time of the middle midrashim. On the other hand, the author of Midrash Ḳohelet must not be charged with "proceeding entirely in the spirit of later compilers" merely because, in connection with certain Bible texts, he repeats accepted or approved passages which were written upon the same or similar texts. Such repetitions are frequently found in the earlier midrashim. In Midrash Ḳohelet the same comments are found on Eccl. i. 2 as on vi. 12; on i. 3 as on xi. 9; on i. 13 as on iii. 10; on iii. 16 as on x. 4; on vi. 1 as on ix. 13; and on vii. 11 as on ix. 10; etc. Verses ii. 24, iii. 13, v. 17, viii. 15 receive the same explanation; and it is interesting to note that the Epicurean and hedonistic view expressed in them—that for all of man's troubles his only compensation is the gratification of the senses: eating, drinking, and taking pleasure—is interpreted allegorically and given a religious significance: "Where-ever eating and drinking are spoken of in this way, the pleasure is meant which the study of the Bible and the performance of good works afford; as it is written (ch. viii. 15): 'it accompanies him בעמלו ["in his labor"], which must be interpreted as בעולמו ["in his world"]': not eating and drinking accompany man to the grave, but the Torah and the good works which he performs." The following connected passage on Eccl. ii. 4–8 may serve to indicate the manner in which in this midrash the allegorical interpretation is connected with the simple literal interpretation; it also shows how the author, in order to explain a passage, has fused the material collected from different sources, and illustrates his use of stories and of foreign words (the Bible text of Ecclesiastes is printed in italics):

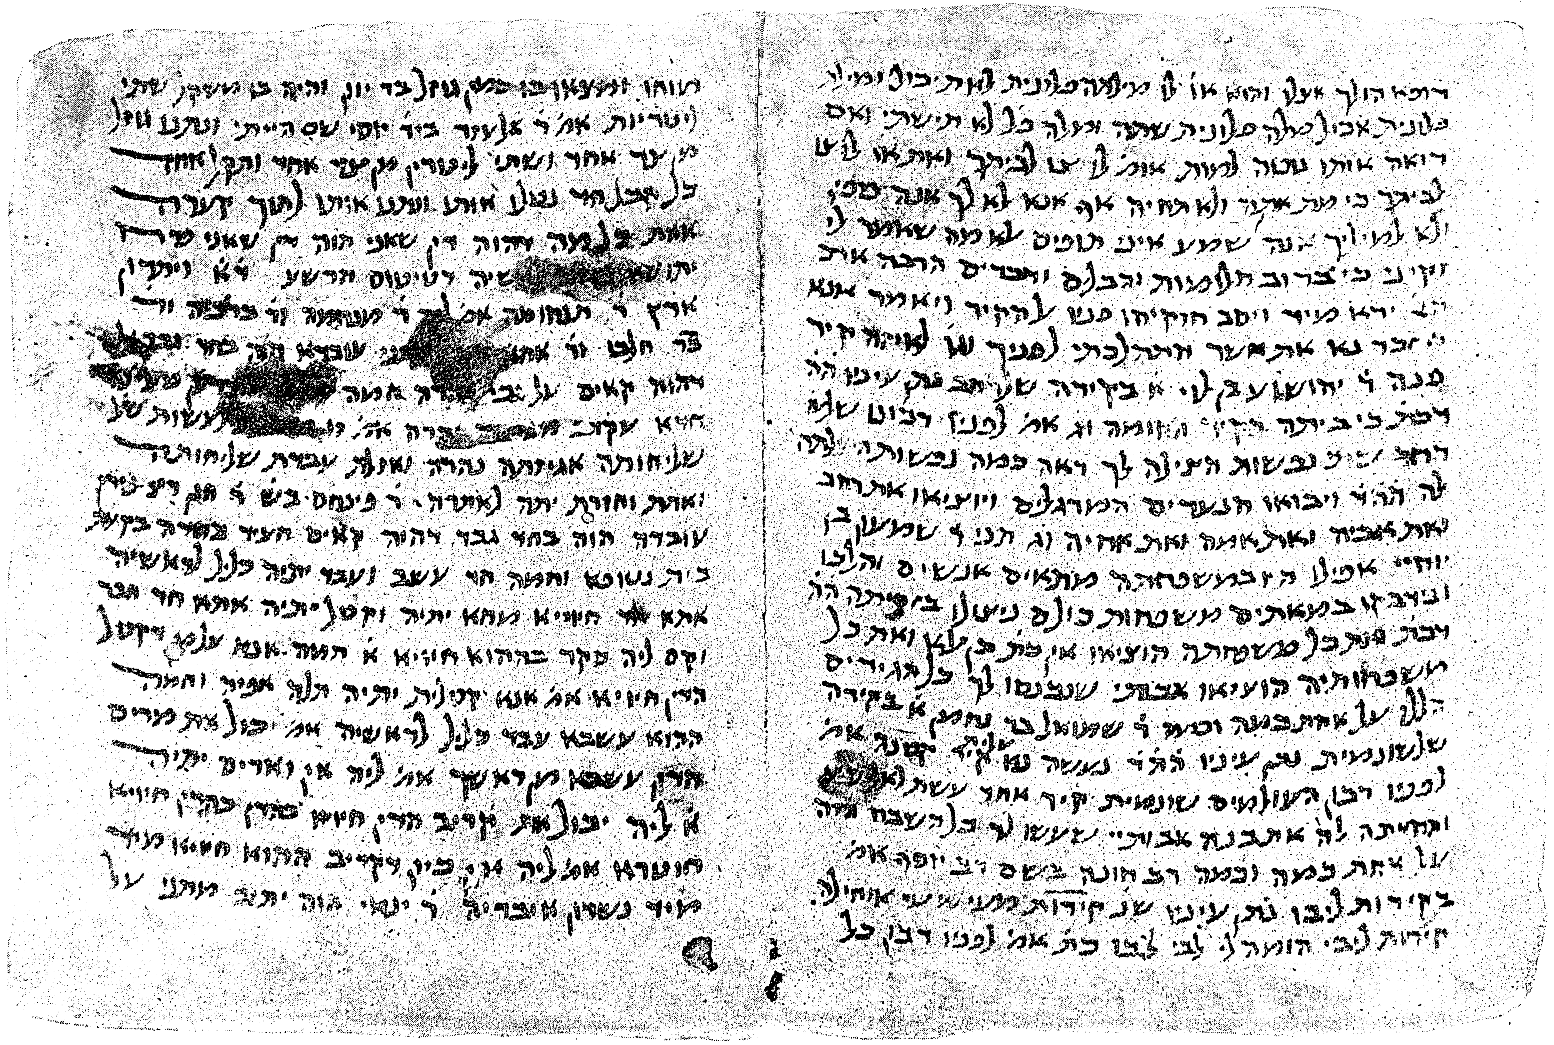
Specimens of Exegesis.

"'*I made me great works,*' said Solomon; 'I made greater works than the works of my fathers'; as it is written, 'The king made a great throne of ivory' (I Kings x. 18). '*I builded me houses*'; as it is written, 'It came to pass at the end of twenty years, when Solomon had built the two houses' (*ib.* ix. 10). '*I planted me vineyards*'; as it is written, 'Solomon had a vineyard at Baal-hamon' (Cant. viii. 11). '*I made me gardens and orchards* [lit. "paradises"], *and I planted trees in them of all kinds of fruits,*' even pepper.

"R. Abba bar Kahana said: 'Solomon commanded spirits whom he sent to India to fetch water for watering. "*I made me pools of water*": fish-ponds [πισκίνη] wherewith to water a forest full of trees;—this is the land of Israel; as it is written, "And the king put them in the house of the forest of Lebanon" (I Kings x. 17). "*I got me servants and maidens*"; as it is written, "All the Nethinim, and the children of Solomon's servants, were three hundred ninety and two" (Neh. vii. 60). "*I had servants born in my house*"; as it is written, "and those officers provided victual for King Solomon . . . they lacked nothing"' (I Kings v. 7).

"R. Ḥama bar Ḥanina said: 'At Solomon's table there were carrots [comp. Deut. R. i. 5] in summer and cucumbers in winter; they were eaten throughout the year. "*I had great possessions of great and small cattle*"; as it is written (I Kings v. 3), "u-barburim abusim." What does that mean? The scholars say, "Animals from Barbary" [Βαρβαρία]. . . . "*I gathered me also silver and gold*"; as it is written, "And the king made silver to be in Jerusalem as stones" (I Kings x. 27). Is it possible?—like the stones on the roads and in the yards, and they were not stolen? No, there were stones eight and ten ells long. "*And the peculiar treasure of kings*"; as it is written, "And all the kings of the earth sought the presence of Solomon" (II Chron. ix. 23),—והמדינות [lit. "and of the provinces"] is to be read מדיינת ["the disputing woman"], that is, the Queen of Sheba, who disputed with him in her wisdom, and asked him questions, and could not vanquish him; as it is written, "She came to prove him with hard questions" (I Kings x. 1). "*I gat me men singers and women singers, and the delights of the sons of men,*"—baths (δημόσια) and male and female demons [שדה, שדות, taken in the sense of שדים, "demons"] who heated them.'

"R. Ḥiyya bar Nehemiah said: 'Did Scripture intend to make us acquainted with Solomon's wealth? It probably refers only to the Torah: "*I made me great works*"; as it is written, "And the tables were the work of God" (Ex. xxxii. 16). "*I builded me houses,*"—those are synagogues and schoolhouses. "*I planted me vineyards,*"—those are the rows of scholars, who sit in rows [like vines] in the vineyard. "*I made me gardens and orchards* [lit. "par-



THIRTEENTH-CENTURY MANUSCRIPT OF ḲOHELET RABBAH, FROM THE CAIRO GENIZAH.
(By courtesy of Prof. S. Schechter.)

adiscs"],"—those are the great mishnayot, such as the mishnah of R. Ḥiyya Rabbah and that of R. Hoshaiah Rabbah, and that of Bar Ḳappara. "*I planted trees in them of all kinds of fruit,*"—that is the Talmud, which is contained in them. "*I made me pools of water,*"—those are the derashot. "*To water therewith the wood that bringeth forth trees,*"—those are the children who learn.'

"R. Naḥman said: 'That is the Talmud. "*To water therewith the wood that bringeth forth trees,*"—those are the scholars. "*I got me servants and maidens,*"—those are the nations; as it is written, "And also upon the servants and upon the handmaids in those days will I pour out my spirit" (Joel iii. 2 [A. V. ii. 29]). And in the Messianic time the nations shall be subject to Israel; as it is written in Isa. lxi. 5, "And strangers shall stand and feed your flocks." "*And I had servants born* [companions] *in my house,*"—that is the Holy Ghost. "*Also I had great possessions of great and small cattle,*"—those are the sacrifices; as it is written, "From the cattle and sheep ye shall sacrifice" (Lev. i. 2, Hebr.). "*I gathered me also silver and gold,*"—those are the words of the Torah; as it is written, "More to be desired are they than gold" (Ps. xix. 11). "*And the peculiar treasure of kings*"; as it is written, "By me kings reign" (Prov. viii. 15). והמדינות is to be read מדיינין ["disputers"], —those are the scholars who dispute in the Halakah. "*I gat me* שרים ושרות"—those are the toseftas. "*And the delights,*"—those are the haggadot, which are the delights of Scripture.'

"R. Joshua b. Levi interpreted the passage as referring to Israel on its entry into the country: '"*I made me great works,*"—"When ye be come into the land of your habitations . . . and will make a burnt offering . . . unto the Lord" (Num. xv. 2, 3). "*I builded me houses,*"—"and houses full of all good things" (Deut. .vi. 11). "*I planted me vineyards,*"—"vineyards and olive-trees which thou plantedst not" (*ib.*).'

"Hadrian the Accursed said to R. Joshua b. Hananiah: 'The Torah says: "A land wherein thou shalt eat bread without scarceness, thou shalt not lack anything in it" (*ib.* viii. 9). Can you bring me three things that I ask for?' 'What are they?' 'Pepper, pheasants [*φασιανός*], and silk [*μέταξα*].' He brought pepper from Niẓḥanah, pheasants from Ẓaidan [Sidon], or, as another says, from 'Akberi, and silk from Gush Ḥalab.

"R. Levi said: '"*To water therewith the wood that bringeth forth trees.*" The land of Israel did not even lack cane for arrows. "*I got me servants and maidens,*"—"And a mixed multitude" (Ex. xii. 38). "*And had servants born in my house,*"—those are the Gibeonites, whom Joshua turned into hewers of wood and drawers of water (Josh. ix. 27). "*I also had great possessions of great and small cattle,*"—"a very great multitude of cattle" (Num. xxxii. 1). "*I gathered me also silver and gold*"; as it is written, "He brought them forth also with silver and gold" (Ps. cv. 37). "*And the peculiar treasure of kings and of the provinces,*"—that is the booty of Og and Midian.'"

The Midrash Ḳohelet published by Solomon Buber in the Midrash Zuṭa in 1894 is different from the work discussed here. It is probably merely an extract with some additions. It is noteworthy that the author of the Yalḳuṭ knew only this midrash to Ecclesiastes, but in a more complete form than it is found in the printed edition.

KOHEN (KOHANIM). See Cohen.

KOHEN ẒEDEḲ, ABRAHAM. See Abraham ben Elijah ha-Kohen.

KOHEN ẒEDEḲ, JOSEPH. See Ẓedeḳ, Joseph Kohen.

KOHEN ẒEDEḲ II. KAHANA BEN JOSEPH: Gaon of Pumbedita from 917 to 935. Immediately after his appointment he took measures to change the existing system in the division of the revenues between the two schools of Sura and Pumbedita. Hitherto Sura had taken two-thirds, and Pumbedita one-third, of the total revenue. Kohen Ẓedeḳ opposed this division on the ground that Pumbedita was at that time the more prominent and had the greater number of pupils, and was, therefore, under heavier expense than Sura. The controversy resulted in favor of Kohen Ẓedeḳ, it being decided that an equal division of the income should thenceforth be made between the two schools.

Kohen Ẓedeḳ succeeded also in protecting the interests of Pumbedita against the schemes of the exilarch Mar 'Uḳba. It had been the custom to assign the income from Chorazan to Pumbedita, which was bound, in return, to provide the Jewish communities of that province with officers. Mar 'Uḳba, already unpopular, attempted to secure possession of these revenues for himself, but the attempt cost him his position. Kohen Ẓedeḳ's influential friends, Netira, his sons, and Joseph ben Phineas his son-in-law (see on them A. Harkavy in the "Berliner Festschrift," pp. 34 *et seq.*), induced the court of Bagdad to banish Mar 'Uḳba to Kermanshah. His poetic talents, however, won him a renewal of the favor of the calif, but the strong opposition to him brought about his second banishment.

When the post of exilarch had been vacant five years, and the question of Mar 'Uḳba's successor began to be considered, the appointment of his nephew, David b. Zakkai, proved generally acceptable. But although the whole college of Sura acknowledged him as exilarch, Kohen Ẓedeḳ refused to recognize him, on the ground that he was a relative of Mar 'Uḳba. David b. Zakkai then declared Kohen Ẓedeḳ's position vacant, and appointed Mebasser b. Ḳimoi as gaon in his place (918). Only part of the college of Pumbedita remained faithful to their old head, the rest going over to Mebasser. The tedious struggle between David b. Zakkai and Kohen Ẓedeḳ was finally settled by the blind Nissim Naharwani; he went to the latter late at night and persuaded him to become reconciled to the exilarch, who then recognized him as lawful gaon.

Such is the account of Kohen Ẓedeḳ's life as given by Nathan ha-Babli (in the Ahimaaz Chronicle, in

"Med. Jew. Chron." ii.), which is followed by Grätz and Weiss. The letter of Sherira Gaon, on the other hand, which is followed by Abraham ibn Daud ("M. J. C." i. 40, 66), makes Kohen Ẓedeḳ's public career much shorter, and contradicts in many respects the accounts of the other authorities. Sherira's version begins with the election of Mebasser to the gaonate. After the death of Yehudai bar Samuel, gaon of Pumbedita (917), the college selected Mebasser ben Ḳimoi as his successor (918). The exilarch David ben Zakkai, however, refused to recognize him and chose Kohen Ẓedeḳ as gaon in opposition to him. A struggle naturally ensued between David b. Zakkai and Mebasser and his pupils, ending finally in the reconciliation of the exilarch and the gaon (922). After the death of Mebasser (926) his pupils went over to Kohen Ẓedeḳ, who thenceforth until his death in 935 was sole and acknowledged gaon. The fact that Kohen Ẓedeḳ was not independent, as Nathan ha-Babli seems to suggest, and that his importance depended on David b. Zakkai's favor, agrees with the fact that in the controversy of the exilarch with Saadia over a case of inheritance, Kohen Ẓedeḳ unhesitatingly subscribed to David b. Zakkai's decision, while Saadia refused to do so. According to J. Halevy, whose statements are made on the authority of Sherira's letter, the dispute with Mar 'Uḳba concerning the income from Chorazan, of which Nathan ha-Babli speaks, was not between 'Uḳba and this Kohen Ẓedeḳ of Pumbedita, but involved an earlier gaon of Sura, Kohen Ẓedeḳ b. Abimai (845). No responsa from Kohen Ẓedeḳ Kahana b. Joseph have been preserved.

S. S. M. Sc.

KOHLER, KAUFMANN: Rabbi and theologian; born in Fürth, Bavaria, May 10, 1843; a descendant of a family of rabbis. He received his rabbinical training at Hassfurt, Höchberg near Würzburg, Mayence, Altona, and at Frankfort-on-the-Main (under Samson Raphael Hirsch), and his university training at Munich, Berlin, Leipsic, and Erlangen (Ph.D. 1868; his thesis, "Der Segen Jacob's," was one of the earliest Jewish essays in the field of the higher Biblical criticism, and its radical character had the effect of closing to him the Jewish pulpit in Germany). Abraham GEIGER, to whose "Zeitschrift" Kohler became a contributor at an early age, strongly influenced his career and directed his steps to America. In 1869 he accepted a call to the pulpit of the Beth-El congregation in Detroit; in 1871 he became rabbi of the Sinai congregation in Chicago. In 1879 he succeeded his father-in-law, David EINHORN, as rabbi of Temple Beth-El, New York city; his brother-in-law, Emil G. Hirsch, becoming his successor in Chicago. Feb. 26, 1903, he was elected to the presidency of Hebrew Union College, Cincinnati.

From the time of his arrival in America, Kohler actively espoused the cause of Reform Judaism; he was one of the youngest members of the Philadelphia Jewish Rabbinical Conference of 1869, and in 1885 he convened the Pittsburg Rabbinical Conference, which adopted the so-called "Pittsburg Platform," on which Reform Judaism in America stands. While in Chicago he introduced Sunday lectures as supplementary to the regular Sabbath service. Kohler served for many years as president of the New York Board of Ministers, and is at present honorary president of the Central Conference of American Rabbis. He was editor-in-chief of the "Sabbath Visitor," a Jewish weekly for the young, from 1881 to 1882, and of "The Jewish Reformer," a weekly devoted to the interests of Reform Judaism, in 1886. He has for a number of years been deeply interested in the "Jewish Chautauqua" movement. Shortly before his departure from New York in 1903 he delivered a series of six lectures at the Jewish Theological Seminary on "Apocryphal Literature."

Kohler has been always an active and prolific contributor to the Jewish and Semitic scientific press, European and American; among the periodicals to which he has most frequently contributed scientific articles are Geiger's "Zeitschrift," the journal of the German Oriental Society, "Hebraica," the "Jewish Quarterly Review," the "Allgemeine Zeitung des Judenthums," the "Jewish Times," the "American Hebrew," "Menorah Monthly," "Zeitgeist," and "Unity." Among his published scientific studies and lectures are: "On Capital Punishment" (1869); "The Song of Songs" (1877); "Backwards or Forwards," a series of lectures on Reform Judaism (1885); "Ethical Basis of Judaism" (1887); "Church and Synagogue in Their Mutual Relations" (1889); "A Guide to Instruction in Judaism" (1899). He also edited the German collected writings of David Einhorn (1880).

BIBLIOGRAPHY: *Who's Who in America*, 1904; Markens, *The Hebrews in America*, pp. 238-239; *American Jewish Year Book*, 5664; *The American Hebrew*, Sept. 18, 1891; Leon Hühner, in *The Jewish Exponent*, March 13, 1903.

A.

KOHLER, MAX J.: American lawyer; born at Detroit, Mich., May 22, 1871; son of Kaufmann Kohler; educated at the College of the City of New York (B.S. 1890) and at Columbia Law School (M.A. 1891, and LL.B. 1893). From 1894 to 1898 he was assistant United States district attorney in New York city, and, though a Democrat, was appointed special United States district attorney by the Republican administration in 1898, a position which he held for a year. He was admitted to practise before the Supreme Court of the United States in 1902.

Kohler is occasional lecturer to the Y. M. H. A. of Philadelphia and the Jewish Chautauqua Society, and is a frequent contributor to the Jewish press. He edited Charles P. Daly's "Settlement of the Jews in North America" (New York, 1893), and is the author of "Rebecca Franks: an American Jewish Belle of the Last Century" (*ib.* 1894), of a pamphlet on Chinese exclusion legislation, and of the chapter entitled "Jews and Judaism in America" in Halliday and Gregory's "The Church in America and Its Baptism of Fire" (*ib.* 1896). He has contributed also to the publications of the American Jewish Historical Society, of which he is a secretary.

A.

KOHN, ABRAHAM: Austrian rabbi; born Jan. 1, 1807, at Zaluzan, Bohemia; died at Lemberg, Galicia, Sept. 7, 1848. In 1828 he entered the

University of Prague, where he applied himself to philosophy, while devoting his spare time to rabbinical studies. In July, 1833, he was called as rabbi to Hohenems, Vorarlberg, where he remained for eleven years. Besides organizing various charitable societies, he greatly improved the educational facilities for the young, and introduced many wholesome reforms into the public service. In May, 1844, he accepted the rabbinate of Lemberg. Here in a comparatively short time he opened a well-equipped "Normalschule" of which he was the superintendent, dedicated a new temple, abolished many old abuses, and did not rest until the degrading tax on kasher meat and Sabbath candles, imposed upon the Jewish community by the government, was removed.

But while the better element rallied about him, the enemies of culture and progress were actively engaged in embittering his life and in undermining his growing popularity. Impelled by unbounded fanaticism, and encouraged by the lawless conditions prevailing in 1848, they finally concocted a plan to take Kohn's life. On Sept. 6, 1848, a man, hired by the fanatical clique, entered Kohn's kitchen and poisoned the dinner. While the other members of his family recovered, Kohn and his youngest child died the following day. A wearisome trial ensued; but for some unknown reasons it was suppressed.

Kohn contributed articles on various subjects (*e.g.*, on Jewish mourning customs and on music for the holy days) to Geiger's "Wiss. Zeit. Jüd. Theol." iii. and iv.

S. A. Gu.

KOHN (KAHANA), DAVID: Russian archeologist and Hebrew writer; born at Odessa in 1838. He received a rabbinic education; but at the age of fourteen he took up the study of medieval literature and modern languages, and soon afterward, history and archeology. Of his early essays those on fossil animals ("Ha-Meliẓ," 1866), on the life of Rabbi Solomon Bennet (*ib.* 1868), and on the Messianic movement and the origin of Ḥasidism ("Ha-Shaḥar," 1873–75) may be especially mentioned. Lately he has contributed to "Ha-Shiloaḥ."

Kohn was editor of the Aḥiasaf edition of Abraham ibn Ezra's "Diwan" (1894), as well as of Jacob Emden's curious autobiography and various other important works. He was also the first to attack Graetz's criticism of the Biblical text, and to defend the Masorah. Besides the works already mentioned, he has published: "Meḥkere Ḳohelet ben Dawid" (Wilna, 1880), a historico-critical introduction to the Book of Ecclesiastes; "Masoret Seyag le-Miḳra," in defense of the Masorah against the hypercriticism of modern exegetes (1880); "Or we-Ḥoshek" (Yaroslav, 1887).

Bibliography: *Aḥiasaf*, 1894; Slouschz, *La Renaissance de la Littérature Hébraïque*, p. 190.

H. R. N. Sl.

KOHN (PAP), DAVID: Hungarian political economist; born Dec. 2, 1868, at Csecse, Hungary; studied law in Budapest. In 1890 he attracted general attention by his essay "Gabona Határidöüzlet," on buying grain on margin, which was crowned by the Hungarian Academy of Sciences. In 1893 he was elected member of the academy's commission of political economy. In 1896 he Magyarized his name, changing it to "Pap."

Kohn's works include: "Az Olasz Valuta Története" (1893), on the history of the Italian Valuta; "Adók Reformjáról" (1894), on tax reform (both of these works were crowned by the Hungarian Academy); "A Telepités Kérdése" (1896); "Kvóta, Vámszövetség Bank" (1897); "A Magyar Agrármozgalom" (1897); "Az Allami Zárszámadás Joga" (1897).

Bibliography: *Pallas Lex.* x., xviii.

KOHN, GABRIEL BEN REUBEN ISRAEL: Hungarian Talmudist; born at Vagujhely about 1765; died at Rechnitz Dec. 29, 1850, where he became rabbi in 1822. The family adopted the name of Engelsmann. Kohn was strictly Orthodox, and opposed to the slightest change of ritual usage, as, for instance, the removal of the almemar from the center of the synagogue ("Allg. Zeit. des Jud." 1847, pp. 545, 657). He wrote: "'Ene Yisrael," in two parts: (1) "Me'or 'Enayim" (Vienna, 1822), annotations to Baba Batra and Shebu'ot; and (2) "Pene Moshe" (*ib.* 1825), to Ḥullin; "Derashot Gabri" (Frankfort-on-the-Oder, 1826), in two parts: (*a*) thirty-two derashot; and (*b*) "Teshubot Gabri," thirty-seven responsa; "Geburot Adonai" (Krotoschin, 1835), a commentary on the Passover Haggadah, with a German translation. Among his disciples was Abraham Placzek, acting "Landesrabbiner" of Moravia.

D. S. Man.

KOHN, JAKOB: Austrian jurist; born Dec. 24, 1847, in Papa, Hungary; died at Vienna Jan. 20, 1902. He studied jurisprudence at the University of Vienna, and entered the service of the government in 1872. On Sept. 7, 1894, Kohn was appointed "Landesgerichtsrath" at the Vienna Landesgericht for civil cases, and he held the office until his death. Kohn was the first Jewish "Rathssekretär" and "Landesgerichtsrath" in Austria. He assisted in founding the Oesterreich-Israelitische Union, the first Jewish political society in Vienna, and was for fourteen years its vice-president.

S. L. Y.

KOHN, JOEL BEER: Russian writer; born at Volozhin 1816; died in Wilna Nov. 17, 1871. He translated Fénelon's "Les Aventures de Télémaque" into Hebrew, under the title "Kebod Elohim" (books i., ii., Königsberg, 1851; books iii.–xxi., Wilna, 1853); wrote a biography of Æsop and translated some of his fables into Hebrew under the title "Ḥayye Asaf" (Warsaw, 1858); and composed a double commentary on Yalḳuṭ (Wilna, 1864).

Bibliography: Zeitlin, *Kiryat Sefer*, p. 177; Benjacob, *Oẓar ha-Sefarim*, pp. 186, 236; Zedner, *Cat. Hebr. Books Brit. Mus.* p. 667.

H. R. M. Sc.

KOHN, MAIER: Ḥazzan in Munich, Bavaria; born toward the close of the eighteenth century. He was the predecessor of Solomon Naumbourg, afterward chief cantor of Paris. Kohn has the distinction of having been the first in Germany to abolish the irregular singing of ḥazzan and the "meshorrerim" (male choir) and to substitute therefor a more modern musical service. Numerous traditional chants collected and harmonized by him were published together with compositions of non-Jewish composers under the title "Münchner Synagogengesänge" (1839). They had become popular in Bavaria long before their publication. The music was printed from right to left in order to enable the author to supply the texts in the original Hebrew characters.

S. A. Kai.

KOHN, MESHULLAM SOLOMON. See Cohn, Meshullam Solomon.

KOHN, SAMUEL: Hungarian rabbi and author; born at Baja, Hungary, Sept. 21, 1841; grandson of the rabbi of that place, Götz Schwerin Kohn; educated at the gymnasium in his native city, and at the Jewish theological seminary and the University of Breslau. In 1866 he was called as rabbi to Budapest, where he was the first to introduce sermons in the Hungarian language. He was one of the founders and for a long time president of the Hungarian Literary Society. Since 1898 Kohn has lectured on homiletics in the rabbinical school at Budapest.

Kohn is a prolific writer. His published works include: "Der Prophet Elijah in der Legende," Breslau, 1863; "De Pentateucho Samaritano Ejusque cum Versionibus Antiquis Nexu," Leipsic, 1865; "Samaritanische Studien: Beiträge zur Samaritanischen Pentateuch-Uebersetzung und Lexicographie," Breslau, 1868; "Wie Haben Wir Unsere Emancipation Aufzufassen?" Pest, 1868; "Zsinagógai Szónoklatok," a collection of Hungarian sermons, Budapest, 1875; "Zur Sprache, Literatur, und Dogmatik der Samaritaner," Leipsic, 1875; "Die Hebräischen Handschriften des Ungarischen National-Museums zu Budapest" (Hungarian and German), Budapest, 1877; "Mordechai ben Hillel, Sein Leben, und Seine Schriften, Nebst 6 Bisher Unedirten Hebräischen Beilagen" (reprinted from "Monatsschrift"), Breslau, 1878; "Héber Kútforrások és Adatok Magyarország Történelméhez," on Hebrew sources and data of Hungarian history, Budapest, 1881; "A Zsidók Története Magyarországon," first part of a history of the Jews in Hungary, *ib.* 1884; "A Szombatosok, Történetük, Dogmatikájuk és Irodalmuk," on the history, dogmatics, and literature of the Sabbatarians, in Hungarian, *ib.* 1889; in German, Leipsic, 1894; "Kohn Schwerin Götz Bajai és Bácsmegyei Förabbi Elete és Korrajz," on the life and times of Götz Schwerin Kohn, Budapest, 1899.

Kohn edited with M. Kayserling "Die Ungarisch-Jüdische Wochenschrift," *ib.* 1871; he also wrote the articles on the Jews, their history and literature, in the Hungarian encyclopedia "Pallas." He has been a frequent contributor to the leading Hebrew, German, and Hungarian periodicals, and has also published various addresses delivered on special occasions, among them being: "Gedächtnisrede auf Dr. W. A. Meisel," *ib.* 1868; "Rede bei Enthüllung des Meisel-Denkmals," *ib.* 1868; "Was Haben die Jüngsten Vorgänge Innerhalb der Ungarischen Judenheit zu Bedeuten?" *ib.* 1870; "Die Beiden Gotteswege, Gedächtnisrede auf Dr. Z. Frankel," *ib.* 1875; funeral orations (in Hungarian) of Franz Deák, *ib.* 1876, and Crémieux, *ib.* 1880.

S. M. K.

KOHN, SAMUEL: Russian physician; born at Zhagory, government of Kovno, Feb. 11, 1865. After he had studied Talmud under private tutors, Kohn attended the gymnasium at Libau, Courland, and was graduated from the University of Dorpat as doctor of medicine. Kohn has contributed to "Ha-Meliẓ" many articles on medical subjects. In 1902 he published in "Ha-Meassef," a supplement to "Ha-Meliẓ," an article entitled "Ha-Rofe," on the physician in the written and oral law. He wrote, besides, a work entitled "Ot Berit" (Cracow, 1903), on the history of circumcision from Abraham to the present time. This is the first work of its kind in Hebrew having a scientific value and in which circumcision is treated at length.

Kohn is now (1904) practising as a physician at Velizh, government of Vitebsk.
H. R. B. Ei.

KOHN, SOLOMON: Austrian ghetto poet; born March 8, 1825, at Prague. He studied philosophy and mathematics at the university in that city (1844–46), and then entered into business with his father, who was a wool-merchant. His first story, entitled "Gabriel," appeared over the initials "S. K." in 1852 in "Sippurim." Although full of exaggeration and improbabilities, the strong color and passionate movement of the narrative, and the rarity of Jewish stories at the time, caused it to be translated in the Jewish papers of many lands. An English translation, which appeared in the Tauchnitz series, made the author's name known in England and America; a second edition in German (2 vols.) was published at Jena in 1875. Thus it came about that Kohn was introduced into the literary world as "the author of 'Gabriel,'" although his later works are better and more Jewish. It is a curious fact that "Gabriel" was read in Germany mostly in its English garb without the name of the author becoming known. Kohn secured his copyright twenty years after the first publication of his work. His ghetto stories have always been the best and most truthfully drawn of all his works; these have appeared in periodicals (*e.g.*, in the "Israelit," Mayence) and as independent books. The following of his stories may be mentioned: "Dichterhonorar"; "Der Retter"; "Bilder aus dem Alten Prager Ghetto"; "Die Starken"; and the longer romances, "Ein Spiegel der Gegenwart," 3 vols., Jena, 1875; "Die Silberne Hochzeit," Leipsic, 1882; "Prager Ghettobilder," *ib.* 1884; "Neue Ghettobilder," *ib.* 1886; "Des Stadt-Schreibers Gast," 1886; "Gerettete Ehre," *ib.* 1886; "Ein Deutscher Minister," *ib.* 1890; "Der Lebensretter und Andere Erzählungen," Berlin, 1893; "Fürstengunst," *ib.* 1894; "Ein Deutscher Kaufmann," his chief work, Zurich, 1894.

Though his mercantile career was only temporarily successful, Kohn is personally respected and recognized as a literary power. For more than forty years he has been chosen to serve on the presiding board of the Prague congregation.

The aged poet still publishes short stories, one of the latest of which is "Josef Singer," in the "Union" calendar, Vienna, 1903.

KOHN, TOBIAS: American merchant and silk-manufacturer; born at Prague, Bohemia; died at Hartford, Conn., 1898. He emigrated to America as a result of the revolution of 1848–49. Kohn was a manufacturer of silk braid, and he took part of his machinery with him. He first settled in New York, but removed to Hartford, Conn., and by the year 1858 had established a good business there. He soon occupied an entire block (which came to be known as the "Kohn block") with his braid-works, and during all this time was experimenting constantly with silk-weaving, then an absolute novelty in the United States. In 1859 he wove the first piece of silk goods produced by a loom in that country.

Kohn devised machinery and methods of his own, which at first he did not protect; but between 1865 and 1868 he took out several patents, and his success had great influence in establishing the silk-industry in Paterson, N. J., where some of his inventions were used. Family misfortunes afterward depleted his fortune and saddened his later life.
A. D. Ba.

KÖHNE, KARL: German jurist and economist; born at Danzig March 21, 1863. Since 1902 he has been privat-docent in commercial and technical law at the technical high school at Charlottenburg, near Berlin. He is the author of: "Geschlechtsverbindungen der Unfreien nach Fränkischem Recht," Breslau, 1888; "Der Ursprung der Stadtverfassung in Worms, Speyer und Mainz," *ib.* 1890; "Das Hansgrafenamt: Ein Beitrag zur Gesch. der Kaufmannsgenossenschaften und der Behördenorganisation," Berlin, 1893; "Die Arbeitsordnung vom Standpunkte der Vergleichenden Rechtswissenschaft," Stuttgart, 1901; "Die Arbeitsordnungen im Deutschen Gewerberecht," Berlin, 1901; "Das Recht der Mühle bis zum Ende der Karolingerzeit," 1904. Together with Richard Schröder, he edited the first part of the "Oberrheinische Stadtrechte."
s. L. La.

KOHNER, MORITZ: Founder of the Deutsch-Israelitische Gemeindebund; born at Neuern, Bohemia, April 4, 1818; died March 21, 1877. Destined for a mercantile career, he entered the business house of Samson D. Fleischl of Leipsic, with which he remained until he established a business of his own. In 1868 he was elected president of the Jewish community, and in 1874 he took his seat in the municipal council, being the first Jew to enter that body.

Kohner's interest in Judaism induced him to found in 1869 the Deutsch-Israelitische Gemeindebund, which he directed as president until his death.

s. M. K.

KOHUT, ADOLPH: German writer; born Nov. 10, 1848, at Mindszent, Hungary; brother of Alexander Kohut. For three years he attended the Jewish Theological Seminary in Breslau. He then studied philosophy, literature, and Oriental languages at the university in that city, and obtained his Ph.D. degree at Jena in 1877. Meanwhile he was active in journalistic work, becoming the editor successively of the "Berliner Zeitung," the "Breslauer Nachrichten," the "Düsseldorfer Zeitung," the "Schleswig-Holsteinische Tageblatt" (Kiel), the "Tribun" (Berlin), the "Orchester," the "Siegfried," and the "Kieler Nachrichten."

In Düsseldorf and Dresden he was appointed musical and dramatic critic of the two leading dailies. He published a "History of the Dresdener Hoftheater" as well as a long series of biographical monographs, on Rossini, Meyerbeer, Auber, Rubinstein, Weber, and others. Several of the monographs were issued by the publishers Reclam of Leipsic, in their Universalbibliothek. In addition to these, he published many volumes on musical and dramatic criticism. He edited a volume of Weber's unpublished letters; wrote the standard biography of the poet Theodor Körner (now used as a text-book in many of the German high schools); issued several volumes of biography dealing with princes and statesmen, notably on Bismarck and Emperor William I.; and published several volumes of translations from the Hungarian, especially the works of the Hungarian national poet Alexander Petöfy. He published also critical editions of a number of German classics.

While editor of the "Berliner Zeitung," his attitude toward Bismarck and the government was so aggressively antagonistic that on Sept. 13, 1884, he was expelled from Prussia, remaining in comparative obscurity in Dresden until his pardon was granted in 1889. Emperor Francis Joseph conferred upon him the Cross of Merit, with the Crown, for his services to Hungarian literature, and in 1892 made him Knight of the Order of Francis Joseph. Kohut was recently elected a member of the Academy of Sciences in Budapest, and for many years was president of the German-Hungarian Society in Berlin.

Besides publishing more than 200 books and monographs, Kohut has been a frequent contributor to the literary periodicals of Germany, Hungary, and America. Of his works of Jewish interest may be mentioned the following: "Alexander von Humboldt und das Judenthum," Leipsic, 1871; "Die Goldenen Worte der Bibel," *ib.* 1873; "Was Lehrt die Bibel über den Gehorsam Gegen Staat und Obrigkeit?" Düsseldorf, 1875; "Aus Meiner Rheinländischen Mappe," *ib.* (containing many pages on Heine); "Heinrich Heine und die Frauen," *ib.*; "Moses Mendelssohn und Seine Familie," Dresden, 1886; several volumes on Ferdinand Lassalle; "Gesch. der Deutschen Juden," Berlin, 1898; "Berühmte Israelitische Männer und Frauen," 2 vols., Leipsic, Reudnitz, 1900–1. The two last-named works comprise about 1,750 pages, and contain a vast amount of historical and biographical material, somewhat unsystematically put together and not always reliable, but, nevertheless, valuable. They are of particular interest because of the great number of photographs and other illustrative matter, brought together for the first time, from sources either unknown or not readily accessible.

His wife, **Elizabeth Kohut Mannstein,** is a noted singer, and was for many years "Hofopernsängerin" in Dresden. His son, **Oswald Kohut,** is an author and journalist.

KOHUT, ALEXANDER (known in Hebrew literature as רחי"ק): Rabbi and Orientalist; born April 22, 1842, at Felegyhaza, Hungary; died May 25, 1894, in New York. He belonged to a family of rabbis, the most noted among them being R. Israel Paloṭa (פאלוטו), his great-grandfather, R. Amram (called "The Gaon," died in Safed, Palestine, where he had spent the last years of his life), and R. Ḥayyim Kitssee (קיצעה), rabbi in Erza, who was his great-granduncle. The last-named was the author of several rabbinic works (Reines, "Dor Dor we-Ḥakamaw," p. 94, note).

Early Training.

Kohut's father, Jacob Kohut, was a great linguist, and was well versed in rabbinic literature. He was so poor that he could not afford to send his son to the village school. There being no Hebrew school ("ḥeder") in his native town, Alexander reached his eighth year without having learned even the rudiments of Hebrew or Hungarian. At a very tender age, while selling his mother's tarts in the market-place, he was kidnaped by Gipsies, because of his extraordinary beauty. His family soon removed to Kecskemet, where Kohut received his first instruction. He attended the gymnasium and at the same time studied Talmud with an old scholar, Reb Gershom Lövinger. In his fifteenth year, while trying to decipher some foreign words in the Talmud with the aid of Landau's Dictionary, he conceived the plan of writing a complete lexicon of the Talmud, not having found the etymology of many words in Landau (see the autobiographical sketch of Kohut in the "American Hebrew," 1890; and in Reines, *l.c.* p. 96).

After finishing the gymnasium course in Kecskemet, he removed to Budapest. Anxious to continue his rabbinical studies, he went to Breslau. In 1865 he received a call to the rabbinate of Tarnowitz, Upper Silesia. He then spent another year in Breslau, devoting his time to Oriental philology and Semitics. During the previous year he received his Ph.D. degree from the University of Leipsic, his dissertation being "Ueber die Jüdische Angelogie und Daemonologie in Ihrer Abhängigkeit vom Parsismus." The essay was published by the "Deutsche Morgenländische Gesellschaft" in 1866, it being the first Jewish work issued under the auspices of that society. He obtained his rabbinical diploma in 1867. It was in 1864 that he began to collect materials for a critical edition of the "'Aruk" of Nathan ben Jehiel. In 1867 he was called to the rabbinate of Stuhlweissenburg, Hungary. Baron Joseph von Eötvös, the famous Hungarian poet and novelist, and afterward "Cultusminister," appointed him superintendent of all the schools in the county, this being the first time that such a position had been tendered to a Jew. The Congress of Jewish notables held in Budapest in 1868 appointed Kohut its secretary. Notable among his literary labors falling in this period is his study entitled "Etwas über die Moral und Abfassungszeit des Buches Tobias," originally published in Geiger's "Jüd. Zeit." vol. x., several monographs in the "Z. D. M. G." which developed his original thesis concerning Persian influence on Judaism, and his "Kritische Beleuchtung der Persischen Pentateuch-Uebersetzung des Jakob ben Joseph Tavus" (Leipsic, 1871). Among his literary remains are to be found materials for a critical edition of the Persian text of this version. In 1872 he was elected chief rabbi of Fünfkirchen, Hungary, remaining there eight years. By this time his reputation as a Hungarian orator had spread so far that many noted statesmen and church dignitaries came to hear him from distant towns.

Talmud Dictionary.

About 1873 Kohut began to compile his Dictionary of the Talmud, entirely in German, encouraged by the promise of a Christian nobleman to bear all costs of publication. He had proceeded as far as the third letter of the alphabet when he found that the work was assuming such gigantic proportions as to preclude the possibility of its being confined within the projected limits. Arduous as the merely mechanical labor of copying the manuscript was, he rewrote what he had written, intending to publish the original text of the old "'Aruk," with a German commentary. On the advice of Zunz and Buber, however, who argued that the "'Aruk," being a national classic, ought to be compiled in Hebrew throughout, he again rewrote the work in that language, the labor of copying occupying two more years. It is this trait of untiring patience, which scorned all obstacles, that made the publication of vol. i., in 1878, possible. His Mæcenas, in the meantime, had died, and Kohut was left to bear the burden of expense alone, save for the subvention of the Academy of Sciences in Vienna and of the Cultusministerium in Berlin. He called his work "Aruch Completum" or "'Aruk ha-Shalem," and its production occupied twenty-five years of his life. The first four volumes were printed during his residence in Hungary, and the last four during his sojourn in America, covering a period of fourteen years (Vienna, 1878–92); the supplement appearing from a New York press; and the whole work aggregating more than 4,000 double-column pages. Seven manuscripts of the "'Aruk" were used by the editor in determining the etymology of the words, and countless doubtful and corrupted passages in the Talmud were thus corrected and restored. Kohut identified in an elaborate special study (printed in the supplement) the often unacknowledged sources of Nathan ben Jehiel's information, though everywhere defending him against the charge of plagiarism. The "'Aruk" has been justly characterized as one of the monuments of Hebrew literature.

In 1880 Kohut was called to Grosswardein, Hungary, where he remained until 1884. While there he published (1881) "A Szidók Története, a Biblia Befejezésctöl a Jelenkorig" (introduced into many schools in Hungary as a text-book), and translated the entire Bible into Hungarian. Part of the manuscript was, however, lost, and the work never appeared in print. At Grosswardein he became acquainted with Koloman von Tisza, prime minister of Hungary, who, hearing him speak at a national gathering of notables, was so carried away by his eloquence that he caused him to be called to the Hungarian parliament as representative of the Jews.

In 1885 Kohut was elected rabbi of Congregation Ahavath Chesed in New York. His arrival in the United States was the signal for rallying the conservative forces of American Jewry; and it was not long before he was bitterly assailed by the radical wing. A series of lectures on "Ethics of the Fathers," only the first part of which was printed in book form (New York, 1885), clearly set forth his conservatism; and so marked was this attitude and the influence it had upon the public mind that the leaders of Reform felt called upon to institute the memorable Pittsburg Conference (see Conferences, Rabbinical), to accentuate their own advanced views and their independence of the historic traditions of the past.

At New York.

Kohut was associated with the Rev. Sabato Morais in founding the Jewish Theological Seminary of New York, becoming one of its advisory board, and being active as professor of Talmudic methodology up to the time of his death. In 1889, on the occasion of his finishing the "Aruch Completum," he was the recipient of many honors, notably at the hands of various learned bodies in Europe. In 1891 he was appointed examiner in rabbinics at Columbia College. In March, 1894, while delivering a stirring eulogy on Kossuth, he was stricken in his pulpit, and, after lingering a few weeks, expired on the eve of the Sabbath.

A volume containing memorial addresses and tributes was published by Congregation Ahavath Chesed in 1894 in New York; and another, containing learned essays by forty-four noted scholars in Europe and America, entitled "Semitic Studies in Memory of Rev. Dr. Alexander Kohut," was published in Berlin in 1897 by his son, G. A. Kohut. The latter work contains a memoir of Kohut's life written by his brother, Dr. Adolph Kohut.

A complete list of Kohut's published writings has been compiled by G. A. Kohut, in the appendix to the "Proceedings of the Fourth Biennial Convention of the Jewish Theological Seminary Association" (New York, 1894) and in "Tributes to the Memory of Rev. Dr. Alexander Kohut," pp. 49–64 (*ib.* 1894).

s. G. A. K.

His son, **George Alexander Kohut,** is an American writer and bibliographer; born Feb. 11, 1874, at Stuhlweissenburg, Hungary. He was educated at the gymnasium in Grosswardein, at the public schools in New York, at Columbia University (1893–1895), Berlin University, and the Berlin Hochschule für die Wissenschaft des Judenthums (1895–97). In the year 1897 he became rabbi of the Congregation Emanu-El, Dallas, Texas, a post which he occupied for three years. In 1902 he became superintendent of the religious school of Temple Emanu-El in New York, and is now (1904) assistant librarian of the Jewish Theological Seminary of America.

Kohut is the author of: The Index to the Italian words in the "Aruch," published in A. Kohut's "Aruch Completum," vol. viii. (1892); "Early Jewish Literature in America" ("Publications Am. Jew. Hist. Soc." No. 3, 1895, pp. 103–147); "Sketches of Jewish Loyalty, Bravery, and Patriotism in the South American Colonies and the West Indies," in Simon Wolf's "The American Jew as Patriot, Soldier, and Citizen" (1895); "Martyrs of the Inquisition in South America" (1895); "A Memoir of Dr. Alexander Kohut's Literary Activity," in "Proceedings of the Fourth Biennial Convention of the Jewish Theological Seminary Assoc."; "Bibliography of the Writings of Prof. M. Steinschneider," in the "Steinschneider Festschrift" (Leipsic, 1896); "Simon de Caceres and His Project to Conquer Chili" (New York, 1897); "Ezra Stiles and the Jews" (*ib.* 1902), and many other monographs on historical subjects and on folklore. He also edited "Semitic Studies in Memory of Rev. Dr. Alexander Kohut" (Berlin, 1897), and, since 1902, has edited "Helpful Thoughts," now the "Jewish Home," a monthly periodical published in New York.

KOKEBE YIẒḤAḲ: Hebrew annual; published at Vienna from 1845 to 1872 by M. Stern, and from 1872 to 1873 by M. Weissmann (Chajes). The annual was devoted to literary history, philology, exegesis, and Hebrew poetry, and many able dissertations by Jellinek, Luzzatto, and other leading scholars of the time are to be found in it. The last number was reviewed by A. Geiger in his "Jüdische Zeitschrift," i. 217–223, ii. 71. A second edition of the first annual was published at Vienna in 1847.

G. I. Br.

KOL BO: Collection of ritual and civil laws, the meaning of the title being "all is in it"; who its author was has not yet been ascertained. The work in content resembles earlier codes, as, for instance, the Ṭurim or the "Orḥot Ḥayyim," though in its form it is very different; it does not pretend to any order; the laws of the Oraḥ Ḥayyim are found among the laws of the Yoreh De'ah and those of the Eben ha-'Ezer among those of the Oraḥ Ḥayyim;

many laws are entirely missing in the "Kol Bo." It is peculiar in that some of the laws are too briefly stated, while others are stated at great length, without division into paragraphs. After the regular code, terminating with the laws of mourning (No. 115), there comes a miscellaneous collection, containing the "taḳḳanot" of R. Gershom and of Jacob Tam, the "Ma'aseh Torah" of Judah ha-Nasi I., the legend of Solomon's throne, the legend of Joshua b. Levi, a cabalistic dissertation on circumcision, a dissertation on gemaṭria and noṭariḳon, sixty-one decisions of Eliezer b. Nathan; forty-four decisions of Samson Zadok (TaShBeẒ), decisions of Isaac of Corbeil, and responsa of Perez ha-Kohen, decisions of Isaac Orbil, of the geonim Naṭronai, Hai, Amram, Nahshon, laws of the "miḳweh" taken from Perez's "Sefer ha-Miẓwot," responsa, and finally the law of excommunication of Naḥmanides. For this reason it is quoted under the title of "Sefer ha-Liḳḳuṭim" in "Abḳat Rokel," No. 13.

As to the author of the "Kol Bo," there are different opinions; Joseph Caro, in saying that the words of the "Kol Bo" are identical with those of the "Orḥot Ḥayyim" of Aaron b. Jacob ha-Kohen, seems to have suggested that the "Kol Bo" is an abridgment of the "Orḥot Ḥayyim." This is also the opinion of Azulai, and according to Aaron Schlitzstadt, the epitomizer was a certain Shemariah b. Simḥah, in the fourteenth century (see Benjacob, "Debarim 'Attiḳim," ii. 9); others think that it was Joseph b. Tobiah of Provence. By some scholars it is attributed to a pupil of Perez ha-Kohen; by others it is identified with the "Sefer ha-Nayyar"; and by Gedaliah ibn Yaḥya it is attributed to Isaac b. Sheshet (comp. "Sifte Yeshenim"). Benjacob ("Kerem Ḥemed," viii. 167 *et seq.*) concluded that the author of the "Kol Bo" was Aaron b. Jacob ha-Kohen, author of the "Orḥot Ḥayyim," and that the "Kol Bo" was an earlier form of the "Orḥot." Its lack of system and the inadequacy of its authorities are due, Benjacob considers, to the youth of the author. Zunz ("Ritus," p. 180) refutes Benjacob's arguments, his opinion being that the "Kol Bo" is a compendium of the "Orḥot Ḥayyim." The oldest edition bears neither place nor date, but Zedner ("Cat. Hebr. Books Brit. Mus." p. 191) conjectures that it was published at Naples in 1490 (see INCUNABULA); the second edition is dated "Constantinople, 1519."

A. M. SEL.

ḲOL MEBASSER. See PERIODICALS.

KOL NIDRE (כל נדרי = "all vows"): Prayer recited in the synagogue at the beginning of the evening service on the Day of Atonement; the name is taken from the opening words. The "Kol Nidre" has had a very eventful history, both in itself and in its influence on the legal status of the Jews. Introduced into the liturgy despite the opposition of rabbinic authorities, repeatedly attacked in the course of time by many halakists, and in the nineteenth century expunged from the prayer-book by many communities of western Europe, it has often been employed by Christians to support their assertion that the oath of a Jew can not be trusted.

Form of Prayer.

Before sunset on the eve of the Day of Atonement, when the congregation has gathered in the synagogue, the Ark is opened and two rabbis, or two leading men in the community, take from it two Torah-scrolls. Then they take their places, one on each side of the ḥazzan, and the three recite in concert a formula beginning with the words בישיבה של מעלה, which runs as follows:

> "In the tribunal of heaven and the tribunal of earth, by the permission of God—blessed be He—and by the permission of this holy congregation, we hold it lawful to pray with the transgressors."

Thereupon the cantor chants the Aramaic prayer beginning with the words "Kol Nidre," with its marvelously plaintive and touching melody, and, gradually increasing in volume from pianissimo to fortissimo, repeats three times the following words:

> "All vows [כל נדרי], obligations, oaths, and anathemas, whether called 'ḳonam,' 'ḳonas,' or by any other name, which we may vow, or swear, or pledge, or whereby we may be bound, from this Day of Atonement until the next (whose happy coming we await), we do repent. May they be deemed absolved, forgiven, annulled, and void, and made of no effect; they shall not bind us nor have power over us. The vows shall not be reckoned vows; the obligations shall not be obligatory; nor the oaths be oaths."

The leader and the congregation then say together:

> "And it shall be forgiven all the congregation of the children of Israel, and the stranger that sojourneth among them, seeing all the people were in ignorance" (Num. xv. 26).

This also is repeated three times. The ḥazzan then closes with the benediction, שהחיינו: "Blessed art thou, O Lord our God, King of the Universe, who hast preserved us and hast brought us to enjoy this season." In many congregations Num. xiv. 19–20 is recited before this benediction. After it the Torah-scrolls are replaced, and the customary evening service begins.

Origin.

The tendency to make vows was so strong in ancient Israel that the Pentateuchal code found it necessary to protest against the excessive estimate of the religious value of such obligations (Deut. xxiii. 23). Rash and frequent vows inevitably involved in difficulties many who had made them, and thus evoked an earnest desire for dispensation from such responsibilities. This gave rise to the rite of absolution from a vow ("hattarat nedarim") which might be performed only by a scholar ("talmid ḥakam"), or an expert ("mumḥeh") on the one hand, or by a board of three laymen on the other. On account of the passionate nature of the Jews and of Orientals in general, however, and in view of their addiction to making vows, it might easily happen that these obligations would afterward be wholly forgotten and either not be kept or be violated unintentionally (see L. Löw, "Die Dispensation von Gelöbnissen," in "Gesammelte Schriften," iii. 361 *et seq.*). The religious consciousness, which felt oppressed at the thought of the non-fulfilment of its solemn vows, accordingly devised a general and comprehensive formula of dispensation which was repeated by the ḥazzan in the name of the assembled congregation at the beginning of the fast of Atonement. This declared that the petitioners, who were seeking reconciliation with God, solemnly retracted in His presence all vows and oaths which they had taken during the period intervening between the previous Day of Atonement and the present one, and made them null and void from the beginning, entreating in their stead pardon and forgiveness from the Heavenly Father.

This is in accordance with the older text of the formula as it is preserved in the "Siddur" of Amram Gaon (ed. Warsaw, i. 47a) and in the "Liḳḳuṭe ha-Pardes" (p. 12b). The "Kol Nidre" was thus evidently developed from the longing for a clear conscience on the part of those seeking reconciliation with God. The date of the composition of the prayer and its author are alike unknown; but it was in existence at the geonic period.

Adoption into the Ritual.

The readiness with which vows were made and the facility with which they were annulled by the scribes gave the Karaites an opportunity to attack the Rabbinites, and forced the Geonim to minimize the power of dispensation. Yehudai Gaon of Sura (760), author of the "Halakot Pesuḳot," went so far as to forbid any study whatsoever of Nedarim, the Talmudic treatise on oaths (Alfasi on Nedarim, end; L. Löw, *l.c.* p. 363). Thus the "Kol Nidre" was discredited in both of the Babylonian academies and was not accepted by them (S. K. Stern, in "Ḳebuẓat Ḥakamim," ed. Warnheim, 1861), as is affirmed by the geonim Naṭronai (853–856) and Hai Bar Naḥshon (889–896; Müller, "Mafteaḥ," p. 103; Cassel, "Teshubot Geonim Ḳadmonim," p. 9; Zunz, "Ritus," p. 189; Ṭur Oraḥ Ḥayyim, § 619; "Kol Bo," § 68). Amram Gaon in his "Siddur" (*l.c.*) calls the custom of reciting the "Kol Nidre" a foolish one ("minhag shetut"). According to Naṭronai, however, it was customary to recite the formula in various lands of the Jewish dispersion, and it is clear likewise from Amram's "Siddur" (ii. 37a) that the usage was wide-spread as early as his time in Spain. But the geonic practise of not reciting the "Kol Nidre" was long prevalent; it has never been adopted in the Catalonian or in the Algerian ritual (Zunz, *l.c.* p. 106); and there were always many congregations in lands where the Provençal and Spanish ritual was used which did not recite it ("Orḥot Ḥayyim," p. 105d; comp. also RaN to Ned. 23b, where it is said: "There are some congregations which usually recite the 'Kol Nidre' on the Day of Atonement").

"Bi-Yeshibah shel Ma'alah."

Together with the "Kol Nidre" another custom was developed, which is traced to Meïr of Rothenburg (d. 1293; "Orḥot Ḥayyim," p. 106b). This is the recital before the "Kol Nidre" of the formula mentioned beginning "Bi-yeshibah shel ma'alah," which has been translated above, and which gives permission to transgressors of the Law or to those under a ban ("'abaryanim") "to pray with the congregation" (*ib.*; "Kol Bo," § 68, end), or, according to another version which is now generally prevalent, to the congregation "to pray with the transgressors of the Law." To justify prayer on that day with such transgressors and with persons under a ban, a haggadic saying (Ker. 6b) was quoted to the effect that a fast-day was to be counted as lost unless "the wicked" were present (see Maḥzor Vitry, ed. Hurwitz, p. 381; Zunz, *l.c.* p. 96).

From Germany (Ṭur Oraḥ Ḥayyim, § 619) this custom spread to southern France, Spain, Greece, and probably to northern France, and was in time generally adopted (Shulḥan 'Aruk, Yoreh De'ah, 619, 1; Zunz, *l.c.* p. 96). The assertion that the "Kol Nidre" was introduced on account of the Spanish Maranos (Mandelstamm [anon.], "Horæ Talmudicæ," vol. ii.; "Reform in Judenthum," pp. 7 *et seq.*, Berlin; comp. also "Ha-Ẓefirah," 1885, p. 361; Liebersohn, in "Ha-Meliẓ," 1868, p. 270) is incorrect, although the formula may have been used in Spain with reference to them.

The Version of Meïr ben Samuel.

Change of Tense.

An important alteration in the wording of the "Kol Nidre" was made by Rashi's son-in-law, Meïr ben Samuel, who changed the original phrase "from the last Day of Atonement until this one" to "from this Day of Atonement until the next." Thus the dispensation of the "Kol Nidre" was not as formerly a posteriori and concerned with unfulfilled obligations of the past year, but a priori and having reference to vows which one might not be able to fulfil or might forget to observe during the ensuing year. Meïr ben Samuel likewise added the words "we do repent of them all" (כלהון אחרטנא בהון), since, according to the Law, real repentance is a condition of dispensation. The reasons assigned for this change were that an "ex post facto" annulment of a vow was meaningless, and that, furthermore, no one might grant to himself a dispensation, which might be given only by a board of three laymen or by a competent judge ("mumḥeh"). Meïr ben Samuel cited further, in support of his arguments, Ned. 23b, which reads: "Whoever wishes all the vows he may make throughout the year to be null and void shall come at the beginning of the year and say: 'May all the vows which I shall vow be annulled.'" This change made by Meïr ben Samuel is given by Rabbenu Tam in his "Sefer ha-Yashar" (ed. Venice, 1816, § 144), although it did not emanate from him, as the old authorities incorrectly supposed (*e.g.*, Isaac ben Moses of Vienna, "Or Zarua'," p. 126b; Aaron ha-Kohen of Lunel, "Orḥot Ḥayyim," p. 106b; RoSH to Ned. 23b and Ṭur Oraḥ Ḥayyim, § 619). It appears to have been Rabbenu Tam, however, who accounted for the alteration made by his father as already stated, and who also tried to change the perfects of the text, "which we have vowed," "have sworn," etc., to imperfects. Whether the old text was already too deeply rooted, or whether Rabbenu Tam did not correct these verbal forms consistently and grammatically, the old perfects are still retained at the beginning of the formula, although a future meaning is given to them. There has been much discussion concerning the correct reading of the formula as affecting the tenses, yet even men like Jacob Emden (see "She'elat Yabeẓ," i., No. 135) and Wolf Heidenheim (introduction to the Maḥzor, ed. Hanover, 1837) did not venture to introduce the change into the Maḥzor. Mordecai Jaffe, author of the "Lebushim," states that he often tried to teach the ḥazzanim a more correct form of the "Kol Nidre," but that as often as they recited it in the synagogue they lapsed into the old text to which the melody of the hymn had accustomed them (Heidenheim, *l.c.*).

The alteration made by Meïr ben Samuel, which agreed with Isaac ibn Ghayyat's view (see Isaac ben Sheshet, Responsa, No. 394, end), was accepted in the German, northern French, and Polish rituals and in those dependent on them, but not in the Spanish, Roman, and Provençal rituals (see Zunz, "Die Ritus von Avignon," in "Allg. Zeit. des Jud." 1838, p. 303). The old version is, therefore, usually called the "Sephardic." The old and the new versions are sometimes found side by side (see Maḥzor of Aragon, Salonica, 1805). The change was bitterly opposed, especially by the Italian Isaiah di Trani (in 1250), since the old text was known to all and was in every Maḥzor ("Tanya," ed. Cremona, 1565, p. 102b), and even in the places which adopted the alteration there were always authorities who preferred the old reading and rejected the new, such as Jacob Landau ("Agur," ed. Sedilkow, 1834, p. 73b).

Language.

It should be noted, furthermore, in regard to the text of the "Kol Nidre," that in the "Siddur" of Amram (*l.c.*) and in the Roman Maḥzor (Zunz, "Ritus," p. 96) it is wholly in Hebrew, and therefore begins "Kol Nedarim" (comp. also "Liḳḳuṭe ha-Pardes," *l.c.*). The determination of the time in both versions is Hebrew. The words "as it is written in the teachings of Moses, thy servant," which were said in the old form before Num. xv. 26, were canceled by Meïr of Rothenburg (Abudarham, p. 75b). In many places the "Kol Nidre" was recited once only (see Rabbenu Tam, *l.c.*); in others, twice, so that late comers might hear it ("Liḳḳuṭe ha-Pardes," p. 12b); in some congregations, however, it was said three times. This last usage is justified by Rabbenu Tam on the ground that there are many rabbinical formulas which are repeated thrice, such as "Ḥaluẓ ha-Na'al" in the "Ḥaliẓah" or "Muttar Lak" ("May it be permitted thee") in the absolution from a vow.

Method of Recitation.

As to the manner in which the ḥazzan is to recite the "Kol Nidre," the Maḥzor Vitry (p. 388) gives the following directions: "The first time he must utter it very softly like one who hesitates to enter the palace of the king to ask a gift of him whom he fears to approach; the second time he may speak somewhat louder; and the third time more loudly still, as one who is accustomed to dwell at court and to approach his sovereign as a friend."

The number of Torah-scrolls taken out for the "Kol Nidre" varied greatly according to the different "minhagim." In some places it was one; in others, two, three, seven, or even all (see "Ḥayye Abraham," p. 47a, Leghorn, 1861). The first Torah-scroll taken out is called the "Sefer Kol Nidre." The "Kol Nidre" should be recited before sunset, since dispensation from a vow may not be granted on the Sabbath or on a feast-day, unless the vow refers to one of these days.

Use by Anti-Semites.

Refers Only to Individual Vows.

The "Kol Nidre" has been one of the means widely used by Jewish apostates and by enemies of the Jews to cast suspicion on the trustworthiness of an oath taken by a Jew (Wagenseil, "Tela Ignea, Disputatio R. Jechielis," p. 23; Eisenmenger, "Entdecktes Judenthum," vol. ii., ch. ix., pp. 489 *et seq.*, Königsberg, 1711; Bodenschatz, "Kirchliche Verfassung der Heutigen Juden," part ii., ch. v., § 10, Frankfort and Leipsic, 1748; Rohling, "Der Talmudjude," pp. 80 *et seq.*, Münster, 1877); so that many legislators considered it necessary to have a special form of oath administered to Jews ("Jew's oath"), and many judges refused to allow them to take a supplementary oath, basing their objections chiefly on this prayer (Zunz, "G. S." ii. 244; comp. pp. 246, 251). As early as 1240 Jehiel of Paris was obliged to defend the "Kol Nidre" against these charges. It can not be denied that, according to the usual wording of the formula, an unscrupulous man might think that it offers a means of escape from the obligations and promises which he had assumed and made in regard to others. The teachers of the synagogues, however, have never failed to point out to their cobelievers that the dispensation from vows in the "Kol Nidre" refers only to those which an individual voluntarily assumes for himself alone (see RoSH to Ned. 23b) and in which no other persons or their interests are involved. In other words, the formula is restricted to those vows which concern only the relation of man to his conscience or to his Heavenly Judge (see especially Tos. to Ned. 23b). In the opinion of Jewish teachers, therefore, the object of the "Kol Nidre" in declaring oaths null and void is to give protection from divine punishment in case of violation of the vow. No vow, promise, or oath, however, which concerns another person, a court of justice, or a community is implied in the "Kol Nidre." It must be remembered, moreover, that five geonim were against while only one was in favor of reciting the prayer (Zunz, "G. V." p. 390, note a), and furthermore that even so early an authority as Saadia wished to restrict it to those vows which were extorted from the congregation in the synagogue in times of persecution ("Kol Bo," *l.c.*); and he declared explicitly that the "Kol Nidre" gave no absolution from oaths which an individual had taken during the year. Judah ben Barzillai, a Spanish author of the twelfth century, in his halakic work "Sefer ha-'Ittim," declares that the custom of reciting the "Kol Nidre" was unjustifiable and misleading, since many ignorant persons believe that all their vows and oaths are annulled through this formula, and consequently they take such obligations on themselves carelessly ("Orḥot Ḥayyim," p. 106a). For the same reason Jeroham ben Meshullam, who lived in Provence about the middle of the fourteenth century, inveighed against those fools who, trusting to the "Kol Nidre," made vows recklessly, and he declared them incapable of giving testimony ("Toledot Adam we-Ḥawwah," ed. 1808, section 14, part iii., p. 88; see Zunz, "G. V." p. 390). The Karaite Judah Hadassi, who wrote the "Eshkol ha-Kofer" at Constantinople in 1148 (see Nos. 139,

Jewish Opposition.

140 of that work), likewise protested against the "Kol Nidre." Among other opponents of it in the Middle Ages were Yom-Ṭob ben Abraham Isbili (d. 1350) in his "Ḥiddushim"; Isaac ben Sheshet, rabbi in Saragossa (d. 1406), Responsa, No. 394 (where is also a reference to the preceding); the author of the "Kol Bo" (15th cent.); and Leon of Modena (d. 1648 [see N. S. Libowitz, "Leon Modena," p. 33, New York, 1901]). In addition, nearly all printed maḥzorim contain expositions and explanations of the "Kol Nidre" in the restricted sense mentioned above.

In the Nineteenth Century.

Yielding to the numerous accusations and complaints brought against the "Kol Nidre" in the course of centuries, the rabbinical conference held at Brunswick in 1844 decided unanimously that the formula was not essential, and that the members of the convention should exert their influence toward securing its speedy abolition ("Protocolle der Ersten Rabbiner Versammlung," p. 41, Brunswick, 1844). At other times and places during the nineteenth century emphasis was frequently laid upon the fact that "in the 'Kol Nidre' only those vows and obligations are implied which are voluntarily assumed, and which are, so to speak, taken before God, thus being exclusively religious in content; but that those obligations are in no wise included which refer to other persons or to non-religious relations" ("Allg. Zeit. des Jud." 1885, p. 396). The decision of the conference was accepted by many congregations of western Europe and in all the American Reform congregations, which while retaining the melody substituted for the formula a German hymn or a Hebrew psalm, or changed the old text to the words, "May all the vows arise to thee which the sons of Israel vow unto thee, O Lord, . . . that they will return to thee with all their heart, and from this Day of Atonement until the next," etc. Naturally there were many Orthodox opponents of this innovation, among whom M. Lehmann, editor of the "Israelit," was especially prominent (see *ib.* 1863, Nos. 25, 38). The principal factor which preserved the great religious authority of the "Kol Nidre" well into the nineteenth century, and which continually raises up new defenders for it, is doubtless its plaintive and appealing melody, which made a deep impression even on Lenau (see his remarks in "Der Israelit," 1864, No. 40, pp. 538 *et seq.*) and which was the favorite melody of Moltke, who had the violinist Joachim play it for him.

——**The Melody:** Even more famous than the formula itself is the melody traditionally attached to its rendition. This is deservedly so much prized that even where Reform has abolished the recital of the Chaldaic text, the air is often preserved, either in association with some other passage—*e.g.*, Ps. ciii. or cxxx., or a series of versicles, or a vernacular hymn such as "O Tag des Herrn, Du Nahst!" or "Gott der Liebe und der Barmherzigkeit"—or as an organ prelude to attune the mind of the congregation to the solemnity of the evening. And yet there are probably no two synagogues in which the melody is chanted note for note absolutely the same. So marked is the variation in the details of the melody that a critical examination of the variants shows an approach toward agreement in the essentials of the first strain only, with transformations of the greatest diversity in the remaining strains. These divergences, however, are not radical, and they are no more than are inherent in a composition not due to a single originator, but built up and elaborated by many in turn, and handed on by them in distinct lines of tradition, along all of which the rhapsodical method of the Ḥazzanut has been followed (see Music, Synagogal).

(Bohemian)
Ah!.. kol - - - nid-re.

Original Elements.

On a critical investigation on comparative lines, the structure of "Kol Nidre" is seen to be built upon a very simple groundwork, the melody being essentially an intermingling of simple cantillation with rich figuration. The very opening of "Kol Nidre" is what the masters of the Catholic plain-song term a "pneuma," or soul breath. Instead of announcing the opening words in a monotone or in any of the familiar declamatory phrases, some ancient ḥazzan of South Germany prefixed a long, sighing tone, falling to a lower note and rising again, as if only sighs and sobs could find utterance before the officiant could bring himself to inaugurate the dread Day of Atonement.

Reminiscences of Catholic Plain-Song.

Breslaur draws attention to the similarity of these strains with the first five bars of Beethoven's C sharp minor quartet, op. 131, period 6, "adagio quasi un poco andante." An older coincidence shows the original element around which the whole of "Kol Nidre" has been built up. The pneuma given in the Sarum and Ratisbon antiphonaries (or Catholic ritual music-books) as a typical passage in the first Gregorian mode (or the notes in the natural scale running from "d" to "d" ["re" to "re"]), almost exactly outlines the figure which prevails throughout the Hebrew air, in all its variants, and reproduces one favorite strain with still closer agreement. The original pattern of these phrases seems to be the strain of melody so frequently repeated in the modern versions of "Kol Nidre" at the introduction of each clause. Such a pattern phrase, indeed, is, in the less elaborated Italian tradition (Consolo, Nos. 3 and 6 in the following transcription), repeated in its simple form five times consecutively in the first sentence of the text, and a little more elaborately four times in succession from the words "nidrana lo nidre." The northern traditions prefer at such points first to utilize its complement in the second ecclesiastical mode of the Church, which extends below as well as above the fundamental "re." The strain, in either form, must obviously date from the early medieval period, anterior to the eleventh century, when the practise and theory of the singing-school at St. Gall, by which such typical passages were evolved, influenced all music in those French and German lands where the melody of "Kol Nidre" took shape.

Thus, then, a typical phrase in the most familiar Gregorian mode, such as was daily in the ears of the Rhenish Jews, in secular as well as in ecclesiastical music, was centuries ago deemed suitable for the recitation of the Absolution of Vows, and to it was afterward prefixed an introductory intonation dependent on the taste and capacity of the officiant. Many times repeated, the figure of this central phrase was sometimes sung on a higher degree of the scale, sometimes on a lower. Then these became associated; and so gradually the middle section of the melody developed into the modern forms.

Closing Phrase from "'Alenu."

But the inspiration of a later ḥazzan was needed to shape the closing section of the melody, in which the end of the chant soars away into a bold and triumphant strain, expressing confidence and determination rather than the humble sorrow of the older ending in the minor, which still survives in the Italian tradition. Now this bold closing phrase belongs, according to the general tradition, also to 'Alenu (the words "ke-mishpeḥot ha-adamah"). It would be quite in accordance with the scheme of the ḥazzan's art if one such officiant transferred the "'Alenu" phrase to "Kol Nidre," with the determined aim of associating the texts themselves in the minds of his hearers. The speculation is ventured that this was done about the year 1171, when thirty-four men and seventeen women perished at the stake at Blois, chanting the "'Alenu," and when all the Rhenish Jews, as well as those of France, were bewailing the martyrdom as the encyclical of R. Tam reached their congregations.

The full transcription following differs from the version best known to the general public, that for violoncello, etc., by Max Bruch, in that it reproduces the florid vocalization of the Polish school and omits the secondary and contrasting theme quoted by Bruch from the service of quite another part of the Jewish year (see "Jewish Chronicle," London, April 1, 1904).

KOLETKAR, MOSES: Sirdar bahadur in the Anglo-Indian army. He enlisted in the Eighth Regiment Native Infantry April 1, 1842, and was later transferred to the Twenty-seventh Regiment. He was appointed jemidar and native adjutant Jan. 1, 1853; transferred again, to the Twelfth Regiment; promoted to the rank of subahdar Nov. 6, 1858; sirdar bahadur (with Order of British India, 1st class), Oct. 25, 1859; transferred to the Seventeenth Regiment Native Infantry; made subahdar-major Jan. 24, 1876; and bahadur (receiving at the same time the Order of British India, 2d class), Jan. 1, 1877. He was present at the battle of Hyderabad (medal) and at the action of Kolhapur (medal). He is said to have given first information of the mutiny to the officers of the Twenty-seventh Regiment Native Infantry.

J. J. Hy.

KOLIN: Town in Bohemia. Its Jewish community is one of the oldest in the country. A number of Jews were living here in the fourteenth century, and they had their own synagogue. A stone inscription from a former synagogue, preserved in the present synagogue, bears the date 1642. When King Ferdinand I. expelled the Jews from Bohemia in 1541, the Jews of Kolin went with their movable goods to Poland. At Braunau the emigrants encountered thieves, who robbed them of 20,000 Bohemian schock. In 1551 the Bohemian Jews were permitted to return; but the Jews of Kolin could find no rest in their city. For unknown reasons King Ferdinand granted them safe-conduct in 1557, enabling them to remain for one year in the country to collect their debts, after which period they were to leave again. Their affairs delayed them, however, and they did not leave the city until 1561. After Ferdinand's death, in 1564, his successor, Maximilian II., permitted the Jews to return to Kolin; but the wealthiest among them did not avail themselves of the permission. In 1618 the Jewish community of Kolin was, next to that of Prague, the largest in Bohemia. It had to pay heavy taxes into the royal treasury; in 1618 the sum amounted to 18,000 thalers, or 47 thalers per head. In 1603 the municipal council forbade the Jews to appear on Sundays and and other Christian holidays in those parts of the city inhabited by Christians; it prohibited them from keeping dogs; and forbade also Jewish butchers to sell meat to Christians. In 1611 a special prison was built in the Jews' street for the Jews, at their request and at their expense; it has only recently been demolished, after having served as a dwelling for poor families for more than one hundred years. No Jew was permitted to own any real estate except his house, nor more than one horse. Jews were forbid-

In the Seventeenth Century.

den also to engage in those trades or lines of business in which their Christian fellow citizens were engaged; they were obliged, therefore, to establish connections with foreign houses. The municipal council, which was intent upon isolating the Jews from the Christian population, forbade the latter to enter the service of the Jews; even washerwomen were not allowed to do laundry-work for them. As the Jews were accused of having brought the plague into the city on returning from their business trips, they were not permitted to remain outside of their own street for any length of time, nor to draw water with their vessels from the Christians' wells. During this appearance of the plague (1613–14) the municipal council had both entrances to the Jews' street walled up.

On Sept. 8, 1621, the Jewish communal director David was elected to the municipal council. Various petitions which the council of Kolin sent to Prince Lichtenstein, with a view to interfering with the trades of the Jews, were not granted. In Dec., 1621, the knight Jan Vazlav Grizl of Grizlov was made captain of the imperial estate of Kolin and Bieberitz. He permitted the Jews to engage in those trades and lines of business which had hitherto been open only to Christians; and on several occasions he showed them favor. When an epidemic of dysentery appeared in Kolin in 1660, Rabbi Borges and his son Schaje (Isaiah) were accused, June 25, of having killed a pig which had escaped from the house of the widow Sperlink into the Jews' street, and of having thrown the same into the communal well, thereby poisoning the water. Both fled from the city.

Jurisdiction and Organization.

A resolution of the Bohemian royal chamber, of Feb. 3, 1655, was of great benefit to the Jews, removing them from the jurisdiction of the municipal council, and directing them to organize themselves as a community with their own court, which was to be under the direct supervision of the imperial judge of Kolin acting in the name of the royal chamber. Only in criminal cases were the Jews to be tried by the judge of Kolin. The affairs of the community were conducted by a primator, two councilors, and a certain number of elders, assisted by a secretary, a treasurer, and two servants. This arrangement was in force down to 1788.

Empress Maria Theresa decreed, Dec. 18, 1744, that all the Jews should leave Bohemia by the end of the following month. In 1745 there were at Kolin forty-two houses belonging entirely to Jews and valued at 19,210 gulden. On June 12, 1745, a contract was made between the Jewish and the Christian community, that when the Jews left the country their debtors should remain in possession of such houses; but if the Jews should obtain permission to return within two years, the houses should be restored to them at a price to be fixed by valuation. The empress' decree was, however, rescinded.

In 1750 three Jews of Kolin received from the municipal council the concession for the sale of tobacco in Kolin. During the dearth in the winter of 1846–47 the Jews of Kolin distinguished themselves by twice contributing large sums for the relief of 100 Christian families.

Down to 1849, when full civic equality was given to the Jews, they were not permitted to buy houses or land belonging to Christians, but from the time of Emperor Joseph II. they were permitted to rent stores from Christians.

The community for a long time had a primary school near the synagogue, in which Hebrew also was taught. In 1788 forty-one children attended the school, and in 1789 fifty. At present (1904) the Talmud Torah Society of the Jewish congregation also supports a school for the study of Hebrew and the Bible. The affairs of the congregation are administered by a board consisting of a president and seven trustees together with twenty-four members chosen from the congregation at large.

The following rabbis of Kolin deserve notice: Abraham Borges, 1653; his son Schaje (Isaiah), 1660; Simon Oppenheim, author of "Nezer ha-Ḳodesh," middle of the eighteenth century; Jacob Illovi of Ungarisch-Brod, 1775–78; Eleazar Kallir, author of "Or Ḥadash" and "Ḥawwot Yair," 1780–1800; Wolf Löw Boskowitz, 1806–12; Wolf Löw, 1812–26; Joachim Deutschmann, 1828–36; Daniel Frank, 1839–60; Dr. Josef Gugenheimer, 1861–96; his son, Dr. Raphael Gugenheimer, the present incumbent.

D. R. Gu.

KOLISCH, BARON IGNAZ VON: Hungarian merchant, journalist, and chess-master; born at Presburg April 6, 1837; died at Vienna April 30, 1889. Both in business and as a chess-player he was eminently successful. He founded the Wiener Börse-Syndikatskasse in 1869, and in 1873 established a commission house in Paris; and by prudent management he acquired considerable wealth.

As a chess-player Kolisch soon became known for his brilliant and aggressive style, but he was not a frequent participant in tournaments. In 1860 he won the first prize at the international tourney held at Cambridge, England; in 1861 he lost a match with Anderssen, the strongest player of the day, by one game only; the same year he drew a match with Paulsen; and in 1867 at the Paris tournament he secured the leading position, defeating both Winawer and Steinitz.

Kolisch was the founder and editor-in-chief of the "Wiener Allgemeine Zeitung," to which, under the pseudonym "Ideka" (formed from the initials of his name), he contributed many feuilletons.

KOLISCH, SIGMUND: Austrian poet and historical writer; born at Koritschan, Moravia, Sept.

15, 1817. He was educated at the University of Vienna, where he studied classical philology, history, and philosophy. After a short sojourn in Italy (1847) he took part in the revolution at Vienna in 1848, and after the victory of the imperial troops under Windischgrätz he escaped to Germany. The next twenty years he spent in Germany, France, and Italy, returning to Vienna in 1868.

Among his works may be mentioned: "Todtenfeier in Oesterreich," Brünn, 1848; "Kleine Romane aus Wien," Leipsic and Brünn, 1848; "Ludwig Kossuth und Clemens Metternich," Leipsic, 1850; "Auf dem Vulkan," Stuttgart, 1868; and the tragedy "Die Christin," Vienna, 1875.

He has also contributed many articles and essays to German and Austrian journals, and during 1848 was editor of the revolutionary paper "Der Radikale."

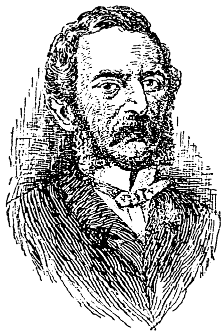
KOMPERT, LEOPOLD: Austrian author; born at Münchengrätz, Bohemia, May 15, 1822; died at Vienna Nov. 23, 1886. He studied at the universities of Prague and Vienna, and was for several years tutor in the house of Count George Andrassy. In 1857 he entered the service of the Vienna Creditanstalt. As a member of the Vienna city council Kompert displayed a useful activity in the interest of education, and likewise, as a member of the board of the Jewish congregation, in the promotion of religious instruction. He took an active part also in the Israelitische Allianz of Vienna. As vice-president of the Israelitischer Waisenverein he devoted considerable attention to the education of orphans, and used his influence in the foundation of Baron Todesco's institution for the benefit of orphans who had left the asylum. He also held for many years honorary offices in the Schillerverein.



Leopold Kompert.

Kompert began his literary activity in the "Pressburger Zeitung." From 1848 to 1852 he was editor of the "Oesterreichischer Lloyd." As creator of ghetto literature he is called the Auerbach of the ghetto. His stories depicting the life, customs, and manners of the Bohemian Jews have become classical and have found many imitators. He draws the transition from the life in the narrow ghetto to the farmer's life in the open field; and he shows the struggles, doubts, and misgivings of those who, yielding to the impulse of modern times, undergo the changes of their newly chosen career. Seeing that under the leveling influence of the present day the characteristic inner Jewish life is threatened to vanish, he endeavors to preserve its originality, its deeper psychological, sentimental, and ethical spirit, for the knowledge of posterity.

Kompert's first story, "Der Schnorrer," appeared in 1846 in L. A. Frankl's "Sonntagsblatt," No. 7. Then followed "Geschichten aus dem Ghetto," Leipsic, 1848; "Böhmische Juden," Vienna, 1851; "Am Pfluge," Berlin, 1855; "Neue Geschichten aus dem Ghetto," Prague, 1860; "Geschichten einer Gasse," Berlin, 1865; "Zwischen Ruinen," *ib.* 1873; "Franzi und Heini, eine Wiener Geschichte," *ib.* 1880; "Verstreute Geschichten," *ib.* 1883. In "Franzi und Heini," a picture of Vienna society, the Jewish pedler woman *Perl Blüthenstern* plays an important part. Some of these stories were first published in Wertheimer's "Jahrbuch für Israeliten." A complete edition of Kompert's works in eight volumes appeared in Berlin, 1882–83, and a new edition in Leipsic, 1887.

KOMPSE BAR KOMPSE. See Ḳamẓa and Bar Ḳamẓa.

KÖNIG, FRIEDRICH EDUARD: German Protestant theologian; born at Reichenbach, Saxony, Nov. 15, 1846; Ph.D., 1874, Leipsic; D.D., 1888, Erlangen. He was appointed professor of theology, first at Leipsic, then at Rostock, and, in 1900, at Bonn.

König has published "Gedanke, Laut und Accent als die Drei Faktoren der Sprachbildung, Comparativ und Laut-Physiologisch am Hebräischen Dargestellt" (1874); "Neue Studien über Schrift, Aussprache und Allgemeine Formenlehre des Aethiopischen" (1877); "De Criticæ Sacræ Argumento e Linguæ Legibus Repetito" (1879); "Historisch-Kritisches Lehrgebäude der Hebräischen Sprache," 3 vols. (1881–97), a comprehensive study of Hebrew grammar, indispensable for scholars; "Der Offenbarungsbegriff des Alten Testaments" (1882); "Die Hauptprobleme der Altisraelitischen Religionsgeschichte" (1884; English transl. "The Religious History of Israel," Edinburgh, 1885); "Historisch-Kritische Einleitung ins Alte Testament" (1893); "The Exiles' Book of Consolation" (Edinburgh, 1899); "Stilistik, Rhetorik, Poetik Comparativ in Bezug auf die Bibel Dargestellt" (1900); "Hebräisch und Semitisch, Prolegomena zu einer Gesch. der Semitischen Sprachen" (1901); "Fünf Neue Arabische Landschaftsnamen im Alten Testament" (1901); "Neueste Principien der Alttestamentlichen Kritik" (1901); "Bibel und Babel" (10th ed. 1903); "Die Gottesfrage und der Ursprung des Alten Testaments" (1903).

T. B. P.

KÖNIG, JULIUS: Hungarian mathematician; born Dec. 16, 1849, at Raab. He entered the University of Vienna to study medicine, but being more interested in mathematics, he went thence to Heidelberg, and studied physics with Helmholtz and mathematics with Königsberger. Here he took his doctor's degree with the thesis "Ueber die Elliptischen Modulen" in 1870, producing in the same year the work "Beiträge zur Theorie der Electrischen Nervenreizung." König then went to Berlin to attend the lectures of Kummer, Kronecker, and Weierstrass. Returning to Budapest in 1872, he became privat-docent at the Polytechnic high school, being appointed professor at the same institution in 1874.

König is recognized as the foremost living mathematician of Hungary. An original thinker, he has advanced many new theories and methods in differential calculus that have been generally accepted. His most important works are the following: "Zur Theorie der Modulargleichungen," Heidelberg, 1871; "Ueber die Darstellung von Funktionen Durch Unendliche Reihen" (in "Math. Annalen," v.); "Nouvelle Démonstration du Théorème de Taylor" (in "Annales de Math." 1874); "Zur Theorie der Funktionen einer Reellen Variabeln" (in "Monatshefte für Math." i.); "Ueber eine Reelle Abbildung der Nicht-Euklidischen Geometrie" (in "Nachrichten der Kön. Gesell. d. Wissenschaften zu Göttingen," 1872); "Ueber Rationelle Funktionen von Elementen" (in "Math. Annalen," xiv.); "Die Faktorenzerlegung und Eliminationsprobleme" (*ib.* xv.); "Zur Theorie der Resolventen" (*ib.* xviii.); "Ueber Endliche Formensysteme" (*ib.*); and "Beiträge zur Theorie der Algebraischen Gleichungen" (*ib.*). He has also contributed a large number of articles to the Hungarian mathematical journals.

From 1886 to 1890 König was dean, and from 1891 to 1893 rector, of the Polytechnic high school; and in 1889 he was elected a member of the Royal Academy of Sciences. In the last-mentioned year he received baptism.

KÖNIGLICHE WEINBERGE: A southeastern suburb of Prague. The city of Königliche Weinberge was built within a few years after the Austro-Prussian war of 1866, when the walls of Prague were removed. As the site had been formerly occupied by vineyards that were cultivated mainly by Jewish farmers, Jews may be regarded as the first settlers of the city. Many Jewish families from Prague moved into the new suburb as soon as it had been laid out; and approximately 400 families settled there about 1880. Still no need was felt for a distinct religious organization, as the new inhabitants retained connection with their former congregations at Prague. Special religious institutions and services were found to be necessary only after a number of Jewish families from the country went to Weinberge.

The first services were held in the city on New-Year's Day, 1882, in a hall rented by Simon Engel of Raudnitz. Rabbi M. Stark of Horazdowitz, who had been teacher of the Talmud and of religion in secondary schools at Prague, was elected rabbi of Weinberge in 1884. He at once took steps for the building of a synagogue; and through his efforts a fund of 9,000 florins was raised. This sum was entirely insufficient; and as the congregation was unable to borrow money, having no security to give, the building of the synagogue had to be deferred until the congregation became a community with the right of taxing its members, in conformity with the law of March 21, 1890. With the sum of 1,000,000 crowns, borrowed from the state bank, an imposing building in the Renaissance style was erected. The small synagogue in the left wing, seating 200 persons, was dedicated in Sept., 1894; and the large temple, seating 2,000 persons, was dedicated two years later. The services are modern, with organ and mixed choir. Services in Czech are held by Dr. Wiener for the inhabitants of the city who speak that language.

In 1903 the Jewish community numbered 1,200 families, and, with the exception of Prague, was the largest in the country. The Frauenverein (founded 1887) and the Hilfsverein (1897), together numbering 600 members, with a fund of 8,000 crowns, have charge of the poor and sick. The community of Weinberge does not own any cemetery, its dead being buried by the Ḥebra Ḳaddisha of Prague. The orphan asylum for boys, founded by the Verein zur Errichtung und Erhaltung eines Allgemeinen Israelitischen Waisenhauses für Böhmen, and the Kaiser Franz Josef Jubiläums-Stiftung Waisenheim für Mädchen, founded by Moritz Hahn of Prague, are at Weinberge. These institutions had together seventy inmates in 1903.

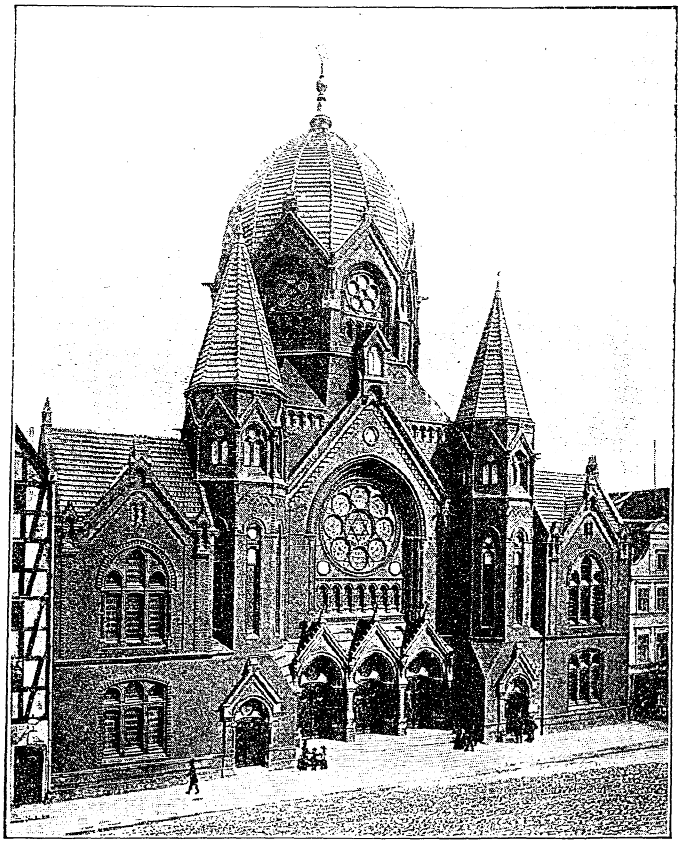
D. M. Sta.

KÖNIGSBERG: Capital of the province of East Prussia. It was founded by the knights of the Teutonic Order, the laws of which excluded the Jews from its territory. After the secularization of the order Duke Albert granted to two Jewish physicians the privilege of practising medicine at Königsberg (1538 and 1541). But the city objected for a long time to the admission of Jews. Not until 1654 was the Jew Lazarus, who was warmly recommended to the "Great Elector" by the King of Poland, granted the privilege of unrestricted commerce at Königsberg, in spite of the objections of the municipal authorities. A similar privilege was granted at the same time to the electoral factor Israel Aron. For some decades afterward Jews could stop in the city only for a few days at a time, on payment of a high toll. In 1680 they were permitted to set up a chapel in the "Burgfreiheit" (that part of the city which was not under municipal administration). An official register of the year 1706 enumerates ten heads of families. A few years later a number of families, fleeing from the disturbances in Poland, settled there, and were joined in 1734 by the Jews expelled from Danzig when that city was besieged. There were 307 Jews at Königsberg in 1756; 1,027 in 1817; 3,024 in 1864; and more than 5,000 about 1880. This number was considerably decreased by the expulsion of Russian subjects; in 1900 there were 3,975 Jews in a total population of 189,483.

Formation of Congregation.

The larger number of the Jews worshiping in the chapel erected in 1680 were foreigners, residing temporarily at Königsberg. The congregation of Königsberg was founded in 1704, when the cemetery was acquired. Before that time the Jews were obliged to bury their dead beyond the frontier, in Poland. On Nov. 23, 1704, a "ḥebra ḳaddisha" was founded. The community received a constitution by the law of April 7, 1722; the synagogue was dedicated Dec. 23, 1756; destroyed by the great fire in the suburb in 1811; and rebuilt on the same site in 1815. It served for general worship down to Aug., 1896, when it was transferred to a society of Russian Jews living at Königsberg. The earliest extant constitution of the community, aside from the law of 1722, is dated 1811; this has been revised several times, the latest draft being dated 1903.

The Jewish community of Königsberg is distinguished as one of the pioneers of modern culture. Its first rabbi, Solomon Fürst, was a matriculate of the university in the first quarter of the eighteenth century, and was assistant in the royal library. In the second half of that century the Friedländer family especially, and men like Isaac Euchel, Marcus Herz, and Aaron Joel, pupils of Kant, introduced the ideas of Mendelssohn into Königsberg. In that city Euchel issued his appeal for the founding of a Hebrew literary society and the periodical "Ha-Meassef," the first volumes of which appeared there; and there he published, in 1782, a circular letter ("Sefat Emet") in which he advocated institutions for the education of the young modeled after the "Freischule" at Berlin. But his efforts in this direction did not succeed, owing to the opposition of the Orthodox. In 1812, and again in 1820 (when Isaac Asher Francolm was called as preacher and teacher of religion), the school question occasioned further dissension; Francolm finally was obliged to resign (1826), and his position remained vacant until 1835. During the incumbency of his successor, Joseph Levin Saalschütz (1835–63), the first Jewish professor at Königsberg, services were held for a short time (in 1847) on Sunday morning. After his death and that of Rabbi Mecklenburg, who had held the rabbinate during Saalschütz's term of office, the functions of rabbi and preacher were combined. When the organ was installed in the communal synagogue, in 1870, a number of Orthodox members formed a separate congregation, which subsequently took the name of "Adass Jisroel." Besides these, there are three private synagogues. The new synagogue of the community was dedicated Aug., 1896.



Synagogue at Königsberg.
(From a photograph.)

Rabbis.

Four physicians of Königsberg have taken a prominent part in the struggle for the emancipation of the Jews: Dr. Johann Jacoby; Dr. Ferdinand Falkson (who defended, against the government, the validity of his marriage with a Christian); Dr. Raphael Kosch (chiefly instrumental in securing the abolition of the Jews' oath in Prussia, in 1869); Dr. Simon Samuel (who secured for Jews the right of admission to the faculty of Königsberg University). The following rabbis have officiated at Königsberg: **Solomon Fürst** (called in 1707; his term of office and the year of his death are not known; he was still officiating in 1722; he is the author of a cabalistic work and of a prayer printed in Hebrew and German); Aryeh (Löb) Epstein b. Mordecai (1745–1775); **Samuel Wigdor** (called in 1777; evidently died before 1784); **Samson b. Mordecai** (died in 1794); **Joshua Bär Herzfeld** (1800–1814; grandson of R. Jacob Joshua of Frankfort; subsequently rabbi at Rawitsch); **Levin Joseph Saalschütz** (1814–23; father of the preacher; vice-rabbi ad interim); **Wolff Laseron** (1824–1828); **Jacob Hirsch Mecklenburg** (1831–1865; author of "Ha-Ketab weha-Ḳabbalah"); Isaac Bamberger; **Hermann Vogelstein** (called 1897). The rabbi of the Adass Jisroel congregation is (1904) **A. Liebermann.**

Among the cantors at Königsberg were Hirsch Weintraub (1838–79; d. 1881; previously cantor at Dubno) and Eduard Birnbaum (from 1879; b. 1854 at Cracow; previously cantor at Magdeburg and at Beuthen in Silesia). Besides various charitable and educational societies, Königsberg has two orphan asylums and a home for the aged.

KÖNIGSBERGER, LEO: German mathematician; born in Posen Oct. 15, 1837. He studied in Berlin (Ph.D. 1860), and was appointed instructor in mathematics and physics at the Military Academy, Berlin, in 1861; in 1864 he was made assistant professor, in 1867 professor, of mathematics in Greifswald; and in 1869 he succeeded O. Hesse as professor in Heidelberg. In 1875 he was called to the polytechnic school of Dresden, and in 1877 to Vienna University. He is at present (1904) professor of mathematics at the University of Heidelberg, and is a member of the academies of Berlin, Munich, and Göttingen, as well as of many other learned societies.

Besides publishing many essays and contributions to scientific journals, Königsberger is the author of the following works: "Modulargleichungen der Elliptischen Functionen," Leipsic, 1868; "Vorlesungen über die Theorie der Elliptischen Functionen," *ib.* 1874; "Vorlesungen über die Theorie der Hyper-Elliptischen Integralrechnung," *ib.* 1878; "Zur Gesch. der Theorie der Elliptischen Transcendenten 1826–29," *ib.* 1879; "Allgemeine Untersuchungen zur Theorie der Differential Gleichungen," *ib.* 1882; "Principien der Mechanik," 1901. He is also the biographer of Helmholtz ("Herman von Helmholtz," 3 vols., Brunswick, 1902–3).

KÖNIGSWARTER: A family that resided in Königswarte, near Tachau, Bohemia, about the middle of the eighteenth century, when Jonas Hirsch Königswarter emigrated thence to Fürth, Bavaria. There he established a business that made him wealthy, enabling him to bequeath to his sons not only an honorable name, but means sufficient to insure a position in the world. At his death (1805) he left five sons, who founded banking-houses successively in Frankfort-on-the-Main, Vienna, Amsterdam, and Hamburg.

Jonas Königswarter: Born at Fürth Aug. 10, 1807; died at Vienna Dec. 3, 1871; son of Marcus and Jeannette Königswarter, the latter being a member of the family of the imperial court agent Samson Wertheimer. Jonas received a careful and strictly religious training, and early manifested extraordinary intellectual gifts and a genius for finance. On one occasion, when his father had presented him with 20 ducats, Jonas, although but a schoolboy at the time, had the foresight to invest his little capital in bonds, which in a short time made him the possessor of 10,000 florins, a venture of which he frequently boasted in later years. In 1825 he accompanied his father to Vienna on a visit to his uncle, Moritz Königswarter, to whose daughter Josephine he soon afterward became engaged. The wedding-day had been scarcely settled when Moritz Königswarter was stricken with typhoid fever, to which he succumbed.

Jonas Königswarter now decided to settle in Vienna, where he became the head of the banking-house founded by his uncle, who had left no son. His business prospered; and the bank came to be ranked among the leading institutions of Austria. As a natural consequence, Königswarter was called upon to fill high public offices. In 1838 he became examiner of the Austrian National Bank, and in 1850 a director of that institution. Later he was elected to a directorship in the Oesterreichische Creditgesellschaft, the Kaiser Ferdinand's Nordbahn, the Süd-Norddeutsche Verbindungsbahn, and the Böhmische Westbahn, and he served as president of the last-named railroad for many years. He was also a member of the advisory committee of the Vienna Stock Exchange, and president of the Jewish congregation of the city.

In recognition of his public services, Königswarter was decorated with the Order of the Iron Crown of the third class, and elevated to the knighthood; and in 1870 he received the decoration of the second class of the same order, and was raised to the baronetage. Königswarter, however, rated far more highly than these distinctions the warm personal esteem with which Emperor Francis Joseph regarded him.

Königswarter's memory has been perpetuated by numerous endowments, the most notable being the Jewish Institute for the Blind near Vienna (Hohe Warte), the inauguration of which the donor did not, however, live to see. S.

Louis Jean Königswarter: French economist; born at Amsterdam March 12, 1814; died in Paris Dec. 6, 1878. He wrote: "Essai sur la Législation des Peuples Anciens et Modernes Relative aux Enfants nés hors Mariage" (1842); "Etudes Historiques sur le Développement de la Société Humaine" (1850); "Histoire de l'Organisation de la Famille en France" (1851); "Sources et Monuments du Droit Français Antérieur au XVme Siècle" (1853). In 1851 he was elected corresponding member of the Académie des Sciences Morales et Politiques; and he founded the "Prix Königswarter" (1,500 francs), to be given every three years by the academy for the best work on the history of law.

Maximilien, Baron von Königswarter: French banker and deputy; born in Amsterdam 1817;

died in Paris Oct. 12, 1878. In 1848 Königswarter left Amsterdam for Paris, where he became naturalized, opened a banking establishment, and became an earnest adherent of Napoleon, in support of whose cause he established a journal. On Dec. 2, 1851, Königswarter became deputy of the Seine department in the legislature. His ardent advocacy of the imperialist régime lost him his seat in 1863, when he was defeated by Jules Simon. Königswarter was a member of the Paris municipal council and an officer of the Legion of Honor.

s. V. E.

Moritz, Baron von Königswarter: Austrian banker and philanthropist; born in Vienna July 16, 1837; died there Nov. 14, 1893; son of Jonas Königswarter. He early undertook journeys abroad to study the principal financial institutions, and by the time of his father's death he was an active partner in the bank, which he had entered in 1860. From 1870 onward he participated in all the great financial operations originated in Vienna, besides assisting in the management of the many important institutions with which his firm was connected. During the financial crisis of 1873 he rendered valuable services to the Austrian government, which were acknowledged by the emperor with the bestowal of the cross of the Order of Francis Joseph. He was a director of a great number of railroads and financial institutions; and he acted also as consul-general for Denmark.

Moritz Königswarter.

In 1879 Königswarter was appointed by the emperor a life member of the Austrian House of Peers (Oesterreichisches Herrenhaus). He joined the group of Liberals, and never missed an opportunity of speaking in behalf of his coreligionists. At the general elections of 1884 he was elected by the first district of Vienna a member of the Diet of Lower Austria. One of his most important speeches in that body was directed against the idea of a "Germania Irredenta."

Königswarter converted a large portion of his immense wealth into landed property, acquiring extensive estates in Bohemia, Moravia, and Hungary. He was a great lover of paintings; and his collection was one of the most valuable private galleries in the world, including some of the finest works of Rubens, Van Dyck, Rembrandt, Ruysdael, and Hobema.

Besides aiding numerous private charities, he was one of the greatest public benefactors of Austria, taking especial interest in the Institute for the Blind at the Hohen Warte, near Vienna, which had been endowed by his father; in the Franz Josefsstiftung, in the foundation of the Israelitisch-Theologische Lehranstalt of Vienna, etc.

Although Voltaire was one of his favorite authors, Königswarter was very conservative in matters of religion, the dietary laws being strictly observed in all of his residences, although members of the highest Austrian aristocracy and the most prominent dignitaries of the Church were often guests at his table.

S.

Wilhelm Königswarter: German philanthropist; born at Fürth March 4, 1809; died at Meran May 15, 1887. His grandfather Jonas went to Fürth from Königswart, Bohemia, and married Charlotte Oppenheim of that city. Königswarter's mother, Elisabeth, Edle von Lämmerfeld, died May 24, 1814, when he was but five years old. His father, Simon, who founded numerous charitable institutions in Fürth, died Dec. 15, 1854. In memory of his father Wilhelm established on July 28, 1855, the Simon-Königswarter-Stiftung to promote, by annual prizes, morality and industry among mechanics and apprentices; and on Jan. 23, 1856, he endowed, in memory of his mother, the Elisabeth-Königswarter-Stiftung for indigent Jews. Königswarter left his large fortune to his native city, which had made him (Oct. 21, 1867) an honorary citizen; a street was named after him in memory of his munificent bequest.

KONITZ AFFAIR: An accusation of ritual murder, based on the unexplained assassination of the student Ernst Winter in Konitz, West Prussia. Winter, the son of an architect of Prechlau, attended the gymnasium of Konitz. Although only nineteen years old, he was known for his licentiousness. On March 11, 1900, he left his boarding-house after dinner, and did not return. It was immediately thought probable that the young man had fallen through the ice while skating on the lake. Accordingly the lake was searched, and on March 15 parts of his body were discovered. His right arm was found in the cemetery, where some one had thrown it over the fence; and on April 15 his head was recovered from a pool. The body had been dismembered by some one possessing a knowledge of anatomy; and therefore suspicion first turned against the local butchers, especially against the Christian butcher Hoffmann, whose daughter had been frequently seen in Winter's company, and a member of whose household had been heard to express threats against Winter on account of his attention to the young woman.

Anti-Semites, however, tried from the outset to turn suspicion against the Jewish inhabitants, and as there was no evidence implicating any Israelite, they accused the police of intentions to shield the Jews. On May 9, 1900, the "Staatsbürgerzeitung," the leading anti-Semitic organ of Berlin, said: "No one can help forming the impression that the organs of the government received orders to pursue the investigation in a manner calculated to spare the Jews." The opposite was true. Detectives and judges took up eagerly the most improbable statements implicating Jews, while Christian witnesses withheld important testimony. The wife of the school superintendent Rohde, in whose handkerchief the head of Winter was found wrapped, ignored the appeal of the police asking the owner of this handkerchief to report; and it was by mere accident that the ownership became known. Further, two young men who were last seen in Winter's company never revealed their identity. A Jew, Wolf Israelski, was arrested on the flimsy charge that, two days previous to the discovery of the head, he had been seen walking in the direction of the place where the head was found, with a sack on his back in which there was some round object. Although he denied the fact itself, and although the state of preservation in which the head was found proved conclusively that it must have lain in the ice for some time, Israelski was kept in prison for nearly five months, until his trial (Sept. 8) proved his innocence.

The butcher Hoffmann, who also had been arrested, was discharged; and the city council, of which he was a member, gave him a cordial reception when he first appeared after his release. The language of the court in dismissing the case against Hoffmann was, moreover, such that the accusation of ritual murder was indirectly confirmed. Among the grounds for dismissal the court held that the deed must have been perpetrated by several people and according to a premeditated plan. Dr. Müller, the county physician ("Kreisphysikus"), rendered the opinion that Winter had bled to death, which, as subsequent investigations proved, was untenable. This opinion was published in the "Staatsbürgerzeitung," before the investigation of the court had been closed; and for this breach of confidence, Müller's son, who had communicated the document to the press, was censured by a court of honor ("Ehrengericht").

Anti-Semitic Agitation and Excesses.

On June 8 of the same year a shed near the synagogue of Konitz was set on fire; and two days later excesses were committed against the synagogue and against Jewish homes to such an extent that the military had to be called out. Similar riots, though not of such a severe character, occurred at Czersk (April 22), Stolp and Bütow (May 21-22), Tuchel (June 10), and Komarczyn (June 17). An old man named Landecker, of Cammin, was without any provocation knocked down with a pitchfork. In all of these cases the sentences imposed upon the rioters or assailants were very light, while Jews, whenever they came before the court, met with hostile sentiment and received heavy sentences for the slightest offenses. A county official to whom a Jew complained of the insults to which he had been subjected on the street, replied: "You can easily obtain relief, if you give up the murderer." A synagogue sexton who defended himself with a stake against a crowd which assailed him was sentenced to spend a year in jail; and a similar sentence was imposed on a Jewish apprentice because he had beaten a boy who had jeered at him. A highly respected citizen, Jacob Jacoby of Tuchel, was sentenced to confinement for one year in the penitentiary for perjury (Oct. 10), because he had sworn that he had called some boys who had shouted "Hep-Hep!" after him "lümmel" (toughs) only after they had insulted him, while the boys swore that he had first called them offensive names. This sentence was indeed so repugnant to public opinion that the emperor commuted it to six months in jail, and revoked that part by which the convict was deprived of civil rights (March, 1901). The worst case of persecution was that of Moritz Lewy, referred to below.

Attitude of the Courts.

Very lenient was the attitude of the authorities with regard to two dangerous agitators who tried to make capital out of this affair, the Silesian count Pückler and the Pomeranian pastor Krösell. The former, whom a court afterward adjudged insane, delivered in various cities violent diatribes against the Jews, in which he declared among other things that they must be clubbed out of the country and that the Christians must wade in Jewish blood up to their ankles. Krösell, who later on had to withdraw from the ministry in order to escape a sentence of expulsion on account of his immoral life, delivered in the neighborhood of Konitz lectures on ritual murder and on the immorality of rabbinical literature; but neither the ecclesiastical nor the state authorities would interfere; and the population appreciated Krösell's work to such a degree that in 1903 he was elected to the Reichstag. In the Reichstag, where this case was made the subject of an interpellation (Feb. 8-9, 1901), the Prussian minister of justice Schönstedt limited himself to a defense of the authorities against the charge of shielding the Jews; but he carefully refrained from uttering one word in condemnation of the ritual-murder charge, and even from stating that there was no reason for assuming such a motive in the case of Ernst Winter.

The anti-Semites naturally were unscrupulous in their desire to make capital of this opportunity. Liebermann von Sonnenberg, their political leader, said in a public address: "The Christians have not yet become accustomed to bear without a murmur the killing of Christian youths in an unnatural fashion by Jews within the city walls." The anti-Semitic papers, including the organs of the Clerical party like "Germania," and those of the Conservatives like the "Kreuzzeitung," constantly stirred up religious fanaticism and fostered the prejudice that the government had been bought by the Jews. A society for the investigation of the murder was formed in Konitz. The statement was spread that the coroner's commission had not searched the ritual bath near the synagogue, and had left undisturbed a room in the house of the butcher Adolf Lewy in which his wife was supposed to be sick. This statement was untrue; not only had all the rooms in Lewy's house and every nook and corner in the synagogue been searched, but the commission had even taken a sample of the blood of chickens from the yard which was used for killing fowl (see SHEHITAH), thus adding to the suspicions of the populace. The police were evidently mistaken as to traces of the deed, for some of the garments of the murdered youth were kept in a house in the city until Jan., 1901, without being discovered by them, and were subsequently found on different days in a public park. The members of a highly respectable family named Rosenthal in Cammin were kept in prison for six months, because a servant-girl of bad character testified that she had heard Rosenthal say that he would hang himself on a hook in the ceiling of his room, as he was unable to bear the remorse he felt for having participated in the murder of Winter. Investigation proved that this was intentionally false testimony. In the room, where, according to the girl's statement, Rosenthal had pointed to the hook, there never had been such a hook; but the case against the girl was dismissed on the plea of insanity (1902).

Trial of Moritz Lewy.

The fact that the manner in which Winter's body had been dismembered showed a skilful hand led from the start, as stated above, to a suspicion against butchers, and Adolf Lewy, whose house was near the lake where the trunk of Winter's body was found, was one of the suspects. From the state of the contents of Winter's stomach it was proved, however, that Winter could not have died later than seven o'clock in the evening. Fortunately Adolf Lewy and his son Moritz could prove an irrefutable alibi for the hours during which the murder had been committed; but the anti-Semites, who desired their implication, testified that Moritz Lewy had been frequently seen in Winter's company. Lewy denied having been acquainted with Winter, although he admitted that he might have spoken to him, and even have walked with him a certain distance, as witnesses had testified, without knowing him by name. At the trial for perjury of the normal-school student Speisiger, who had made various statements implicating Jews, Lewy renewed his statement that he had not known Winter, while various witnesses testified that they had seen them together. Lewy was arrested Oct. 6, 1900. The charges against the Lewys rested on the testimony of a disreputable person, named Masloff, and his mother-in-law, named Ross. Masloff alleged that he had passed by Lewy's cellar on the evening of the murder and had been attracted by groaning and by an unusual light which proceeded from it. Lying on the ground, he watched people who had some human remains on a butcher's block, and he saw three of them after a while leave the house with a package and go in the direction of the lake. The testimony was manifestly false, and contained many contradictions which Masloff tried to explain by an alleged confession that he had gone to the place in order to commit an act of burglary. Persons who had passed Lewy's house about the time that Masloff claimed to have been watching the persons in the cellar had not noticed any one lying on the ground. That a man should remain for an hour and a half on the ground on a cold night in March was in itself highly improbable; the murder could not have been committed at such a late hour; and an investigation of the cellar showed no traces of such a deed nor any evidence of the thorough cleaning which its commission would have rendered necessary. The woman Ross seems to have been the inciter of the conspiracy, which most likely had for its object the securing of the promised great reward for the discovery of the murderer. She had worked in the Lewy family, and claimed to have seen Winter's cigar-case with his photograph in the possession of the Lewy family. It was, however, proved that no photograph of Winter existed. Masloff was sentenced to one year and his mother-in-law to eighteen months in the penitentiary for perjury (Oct. 25, 1900); but the jury signed a petition for their pardon, which the emperor did not grant. The accusation against the Lewys, which had rested on this false testimony, was now disproved, although the government in its anxiety to purge itself from the charge of shielding the Jews brought the matter to trial (Sept. 25, 1901), when the case was dismissed. Meanwhile Moritz Lewy had been committed for perjury on the ground of his denial of acquaintance with Winter; and although he held to his original statement, and in spite of the fact that he could have had no reason for perjuring himself other than the fear of involving himself in difficulties, he was sentenced to four years in the penitentiary (Feb. 13, 1901). He was released, however, on Oct. 12, 1903, when the emperor granted his pardon. His father had long before removed to Berlin, as his business had been entirely ruined, which also was the case with many others, so that the number of Jews residing in Konitz fell from 481 in 1900 to 350 in 1903.

The Reason for the Crime.

Of great importance was an investigation made in Danzig by the board of health (Königliches Medizinalkollegium) for West Prussia, which proved that Winter had been choked to death, and that, contrary to the statement of the county physician, his death was not the result of the cutting of his throat. This opinion, rendered Sept. 7, 1901, was confirmed by the highest medical authority, the Wissenschaftliche Deputation für Medizinalwesen (state board of health), Jan. 15, 1902. It was further shown that jealousy was, in all likelihood, the motive of his death.

Again, it was evidently for political reasons that the appeal of Winter's father to the superior court (Oberlandesgericht) of Marienwerder was considered sufficiently well founded to be made the basis of a trial, which was held June 4, 1902, and which proved the baselessness of all the accusations against the Jews.

The government showed itself stronger in prosecuting cases of libeling the authorities. Bruhn, the publisher, and Bötticher, the editor, of the "Staatsbürgerzeitung," which paper had from the beginning accused the police and the courts of shielding the perpetrators of the crime because they were Jews, were sentenced for libel, the former to six months and the latter to one year in jail (Oct. 11, 1902). Both of them, however, were elected to the Reichstag in 1903. Previously G. A. Dewald, a Berlin publisher, had been sentenced to six months in jail because on the first anniversary of Winter's assassination he had published souvenir postal cards representing Winter suspended by his feet in Lewy's cellar and the Jews ready to cut his throat.

A sad sequel to the Konitz trial was the cruel murder of a Polish typesetter, Abraham Levy, in Steegers, West Prussia (Sept. 28, 1903), by two drunkards, who taunted him with the murder and, when he resented the insult in offensive language, beat him to death. Of the perpetrators of this crime one was sentenced to spend a year in jail, while the case against the other was dismissed (Jan. 13, 1904). Mysterious as the Konitz case undoubtedly is, it has at least been clearly established, as has been noted above, that the motive of the crime was jealousy.

D.

KONKI (CONQUI or CUENQUI). See Conque.

ḲONṬRES (קונטרס; Levita punctuates קונְטְרֵס): Usual designation, among the Tosafists, of Rashi's commentary on the Talmud. Rashi himself uses the expression once to designate a written Talmudic interpretation by his "old teacher" (Jacob b. Yaḳar on Giṭ. viii. 82a). In the commentary on Ta'an. 21b, a "ḳonṭres of Rome" is mentioned, which elsewhere (commentary on Ker. 5a) is called "perush [commentary] of Rome" (see Berliner, "Beiträge zur Gesch. der Raschi-Commentare," p. 4). Rashi's Bible commentary likewise is termed "ḳonṭres" by himself and by his pupils (*l.c.* pp. 10, 19); in one place it is called קונטריסין (plural; *l.c.* p. 11). The word does not designate the commentary itself, but the note-book, or books, in which it was written. Rashi himself, in explaining the Talmudic word which designates the clasp (see Blau, "Buchwesen," p. 171) used to hold the leaves of a book in place, speaks of the "leaves of the ḳonṭres" (דפי הקונטרס; commentary on Shab. 98a; Men. 32a). In the Yalḳuṭ to Ps. xlv. 5 (§ 746) an unwritten ḳonṭres is mentioned (קונטרס חלק); the source of the Yalḳuṭ (Midr. Teh., ed. Buber, p. 271) has קרטס (χάρτης). "Ḳonṭres" was used to designate explanations written in a book even before it was so used by Rashi; afterward it became customary to designate Rashi's Talmud commentary as the "ḳonṭres" par excellence. Elijah Levita ("Tishbi," *s.v.* קונטרס) states it as the generally prevailing opinion that Rashi's Talmud commentary was originally written in single blank books, which were then bound together to form one book, for which reason it was called "ḳonṭres." Zunz, who appropriately translates the word "lecture note-book" ("Zeitschrift für die Wissenschaft des Judenthums," p. 324), holds it to be an abbreviation of קומנטרים ("commentarius"; Giṭ. 28b). In the Talmudic passage mentioned by Zunz this word is used only in the plural (קומנטרסים); the singular does not occur at all (see Krauss, "Lehnwörter," ii. 509 *et seq.*). Zunz is undoubtedly right in holding that קונטרס is a singular, formed from the Talmudic word. The form found in the Sifre to Num. xxvii. 12 (§ 134) is without a מ before the נ (קונטריסים).

That "ḳonṭres" came to be used in the sense of a "writing-book" appears to have been due to its resemblance in sound to "quinternio" or "quaternio," from which Levita derives it. However, such a derivation leaves the *s* at the end of the word unexplained, and it is better to have recourse to the words "quaternus," "quinternus," which likewise were used to designate books of four or five leaves (see Wattenbach, "Das Schriftwesen des Mittelalters," Index). Nevertheless in Rashi's school the existence of the Talmudic word doubtless contributed to establishing the form קונטרס. In other than Jewish circles "quaternus" ("quaternio") indicated a writing-book, without any reference to the number of its pages (Wattenbach, *l.c.* p. 178). Mussafia's explanation may be mentioned as a curiosity (see Kohut's "Aruch Completum," vii. 122a), namely, that the word is shortened from "commentarius" ("explanation," or "one who explains"), a derivation which has been adopted by Levy ("Neuhebr. Wörterb." iv. 265b).

The original meaning of "ḳonṭres," which was spoken and written also with ד (קונדרים) has been preserved in later literature. The leaves of a book are called קונדריסים (see Steinschneider, "Cat. Bodl." col. 1093; comp. also p. lxvi.). A small book is called קונטרים or קונדרים (see Steinschneider, "Vorlesungen über die Kunde Hebräischer Handschriften," p. 23). Benjacob ("Thesaurus Libr. Hebr." p. 524a) defines the bibliographical meaning of "ḳonṭres" thus: A "ḳonṭres" is a small opus which is not large enough to form a separate volume, but which is usually appended to another volume. Benjacob enumerates a large number of books and treatises of which "Ḳonṭres" either is the only title or else is prefixed to the title (pp. 524-526; Nos. 228-310). In modern times the writings of A. Jellinek may be mentioned, in which the word "Ḳonṭres" forms part of the titles, and which furnish a systematic bibliography to various fields of Jewish literature (see Lippe, "Bibliographisches Lexicon," pp. 209 *et seq.*, Nos. 82-87).

G. W. B.

KOPLIK, HENRY: American physician; born at New York Oct. 28, 1858; educated at the College of the City of New York and at the College of Physicians and Surgeons (M.D. 1881). He took a postgraduate course at the universities of Leipsic, Prague, and Vienna, and on his return to America established himself as a physician in his native city (1883). There he became connected with Bellevue Hospital, the Good Samaritan Dispensary, and other medical institutions. Since 1899 he has been assistant professor of pediatrics at Bellevue Medical College.

Koplik was the first to describe an early diagnostic sign in measles, since known as "Koplik's spots"; and he found, too, the bacillus of whooping-cough. He also introduced the free delivery of Pasteurized milk to the needy poor, in which he was followed later by Nathan Straus.

Besides essays in the medical journals Koplik is the author of "Diseases of Infancy and Childhood," New York, 1902.

KOPPELMANN: Rabbi at Nuremberg toward the end of the fourteenth century. In 1406 Rabbi Israel went to Nuremberg and taught there, at first together with Koppelmann. Afterward they had a controversy, which Rabbi Jacob Weil, interfering, strongly urged the council of the Jewish community to end. Thereupon the latter settled the question by deciding that the two rabbis should lecture on alternate days, the pupils to have the right to attend the lectures of either. The peace, however, does not appear to have been of long duration; for in 1412 a "Koppelmann, son of the schismatic," was forever banished from the city.

S. S. M. L. B.

KOPPELMANN, JACOB BEN SAMUEL: German author and translator; born in the district of Breisgau 1555; died 1598. In 1583 he went to Frankfort-on-the-Main, but was obliged to leave that city on account of the plague. While on the road he composed his "Ohel Ya'aḳob" (Freiburg, 1584), a commentary on the "'Iḳḳarim" of Joseph Albo.

He published also: a Judæo-German translation of the Five Megillot, with the Targum Sheni to Esther (*ib.* 1583); a translation in Yiddish of Berechiah ha-Naḳdan's "Mishle Shu'alim" (*ib.* 1588); and "'Omeḳ Halakah" (Cracow, 1598), expositions of mathematical passages in the Talmud illustrated by figures (this book received the approval of the Council of Four Lands).

KOR. See WEIGHTS AND MEASURES.

KORAH (קרח): **1.** Son of Esau by Aholibamah; mentioned as a "duke" (אלוף) of the land of Edom (Gen. xxxvi. 5, 14, 18; I Chron. i. 35). **2.** Son of Eliphaz, Esau's son by Adah; also mentioned as a "duke" of Edom (Gen. xxxvi. 16). **3.** Son of Hebron of the tribe of Judah (I Chron. ii. 43).

4. Biblical Data: Son of Izhar, of the family of Kohath, and great-grandson of Levi (Ex. vi. 22; in I Chron. vi. 7 he is mentioned as a son of Kohath, but verse 22, following, also mentions him as the son of Izhar the son of Kohath). During the journey of the Israelites in the wilderness, Korah, with Dathan and Abiram, sons of Eliab, On, son of Peleth, and two hundred and fifty other "men of renown," rebelled against the leadership of Moses and Aaron (Num. xvi. 1–3). Moses ordered Korah and his company to appear in the Tabernacle on the following day, each bearing a censer filled with lighted incense, and the Lord would decide who were the rightful leaders of the people (xvi. 4–17). Korah and his company obeyed, and went to the Tabernacle with their lighted censers, followed by the whole congregation. The congregation was commanded to separate itself from Korah and his band, and when this order was carried out "the earth opened her mouth," and the arch conspirators "and all that appertained to them went down alive into the pit, and the earth closed upon them," while a fire from the Lord consumed their two hundred and fifty attendants (xvi. 18–35). Korah's children, however, did not die with their father (xxvi. 11). The censers of the conspirators were made into broad plates to cover the altar, as a warning to future conspirators (xvii. 1–5, Hebr.). After Korah's destruction the people murmured against Moses for having caused it, and a plague was sent by the Lord to destroy them. This plague killed 14,700 men before its ravages were stopped by an atonement offered for the people by Aaron (xvii. 6–15, Hebr.).

From Korah were descended the Korahites, or Korhites, first mentioned in Ex. vi. 24, and reappearing as Levites in Num. xxvi. 58 and I Chron. ix. 31. Several Psalms (xlii., xliv.–xlix., lxxxiv., lxxxv., lxxxvii., lxxviii.) are headed "for the sons of Korah," and the Korahites appear again as singers before Jehoshaphat fought the Moabites and Ammonites (II Chron. xx. 19). Several Korahite warriors joined David while he was at Ziklag (I Chron. xii. 6). Korahites are mentioned also as porters at, and gate-keepers of, the Tabernacle (I Chron. ix. 19, xxvi. 1, 19).

J. JR. C. J. M.

——**In Rabbinical Literature:** The name "Korah" (קרח) is explained by the Rabbis as meaning "baldness." It was given to Korah on account of the gap or blank which he made in Israel by his revolt (Sanh. 109b). Korah is represented as the possessor of extraordinary wealth, he having discovered one of the treasures which Joseph had hidden in Egypt. The keys of Korah's treasuries alone formed a load for three hundred mules (Pes. 119a; Sanh. 110a). He and Haman were the two richest men in the world, and both perished on account of their rapacity, and because their riches were not the gift of Heaven (Num. R. xxii. 7; comp. Ex. R. li. 1). On the other hand, Korah is represented as a wise man, chief of his family and as one of the Kohathites who carried the Ark of the Covenant on their shoulders (Tan., ed. Buber, Ḳoraḥ, Supplement, 5; Num. R. xviii. 2).

Cause of Revolt.

The chief cause of Korah's revolt was, according to the Rabbis, the nomination of Elizaphan, son of Uzziel, as prince over the Kohathites (Num. iii. 30), Korah arguing thus: "Kohath had four sons [Ex. vi. 18]. The two sons of Amram, Kohath's eldest son, took for themselves the kingdom and the priesthood. Now, as I am the son of Kohath's second son, I ought to be made prince over the Kohathites, whereas Moses gave that office to Elizaphan, the son of Kohath's youngest son" (Num. R. xviii. 1; Tan., Ḳoraḥ, 3). Korah plied Moses with the following questions: "Does a ṭallit made entirely of blue wool need fringes?" To Moses' affirmative answer Korah objected: "The blue color of the ṭallit does not make it ritually correct, yet according to thy statement four blue threads do so" (Num. xv. 38). "Does a house filled with the books of the Law need a mezuzah?" Moses replied that it did; whereupon Korah said: "The presence of the whole Torah, which contains 175 chapters, does not make a house fit for habitation, yet thou sayest that one chapter thereof does so. It is not from God that thou hast received these commandments; thou hast invented them thyself." He then assembled 250 men, chiefs of the Sanhedrin, and, having clad them in ṭallitot of blue wool, but without fringes, prepared for them a banquet. Aaron's sons came for the priestly share, but Korah and his people refused to give the prescribed portions to them, saying that it was not God but Moses who commanded those things. Moses, having been informed of these proceedings, went to the house of Korah to effect a reconciliation, but the latter and his 250 followers rose up against him (Num. R. xviii. 2; Tan. *l.c.*; comp. Targ. pseudo-Jonathan to Num. xvi. 2).

Korah consulted his wife also, who encouraged him in the revolt, saying: "See what Moses has done. He has proclaimed himself king; he has made his brother high priest, and his brother's sons priests; still more, he has made thee shave all thy hair [comp. Num. viii. 7] in order to disfigure thee." Korah answered: "But he has done the same to his own sons." His wife replied: "Moses hated thee so much that he was ready to do evil to his own children provided the same evil would overtake thee" (Midr. Agadah to Num. xvi. 8; Yalḳ., Num. 750; comp. Num. R. *l.c.*; Tan. *l.c.*; Sanh. 110a).

Korah's Parable.

Korah incited all the people against Moses, arguing that it was impossible to endure the laws instituted by the latter. He told them the following parable: "A widow, the mother of two young daughters, had a field. When she came to plow it, Moses told her not to plow it with an ox and an ass together (Deut. xxii. 10); when she came to sow it, Moses told her not to sow it with mingled seeds (Lev. xix. 19). At the time of harvest she had to leave unreaped the parts of the field prescribed by the Law, while from the harvested grain she had to give the priest the share due to him. The woman sold the field and with the proceeds bought two sheep. But the first-born of these she was obliged to give to Aaron the priest; and at the time of shearing he required the first of the fleece also (Deut. xviii. 4). The widow said: 'I can not bear this man's demands any longer. It will be better for me to slaughter the sheep and eat them.' But Aaron came for the shoulder, the two cheeks, and the maw (*ib.* verse 3). The widow then vehemently cried out: 'If thou persistest in thy demand, I declare them devoted to the Lord.' Aaron replied: 'In that case the whole belongs to me' (Num. xviii. 14), whereupon he took away the meat, leaving the widow and her two daughters wholly unprovided for" (Num. R. xviii. 2-3; Tan., Ḳoraḥ, 4-6).

The question how it was possible for a wise man like Korah to be so imprudent as to rebel is explained by the fact that he was deceived through his own prophetical capacity. He had foreseen that the prophet Samuel would be his descendant, and therefore concluded that he himself would escape punishment. But he was mistaken; for, while his sons escaped, he perished (Num. R. xviii. 7; Tan., Ḳoraḥ, 12).

Destruction of Korah.

At the time of Korah's engulfment, the earth became like a funnel, and everything that belonged to him, even linen that was at the launderer's and needles that had been borrowed by persons living at a distance from Korah, rolled till it fell into the chasm (Yer. Sanh. x. 1; Num. R. *l.c.*). According to the Rabbis, Korah himself underwent the double punishment of being burned and buried alive (Num. R. *l.c.* 14; Tan., Ḳoraḥ, 23). He and his followers continued to sink till Hannah prayed for them (Gen. R. xcviii. 3); and through her prayer, the Rabbis declare, Korah will ascend to paradise (Ab. R. N. xxxvi.; Num. R. xviii. 11; comp. Sanh. 109b). Rabbah bar bar Ḥana narrates that while he was traveling in the desert, an Arab showed him the place of Korah's engulfment. There was at the spot a slit in the ground into which he introduced some wool soaked in water. The wool became parched. On placing his ear to the slit, he heard voices cry: "Moses and his Torah are true; and we are liars" (B. B. 74a; comp. Tan., ed. Buber, Ḳoraḥ, Supplement).

S. S. M. SEL.

——**Critical View:** Korah in the chief narrative concerning him (Num. xvi.) is associated with Dathan and Abiram in leading a revolt against Moses and Aaron. A close examination of the chapter shows that two independent narratives—one in which Dathan and Abiram figure and one in which Korah alone appears—have been woven together. In verses 12-15, 27b-32 Moses speaks with Dathan and Abiram, while in the rest of the passage he speaks with Korah alone. Then, as the narrative now stands, Korah and his followers are killed twice, once in xvi. 32b-33 and again in verse 35. The Deuteronomist (Deut. xi. 6) knew only the story as related of Dathan and Abiram. This form of the tale comes from JE.

The story of Korah thus separated originally related a contest between a band of Israelites and Moses and Aaron over the right of the Levites to exercise the priestly office. This narrative belongs to P. A still later writer, by inserting "the son of Izhar, the son of Kohath, the son of Levi" in verse 1, and by adding verses 8-11, made the contest appear as one between a band of Levites and the house of Aaron over the priesthood.

Wellhausen ("Composition des Hexateuchs," p. 108) points out that Korah in I Chron. ii. 43 is a Judahite clan, and Bacon ("Triple Tradition of the Exodus," pp. 194 *et seq.*) has argued strongly for the view that the original P narrative is based on a Judahite story of J.

J. JR. G. A. B.

KORAN: The sacred scriptures of Islam. According to Mohammedan belief, based upon the testimony of the book itself, the Koran consists of separate revelations vouchsafed by God to Mohammed through the angel Gabriel (sura ii. 91, xxv. 34). These were delivered in Arabic (xxvi. 195) and were thus first of all for the Arabs, who had previously received no manifestation of the will of God (xxxiv. 43). They were designed, also, to confirm the older books of the Torah and the Gospels, and to lead mankind in the right way (iii. 2, *et al.*). Mohammed is, therefore, the messenger of God (xcviii. 2, etc.) and the seal of the Prophets (xxxiii. 40). In the prime of life this remarkable man, whose development is traced in no authentic records, voluntarily retired to solitude. There, through vigils and fasting, he fell into religious trances, in which he felt himself inspired to warn his fellows of an impending judgment.

Form of Revelation.

The oldest portions of the Koran represent the material result of this inspiration. They reflect an extraordinary degree of excitement in their language—in their short, abrupt sentences and in their sudden transitions, but none the less they carefully maintain the rimed form, like the oracles and magic formulas of the pagan Arab priests (Al-A‘sha, in Ibn Hisham). This form is preserved in the later sections also, in some of which the movement is calm and the style expository. The book, which is about equal to the New Testament in size, was put together long after the prophet's death; and its 114 sections were arranged without any regard for chronological sequence.

Quotations from the Koran are found as early as the period of Mohammed's activity in Mecca (Ibn Hisham, *ib.* p. 226). The oldest fragments may have been recited by the prophet himself before a band of followers, though probably a small one, who could more easily preserve them, either orally or in writing. The following extracts, referring to the most important articles of faith taught in the Koran, will give an approximate idea of its language and mode of thought:

Allah and Creation.

"Allah is the Creator of the heavens and the earth; when He says 'Be,' it is" (ii. 111; iii. 42, 52). "With Him are the keys of the unseen. None knows it save Him; His is the understanding of all that is in the land and in the sea; and no leaf falls without His knowledge" (vi. 59). "Should God touch thee with harm, there is none to remove it save Him; and if He wish thee well, there is none to restrain His bounty" (x. 107). "Do not the unbelieving see that the heavens and the earth were one until We clove them asunder and made every living thing from water" (xxi. 31). "He it is who appointed the sun for brightness; He established the moon for light and ordained her stations, that ye may know the number of the years and the reckoning of them" (x. 5). "The cattle, likewise, have We created for you; in them are warmth and much profit, and of them ye eat. In them is there beauty for you when ye fetch them from their pastures, and when ye drive them forth to graze. They bear your heavy burdens to towns which ye could not otherwise reach, save with great wretchedness of soul: verily, your Lord is gracious and merciful!" "Horses, too, has He created, and mules, and asses, for you to ride upon and for an ornament" (xvi. 5–8). "He it is that sends rain from heaven, whereof ye drink; from which grow the trees whereby ye feed your flocks." "He makes the corn to grow, and the olives, and the palms, and the grapes, and all manner of fruit: verily, herein is a sign unto them that reflect" (xvi. 10, 11). "He it is that subjected the sea unto you, that ye may eat fresh meat therefrom and bring forth from it the ornaments which ye wear; and thou mayest see the ships that sail upon it" (xvi. 14). "He it is that created you of dust, then of a drop, then of clotted blood, and then brought you forth as children; then ye attain your full strength; then ye become old men—though some of you are taken sooner—and then ye reach the time appointed for you" (xl. 69).

Last Judgment; Resurrection.

"O ye men! fear your Lord! Verily the earthquake of the Hour is a mighty thing!" "On the day ye shall see it, every suckling woman shall forget her sucking babe; and every woman with child shall cast forth her burden; and thou shalt see men drunken, though they have drunk naught" (xxii. 1, 2). "And the day when We shall move the mountains, and thou shalt see the earth a level plain; and We shall gather all men together, and leave no one of them behind: then shall they be brought before thy Lord in ranks. Now are ye come to Us as we created you at first! Nay, but ye thought that we would never make Our promise good! And each shall receive his book, and thou shalt see the sinners in alarm at that which is therein; and they shall say, 'Alas for us! what a book is this, leaving neither small nor great unnumbered!' And they shall find therein what they have done; and thy Lord shall deal unjustly with none" (xviii. 45–47). "We shall set just balances for the Day of Resurrection, and no soul shall be wrong; even though it be the weight of a grain of mustard-seed, We shall bring it" (xxi. 48). "Verily, those that believe, and those that are Jews, and the Sabeans, and the Christians, and the Magians, and those that join other gods with God—verily, God will decide between them on the Day of Resurrection" (xxii. 17).

Hell and Paradise.

"Verily, We have prepared for the evil-doers a fire, the smoke whereof shall encompass them; and if they cry for help they shall be helped with water like molten brass, which shall scald their faces" (xviii. 28). "But for those that misbelieve, for them are cut out garments of fire; there shall be poured over their heads boiling water; what is in their bellies, and their skins, shall be dissolved; and for them are maces of iron. Whenever in their pain they shall come forth, they shall be thrust back into it" (xxii. 20–22). "Nay, when the earth shall be crushed with crushing on crushing, and thy Lord shall come, and the angels, rank on rank, and hell on that day shall be brought nigh—on that day man shall be reminded! But how shall he have a reminder? He will say, 'Would that I had prepared in my life for this!' But on that day none shall be punished with a punishment like his, and none shall be bound with chains like his!" (lxxxix. 22–27).

"On that day shall there be joyous faces, well pleased with their past deeds, in a lofty garden where they shall hear no vain discourse; wherein is a flowing fountain; wherein are high couches and goblets set, and cushions laid in order, and carpets spread!" (lxxxviii. 8-16). "Verily, the righteous shall dwell among delights; seated on couches they shall gaze about them; thou mayest recognize in their faces the brightness of delight; they shall be given to drink wine that is sealed, whose seal is musk; for that let the aspirants aspire! And it shall be tempered with Tasnim, a spring from which those that draw nigh to God shall drink" (lxxxiii. 22–28). "O thou soul that art at rest! return unto thy Lord, well pleased and pleasing him! And enter among my servants, and enter my paradise" (lxxxix. 27–30).

Old and New Testament Stories.

Although the passages here quoted contain many original phrases and figures, they are frequently reminiscent of similar passages in the Old and New Testaments. These points of contact are the more numerous because Mohammed repeats many Biblical narratives. These are found especially in the later suras, which have all the characteristics of sermons. The chief subjects taken from the Old Testament are: the Creation; Cain and Abel; Noah; Abraham and his sons; Jacob and his sons; Moses and Aaron; Saul; David and Solomon; Job and Jonah; but from the New Testament, besides Jesus and Mary, only John is mentioned. In the Old Testament narratives the Koran frequently follows the legends of the Jewish Haggadah rather than the Biblical accounts, as Geiger pointed out in his "Was Hat Muhammad aus dem Judenthume Aufgenommen?" (Bonn, 1834; 2d. ed. Berlin, 1902). Thus, the story of Abraham's destruction of the idols in his father's house, and his answer to those that asked who had done it (xxi. 58–64), agree with Gen. R. xvii.; the sign that restrained Joseph from sin (xii. 24) corresponds to Soṭah 36b; the refusal of Moses to accept food from the Egyptian women (xxviii. 11) parallels Soṭah 12b; and the account of Solomon and the Queen of Sheba (xxvii.) harmonizes with the commentary of Targum Sheni to Esther i. 13.

For many of these borrowed narratives the sources are unknown. Thus, for instance, the story in the "Sefer ha-Yashar" of the Egyptian women that cut their fingers in bewilderment at Joseph's beauty (xii. 31) is based on the Mohammedan narrative, and no older Jewish source thereof is known. For the legend of Samiri, comp. "Z. D. M. G." lvi. 73.

In its version of the story of Jesus the Koran shows more dependence on the apocryphal than on the canonical Gospels. Thus the story of the giving of life to the bird of clay (iii. 43, v. 110) is found in the Gospel of Thomas (ed. Tischendorf, ii. 2). The account of Mary's marvelous food (iii. 32) is given in the Protevangelium Jacob, viii., as well as the casting of lots for the care of her (ch. ix.), found in iii. 39.

Furthermore, there are many variations, especially in the case of proper names, which are due to confusion on the part of Mohammed himself. Thus, Pharaoh desires to build a tower (xxviii. 38), the story being based on the account of Nimrod (Josephus, "Ant." i. 4, §§ 2–3); by a confusion with Miriam, Mary is called the sister of Aaron (xix. 29); Haman is the servant of Pharaoh (xxviii. 38); and Azar becomes the father of Abraham (vi. 74)—a reminiscence in Mohammed's mind of the name of Eliezer (comp. also, for the account of Idris [xix. 57], Nöldeke in "Zeit. für Assyr." xvii. 83).

There are frequent anachronisms in the teachings of Mohammed. Thus, the regulation concerning prayer and almsgiving is mentioned in connection with God's compact with Israel (v. 15); God commanded Moses and Aaron to provide places of prayer in Egypt (x. 87); and the destruction of Lot's wife was foreordained by God (xv. 60). Other additions were made to suit Arabic conditions, such as the description of Moses' staff (xx. 19); the reason assigned for his approach to the burning bush ("I will bring you a blazing brand from it"; xxvii. 7); crucifixion on palm-trees as a punishment (xx. 74); and Joseph as guardian of his brothers' baggage (xii. 17; comp. Wellhausen, "Skizzen," iv. 157; for the description of Solomon's glory, "dishes as large as cisterns"; comp. Al-A'sha, in Al-Mubarrad, 4, 14).

Application of Quotations and References.

A fundamental alteration, which has a direct bearing on the Arabs and on Mecca, is found in the story of Abraham and his sons, the Koran representing the Biblical patriarch as the founder of the sanctuary at Mecca. Ishmael is not mentioned with him until the later suras, whereas, according to the earlier ones, Isaac and Jacob are the sons of Abraham: probably a confusion in Mohammed's own mind (comp. Snouck Hurgronje, "Het Mekkaansche Feest," p. 32).

In all the Biblical narratives which are found in the Koran the words placed in the mouths of the speakers are intended to convey Mohammed's opinions and beliefs. The relation of Mohammed to the Meccans is but thinly disguised under the warnings of individual prophets to a sinful people, and in the answers of the latter. Noteworthy in this connection are the words of Adam and Eve (vii. 22); of Abel (v. 32); of Noah (vii. 57, 59; xi. 27); of the unbelievers in Noah's time (vii. 58; xi. 34, 45, 48); of Jacob (xii. 99); of Joseph (xii. 33, 37); of Moses (vii. 103, xxviii. 15); of the Egyptian magicians (xx. 75); and of Jesus (xix. 31).

A few legends, in addition to the Biblical narratives, have been taken into the Koran, such as the legend of Alexander the Great, with "the two horns" (xviii. 82 *et seq.*), which is derived from a Syriac source (Nöldeke, "Beiträge zur Gesch. des Alexanderromans," p. 32); the legend of the Seven Sleepers (xviii. 8 *et seq.*; comp. Koch, "Die Siebenschläfer Legende," Leipsic, 1883; Guidi, "Testi Orientali Inediti Sopra i Sette Dormienti di Efeso," Rome, 1885); the legend of Moses and the servant of God (xviii. 64 *et seq.*); and the story of the one hundred years' sleep (ii. 261; comp. the story of Ḥoni ha-Me'aggel, Yer. Ta'an. iii. 66d; Guidi, "Sette Dormienti," p. 103).

The Koran contains also native Arabic legends, apparently somewhat altered in form, which are included for the moral they convey. To this class belong the stories of the destruction of the Thamud (the *Θαμουδῆνοι* of Diodorus Siculus, iii. 44; Ptolemy, vi. 7, 21; "Notitia Dignitatum," ed. Seeck, pp. 58, 59, 73), on account of their disobedience to their prophet (vii. 71, *et al.*); of the Madyan (vii. 83, *et al.*; the מדין of the Bible and the *Μαδιάμα* of Ptolemy, vi. 7, 27); and of the 'Ad (xi. 62, *et al.*), a general term for a mythological, prehistoric people (comp. Nöldeke, "Fünf Mu'allakat," iii. 31, in "Sitzungsberichte der Wiener Akademie," 1903). Here, also, belong the story of the breaking of the dam in Yemen (xxxiii. 14) and the speeches placed in the mouth of Luḳman (xxxi. 12 *et seq.*), who is mentioned likewise in old Arabic poems. The Koran, in addition, includes many passages of a legislative character and of later date. These contain regulations concerning the pilgrimage (ii. 185); fasting (ii. 181); almsgiving (ii. 273 *et seq.*, lxiv. 17 *et seq.*); the spoils of war (viii.); marriage (iv. 23, *et al.*); inheritance (iv. 2, *et al.*); and the like. In these portions, also, the typical expressions of the earlier passages relating to articles of faith recur as interpolations in the text itself.

The language of the Koran is held by the Mohammedans to be a peerless model of perfection. An impartial observer, however, finds many peculiarities in it. Especially noteworthy is the fact that a sentence in which something is said concerning Allah is sometimes followed immediately by another in which Allah is the speaker; examples of this are suras xvi. 81, xxvii. 61, xxxi. 9, and xliii. 10 (comp. also xvi. 70). Many peculiarities in the positions of words are due to the necessities of rime (lxix. 31, lxxiv. 3), while the use of many rare words and new forms may be traced to the same cause (comp. especially xix. 8, 9, 11, 16). See also ISLAM; MOHAMMED.

G. S. FR.

The dependence of Mohammed upon his Jewish teachers or upon what he heard of the Jewish Haggadah and Jewish practises is now generally conceded. The subject was first treated from a general point of view by David Mill, in his "Oratio Inauguralis de Mohammedanismo e Veterum Hebræorum Scriptis Magna ex Parte Composita" (Utrecht, 1718); and by H. Lyth in his "Quo Successu Davidicos Hymnos Imitatus Sit Muhammed" (Upsala, 1806–1807). Geiger's epoch-making work laid the foundation for the study of the Koran in its relation to Jewish writings. J. Gastfreund, in his "Mohamed nach Talmud und Midrasch" (i., Berlin, 1875; ii., Vienna, 1877; iii., Leipsic, 1880), has attempted to show the parallels, also, in later Mohammedan literature; though not always with success, as Sprenger has pointed out ("Z. D. M. G." xxix. 654). Further parallels are given by Grünbaum (*ib.* xliii. 4 *et seq.*). The subject has received an exhaustive treatment at the hands of Hartwig Hirschfeld, in his "Jüdische Elemente im Ḳoran" (1878), in his "Beiträge zur Erklärung des Ḳoran" (Leipsic, 1886), and more especially in his "New Researches into the Composition and Exegesis of the Qoran" (London, 1902; comp. the remarks of August Müller in "Theologische Literaturzeitung," 1887, No. 12, cols. 278 *et seq.*).

Hebrew Translations.

Hebrew translations of the Koran were not unknown, and fragments of these may lie buried in Oriental genizahs. Before such translations were made a simple transliteration into Hebrew characters sufficed. Portions of such a transliteration are to be found in Bodleian Manuscript No. 1221 (= Hunt No. 529), the first parts of which are even punctuated; on the margin are Hebrew translations of some passages and references to the Bible and the haggadic literature; the manuscript is in a modern Spanish rabbinical script. Additional fragments of such manuscripts are in the libraries of the Deutsche Morgenländische Gesellschaft (from the Crimea; see Rödiger in "Z. D. M. G." xiv. 485), the Vatican (Cod. 357, 2), and the Vienna bet ha-midrash (Pinsker, No. 17). In a bookseller's list cited in "J. Q. R." xv. 77 is mentioned a volume containing the Torah, the Targum, and the Koran bound together (ט"ו גזו תורה תרגום וקראן). A translation into Hebrew from the Latin was made in the seventeenth century by Jacob b. Israel ha-Levi, rabbi of Zante (d. 1634; see Neubauer, "Cat. Bodl. Hebr. MSS." No. 2207); and, in modern times, by Herrman Reckendorf (אלקוראן, Leipsic, 1857). A translation into Spanish of sura 70 ("Al-Mi'raj") was made in the thirteenth century, at the behest of Alfonso X., by the physician of Toledo, Don Abraham; a French rendering of this was afterward made by Bonaventura de Seve. Koran citations, either for polemical purposes or in translations from the Arabic, are occasionally found in Hebrew writings (*e.g.*, in those of Saadia and Hai Gaon). Simon Duran (1423), in his critique of the Koran (see "Ḳeshet u-Magen," ed. Steinschneider, in "Oẓar Ṭob," 1881), quotes the Koran; but he mixes such quotations with others from the Sunnah, and probably takes them from translations of Averroes' works. In some translations from the Arabic, the citations from the Koran were occasionally replaced by quotations from the Bible (*e.g.*, in Al-Bataljusi, and in Judah Nathan's translations of Ghazali's "Maḳaṣid al-Falasifah").

G.

KORÁNYI, FRIEDRICH: Hungarian physician and medical writer; born Dec. 20, 1828, at Nagy-Kallo. In 1851 he took his doctor's degree at Budapest, and after practising for two years in the surgical clinic of Professor Schuh at Vienna, he settled as a physician in his native town. In 1865 he became privat-docent for nervous diseases at the University of Budapest, and in the following year was appointed director of the internal clinic and full professor. In 1881 Emperor Francis Joseph conferred upon him the Order of the Iron Crown; in 1884 he was raised to the Hungarian nobility; and in 1891 he became a member of the Hungarian House of Magnates. He was decorated with the cross of the Order of St. Stephen.

Korányi has contributed numerous essays to the medical journal "Orvosi Hetilap." The following works, written by him in German, may also be noted: "Der Milzbrand" (in Nothnagel's "Specielle Pathologie und Therapie"); "Die Rotzkrankheit" (*ib.*); "Zoonosen" (*ib.*); "Die Lungenschwindsucht in Ungarn"; "Die Krankheiten der Lunge" (in Eulenburg's "Realencyklopädie der Gesammten Heilkunde"). Korányi has embraced Christianity.

S. L. V.

ḲORBAN (lit. "an offering"): **1.** A sacrifice of any kind, whether bloody or bloodless; term used by Josephus in the sense also of a vow-offering, or of something devoted to God ("Ant." iv. 4, § 4; "Contra Ap." i. 22; Mark vii. 11). **2.** The sacred treasury in which the gifts for the Temple, or the alms-box in which the gifts for the poor, were kept (Josephus, "B. J." ii. 9, § 4; comp. Matt. xxvii. 6).

The term "ḳorban" was frequently used in vows. By saying, "Let my property be to you ḳorban"—that is, a gift consecrated to God—a man could prevent another from deriving any benefit from what he possessed (Ned. i. 4). This, of course, led to great abuses, as, in fact, all inconsiderate vows did, and, therefore, was much opposed by the sages (see Eccl. v. 1-5). Jesus (Mark vii. 11-13; comp. Matt. xv. 5-9) had such a vow in view when he said: "If a man say to his father or mother, That wherewith thou mightest have been profited by me is Ḳorban, ye no longer suffer him to do aught for his father or his mother, making void the word of God by your tradition" (Greek). But the charge of hypocrisy, or lip-service, raised against the Pharisees in this connection is entirely unfounded; for pharisaic tradition did actually provide a remedy against rash vows by empowering any sage consulted to dissolve the vow in case it could be shown that it was not made with a full consideration of all its consequences; this very power "to loosen that which is bound" by the Law being declared to be a privilege of the Rabbis, derived from the spirit of the Law while seemingly against the letter ("hetter nedarim"; Ḥag. i. 8).

It is expressly declared, however, by R. Eliezer that if a vow infringes upon the honor due to father or mother, the right procedure is to endeavor to convince him who made it that he failed to consider the consequences sufficiently, and then to dissolve the vow; others, however, dissented, holding that God's honor ought to be considered first (Ned. ix. 1). Against this, R. Meïr declares (Ned. ix. 4) that "wherever a vow is made which infringes the laws of humanity, the vow should be dissolved by the sage." Thus the Mishnaic code shows the instance quoted in the New Testament to be, instead of a reproach of pharisaism, as contended by Oort in "Theol. Tijdschrift," xxxviii., a vindication of the humane spirit prevailing among the Rabbis; possibly Jesus had only the rigorous class of teachers in mind, while his more humane views were those shared by others. See ALMS.

J. K.

KOREFF, SOLOMON: German Talmudist; born about 1700; died in Prague May 24, 1774. For more than forty years he presided over a large yeshibah at Prague. On the record of the appointment of Ezekiel Landau as chief rabbi of Prague (1754; see Kaufmann in "Ha-Eshkol," i. 177-184, Cracow, 1898) is found the signature of Solomon Koreff, although he, like many others, was said to be an opponent of the newly elected rabbi on account of the quarrel about Jonathan Eybeschütz.

When the empress Maria Theresa issued the decree banishing the Jews from Prague (Dec. 18, 1744), a deputation of influential Jews at once proceeded to the government authorities to protest. Koreff was the speaker of this deputation, and when, in his excitement, he became too loud, and was rebuked in consequence, he made the memorable answer, "Ten thousand souls cry from within me." It is said that he alone was allowed to remain. After the Jews had left Prague (March 31, 1745) on account of the impossibility of enduring the new conditions imposed upon them, negotiations with the government were maintained until they terminated (Aug., 1748) in the repeal of the act of banishment. Solomon Koreff's name is repeatedly found among the number of the "Schtadlanim" who signed the memorials submitted to the government between 1745 and 1748. After the Jews had been readmitted, Koreff was appointed by the government one of the four elders of the community.

KORIYYAT. See CORIAT.

KORN, SELIG (FRIEDRICH N. NORK): German writer and mythologist; born April 26, 1803, at Prague; died at Teplitz Oct. 16, 1850. Expelled from the gymnasium of his native town on account of a poem composed by him satirizing a teacher, he adopted a mercantile career, educating himself during his leisure hours. However, he soon became dissatisfied with his position, and in 1829 left for Leipsic. The following years he spent in Budapest, Vienna, Prague, Dresden, Leipsic, and Stuttgart, engaged in literary work. After the death of his parents he became a convert to Christianity.

Among Korn's many writings, mostly satirical, some of which he published under one or the other of the noms de plume "Friedrich N. Nork" or "Spiritus Asper" and "Spiritus Lenis," may be mentioned the following: "Zeriel's des Infernalischen Schauspieldirectors Reise auf die Oberwelt," Leipsic, 1830; "Belial und Astarte, oder die Liebe der Teufel," 1832; "Panorama von Ofen und Pest," *ib.* 1833; "Figaro's Memoiren," 1833; "Die Seleniten," 1834; "Humoristische Charactergemälde," 1835; "Mythen der Perser," 1836; "Brahminen und Rabbinen," 1836; "Vergleichende Mythologie," 1836; "Der Prophet Elias, ein Sonnen-Mythus," 1837; "Versuche der Hieroglyphik," 1837; "Das Leben Mosis," 1838; "Rabbinische Quellen und Parallelen zu Neutestamentlichen Schriften," 1839; "Biblische Mythologie," 1842-43; "Etymologisch-Symbolisches Realwörterbuch," 1843.

Neither his satirical works nor his mythological studies brought Korn any success; and his writings, with few exceptions, are now forgotten.

KÖRNER, MOSES B. ELIEZER: Russian Hebrew author of the eighteenth and nineteenth centuries; grandson of Yom-Ṭob Lipman Heller. He was for some time rabbi at Rendsburg; he lived next at Shklov; and from 1802 he lived at Grodno. Toward the end of his life he traveled for some years in Europe, with the purpose of securing aid in the publication of his works. He published: "Torat Mosheh," Biblical and Talmudic exegesis (Novidvor, 1786); "Zera' Ḳodesh," on Talmudic and rabbinical literature (Berlin, 1797); an edition of Elias Levita's "Tishbi," with notes (Grodno, 1805); "Ke-Or Nogah," strictures on the "Sefer ha-Berit" of Phinehas Elijah b. Meïr (Breslau, 1816); "Iggeret Rishpe Keshet," the story of his wanderings and hardships (Hanover, 1831); "Birkat Mosheh," a treatise on the benediction "She-Heheyanu" (Berlin, 1833); "Seder Hosha'not," according to the ritual of German and Polish Jews (ed. with preface, Hanover, 1834); an edition of the "Megillat Ebah" of Yom-Ṭob Lipman Heller, with a German translation by J. H. Miro (Breslau, 1836).

H. R. A. S. W.

KORNFELD, AARON: Austrian Talmudist; born Aug. 2, 1795, at Goltsch-Jenikau, Bohemia; died there Oct. 26, 1881. His only teacher was his father, Rabbi Mordecai Bär Kornfeld, head of a yeshibah, who taught him both the Talmud and the profane sciences. Kornfeld was only eighteen years old when he took over the direction of the yeshibah at his father's death. The fame of the school was so great that sometimes as many as eighty pupils were in attendance. When Sir Moses Montefiore was passing through Bohemia on his return from Damascus, he undertook the difficult journey to Goltsch-Jenikau purposely to become acquainted with the celebrated Talmudist.

In 1864, when Kornfeld suffered from an affection of the eyes and was not allowed to read until an operation had been performed, he composed from memory a compendium of 300 commandments which he skilfully clothed in the gemaṭriot of their Biblical verses. It appeared under the title "Ẓiyyunim le-Dibre ha-Ḳabbalah," Prague, 1865. Besides a short article, printed in "Shomer Ẓiyyon ha-Ne'eman," this is Kornfeld's only publication.

S. A. Ki.

KORNFELD, HERMANN (nom de plume, **SAMUELO**): German physician; born at Posen 1840; son of the Talmudist Samuel ben Naḥman Kornfeld and grandson of R. Akiba Eger. He received his education at Breslau, Berlin, and Vienna, taking his degree in 1863. Until 1871 he was physician at a hospital in Breslau; since 1901 he has been "Landgerichtsarzt."

Kornfeld is the author of: "Paralyse der Irren beim Weiblichen Geschlecht" (1877); "Sitz der Geistesstörungen" (1878); "Ueber Natürlichen und Abnormen Tod" (1879); "Handbuch der Gerichtlichen Medicin" (1884); "Die Entmündigung der Geisteskranken" (1901). The last-named work has an appendix showing that the circulation of the blood must have been known to the ancient Hebrews. In two articles, "Was Sollen Wir Essen?" and "Ueber die Bedeutung des Bluts" (published in "Sitzungsberichte für Gerichtliche Medizin," and in Virchow's "Archiv," 1875), he discussed, from a hygienic and humanitarian standpoint, the eventual effects of a general introduction of the Jewish method of slaughtering, and of the dietary laws.

S.

KORNIK (KURNIK), MEÏR BEN MOSES: German rabbi and calendar-maker; born at Glogau, where he was afterward rabbi; died at Hamburg Aug. 9, 1826. Kornik was the author of the following works: (1) "'Ezrat ha-Sofer" (Amsterdam, 1796), a manual for scribes on the writing of the scroll of Esther. (2) "Ḥadre Ḳodesh" (Dyhernfurth, 1817), a vocabulary to the first and the last mishnayot of the "Sefer Yeẓirah" and to the passages of the Zohar which are recited in the nights of Shabu'ot and Hosha'na Rabbah. (3) "Dabar be-'Itto" (vol. i., Breslau, 1817), elements of a Jewish calendar, but chiefly a refutation of Lazarus Bendavid's "Zur Berechnung und Gesch. des Jüdischen Kalenders" (see Bendavid, Lazarus). This work, in which Kornik mentions another work of his, "Me'ir 'Ene 'Ibrim," is furnished with some glosses by M. B. Friedenthal. (4) "System der Zeitrechnung in Chronologischen Tabellen" (Berlin, 1825), a concordance of the Julian, Gregorian, Jewish, and Mohammedan calendars. This work was the basis of Jahn's "Tafeln" (Leipsic, 1856), and is highly praised by Isidore Loeb ("Tables du Calendrier Juif," Paris, 1886). A series of corrections of Kornik's tables has been given by Max Simon in Berliner's "Magazin," xviii. 296.

S. M. Sel.

KOROBKA ("meat-tax"): That part of the Basket-Tax which is levied in Russia on kasher meat and poultry. The tax on salt, preserved provisions, flour, and grain, while in some instances included in the basket-tax, should not be confounded with the meat-tax proper. The meat-tax was originally devised by the Jews themselves in order to supply funds for various communal needs, such as the support of the poor, and the maintenance of hospitals and other charitable or educational institutions. At first under the direct control of the Ḳahal, it was later placed under the jurisdiction of the corresponding municipal government. With the abolition of the ḳahal organizations in 1844 its character was somewhat changed, and it was made obligatory instead of voluntary on the part of the Jewish communities.

The imposition of this tax and the consequent increase in the price of meat have been the cause of much dissension within the communities. The burdensome character of the tax has increased since the abolition of the ḳahal, the present system of farming out the kasher meat monopoly to individuals having led to a lax collection of the other portions of the basket-tax and the more rigid collection of the meat-tax proper. Kasher meat costs in many places from 2 to 3 cents per pound more than other meat; and the burden of taxation thus falls most heavily on the poor, resulting in their imperfect nourishment and stunted development.

KÖRÖSI, JOSEPH: Hungarian statistician; born April 20, 1844, at Pesth. He was educated privately, and then accepted a position with an insurance company, and also entered the field of journalism. In 1867 he became editor of the department of economics on the "Pesti Napló," subsequently joining the staff of the "Reform." His literary activity resulted in his appointment as director of the bureau of statistics at Budapest in 1870. He was elected member of the Royal Hungarian Academy in 1879; honorary M.D. of the University of Pennsylvania; and honorary member of the University of Klausenburg in 1896, in which year also King Francis Joseph I. elevated him to the Hungarian nobility with the prænomen "de Szántó."

Besides numerous papers in Hungarian, Körösi is the author of the following works: "Bulletin Annuel des Finances des Grandes Villes," 18 vols.; "Bulletin Hebdomadaire de Statistique Internationale," 24 vols.; "Projet d'un Recensement du Monde," Paris, 1881; "Armuth und Todesursachen," Vienna, 1886; "Kritik der Vaccinations-Statistik," Berlin, 1890; "Beiträge zur Frage des Impfschutzes," *ib.* 1891; "Demologische Beiträge," *ib.* 1892; "Plan einer Mortalitäts-Statistik für Grosstädte" (*ib.*); "Maass und Gesetze der Ehelichen Fruchtbarkeit," Vienna, 1894; "An Estimate of the Degree of Legitimate Natality," London, 1895; "Die Seculare Weltzählung vom Jahre 1900" (Berlin, 1897).

Körösi proposed an international movement for the uniformity of the census of 1900, and his plan was adopted by the Institut International de Statistique.

S. L. V.

KOS, COS, or **COOS** (Greek, Κῶς or Κῶος): An island belonging to the Sporades group in the Ægean Sea near the Carian coast; known also as Meropis and Nymphæa. Diodorus Siculus (xv. 76) and Strabo (xiv. 657) describe it as a well-fortified port. Its position gave it a high importance for the Ægean trade; while the island itself was rich in wines of considerable fame (Pliny, xxxv. 46).

At a comparatively early period Jews are mentioned among the population of Kos; and under Alexander the Great and the Egyptian Ptolemies (from 336 B.C.) the town developed into one of the great Jewish centers in the Ægean. Josephus ("Ant." xiv. 7, § 2) quotes Strabo to the effect that Mithridates sent to Kos to fetch the gold deposited there by Queen Cleopatra and "800 talents belonging to the Jews." Jews of Kos are mentioned at the time of Antiochus VII., Sidetes, Kos being one of the islands to which the rescript of the Roman consul Lucius was sent (139 B.C.; I Macc. xv. 23). It appears probable that in course of time the Jews became the chief bankers in the island, and that they took charge, at a certain rate of interest, of the large sums of money owned by the temples. In the sacrificial tablet of the Temple of Adrasteia and Nemesis, they are mentioned (lines 17, 18) as *πάντες ὑπὸ. τ[ων τρα]πεζειτῶν ἡ ἄλλως* (Herzog, "Critische Forschungen," p. 35). This inscription is of the first century B.C. Rayet ("Mémoire sur l'Ile de Kos," p. 80) thinks that the 800 talents ($960,000) deposited by Cleopatra were held by these Jewish *τραπεζέται*; but of this there is no evidence (Paton and Hicks, "Inscriptions of Cos," p. xxxviii.). In 49 B.C. the Koans are reminded by the consul Caius Fannius to obey the decree of the Roman Senate and to allow safe passage to Jewish pilgrims traveling to Jerusalem (Josephus, *l.c.* xiv. 10, § 15). Herod is said to have provided an annual stipend for the benefit of prize-winners in the athletic games (Josephus, "B. J." i. 21, § 11); and a statue was erected there to his son Herod the Tetrarch ("C. I. G." 2502). The epigrammatist Meleager, who was living at Kos about 95 B.C., complains of having been abandoned by his mistress for a Jew (Epigram No. 83, in "Anthologia Græca," v. 160). The modern name of Kos is Stauchio (Greek, Itaukos, Isola Longa).

E. G. H.—G.

——**In Medieval and Modern Times:** It is not known whether Jews continued to live at Kos from Roman times down to the conquest of the island by the Knights of Rhodes in 1315. Under the rule of the knights, however, Jews were banished (1502) from the island (Coronelli, "Isola di Rhodi," p. 180) and transported to Nice, in accordance with the decree promulgated by Pierre d'Aubusson, grand master of the Hospitalers of St. John. It is not definitely known whether the Jews returned from Nice to Kos a year after their banishment, *i.e.*, during or after the conquest of the island by the Turks. But, according to a document, now at Rhodes, containing some notes on the administration of the community of Rhodes, the community of Kos was in 1685 dependent on that of Rhodes, paying to the latter a tax collected from eighteen persons whose names are mentioned in the document. The amount of the tax, which was paid up to 1870, indicates probably that the community was not very large and had no chief rabbi, but was under the direct control of the chief rabbi of Rhodes.

Synagogue and Cemeteries.

In 1747 a certain Eliezer Tarica built at his own expense a handsome little synagogue; the date of building and the name of the builder are commemorated in a gilt Hebrew inscription in relief, placed above the door of the tabernacle. Subsequently two shops and a house were bequeathed for the support of this synagogue; and the income from these covers the expenses even to-day.

There are two Jewish cemeteries at Kos. One very old one, situated on the seashore at Cape Sable, is no longer used. The other, more in the interior of the island, contains over one hundred tombs, the earliest dating from 1715. Following are the names of the chief families which the present writer copied from the gravestones in 1901: Romano, Capelluto, Angel, Tarica, Gabaï, Couriel, Benveniste, Coenca, Alhadef, Mir, Pisante, Habib, Abzaradel, Franco, Finz, Ergas; the most prominent among these families being those of Tarica, Alhadef, and Franco. The last-named was engaged especially in exporting raisins, the chief product of the island, and had connections at the principal centers of commerce of

Europe. Later on Jews from Salonica came every year to the markets of Kos to buy the products of the island.

Blood Accusation.

In 1850 the Jews of Kos were accused of ritual murder under the following circumstances: Some Greeks, having found the dead body of an old man named Tiringongo, a habitual drunkard, accused the Jews of having killed him, and, aided by the governor of the island, Amin Bey, entered and searched the synagogue one Friday evening. Not finding anything, they came back the following day, searched the garden of the temple, and maltreated the Jews. Fortunately for the latter, the colonel in charge of the soldiers on the island, Ramiz Bey, took their part, pointing out to the governor the responsibilities he would incur should he lend support to the Greeks. Thereupon the Greeks and Jews were sent to Rhodes, where the former were punished, and the latter acquitted in conformity with the firman which Sultan 'Abd al-Majid had granted to the Jews subsequent to the calumnies of Damascus and Rhodes (1840–41). Three years later the slayer of the drunkard Tiringongo was discovered. He was a Mohammedan, named Haji Ṣaliḥ, who, seeing Tiringongo stealing in his field, had shot and killed him. His body was thrown into the street by a negro, who subsequently made this revelation.

Mutilation of a Jewish Corpse.

In 1851 the body of a Jew who had died at Kos was found the day after burial absolutely naked with the hands mutilated. Investigations being made by the governor of the island, Muṣṭafa-Sharif Pasha, the act was traced to some Greek shepherds, who confessed that they had cut some fingers from the hands of the Jew for the purpose of placing them among their flocks, in order to increase the number of the beasts, according to a belief common among them that the hand of the Jew brought fruitfulness and increase of wealth.

The Jewish population of Kos consisted in 1850 of 40 families, in 1872 of 25 families, and in 1901 of only 10 families, half of whom were strangers. The Jews are engaged in retail business, and live in perfect harmony with the other inhabitants. They have in the synagogue three sacred rolls, and they support a shoḥeṭ, who is at the same time schoolmaster and officiating rabbi at the temple. The Kos Jews speak Turkish and Greek in addition to the Judæo-Spanish dialect.

G. A. Ga.

KOSCH, RAPHAEL: German physician and deputy; born at Lissa, Posen, Oct. 5, 1803; died at Berlin March 27, 1872. Educated at the University of Königsberg (M.D. 1826), he became assistant at the surgical-ophthalmological clinic there and commenced to practise in 1832.

Kosch soon became interested in the political life of Prussia. In 1848 he was sent as representative from Königsberg to the Prussian National-Versammlung, where he was elected a vice-president. From 1850 to 1860 he took no active part in politics, but again became interested therein in 1861, when he was elected from Königsberg to the Prussian Lower House, of which he remained a member until his death. He belonged to the party of the Left ("Fortschrittspartei"). It was partly through his energy that the oath "More Judaico" was repealed in 1869.

Kosch, who was unmarried, bequeathed his fortune to an orphan asylum of Königsberg.

KOSTEL (PODIVIN): Town in Moravia. Its Jewish community is said to be the oldest in Moravia. According to Cosmas of Prague (d. 1125), a Jew named Podiva founded (1067) the castle which was named after him "Podivin"; this is still the Slavic name of the town (Pertz, "Monumenta Germaniæ Scriptores," ix. 80; D'Elvert, "Zur Gesch. der Juden in Mähren und Oesterreich-Schlesien," pp. 49, 52, Brünn, 1895; comp. Grätz, "Gesch." vi. 61). This community may therefore be regarded in a certain sense as the mother of the Moravian communities. Local documents relating to it do not, however, reach back further than 200 years. According to popular tradition, the synagogue was built about 150 years ago. The earliest tombstones are dated 1690.

Kostel is one of the congregations of Moravia which possess the rights of a township. With its branch at Eisgrub—the summer residence of the sovereign Prince of Lichtenstein—it numbers about 500 persons (1903). Its institutions include a parochial school, a ritual bath, a ḥebra ḳaddisha, and a women's society. The officiating rabbis have been: Aron Unger, last decade of the eighteenth century; Markus Blatt, end of the eighteenth century to 1839; Samson Kulke, 1840-94, son-in-law of the late Rabbi Nehemiah Trebitsch of Nikolsburg; S. Mandl, 1895-99; present incumbent, Abraham Weiss, since 1899. The well-known ghetto poet Eduard Kulke, who portrayed in his stories types from his native community of Kostel, was a son of the above-mentioned Samson Kulke.

K. M. Sel.

KOVEL: District town in the government of Volhynia, Russia. In the beginning of the fourteenth century it was given by Gedemin to his grandson, Theodor Sangushko, and in 1518 the Magdeburg Rights were granted to it by Sigismund I. About the beginning of the sixteenth century the Jews and Christians of Kovel were freed from military duties in return for a specified contribution for various government needs. In 1540 the Jews of Kovel together with those of other Lithuanian towns protested to King Sigismund against an accusation made by a baptized Jew that they were preparing to remove with all their possessions to Turkey, and that meanwhile they were killing or circumcising Christian children. The court appointed by the king established the innocence of the Lithuanian Jews.

In response to a petition of the Kovel Jews, Queen Bona ordered in 1547 that the Jewish house-owners be relieved from the payment of the annual taxes, and that, instead, they pay on each house a yearly tax of one gold ducat. People living in rented houses were to pay one-half gold ducat per year; but the house occupied by the rabbi was to be exempt. As to other duties, the Jews were to share them with the remaining inhabitants of the town; and they were also to share their privileges. This document was presented for entry in the city records by the Jewish citizen Hirsh Itzkovich. Some years later (1556) Queen Bona decreed, in response to the petition of a number of the burghers of Kovel, that Jews be forbidden to reside in the market-place, and that it should be the duty of the magistrate of Kovel to see that Jews owning houses in the market-place should remove to the Jewish streets, in accordance with a tradition which precluded them from being numbered at the census among the Christians. On the other hand, the queen ordered that Christians living in the Jewish streets should remove thence and, in accordance with the custom of other towns in the district, should own no houses there. This document was successively confirmed by Sigismund August and Sigismund III.

Under Kurbski.

About 1565 the town was presented by King Sigismund August to the Russian prince Andrei Mikhailovich Kurbski, who had been induced to betray his country and to enter the service of the Polish king. Escaping with his followers from Yuryev (Dorpat) to Lithuania, Kurbski established himself within sixteen miles of Kovel, which he ruled through trusted agents, and often compelled the Jews to advance him large sums of money. On July 14, 1569, his agent at Kovel, Ivan Kelemet, attacked the Jews at the instigation of a baptized Jew named Lavrin, and, in defiance of their ancient rights and privileges, placed Yuska Shmoilovich, Avram Yakovovich, and Bogdana, the wife of Agron, in a dungeon in which was much water, and closed and sealed all the houses, stores, and taverns of the Jews with all their merchandise, personal property, and provisions. Some Jews of Vladimir having protested against this action, Kelemet stated that he was merely carrying out the wishes of Prince Kurbski, who was free to punish the Jews of Kovel, who were his subjects, as he pleased. He also admitted that he had placed the two Jews and the Jewess in the dungeon and had immersed them up to their necks because they, having become security for Agron Natanovich, had failed to produce him at the appointed time. The matter was carried by the Jews to the king at the Diet of Lublin, and he ordered the release of the imprisoned Jews. Kelemet, however, refused to recognize the royal decree, claiming that he was subject only to his master, Prince Kurbski; and he ordered all the Jews of Kovel to leave the town on the following day. After an imprisonment of five weeks (doubtless not in the dungeon) the prisoners were liberated by order of Kurbski, who was finally compelled to obey the royal decree. He gave directions also for the removal of the seals from the synagogue, houses, and stores belonging to the Jews; but at the same time he warned them that he would obtain satisfaction from them at a future time. Notwithstanding these threats, however, the prince continued to deal with the Jews and to borrow money from them, as is shown by his will dated June 5, 1581, wherein he admits that he owes Mordecai Shichich of Kovel 100 gold ducats. This debt and sums owing by Kurbski to other Jews remained unpaid in 1585; and the creditors were obliged to bring suit against the estate.

Petitions Against Jews.

In 1616 the burghers of Kovel complained to the king that the Jews bought up taverns and houses without having the right to do so, thus crowding out the Christians, some of whom had been reduced to beggary by the unjust exactions of the Jews; that the latter farmed the taxes imposed by the Diet, as well as private taxes; that by exacting enormous profits the Jews were ruining the town, in consequence of which people were removing from it; and, finally, that the Jews took no interest in providing for the repair of the walls and in guarding the town. The king appointed a commission to investigate the complaint, and to render a decision, each side to have the right to appeal to the king within six months thereafter.

The resentment of the Christian merchants against their more successful Jewish competitors was intensified during the following thirty years, and found emphatic expression in the turbulent times of Chmielnicki. In 1648 the magistrate of Kovel reported to the authorities at Vladimir that the local burghers had helped the Cossacks to drown both the Jews and the Catholics who had remained in the town, being unable to get away on account of their extreme poverty.

In 1670 King Michael issued at Warsaw a grant of privileges, containing among other items a recapitulation of a document issued by Sigismund III. in March, 1609, in which the Jews of Kovel were ordered to share with the Christian burghers the cost of repairing the town walls and the performance of sentry duty. There is also recapitulated a document issued by Ladislaus IV. March 23, 1635, confirming the decree issued by Queen Bona in which the Jews were ordered to live and to build their houses in a separate street; also a document of Sigismund III. providing that the taxes should be paid direct to the collector and not to the Jews, who usually farmed them from the collector, thereby ruining the town and injuring the burghers. In 1661 there were only twenty Jewish house-owners in Kovel.

Of the history of the Kovel community from the seventeenth to the nineteenth century, no information of importance is forthcoming.

In 1898 the Jewish community numbered 6,046 souls in a total population of 17,304. It had a Talmud Torah, a synagogue, and a number of charitable institutions. Among the more prominent Jews were: Aaron Solomon Feuerman (d. 1897); H. Geller, the Hebrew journalist; Rabbi Yehudah Idl; Dr. Perelman; and Rabbi Löb Gershonov Diament.

KÖVES, JOSEPH: Hungarian painter; born at Nagy Karoly 1853. When only fourteen he left home, and, earning his living as he went, arrived two months later at Budapest, where he became a merchant. When twenty-two years of age he entered a drawing-school, graduating as a teacher of drawing in 1879. In the following year he went to Paris, where he became a pupil of Fleury, Laurens, Le Roux, and others. In 1882 he returned to Budapest, where he has since resided. Many of his paintings deal with Jewish subjects; among these may be mentioned: "Homeless"; "The Jews in the Triumphal Procession of Titus"; "Moses Mendelssohn and Frederick the Great"; "Spinoza and His Judges"; "King Mathias and His Wife Welcomed by the Jews of Ofen"; "The Disputation at Tortosa"; etc. He was commissioned by the government to make a painting of the national hero Johann Hunyadi.

S. F. T. H.

KOVNER, SAVELI GRIGORYEVICH: Russian physician; born at Wilna 1837; died at Kiev Sept. 22, 1896; graduated from the University of St. Vladimir, Kiev, in 1865. He remained at the same university as a stipendiary to prepare for a professorship, but in 1867 was appointed city physician at Yalutorovsk, government of Tobolsk, and shortly afterward transferred as county physician to Nezhin. In 1873 he was appointed chief physician of the Nezhin Hospital and physician of the Lyceum of Prince Bezborodko. In 1879 he gave up his position in order to devote himself entirely to science. Kovner settled permanently at Kiev in 1890.

In 1865 he published "Spinoza and His Philosophy." Knowing the classical languages as well as Hebrew and Arabic, he made a special study of the history of medicine, the results of which are contained in "Drevnyaya i Srednevyekovaya Meditzina" (3 vols., Kiev, 1879). In the first volume of this work there is a chapter on the practise of medicine among the Jews, which constitutes a valuable addition to the history of Jewish civilization. Of his contributions to various Hebrew periodicals the most valuable is "Ha-Rambam be-Tor Rofe," in "Ha-Meliẓ," 1895.

KOVNO or **KOVNA:** Russian fortified city in the government of the same name; situated at the junction of the Viliya and the Niemen.

There is documentary evidence that Jews lived and traded in Kovno toward the end of the fifteenth century. At the time of the expulsion of the Jews from Lithuania by Alexander Jagellon (1495) the post of assessor of Kovno was held by Abraham Jesofovich. By an edict dated Oct. 25, 1528, King Sigismund awarded to Andrei Procopovich and the Jew Ogron Nahimovich the farming of the taxes on wax and salt in the district of Kovno ("Metrika Litovskaya Sudebnykh Dyel," No. 4, fol. 20b). In the Diet of 1547 a proposition was submitted to the King of Poland to establish at Kovno, Brest-Litovsk, Drissa, and Salaty governmental timber depots, in order to facilitate the export of timber, and to levy on the latter a tax for the benefit of the government. This measure found favor owing to the claim that the Jewish and Christian merchants of Kovno and of other towns derived large profits from the business, while they at the same time defrauded the owners of the timber and encouraged the destruction of the forests. The proposition was adopted by the Diet and sanctioned by the king ("Kniga Posolskaya Metriki Litovskoi," i. 36).

In the Sixteenth Century.

In 1558 a Jew of Brest-Litovsk, David Shmerlevich, and his partners obtained a monopoly of the customs duties of the city of Kovno on wax and salt for three years, for an annual payment of 4,000 kop groschen ("Aktovyya Knigi Metriki Litovskoi, Zapisi," No. 37, fol. 161). David of Kovno, a Jewish apothecary, is mentioned in a lawsuit (Oct. 20, 1559) with Moses Yakimovich, a Jew of Lyakhovich ("Aktovyya Knigi Metriki Litovskoi Sudnykh Dyel," No. 39, fol. 24b). By an agreement of about the same date between Kusko Nakhimovich, a Kovno Jew, and Ambrosius Bilduke, a citizen of Wilna, it would seem that the latter had beaten and wounded the Kovno rabbi Todros, and that

Kusko, in consideration of 2 kop groschen, had settled the case and was to have no further claim against Bilduke (*l.c.* No. 41, fol. 120).

From a decree issued by King Stephen Bathori Feb. 8, 1578, it is evident that Jews were living in Kovno at that time ("Akty Zapadnoi Rossii," iii. 221). Another document (June 19, 1579), presented to Stephen Bathori by the burghers of Troki, both Catholic and Greek-Catholic, and by the Jews and Tatars, contains their petition concerning the Christian merchants of Kovno, who had prohibited the complainants from entering the city with their merchandise, and from trading there; this in spite of the fact that the burghers of Troki had from time immemorial enjoyed the privilege of trading in Kovno on an equality with the other merchants, both Christian and Jewish, of the grand duchy of Lithuania. In reply, the king ordered the Kovno merchants not to interfere for the time being with the Jewish and other merchants of Troki, and promised an examination of the complaint at the end of the war then in progress ("Akty Gorodov Wilna, Kovno, i Troki," ii. 175).

On March 28, 1589, Aaron Sholomovich, leader of the Jewish community at Troki, in his own name, and in behalf of his Jewish brethren of Troki, complains to King Sigismund of the merchants of Kovno, who have forbidden the Jews of Troki to trade in Kovno, and have confiscated their wares in defiance of privileges granted by the Polish kings and by the Grand Duke of Lithuania. In response to this complaint the king orders the magistrate of Kovno, Prince Albrecht Radziwill, to protect the Jews of Troki from molestation by the native merchants (*ib.* ii. 180).

A document issued twelve years later (Aug. 14, 1601) shows that the Jews of Grodno and of other Lithuanian towns were deprived of the old privilege of shipping to Kovno grain, salt, and herring, retaining only the right to trade at retail and to keep inns ("Akty Wilenskoi Arkhivnoi Kommissii," vii. 103, 125; "Akty Yuzhnoi i Zapadnoi Rossii," ii. 13).

In the Eighteenth Century.

At the beginning of the eighteenth century the Jews of Kovno made an agreement with the Christian merchants of that city whereby the former in return for the privileges of residence and trading in Kovno assumed the obligation to pay a fifteenth part of all the taxes and of the city expenditures. In time, however, the documents relating to this compact were lost, and the merchants began to oppress the Kovno Jews and to withdraw from them their privileges. The matter was brought before the Supreme Court of Poland at Warsaw, and by a decision of Sept. 14, 1753, the Jews were given the right to reside only in the district of Starochinska. They were allowed also to trade at the fairs. A few years later Proser was appointed mayor of Kovno, and he began to persecute the Jews not only in the city, but throughout his jurisdiction. In 1761 he instigated a riot during which the Jewish houses of the district were burned. When Christian neighbors attempted to stop the excesses of the mob, they were prevented by the officials. After the rebuilding of the Jewish dwellings Proser drove the Jews out of the city. The case was carried to the Supreme Court, which ordered (Jan. 20, 1766) an investigation of the wrongs inflicted upon the Jews, and compensation for the losses sustained by them; these latter to be determined by the findings of a commission appointed for that purpose.

The mayor and his followers, fearing the result of the investigation, attempted to discredit it, and to place obstacles in the way of the commission. As the oppression of the Jews was not discontinued, the leaders of the Jewish community of Slobodka, a suburb of Kovno, brought the matter before the Supreme Court. In 1781 Prince Carl Stanislaus Radziwil, the owner of Slobodka, intervened, and showed that great injustice had been and was being done to the Jews. In 1782 the court ordered the city of Kovno to pay to the Jews damages amounting to 15,000 florins besides the costs of the case. The mayor of Kovno and his associates were sentenced to two weeks' imprisonment (A. Tabilovski, in "Keneset Yisrael," i. 57, Warsaw, 1886).

The Kovno Megillah.

There is in the possession of the heirs of Rabbi Isaac Zeeb Soloveichik of Kovno a megillah, bearing the Hebrew date 1 Adar II., 5543, and written in commemoration of the granting of the right of residence to the Jews of Kovno by King Stanislaus Augustus Poniatowski (1783). Therein it is stated that Jews had lived in Kovno since ancient times, and that when they were driven out of the city in 1753, they had found an asylum in the suburb of Kovno, then a part of the king's private estate. When they were again expelled, in 1761, all their houses and the synagogue had been plundered and destroyed by the mob. The megillah lauds the king's generosity, and praises those members of the community who had taken an active part in defending the rights of their brethren. These were Rabbi Moses of Kovno and Slobodka and his brother Abraham, the sons of Rabbi Isaac Soloveichik. They also built the large synagogue in Slobodka, which was then known as Williampol. The author of the megillah, as appears from an acrostic contained in it, was Samuel ha-Ḳaṭan of Wilna, a resident of Kovno. The style shows that he was a learned man and a fluent Hebrew writer. Fuenn thinks that he was the Samuel ha-Ḳaṭan who had an only son Joseph, as is mentioned on a tombstone over the grave of Zipporah, Joseph's daughter, in the Kovno cemetery (Fuenn, "Ḳiryah Ne'emanah," p. 196, Wilna, 1860). A manuscript Hebrew prayer-book entitled "Kol Bo," preserved in the synagogue of Brest-Litovsk, was written by Samuel ha-Ḳaṭan, undoubtedly the writer of the megillah.

In 1887 the Jewish community of Kovno (including Slobodka) numbered about 36,000 persons. In 1902 it had increased to 37,196, or about one-half of the total population. It had twenty-five synagogues and prayer-houses, and many yeshibot supported by wealthy men, one of them by Lachman of Berlin. The leader of the students in the yeshibot was Isaac Blaser, formerly of St. Petersburg. In 1876 the society Maḥziḳe 'Eẓ-Ḥayyim was founded by Süsman Novikhovich and Hirsh Rabinovich, rabbi of Mitau, for the study of the Talmud, rabbinical literature, and the Hebrew language. The Talmud

Torah has from 300 to 400 pupils, and a teaching staff of 6 "melammedim" and 6 teachers of Hebrew, Russian, and arithmetic. The annual expenditure of the Talmud Torah amounts to about 1,600 rubles, and is provided for out of the meat-tax and by private contributions, in addition to 15 per cent of the income from the cemetery. There is another Talmud Torah, situated in the more modern portion of the city, known as "Neuer Plan," and connected with the synagogue Naḥalat Yisrael. It has 50 pupils and 2 teachers. The non-Jewish middle-class schools in the city of Kovno showed in 1887 the following proportion of Jewish pupils: classical gymnasium for boys 104 Jews in a total of 369; classical gymnasium for girls 115 Jewish girls in a total of 310 ("Voskhod," 1888, iv. 4).

The hospital was reorganized in 1813 by Benjamin Ze'eb ben Jehiel, father of Rabbi Ẓebi Naviyazer, and Eliezer Lieberman. They began a new pinḳes in place of the one lost at the time of Napoleon's invasion (1812), when the inhabitants fled, and the city archives, including the pinḳes, disappeared in the ensuing disorder.

Philanthropic and Charitable Institutions.

In 1854 Hirsh Naviyazer made great efforts in behalf of the hospital and succeeded in collecting enough funds to erect a stone building for the institution. In 1875 Tanḥuma Levinson and Ze'eb Frumkin reorganized the hospital on a modern basis. The annual income and expenditure are each about 15,000 rubles. There are accommodations for more than 600 patients; and 4,000 patients are treated annually in the dispensary.

Among the other philanthropic and charitable organizations of Kovno may be mentioned the societies known as "Somak Nofelim" and "Gemilut Ḥesed," the former founded in 1862 by Ẓebi Shafir, and Isaac Zeeb, father of Joseph Dob, rabbi of Brest-Litovsk (Fuenn, "Keneset Yisrael," ii. 163). The ḥebra ḳaddisha was founded in 1862. Of the leaders of the community (in the 19th cent.) may be mentioned Israel Bacharach, Abraham Dembo, Naḥman Reichseligman, Fishel Kahn, Ezekiel Jaffe, Solomon Osinsky, and Lieberman Shakhovski, grandson of Eliezer Shakhovski. Rabbi Israel Lipkin, known widely as Rabbi Israel Salanter, was prominent in the life of the Kovno community during the latter half of the nineteenth century. He successfully conducted for many years the local yeshibah. His son, Lipman Lipkin, Abraham Mapu, and the latter's brother were all born in Kovno.

Jewish Artisans.

A statistical study of the Jewish artisans in 1887 shows that in the city and district of Kovno there were 5,479 masters, 1,143 assistants, and 766 apprentices, distributed among the different trades. The greatest numbers of masters were to be found in the following trades: tailors and seamstresses, 445; shoemakers and workers in allied trades, 380; cigar- and cigarette-makers, 366; butchers and fishermen, 330; bakers, 445; gardeners and truckers, 338; drivers and coachmen, 509; common laborers, 595. Jewish artisans were also well represented among bookbinders, carpenters, blacksmiths, machinists, masons, brick-makers, brewers, wine-makers, barbers, and millers ("Voskhod," 1889, i.-vi.). H. R.

KOWNER, ABRAHAM URI: Russian Hebrew critic; born at Wilna about 1837. He became renowned on account of a campaign which he conducted against many of the Hebrew Maskilim and which called forth violent polemics between himself and the latter. He first published his articles in "Ha-Karmel" and "Ha-Meliẓ"; then he wrote against the editors of those papers. Kowner was afterward involved in a bank defalcation, on account of which he was banished to Tomsk, Siberia, where he embraced Christianity and became a government official.

He published his criticisms and other essays in two small volumes: "Ḥeḳer Dabar," Warsaw, 1865; and "Ẓeror Peraḥim," Odessa, 1868. The first work contains, after criticisms on Mitzkun's "Kinnor Dawid" and Lerner's "Moreh ha-Lashon," an essay on the place of the Hebrew language in modern education. He wrote this essay in answer to the questions of the government published in the "Kievlyanin" concerning the education of the Jews. Among other questions were the following: "In what way can culture be spread among the Jews?" "Should the books be written in Hebrew or in Judæo-German?" Kowner declared that the Hebrew language must be adapted to modern requirements; otherwise it were better to write in Judæo-German. The main thing was that the Jews must be instructed; therefore, there was no need of Hebrew books filled with poetical and antiquated expressions. He praises highly Lewinsohn, Slonimski, Mapu, and Erter, whose Hebrew works brought much good to the Jews, as well as the Judæo-German writers. But he castigates all the others; proving that not only is there no utility in their works, but that they corrupt the Hebrew language.

The second work is an answer to the attacks of his contemporaries, which, it must be admitted in justice to Kowner, while pretending to refute his criticism, consist only of insults. Zederbaum is most of all criticized in this work as the editor of "Ha-Meliẓ," while in the first work he is praised for his editing of a Judæo-German newspaper entitled "Ḳol Mebasser." Kowner contributed also to "Yevreiskaya Biblioteka" and other Russian periodicals.

KOZZI, MOSES. See Moses of Coucy.

KRACZWSKI, JOS. IGNATZ. See Poland.

KRÄMER, MOSES BEN DAVID: Lithuanian Talmudist of the seventeenth century; died at Wilna Oct. 19, 1683. After officiating as rabbi in a number of Lithuanian cities, he in 1623 went in the same capacity to Wilna. His contemporaries, who refer to him frequently, mention him as an important Talmudist. He left no works except a few glosses, which are contained (1) in "Rosh Yosef" by his son-in-law, Joseph ben Jacob, (2) in "Zera' Yisrael" by his grandson Jacob ben Joseph, and (3) in "Pi Shenayim." Krämer is still the subject of many local tales in Wilna, where marvels are related of his piety and scholarship. Among his descendants was Elijah of Wilna.

KRAMSZTYK, ISAAC: Polish writer and preacher; born at Warsaw 1814; died there 1889. He graduated from the rabbinical school of Warsaw, in which he became a teacher, filling that position up to the closing of the institution in 1862. He at the same time was preacher in the synagogue of Warsaw. At first he preached in German; but out of patriotism he in 1852 delivered the first sermon in Polish, which aroused the ire of certain fanatics. Kramsztyk officiated as preacher without any remuneration up to 1863, with an intermission of a few months in 1861–62 spent at Bobruisk. From 1863 to 1868 he lived in Saratov.

Kramsztyk's works in Polish were: "Mowa Miana," etc., a sermon at the consecration of the synagogue (1852); "Przeklad Przyslow Salomona" (1867), a translation of Proverbs, with a commentary; "Prawda Wieczna," etc. (1871), on the eternal truth, or the foundation of the Mosaic religion (1871); and "Kazania," a collection of his sermons, with biographical notes (published posthumously, Cracow, 1892).

Bibliography: Orgelbrand, *Encyklopedja Powszechna*, Warsaw, 1900.

H. R. M. R.

KRAMSZTYK, STANISLAUS: Polish naturalist; born at Warsaw 1841; son of Isaac Kramsztyk; educated at the Warsaw gymnasium, and studied medicine in the Medico-Surgical Academy, and physics and mathematics in the University, whence he was graduated in 1866 as master of natural sciences. Unable, on account of his religion, to obtain an appointment as teacher in the gymnasium, Kramsztyk took a position in the Polish Bank at Warsaw, where he was employed until the closing of the same in 1886. Simultaneously he was a teacher in the Commercial College and in various private schools.

Kramsztyk's literary activity began in 1862, when he became a collaborator on the Polish periodical "Przyjaciel Dzieci." Since 1868 he has also contributed largely to the "Wszechswiat," "Ateneum," "Biblioteka Warszawska," "Przeglad Pedagogiczny," and other periodicals.

His most important works are: "Fizyka," Warsaw, 1876; "Wyklad Arytmetiki Handlowy" (Manual on Commercial Arithmetic), 1879; "Wiadomosci Poczatkawe z Fizyki," on the rudiments of physics, *ib.* 1883 (2d ed. 1886; Russian transl. 1896); "Fizyka bez Przyrzadow," 2 vols., 1891–93; "Szkice Przyradnicze z Dziedziny Fizyki Geofizyki i Astronomji," 1893; "Ziemia i Niebo," 1898; "Komety i Gwiazdy Spadajace," 1899; "Bibljoteczka Nauk Przyrodniczych" (Little Library of Natural Sciences), 3 vols. He also translated: Mohn's "The Bases of Meteorology," 1883; Ball's "Experimental Mechanics," 1894; Mack's "Popular Scientific Lectures," 1899; Helmholtz's "On the Relation of Natural Sciences to Other Branches of Knowledge."

Kramsztyk edited the department of natural sciences of the "Encyklopedja Powszechna," and is the editor of the department in the latest edition of that work. On the Great Illustrated Polish Encyclopedia he has charge of the department of physics and astronomy.

H. R. M. R.

KRANZ, JACOB. See Jacob ben Wolf Kranz of Dubno.

KRASNOPOLSKI, HORACE: Austrian jurist; born Nov. 5, 1842, at Pistyn, Galicia, where he received his earliest education in the ḥeder. From 1853 to 1861 he attended the gymnasium at Czernowitz, in the latter year entering the University of Prague, where he studied law and graduated in 1868. In 1871 he attended the lectures of Thöl, Roscher, and Wächter at the universities of Göttingen and Leipsic, and in 1872 became privat-docent of commercial and Austrian civil law at the University of Prague, his inaugural dissertation being: "Einleitung in die Lehre von der Zession der Forderungsrechte"; in 1876 he was appointed assistant professor, in 1881 professor, of Austrian civil law. He was thrice dean ("dekan") of the juridical faculty—in 1883, 1891, and 1896.

Krasnopolski wrote: "Die Haftung Aussergenossenschaftlicher Verbindlichkeiten"; "Ueber die Prioritätsabtretung"; "Die Gewerbenovelle vom 8. März, 1885"; "Studien über das Anfechtungsrecht der Gläubiger nach Oesterreichischem Recht"; "Das Anfechtungsrecht der Gläubiger nach Oesterreichischem Recht Systematisch Dargestellt"; "Zur Lehre von den Verträgen zu Gunsten Dritter"; "Zur Auslegung des § 63 des Allgemeinen Bürgerlichen Gesetzbuches"; "Das Ehehindernis der Höheren Weihen"; "Die Haftpflicht der Eisenbahnen nach Oesterreichischem Recht" (in the "Staats-Wörterbuch"); "Lehrbuch des Oesterreichischen Privatrechtes" (1904).

S. A. Ki.

KRAUS, ADOLF: American lawyer; born at Blowitz, Bohemia, Feb. 26, 1850; emigrated to the United States at the age of fifteen, and worked successively on a farm, in a factory, and in a store. In 1871 he went to Chicago, Ill., and while engaged in mercantile pursuits studied law and was admitted to the bar (1877).

Kraus attained to prominence in his profession; and, notwithstanding the claims of an extensive practise, he has always found time to take an active part in local public affairs. He has been a member of the board of education (1881–87), serving two years as its president; he was appointed corporation counsel in 1893; and was the second president of the civil service commission (1897). For a time he was editor and proprietor of the "Chicago Times."

Kraus is likewise interested in Jewish communal affairs, being a grand officer of the I. O. B. B., president of Isaiah Temple, Chicago, and a member of the executive board of the Union of American Hebrew Congregations.

A. J. Sto.

KRAUS, ALFRED, BARON VON: Austrian general; born 1822 at Pardubitz, Bohemia; the son of a Jewish tenant-farmer. He received his early education, which was strictly Orthodox, from his cousin Joseph Kisch, father of Heinrich and Alexander Kisch. At the age of thirteen he went to Prague, where he attended the gymnasium and subsequently studied law at the university. After taking his degree and accepting baptism, he entered the army, where he received appointments befitting his legal attainments. At Mantua in 1849 he conducted the trial of Orsini, who had been arrested there; and at Parma he conducted the trial of the murderer of its duke. He then entered the adjutant corps as captain, and was appointed, with the rank of major, aide-de-camp to General Degenfeld, the minister of war. For a number of years he was connected with the imperial military court, acting as deputy president from 1869 to 1880.

In April, 1881, Kraus was appointed president of the Military Supreme Court, and was decorated with the Order of the Iron Crown of the second class. In July of the same year he became governor-general of Bohemia, receiving other decorations and the title of privy councilor. He retired in 1896 and has since lived in Vienna.

S. A. Ki.

KRAUS, FRIEDRICH: Austrian physician; born at Bodenbach, Bohemia, May 31, 1851. He studied at the gymnasium at Prague and at the universities of that city and of Vienna, obtaining his M.D. degree in 1882. From that time until March, 1885, he was assistant in the Physiological-Chemical Institute of Prague, and in November of that year he took a similar position at the Pathological-Anatomical Institute in the same city. In 1888 he was appointed privat-docent in internal pathology at the University of Prague, a position which he held until 1890, when he became assistant to Kohler at the clinic of the Allgemeines Krankenhaus, Vienna. Kraus was made assistant professor in the University of Vienna in 1893, and a year later professor of medical pathology and therapeutics of the indoor clinic at Graz.

Kraus, who has made a specialty of the study of alkalis and the oxidation of sugar in the blood, is the author of: "Ueber Ermüdung als Mass der Constitution und über Säure Autointoxication"; "Krankheiten der Mundhöhle und Speiseröhre"; and "Krankheiten der Sogenannten Blutdrüsen." He is the author also of a number of articles on similar subjects in specialist magazines.

S. E. Ms.

KRAUS, LEOPOLD GOTTLIEB: Austrian physician; born at Kolin, Bohemia, Dec. 22, 1824; died in 1901. He studied at the University of Prague, making a specialty of neurology, and obtained his degree in 1847. Kraus then became a practising physician in Leipnik and Vienna. He was the author of: "Vollständiges Therapeutisches Taschenbuch" (1863); "Compendium der Speciellen Pathologie und Therapie Unserer Haussäugetiere" (1867); "Encyklopädisches Wörterbuch der Staatsarzneikunde" (1872–78); "Compendium der Speziellen Pathologie und Therapie" (1874); "Die Behandlung der Syphilis" (1875); "Die Hygiene" (1878). His brother **Bernard Kraus** was one of the first contributors to the "Allgemeine Wiener Medicinische Zeitung" (1856–1879) and to the "Zeitschrift für Gerichtliche Medicin und Oeffentliche Gesundheitspflege" (1865–68).

Bibliography: *Das Geistige Wien*, ii. 280-281.

S. E. Ms.

KRAUSHAR, ALEXANDER: Polish jurist and author; born 1843 at Warsaw; educated at the Royal Gymnasium in that city and at the preparatory college instituted by the marquis Wielopolski, where he devoted himself to the study of jurisprudence and graduated master of law and administration in 1866. He practised law till 1872, and was appointed to the high position of government advocate in the senatorial department of Warsaw (1873).

Kraushar's first literary products appeared in the "Jutrzenka": "Kolko Domow," "Przeglad Tygodniowy," and "Niwa." He has also published numerous articles in other literary periodicals of Warsaw and other cities.

Among Kraushar's numerous works, which treat mainly of historical subjects, are: "Historie Zydow w Polsce" (2 vols., Warsaw, 1865–66), "Syn Pulkownika Berka" (Frank i Frankisci Polscy, 2 vols., 1895), etc. His poetical compositions include "Tytana," "Argona z Koryntu," "Strofy," and "Elekcja w Babinie."

Kraushar has been elected member of learned societies in Paris, Posen, and Cracow, and has received a decoration from the reigning prince of Schaumburg-Lippe for his work "Sprawa Zygmunta Unruga."

His wife, **Jadwiga Krausharowa** (b. Warsaw 1858), has written several important works, among them "Jedua Noc," "Na Monte Pincio," and "Alfred de Musset" (a biographical sketch).

Bibliography: *Encyklopedya Powsiechna*, viii., Warsaw, 1900.

H. R. S. A. B.

KRAUSKOPF, JOSEPH: American rabbi and author; born in Ostrowo, Prussia, Jan. 21, 1858. He emigrated to America (New York) in July, 1872, and from New York he went to Fall River, Mass., where he found employment as clerk in a tea-store. Through the influence of friends Krauskopf secured admittance into the Hebrew Union College, Cincinnati (Oct., 1875). While studying there and in the University of Cincinnati, Krauskopf acted as a tutor, contributed articles to journals, and published (with H. Berkowitz) "The First Union Hebrew Reader" and "Second Union Hebrew Reader" and "Bible Ethics" (1883). He graduated from the university and from the Hebrew Union College (rabbi) in 1883. In 1885 the faculty of the college conferred upon him the degree of D.D. Krauskopf received and accepted a call from the Bnai Jehudah congregation in Kansas City, Mo. He was appointed by the governor of Missouri as a life-member of the Board of National Charities and Corrections, and in 1885 was elected vice-president of the Pittsburg Conference, of which Dr. I. M. Wise was president. In the same year Krauskopf received a call from the Keneseth Israel congregation (Reform) of Philadelphia.

Krauskopf entered on his duties in Philadelphia, Oct. 19, 1887. He established a Sunday service in addition to the regular Sabbath service; under his ministration the congregation flourished, and has become one of the largest Jewish congregations in the United States. Seventeen volumes of Krauskopf's lectures, embracing subjects in the fields of religion, ethics, and social science, have been published since 1888. He aided in the organization of the

Jewish Publication Society of America, in the spring of 1888.

In the spring of the year 1894, when the stream of immigration of Russian Jewish exiles into the United States was at its fullest, Krauskopf resolved to visit Russia. He made a study of the condition of the Jews within the Pale of Settlement and of the agricultural colonies in the interior. One of the institutions Krauskopf visited was the Jewish Agricultural School at Odessa, the excellence of which so impressed him that immediately after his return to the United States he set to work to establish a National Farm School, at Doylestown, Pa.; Krauskopf is president of that institution. By his efforts Keneseth Israel succeeded in building its present house of worship in 1892. Shortly after the outbreak of the Spanish-American war (1898), Krauskopf was chosen by the National Relief Commission as one of three special field commissioners instructed to visit the camps of the United States and Cuba, and to render such relief as was found necessary. In March, 1903, he was elected director-general of the I. M. Wise Memorial Fund, and in July of the same year president of the Central Conference of American Rabbis.

Krauskopf is the author of the following: "The Jews and Moors in Spain" (1886); "Sunday Discourses" (1887–1902); "The Evolution of Judaism" (1887); "Service Ritual" (1888); "Service Manual" (1892); "Gleanings from Our Vineyard" (1895); "The Mourners' Service" (1895); "Sabbath-School Service" (1896); "Society and Its Morals" (1900); "A Rabbi's Impressions of the Oberammergau Passion-Play" (1901); "The Seven Ages of Man" (1902); "Old Truths in New Books" (1902).

A. M. Go.

KRAUSS, FRIEDRICH SALOMON (pseudonym, **Suljo Serhatlija**): Austrian folklorist; born at Pozega, Slavonia, Oct. 7, 1859. He studied classical philology at the University of Vienna (Ph.D.), and then devoted himself to South-Slavonian folk-lore, which he was the first to investigate scientifically. He was commissioned by the Austrian crown prince Rudolph to travel through Bosnia, Herzegovina, Slavonia, Croatia, and Dalmatia, where he discovered an unsuspected wealth of Moslem and Slavic songs. For eight years he edited the folk-lore monthly "Am Urquell."

Krauss is the author of a great number of publications, the most noteworthy of which are: "Artemidoros Symbolik der Träume" (1881), "Sagen und Märchen der Südslaven" (2 vols., 1883–84), "Südslavische Hexensagen" (1884), "Südslavische Pestsagen" (1884), "Sitte und Brauch der Südslaven" (1885), "Volksglaube und Religiöser Brauch der Südslaven" (1900); with L. Scherman, "Allgemeine Methodik der Volkskunde" (1899), "Die Volkskunde in den Jahren 1897–1902," "Künstlerblut," drama in four acts.

Krauss was for a number of years secretary of the Israelitische Allianz zu Wien.

KRAUSS, SAMUEL: Hungarian philologist and historian; born in Ukk, a village in the county of Szala, Hungary, Feb. 18, 1866. At the age of eleven he was sent for two years to the Talmud school of the Lo Alman Yisrael society at Jánosháza, and he studied subsequently for more than three years at the Talmud school of Dr. Solomon Breuer, at the time rabbi at Papa. He then taught for a time in small villages, entered the rabbinical seminary at Budapest in 1884 (graduated 1889), took the theological course in that institution, and attended lectures at the same time at the University of Budapest. He continued his studies at the Lehranstalt für die Wissenschaft des Judenthums and at the universities of Berlin (1892) and Giessen (Ph.D. 1893, his dissertation being "Zur Griechischen und Lateinischen Lexicographie aus Jüdischen Quellen," published in "Byzantinische Zeitschrift," vol. ii.). In 1894 Krauss was appointed professor of Hebrew at the Jewish teachers' seminary at Budapest, a position which he still (1904) retains. In the same year he was ordained rabbi.

Besides a large number of philological and historical essays, Krauss has published: "Rendszeres Zsidó Vallás es Erkölcstan," a manual of Jewish religion and ethics; "Talmudi Eletszabályok és Erkölcsi Tanitások," on Talmudic maxims and ethical teachings (Hungarian transl. of Derek Ereẓ); "Griechische und Lateinische Lehnwörter im Talmud, Midrasch, und Targum" (2 vols., with notes by Immanuel Löw, Berlin, 1898–99); "Das Leben Jesu nach Jüdischen Quellen" (*ib.* 1902). With W. Bacher and J. Bánóczi he has edited the Hungarian translation of the Bible.

S.

KREFELD: Prussian manufacturing town near Düsseldorf, in the province of the Rhine. Small neighboring villages, embraced in the former electorate of Cologne, and which probably contained Jews, are mentioned in accounts of persecutions as early as the First Crusade, but no Jewish community is spoken of in connection with Krefeld. While the first mention of Krefeld as a town dates back to the middle of the twelfth century, the first Jew to settle there was Jacob of Mörs, in 1617. The Jewish population of Krefeld increased but slowly, and when the town, in 1702, came under Prussian control, the community was still small. Eleven years after this a royal edict required the magistrate to admit only such Jews as had received the king's permit. In 1765 Krefeld's small Jewish community erected a synagogue at its own expense; up to that time it had worshiped with the neighboring congregation of Hüls. In 1780 it contained but eleven Jewish families (about seventy individuals). In 1808 the synagogue there was rebuilt on a larger scale, Löb Karlsburg being installed as rabbi.

Under the French government Krefeld formed a consistorial diocese, the Jews of which were citizens of the empire, with full legal rights. By the Peace of Paris (May 30, 1814) Krefeld became again a part of Prussia; the existing conditions were allowed to stand, but a cabinet order of March 3, 1818, renewed the Napoleonic edict of May 17, 1808, which had imposed restrictions on Jewish money-lenders during a term of ten years, although in France itself the edict had lapsed (see JEW. ENCYC. v. 469, *s.v.* FRANCE). Following R. Karlsburg, Dr. Ullmann (to Sept. 4, 1843), L. Bodenheimer (1845-68), and Dr. J. Horowitz (since 1869) have successively occupied the rabbinate. The present synagogue took the place of the old in 1853 (dedicated June 17). Jewish benevolence is exercised through a number of institutions, in addition to the usual societies, among them being the Verein zur Förderung und Unterstützung des Handwerks und des Schulwesens im Rabbinatsbezirk Crefeld. Krefeld has a population of 106,928, including 1,800 Jews.

D. S. Sa.

KREMENETZ (Polish, **Krzemieniec**): District town in the government of Volhynia, Russia. The Jews of Kremenetz are first mentioned in a charter of privileges granted by the grand duke Svidrigaila of Lithuania May 9, 1438, to the waywode of Kremenetz, the German Yurka. In this charter the latter is given jurisdiction over the Ruthenians, Poles, Wallachians, Germans, Armenians, Jews, and Tatars of the town. The next mention of Jews is under date of March 15, 1536, when Kremenetz had come under Polish rule. At that time King Sigismund granted the Magdeburg Rights to the city, which deprived the Jews of certain commercial advantages. In an edict of Nov. 27, 1551, the Jewish community of Kremenetz is mentioned among those exempted from the payment of the special tax known as "Serebschizna" (tax on silver). This shows that it was not in a prosperous condition at that time—a conclusion which is sustained by the fact that in 1552 there were only 48 Jewish house-owners in the town.

Lease-holding.

A few years later, however, wealthy Jewish merchants bid successfully on certain leases. In 1556 the Canon of Plock (Plotzk) and Warsaw, Yan Makovetzki, who was sent by the king to investigate the administrative affairs of the castle of Kremenetz, reported that Avram (Abraham) Mosheyevich and Pesakh Khaimovich, Jews of Kremenetz, bid for the lease of commercial taxes, inns, etc., the sum of 300 kop groschen per annum, an amount greatly in excess of that paid by the Christian leaseholders, the aldermen Semashko and Kuibyeda. The king's reply, characteristic of the contemporary policy of the Polish court, was: "We should always endeavor to increase our income from the towns and castles; and through the competition of the Jews the value of our leases has always increased. This competition may impel the Christians to bid even more." Hence the king ordered that the leases be awarded to the Jews. The success of the Jewish tax-farmer Avram Mosheyevich led to an attempt at retaliation by the previous tax-farmer, the alderman Semashko, as appears from a document dated July 4, 1557. In a lawsuit brought by the Jew Eska Zelmanovich against Avram Mosheyevich, Semashko, who acted as judge, decided in favor of the former, but the decision was reversed on appeal to the king, who had ordered the case to be brought before him. Five other Jewish leaseholders, Levon Itzkhakovich, Pesakh Khaimovich, Moshe and Yanush Davidovich, and Eska Kheskilovich, are mentioned in a document dated Dec. 15, 1557. The prediction of the king as to the increase in revenue owing to the competition of the Jews was fulfilled; for it appears that the leases and taxes of Kremenetz, which formerly had been farmed for 450 kop groschen per annum, were now leased for the annual sum of 600 kop groschen to a non-resident, the Jew Jacob Felixovich, son of the well-known Felix, manager of the Wilna mint.

In the second half of the sixteenth century the community of Kremenetz was much less important than those of other Volhynian towns, as is evidenced by the apportionment of taxes among the Jewish communities of Lithuania on July 25, 1563. A census of Kremenetz taken in that year shows that the Jews owned property as follows: on Hill street, 13 lots; on Middle street, 55½ lots; on the Jewish street, 67 lots; on Resurrection street (Voskresenskaya), 11 lots; on Viesnevetzkaya street, 9½ lots; on Grand street, 14 lots; on Khrusvitzka street, 12½ lots. Among the buildings, the synagogue, the Jewish meeting-house, the houses of Rabbi Samuel, of two other rabbis, and of Bella, a rabbi's wife, the Jewish hospital, and the house of the Jewish sexton are mentioned. The most important Jewish property-owners were Sarko and certain members of his family. According to the above-mentioned tax schedule, Kremenetz was to pay 140 kop groschen, while Vladimir was to pay 500, Lutzk 550, and Ostrog 600. In 1569 by an edict of King Sigismund August, the Jews of Kremenetz were placed under the jurisdiction of the waywode Alexander Czartoryski.

Perles, in his "Gesch. der Juden in Posen" ("Monatsschrift," 1864, p. 366, note), mentions Kremenetz as one of the places where the Council of Four Lands was held in 1607, and where the "Taḳḳanot" were drawn up. This statement, which has been accepted by Graetz and other historians, is an erroneous one; for in that year the Council was held at the "Gramnitza" (Candlestick) fair at Lublin—the similarity of the two names doubtless causing the error (see Harkavy, "Ḥadashim gam Yeshanim," p. 38, in supplement to the Hebrew edition of Graetz's "Gesch." vol. vii.).

Yom-Ṭob Lipman Heller in his "Megillat Ebah" refers to Kremenetz in connection with the Council of Four Lands in 1635. During the Cossack uprising (1648-49) many thousands of Jews were killed in Kremenetz; but the community was not entirely destroyed, as is evidenced by the edict of King John Casimir, dated Jan. 26, 1650, renewing its charter of privileges.

But little is known of the life of the Kremenetz community during the eighteenth century. Among the rabbis who were called to take part in the debate with the Frankists in 1757 was a certain Joseph Kremenetz of Moghilef (Podolia). His name indicates either that he was born in Kremenetz or that he had officiated there as rabbi before he went to Moghilef. Jekuthiel Solomon, the great-grandfather of Isaac Bär Levinsohn, who acquired considerable wealth, was a native of Kremenetz. Levinsohn's grandfather Isaac, his father-in-law, the wealthy and learned Zalman Cohen, and his father, Judah Levin, who also was a wealthy merchant and was equally popular among Jews and Gentiles, likewise lived there. At the beginning of the nineteenth century Kremenetz gained fame through its son Isaac Bär Levinsohn, "the Russian Mendelssohn," as he was sometimes called. His presence there attracted to Kremenetz many scholars and friends of learning. Levinsohn's friend, Mendel Landsberg, was known in the literary world for his extensive collection of books. Aryeh Löb Landsberg, who died at Odessa in 1861, and his son David Isaac, who was an instructor at the Hebrew school in that town, also came from Kremenetz. The Hebrew poet A. B. Gottlober resided for some years in the town.

Rabbis.

Since the organization of the Kremenetz community many noted rabbis have held office. Prominent among them have been: **Abraham Ḥazzan** (d. 1510), author of "Ḥibbure Leḳeṭ"; **Isaac ha-Kohen** (d. 1573), president of the yeshibah; **Mordecai Jaffe** (d. 1612), author of "Lebushim" (*c.* 1590-92); **Simson ben Bezaleel**, brother of Liva (Maharil) of Prague; **Aaron Samuel b. Moses Shalom** (d. 1617), author of "Mishnat Adam" and "Be'er Sheba'"; **Abraham**, who was elected to the Council of Four Lands in 1595 (Perles, in "Monatsschrift," 1864); **Moses Ḥarif Ḥayyim** (d. 1649); **Meïr**, a descendant of Liva ben Bezaleel and of Mordecai Jaffe (?), lived at the beginning of the eighteenth century; **Samuel**, who claimed (1690) that the Karaites could never be recognized as true brethren of the Rabbinite Jews; **Johanan ben Meïr** (d. 1724), author of "Oraḥ Mishor"; **Phoebus** (d. 1770), author of "Mishnat Ḥakamim"; **Jacob Israel** (d. 1788), preacher, author of "Shebeṭ mi-Yisrael": **David Ẓebi ben Aryeh Löb Auerbach** (d. 1793); **Shalom Ẓebi ben Naphtali Rokeaḥ of Brody** (d. 1811); **Mordecai ben Michael** (d. 1817).

In 1897 the Jews of Kremenetz numbered about 11,000 in a total population of 17,618. They are actively interested in the grain and tobacco trade with Austria.

H. R.

KREMER, MOSES B. DAVID. See Krämer, Moses b. David.

KREMNITZER, JOHANAN B. MEÏR: Polish rabbinical author; lived in the seventeenth century at Kalisz.

He wrote "Oraḥ Mishor" (Sulzbach, 1692), a commentary on "Darke Mosheh" to Yoreh De'ah, by Moses Isserles. Kremnitzer was the author also of "Oraḥ Mishor" (Berlin, 1724), novellæ on the tractate Nazir containing corrections of the text of the Gemara, of Rashi, and of the Tosafot. It was published together with the second (revised and enlarged) edition of the "Oraḥ Mishor" on the "Darke Mosheh" to Yoreh De'ah. A third, separate edition of the "Oraḥ Mishor" to the "Darke Mosheh" appeared in Fürth in 1766.

S. S. N. T. L.

KREMSER, SIMON: German army commissary; born Sept. 15, 1775, at Breslau, Germany; died 1851. He became commissary agent to Blücher in 1806, and was entrusted with the Royal Prussian war-chest. For his services in saving this at the risk of his life he received the order "Pour le Mérite." Throughout the Napoleonic war Kremser retained his position, but afterward he retired to an estate purchased from General York, and married the Baroness von Adlersthal. Losing his fortune, he in 1822 obtained a concession to run omnibuses in Berlin, and the vehicles were called "Kremser" after him. In 1827 he gave up this business and went to Russia as a commissary, obtaining the honorary rank of major in the Russian army. For his services he obtained a pension and two Russian orders.

Bibliography: *Juden als Soldaten*, 1897, p. 6.

KREMSIER, MORDECAI BEN NAPHTALI HIRSCH: German Talmudist and poet; lived at Cracow in the seventeenth century. He wrote: "Ḳinah" (Lublin [?], *c.* 1650), a dirge in which he mourns over the 120,000 Jews who perished in the Chmielnicki riots in Russia; "Ḳeṭoret ha-Mizbeaḥ" (Amsterdam, 1660), novellæ on the Haggadah in the Talmud treatise Berakot (this work is called also "Tosafot Maharam"); "Ḳeṭoret ha-Sammim" (*ib.* 1660; in the Pentateuch ed. *ib.* 1671), commentary on the Targumim to the Pentateuch of pseudo-Jonathan and of Jerusalem. The title, taken from Ex. xxxi. 11, and which in Aramaic has the equivalent "Mura Dakya," is an allusion to the author's name, "Mordecai," which is explained in Ḥul. 139b as being derived from the two words just mentioned, meaning "pure myrrh."

KREMSIR: Town in Moravia, Austria, twelve miles southwest of Prerau. The oldest authentic records of its Jewish community date from the year 1322, when John, King of Bohemia and Poland, gave to the Bishop of Olmütz permission to settle one Jew in Kremsir and one in each of three other cities of his diocese. Soon, however, other Jews came to Kremsir and at once formed a community. The building of the first synagogue may be placed in the fifteenth century, and even at this early date the community appears to have owned a cemetery likewise. Tombstones dating from 1535 have been found in the old Jewish burial-ground, and there were doubtless others even more ancient; for the register of deaths, which is still preserved, extends back to the year 1482.

The Jewish community in Kremsir was under the bishops of Olmütz, who in general exercised a benevolent régime.

The community was destroyed by the Swedes in the Thirty Years' war (1642). It was built up again in 1670, when Bishop Karl, Count of Lichtenstein, granted permission to a few emigrants from Vienna to settle in Kremsir. Since these newcomers were mostly energetic merchants, the community flourished and became one of the largest in Moravia. In 1699 the Jews were threatened with expulsion, probably merely in order to extort money from them. The danger was avoided, however, and the community grew in numbers, while its prosperity increased as well.

The Jews of Kremsir suffered also during the war of the Austrian Succession. The reason in this case, as in that of the Thirty Years' war, was the situa-

Plundered During War.

tion of the town, which lay at the intersection of so many commercial and military roads. Kremsir was plundered like many other Moravian communities, and money for the release and protection of Jewish captives was exacted with ruthless severity. Consequently many Moravian families, among them some from Kremsir, left the country. Of the 5,400 Jewish families tolerated by Maria Theresa, 106 lived in Kremsir (see Familianten Gesetz).

When the French entered Kremsir in 1805 the Jewish community had to surrender its silverware. Aged men still remember Oct. 18, 1818, the Day of Atonement, when Crown Prince Ferdinand was escorted under the baldachin to the temple, and there attended service. A memorial tablet commemorates this festal occasion. Then came the year 1848, which freed the Jews of Kremsir from episcopal control. Kremsir was the first city in the province which received permission to remove the gates of the ghetto. In the Reichstag which convened in Kremsir five Jewish members had seats. The political revolution which took place before the eyes of the Kremsir Jews meant also a turning-point in their religious life, and a change in the internal condition of the community. For a time there was peace; but dissensions soon arose both in the religious and in the civil spheres.

Several decades passed thus, alternating between internal calm and strife, a prominent cause of contention being the condemnation of the old cemetery by the city, to which measure the congregation, after protracted litigation, finally had to yield (1882).

In 1897 the Jews of Kremsir numbered 920 in a total population of 12,480. The new cemetery has been in existence since 1850; and the present synagogue was built in 1693.

Rabbis.

Kremsir boasts a long line of rabbis. From 1680 to 1700 the town was the seat of the Moravian "Landesrabbiner." The more important rabbis have been: M. M. Krochmal (1636–42), Issachar Berush Eskeles, S. Helman, Elias Herz, and Nathan Feitel, the last-named of whom went to Kremsir with many emigrants from Vienna. Since 1877 the rabbinate has been occupied by the present incumbent, A. Frankl-Grün.

Bibliography: Frankl-Grün, *Gesch. der Juden in Kremsir*, Breslau and Frankfort, 1896–1901.

D. A. F.-G.

KRESPIA NAḲDAN: Scribe of the thirteenth century. He is recorded as having copied in March, 1243, a manuscript of Maimonides' "Yad ha-Ḥazaḳah" now in the British Museum. The same manuscript contains an "azharah," with an acrostic on Krespia's name, which has reference to the disputation at Paris in 1240. This Krespia Naḳdan has been frequently confounded with Berechiah Naḳdan, the composer of the fox-fables, as by Carmoly ("Les Israélites de France," p. 24) and Geiger ("Oẓar Neḥmad," i. 106).

Bibliography: Dukes, in Kobak's *Jeschurun*, iv. 18, 19; Steinschneider, *Hebr. Bibl.* xiii. 83; Renan-Neubauer, *Les Rabbins Français*, pp. 490–492.

G. J.

KRESPIN, MORDECAI: Turkish rabbi and writer; lived on the island of Rhodes in the first half of the eighteenth century; son-in-law of R. Moses Israel, author of "Masse'ot Mosheh." Krespin was the author of the following two works: "Ma'amar Mordekai" (Salonica, 1828), a commentary on Giṭṭin; and "Dibre Mordekai" (*ib.* 1836), a commentary on the four Ṭurim and on the Talmud. Both of these works were annotated by the author's grandson and namesake.

Bibliography: Hazan, *Ha-Ma'alot li-Shelomoh*, pp. 20, 57a, 69b.

KRETI AND PLETI. See Cherethites.

KREUZNACH: Prussian town and watering-place in the government of Coblenz. The first mention of Jews in Kreuznach occurs in an account of an attack upon them on March 31, 1283, given in Salfeld's "Martyrologium." In a number of documents, beginning with one of Feb. 2, 1342, Abraham of Kreuznach is mentioned as a highly esteemed Jewish resident of Bingen. The Jews of Kreuznach were among the victims of the anti-Jewish riots that occurred at the time of the Black Death. Rupert III. (1398–1410), who, as elector, had expelled Jews from the Palatinate, tolerated them as king, and took Gottschalk of Kreuznach, among others, under his protection. The Jews of this city are mentioned also in 1464 and 1525. The business transactions of the Jews were regulated by special edict, which included permission to sell medicines and merchandise, and to possess a cemetery. An edict of 1548 granted them permission to appoint "an instructor or schoolmaster." In 1722 there were in the electoral district of Kreuznach thirty-six Jewish families, twenty-two of which lived in the city, while the remaining fourteen families were scattered in neighboring towns. The present rabbi (1904) is Dr. Tawrogi, who was preceded by Rabbis L. Bamberger and Hirsch. The community maintains a number of charitable foundations. Kreuznach has a population of 21,234, including 665 Jews.

Bibliography: Salfeld, *Martyrologium*, pp. 99, 144, 276, 281; Schaab, *Diplomat. Gesch. der Juden in Mainz*, p. 83; Löwenstein, *Gesch. der Juden in der Kurpfalz*, passim; *Statistisches Jahrbuch des Deutsch-Israelitischen Gemeindebundes*, 1903, p. 77.

KRIEGSHABER, ISAAC. See Grieshaber, Isaac.

KRIMCHAKS: The so-called "Turkish Jews," inhabitants of the Crimea, whose center of population is Kara-Su-Bazar, one of the most densely populated districts of Taurida. They differ from the other Jews of Russia in that the Semitic and Tatar elements are in them intimately blended.

In their mode of life they greatly resemble their Tatar neighbors, but in religion they adhere strictly to the Jewish faith, even to Talmudic Judaism. Their dress is identical with that of the Tatars, the outer garment of the men being the "arkbaluk," a coat made of blue material, and gathered at the waist by a wide belt ornamented with silver, attached to which is usually a small dagger, or a copper ink-well with the other accessaries for writing. The married women and girls wear bright-colored pantaloons and pointed, embroidered slippers.

Their head-gear is much like the Turkish "chalma." The Krimchaks are distinguished from the Tatars in that neither the men nor the women shave their heads, though they clip their hair frequently. They, however, retain a few long locks and the carefully curled pe'ot; and the girls permit a number of tiny braids to escape from under the red coin-ornament worn by them.

Manners and Customs.

The men are almost all of tall stature and slenderly built, and are marked by the reddish-golden color of their hair, a tint which is uncommon among Semitic tribes. The women have retained more tenaciously the characteristically Jewish type. They are pretty, and have delicate complexions and bright black eyes. Their finger-nails and palms are colored yellow, in imitation of their Tatar neighbors; and, like the latter, they use rouge on their faces and dye their eyelids. Like the Mohammedan women, they are careful to conceal their features with a white veil when appearing in public. The Krimchaks are not addicted to drink; and most of them abstain from wine, notwithstanding the fact that wine is the common drink of the region and is very cheap.

The houses of the Krimchaks are built in the usual Tatar style; and the interiors are characterized by cleanliness and order. Cushions and rugs are practically the only furniture, meals being partaken of at low tables while the eater sits on the floor. Patriarchal customs still survive; and the head of the household possesses considerable authority. The Krimchaks employ a pure Tatar language, but use the Hebrew alphabet in writing.

It is still uncertain when the Krimchaks first settled in the Crimea. They themselves believe that they came to the region about the sixth century. According to a tradition current among them, a certain manuscript prayer-book, which has been handed down from generation to generation and is reverenced as a sacred relic in their synagogue, was brought from Kiev by some Jewish families which, together with some Caucasian Jews and the Krimchaks, established the community of Kara-Su-Bazar. This prayer-book was printed in the eighteenth century in the first Jewish printing-office at Eupatoria.

Probable Origin.

The Crimean judge Sumarokov, who wrote an essay on the Krimchaks in 1801, speaks of their migration from Constantinople as having taken place in the fourteenth century, when Kara-Su-Bazar was the capital of the Crimean khans. It is possible that Sumarokov had in mind the Turkish immigrants who joined their Caucasian and Kiev coreligionists. Speaking of their customs, he asserts that at one time polygamy was prevalent among them, but that since the eighteenth century it has been discontinued. In their marriage ceremonies they have maintained the customs of Oriental peoples. The marriage festival begins, two or three days before the actual wedding, with the formal removal of the bride's wardrobe to the house of the bridegroom. On the eve of the wedding the groom and his nearest relatives repair to the bride's house, where feasting is continued until dawn. The wedding ceremony is performed in the morning. At daybreak the procession starts for the synagogue, where the intimate friends of the bridal pair walk around them seven times with roosters in their arms while the rabbi is reading the prayers. At the end of the ceremony the newly wedded couple must remain in their room for seven days, no strangers being admitted.

From a report made to the Ministry of the Interior by Count Vorontzov, governor-general of New Russia, dated April 27, 1841, it is apparent that the Krimchaks—who should not be confounded with the Karaites resident in Kara-Su-Bazar—became Russian subjects on the annexation of Crimea to the Russian empire, and that they are unwilling to mix with the other Jews, whom they call Polish, although their religious beliefs are identical. Their arrangement of the prayer-book and their pronunciation of Hebrew resemble somewhat those of the Spanish Jews. The Krimchaks, according to Vorontzov, are a peaceful people engaged in industrial occupations, and are on the whole honest, straightforward, and well-to-do.

H. R. M. R.

KRISTELLER, SAMUEL: German physician; born at Xions, Posen, May 26, 1820; died at Berlin June 15, 1900. He received his diploma as doctor of medicine from the University of Berlin in 1844, and settled as a physician in Gnesen, where in 1850 he was appointed "Kreisphysikus" (physician to the board of health). In the following year he moved to Berlin, where he continued to practise till his death.

In 1854 Kristeller founded the Berliner Aerztliche Unterstützungskasse, a benevolent mutual society for physicians, which in 1879 became the Wilhelm-Augusta-Stiftung. He opened a private gynecological hospital in 1855; and in 1860 he was admitted to the medical faculty of Berlin University as privat-docent in gynecology. In 1866 Kristeller became physician (unsalaried) to the poor. As chief surgeon of a hospital he took an active part in the Prussian wars of 1866 and 1870–71; in 1867 he received the title of "Sanitätsrath," and in 1873 that of "Geheimers Sanitätsrath." He was one of the founders of the Medical and Gynecological Society of Berlin.

Kristeller took an active part in Jewish communal affairs. He was a member of the Deutsch-Israelitische Gemeindebund, being president of the executive committee to which he belonged from 1882; he was a member of the executive committee also of the Society for Propagation of Handicrafts Among the Jews, and belonged to a society for the help of Rumanian and Russian Jews.

Kristeller contributed several essays to the medical journals, and translated some Hebrew poems into German.

S. F. T. H.

KROCHMAL, ABRAHAM: Galician philosopher and writer; born at Brody about 1823; died in 1895; son of Nachman KROCHMAL. Very little is known of his life. He seems to have received an Orthodox education, which included, however, modern science. In 1830 he lived at Odessa, but after a short time he went to Galicia, where he probably remained until his death. In 1867 he published at Lemberg his "Yerushalayim ha-Benuyah," a critical examination of the most important passages of the Talmud Yerushalmi. His work "Eben ha-Roshah" (Vienna, 1871) is an exposition of the philosophy of Spinoza, for whom he had the greatest admiration. Becoming interested in religious reforms, he undertook to criticize the rabbinical system, collaborating on Rodkinson's "Ha-Ḳol" and Schorr's "He-Ḥaluẓ." In his "Ha-Ketab weha-Miktab" (Lemberg, 1875) he engaged in Biblical criticism with a boldness that called forth the attacks of the Orthodox. In his "'Iyyun Tefillah" (*ib.* 1885) he violently attacked, on the one hand, the Reform rabbis who misconceived traditional Judaism, and, on the other, the Orthodox rabbis who would not admit the necessity of religious reforms. In 1881 he published his "Perushim we-Ha'arot," scholia to the Babylonian Talmud. He published also "Theologie der Zukunft; Ein Kritisch-Philosophischer Traktat zur Rechtfertigung des Religiösen Bewustseins" (Lemberg, 1872). As a thinker Krochmal lacked consistency, and his system, borrowed from Kant, Hegel, and Schopenhauer, was chaotic. As a critic he exerted great influence on the Hebrew reading public, and was perhaps the most eminent Biblical critic in Hebrew.

KROCHMAL, ḤAYYIM: Polish Talmudist; born 1626; died 1666 at Cracow; son-in-law of Abraham Chemiesch. He was for many years preacher ("darshan") in the different synagogues of Cracow. By his contemporaries Krochmal was considered an able scholar; and the one work of his which has been preserved, "Meḳor Ḥayyim," or, as some designate it (*e.g.*, Fürst), "Rishon Meḳor Ḥayyim," testifies to his profound and methodical scholarship. This book, which was published (Fürth, 1696) by his grandson Jehiel Krochmal, contains elucidations of the Midrash to the five Megillot and of the Prophets, with the exception of Joel, Nahum, Zephaniah, and Haggai. Two other works of Krochmal's remained unpublished.

S. S. M. L. B.

KROCHMAL, MENAHEM MENDEL BEN ABRAHAM: Moravian rabbi; born at Cracow about 1600; died at Nikolsburg Jan. 2, 1661. His teacher in the Talmud was Joel Sirkes, author of "Bet Ḥadash." Krochmal soon distinguished himself so highly that with the permission of his master he was able to open a yeshibah, which sent forth scholars like Gershon Ashkenazi (afterward his son-in-law), and Mendel Auerbach, author of "'Aṭeret Zeḳenim." The Jews of Cracow, in appreciation of his learning, made Krochmal dayyan.

About 1636 Krochmal left his native city and went to Moravia. He was appointed rabbi of Kremsir, where he also founded a yeshibah. In 1645 he returned to Cracow; in the following year he became rabbi of Prossnitz; and in 1650 he accepted a call to the district rabbinate of Nikolsburg.

Krochmal's son Aryeh Löb, who followed him in the rabbinate at Nikolsburg, published from his father's manuscripts the collection of responsa "Ẓemaḥ Ẓedeḳ," Amsterdam, 1775.

D. B. FR.

KROCHMAL, NACHMAN KOHEN: Austrian philosopher and historian; born at Brody, Galicia, Feb. 17, 1785; died at Tarnopol July 31, 1840. He began the study of the Talmud at an early age. When barely fourteen he was married, according to the custom of the time, his wife being the daughter of the wealthy merchant Habermann. He then went to live with his father-in-law at Zolkiev, near Lemberg, where he devoted himself entirely to his studies, beginning with Maimonides' "Moreh Nebukim" and studying other Hebrew philosophical writings. He then proceeded to study German and the German philosophers, especially Kant, to read Latin and French classics, and Arabic and Syriac books. Breaking down from overwork in 1808, he went to Lemberg for medical treatment; and the friendship he there formed with S. L. Rapoport, whose teacher he became, was most fruitful for Jewish science. On his return to Zolkiev, after having partially recovered, he again took up philosophy, reading Kant, Fichte, and Schelling, and subsequently Hegel, whose system chiefly attracted him and exerted a great influence on his views. Aside from Rapoport, who often visited him in Zolkiev, he gathered around him a group of young students. In 1814, after the death of his wife's parents, he was compelled to earn a livelihood, and he became a merchant. Twelve years later he lost his wife, and his health became very poor. In spite of failure in business, poor circumstances, and loneliness, he refused an invitation to the rabbinate of Berlin, and instead obtained a position as bookkeeper in Zolkiev, which he held from 1836 to 1838. A serious illness then compelled him to retire to his daughter's house in Tarnopol; and here two years later he died.

Krochmal was a brilliant conversationalist and an exceedingly careful student. For a long time he could not be persuaded to publish any of the results of his studies, in consequence of aspersions cast upon him on account of his friendly correspondence with the ḥakam of the neighboring Karaite community of Kokusow. Krochmal defended himself in a circular letter against these accusations. He was not a prolific writer. Besides some Hebrew essays in periodicals ("Sulamith," 1818; "Ha-Ẓefirah," Zolkiev, 1824; and "Kerem Ḥemed," vols. iv., v.), he wrote only one Hebrew book, namely, "Moreh Nebuke ha-Zeman" (Lemberg, 1851), edited, according to the author's last will, by his friend Leopold Zunz. Other editions appeared at Lemberg in 1863 and Warsaw in 1898.

The book is divided into seventeen chapters, of which the first six deal with religion in general.

Ch. vii. describes Israel's spiritual gift as the desire for and faculty of seeking God. The next three chapters contain a philosophical analysis of Jewish history, which, corresponding to Israel's attachment to the Lord, that is, to its religious development, is divided into three epochs. These epochs terminate respectively: (1) with the death of Gedaliah after the destruction of the Temple; (2) with the death of Bar Kokba (*c.* 135); and (3) with the expulsion of the Jews from Spain (1492). The author does not characterize the modern period in which he himself lived. Ch. xi.–xv. deal with the post-exilic Biblical and the Apocryphal literature and with the various religious movements. The author discusses also the necessity of tradition and gives a critical résumé of the development of the Halakah and Haggadah. Ch. xvi. gives a brief sketch of the future development of Jewish religious philosophy based on the principles of Hegel. The work finishes with an exposition of Ibn Ezra's philosophy. The historical digressions in the book touch the profoundest problems of Jewish science; and it remains their indisputable merit to have paved the way for critical studies in Jewish history. The work really became, as intended by the author, a "guide" to students of Jewish science in the nineteenth century.

KRON, JUDAH BEN ELEAZAR: Russian teacher and author; born at Tuckum, Courland, Feb. 1, 1793; died at Mitau 1831. He was educated by Rabbis J. W. Blumenfeld and M. Ezekiel and also in the district school of his native town, and occupied himself with teaching in Mitau throughout his life. In 1826 he passed an examination as an authorized translator of the Hebrew language before a school commission at the University of Dorpat, and in the same year was appointed translator to the city magistrate of Mitau.

Kron was the author of: "Derek Selulah" (Wilna, 1826), a Hebrew-German dictionary; "Betrachtungen über die Welt" (Riga, 1829), a German translation of Bedersi's "Beḥinat ha-Olam"; and "Reshit ha-Limmud" (Wilna, 1880), a work on the Hebrew alphabet.

H. R. M. Sc.

KRONECKER, HUGO: German physiologist; born at Liegnitz, Prussian Silesia, Jan. 27, 1839; educated at the universities of Heidelberg and Berlin (M.D. 1863). Attending the hospitals of Berlin University, he became assistant to Traube in 1865 and studied in the physiological laboratory. In 1871 he became assistant at the physiological institute connected with Leipsic University; in 1872 privat-docent; and in 1875 assistant professor. He was called to Bern University in 1878 as department chief of its physiological institute, and in 1885 was appointed professor of physiology, which position he still occupies (1904).

Kronecker's researches in physiology resulted in many discoveries: as, the center of coordination for the pulsation of the heart-ventricles; the innervation of the respiratory organs; the contraction of the unstriped muscles; the nerve-centers of the blood-vessels; the action of poison on the heart; etc. Kronecker has contributed many essays to the medical journals. He wrote "Beiträge zur Anatomie und Physiologie," Leipsic, 1874, and from 1881 to 1885 was, with Senator, editor of the "Centralblatt für die Medizinische Wissenschaft."

S. F. T. H.

KRONECKER, LEOPOLD: German mathematician; born Dec. 7, 1823, at Liegnitz; died Dec. 29, 1891, at Berlin. Educated at the universities of Bonn, Breslau, and Berlin (Ph.D. 1845), he became teacher at Liegnitz, where he remained till 1855, when he moved to Berlin, in which city he continued to reside until his death. In 1860 he became a member of the Academy of Sciences, and the following year privat-docent at Berlin University, where he became professor of mathematics in 1883, having embraced Christianity.

Kronecker was the greatest German algebraist of his time. He gave new demonstrations of Gauss's theory of the irreducibility of the segmental equations, of the impossibility of solution of algebraic equations of more than the fifth grade, and of the possibility of solution of Abelian equations. He solved also arithmetical and algebraic problems of the elliptic functions, and established the connection between the multiplication and transformation of the elliptic functions and the square forms of negative determinants, etc. He was one of the editors of Crelle's "Journal für Mathematik," first with Weierstrass, later alone. Of his numerous writings, which have appeared in the professional journals, may be mentioned: "De Unitatibus Complexis," Berlin, 1845; reprinted in 1881; "Grundzüge einer Arithmetischen Theorie der Algebraischen Grössen," *ib.* 1882; "Ueber den Zahlenbegriff," Leipsic, 1887.

The Berlin Academy of Science entrusted to him the publication of Dirichlet's works, of which, however, he published only vol. i. Kronecker's correspondence with Dirichlet was published by Schering in the "Göttingische Gelehrte Anzeigen," 1855; his "Vorlesungen über Mathematik" was published by Hensel and Netto, Leipsic, 1894; and his collected works were published at Leipsic since 1895 by Hensel, who was appointed to this work by the Prussian Academy of Science.

KRONENBERG, LEOPOLD JULIAN, BARON: Polish-Russian banker; brother of Stanislaw Kronenberg; born in Warsaw 1849. After graduating from the gymnasium he studied in the law department of the high school, and then took up the study of agriculture at Bonn and Popelsdorf. While his father was still active Kronenberg managed the St. Petersburg branch of the Warsaw Commercial Bank; but he was obliged to resign in 1887, on account of his brother's illness, in order to look after the management of the railway lines in which the latter was interested and of the Commercial Bank of Warsaw.

Notwithstanding his many business obligations, Kronenberg has taken an active interest in various useful public institutions. He has been president of the Society for the Mutual Help of Musical Artists, a working member of the Polytechnical Committee in Warsaw, etc. In recognition of his distinguished services in connection with great commercial undertakings, he was made a hereditary baron of the Russian empire in 1893.

Valuable musical compositions by Kronenberg have been published under the pseudonym "Wiejesky."

Bibliography: Orgelbrand, *Encyklopedya Powsiechna*, viii.
H. R. J. G. L.

KRONENBERG, STANISLAW LEOPOLD: Polish-Russian financier; brother of Leopold Kronenberg; born at Warsaw 1846; died there 1894. After graduating from gymnasium and high school he went to France. For two years he devoted himself to the study of political economy and finance, and was granted at Paris the degree of doctor of philosophy. During the Franco-Prussian war he took part in the defense of Paris, retiring with the rank of lieutenant and the cross of the Legion of Honor.

Upon the death of his father he returned to Warsaw, and assumed the management of his commercial and railroad interests. He was made president of the Teraspol and Upper Vistula lines, director of the Vienna line, president of the Bank of Commerce, and director of various other commercial institutions; and was concerned in the publication of the "Gazeta Polska," "Nowin," and "Biblioteka Umiejetnoscy Prawnych." His writings on economy and finance, written in Polish, appeared in the "Economiscie." He wrote also "Campagne," 1870-71, and "Quelques Souvenirs et Appréciations d'ex-Officier d'Infanterie," Paris, 1871.

Bibliography: *Encyklopedya Powsiechna*.

KRONER, THEODOR: German rabbi; born at Dyhernfurth, Prussian Silesia, May 12, 1845. He was educated at the gymnasium at Glatz, the yeshibah of R. Pollack at Weisskirchen, Moravia, and the Jewish theological seminary and the university at Breslau (Ph.D. 1869). After three years as rabbi and principal at the Jewish teachers' seminary in Münster he became (1872) rabbi at Lengsfeld, Saxe-Weimar, and (1883-85) at Erfurt. From Erfurt he went to Hanover as assistant rabbi and principal of the Jewish teachers' seminary; in 1894 he was called to the rabbinate ("Kirchenrath") at Stuttgart.

He is the author of "Gesch. der Juden in Erfurt," Erfurt, 1885, and "Gesch. der Juden," Frankfort-on-the-Main, 1898.
S. F. T. H.

KRONIK (KRONIKER), MOSES BEN AKIBA OF GLOGAU: Rabbi of Flatow (Zlotowo); lived in the first half of the nineteenth century. He was the author of "Tefillah we-Todah," hymns and prayers for the community of Glogau on the occasion of the raising of the siege on April 24, 1814, with a German translation by Mayer Neumark (Breslau, 1814); and "Yemin Mosheh," lectures and commentaries interspersed with Hebrew poems, with an appendix entitled "Ebel Yaḥid," containing an elegy on the death of Abraham Tiktin (*ib.* 1824).

KROTOSCHIN. See Posen.

KROZHE: Town in the district of Rossieny, government of Kovno, Russia. The Jewish community dates from the fifteenth century. With the transfer of the gymnasium to Kovno, in 1848, and owing to a ruinous fire in the following year, the town lost its importance. Since the building of the Libau-Romny Railroad in 1880 it has become still poorer; and in recent years many families have emigrated to the United States, Africa, and Australia.

Among the rabbis of Krozhe in the eighteenth and nineteenth centuries the following may be mentioned: R. Eliezer (died at Wilna 1769), teacher of Samuel b. Abigdor of Wilna, and known as an eminent Talmudist and philosopher; Abraham (d. 1804), author of "Ma'alot ha-Torah," a brother of Elijah Wilna; Uri; Mordecai Rabinowitz; and Jacob b. Menahem, who occupied the rabbinate for forty years, and died at Jerusalem.

Talmudic scholars and other prominent men of Krozhe of the same period were: Abba Rosina, called also "Abba Ḥasid" (d. 1792), brother-in-law of R. Löb of Telshi (he was a miller by trade, but corresponded with many prominent rabbis on questions of rabbinical law; Raphael ha-Kohen of Hamburg was his pupil); his son Hirsch (d. 1810); Elijah b. Meïr (Elie Krozer), a wealthy merchant, brother-in-law of the gaon of Wilna, and lived at Krozhe in the first quarter of the nineteenth century (his son Ezekiel was rabbi at Shavli, and his son Jesaiah was dayyan at Krozhe and rabbi at Salaty); Moses Hurwitz (Krozer), dayyan at Wilna, where he died in 1821. Isaac ha-Levi Hurwitz; David, rabbi at Meretz; Zebulon b. Lipman, rabbi at Plungian; and R. Jacob Joseph, who died at New York in 1902, likewise were natives of Krozhe.

In 1897 the Jews of Krozhe numbered 1,125 in a total population of about 3,500. About 40 per cent of the former are artisans, and a few are farmers and gardeners. Besides the usual charitable institutions, Krozhe has two synagogues, two prayer-houses, and about ten different circles for the study of the Bible and the Talmud.

H. R.

KRUG, WILHELM TRAUGOTT: Christian advocate of the emancipation of the Jews; born June 22, 1770, in the village of Radis, near Wittenberg, Prussia; died at Leipsic Jan. 12, 1842. He was lecturer at the University of Wittenberg (1794-

1801), and professor of philosophy at the universities of Frankfort-on-the-Oder (1801–4), Königsberg (1805–9), where he succeeded Kant, and Leipsic (1809 until his death).

Krug wrote a great number of books, essays, and dissertations. In his autobiography, "Lebensreise, in Sechs Stationen Beschrieben" (Leipsic, 1825), published under the pseudonym "Urceus," and reissued in 1842 under his own name, he gives a list of 189 of his writings.

He was a warm defender of political and religious liberty. Having in 1819, in his "Eusebiologie oder Philosophische Religionslehre," spoken highly of the Jews and Judaism, he pleaded for their emancipation in a pamphlet which was entitled "Ueber das Verhältniss Verschiedener Religionsparteien zum Staate und über die Emancipation der Juden" (1828). In 1830 a new constitution was proposed for Saxony, which contained the provision that "To every inhabitant of the kingdom are granted liberty of conscience and protection in the exercise of his religious duties." But in another paragraph this liberty was restricted to Christians, it being stated that "diversity of the Christian denominations shall be no impediment to the enjoyment of civil and political rights." Krug protested against this flagrant contradiction, and in the pamphlet "Die Politik der Christen und die Politik der Juden in Mehr als Tausendjährigem Kampfe" (Leipsic, 1832) he refuted all objections to the emancipation of the Jews, and proposed the abolition of all missionary institutions for their conversion.

Upon Krug's initiative Bernhard Beer addressed (1833) to the Diet of Saxony a petition which Krug, as a member of the Upper House, presented and warmly advocated. In spite of all opposition, he submitted to the Diet a regulation for granting equal rights to all religions, and published it in a pamphlet entitled "Henotikon: Oder Entwurf eines Neuen Religionsgesetzes für Christliche Staaten; Nebst einer Petition an die Königliche Ständeversammlung" (*ib.* 1836). The proposition was, however, rejected. Krug then wrote "Kritische Gesch. Oeffentlicher Verhandlungen über die Bürgerliche Gleichstellung Aller Religionsparteien in Christlichen Staaten" (*ib.* 1837), in which he held out to the Jews hope for the final victory of the cause of justice and humanity, and in which he called upon King Frederick August to glorify his government by uniting all his subjects under the banner of freedom and equality. The pamphlet "Friedenswort an Alle Religionsparteien" was the last public utterance of this champion of the freedom of faith and conscience.

D. S. MAN.

KRUMENAU, S. See OPPENHEIM, SIMON B. JACOB.

KRYSA, JUDAH LÖB BEN NATHAN: Frankist leader; lived in Galicia in the eighteenth century. He filled the office of rabbi at Nadworna, Galicia, but joined the Frankist movement as soon as it arose and became the leader of the sect. Sent as the representative of the Frankists to a religious controversy with the Talmudists, Krysa made (May 25, 1759), in the name of the sect, a Christian (Roman) confession of faith. He declared that the cross symbolized the "holy trinity" spoken of in the Zohar, and the seal of the Messiah. In his hatred of the Talmudists he asserted before the ecclesiastical dignitaries that the Talmud prescribes the use of Christian blood. Like his master Jacob Frank and most of the Frankists, Krysa embraced Christianity (1759).

K. I. BR.

KUBA: Chief town of the district of Kuba, government of Baku, Transcaucasia, having (1897) a total population of 15,346, in which were about 7,000 Jews, mostly Caucasian, or, as they are called there, "Mountain Jews." The latter occupy a separate suburb near the River Kubinka. There is a striking difference between them and their European coreligionists. They dress like the Caucasian Mohammedans in "peshmets" (short, quilted Tatar coats), and wear high astrakhan caps ("papakh"); the women wear wide trousers. The Kuban Jews call themselves by the names of their fathers, adding the word "ogly" (son); *e.g.*, "Abraham Isaac Ogly," means Abraham son of Isaac. Their names are Biblical, but are wofully mispronounced. Among themselves they use the Tat language, but with the natives they converse in Tatar. The use of liquor is common among them, even among the women.

The Jews of Kuba live in small earthen huts ("saklya"), often as many as ten to fifteen persons occupying a hut which gets its sole light from a small window in the roof. They have hardly any furniture, as, like the Mohammedans, they eat and sleep on the floor. They are engaged mostly in agriculture and commerce, especially in the export of carpets to Constantinople. While the merchant class is wealthy, the rest of the population is quite poor; and the average Mountain Jew will work as a laborer at 20 to 30 copecks a day. In religious matters they are very fanatical; and any one who does not comply strictly with all the laws is accused of apostasy. Polygamy is not prohibited. In writing they use the Rashi script.

H. R. M. R.

KUENEN, ABRAHAM: Dutch Christian Old Testament scholar; born in Haarlem, North Holland, Sept. 16, 1828; died in Leyden Dec. 10, 1891. He was educated at Leyden (1846–51), where in 1852 he was appointed assistant professor, and in 1855 professor, in the theological faculty; and there he remained until his death.

He was one of the leaders of the modern school of Old Testament critics. His chief work is an introduction to the Old Testament ("Historisch-Kritisch Onderzoek," etc., 3 vols. 1861–63; of the second edition, 1885 *et seq.*, the third part was left unfinished at his death). There is an English translation of the first part ("The Hexateuch," by P. H. Wicksteed, 1886), and a German translation of the whole ("Historisch-Kritische Einleitung," etc., by Th. Weber and C. Th. Müller, 1886 *et seq.*).

The most important critical problems are discussed with masterly method in many articles, especially in the "Theologisch Tijdschrift" (1867 *et seq.*), of which Kuenen was one of the editors.

Special mention is appropriate here of his investigations of the membership of the Sanhedrin (1866), the men of the Great Synagogue (1876), and the genealogy of the Masoretic text (1873), published in the transactions of the Amsterdam Academy of Sciences ("Verslagen en Mededeelingen"). These, with a number of the articles in periodicals, may be found in a German translation by Budde in "Gesammelte Abhandlungen zur Biblischen Wissenschaft von Dr. A. Kuenen" (1894).

His "Religion of Israel."

The first noteworthy attempt to construe the history of the Hebrew religion from the premises of the new critical school was Kuenen's "Godsdienst van Israël," 2 vols. 1869–1870 (English transl., "The Religion of Israel to the Fall of the Jewish State," 3 vols., 1874–75). In this work Kuenen accepted the opinion, which Graf had revived in 1866, that the ceremonial law is the latest part of the Hebrew legislation. He made Graf's theory consequent by including with the Law the cognate histories in the Hexateuch; and discovered in Neh. viii.–x. a counterpart to II Kings xxii.–xxiii., narrating the introduction of the priestly laws by Ezra. The chief significance of his "National Religions and Universal Religions" (Hibbert Lectures for 1882) also lies in the chapters on Judaism, and on Christianity in its relations to Judaism. "De Profeten," 1875 (English transl., "The Prophets and Prophecy in Israel," 1877), is rather a refutation of dogmatic supernaturalism than a complete study of the phenomena of prophecy.

From 1885 until his death Kuenen presided over a group of scholars engaged in a new translation of the Old Testament, with introductions and notes, which was published in 1899 ("Het Oude Testament," etc., 2 vols.).

A complete list, by Van Manen, of Kuenen's writings will be found in "J. Q. R." 1892, iv. 471–489, and, revised, in the "Gesammelte Abhandlungen zur Bibl. Wissenschaft," pp. 501–511.

T. G. F. M.

KUFAH, AL-: Ruined city of Asiatic Turkey, 88 miles south of Bagdad, situated on an affluent of the Euphrates; founded by Omar on the ruins of Ctesiphon in 639. A strip of land near it was given by him to the Jewish exiles from Arabia. An important Jewish community existed at Al-Kufah from the time of the unfortunate Calif 'Ali, with whom the Jews sided in his struggle against Mu'awiyah. Benjamin of Tudela visited the place at the end of the twelfth century, and found there 7,000 Jews. Tradition made the site of Al-Kufah the burial-place of King Jeconiah; and at the time of Benjamin of Tudela the supposed sepulcher was still in existence. It consisted of a large building in front of which was a synagogue.

KUH, DAVID: Austrian journalist and deputy; born in Prague 1818; died Jan. 26, 1879. He gave up the study of medicine and law, which he had been pursuing in Vienna, and became first a teacher, then an actor, and finally a publicist in Pest. He was an enthusiastic follower of Louis Kossuth during the Hungarian war of independence, and was punished with imprisonment for participation in the revolt. When liberated, in 1850, he returned to Prague, and founded a German political journal. He was an adherent of the Germans during the struggle between them and the Czechs, and received a mandate as deputy to the Reichstag, which, however, he soon gave up.

Bibliography: *Neue Freie Presse*, Jan. 27, 1879.

S. M. K.

KUH, EMIL: Austrian poet and novelist; born Dec. 13, 1828, at Vienna; died Dec. 30, 1876, at Meran; studied philosophy and history at the University of Vienna. In 1847 he took temporary charge of his father's business, and for a few years afterward was employed by the Nordbahn (Northern R. R.), resigning to devote himself to literature. During a short stay in Berlin he became a Roman Catholic (1857), and in 1858 took up his residence in Vienna, where he was well known as a writer and critic for the leading papers of the Austrian empire.

In 1864 Kuh was appointed professor of German language and literature at the Vienna Commercial College (Handelsschule), but was compelled by ill health to resign after a few years and retire to Meran. He published the following works: "Friedrich Hebbel"(Vienna, 1854); "Drei Erzählungen" (Troppau, 1857); "Gedichte" (Brunswick, 1858); "Dichterbuch aus Oesterreich" (Vienna, 1863); "Ueber Neuere Lyrik" (*ib.* 1865); "Adalbert Stifter" (*ib.* 1868); "Zwei Dichter Oesterreichs" (Budapest, 1872); "Biographie Friedrich Hebbel's" (Vienna, 1877). Together with G. Glaser he published the "Gesammelte Werke von Friedrich Hebbel" (Hamburg, 1864–68), and with F. Pachler the "Nachlass" of Friedrich Halm (Vienna, 1872). The "Wiener Jahrbuch für Israeliten" contains some of his poems. Kuh's correspondence with Theodor Storm was published by his son Paul Kuh in vol. 67 of "Westermann's Monatshefte" (1889–90).

Bibliography: *Meyers Konversations-Lexikon.*

S. M. K.

KUH, EPHRAIM MOSES: German poet; born 1731 in Breslau; died there April 3, 1790. His parents had chosen for him the career of a student of the Talmud; but his faith had been shaken by the influence of a skeptic teacher, and he preferred to enter his father's business. In spending all his spare time in reading and studying, he acquired a substantial knowledge of Latin and modern languages and a general education quite unusual among the Jews of his time. After the death of his father (1755) he at first associated himself with his brothers in business; but in 1763 he accepted a position with his uncle Veitel Ephraim, the well-known medalist and jeweler to Frederick the Great, and became intimately connected with Moses Mendelssohn and his friends. But in spite of his considerable fortune he soon got into financial difficulties, due largely to indiscriminate charities and to his somewhat irregular mode of living. In 1768 he surrendered his position with his uncle, and with the remainder of his money began to travel, taking with him his library, from which he would not separate himself. He wandered through Holland, France, Switzerland, and some parts of Germany, where he often was deeply humiliated by the imposition of the "Leibzoll" (personal tax).

These travels completed the ruin of his fortune as well as of his health. In Saxe-Coburg-Gotha he was fined heavily for evading the toll, and had to sell his clothing in order to get to Breslau. There his brothers took care of him and endeavored to let him lead a quiet life; but the misfortunes of his career darkened his mind and caused him to isolate himself. Soon his melancholy turned into a madness that lasted for six years, though with brief intervals of sanity in which he wrote some of his best poems. After having recovered, he devoted himself wholly to poetry, till in 1786 he was stricken with apoplexy and remained robbed of all power of movement, and almost of speech, until his death.

In his poems Kuh vividly expresses his patriotism and his reverence for Frederick the Great; but he expresses also resentment at the bad treatment of Jews in Germany and scorn at his own and others' failures and weaknesses. His poems were greatly esteemed by Mendelssohn and other contemporaries. The German poet and critic Ramler revised them and published a selection in German periodicals; but the greater part of Kuh's poems, revised by Ramler, were not published until after the poet's death, and then by the Christian physician Kausch. Critics prefer among his poems the short witty epigrams, often full of biting satire and irony. Gervinus calls his Anacreontic verse "superior to similar poems by Gleim." Kuh was the first German Jew of modern times who won recognition as a poet. Berthold Auerbach made him the hero of a novel entitled "Dichter und Kaufmann" (Stuttgart, 1839).

D. A. FE.

KUHN, ABRAHAM: German physician; born at Bissersheim, Alsace, Jan. 28, 1838; died at Strasburg Sept. 15, 1900. Kuhn was educated at the universities of Giessen, Prague, Vienna, Munich, and Würzburg (M.D. 1863). He then went to Strasburg; in 1865 he took a medical diploma there also, and thereupon became lecturer. In 1873, on the opening of the German university at Strasburg, he was appointed assistant professor and chief of the polyclinic for diseases of the throat and nose. As a specialist in these diseases Kuhn has contributed many essays to the medical journals of France and Germany. He translated Troeltsch's "Lehrbuch der Ohrenheilkunde" into French (Paris and Strasburg, 1870), and wrote: "Histologie des Häutigen Labyrinthes der Knochenfische," Leipsic, 1878; "Histologie . . . der Amphibien," *ib.* 1880; "Histologie . . . der Reptilien," *ib.* 1880; "Histologie . . . der Vögel," *ib.* 1884.

BIBLIOGRAPHY: Pagel, *Biog. Lex.*

S. F. T. H.

KUHN, MORIZ: Austrian physicist; born in Brünn, Moravia, Jan. 11, 1843; educated at the Polytechnic high school there, and later at the University of Vienna. He entered the service of the state in 1865. In 1867 he was appointed an assistant in the Institute of Meteorology and Terrestrial Magnetism, and in Oct., 1868, to a like position in the Polytechnic Institute at Vienna, where he remained for more than two years until appointed (1870) professor of mathematics and physics at the K. K. Staats-Ober-Realschule in the seventh district of Vienna.

Kuhn was editor of "Die Realschule" from 1872 to 1877, and from 1877 to 1889 of the "Zeitschrift für das Realschulwesen." He is the author of the following works: "Ueber die Lichtenberg'schen Figuren," Vienna, 1873; "Ueber Beziehungen Zwischen Druck, Volumen und Temperatur bei Gasen," *ib.* 1875; "Einiges über die Entwicklung der Kegelschnittslinien aus Zwei Gegebenen Kreisen," 1868.

S. E. J.

KULISHER, MIKHAIL IGNATYEVICH: Russian lawyer and author; born July 7, 1847, in a Jewish agricultural colony near the village of Sophiefka, district of Lutsk. At the age of ten he entered the rabbinical school of Jitomir. Afterward he entered the classical gymnasium in Kamenetz-Podolsk, but had to leave the institution on account of ill health. Later he went up for his final examinations at the gymnasium of Jitomir, and entered the law school of the University of Kiev. At the end of two years he was transferred to the University of Odessa. In 1871 he removed to St. Petersburg, passed his final examinations at the university of that city in 1872, and soon after received an appointment as assistant district attorney. He, however, devoted but little time to his legal practise, and in 1875 went to Vienna and later to Berlin.

Early Writings.

Kulisher's first printed article was a contribution on the status of the Rabbis, published in 1866 in the then recently established periodical "Glasny Sud." While a student at the University of Odessa, Kulisher had edited the "Weekly Chronicle" column in "Dyen," and had published in the same paper a series of biographies of prominent Jewish men like Lasker and Jacobi; also some critical notes, among them those on Bogrov's "Zapiski Yevreya," for which he was later bitterly attacked by that author. From Odessa he had also written several letters for the "Sanktpeterburgskiya Vyedomosti" on the anti-Jewish riots in Odessa in 1871, and somewhat later he wrote three letters for the "Vyedomosti" on the causes of these riots. In 1876 he wrote a book entitled "Das Leben Jesu, eine Sage" (Leipsic, 1876). In that year there appeared in the "Zeitschrift für Ethnologie" his first article on ethnography, entitled "Die Geschlechtliche Zuchtwahl in der Urzeit." During the same year he contributed to "Novoye Vremya" articles on foreign political questions, and wrote also a historical sketch of the Balkan Slavs. During 1877–78 he contributed from abroad a series of articles on ethnography to the "Zeitschrift für Ethnologie," "Archiv für Anthropologie," "Zeitschrift für Völkerpsychologie und Sprachwissenschaft," "Kosmos," and "Globus." These essays dealt with the history of the human family in its relation to political constitution, private ownership, and commerce.

From 1878 Kulisher contributed to "Slovo," "Russkaya Pravda," "Otechestvennyya Zapiski," and to "Razsvyet" when the publication of the last-named was resumed. He continued to write the leading articles for this publication until 1880, and then became editor of "Pravda." This periodical was discontinued in October of the same year by order of Governor-General Drenteln of Odessa.

As Editor of the "Zarya."

Soon afterward Kulisher was offered, by a circle of philanthropists who established the paper, the editorship of the "Zarya." The purpose of this publication was to champion the cause of the persecuted peoples—the Poles, Ukrainians, and Jews—against the attacks of the anti-Semitic Russian daily the "Kievlyanin," published by Pikhno. Accepting the offer, Kulisher became the active editor, and, in time, the owner, of the "Zarya." The official editor, Andreyevski, who had originally received permission to publish the paper, was retained as nominal editor. In 1886 the department of printing refused to recognize Kulisher as the actual editor, and Andreyevski availed himself of this opportunity to claim the ownership of the paper.

Beginning with 1880 Kulisher published articles on ethnography and the history of civilization in "Vyestnik Yevropy," in the "Zeitschrift für Ethnologie," and in "Ausland."

In 1887 Kulisher published in book form a considerable number of his articles under the title "Ocherki Sravnitelnoi Etnografii i Kultury," and wrote two articles on the history of artisan gilds for "Russkaya Mysl," and two for "Vyestnik Yevropy." In the same year and in 1888 he wrote constantly for the "Novosti," "Nedyelnaya Khronika Voskhoda," "Voskhod," and "Russkaya Mysl." In 1884 he was a delegate to the congress of archeologists in Odessa, and in 1895 delegate to the congress of anthropologists in Carlsruhe.

Since 1888 Kulisher has been devoting himself to his legal practise in St. Petersburg. He has published in the "Voskhod" a series of sketches on the history of the Jews in Russia and in other countries, among them one on the Jews of America based mainly on the data taken from the first volume of the Jewish Encyclopedia; several articles on legal matters in the "Zhurnal Ministerstva Yustitzii," "Pravo," "Russkoye Bogatstvo," and "Novosti"; and a pamphlet, "Razvod i Polozheniye Zhenschin" (St. Petersuburg, 1896), on divorce and the present condition of woman.

Kulisher is a member of the committee of the Association for the Propagation of Culture among the Jews of Russia, and of the central committee of the Jewish Colonization Association.

H. R. D. G.

KULISHER, REUBEN MOISEIYEVICH: Russian physician and educator; born at Dubno 1828; died at Kiev Aug. 9, 1896; educated at the local district school, at the classical gymnasium of Jitomir (graduated with gold medal in 1848), and at the medico-chirurgical academy of St. Petersburg (graduated in 1856). He was attached to the army, at that time in the field, being one of three Jews then appointed military surgeons. After the Crimean war he was appointed junior attending physician at the military hospital of Lutsk, and was assigned to duty at Kiev hospital in 1860. From 1869 to 1876 he undertook a number of commissions of a scientific nature for the government. During his studies abroad Kulisher worked in the laboratories of the most prominent French and German investigators, devoting himself mainly to the study of hygiene and military sanitation. He was also a contributor to a number of scientific works and editor of translations of classical works on medicine.

Kulisher has done much toward improving the education of the Russian Jews. About the middle of the nineteenth century he came forward as the champion of systematic education for the Jewish masses, thereby making many enemies among his Orthodox coreligionists. He wrote on the Jewish question; also on the Russian translation of the Old Testament, in "Yevreiskaya Biblioteka," 1871, vol. i.; "I. Shigarin i Yevo Otnosheniya," etc. (Kiev, 1880); besides articles in "Voskhod," 1891, 1892, 1894.

H. R. J. G. L.

KULKA, ADOLF: Austrian journalist; born Oct. 5, 1823, in Leipnik, Moravia; died in Vienna Dec. 5, 1898. He studied philosophy and jurisprudence in Prague and Vienna, and began at that time to publish political treatises and small works of fiction in local periodicals. Having taken an active part in the agitation of 1848, Kulka had the distinction of being the first author whose poems were printed without being censored. In 1854 Ignaz Kuranda engaged him for the "Ostdeutsche Post," for which he wrote political editorials till 1857. Later in conjunction with Ignaz Pisko he founded the juridical journal "Gerichtshalle," and conducted it for more than forty years. When the "Wiener Allgemeine Zeitung" was established, Kulka became a member of its editorial staff, in which capacity he acted for ten years. Amid his journalistic work he found leisure to contribute essays, tales, and poems to various periodicals. Conspicuous among these is a collection of poems entitled "Chanuca-Lichter," translated in parts into several languages.

S. B. B.

KULKE, EDUARD: Austrian author; born at Kostel, near Nikolsburg, Moravia, May 28, 1831; died in Vienna March 20, 1897; educated at the polytechnic institutes of Vienna and Prague. After following for several years the profession of teacher he settled in Vienna and devoted himself entirely to literature. He soon attracted attention by his tales derived from the life of the Moravian ghetto, which placed him as a ghetto-writer next to Leopold Kompert. Among his works may be mentioned: "Aus dem Jüdischen Volksleben" (Hamburg, 1871); "Geschichten" (Leipsic, 1869); and "Der Kunstenmacher," the last-named published also in Paul Heyse's "Novellenschatz." Kulke was an intimate friend of Friedrich Hebbel, whose memoirs he published under the title "Erinnerungen an Friedrich Hebbel" (Vienna, 1878).

As a musical writer Kulke contributed notices to the "Fremdenblatt" (Vienna) and "Vaterland" (Vienna), in which he with great ardor advocated the Wagnerian cult. Among his essays on this subject are: "Richard Wagner," Prague, 1883; "Die Umbildung der Melodie," *ib.* 1884; and "Richard Wagner und Friedrich Nietzsche," Leipsic, 1890. Subsequently he changed his views and separated from Wagnerianism.

The most important of Kulke's esthetico-philosophical essays is "Zur Entwickelungsgeschichte der Meinungen," Leipsic, 1891. Of his numerous other works, the more widely known are: "Don Perez," tragedy (Vienna, 1873); "Korah," Biblical tragedy (Leipsic, 1873); "Der Gefiederte Dieb," comedy (Vienna, 1876); and "Der Glasscherbentanz" (1881). He was also a diligent contributor to Jewish periodicals.

ḲUMISI, DANIEL AL-. See DANIEL BEN MOSES AL-ḲUMISI.

KUNA: Polish name for the pillory, the well-known implement of torture and punishment, used by the Polish and Lithuanian Jews of the eighteenth century, who seem to have adopted it from their Christian neighbors, to punish those who sinned against religion or against the interests of the community. Generally the kuna did not differ much from the pillory used in most other European countries; but in some places it was a chain to which the offender was fastened. The kuna was placed in a corner of the office of the ḳahal, which was usually connected with the synagogue. The offender was placed in the kuna shortly before the morning or the evening service; and each worshiper had the right, and even considered it a duty, to spit in the culprit's face, and to beat and otherwise insult him.

The date of the introduction of the kuna into the Jewish communities is not known. Höschel Lewin, in his "'Aliyyat Eliyahu," a biography of Elijah of Wilna (pp. 47–50, Wilna, 1855), relates that in 1770 a freethinker was punished by the elders of the ḳahal in Wilna. It was probably ABBA GLUSK (see GLUSKER MAGGID), who had made deprecating remarks before the gaon of Wilna about the Passover Haggadah. The culprit was arrested the same day; he received forty lashes; and was then put in the kuna. After suffering the usual insults the unfortunate man was led out of town and ordered not to return.

In 1772 Elijah expressed to the elders of the ḳahal his wish to punish Issar, the "Ḥasidic heretic," the "priest of Baal," by putting him in the kuna; but they found it inconvenient to comply with his request. Issar received only the usual "malḳut" (lashes); but on the following day the great excommunication ("ḥerem") was pronounced against him and his companions. In 1782 the elders of the ḳahal of Minsk, having been accused by some Jewish artisans of oppressing the Jewish people and of misusing the public money, punished the leaders of the malcontents by putting them in the kuna.

KUNITZER, MOSES BEN MENAHEM: Rabbi in Ofen and dayyan in Budapest; born at Alt-Ofen; died Feb. 2, 1837. A descendant of Rabbi Löwe ben Bezaleel, he was one of the pioneers of enlightenment in Hungary. His works include: "Bet Rabbi" (Vienna, 1805), *i.e.*, a biography of Judah ha-Nasi, part of which was included in Schmid's Mishnah edition in 1815; "Ben Yoḥai," a defense of the genuineness of the Zohar (*ib.* 1815); "Ha-Maẓref," a Hebrew letter-writer (vol. i., Prague, 1820; vol. ii., Vienna, 1857). His responsum in "Nogah ha-Ẓedeḳ" (Dessau, 1818), in which he permits the introduction of the organ into the synagogue, created a great stir. A part of his manuscript is to be found in the library of the rabbinical seminary at Budapest.

S. A. Bü.

KUNOS, IGNATZ: Hungarian authority on Turkish; born Sept. 20, 1861, at Sámson, Hungary. He attended the gymnasium at Debreczin and the University of Budapest, where he studied linguistics. On receiving his Ph.D. degree he went to the East on a scholarship granted by the Jewish community of Budapest and the Hungarian Academy of Sciences, and traveled through European Turkey, Asia Minor, Syria, Palestine, and Egypt, studying the various Turkish dialects and collecting Turkish popular poetry. The results of these studies were published by the Hungarian Academy in the following works: "Három Karagöz Játék" (1885), "Oszman Népköltési Gyüjtemény" (2 vols., 1887–1889), "Orta-Ojunu" (1889), "Török Nepmesék" (1889), "Anatoliai Képek" (1891), "Köroglu" (1894). On his return (1891) he was appointed lecturer of the Turkish language and literature at the University of Budapest, and professor of Turkish in the Oriental School of Commerce in that city, becoming director of the last-named institution in 1893.

Kunos is the only Jew in Hungary who is director of a state institution of learning. He is also a member of the State School Board of Business Colleges, corresponding member of the Hungarian Academy of Sciences (since 1893), and of the Société Asiatique of Paris (1889). Together with Bernhard Munkácsi he is editor of the "Keleti Szemlé," the only existing periodical for the Ural-Altaic languages. He has been decorated with two high Turkish orders.

S. L. V.

KUPERNIK, ABRAHAM (AVRAAM ARONOVICH): Russian communal worker; born at Wilna 1821; died at Dembitza 1893, on his homeward journey from abroad; buried in Ḳiev. He studied Talmud at the Volozhin yeshibah and acquired a fair secular education. In 1851 he became manager under Yosel Ginsburg of the liquor monopoly in the government of Grodno, and in 1861 he served in a similar capacity in the government of Kiev.

Kupernik was prominent in the affairs of the Jewish community and did much toward the establishment of hospitals and other charitable and educational institutions. He was president of the Jewish hospital.

For his services as one of the board of directors of the prison Kupernik was decorated with the Order of St. Stanislas. He was also a member of the Red Cross Society and president of the city charities of Kiev (1882). In 1882 he was created honorary and hereditary citizen of the empire. He also received (1888) the gold medal of the Vladimir Order for his services as president of the board of directors of the government bank of Kiev.

As a writer Kupernik is known for his articles in the Hebrew periodicals, and also for a little volume published in 1891 under the title of "Ḳorot ha-Yehudim be-Kiyov," which is, however, not a history, but only a copy of the pinḳes of Kiev.

Kupernik's son **Liov** is one of the most prominent lawyers of South Russia. He ably defended the cause of the Jews in Kiev and Balta during the proceedings following the riots in 1881.

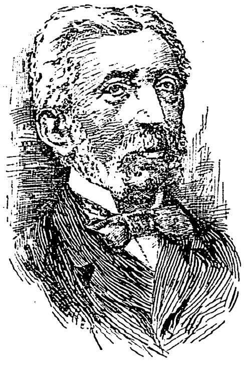
ḲUPPAH. See Charity.

KURANDA, IGNAZ: Austrian deputy and political writer; born in Prague May 1, 1812; died in Vienna April 3, 1884. His grandfather and father were dealers in second-hand books. In 1834 he went to Vienna, where he devoted himself to literary work, and wrote the drama "Die Letzte Weisse Rose," which was played first in Stuttgart and later in Carlsruhe and Frankfort-on-the-Main, and won great popularity. In 1838 Kuranda went to Stuttgart, where he became acquainted with David Strauss, the author of "Das Leben Jesu," with Uhland, and with other Swabian poets. Here, too, for the first time he came in touch with public political life. He then went to Paris and Brussels. In the latter city he attracted attention through lectures on modern German literature. With the assistance of Minister Nothomb and the author Hendrik Conscience he in 1841 founded the periodical "Die Grenzboten"; but on account of the obstacles which the Prussian government placed in the way of its circulation in Germany Kuranda removed the headquarters of the paper to Leipsic, where it soon became an important factor in Austrian politics. That which no one dared write in Austria was published in "Die Grenzboten." Kuranda's work "Belgien Seit Seiner Revolution" appeared in Leipsic in 1846.



Ignaz Kuranda.

Establishes "Die Grenzboten."

After the outbreak of the movement of 1848 Kuranda went to Vienna, where he was enthusiastically received in literary circles. From Vienna he was delegated to the Fünfziger Ausschuss in Frankfort-on-the-Main, and later he was returned to the German parliament as delegate for Teplitz. Kuranda did not remain long in the Frankfort parliament. In the summer of 1848 he returned to Vienna and established the "Ostdeutsche Post," which first appeared on Oct. 1, and in which he strove to oppose the revolutionary element. After the promulgation of the constitution (the "Octroirte Verfassung"), which had been forced upon the people, Kuranda had to give up his position as editor of the "Ostdeutsche Post." He was placed under police surveillance because he refused to sign an engagement not to write upon politics, and some time elapsed before he could again publish the periodical, which he made the organ of the so-called "Grossdeutsche" liberal party in Austria, and in which he pleaded for the restoration of constitutional conditions.

Kuranda may be regarded as one of the founders of liberal press conditions in Austria. Memorable is his lawsuit with Sebastian Brunner, a Catholic priest and editor of the "Kirchenzeitung," which case was tried on May 10, 1860. Kuranda had pointed out in the "Oesterreichische Post" that Brunner collected material for his accusations against the Jews "from very unclean and suspicious sources, whereby he spread untruthfulness and slander." Brunner pressed a charge of calumny against Kuranda, who, through his able defense, and after a masterful pleading by Johann Nepomuk Berger, was acquitted in terms which implied a condemnation of Brunner's anti-Jewish campaign.

In 1866 Kuranda discontinued the publication of his paper, and devoted all his energies to politics. He fought the absolutist October policy, and assisted, as friend and confidant, the Austrian secretary of state, Schmerling, in drafting the February constitution.

On March 20, 1861, Kuranda was sent to the Landtag of Lower Austria as delegate for the district of Vienna, and was subsequently elected to the Reichsrath, retaining his seat in that body for twenty years. On the creation of the Delegations (a kind of common parliament of Hungary and Austria with alternative seats at Budapest and Vienna) he was returned as a member of that body. One of the most distinguished members of parliament, Kuranda was a brilliant orator, and spoke mostly on questions of foreign politics. He was also for many years a member of the city council of Vienna.

In Parliament.

In 1881 Kuranda's seventieth birthday was celebrated with great enthusiasm by his political party and by the press; and the city council made him an honorary citizen. The emperor had already in 1867 honored him with the "Ritterkreuz des Leopoldordens." Kuranda's great activity as a politician and publicist, which he exercised for twenty-three years as the leader of the German liberal party, was paralleled by his faithful devotion to the Jewish cause, to which he gave a great part of his powers.

He was for twelve years president of the Jewish community of Vienna. As vice-president of the Israelitische Allianz zu Wien he promoted the study of Jewish science and history, in which he took great interest.

KURBSKI, PRINCE. See Russia.

KURDISTAN: A country of western Asia, partly under Turkish and partly under Persian rule, although the Kurds pay but little attention to either government. They derive their income from agriculture and cattle-raising, and a goodly share of it from robbery. The Jewish population of Kurdistan is estimated to be from 12,000 to 18,000, scattered in numerous villages, and living in groups of from five to ten houses, or of twenty at most. These communities do not, as a rule, possess a synagogue, but hold services in some house owned by one of their number.

The Jews of Kurdistan have no written record of their first arrival in the country; but they believe that the earliest settlers came in the time of Ezra. The immigration of Jews into Kurdistan in early times may be assumed from the fact that their speech differs but little from the modern Syriac dialect of the Nestorian Christians who are scattered throughout Kurdistan. Moreover, this speech has idiomatic expressions similar to those occurring in the Babylonian Talmud, in the Aramaic translations of the Bible, and in the few Pahlavi inscriptions on monuments and those on the coins of the Sassanid monarchs who ruled in Persia from 266 to 640.

Kurds and Turks.

Since the Kurd clans among which the Jews are very sparsely scattered were until quite recently constantly at war with one another, it must be assumed that the Jews suffered considerably from this cause, and that thereby their numbers were greatly reduced. Local records show this to have been the case. In Berdug there are several thousand ancient graves which have partly been demolished; and it is believed that this graveyard belonged to the Jews. Among the graves is that of Rabbi Abraham, which is regarded as sacred and attracts annually many Jewish pilgrims. It is venerated also by the Kurds; and several miracle stories are connected with it. With the subjection of the Kurds by the Turks the internecine struggles have largely ceased; but the Turks have introduced little civilization, and the struggles are apt to be renewed. The Kurds still lead a seminomadic existence. In the spring the shepherds and herdsmen leave their houses, and, carrying their tents of goat-hair with them, drive their flocks and herds from place to place, often causing, in this way, collisions between neighboring tribes. In earlier times the Jews, also, possessed such tents; but those days of affluence and independence have long passed away.

The Jews and the Mohammedans live, as a rule, on more friendly terms than do the Jews and the Armenians and Nestorians. The belief that the Jews use Christian blood at Passover sustains between the Jew and Christian a deep-seated enmity. Like the other inhabitants of the country, the Jews suffer much from the arbitrary acts of the police. The Jews are placed under the authority of the chief of police of the village in many instances, and have to bear much from the petty police officers. Jewish converts to Mohammedanism are even worse than the native Mohammedans in their hatred of the Jews; and in their zeal they are eager to make reports to the police. This renders the position of the Kurdistan Jews a very unenviable one.

Much effective work in ameliorating the condition of the Kurdistan Jews has been done by the Alliance Israélite Universelle, an important feature being the foundation of schools for Jewish children. Hitherto the latter have had but little opportunity to study their religion or their history, since the rabbis have been so actively engaged in extracting the sinews from meat, in circumcising children (in Mohammedan houses also), and in making amulets, that they have had no time left for religious teaching. Where instruction was given at all, the boys were sent to school at the age of six or seven and remained there until they were thirteen or fourteen. The instruction consisted of writing, reading, and the study of the Scriptures, and at times Mishnah, arithmetical problems being solved by a computing instrument called "taspe." The religious instruction of the girls does not go beyond the "Shema‘"; they are taught nothing else but household duties.

Customs.

The family life is rather primitive. The men marry at seventeen or even earlier; the girls, at thirteen or fourteen. The father of the bridegroom furnishes the bride with her dowry, and the bride, when she has money, brings to her husband 100 toman (1 toman = about $2.25). Monogamy is the rule; but exceptions occur, as, for instance, when the marriage is childless or when the levirate comes into effect. The women are dependent and superstitious. Men and women carry charmed writings as preventives against disease and the evil eye. These amulets contain the name of God in cabalistic formulas, which are usually taken from a well-known mystical book called "Sefer Raziel." Even the Kurds at times apply to Jewish writers for amulets. In such cases the latter are careful not to insert therein the name of God. The preparation of amulets was introduced by Jews from Jerusalem who visited Kurdistan in the course of their collecting tours.

In general the Jews of Kurdistan earn their livelihood by keeping stores or by acting as agents in the export trade. The children peddle tobacco, fruit, matches, and other small articles. Many of the men go into the villages and trade with the natives in natural products, such as grain, cheese, wool, honey, wax, gall-apples, grapes, etc. These products are either sold in the towns or are exported to Russia. Jews in better circumstances have stores in the bazaars of the different cities, where they trade from Sunday until Friday. Not infrequently the poorer Jews represent themselves as doctors, or become venders of drugs without knowing anything of medicine. The Jewish merchants are often waylaid and robbed. In order to escape imprisonment for not paying for merchandise supplied to them on credit, they at times abandon their families, leaving them in misery. In many instances the women thus abandoned are compelled to sell themselves in order to obtain food for their families. The rabbis, being ignorant and poor, have but little influence, and can not correct the existing evils.

In villages where a number of Jews live together they form a community and engage a dayyan, and a shoḥeṭ who also acts as mohel. The head of the community with the advice of the most prominent members determines the taxes to be paid to the government. The burial of the dead is usually conducted three or four hours after death by the "ḥebra ḳaddisha." During the week of mourning the mourners are visited by their neighbors, who bring food with them and share it with the bereaved. Quarrels and difficulties are adjusted by the rabbi, who calls a bet din. When Jews have differences with Christians or with Mohammedans they submit them to the local Mohammedan chief. Bribery often influences his decision. The higher magistrate is a Turk, who lives in Bashkala and receives his uncertain salary from Constantinople. He presides over a local court composed of ten Mohammedans, one Armenian priest, and one Jew.

The following is a list of the Jewish communities of Kurdistan (1881):

Amidyah: About 50 families.

Bajerga: 40 to 50 families. Formerly there was a large Jewish community here, whose members dealt in salt and other articles, but being forbidden to trade were obliged to leave the place. The few remaining are poor.

Bashkala: 140 families.

Bitanura: 40 to 50 families. There is in the neighborhood a large cave which is supposed to contain the grave of the prophet Elijah. Israelites from other districts make pilgrimages to it. A few of the Jewish inhabitants are in easy circumstances.

Daya: 250 families.

Deze: The seat of government; situated in a valley surrounded by fifty villages. There are from five to ten Jewish families in each village, their synagogue being at Deze, which has ten Jewish families. The Jews living in these villages use the Kurdish language, even in reading the Law.

Eshnu: 80 families. There is a synagogue containing five or six Torah-rolls. Jews possessing fifty dollars are considered rich.

Jezira: 80 families. Most of the men are cobblers.

Karada: 80 families. These are for the greater part farmers, and are well thought of by their neighbors. They all live in easy circumstances.

Maredin: 50 families.

Mia-vandan: About 100 families. This place is partly under Turkish rule and partly under the authority of the Shah of Persia.

Nakada: 60 families. Most of the Jews are linen-weavers and tailors.

Neri: 50 to 60 Jewish families. Both Jews and Armenians are much oppressed. The Jews are not allowed to blow the shofar in the city on Rosh ha-Shanah, but must go out into the field for that purpose. The sheiks of the place receive a portion of the booty secured by their subjects in their predatory expeditions.

Penjur: About 30 families, whose members are mostly cotton-spinners.

Rowandes: 50 to 60 families.

Sacho: 200 persons.

Seneh: An important commercial center. The Jewish community has two synagogues.

Suleimania: 180 families. The men are mostly pedlers, small traders, and tailors.

H. R. J. G. L.

KURLAND. See Courland.

KURREIN, ADOLF: Austrian rabbi; born Jan. 28, 1846, at Trebitsch, Moravia. He received his doctor's degree from the University of Vienna. He was rabbi of St. Pölten in 1872, of Linz from 1876 to 1882, of Bielitz from 1882 to 1888, and in the last-named year was called in the same capacity to Teplitz, where he is still active. Kurrein is a disciple of Adolf Jellinek. Besides several collections of sermons, entitled respectively "Maggid Mereshit" (1880); "Maggid le-Adam" (1882); "Patriarchenbilder: I., Abraham" (1893), he is the author of the following pamphlets: "Die Frau im Jüdischen Volke" (1885; 2d ed., Bilin, 1901); "Traum und Wahrheit," a biography of Joseph (1887); "Arbeit und Arbeiter" (1890); "Die Sociale Frage im Judentume" (1890); "Die Pflichten des Besitzes" (1892); "Der Friede" (1892); "Das Kaddisch" (1896); "Der Grabstein" (1897); "Judäa und Rom" (1898); "Bibel, Heidentum, und Heidenbekehrung" (1899; 2d. ed., 1901); "Brauchen die Juden Christenblut?" (1900); "Lichtstrahlen aus den Reden Jellinek's," prepared by him for Jellinek's seventieth birthday.

Kurrein edited the monthly "Jüdische Chronik" from 1894 to 1896 with S. Stern and I. Ziegler, and from 1897 to 1902 alone. During the last four years this periodical has advocated Zionism. S.

KUSEL, RUDOLPH: German jurist and politician; born May 9, 1809, in Carlsruhe; died there Jan. 26, 1890. He studied law in Heidelberg and Munich, and in 1832 was admitted to the bar in Baden. From 1834 he practised law at Rastatt, Bruchsal, and Carlsruhe, and was reputed one of the keenest of jurists. In 1849 he successfully defended the men charged with participation in the revolution at Baden. In 1859-87 he acted as attorney-general. After the abrogation of the Concordat in 1860 he was elected deputy from the city of Carlsruhe to the Second Chamber of the Landstände in Baden (1861), being the first Jew to be thus honored.

Kusel took a prominent part in the legislation concerning the emancipation of the Jews (1862), the new judicial constitution (1864), and schools (1867), and served on the more important committees of the House, particularly those pertaining to judiciary legislation. He belonged to the German National-Liberal party.

S. E. Schr.

KUSSIEL. See Jekuthiel.

KUSTENDIL: Bulgarian city in the north of Macedonia, near the Servian city of Nish. Jews must have settled at Kustendil before the beginning of the eighteenth century; a tombstone in the local cemetery bears the date 5509 (= 1749), and from 1680 to 1750 Samuel Haravon was chief rabbi. The rabbinical writer Mordecai Conforte, author of a collection of sermons, "Ḳol Shemu'el" (Salonica, 1787), lived here at the end of the eighteenth century. The following three chief rabbis of Kustendil belong to the nineteenth century: Baruch Halevy (1840); Abraham Meshullam (1850); and Abraham Meborak (1855).

In 1903 there were 250 Jewish families, or about 1,200 persons, in a total population of 13,000 inhabitants. The affairs of the community are administered by a synagogal committee and a school committee. Every family pays a stated sum each year, which, together with the tax on meat, serves to support the synagogue and a boys' school (150 pupils). The institutions include a synagogue, two batte midrashim, and six benevolent societies. The Jews are engaged in commerce, in the grocery trade, and as tinsmiths and shoemakers.

D. M. Fr.

KUTAIS: Russian city in the government of the same name; the scene of a trial for blood accusation in 1877. On April 16 of that year Sarra Modebadzé, a lame girl, six years old, of the village of Perevisi, visited the house of a neighbor, Pavel Tzkhodadzé, and did not return home. The child was last seen about three o'clock in the afternoon, and about the same hour seven Jews were seen on the Sadzaglikhevski road leading to Sachkheri. Two days later the dead body of the child was found, with no suspicious marks of violence upon it save two wounds on the hands, evidently made by the teeth of some animal. The body was quietly buried in the usual way.

The incident happened during the Jewish Passover, which fact suggested the guilt of the Jews. Four members of the Khundiashvili family—Iskhak Mordokhov, Bichia Shamuilov, Shamuel Aaronov, and Mordokh Iskhakov—and Iskhak, Mosha, and Yakov Tzveniashvili, all of the village of Sachkheri, were arrested on the charge of having kidnaped the girl and killed her. Mosha Yelov Tzotziashvili was accused of having brought the body of the murdered child from Sachkheri to the village of Dorbaidzé, where he left it, in order to divert attention from the alleged murderers; and Michael Abramov Yelikishvili, it was claimed, knew of the crime committed by his friends and relatives, but did not inform the authorities. Three autopsies proved that the child had been asphyxiated.

The trial began on March 5, 1879, in the Kutais district court, and on the 13th the defendants were acquitted. On an appeal to the supreme court the decision of the lower court was sustained. Both courts agreed with the defense that the child was killed by an accident. In 1895 Kutais had about 3,000 Jews in a total population of 26,000.

Bibliography: Stenographic report of the trial, by Mmes. Syerdukova and Umnova.

H. R. M. Z.

KUTNER, JOSHUA HÖSCHEL: Preacher at Lissa in the middle of the nineteenth century. He was the author of "Ha-Emunah weha-Ḥaḳirah" (Breslau, 1847), containing a philosophical development of the thirteen articles of belief of Maimonides, and extracts from the Haggadah and from the writings of the ancient philosophers. The work is divided into three parts: "Keter Malkut," on the first five articles of belief; "Shebeṭ Malkut," on prophecy, revelation, etc.; "Gedullat Malkut," on eschatology. Appended to it is an essay entitled "'Et La'asot," on the religious conditions prevalent in the author's day. Kutner was the author also of "Ha-Emunah weha-Biṭṭaḥon," on the precepts based upon the Decalogue (Breslau, 1853, with a German translation by Fürstenthal).

Bibliography: Steinschneider, *Cat. Bodl.* col. 1590; Fürst, *Bibl. Jud.* ii. 213.

K. I. Br.

KUTNER, ROBERT: German surgeon; born at Ueckermünde, Pomerania, April 11, 1867. Educated at Berlin, Kiel, Freiburg-im-Breisgau, Vienna, and Paris (M.D. 1891). In 1892 he traveled, and on his return settled in Berlin, where he is still practising as a specialist in diseases of the urinary system. In 1902 he received the title of professor.

Kutner is the author of: "Die Photographie Innerer Körperhöhlen, Insbesondere der Harnblase und des Magens," Berlin, 1891; "Die Handhabung und Praktische Bedeutung der Asepsis für die Behandlung der Harnleiden," *ib.* 1897; "Die Instrumentelle Behandlung der Harnleiden," *ib.* 1898; "Aerztliche Kriegswissenschaft," *ib.* 1900; "Gerichtliche Medizin," *ib.* 1903.

Associated with Von Bergmann and Kirschner, Kutner is editor (1904) of "Zeitschrift für Aerztliche Fortbildung."

Bibliography: Pagel, *Biog. Lex.*

S. F. T. H.

KUTTOWER, ABRAHAM GERSHON BEN EPHRAIM: Polish rabbi and cabalist; born at Kuty, Galicia; died at Jerusalem about 1760. He was a follower of Isaac Luria's system of practical Cabala, and spent most of his time in fasting. He was also a recognized authority in rabbinical matters, and Ezekiel Landau, who inserted a responsum of Kuttower's in his "Noda' bi-Yehudah," speaks of him in terms of high praise. His authority as a cabalist is invoked by Eybeschütz in his "Luḥot 'Edut."

Kuttower was at first rabbi at Brody, where Israel Ba'al Shem-Ṭob became his brother-in-law. Owing to Shem-Ṭob's pretense of being an ignorant man, he was treated harshly by Kuttower (see Ba'al Shem-Ṭob). Later, Kuttower went to Palestine, and in a letter of 1757 he declared that he had lived at Hebron for six years alone, then at Jerusalem for four years with his family (Luncz, "Jerusalem," ii. 152 *et seq.*). There is, however, a tradition that Kuttower studied Cabala under Ḥayyim ibn 'Aṭṭar, who died at Jerusalem in 1743 (Hurwitz, "Ḥibbat Yerushalayim"). Possibly he went to Hebron before 1747; and after having remained there six years, returned to Brody in order to induce his sons to marry, and then went back to Jerusalem. During his second stay at Brody, Kuttower was reconciled with Israel Ba'al Shem-Ṭob, and he exchanged letters with him when settled at Jerusalem, where he finally adopted the Ḥasidic system of his brother-in-law. At Jerusalem, Kuttower became the "rosh yeshibah" in the Midrash Ḥasidim organized by those who had come to Palestine headed by Judah he-Ḥasid.

LA PEYRERE, ISAAC. See Manasseh b. Israel.

LABAN (לבן).—**1. Biblical Data:** Son of Bethuel, grandnephew of Abraham, and maternal uncle and father-in-law of Jacob. His home being in Aram-naharaim (Mesopotamia; Gen. xxiv. 10), otherwise known as Padan-aram (*ib.* xxviii. 5), he is called "the Aramean" (*ib.* xxv. 20, xxxi. 20, 24 [A. V. "Syrian"]). Mention is first made of him on the occasion of the marriage of his sister Rebekah. Attracted by the ring and bracelets which Eliezer had given her, Laban comes out to meet him, brings him into the house, and takes the lead in the negotiations concerning the departure of Rebekah. The name "Bethuel" is mentioned only once, and even then after "Laban" (*ib.* xxiv. 29-32, 50, 53, 55; see Bethuel). More fully detailed are Laban's dealings with Jacob, in Gen. xxix. 13–29, xxx. 27–xxxii. 9 (see Jacob, Biblical Data).

E. G. H. M. Sel.

——**In Rabbinical Literature:** Laban is identified by the Rabbis with Beor, Balaam's father, and with Chushan-rishathaim (Judges iii. 8), the last name being interpreted as "perpetrator of two evils" (Sanh. 105a; comp. Targ. pseudo-Jonathan to Num. xxii. 5). R. Joshua b. Levi, however, identifies Laban with Kemuel (Gen. xxii. 21), the latter name being interpreted as, "who stood up against God's people" (קמו אל; Gen. R. lvii. 4). The name "Laban" is interpreted as "glowing with wickedness" (*ib.* lx. 8), and the surname "Arammi" (= "the Aramean"; see Laban, Biblical Data) as an anagram of "ramma'ah" (= "impostor"; *ib.* lxx. 17). Laban is called also "the master of impostors" (*ib.* lxxv. 6). When he saw the bracelets on Rebekah's arms (Gen. xxiv. 30) he determined to kill Eliezer; but the latter, divining his intention, pronounced the Sacred Name, by which he caused camels to remain suspended in the air above the well. This and Eliezer's resemblance to Abraham made Laban believe that Eliezer was Abraham. Laban therefore invited him to enter the house (Midr. Abkir, in Yalḳ., Gen. 109; comp. Midr. Hagadah on Gen. xxiv. 23).

Laban's answering before his father shows that he was impudent (Leḳaḥ Ṭob to Gen. xxiv. 50). His promptness in meeting Jacob (Gen. xxix. 13) was due to his eagerness for wealth; for he thought that if Eliezer, a servant of Abraham, brought with him ten camels loaded with the goods of his master, Jacob, being Abraham's grandson, would certainly bring still greater riches. He consequently ran to meet Jacob, and, seeing the latter without camels, thought that perhaps he had gems about his person or in his mouth. He therefore hugged and kissed him (Gen. R. lxx. 13; comp. Midr. Hagadah, *l.c.*). Disappointed at not finding anything valuable, Laban said to Jacob: "I had the intention to make thee my king; but, as thou possessest nothing, thou art nothing more than a simple relative of mine" (Gen. R. *l.c.*; comp. Gen. xxix. 14).

Laban and Jacob.

Before Jacob's arrival Laban's flocks were scanty, as they had always decreased through pestilence (Pirḳe R. El. xxxvi.). When Jacob had completed his seven years of service, Laban assembled his countrymen and consulted them as to the best means to retain him; "for," said he, "ye know that formerly we had a scarcity of water, and it is only through this righteous man that we are now blessed with an abundance of it." His countrymen advised him to substitute Leah for Rachel (Targ. pseudo-Jonathan and Yerushalmi to Gen. xxix. 22; Gen. R. lxx. 17). Laban took pledges of his countrymen that they would not divulge his design, and then pawned the pledges for wine which he served to their owners, who were his guests. Laban took the precaution to extinguish the light in the banqueting-room, lest Jacob should at once see that it was Leah. On Jacob inquiring the reason, Laban answered that it was a custom of his country. The guests, drunk with wine, sang "ha Lia" (= "she is Leah"); but Jacob did not understand the real meaning of the exclamation (Gen. R. *l.c.*; "Sefer ha-Yashar," section "Wa-yeẓe"). According to Pirḳe R. El. (*l.c.*), Bilhah and Zilpah were daughters of Laban by his concubines (comp. Gen. R. lxxiv. 11).

Having been informed of Jacob's flight, Laban assembled, besides his family, all the strong men of his city, with whom he pursued Jacob. Michael then drew his sword and ran after Laban to kill him, but only warned him not to speak to Jacob either good or evil (Pirḳe R. El. *l.c.*). The question which suggests itself, why, if Laban had sons (Gen. xxx. 35, xxxi. 1), did he send Rachel to keep his flocks (*ib.* xxix. 7–10), is explained in the Midrash by the fact that he had no sons before Jacob's arrival, and that it was because of his association with the latter that God gave him sons (Gen. R. lxx. 17; Num. R. xx. 16). According to the "Sefer ha-Yashar" (*l.c.*), Laban had three sons, Beor (comp. Num. R. *l.c.*), Alub, and Murash, whom his wife Adinah bore. It was Beor, according to the same authority, who was sent by his father to inform Esau of Jacob's departure and to urge him to pursue his brother (see Jacob).

S. S. M. Sel.

2. A place in the wilderness, mentioned only once (Deut. i. 1), with Paran, Tophel, and Hazeroth. In the Septuagint the name is written *Λοβόν*, giving the Hebrew vocalization לְבָן (comp. סְדֹם = *Σόδομ*). Modern scholars have endeavored to identify it with Libnah. Sifre (Deut. 1), followed by the three Targumim and Rashi, interprets the words תפל ולבן as "the calumny of the white thing," in reference to the complaint of the Israelites concerning the manna, which was white (Num. xi. 6, xxi. 5).

E. G. H. M. SEL.

LABATT, ABRAHAM COHEN: American pioneer; born at Charleston, South Carolina, in 1802; died at Galveston, Texas, Aug. 16, 1899. He was one of the organizers of the Reform congregation in Charleston in 1825. In 1831 he removed to New Orleans, where he engaged in mercantile pursuits and was one of the founders of the first Jewish congregation in Louisiana. He visited Texas in that year and again in 1837 as supercargo of the steamship "Columbia," the first merchantman to trade between the United States and Mexico. Labatt went to California in 1849, and was one of the founders of the San Francisco synagogue, laying its foundation-stone in 1856. In 1849 he obtained a dispensation for the David Crockett masonic lodge, the first regularly instituted lodge in the state of California. He served also as an alderman of San Francisco.

BIBLIOGRAPHY: *Publ. Am. Jew. Hist. Soc.* ii. 139, 140.

A.

LABATT, LEONARD: Swedish dramatic tenor; born in Stockholm Dec. 4, 1838; died at Christiania, Norway, March 7, 1897. He studied under Günther and Masset, and made his début in 1866 at the Stora Teatern, Stockholm, in Mozart's "Die Zauberflöte." During the season of 1868 he was engaged at the Court Opera, Dresden, and in 1869 he joined the Vienna Imperial Opera, with which he remained until 1883. Between 1884 and 1888 he appeared on several stages in Holland and Germany (Rotterdam, Bremen, etc.), and in 1888–1889 made together with Strakosch a successful tour of the United States and Canada. In 1889 he returned to his native country.

Labatt's repertoire included: *Vasco da Gama*, *Faust*, *Eleazar*, *Tannhäuser*, *Rienzi*, etc.

LABI: A Turkish family of rabbis. The most prominent members were:

David b. Joseph ibn Labi: Turkish scholar of the sixteenth century; lived together with his brother Moses at Salonica, where his father was rabbi (*c.* 1540); the two brothers died during an epidemic of the plague at Salonica. Both were prominent scholars, and their father included in his responsa collections (Constantinople, 1562) some of their work; especially noteworthy is David ibn Labi's treatise on the subject of the Talmudic term "Miggo."

Joseph b. David Labi (commonly called **Machir b. Leb**): Turkish scholar of the sixteenth century; born at Monastir; died about 1600. He was descended from a Spanish family of scholars, and about 1540 became rabbi of Salonica. He was one of the rabbis who enjoyed the favor of Don Joseph Nasi and of Nasi's mother-in-law, Donna Gracia. A very strong character, Labi did not comply with the duke's wish that he should be one of the signers of the sentence of excommunication against David Hamon.

Losing two adult sons during an epidemic of the plague at Salonica, Labi went as rabbi to Constantinople, where he remained for the rest of his life. He was the author of a valuable collection of responsa, which evidence not only his thorough knowledge of the Talmud, but also his general scholarship. It was published in four parts as follows: part i., Constantinople, 1562; part ii., *ib.* 1566; part iii., *ib.* 1573; part iv., Venice, 1606 (2d ed., Fürth, 1692). Labi wrote also novellæ to the Talmud treatises Ketubot, Giṭṭin, Baba Ḳamma, Shebu'ot, Ḳiddushin, Baba Meẓi'a, and 'Abodah Zarah; notes to Rashi, Tosafot, and Asheri; and a versified prayer ("Mustajab") beginning צדק ומשפט מכון כסאך.

G. M. L. B.

LABI, JOSEPH IBN VIDAL: Prominent Spanish scholar and orator; son of the philosopher Solomon ibn Labi; lived at Saragossa. He was one of the twenty-five rabbis who by order of Pope Benedict XIII. assisted at the disputation of Tortosa (Feb. 7, 1413 = Nov. 12, 1414), where he distinguished himself by his oratorical ability.

Labi translated into Hebrew, under the title "Gerem ha-Ma'alot," a work on plants and their uses in medicine, written in Arabic by his tutor Joshua Lorki at the instance of Solomon Benveniste (d. 1411), whose children Lorki was at the time educating (MS. Vienna No. 154). Of Labi's numerous other works only a few poems and letters dealing with literary matters are now extant.

LABI HA-LEVI. See LEON HA-LEVI.

LABI, SIMON: Spanish rabbi and scholar of the sixteenth century. He intended to go to the Holy Land, but when he arrived at Tripoli he found its Jewish community in such a state of disorganization that he deemed it more meritorious to remain there and to regulate its affairs than to proceed to Palestine. He accordingly accepted the rabbinate, and was officiating there in 1549. Under his management matters rapidly improved and a model community developed.

Labi was a profound cabalist, as appears from his commentary on the Zohar to Genesis (part i., Leghorn, 1795; part ii., *ib.* 1805). He composed also liturgical songs, among which the well-known בר יוחאי נמשחת is still used by the Spagnioli during the Friday evening service.

Labi must not be confounded with Simon Labi, the editor of the Maḥzor Tripoli, who lived about a century later.

G. M. L. B.

LABOR.—Biblical Data: Labor and the laborer are invested in Jewish literature with a dignity scarcely paralleled in other ancient religions or social systems. Whereas the deities of all the nations of antiquity are depicted as spending their lives either in revelry and pleasure, like the Olympians, or in everlasting repose, like the Hindu god Brahma and the deified Buddha, God is represented in the Bible as the Pattern Worker, as the Maker and Ruler of the world who "fainteth not, neither is weary" (Gen. i.; Isa. xl. 28). Accordingly, man, made in God's image, was placed in the Garden of Eden not for mere idleness, but "to till it and keep it" (Gen. ii. 15); and when, lured into sin, Adam fell, work in the sweat of his brow was imposed upon him as a punishment, yet at the same time as a means of lifting him to a higher station of culture.

Contrast with Sabbath.

The Sabbath, too, was instituted by God, declares the Bible, for the purpose of blessing labor. Just as it formed the culmination and crown of God's week of work at the Creation, so should the Sabbath be to man a means of hallowing his work on week-days (Gen. ii. 3). It was the high conception of labor that gave the Jewish Sabbath, in contradistinction to the Babylonian Sabbath, the character of a blessed day of rest. When, groaning under Egypt's yoke, the Hebrew slaves had no respite granted them (Ex. v. 5-8), the Sabbath secured to the toiling slave, and even to the brute in the service of man, the needed rest, and thus for all time established the dignity of labor (Deut. v. 14-15). The same humane spirit prompted the law, "Thou shalt not muzzle the ox when he treadeth out the corn" (Deut. xxv. 4).

A high regard for the laborer was so firmly implanted in the Jewish people that they would not pass the workers in the field without greeting them with blessings (Ps. cxxix. 8; Judges vi. 11-12). The divine blessing always rests upon the work of man's hands (Deut. xxviii. 12; Ps. cxxviii. 2). The Book of Proverbs warns especially against idleness as producing poverty and want (Prov. xxiv. 30-34), and admonishes man to learn industry from the ant (*ib.* vi. 6-11) and from the bee (LXX. to the passage), by which prosperity is attained (*ib.* x. 4) and mischief avoided (*ib.* xviii. 9).

——In Rabbinical Literature: More emphatic are the Rabbis in the praise of labor: "Love work!" is the maxim of Sameas (Abot i. 10). "Greater is the merit of industry than of idle piety; for it says: If thou eat of the labor of thine hands, happy shalt thou be, and it shall be well with thee" (Ps. cxxviii. 12)—that is, "thou shalt enjoy bliss both in this life and in the future world" (Ber. 8a). The Congregation of the Saints ("'Edah Kedoshah") divided the day into three parts; devoting one to prayer, the second to work, and the third to the study of the Torah (Eccl. R. to ix. 9; see ESSENES). "Labor lends dignity to man" (Ned. 49b). "No work, however offensive, is so degrading as idleness." "Let no one say: 'I am the scion of a noble family and ought not to lower myself by labor!'" (B. B. 110a). "Live on a Sabbath as on week-days, and be not dependent upon others," says R. Akiba (Shab. 118a). "Upon labor God made His covenant with man; for He himself based the Sabbath upon the work He did." "Even in Eden Adam was not permitted to eat before he had earned his bread by work." "Nor did God make His Shekinah rest upon the Israelites until they had done work in building the tabernacle for Him" (Ab. R. N. Recension A. xi.; Recension B. xxi., ed. Schechter, p. 44). "Also the manna in the wilderness was given only upon the condition that Israel would do some kind of labor" (Mek., Beshallaḥ Wayassa, iv.). "Idleness imperils life" (Ab. R. N. *l.c.*). "He who does not teach his son a trade teaches him robbery" (Tosef., Ḳid. i. 11; Mek., Bo, xviii.). "A wife," says R. Eliezer, "may have a hundred servants, and yet it is her duty to do some work; for idleness causes lasciviousness" (Ket. v. 5). Says R. Joshua b. Levi: "When Adam heard God's voice saying, 'Thorns and thistles shall the ground bring forth unto thee and thou shalt eat the herb of the field,' he cried: 'Shall I and my beast eat out of the same manger?' But when God continued: 'In the sweat of thy brow shalt thou eat bread,' he felt relieved, and blessed the hallowing power of labor" (Pes. 118a). God himself, according to the Midrash (Gen. R. xxiv. 7; comp. Book of Jubilees, iii. 35), taught Abraham how to do all kinds of work. "Upon man's handiwork God's blessing rests" (Midr. Teh. to Ps. xxiii. 1).

Talmudic Sayings.

A characteristic Jewish saying is: "Seven years a famine may last; but it will not enter the door of the artisan" (Sanh. 29a; see also AGRICULTURE and ARTISANS). It was this Jewish spirit of appreciation of labor which found an echo in the New Testament (II Thess. iii. 10; Eph. iv. 28; comp. JEW. ENCYC. iv. 589, *s.v.* DIDASCALIA).

Throughout the Talmudic time and all through Jewish history the rule was observed that the pursuit of learning should be combined with labor (Ab. ii. 2), for it is said, "Torah without work must at length fail"; and those who pursued the former without the latter proved the exception (Mek., Beshallaḥ, Wayassa, ii.; Ber. 35a; comp. Ecclus. [Sirach] xxxviii. 24-34). Idleness was never encouraged by the Jewish law.

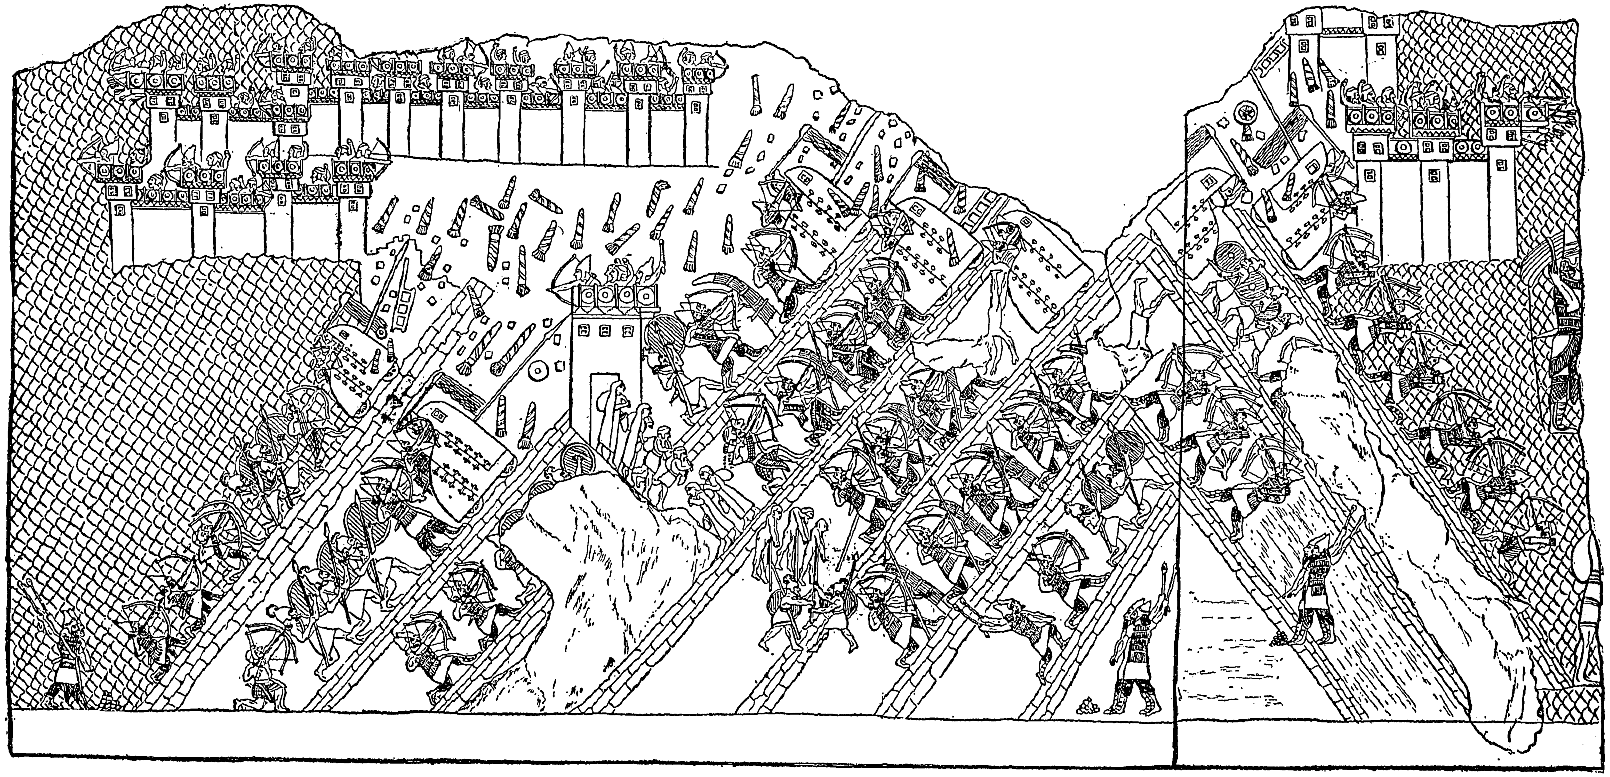
LACHISH: The city of Lachish was located in Judah (Josh. xv. 39). It is first heard of in Josh. x. 3 *et seq.* Its king, Japhia, together with the kings of Jerusalem, Hebron, Jarmuth, and Eglon—all Amorites—formed a coalition against Gibeon because it had made peace with the Israelites. These kings were routed, caught in a cave, killed, and their bodies hanged. Joshua in this campaign besieged and captured Lachish (*ib.* x. 31, 32), and made prisoners also those who helped the city. Lachish is next mentioned in the list of cities built, or probably rebuilt, by Rehoboam (II Chron. xi. 9), the first king of Judah after the division of the kingdom. Amaziah, King of Judah, was so detested by his people



Siege of Lachish by the Troops of Sennacherib.

(From Layard's "Monuments of Nineveh.")

that, to avoid the wrath of a conspiracy, he fled to Lachish (II Kings xiv. 19); but he was pursued and slain.

Probably the greatest battle fought under the walls of Lachish was fought by Sennacherib's army in 701 B.C. (II Kings xviii. 14). While the Assyrians were besieging the city, Hezekiah sent and asked the price of forgiveness and absolute safety. The cost of such submission was quickly named, was collected by Judah's king, and sent to the King of Assyria at Lachish. From this same seat of war Sennacherib sent his officers "with a great army" against Jerusalem. Some time thereafter those officers returned to find that Lachish had been reduced, and the army transferred to Libnah. Sennacherib does not mention this city in his annals; but the walls of his palace at Kuyunjik were decorated with two elegant pictures: one representing in remarkable detail the methods of the besiegers, and the other showing, as a brief inscription says, Sennacherib, king of nations, King of Assyria, seated on the throne, and the captives from Lachish paraded before him. Both of these are beautifully executed and give the graphic outlines of the siege of one of the most interesting smaller cities of ancient Judah. The religious influence of Lachish in this period is hinted at in Micah (i. 13, R. V.): "Bind the chariot to the swift steed, O inhabitant of Lachish: she was the beginning of sin to the daughter of Zion." Lachish is named as one of the fortified cities which the King of Babylon captured (Jer. xxxiv. 7) when he shattered and carried captive the kingdom of Judah. It is named also (Neh. xi. 30) as one of the cities occupied by the Jews who returned from the Captivity.

The site of ancient Lachish is generally identified to-day with Tell al-Ḥasi, occupying a position between the maritime plain and the hill-country of Judea, about sixteen miles east of Gaza. Petrie excavated here in 1890, and published his results in "Tell el-Hesy" (1891). Bliss excavated at this mound during four seasons and cut through a section of it down to the native soil. He found eight superimposed cities: (1) an Amorite one, fortified by a strong wall, and dating about 1700 B.C.; (2) dating about 1500 (the date being determined by Egyptian scarabs); (3) covered by a mass of ashes; here was found a cuneiform tablet of the time of Amen-hotep IV. of Egypt, on which Zimrida, governor of the city, is named; (4) dating about 1400–1000, with an abundance of Phenician pottery; (5) dating about 1000, and (6) dating from 800, Jewish articles prevail; (7, 8) which furnished many specimens of black-figured Greek pottery, pointing to 500–400. No remains that indicate a later date have been discovered. Bliss's finds show a "Mound of Many Cities," as he entitles his book (1898), where many and fierce battles were fought during more than 1,200 years.

LADIER, DOB BÄR B. SHNEOR ZALMAN: Russian Ḥasidic rabbi; born about 1770; died 1834. He was the son of R. Shneor Zalman of Liady, the founder of the Ḥasidic sect known as "Ḥabad," and succeeded his father as their chief. He is the author of the following Ḥasidic-cabalistic works: "Derek Ḥayyim" (Kopys, 1799, 1809); "Sha'ar ha-Teshubah" (Shklov, 1817); "'Aṭeret Rosh" (Kopys, 1821); "Poḳeaḥ 'Iwwerim," on morals and penitence, in Judæo-German (Königsberg, 1856). He wrote also "Ḳuntres ha-Hitbonnenut" and "Ḳuntres ha-Hitpa'alut," on contemplation and on ecstasy, in which he developed his father's philosophico-cabalistic theories. The first of these appeared at the end of "Torah Or" (Lemberg, 1851), ascribed by some authorities to him (see Walden, "Shem ha-Gedolim he-Ḥadash," part 2, p. 77, Warsaw, 1882). The second appeared first in 1831, and was later reprinted with an extensive commentary by R. Hillel of Parets

(Warsaw, 1868). The "Bi'ure ha-Zohar" (Kopys [?], 1816) was written by him, but contained only the explanations to the Zohar which he had heard from his father.

LADVOCAT, JEAN-BAPTISTE: Christian Hebraist; born at Vaucouleurs Jan. 3, 1709; died at Paris Dec. 29, 1765. Though he achieved particular distinction as a Hebraist and Biblical exegete, this was not the only branch of scholarship in which he excelled: he was, in fact, an exceedingly versatile student and writer. Belles-lettres, mathematics, philosophy, history, and the classics, with the Oriental languages and the Holy Scriptures, all received his attention. In 1742 he became librarian of the Sorbonne; but his most fertile period as an exegete commenced in 1751 after he had been appointed to the chair in Biblical exegesis founded in the Sorbonne by the Duc d'Orleans. It was then that Ladvocat began to publish those theses on several books of the Old Testament—particularly the Pentateuch, the Psalms, and the Book of Job—that won for him fame even in foreign countries. Two years after his new appointment he wrote "Grammaire Hébraïque à l'Usage des Ecoles de la Sorbonne" (Paris, 1753; last ed. 1822).

It is, however, his "Interprétation Historique et Critique du Psalm 68" (*ib.* 1767) that deserves a prominent place in the history of Biblical criticism. In a letter prefixed to the "Interprétation" Ladvocat dwells on the impossibility of a correct comprehension of the Scriptures without a pure and correct Hebrew text. "Without the latter," he says, "all commentaries must needs be erroneous. As a matter of fact, all our Hebrew Bibles, not excluding the edition of Athias (1705), are printed without taste, without critical judgment, according to the most modern and least correct manuscripts, and thus are replete with shortcomings, errors, and solecisms." Consequently he suggests, as the surest means of restoring the Hebrew text as far as possible to its pristine purity, a critical comparison of the extant texts with the versions of the Hexapla, the Targumim, and all other ancient versions—a task which he himself really purposed to accomplish by the publication of a critical edition of the several books of the Old Testament, together with linguistic and archeological apparatus.

It must be added that, notwithstanding the large number of its textual errors, Ladvocat firmly believed in the integrity and the authenticity of the Old Testament, a view and a defense of which he embodied in "Letters on the Authenticity of the Original Texts of the Holy Scriptures" (1766).

LAG BA-OMER. See Omer.

LAGARDE, PAUL ANTON DE: German Orientalist; born in Berlin Nov. 2, 1827; died in Göttingen Dec. 22, 1891. His father was Wilhelm Bötticher; and his earlier writings (1847–52) were published under the name "P. A. Bötticher," the name De Lagarde, which was in his mother's family, being legally assumed by him in 1854, when he was adopted by his maternal great-aunt, Ernestine de Lagarde.

Lagarde's early education was obtained in the Friedrich Wilhelms Gymnasium, in which his father was a teacher. He studied theology and Oriental languages at the universities of Berlin, where the poet-scholar Friedrich Rückert was his teacher in Arabic and Persian, and Halle, habilitating at the latter in 1851. The next two years were spent chiefly among the manuscripts in the libraries of Paris and London. Lagarde's hopes of securing on his return a position in a university faculty were disappointed; and from 1854 to 1866 he taught in Berlin schools. In 1869 he became professor of Oriental languages at Göttingen, succeeding Heinrich Ewald.

Lagarde's earliest publications were in the field of comparative philology; and of his maturer works that on noun-formation in Aramaic, Arabic, and Hebrew (1889) is an important contribution to the subject. He edited many texts, chiefly Biblical and ecclesiastical, in Syriac, Aramaic, Arabic, Hebrew, and Coptic, as well as in Greek and Latin. What he regarded as the great work of his life, to which the principal part of the foregoing editions was subsidiary, was the critical reconstruction of the text of the Septuagint by a methodical regress from the recensions current in the fourth century. His "Librorum Veteris Testamenti Canonicorum Pars Prior Græce," 1883 (Genesis-Esther in the Syrian recension of Lucian), was one step in this plan. His minor writings, collected from time to time ("Symmicta," "Semitica," "Orientalia," "Mittheilungen"), cover an extraordinary range of erudition and controversy. He wrote much and vigorously also on contemporary questions in politics, religion, and education; his "Deutsche Schriften" (1878-81; last ed. 1891) is a collection of such pieces.

Mention may be made of those writings of Lagarde which are of especial Jewish interest. His "Prophetæ Chaldaice" (Leipsic, 1872) is a serviceable edition of portions of the Reuchlin codex of the Targum, but without the vocalization; and his "Hagiographa Chaldaice" (1873), excepting Chronicles, which he edited from an Erfurt MS., is a reprint from the Bomberg Bible of 1518. Lagarde had a sense of the importance of a study of Talmudic literature because of its bearings on the history of the Bible text. He was not unacquainted with post-Biblical Hebrew. He edited, for the use of his students and not critically, the "Maḳamat" of Judah al-Ḥarizi (Göttingen, 1883), and gave an account of the Hebrew manuscripts in Erfurt ("Symmicta," i. 130; see Steinschneider, "Hebr. Bibl." xix. 28), and of a part of a Talmud manuscript in the Göttingen Library ("Semitica," i. 69), besides explanations of Aramaic words ("Erklärung Chaldäischer Wörter," *ib.* i. 33 *et seq.*). But both in his scientific and in his political writings he was a virulent anti-Semite, his theory of the corroding influence of the Jews being based upon his peculiar ideals of a German state. This is seen in his "Juden und Indogermanen: Eine Studie nach dem Leben" ("Mittheilungen," ii. 262), in his "Purim: Ein Beitrag zur Gesch. der Religion" (Göttingen, 1887), and in his criticism of Berliner's edition of the Targum Onḳelos (*ib.* ii. 163 *et seq.*). He came into direct conflict with Jewish scholarship by the dissertation of his pupil Ludwig Techen, "Zwei Göttinger Machzorhandschriften" (1884), which contained an attack upon the merits of Leopold Zunz's work. This was answered, among others, by A. Berliner ("Prof. P. de Lagarde, nach Seiner Natur Gezeichnet," Berlin, 1887), D. Kaufmann ("Paul de Lagarde's Jüdische Gelehrsamkeit," *ib.*), and by B. Ziemlich ("Einer der Nicht Liturgiker Sein Will," *ib.*). Lagarde replied in his "Lipman Zunz und Seine Verehrer" ("Mittheilungen," ii. 108 *et seq.*), and in his "Juden und Indogermanen," cited above. A responsum on the Talmud by Lagarde will be found in "Mittheilungen," iii. 3 *et seq.* The latest two accounts of Lagarde are by G. F. Moore in "The University Quarterly" (New York), vii. 166 *et seq.*, and by E. Nestle in Herzog-Hauck, "Realencyc." xi. 218 (also separately with additions).

LAGARTO, JACOB: South-American rabbi and Talmudist of the seventeenth century; probably a son of Simon Lagarto of Amsterdam. He went to Brazil when a young man, and about 1680 was ḥakam of the Jews at Tamarica. He was the author of a work entitled "Ohel Ya'aḳob" or "Tienda de Jacob," conjectured by Wolf ("Bibl. Hebr." iii. 1066b) to have contained Talmudic aphorisms. Kayserling thinks it was not written in America.

Bibliography: *Publ. Am. Jew. Hist. Soc.* ii. 16 and 17; Kayserling, *Bibl. Esp.-Port.-Jud.* p. 55.
A.

LAGUNA, DANIEL ISRAEL LOPEZ: Spanish poet; born in Portugal about the middle of the seventeenth century of Marano parents, who subsequently settled in southern France. He studied the humanities at a Spanish university. Persecuted and imprisoned by the Inquisition as a Marano, he languished for several years in captivity, finally succeeding in escaping. He then went to Jamaica, British West Indies, where he openly confessed Judaism.

At Jamaica Laguna completed the poetical work which he had begun in prison—a Spanish paraphrase of the Psalms. In the introductory poem containing an acrostic, "A el Zeloso Lector" (To the Kind Reader), he relates his varied experiences, and in several of his versions of the Psalms he alludes to his sufferings in the dungeons of the Inquisition. With this work, the fruit of twenty-three years of labor, he went to London, where several of his relatives, members of the Laguna family, were then living. Here he found a patron in the person of the learned Mordecai Nunes Almeyda, who arranged to have the work printed. It appeared in a handsome edition, under the title "Espejo Fiel de Vidas Que Contiene los Psalmos de David en Verso" (London, 1720), with an approbation in Spanish by Haham David Nieto, another, in Hebrew, by Joseph ibn Danon, and an artistic "geroglifico" by Abraham Lopez de Oliveyra. It was dedicated to Almeyda, and was praised in Spanish, Latin, and English verse by many, including Almeyda; the latter's mother, Manuela Nunes de Almeyda, and sisters, Bienbenida Cohen Belmonte and Sarah de Fonseca Pina y Pimentel; Sarah's husband, Manuel Fonseca Pina, and son Moseh de Manuel Fonseca Pina; as well as Jacob Henriquez Pimentel (alias Manuel de Umanes), and his son Abraham, who wrote a long introduction to the work; David Henriquez Pimentel; and Abraham Gomez Silveyra. David Chaves, the physician, and Isaac de Sequeira Samuda wrote Latin hexameters in its honor, and Samson Guideon, then a young financier, as well as Abraham Bravo, a friend of the author, praised the work in English verse. The poet's eldest son, **David Lopez Laguna,** and his nephew, **Jacob Lopez Laguna,** wrote Spanish poems on it. Laguna subsequently returned to Jamaica to his wife, Riki, and his three sons, David, Jacob, and Isaac. He died at the age of seventy; but the date of his death is not known.

Another Daniel Lopes Laguna from Bordeaux died in Paris March 8, 1780 ("Revue Et. Juives," xxvi. 244).

Other members of the Laguna family, **Abraham Laguna, Jacob Laguna,** and **Rebecca Laguna,** were naturalized at Jamaica between 1740 and 1743.

LAIBACH: Capital of the Austrian province of Carniola. The first mention of Jews in Laibach dates from 1213, when it is recorded that they rebuilt their synagogue much handsomer than it was before. The usual accusations against Jews in medieval times are found in connection with Laibach. In 1290 they are charged with the murder of a Christian child; in 1337 they are accused of having poisoned the wells; and in 1403 three Jews are killed in a riot, caused by the trial of a Jew who was put to death for having violated a Christian girl. The occupation of the Laibach Jews was chiefly money-lending, but they are also mentioned as merchants having an important trade with Italy, and as artisans. The Austrian law of 1244 was not valid in Carniola; and the legal status of the Jews was defined by special charters granted to individuals by the rulers. They were permitted to hold real estate, and in criminal cases were placed on an equal footing with Christians, while in civil cases they were as a rule under the "Judenrichter" of Marburg in Styria. As regards the payment of taxes they formed one body (Jüdischheit) with their coreligionists of Styria and Carinthia; but they were also required to bear their share in the city levy.

The expulsion of the Jews from Styria and Carinthia (1496) did not at first affect those of Laibach, and in 1510 Emperor Maximilian decreed that they should be protected in their ancient privileges; but in 1513 he yielded to the demands of the citizens, and prohibited the Jews from engaging in mercantile pursuits. Finally, on Jan. 1, 1515, upon the petition of the citizens, they were expelled from Laibach. Occasionally Jews seem to have been in the city after that time; for in 1672 Leopold I. addressed an edict to the governor in which he ordered that no Jew should be tolerated in the province. In 1762 the governor desired to give the Jews permission to deal at wholesale in goods of domestic manufacture; but the merchants' gild objected. Joseph II., however, permitted them in 1783 to frequent the fairs. When, after the peace of Vienna (Oct. 14, 1809), Carniola became part of the French province of Illyria, Abraham Heimann of Memmelsdorf in Bavaria settled there and had to contend with the ill-will of the municipal authorities, but was protected by the French governor. Immediately after the reincorporation of the province into Austria through the peace of Paris (May 30, 1814), Heimann received an order of expulsion (Aug. 18); and although an imperial order of Dec. 6, 1817, restored his rights, he had continuously to fight the municipal and provincial authorities, who persecuted him constantly, until the events of 1848 secured him in his rights. Subsequent reaction prevented for a long time the settlement of other Jews in the city; and it was not until the constitution of Dec. 21, 1867, gave the Jews civic equality that they again settled in Laibach. In a total population of 36,547 there are now about 200 Jews, who, however, have not yet formed a religious community.

LAMBERT, MAYER: French Orientalist; born Dec. 23, 1863, at Metz; son of Elie Lambert, author of religious text-books, grandson of Chief Rabbi Lion Mayer Lambert of Metz, great-grandson of Chief Rabbi Aaron of Worms, and descendant through the last-named of Gershon Ulif Ashkenazi and of Elijah Blin, rabbi and ḥazzan of Worms in the sixteenth century. After finishing his studies at the lycée of Metz, he attended the lectures of the Talmud Torah and the Séminaire Israélite of Paris, pursuing, at the same time, courses in Semitics at the Ecole des Hautes Etudes. He received his rabbi's diploma in 1886. In 1887 he was appointed professor of Arabic and Syriac at the Séminaire, and in 1889 he took charge of Hebrew at the Ecole Normale of the Alliance Israélite. He taught Hebrew at the Talmud Torah, 1890-94, and subsequently at the Séminaire. From 1886 to 1895 he was the collaborator of Joseph Derenbourg. In 1902 he was appointed lecturer of Hebrew and of Syriac at the Ecole des Hautes Etudes.

Lambert has published the following works: "Eléments de Grammaire Hébraïque" (Paris, 1890); "Une Série de Qeré Ketib" (*ib.* 1891); "Commentaire sur le Livre de la Création par Saadia" (*ib.* 1891); "Arabic Version and Commentary to Proverbs, by Saadia" (*ib.* 1894), in collaboration with Joseph Derenbourg; "Premiers Eléments de Grammaire Hébraïque" (*ib.* 1900); "Glossaire Hébreu-Français," MS. 302 of the Bibliothèque Nationale, published by Lambert in collaboration with M. L. Brandin (1903). Of his numerous contributions to the "Revue des Etudes Juives," the "Journal Asiatique," the "Revue Sémitique," etc., the following deserve particular mention: "Observations sur la Théorie des Formes Nominales" ("Journal Asiatique," 1890); "L'Accent Tonique en Hébreu" ("R. E. J." 1892); "La Formation du Pluriel en Hébreu" (*ib.*); "L'Inscription d'Eryx" ("Revue Sémitique," 1893); "Le Vav Conversif" (*ib.* 1895); "La Syntaxe de l'Impératif Hébreu" (*ib.* 1897); "L'Article dans la Poésie Hébraïque" (*ib.* 1898); "De l'Accent en Arabe" ("Jour. Asiatique," 1898); "Le Cantique de Moïse" ("R. E. J." 1898); "Les Dates et les Ages dans la Bible" (*ib.* 1902). His contributions to "La Grande Encyclopédie" include the articles: "Langue Hébraïque," "Massore," "Onkelos," etc. In his articles contributed to the "Univers Israélite" Lambert endeavors to show that Judaism must give up dogmatism, modifying the customs and laws which are contrary to modern ideals while laying more stress on religious instruction.

s. A. A.

LAMDEN, or **LAMDAN** (plural, **Lamdanim**): Late Hebrew expression for a man who is well informed in rabbinical literature, although not a scholar in the technical sense of the term ("talmid ḥakam"); it does not seem to have been used before the eighteenth century. Ezekiel Katzenellenbogen (1670–1749) decided that rabbinical scholars were exempt from paying taxes even though scholars then were not scholars in the proper sense of the word, "for the law does not make a difference between lamdan and lamdan" (Resp. "Keneset Yeḥezḳel," Ḥoshen Mishpaṭ, No. 95, p. 118a, Altona, 1732). Jacob Emden ("Megillat Sefer," p. 21, Warsaw, 1896) speaks of Baer Kohen (Berent Salomon), the founder of the Klaus in Hamburg, as having been somewhat of a scholar ("ḳeẓat lamdan," the equivalent of the Judæo-German "ein stückel lamden"). Authorities of the sixteenth century, when they have to speak of the difference between a scholar in the technical sense of the word and a well-informed man, do not use the term "lamdan," but say "ẓurba me-rabbanan" (see Joshua Falk ha-Kohen in "Sefer Me'irat 'Enayim," Ḥoshen Mishpaṭ, 15, 4; Shabbethai ha-Kohen, *ib.* 1, 19, and Yoreh De'ah, 244, 11).

D.

LAMECH (לֶמֶךְ = "vigorous youth"?): **1.** Descendant of Cain (Gen. iv. 18–24). He had two wives, Adah and Zillah. Adah bore him two sons, Jabal (the father of such as dwell in tents) and Jubal (the father of such as handle the harp and organ). Zillah had one son (Tubal-cain, instructor of those that wrought in brass and iron) and one daughter (named Naamah). Lamech is especially remembered for the address to his two wives given in Gen. iv. 23–24. The general opinion of modern scholars is that this utterance is a glorification by Lamech of the weapons forged by his son Tubal-cain, while Wellhausen holds ("Die Composition des Hexateuchs," p. 305) that it is simply a boastful outburst of the kind common in Arabic literature.

The Talmudists and the ancient Jewish commentators, interpreting the words שבעתים יקם (Gen. iv. 15, "Cain shall expiate his crime after seven generations"), evolved the following legend: Lamech lost his sight and had to be led by his son Tubal-cain, who was of the seventh generation from Cain (comp. Gen. iv. 17–18). One day Tubal-cain saw in the distance something that he took for an animal; it was Cain, however, who had been killed by an arrow from Lamech's bow. When they found that it was Cain, Lamech in sorrow clapped his hands together, by which action he killed Tubal-cain. His wives deserted him (Rashi, *ad loc.*). According to Gen. R. xxiii. 5, Lamech killed no one, but his wives refused to associate with him on the ground that the descendants of Cain would be destroyed after seven generations. Lamech, however, allayed their fears, saying: "Have I slain a man or a youth that my offspring should be destroyed? If Cain shall expiate his crime after seven generations, surely Lamech, who killed no one, shall expiate his sins after seventy-seven generations." This interpretation was adopted by Onḳelos and pseudo-Jonathan. Josephus ("Ant." i. 2, § 2) saw in the word "seventy-seven" the number of Lamech's sons.

2. Descendant of Seth and father of Noah (Gen. v. 28–30), whom Lamech begat at the age of 182 years; his life covered a period of 777 years. The coincidence of the names "Lamech" and "Enoch" in the Cainite and Sethite genealogies, as well as the similarity between other names in the two lists, has led modern scholars to suppose that these are two different recensions of the same list.

E. G. H. M. Sel.

LAMED (ל): Twelfth letter of the Hebrew alphabet; on its form see Alphabet. The meaning of the name is uncertain. The letter is a liquid, pronounced like the English "l"; it interchanges with the other liquid consonants and semivowels, and sometimes passes into ר, ד, or מ. It is sometimes inserted after the first radical or added to the third to form quadriliterals from triliterals. As a numeral it has, in late usage, the value of 30.

T. I. Br.

LAMED-WAW: The thirty-six hidden saints called among Russian Jews **Lamed-waw-niks.** The legend that there are in every generation thirty-six secret saints, through whose piety the world exists, is based upon the following passage in the Talmud: "Abaye has said: 'There are in the world not less than thirty-six righteous persons in every generation upon whom the Shekinah rests; for it is written, "Happy are all they that wait for him" [לו]. The last word stands numerically for thirty-six'" (Sanh. 97b; Suk. 45a). The "Tiḳḳune Zohar" (ch. xxi.) goes still further, and, quoting Hos. x. 2, "Their heart [לבם] is divided," deduces from לבם, which numerically represents seventy-two, that there are thirty-six saints in Palestine and an equal number outside of the Holy Land.

Around these sayings clusters a whole series of legends celebrating the Lamed-waw-niks. The latter are represented as hiding their sanctity and as not obtruding it for show. They usually follow the humble vocation of artisans, unrecognized by the community, and denying their identity when it is accidentally discovered. In cases of extreme danger to the Jewish community they come forward to avert it; but after their work is done, they retire to some place where they can again live undisturbedly. This belief has been so universal as to raise a suspicion against any mysterious personage that he is a Lamed-waw-nik.

Wiener in his "Yiddish Literature" cites a characteristic legend of such a saint living at Cracow in the time of Moses Isserles. Disguised as Ḥayyim, a tailor, this saint frustrated a plan of the Polish king to extort a sum of money from the Jews, and by his secret powers forced the king to abandon it. The king's minister who had concocted the scheme fled, and became converted to Judaism. Legends concerning Lamed-waw-niks are connected also with Israel Ba'al Shem-Ṭob, Elijah Wilna, and other popular personages.

H. R. A. S. W.

LAMEGO: City in Portugal. Its Jewry was formerly situated in the Cruz da Pedra street, the present Rua Nova. Lamego was the meeting-place of many rich secret Jews or Neo-Christians, who were bitterly hated by the Christian population of the city. One of the most active representatives of the Portuguese Maranos in the struggle against the introduction of the Inquisition was Jacome da Fonseca of Lamego.

The establishment of a tribunal of the Holy Office in the city (1542) was hailed with rejoicings by the Christian population. In the program of the celebration of the opening of the tribunal, which consisted of doggerel and which was displayed at all the public places in the city, the richest and most distinguished of the Maranos were divided into two groups, musicians and dancers, and caricatured. The panic among these secret Jews was so great that most of them fled to Tras-os-Montes, where many were seized by the bailiffs, and led back to Lamego. The tribunal of Lamego was in existence for about six years.

LÄMEL, SIMON EDLER VON: Austrian merchant; born at Tuschkau near Pilsen, Bohemia, Aug. 28, 1766; died at Vienna April 18, 1845. Early bereft of his father, he quickly developed an inclination for mercantile pursuits, so that, when only twenty-one years of age, he established a wholesale house in Prague which soon ranked among the most important in the country. He encouraged improvements in the raising of sheep, and also introduced new methods in the carding and manufacturing of wool. Prompted by feelings of patriotism, he rendered his country valuable services, especially during the Napoleonic war. Thus, in 1801 he purchased all the magazines containing salt, flour, and wheat which had been captured by the French, and in 1805 he bought all the artillery pieces taken by the enemy, thereby saving Austria more than 3,000,000 gulden. In 1809 he negotiated the purchase of 450 tons of biscuit for military provisions, declining to accept any profits or commission. Lämel gave further evidence of his devotion to his emperor and his country by lending the government large sums of money. In order to facilitate the withdrawal of the French troops from Vienna he in 1809 lent to the state his entire fortune.

In view of his recognized services he requested permission to purchase a house in Vienna, but on March 17, 1811, the emperor declined to grant this petition. In the same year, however, Lämel was elevated to the hereditary nobility, and he and his children were given permission to reside in Vienna, in which city Jews were at that time hardly tolerated. In 1813 Field-Marshal Prince Schwarzenberg appointed Lämel commissary of the army, relieving him from quartering soldiers.

Saxony as well as Austria profited by Lämel's services; and several autograph letters from the kings of the former country assured him of their esteem. His endeavors were the cause, at least indirectly, of the abolition of the body-tax ("Leibzoll") in Saxony.

Lämel was ever active in his efforts to ameliorate the sad condition of his coreligionists. In 1817 he succeeded in having the taxes of the Bohemian Jews reduced, and was assured at the same time that they would shortly be abolished altogether. He did not seek to escape this taxation himself, even when he removed to Vienna. A few years before his death he endeavored to bring about the abolition of the medieval Jewish oath.

Lämel's daughter, Elise Herz, founded in his memory a school at Jerusalem, which is known as the "Simon Edler von Lämel's Stiftung."

LAMENTATIONS.—Biblical Data: In the manuscripts and printed copies of the Old Testament the book is called, after its initial word, "Ekah"; in the Talmud and among the Rabbis, after its contents, "Ḳinot" (comp. especially B. B. 15a). The Greek and Latin translations of the Old Testament, as well as the Church Fathers, call it *Θρῆνοι*, or *Θρῆνοι Ἰερεμίου*, or "Threni."

The five poems deal with the destruction of Jerusalem (586 B.C.), describing how city and country, palace and Temple, king and people, suffered under the terrible catastrophe. The several poems have markedly different characteristics. The first shows an almost utter lack of consecutive thought. Although it may be divided into two distinct sections —verses 1-11b, in which the poet speaks, and 11c-22, in which the city continues—the sections themselves present no logical development of thought. The theme of the entire song is the distress of the city (which is personified) and of her children and inhabitants, and the haughtiness of the victors. Thus verses 1 *et seq.* deal, in obvious imitation of Isa. i. 21, with the misfortunes of Jerusalem; verse 5, with the arrogance of the Chaldeans; verses 6-9, again, with the misery of the inhabitants; verse 10, with the proud victors. Verses 12-16 of the second section are especially remarkable for their series of detached images representing Jerusalem's sufferings; viz., the rain of fire, the net, the yoke, the treading in the wine-press, etc. From a theological point of view, the strong sense of sin (verses 5, 8, 14, 18, 21), as well as the wish that God may punish the enemy (verse 22), is noteworthy.

The second poem, ch. ii. (comp. Jer. xiv. 15-18), is remarkable for its methodical arrangement. After the theme—the destruction of Jerusalem—has been announced in verse 1, it is treated first in its political aspect (2-5) and then from its religious side (6-7). Verse 8 is the beginning of a new section, also in two parts: (*a*) 8-9a, dealing with the fate of the city; and (*b*) 9b-12, with that of her inhabitants. Verse 13 introduces a parenetic portion: the false prophets are mostly to blame (14-17); therefore the exhortation to cry unto the Lord (18-19) and the fulfilment of the exhortation (20-22).

The third poem, ch. iii., has a character of its own, being a psalm, somewhat similar to Ps. lxxxviii. Here, too, the question arises as to whether the speaker is one person—perhaps Jeremiah (comp. K. Budde in Marti's "Kurzer Handcommentar,"

xvii. 92 *et seq.*)—or the community (comp. R. Smend in Stade's "Zeitschrift," viii. 62, note 3). The latter opinion is preferable in view of the contents. Verses 1-18 deal with the deep affliction in consequence of which the speaker is without peace and without hope, and therefore he cries to God (19 *et seq.*). The following section (21-47) is most important from a religious point of view; for, according to it, God's mercy is renewed every morning, and therefore man may hope even in sorrow, which is only a divine means of discipline. If God has afflicted any one, He will also show pity, according to the abundance of His mercy. Hence, he who is afflicted must not deem himself abandoned by God, but should consider whether he has not deserved his trials because of sins. The result of this reflection is an admission of sin by the community (verse 47). This is followed by another description of the afflictions of the community (48-55). The song ends with a prayer: "Help me and avenge me on my enemies" (56-66).

Fourth and Fifth Poems.

The fourth poem, ch. iv., is similar to the second as regards its symmetrical arrangement and its contents. Verses 1-11 deal with the affliction of the "bene Ẓiyyon" and the "Nezirim"—with the famine as the greatest terror of the siege. God has poured out all His anger upon the unhappy city, which suffers because of the sins of its leaders, the priests and prophets (13-16), the king and his council (17-20). The last two verses (21-22) contain a threat of punishment against Edom.

Since ancient times the fifth poem, ch. v., has rightly been called a prayer. Verse 1 addresses God with the words "Behold our reproach"; this reproach is described with but little coherence in verses 2-18, which are followed by a second appeal to God (19-22): "Renew our days as of old."

Authorship.—(a) **Biblical and Pre-Talmudic Data:** The book gives no information as to its author. The earliest mention of it is found in II Chron. xxxv. 25: "And Jeremiah lamented for Josiah; and all the singing men and the singing women spake of Josiah in their lamentations to this day, and made them an ordinance in Israel: and, behold, they are written in the lamentations." The chronicler therefore regards Jeremiah as the author of lamentations on Josiah; and it is not improbable that he saw them in the Book of Lamentations, in view of passages like ii. 6 and iv. 20. Josephus ("Ant." x. 5, § 1) has transmitted this tradition: "But all the people mourned greatly for him [Josiah], lamenting and grieving on his account for many days: and Jeremiah the prophet composed an elegy to lament him, which is extant till this time also." This tradition has found a place in the Talmud as well as in the Greek translation of the Old Testament, and is plainly cited by Jerome, who says, on Zech. xii. 11: "Super quo [Josia] lamentationes scripsit Jeremias, quæ leguntur in ecclesia et scripsisse eum Paralipomenon testatur liber."

E. G. H. M. Lö.

(b) **In Rabbinical Literature:** The rabbinical authorities regard Lamentations as having been written by Jeremiah (B. B. 15a). It is one of the three "Ketubim Ḳeṭannim" (Ber. 57b), and is variously designated as "Ḳinot," "Megillat Ḳinot," "Ekah," and "Megillat Ekah" (Ber. 57b; B. B. 15a; Lam. R. i. 1, אין איכה אלא קינה; comp. L. Blau ["Zur Einleitung in die Heilige Schrift," p. 38, note 3, Budapest, 1894], who questions the last two titles). And he who reads it utters first the benediction "'Al Miḳra Megillah" (Soferim xiv. 2; comp. ed. Müller, p. 188). Ekah was written immediately after the destruction of the First Temple and of the city of Jerusalem (Lam. R. i. 1), though R. Judah is of the opinion that it was composed during the reign of Jehoiakim, after the first deportation (*ib.*).

The alphabetical construction of the poems furnished suggestions of an ethical nature to the Rabbis. The seven alphabets (ch. v. was also considered alphabetical as it numbers twenty-two verses) recall the seven sins committed by Israel (*ib.* Introduction, xxvii.). This form also indicates that Israel violated the Law from alef (א) to taw (ת; *ib.* i. 1, § 21), *i.e.*, from beginning to end. The letter pe (פ) was placed before 'ayin, because Israel spake with the mouth (פה) what the eye ("'ayin") had not seen (Lam. R. ii. 20). The influence of the Lamentations in bringing Israel to repentance was greater than that of all the other prophecies of Jeremiah (Lam. R. ix. 26). See also Jeremiah in Rabbinical Literature.

S. S. E. G. H.

(c) **Critical View:** Since the tradition of the Jeremianic authorship was current as early as the time of the chronicler, it is doubtless an ancient one, but no reference is made to it in any of the songs themselves. There are, on the contrary, weighty reasons against ascribing the authorship to Jeremiah: (1) The position of the book among the "Ketubim" in the Hebrew canon; for though the Alexandrian canon places it beside the Book of Jeremiah, this juxtaposition did not obtain originally, since the two books were translated by different writers. (2) The style of the songs, *i.e.* (*a*) their language and (*b*) their poetical form. (*a*) Their language: this has been exhaustively examined by Löhr in Stade's "Zeitschrift," xiv. 31 *et seq.*, and it shows that ii. and iv. were drawn undoubtedly from Ezek., and i. and v. probably from Deutero-Isaiah. (*b*) Their poetical form: this does not refer to the elegiac verse (which Budde called the "Ḳinah-verse") of the first four songs—a verse-form which since the time of Amos is found in all the prophetic literature—but to the so-called acrostic form: that is, in ch. i., ii., and iv. each successive verse begins with a successive letter of the alphabet; in ch. iii. three verses are devoted to each letter; and the fifth song contains at least twenty-two verses, corresponding to the number of letters in the Hebrew alphabet. This artificial arrangement is scarcely ever found in the Old Testament except in late Psalms and in the later literature, like Prov. xxxi. and Nahum i. 3. The decisive argument against the hypothesis of the Jeremianic authorship is found in the contents of some of the passages. For example, ii. 9 states that at that time the prophets had no vision from the Lord; iv. 17 refers to the reliance on help from Egypt; iv. 20, to the loyalty to the king; v. 7 states that Israel suffered innocently for the sins of the fathers.

Indeed, it is highly improbable that Lamentations was composed by any one man, for the following reasons: (1) One writer would hardly have treated the same theme five different times; (2) the diversified character of the several songs, as shown above, is an argument against the assumption, as is also the difference in the acrostic arrangement; for in ch. i. the ע precedes the פ, while it follows in ii.–iv. In view of the characteristics mentioned above, ii. and iv. may be regarded as belonging together; the first dwelling more on the fate of the city, the second more on that of the inhabitants, and both rising to a higher poetic level than the remaining songs of the book. Ch. i. and v. might also be classed together, while iii. occupies an exceptional position, and may have been added in order to render the whole collection adaptable to religious purposes. In later times, the book was read on the Ninth of Ab, in memory of the destruction of the Solomonic and Herodian Temples; and the custom may have originated even during the time of Zerubbabel's Temple.

The time and place of the composition of the book are matters of conjecture. Ch. ii. and iv. may have been written a decade after the destruction of Jerusalem; i. and v., perhaps toward the end of the Exile; and iii. seems to be of still later origin. Arguments seem to be in favor of Babylon as the place of origin of the book.

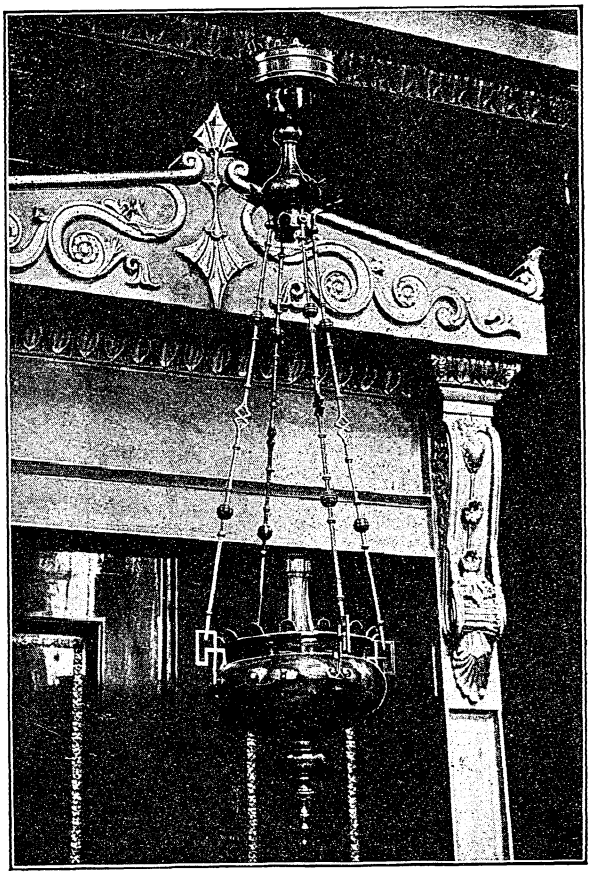
LAMP OF JUDAISM. See Periodicals.



Perpetual Lamp.

(From the synagogue at Ramsgate, England.)

LAMP, PERPETUAL (נר תמיד): In synagogues a perpetual light is maintained in a lamp which consists generally of a glass vessel containing a wick burning in olive-oil; this is held in an ornamental metal receptacle suspended from the ceiling in front of the "Holy Ark," or "Aron ha-Ḳodesh," just as the candlestick ("menorah") in the Tabernacle and Temple had its place before the Ark of the Covenant (see Jew. Encyc. ii. 109, illustrations).

The institution of the perpetual light descended from the Temple (comp. Ex. xxvii. 20; Lev. xxiv. 2) to the Synagogue as the "lesser Temple" ("miḳdash me'aṭ"; Meg. 29a). The perpetual light in the Temple, which is mentioned by classical writers (pseudo-Hecatæus, in Josephus, "Contra Ap." i. 22; Diodorus Siculus, xxxiv. 1), is usually referred to in the Talmud as the "western light" ("ner ha-ma'arabi"), it being the lamp upon the central shaft of the candlestick. The general tradition is that this lamp was never allowed to go out, while the other six lamps burned only during the night (Tamid vi. 1; Men. 86b, 98b; comp. "Yad," Bet ha-Beḥirah, iii. 1–11, and Temidin, iii. 10–18); according to Josephus, "Ant." iii. 8, § 3, three lights burned day and night in the Temple; and, again, Tamid iii. 9 would imply a tradition of two lights burning perpetually. The lighting of the perpetual lamp and the placing of the scrolls of the Law in the Ark are the principal ceremonies in the dedication of a synagogue.

The Rabbis interpret the perpetual lamp as the symbol of God's presence in Israel (Shab. 22b); or as representing the spiritual light which went forth from the sanctuary (Ex. R. xxxvi. 1); or as the symbol of God's Law, which Israel is to keep alive in the world (Ex. R. xxxvi. 2; Lev. R. xxxi. 4). According to Biblical conception, the light is a figure of happiness and prosperity, even of life itself (I Kings xi. 36; Ps. xviii. 29 [A. V. 28]; Prov. xx. 27, xxiv. 20; Job xviii. 6).

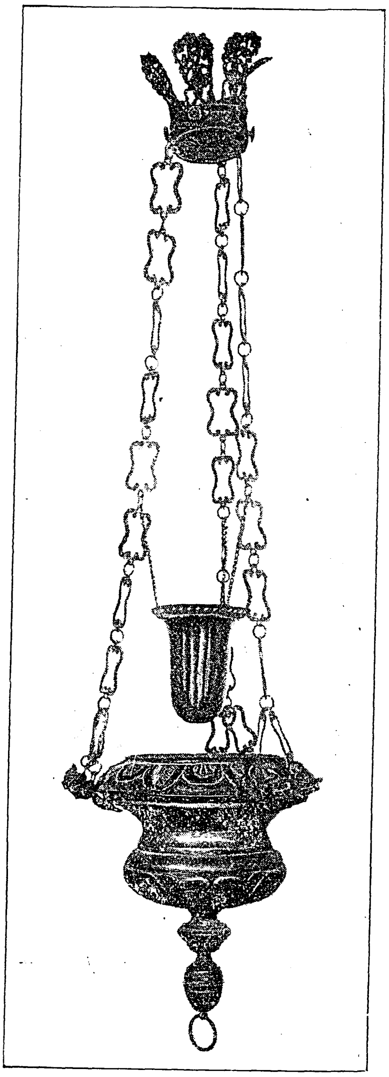
A. I. M. C.

LAMP, SABBATH: Special lamp or chandelier used in Jewish households on Sabbath eve. The lighting of a special lamp on Sabbath eve, regarded as a religious duty, is of early pharisaic origin (see Sabbath). The early tannaim speak of it as a well-known institution (Shab. ii.), and their discussions turn only on the minor details connected with it, as the kind of wick or oil to be employed. The later rabbis differed in their opinions as to whether the lighting of the Sabbath lamp was an obligation ("ḥobah") or a meritorious act ("miẓwah"; Shab. 25b and Tos. *ib. s.v.* "Hadlaḳah"; comp. Shab. 23b). Considered as an obligation, it is especially incumbent upon the housewife, and the neglect of it entails heavenly punishment (Shab. ii. 6). If there is no woman in the house, the obligation rests upon the man (Shulḥan 'Aruk, Oraḥ Ḥayyim, 263, 6). The blessing pronounced at the lighting of the Sabbath lamp is: "Blessed art Thou . . . who hast sanctified us with Thy commandments and enjoined us to light the Sabbath lamp" (Shab. 25b; Tos. *ib. s.v.* "Ḥobah"; "Seder R. Amram" [ed. Warsaw, 1865], i. 24; Oraḥ Ḥayyim, 263, 5; Be'er Heṭeb, *ad loc.*). Pious women recite a prayer ("teḥinnah") for the health and prosperity of their families before and after the blessing.



Perpetual Lamp.
(In the possession of Maurice Herrmann, New York.)

Materials.

The wick used for the Sabbath lamp should be of such material as flax, linen, or cotton, but not of hair or wool, or similar materials. The oil should be of a kind that will easily feed the wick; pitch, wax, or fat should not be used; neither should resin ("'iṭran"), which emits an ill odor (Shab. 20b, 24b). Nor is it permissible to use balsam ("ẓeri"), which produces a sweet odor, lest some one make use of it while it is burning and thus render the supply inadequate, an act that would make him guilty of quenching a light on Sabbath (*ib.* 25b). All other kinds of oil may be used, although olive-oil is the kind most recommended (Oraḥ Ḥayyim, 264, 6; "Sefer Ḥasidim," ed. Wistinetzki, § 623, and note). Candles made of pitch, wax, or fat are also permitted (Oraḥ Ḥayyim, 264, 7).

Number of Lights.

There is no provision made in the Talmud with regard to the number of lights. Later authorities mention the custom of lighting two lights, one for each of the terms "Zakor" and "Shamor," with which the two versions—Ex. xx. 8 and Deut. v. 12—of the Sabbath commandment respectively begin (Kol Bo, 31; Oraḥ Ḥayyim, 263, 1). The seven-branched Sabbath lamp is of later origin, and has its source in the sanctity attached to the number seven by the cabalists (Be'er Heṭeb to Oraḥ Ḥayyim, 263, 1; Ḥayye Adam; Shab. v. 13). Some homes in medieval Jewry had a hanging chandelier that was used only on Sabbath eve. The proverb "When the lamp is lowered all sorrows are fled" has its origin in the lowering of the chandelier, usually of eight branches, on Sabbath eve (Berliner, "Aus dem Innern Leben der Deutschen Juden im Mittelalter," ch. iii., Hebrew ed., Warsaw, 1900; comp. Abrahams, "Jewish Life in the Middle Ages," p. 154).

The Sabbath lamp should be lighted before sunset on Friday. In ancient times six blasts were blown with a trumpet by the public herald, the third blast indicating the time for lighting the Sabbath lamp (Shab. 35b; Josephus, "B. J." iv. 9, end). According to some authorities the Sabbath enters with the kindling of the lights; hence the custom that the woman who lights the lamp does no work afterward (Oraḥ Ḥayyim, 263, 10, Isserles' gloss). The prevalent custom is to kindle the lights and then say the blessing while holding the hands before them (*ib.* 263, 5, Isserles' gloss; comp. Friedländer, "Jewish Religion," p. 358, and note, London, 1900).

The early Karaites, following their teacher Anan, prohibited all lights on the Sabbath, interpreting the passage "Ye shall kindle no fire . . . on the Sabbath day" (Ex. xxxv. 3) to forbid not only the act of kindling, but also the presence of a light in the house. They regarded it as a duty to extinguish even a light left burning by mistake (Fürst, "Gesch. des Karäert." ii. 10 and notes 53, 54, Leipsic, 1862; comp. "Sefer Ḥasidim," § 1147, ed. Warsaw, 1901). The later Karaites, however, light candles on Sabbath eve (Neubauer, "Gesch. des Karäert." Hebr. supplement, ch. iii., Leipsic, 1866).

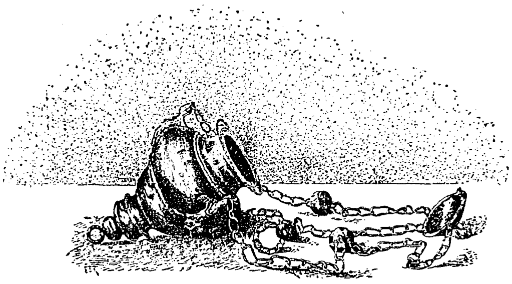
LAMP, THE SEVEN-BRANCHED. See Candlestick; Menorah.

LAMPON (Greek, *Λάμπων*): Enemy of the Jews; lived in the first century at Alexandria. During the reign of Caligula an outbreak against the Jews occurred at Alexandria in the year 38, which Flaccus, then governor of Egypt, made no attempt to check. Philo ("In Flaccum," § 4) designates as the ringleaders (*ταραξοπόλιδες*) two citizens of Alexandria, Isidorus and Lampon, who for their complicity in the riot were executed under Claudius (*ib.* §§ 15, 17). The proceedings in the case before the emperor at Rome are extant in two papyrus fragments, supplementing each other, one at Berlin and the other in the museum of Gizeh.



Perpetual Lamp.
(From the synagogue at Strasburg.)

The passage in which Lampon tries to justify himself is found in the Gizeh papyrus, which breaks off at the point where the emperor commands that Isidorus and Lampon be led away to death. That their execution really took place appears certain from a papyrus found at Oxyrhynchus, according to which a certain Appianus, in defending himself before one of the Antonine emperors, refers to the martyrdom of Isidorus and Lampon.

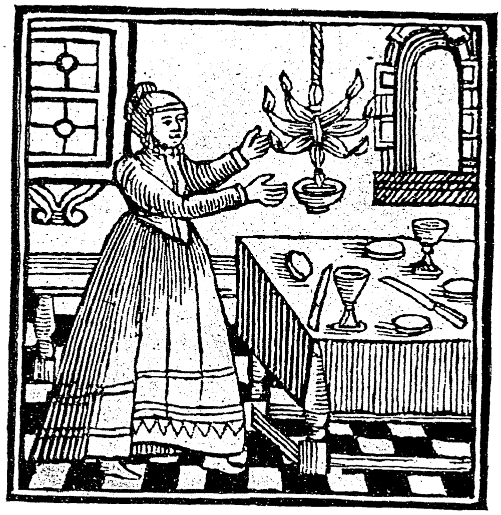
G. S. Kr.

LAMPRONTI, ISAAC B. SAMUEL: Italian rabbi and physician; born Feb. 3, 1679, at Ferrara; died Nov. 16, 1756. His great-grandfather, Samuel Lampronti, emigrated from Constantinople to Ferrara in the sixteenth century. His father, a man of wealth, died when Isaac was six years of age. Isaac was sent to school in his eighth year, his teachers being Shabbethai Elhanan Recanati and S. E. Sanguineti; in his fourteenth year he went to Lugo, to the school of R. Manoah Provençal; thence he went to Padua to study medicine, attending at the same time lectures on philosophy. There he enjoyed especially the intercourse and instruction of the physician R. Isaac Cantarini. On completing his medical studies he was employed as teacher for a time in various Italian cities, and on his return to his native city the yeshibah conferred upon him the title of "ḥaber." Shortly afterward he went to Mantua to complete his rabbinical studies under R. Judah Brial and R. Joseph Cases, who also was a physician. Lampronti entered into especially close relations with R. Judah, whom he frequently mentions in his great work. When Mantua was threatened with war, in 1701, Lampronti, following the wishes of his family, returned to Ferrara, where he established himself as physician and teacher, delivering lectures for adults in his house both on week-days and on the Sabbath.

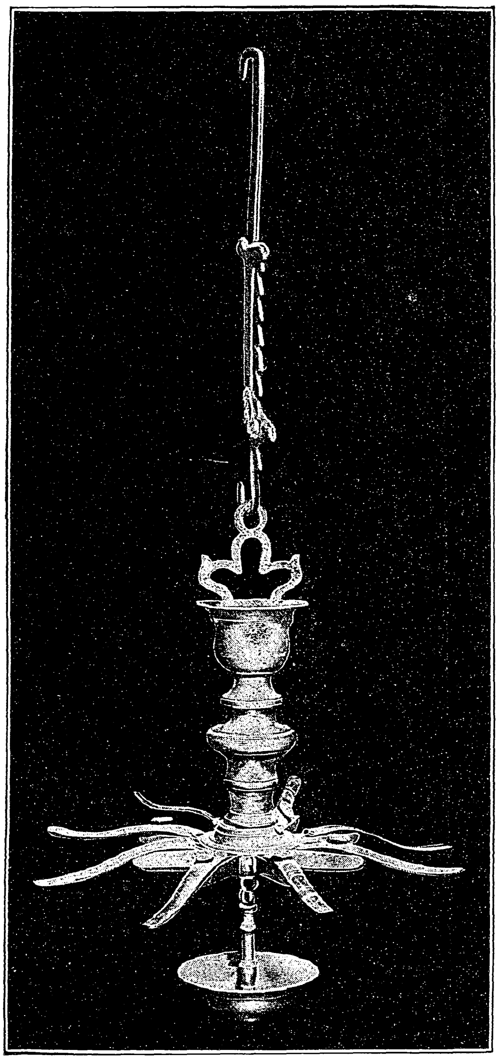
Activity as Teacher.

In 1709 Lampronti was appointed teacher at the Italian Talmud Torah, receiving a monthly salary of twelve scudi (= $11.64) in return for devoting the larger part of his day to teaching chiefly Hebrew grammar, arithmetic, and Italian. Lampronti gave his pupils his own homilies on the weekly sections, composed in Italian, for practise in translating into Hebrew. He also set some of his pupils to copy from the sources material which he needed for the encyclopedic work he had undertaken. The directors of the community, who thought this interfered with his duties as teacher, forbade him, in Oct., 1725, to keep the material for his work in the schoolhouse. When the Spanish Talmud Torah was discontinued, in 1729, the pupils of this school also passed into the hands of Lampronti. Thus he became the teacher of most of the members of the community, and long after his death it was said in the community of Ferrara, "All the learning found among us is derived from the mouth of our father Isaac." In addition to his duties as teacher he filled the position of preacher, from 1704, in the Sephardic community, and, beginning with 1717, in the Italian synagogue. His sermons, which were very popular, have not been preserved. He mentions one of them, on truth and untruth, in referring to his "Sefer ha-Derushim Shelli" in an article of his "Paḥad Yiẓḥaḳ" (letter מ, article מותר לו לאדם



Lighting the Sabbath Lamp.
(From a Passover Haggadah, Amsterdam, 1695.)

לשונות). His funeral oration ("Darke Shalom") on Samson Morpurgo he mentions in his approbation to the latter's responsa "Shemesh Ẓedaḳah." His name is connected with an Ark of the Law in the Sephardic synagogue at Ferrara, placed there by him in 1710, at his own cost.

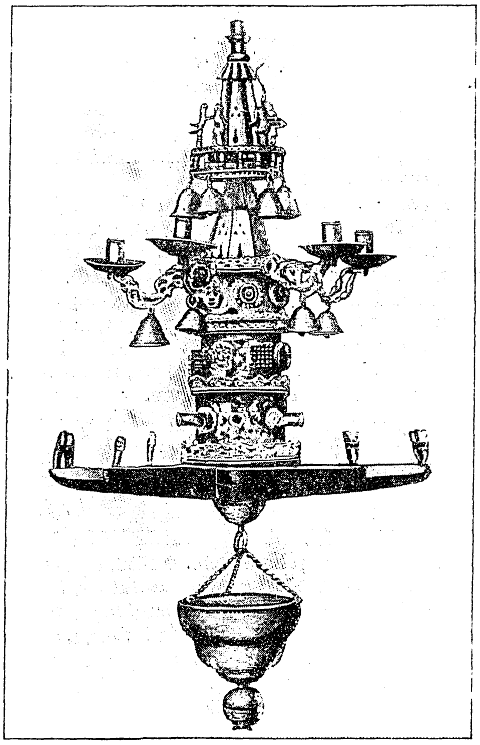


Sabbath Lamp.
(In the possession of Mrs. Alexander Kohut, New York.)

In 1718 Lampronti was appointed a full member of the rabbinical college. His signature as the latest member, following those of Mordecai Zahalon, Shabbethai Elhanan Recanati, and Samuel Baruch Borghi, is found in a responsum of the yeshibah of Ferrara of the year 1727, which he quotes (letter ב, p. 20d).

Activity as Physician.

In 1738 he was elected rabbi of the Spanish synagogue in place of his former teacher, Recanati; and after the death of Mordecai Zahalon he became president of the yeshibah (1749), and began immediately the printing of his great work (see below). He had then reached the age of seventy, and still had eight years of life before him, during which he taught continuously, although he had to be taken to the school by his pupils on account of an ailment of his feet. Notwithstanding his other occupations he continued to practise medicine, visiting his patients early in the morning, because, as he said, the physician has a surer eye and can judge better of the state of his patient after the night's rest. He had a great reputation as physician, and his contemporaries generally added to his name the epithet "the famous physician." He corresponded on medical subjects with his teacher Isaac Cantarini, and he drew upon his medical knowledge in many passages of his work. He died deeply mourned by the community and his numerous pupils. No stone was erected on his grave, for half a year before his death the tombstones of the Jewish cemetery of Ferrara had been destroyed at the instigation of the clergy (Ferrara belonged to the Pontifical States), and the Jews were at the same time forbidden to place stones on the graves of their dead. More than a century later, Ferrara publicly honored the memory of Lampronti; on April 19, 1872, a stone tablet, for which Jews and Christians had contributed, was placed on the house in which he had lived; it bears the following inscription: "Abitò in questa casa Isacco Lampronti, nato nel MDCLXXIX., morto nel MDCCLVI. Medico Teologo tra i dotti celebratissimo. Onorò la patria. Riverenti alla scienza alcuni cittadini posero MDCCCLXXII."

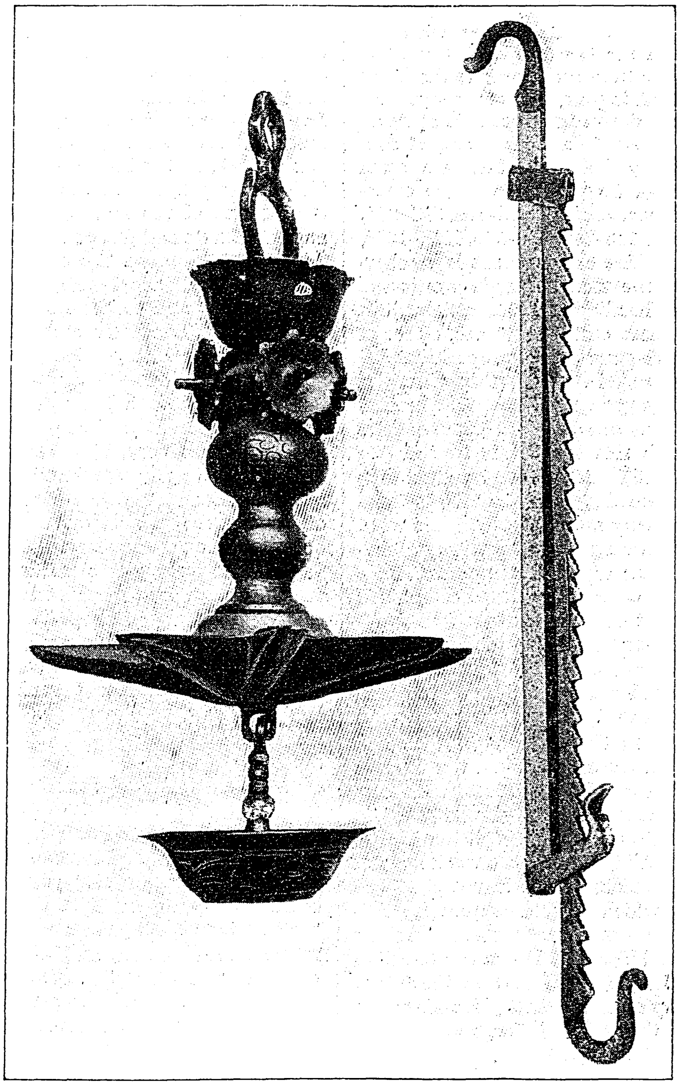


Sabbath Lamp.
(In the possession of H. Frauberger, Frankfort-on-the-Main.)

Lampronti's life-work was his famous rabbinical

His "Paḥad Yiẓḥaḳ."

encyclopedia "Paḥad Yiẓḥaḳ" (name derived from Gen. xxxi. 42), the material for which he had begun to collect as early as his student days at Mantua, and on which he worked during his whole life. When he decided, in his old age, to publish this great work, he traveled together with his pupil Jacob Saraval, as the latter says in the preface of the correctors (Saraval and Simḥah Callinari), through the Italian cities in order to secure the approbations ("haskamot") of the rabbinical authorities of Italy for the work. The collection of these approbations, which were given in 1749 and 1750, is a curious monument of the Jewish scholars of northern Italy in the eighteenth century; it includes sonnets and poems in other forms in honor of Lampronti. The following cities are represented by their yeshibahs or rabbis: Venice, Leghorn, Reggio, Verona, Ancona, Padua, Mantua, Casale Monferrato, Modena, Turin, Florence, Alessandria della Paglia, Pesaro, Finale, Lugo, Rovigo. In the second volume are added the approbations of R. Malachi b. Jacob Kohn of Leghorn, author of the "Yad Mal'aki," and of three Palestinian scholars stopping at Ferrara. The work was planned to fill six volumes, as recorded in the printing permit of the Jewish communal directorate of Venice. But only the first volume and the first half of the second volume appeared during the author's lifetime. Vol. i. (1750) contains in two specially paged sections (of 124 and 76 folios respectively) the letter א; the first part of vol. ii. (1753) contains the letters ב (fol. 1–75) and ג (fol. 76–105). The second part of vol. ii. appeared forty years after the author's death (1796); it contains the letters ה (fol. 1–49), ו (fol. 50–60), ז (fol. 67–77), ח, beginning (78–110). Vol. iii. appeared in the same year; it contains: ח, end (fol. 1–61), ט (fol. 63–93). These volumes were printed at the press of Isaac Foa (formerly Bragadini) at Venice. Two other volumes appeared in 1813 (vol. iv., Reggio) and 1840 (vol. v., Leghorn); vol. iv. contains the letters י (fol. 1–41a), כ (fol. 41a–108); ל (specially paged, 1–26); vol. v. contains the letter מ (241 fols.). This last-named volume contains additions to the text by Abraham Baruch Piperno, under the title "Zekor le-Abraham." In 1845 the autograph manuscript of the entire work was acquired by the Bibliothèque Nationale of Paris, in 120 volumes, 68 of which corresponded with the parts that had so far appeared. The Paris manuscript also contains the author's Italian correspondence, which was not included in the edition (see Cat. Hebr. MSS. Bibliothèque Nationale. p. 61. Nos. 458-577). The society Meḳiẓe Nirdamim, on its foundation, took as one of its first tasks the publication of those portions of Lampronti's work which had not yet been printed. The first to appear (in octavo instead of folio, the size of the previous volumes) were the letters נ (1864; 100 fols.), ס (1866; 196 fols.), ע (1868; 173 fols.), פ (1871; 74 fols.), and צ and first half of ק (1874; 200 fols.). The work was continued ten years later by the reorganized society Meḳiẓe Nir-



Sabbath Lamp and Holder.
(In the U. S. National Museum, Washington, D. C.)

damim; during 1885–87 appeared the remainder of the letter ק, and the letters ר (148 fols.), ש (318 fols.), and ת (183 fols.). Thus the publication of the work was completed 127 years after the appearance of the first volume.

Character of the Work.

Lampronti's work is an alphabetically arranged encyclopedia to the Talmud and Talmudic literature. In the censor's permit, dated June, 1749, prefixed to the first volume, it is designated as "Dizionario Rituale in Lingua Ebraica," a designation which probably originated with the author. As a matter of fact Lampronti's encyclopedia deals chiefly with the Halakah, the material for the articles being taken from the entire halakic literature down to the latest responsa, which he had, in part, in manuscript. He devotes much space to discussing questions of ritual law, as found in the responsa of contemporary Italian rabbis. On some questions he gives the entire correspondence, as on fols. 9d–13a, 31d–37d, 46d–50a, 74b–76a, 79c–80b, 102b–107a, in the first volume. The arrangement is a characteristic feature of the work. Single words are used occasionally as headings for his articles, but more frequently he uses entire sentences, either as he found them in the sources, or as propositions derived from the sources. In vol. i. thirty articles begin with the word אסמכתא; and a special article, besides, refers to about one hundred other articles of the work in which this concept is treated (see Jew. Encyc. ii. 215–218). About one hundred articles begin with the word אפטרופוס, and a special article refers to as many more in which the word occurs. The articles are arranged in strictly alphabetical order, this being especially important in a work of this kind. The quotations are accompanied by an exact statement of their sources. In addition to the Halakah much space is devoted to the Haggadah of the Talmuds, and the work may also be regarded as an alphabetical index of the Talmudic haggadic sentences. It may be noted as a curious instance that in the article בת קול (ii. 766) Lampronti refers to a work in Italian, the title of which he quotes in carefully punctuated Hebrew transcription: "Demostrazioni della Essenza di Dio dalle Opere della sua Creazione; da Guglielmo Deram [דיראם], Firenze, 1719." Lampronti's work has not yet been critically examined, nor has a list been made of the sources which he used or quoted. Addenda made by Lampronti are preserved in the library of the Talmud Torah at Ferrara; according to Rabbi Benedetto Isaac Levi of Ferrara, the author of a short biography of Lampronti ("Ha-Maggid," xix. 70), there are thirty-five folios, most of the leaves of which are, however, blank. But the addenda which are scattered through the several volumes of the work itself would if collected make a stout volume.

Lampronti's elder son, **Samuel Ḥay,** is mentioned in the article פדיון; his younger son, **Solomon Lampronti,** was a physician, like his father, and versed in rabbinical lore.

LANCASTER: Town founded in Lancaster county, Pennsylvania, in 1730; one of the six or seven cities in the United States containing pre-Revolutionary Jewish settlements. The earliest record of this interesting Jewish settlement seems to be that of a deed, dated Feb. 3, 1747, from Thomas Cookson to Isaac Nunus Ricus and Joseph Simon(s), conveying a half-acre of land in the township of Lancaster "in trust for the society of Jews settled in and about Lancaster, to have and use the same as a burying-ground." At this time there were about ten Jewish families at Lancaster, including Joseph Simon, Joseph Solomon, and Isaac Cohen, a physician. In 1780 the list of Jews included also Bernard Jacob, Sampson Lazarus, Andrew Levy, Aaron Levy, Meyer Solomon, Levy Marks, and Simon Solomon, all shopkeepers, and Joshua Isaacs, later of New York, father-in-law of Harmon Hendricks. The leading figure in the settlement was Joseph Simon, one of the most prominent Indian traders and merchants and one of the largest landholders in America, his enterprises extending not only over Pennsylvania, but to Ohio and Illinois and to the Mississippi river. In his Lancaster store Levy Andrew Levy was a partner, and Simon's sons-in-law, Levi Phillips, Solomon M. Cohen, Michael Gratz, and Solomon Etting (1784), were also associated with him at various periods. In partnership with William Henry, Simon supplied the Continental army with rifles, ammunition, drums, blankets, and provisions. He died Jan. 24, 1804, at the age of ninety-two; and his grave is still preserved in the above-mentioned cemetery.

Joseph Simon.

A list of twenty-two residents of Lancaster to whom various Indian tribes in Illinois conveyed a tract of land comprising the southern half of the present state of Illinois, includes the following names of Jews: Moses, Jacob, and David Franks, Barnard and Michael Gratz, Moses Franks, Jr., Joseph Simon, and Levy Andrew Levy.

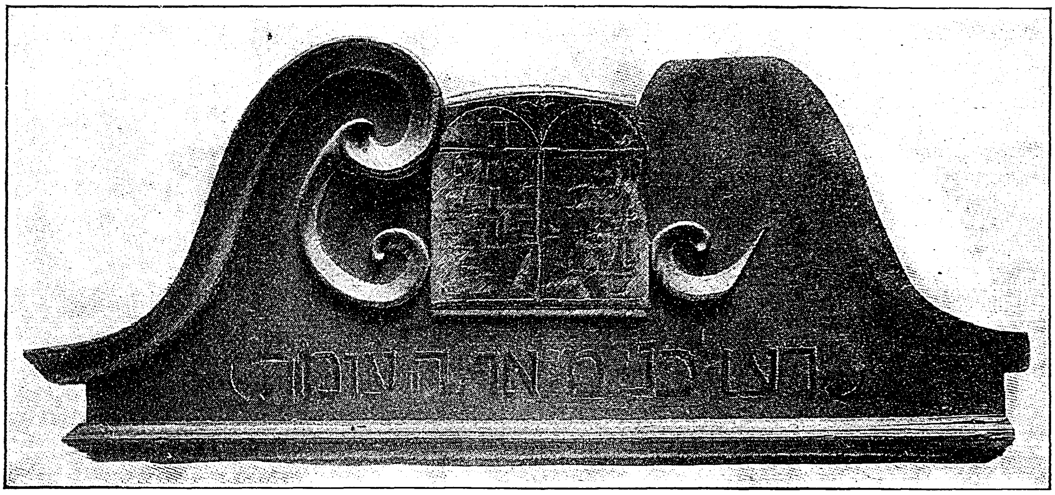
Aaron Levy, a native of Amsterdam, Holland, and a partner of Joseph Simon at Lancaster, lent large sums of money to the American colonists during the Revolution. Joseph Cohen, a native of Lancaster, was on guard at Philadelphia, in the Continental army, on the night when Lord Cornwallis was captured. Among attorneys at Lancaster are found Samson Levy, admitted to the bar in 1787, and Joseph Simon Cohen (grandson of Joseph Simon), admitted in 1813, and from 1840 to 1853 prothonotary of the Supreme Court of Pennsylvania.

Synagogue.

There was probably no permanent synagogue or congregational organization at Lancaster during the eighteenth century, although it has been stated that one was formed in 1776; but regular religious services were held in a sort of private synagogue in the house of Joseph Simon. A portion of the Ark there used has been presented to the American Jewish Historical Society.

Many of the Jews of Lancaster were supporters of the Congregation Mikve Israel of Philadelphia. The Jewish families mentioned above seem to have moved from Lancaster at the beginning of the nineteenth century. No interment took place in the cemetery from 1804 until 1855. In the latter year there was a new Jewish influx into Lancaster, the newcomers being unrelated by descent to the former Jewish residents.

The old Jewish cemetery, which is still preserved, came into the possession of the Congregation Shaarai Shomayim soon after the latter's organization by residents of Lancaster and the vicinity (Feb. 25, 1855). This congregation was incorporated Nov. 18, 1856; and Jacob Herzog was the first president. Its synagogue was dedicated Sept. 22, 1867; and it has about forty-eight members and seat-holders. The exclusive right of the congregation to control the cemetery was recognized by the Superior Court of Pennsylvania in a recent decision (Congregation Shaarai Shomayim vs. Moss, 22 Penn. Superior Court Rep. 356 [1903]). This congregation is at present the leading one in Lancaster; the Rev. Isadore Rosenthal, who succeeded the Rev. Clifton H. Levy, is its rabbi. There are also the following other Jewish organizations at Lancaster: Congregation Degel Israel (Orthodox), founded Sept. 25, 1895, and having about fifty members and seat-holders; United Hebrew Charities of Lancaster County; Ladies' Hebrew Benevolent Society, founded 1877; and the Harmonie Club (social).



Entablature of the Ark of the Law of the Synagogue at Lancaster, Pa., Eighteenth Century.
(In the possession of the Jewish Historical Society of America.)

At present (1904) there are in Lancaster about fifty Jewish families of German descent and about 150 of Russian extraction, the latter having come to Lancaster since 1884.

Oldest Synagogue.

On an old Indian trail leading from the Conestoga to the Swatara, and not far from Lancaster, is a place pointed out as the site of one of the first synagogues in America, referred to by J. F. Sachse in his "The German Sectarians of Pennsylvania" as "at one time the most distinctive and populous congregation of the ancient faith in the colonies." He further says that many of the German Christians adopted the Jewish customs (which he states still obtain among the families of old settlers in Berks, Lebanon, and Lancaster counties) as a result of the potent influence of the Jews of Lancaster, Heidelberg, and Schaefferstown. Some of the Christian settlers even became members of this congregation. The Jewish cemetery established about 1732 near Schaefferstown (now in Heidelberg township. Lebanon county, but originally in Lancaster county) is almost obliterated.

A. H. N.

LÁNCZY, LEO: Hungarian deputy and financier; born in 1852. After having been connected for several years with the Anglo-Hungarian Bank and the Ungarische Boden-Credit-Gesellschaft, he was elected in 1881 director-general of the Hungarian Bank of Commerce, in which capacity he contributed greatly to the promotion of Hungarian commerce, and exerted an important influence on the commercial policy of the country. He was especially successful in enlarging Hungarian credit in foreign countries, and in making the finances of Hungary independent of those of Vienna. In 1893 the district of Zsolna returned him to the Hungarian parliament, where he took a prominent part in the currency conferences; and in 1896 he was member of the parliament as deputy of the city of Miskolcz. Lánczy received in 1891 the Order of the Iron Crown, and subsequently the "Comthur-Kreuz" of the Order of Francis Joseph, in recognition of his services in promoting the Millennium

Exposition. In 1902 he received the title of "Hofrath." Lánczy is a convert to Christianity.

LAND LAWS. See Agrarian Laws; Landlord and Tenant; Sabbatical Year.

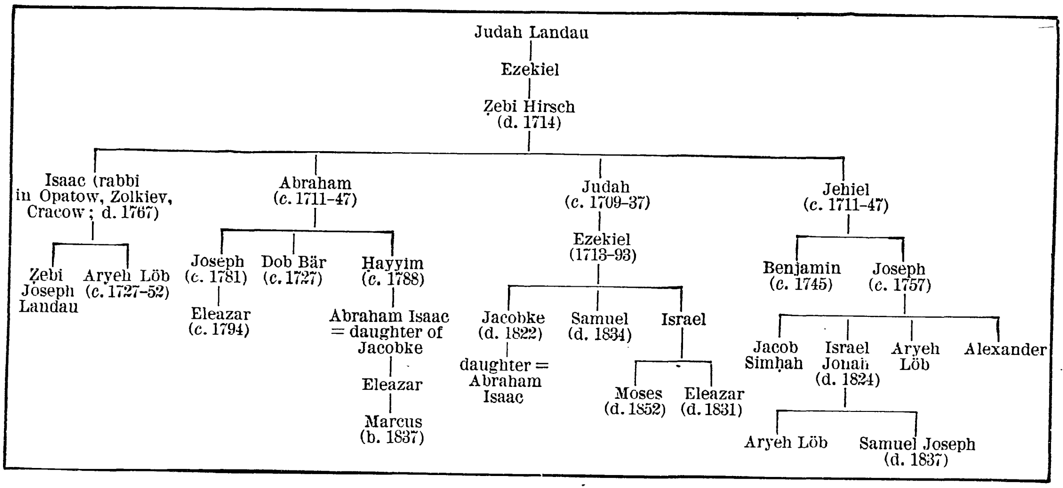
LANDA-ON-THE-TAUBER. See Bischofsheim-on-the-Tauber.

LANDAU. See Palatinate.

LANDAU: Family name derived from a city in western Germany; found largely among Polish Jews, who probably were expelled from that city about the middle of the sixteenth century (see Löwenstein, "Gesch. der Juden in der Kurpfalz," p. 33, Frankfort-on-the-Main, 1895) and retained the name in their new homes. The earliest bearer of it of whom there is record is **Jacob Baruch ben Judah Landau,** author of the ritual work "Agur," who lived in Italy about 1480 or 1490. From the latter part of the sixteenth century the Landau family is met with in Poland, especially in the western part of Podolia, which, after the partition of Poland, was annexed to Austria. In various instances the name "Landau," which had become a Jewish family name, was adopted by people who had no family connection with the original emigrants from the German city. Thus, it was assumed by a great-grandson of Abraham ben Elijah Wilna (see Jew. Encyc. i. 107, *s.v.* Abraham ben Elijah of Wilna).

The first known member of the Landau family in Poland is **Ẓebi ben Moses Landau,** one of the communal leaders of the Lemberg congregation, who died in Cracow Jan. 7, 1620 (Buber, "Anshe Shem," p. 186). **Ẓebi ben Saul Landau** was rabbi of Zmigrod and died in Lemberg June 15, 1722. **Solomon Landau,** father-in-law of Jacob Joshua, lived in Lemberg toward the end of the seventeenth century (*ib.* pp. 195, 206).

Pedigree of Landau Family.



Judah Landau
Ezekiel
Ẓebi Hirsch (d. 1714)
Isaac (rabbi in Opatow, Zolkiev, Cracow; d. 1767)
Abraham (c. 1711-47)

Aryeh Löb
Alexander
daughter = Abraham Isaac
Eleazar
Moses (d. 1852)
Eleazar (d. 1831)
Marcus (b. 1837)
Aryeh Löb
Samuel Joseph (d. 1837)

Only the above incomplete pedigree can be drawn of that branch of the family to which Ezekiel Landau belonged, and which had representatives in Zolkiev, Opatow, and Brody.

The first member of this branch definitely mentioned is **Judah Landau,** who lived about the beginning of the seventeenth century. He and his son, **Ezekiel Landau,** are known only by name. The latter's son, **Ẓebi Hirsch Landau,** was a delegate to the Council of Four Lands, and was also one of the signatories to the privilege granted by that body to the printer of Zolkiev in 1699 (Buber, "Ḳiryah Nisgabah," p. 104, Cracow, 1903). One of his sons, **Judah Landau,** who lived in Opatow, was father of the most famous scion of the family, Ezekiel Landau.

Branches of the family live in Russian Poland and in Brody. Descendants of the same family are: **Israel Jonah Landau** (d. 1824), rabbi of Kempen, province of Posen, and author of "Me'on ha-Berakot" (Dyhernfurth, 1816), novellæ to the Talmudic treatise Berakot; and his son, **Samuel Joseph Landau** (d. 1837), also rabbi in Kempen, and author of "Mishkan Shiloh" (Breslau, 1837), novellæ and responsa.

D.

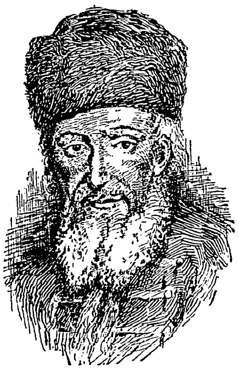
Eleazar ben Israel Landau: Rabbi of Brody, where he died of cholera in 1831. He was the author of a work entitled "Yad ha-Melek," novellæ on Maimonides' "Yad" and notes to the Talmud (parts i. and iv., Lemberg, 1829; part ii. *ib.* 1810).

Bibliography: Eisenstadt-Wiener, *Da'at Ḳedoshim*, p. 133.

S. S. M. Sel.

Ezekiel ben Judah Landau: Polish rabbi; born in Opatow Oct. 8, 1713 (see preface to "Noda' bi-Yehudah," 2d collection of his son Jakobke); died at Prague April 29, 1793. He received his Talmudical education at Vladimir and Brody. From 1734 to 1745 he acted as first dayyan of Brody; in the latter year he became rabbi of Jampol.

Landau's tactful attitude in the affair of the Eybeschütz amulets won for him general approbation. In a letter addressed to the rabbis who consulted him on the subject he endeavored to persuade them to establish peace between the disputants, and insinuated that the amulets might have been falsified, thus opening to the accused rabbi an honorable way of exculpating himself. The letter attracted the attention of the leaders of the community of Prague; in 1755 Landau was called to the rabbinate there; and he continued to hold the position till his death.



Ezekiel Landau.

Combining vast erudition with great amenity of character, his incumbency proved very beneficial to the community. Respected by the authorities, who recognized the ardent patriotism displayed by him on more than one occasion, he was often consulted on Jewish religious matters. A letter addressed to Landau by the government, asking for his opinion on the question whether an oath pronounced by one holding a discarded scroll of the Law is binding, is inserted in the "Noda' bi-Yehudah" (ii. 65).

While very strict in ritual matters, Landau, for the sake of peace, sometimes sanctioned things which he did not approve. Thus, notwithstanding his previous prohibition, he permitted Löb Honigsberg to continue the construction of a building on semi-holidays, the latter having pleaded urgency (*ib.* ii. 29). Although a lover of Haskalah, as may be seen from his approbation to the "Yen Lebanon" of Wessely, Landau saw great danger for Judaism in the invasion of German ideas resulting from the German translation of the Bible by Mendelssohn ("Ẓelaḥ" to Ber. 28b).

Though a student of the Cabala and well versed in mystic literature, Landau was a decided adversary of Ḥasidism. He thunders against the recitation of לשם יחוד as done by the Ḥasidim, and applies to them the words of Hos. xiv. 10, substituting therein "Ḥasidim" for "Posh'im."

Landau witnessed the siege of Prague in 1757, and when urged to leave the city he decided to cast his lot with the rest of the people. Some years later, in a controversy between the rabbis of Frankfort-on-the-Main and others concerning a form of divorce to be granted to a man from Cleves, Landau took issue against the former; and this so enraged them that in 1769 it was decided that neither Landau nor any of his sons should ever be elected to the rabbinate of Frankfort. In the conflagration of 1773 Landau lost most of his manuscripts. He was thereupon induced to begin the publication of those of his works which the flames had spared, and to add to them his new productions.

Landau's published works are: "Noda' bi-Yehudah" (1776; 2d ed. 1811), responsa; "Derush Hesped," a funeral oration on the death of Maria Theresa (Prague, 1781, in German); "Shebaḥ we-Hoda'ah," a derashah (1790); "Mar'eh Yeḥezḳel," notes to the Talmud, published by his son Samuel Landau in the Talmud edition of 12 vols., 1830; "Ẓiyyun le-Nefesh Ḥayyah," novellæ on different Talmudic treatises, viz., Pesaḥim (1784), Berakot (1791), Beẓah (1799), the three republished together in 1824; "Dagul me-Rebabah" (1794), notes on the four ritual codices; "Ahabat Ẓiyyon" (1827), addresses and sermons; "Doresh le-Ẓiyyon" (1827), Talmudic discussion.

Though a Talmudic scholar and a believer in the Cabala, yet Landau was broad-minded and not opposed to secular knowledge. He, however, objected to that culture which came from Berlin. He therefore opposed Mendelssohn's translation of the Pentateuch, and the study of the sciences and of languages advocated by Wessely. Landau was highly esteemed not only by his coreligionists, but also by others; and he stood high in favor in government circles.

S. S. B. FR.

Hermann Landau: Publicist in Prague, where he died about 1890; great-grandson of Ezekiel Landau.

Isaac Landau: Polish rabbi; born at Opatow; died in Cracow 1768. His first rabbinical position was in his native city, whence he journeyed in 1724 to the meeting of the Council of Four Lands, held at Yaroslav. In 1729 he was rabbi of Zolkiev, and in 1734 district rabbi of Lemberg. About 1754 he was elected rabbi of Cracow, where he remained till his death.

Landau is known for the approbations which he gave to several works, among which were "Mafteaḥ ha-'Olamot" by Emanuel Hay Richi, and "Adne Paz" by Meïr b. Levi. He is also known through his correspondence with Jonathan Eybeschütz on his contest with Jacob Emden. According to T. Levenstein, Landau left two sons: **Jacob Landau,** rabbi of Tarnopol, and **Ẓebi Joseph Landau,** rabbi of Greidig.

S. S. N. T. L.

Isaac Elijah ben Samuel Landau: Russian preacher, exegete, and communal worker; born at Wilna 1801; died there Dec. 6, 1876. At the age of eighteen he settled at Dubno, his wife's native town, where he carried on a prosperous business. On Saturdays and holy days he used to preach in the synagogues, attracting large audiences. Owing to his eloquence Landau was chosen by the communities of Volhynia as member of the rabbinical commission appointed by the emperor in 1861, which necessitated his remaining for five months in St. Petersburg. In 1868 he was called to Wilna as preacher and dayyan, which office he held till his death. At Wilna he established a kasher kitchen for Jewish soldiers.

Landau was a recognized authority in rabbinical matters, and many authors solicited his approbation of their works. He himself was a prolific writer, and was the author of the following commentaries: "Ma'aneh Eliyahu" (Wilna, 1840), on the Tanna debe Eliyahu, accompanied with notes on other subjects under the title "Siaḥ Yiẓḥaḳ"; a double commentary on the Mekilta (*ib.* 1844): "Berure ha-Middot," on the text, and "Miẓẓui ha-Middot," glosses to the Biblical and Talmudic passages quoted in the commentary; "Patshegen" (*ib.* 1858), on Proverbs; "Miḳra Soferim" (Suwalki, 1862), on Masseket Soferim; "Dober Shalom" (Warsaw, 1863), on the daily prayers; "Kiflayim le-Tushiyyah," on the twelve Minor Prophets (only that on Joel published, Jitomir, 1865) and on Psalms (Warsaw, 1866); "Patshegen ha-Dat," on the Five Scrolls (Wilna, 1870) and on the Pentateuch (*ib.* 1872–75); "Aḥarit le-Shalom" (*ib.* 1871), on the Pesaḥ Haggadah; "Derek Ḥayyim" (*ib.* 1872), on Derek Ereẓ Zuṭa; "Lishmoa' ka-Limmudim" (*ib.* 1876), on the haggadah of the Talmudists; and "Simlah Ḥadashah," on the Maḥzor (published in the Wilna editions of the Maḥzor).

Landau published also "Derushim le-Kol Ḥefẓehem" (*ib.* 1871–77), a collection of sermons; and two of his funeral orations: "Ḳol Shaon" (Wilna, 1872; also translated into Russian), on the wife of Prince Potapov; and "Ebel Kabed" (Eydtkuhnen, 1873), on Samuel Straschun. He left besides a number of works still unpublished.

S. S. B. FR.

Jacob b. Judah Landau: German-Italian codifier; lived in the second half of the fifteenth century. His father was one of the chief authorities on the Talmud in Germany; hundreds of Talmudists, among them naturally his son, were his pupils.

Landau left Germany and settled in Italy, living first in Pavia (1480) and then in Naples (1487). In the latter city he published, some time between 1487 and 1492, his code "Agur," which he composed for his pupil Ezra Abraham b. David Obadiah, because, the latter's time being devoted to physics and metaphysics, he could not enter deeply into the study of the Talmud (see introduction to "Agur"). This practical consideration determined the form of the "Agur," which contains only those rules that a layman should know, and comprises principally an abridged presentation of the material treated in the first and second parts of the Ṭurim. The author of the Ṭurim, Jacob b. Asher, is Landau's chief authority; and the "Agur" may be considered really as a supplement to that work. In the "Agur" Landau gives excerpts from the halakic literature which appeared after the time of Jacob b. Asher.

Although the "Agur" possesses little originality, it held an important position among law codes, and is often quoted, especially by Joseph Caro in the Shulḥan 'Aruk. German influence on the religious practises of the Italians was increased by Landau's work, such authorities as Jacob Mölin, Isserlein, and other Germans having been little noticed by Italians before him. At the end of the "Agur" Landau gave a number of conundrums relating to the Halakah, under the title "Sefer Ḥazon," which were afterward published separately (Venice, 1546; Prague, 1608). The "Agur" was the first Jewish work to contain a rabbinical approbation, besides being the second Hebrew book printed during the author's lifetime (see JEW. ENCYC. ii. 27, *s.v.* APPROBATION).

G. L. G.

Marcus Landau: Austrian literary historian; born at Brody, Galicia, Nov. 21, 1837. After completing his education he entered upon a mercantile career (1852–69 at Brody; from 1869 at Vienna), but abandoned it in 1878 for a life of letters. He made repeated visits to Italy. He became a correspondent for and contributor to the "Allgemeine Zeitung" of Munich, the "Presse," the "Frankfurter Zeitung," and the "Zeitschrift für Vergleichende Literaturgeschichte." In 1871 he obtained the Ph.D. degree from the University of Giessen. He is the author of the following works: "Die Quellen des Dekameron," Vienna, 1869, 2d ed. 1884; "Beiträge zur Geschichte der Italienischen Novelle," Vienna, 1875; "Giovanni Bocaccio, Sein Leben und Seine Werke," Stuttgart, 1877 (Italian translation by Camillo Antonio Traversi, 1881); "Die Italienische Literatur am Oesterreichischen Hofe," Vienna, 1879 (Italian translation by Mrs. Gustava von Stein-Rebecchini, 1880); "Rom, Wien, Neapel Während des Spanischen Erbfolgekrieges, ein Beitrag zur Geschichte des Kampfes Zwischen Papstthum und Kaisertum," Leipsic, 1885; "Geschichte Kaiser Karl's VI., als König von Spanien," Stuttgart, 1889; "Skizzen aus der Jüdischen Geschichte," 1897; "Geschichte der Italienischen Literatur im Achtzehnten Jahrhundert," Berlin, 1899. He wrote also over 700 essays, memoirs, and feuilleton articles in German and Italian for newspapers and literary periodicals.

S.

Moses Israel Landau: Austrian printer, publisher, and lexicographer; born Dec. 28, 1788, at Prague; died there May 4, 1852; grandson of Ezekiel Landau. After finishing his studies at a yeshibah of his native town he established a Hebrew and Oriental printing-press in Prague, which became important in the annals of Hebrew typography.

In 1819 he was elected superintendent of the Jewish school in Prague, and shortly afterward was made one of the board of directors of the Jewish community. He was elected alderman ("Stadtverordneter") in 1849, and a member of the city council ("Stadtrath") in 1850.

Landau began his literary career by publishing a volume of poems entitled "Amaranten" in 1820. He followed this up in 1824 with his almanac for the friends of Hebrew literature, entitled "Bikkure ha-'Ittim." As a preparation for his Aramaic-Talmudic dictionary Landau published his book on the "Geist und Sprache der Hebräer nach dem Zweiten Tempelbau," Prague, 1822 (part i., history of language; part ii., chrestomathy from the Talmud, Zohar, and Midrashim). In 1819 he had begun a new edition of the "'Aruk" of R. Nathan of Rome, to which he added Benjamin Mussafia's "Mussaf he-'Aruk." His "Rabbinisch-Aramäisches Wörterbuch zum Verständnis des Talmuds, der Targumim und Midraschim" (Prague, 1819-24; 2d ed. *ib.* 1834-35) contains valuable observations and numerous treatises of philosophical, historical, archeological, and geographical character.

Landau's collection of all the foreign words (לעז) found in Rashi (on the Bible and Talmud), in the Tosafot, in Maimonides, and in Rosh, is of lasting value. The work, entitled "Marpe Lashon," was published first in his edition of the Mishnah (Prague, 1829-31), then in the editions of the Talmud (*ib.* 1829-31 and 1839-45) and in his edition of the Bible (*ib.* 1833-37). It has also appeared separately (Odessa, 1865), with notes by Dormitzer.

Landau's chief merit as a typographer is due to the fact that he always personally supervised the correction of the works published in his establishment, so that they issued from the press with scarcely a fault.

In his will Landau left his Hebrew library to the orphan asylum established by him, and his other Oriental works to a Jewish theological seminary to be founded in the future.

Samuel ben Ezekiel Landau: Chief dayyan of Prague, where he died Oct. 31, 1834, at an advanced age. Landau was the champion of Orthodox Rabbinism, and when, at the end of the eighteenth century, the Austrian emperor planned the establishment of Jewish theological seminaries, Landau was one of the rabbis that objected thereto. He had a controversy on this subject with Baruch Jeiteles (Phinehas Hananiah Argosi di Silva), who, under the title of "Ha-Oreb," published (Vienna, 1795) Landau's letter to him and his own rejoinder. Landau published his responsa under the title of "Shibat Ẓiyyon" (Prague, 1827). He edited his father's "Ahabat Ẓiyyon" and "Doresh le-Ẓiyyon" (*ib.* 1827), adding to the former work four homilies of his own, and to the latter a number of halakic discourses.

LANDAU, ADOLPH YEFIMOVICH: Russian journalist and publisher; born at Rossienny, Russia, 1841; died at Berlin July 21, 1902. In 1862 he moved to St. Petersburg, attended the lectures on law at the university, and after two years went to Kovno, where he taught for a year. On his return to St. Petersburg he devoted himself to journalistic work. His first literary efforts consisted of letters in the "Razsvyet," and of articles on Jewish life published in "Syevernaya Pochta," "Biblioteka dlya Tchtenia," and "Sovremennoi Listok." With great enthusiasm Landau devoted himself to the task of making known to the public the life of the Jewish masses and of bringing more light and knowledge to the latter. The time seemed propitious; for there were signs of more freedom for and fuller justice to the Jews. Landau wrote a series of spirited letters in the St. Petersburg "Vyedomosti," and translated a number of sketches by Jellinek on the Hebrew race, and Deutsch's well-known article on the Talmud. In 1871 appeared the first volume of the "Biblioteka" edited by him, and for a period of ten years this publication was the organ of Russo-Jewish literature. Between the years 1871 and 1880 there appeared in its pages contributions from the foremost Jewish writers of the day, such as Levanda, L. O. Gordon, I. G. Orshanski, A. J. Harkavy, C. A. Bershadsky, M. G. Morgulis, and Stasov. Landau possessed the faculty of recognizing ability in young writers, and to these he gave his unstinted support.

During the seventies he published numerous letters and articles in "Dyen" (Odessa), "Molva," and "Razsvyet." In 1881 he issued the first volume of the "Voskhod," a monthly publication, and in 1882 "Nedielnaya Khronika Voskhoda," a weekly. The "Voskhod," like the "Biblioteka," soon numbered among its contributors the leading Russo-Jewish writers. Assisted by Weinberg, Landau worked unceasingly to make it a power for good. Not content with securing contributions from the most talented writers, he wrote much himself. For eighteen years he unswervingly endeavored to secure for the Russian Jew the full benefit of citizenship.

Failing health compelled Landau to relinquish the editorship of the "Voskhod." In 1901 he issued the ninth volume of the "Biblioteka" and the sixth volume of Graetz's "History of the Jews." He died while preparing for publication the tenth volume of the "Biblioteka."

Bibliography: *Voskhod*, July 25, 1902; *Budustchnost*, July 26, 1902, p. 591.

H. R. J. G. L.

LANDAU, LEOPOLD: German gynecologist; born at Warsaw July 16, 1848. He studied at the universities of Breslau, Würzburg, and Berlin, graduating from the last-named in 1870 (M.D.). He served through the Franco-Prussian war (1870-71) as assistant surgeon. From 1872 to 1874 he was assistant at the gynecological hospital of the University of Breslau, where he became privat-docent (1874). In 1876 he removed to Berlin, and became a member of the medical faculty of its university; in 1893 he received the title of professor; and in 1902 he was appointed assistant professor. In 1892, in conjunction with his brother Theodor, he opened a private gynecological hospital.

Landau has taken an active interest in the political affairs of the German capital. He has been alderman for a number of years, and a member of the city board of hospitals. Among Landau's works are: "Die Wanderniere der Frauen," Berlin, 1881; "Die Wanderleber und der Hängebauch der Frauen," *ib.* 1882; "Die Vaginale Radicaloperation: Technik und Gesch." (with Theodor Landau), *ib.* 1896; "Anatomische und Klinische Beiträge zur Lehre von der Myomen am Weiblichen Sexualapparat," Berlin and Vienna, 1899. His brother, **Theodor Landau** (b. Breslau May 22, 1861; M.D., Göttingen, 1885), is also a gynecologist, and has practised in Berlin since 1891.

LANDAU, WOLF: German rabbi and author; born at Dresden March 1, 1811; died there Aug. 24, 1886; grandson of Chief Rabbi David Landau (known also as R. David Polak). After receiving his first Talmudic training from his father he continued his studies under Chief Rabbi Abraham Löwy of Dresden, and later under Aaron Kornfeld at Jenikau, Bohemia; from 1830 he attended the gymnasium at Dresden; and in 1836 entered the University of Berlin. On his return to Dresden, Landau was appointed teacher at the religious school there; and when, in 1854, Zacharias Frankel became director of the Jewish Theological Seminary at Breslau, Landau was unanimously elected as his successor in the Dresden chief rabbinate.

Landau, like his friend Frankel, inclined toward historic Judaism, but assumed an attitude midway between the two religious currents, especially at the synod in Leipsic. The following are his works: "Die Petition des Vorstandes der Israelitischen Gemeinde zu Dresden und Ihr Schicksal in der Zweiten Kammer," Dresden, 1843; "Ahawath Nezach" (Leipsic, 1875), a work on funeral rites. He published also several addresses, of which may be mentioned those in commemoration of King Frederick August II. (*ib.* 1854); of Dr. B. Beer (Dresden, 1861); and of Clara Bondi (see Kayserling, "Bibliothek Jüdischer Kanzelredner," ii. 22 *et seq.*). Besides, he wrote several theological and historical essays, as: "Anforderungen des Glaubens und der Theologischen Wissenschaft," "Bilder aus dem Leben und Wirken der Rabbinen," and "Ueber Thierquälerei nach den Grundsätzen des Judenthums," which appeared in Frankel's "Zeitschrift für die Religiösen Interessen des Judenthums," in "Monatsschrift," in "Allg. Zeit. des Jud." and in other periodicals.

Together with Kaempf and Philippson, Landau published a people's Bible ("Volksbibel").

s. M. K.

LANDAUER, M. H.: Writer on Jewish mysticism; born in 1808 at Kappel, near Buchau, Württemberg; died there Feb. 3, 1841. He was a son of the cantor Elias Landauer, and at the age of eighteen entered the yeshibah and lyceum in Carlsruhe; later he studied at the universities of Munich and Tübingen. In spite of ill health he returned to Munich in 1838 to copy from Hebrew manuscripts in the Royal Library extracts for use in his investigations. In 1839 he passed the examination for the rabbinate, and in the following year was appointed rabbi of Braunsbach, Württemberg. Only three months later illness obliged him to resign his position and to return to Kappel, where he died.

Of Landauer's works the following may be mentioned: "Jehova und Elohim, oder die Althebräische Gotteslehre als Grundlage der Geschichte der Symbolik und der Gesetzgebung der Bücher Mosis," Stuttgart and Augsburg, 1836 (see A. Geiger's review in his "Wiss. Zeit. Jüd. Theol." iii. 403 *et seq.*); "Wesen und Form des Pentateuchs," *ib.* 1838. Landauer's posthumous works and excerpts, dealing with his investigations of the history and literature of the Cabala, of the Zohar, and of Jewish literature, as well as his report on his studies of Hebrew manuscripts, were published in "Orient, Lit." 1845-46.

LANDAUER, SAMUEL: German Orientalist and librarian; born at Hürben, Bavaria, Feb. 22, 1846. He received his education at the yeshibah of Eisenstadt (Hungary), the gymnasium of Mayence, and the universities of Leipsic, Strasburg, and Munich (Ph.D. 1872). In 1875 he became privat-docent of Semitic languages at the University of Strasburg, and was appointed librarian there in 1884. In 1894 he received the title of "professor."

Landauer has written several essays on Semitic subjects, and has published: "Psychologie des Ibn Sinâ," 1872; "Sa'adja's Kitâb al-Amânât," Leyden, 1880; "Katalog der Kaiserlichen Universität- und Landesbibliothek Strasburg, Orientalische Handschriften," 1881; "Firdusi Schahname," Leyden, 1884; "Die Handschriften der Grossherzoglich Badischen Hof- und Landesbibliothek in Karlsruhe, Orientalische Handschriften," 1892; "Die Masorah zum Onkelos," Amsterdam, 1896; "Themistius 'De cælo'" (for the Aristoteles Commission of the Berlin Academy), Berlin, 1902.

s. F. T. H.

LANDESBERG, MAX: Rumanian oculist; born in 1840 at Jassy; died at Florence March 4, 1895. He was educated at the gymnasium at Ratibor and at the University of Berlin (M.D. 1865). After a postgraduate course under Graefe, Landesberg went to America, where he practised in New York and Philadelphia. In 1894 he removed to Florence, Italy. He wrote: "Beiträge zur Variokösen Ophthalmie," 1874; "Zur Statistik der Linsenkrankheiten," 1876; "On the Etiology and Prophylaxis of Blindness," 1878.

Bibliography: Pagel, *Biog. Lex.* Vienna, 1901.

s. F. T. H.

LANDESMANN, HEINRICH (pseudonym, **Hieronymus Lorm**): Austrian poet and philosophical writer; born at Nikolsburg Aug. 9, 1821; died at Brünn Dec. 4, 1902. From his earliest childhood he was very sickly; at the age of fifteen his sight and hearing were almost completely destroyed; and later in life he became totally blind.

When but sixteen years old he contributed a number of poems to various periodicals. In 1843 he completed his first important literary production, "Abdul," the Mohammedan Faust legend, in five cantos (2d ed. Berlin, 1852). His "Wien's Poetische Schwingen und Federn" (Vienna, 1847) manifested critical acumen, but also a tinge of political acerbity in its attack on the censor system of the Austrian chancellor Prince Metternich. His friends advised Landesmann to leave Vienna, and he betook himself to Berlin, where he assumed the pseudonym "Hieronymus Lorm" in order to secure his family from possible trouble with the Viennese police. In Berlin he became a regular contributor to Kühne's "Europa." After the revolution of 1848 he returned to Vienna. In 1856 he married; in 1873 he removed to Dresden; and in 1892 he settled in Brünn. A sister of Landesmann's was the second wife of Berthold Auerbach.

Landesmann was distinctively a lyric poet. The peculiar vein of pessimism that runs through both his poetry and his prose writings has won for him the title of the "lyrical Schopenhauer."

His more important works are: "Ein Zögling des Jahres 1848," his first novel (3 vols., Vienna, 1855; 3d ed., 1863, under the title "Gabriel Solmar"), in which he treats, among other subjects, of the struggle of the modern Jew against the prejudices of his fellow citizens; "Am Kamin" (2 vols., Berlin, 1856); "Erzählungen des Heimgekehrten" (Prague, 1858); "Intimes Leben" (*ib.* 1860); "Novellen" (2 vols., Vienna, 1864); "Gedichte" (Hamburg, 1870; 7th ed., 1894); "Philosophisch-Kritische Streifzüge" (Berlin, 1873); "Geflügelte Stunden. Leben, Kritik, Dichtung" (3 vols., Leipsic, 1875); the dramas "Das Forsthaus," "Hieronymus Napoleon," and "Die Alten und die Jungen" (1875); "Der Naturgenuss. Eine Philosophie der Jahreszeiten" (Berlin, 1876); "Neue Gedichte" (Dresden, 1877); "Todte Schuld" (2 vols., Stuttgart, 1878); "Späte Vergeltung" (2 vols., Hamburg, 1879); "Der Ehrliche Name" (2 vols., Dresden, 1880); "Wanderer's Ruhebank" (Leipsic, 1881); "Ausserhalb der Gesellschaft" (*ib.* 1881); "Der Abend zu Hause" (Breslau, 1881); "Ein Schatten aus Vergangenen Tagen" (Stuttgart, 1882); "Ein Kind des Meeres" (Dresden, 1882); "Der Fahrende Geselle" (Leipsic, 1884); "Vor dem Attentat" (Dresden, 1884); "Natur und Geist im Verhältnis zu den Kulturepochen" (Teschen, 1884); "Die Schöne Wienerin" (Jena, 1886); "Das Leben Kein Traum" (Breslau, 1887); "Auf dem Einsamen Schlosse" (1887); "Die Muse des Glücks und Moderne Einsamkeit" (Dresden, 1893); "Der Grundlose Optimismus" (Vienna, 1894).

Bibliography: Bornmüller, *Schriftsteller-Lexikon*; *Allg. Zeit. des Jud.* Aug., 1891; Dec. 12, 1902; *Oesterreichische Wochenschrift*, Dec. 12, 1902; *Meyers Konversations-Lexikon.*

S. M. Co.

LANDESRABBINER, LANDRABBINER, or **OBERLANDESRABBINER (RAB MEDINAH):** Spiritual head of the Jewish communities of a country, province, or district; met with in several parts of Germany and Austria. The office is a result of the legal condition of the Jews in medieval times when the Jewish communities formed a unit for the purposes of taxation. As the community had to pay certain taxes to the government, the latter had to appoint some one who should be responsible to it for their prompt collection, and who consequently had to be invested with a certain authority. The office of Landesrabbiner had no ecclesiastical meaning until the eighteenth century, when the various governments began to consider it their duty to care for the spiritual welfare of the Jews. Such ecclesiastical authority, owing to the strictly congregational constitution of the communities, never took root among the Jews (see, however, on the chief rabbinate of Moravia after the death of Marcus Benedict, Moses Sofer, Responsa, Oraḥ Ḥayyim, 13).

Earliest Data.

The transfer of the Jews from the status of imperial to that of territorial subjects, provided by the charter of Frederick II. of Austria (1244) and recognized by Emperor Charles IV. in his Golden bull (1356), as well as their very frequent expulsion from the large cities in the fifteenth and sixteenth centuries, scattered the Jews in small communities. These were without protection against the arbitrary action of petty tyrants; and they caused the rulers considerable inconvenience owing to constant litigation concerning encroachments on the rights of Jews living under their protection. Therefore the Jews of a given territory organized themselves into an association which elected an advocate ("Shtadlan") for the protection of their interests. Such an official was recognized by the government as the legal representative of the Jews, whose duty it was to see that the taxes imposed on the Jews as a body were promptly paid, that the laws against usury were obeyed, and who in turn was given jurisdiction in civil cases. This jurisdiction, which he exercised either personally if a scholar or through his deputy if not one, gave the Landesrabbiner an authority within the community. Inasmuch as the Jews from the sixteenth century lived almost exclusively in small communities and could not maintain a rabbi or a rabbinical court (which consisted of three members in every settlement), several communities in a district combined to do so. To this condition of things may be attributed the real creation of the office of Landesrabbiner, the former attempts to appoint a chief rabbi over all the Jews of a country—*e.g.*, in Germany by Emperor Rupert in 1407, and in Spain, France, and Portugal, partly in the fourteenth, partly in the fifteenth, century—having been mostly abortive, and at all events merely fiscal measures designed for the purpose of tax-collecting (see Grätz, "Gesch." viii. 8, 102, *et passim*; Scherer, "Rechtsverhältnisse der Juden," p. 258; Bishop of the Jews; Hochmeister). The first Landesrabbiner of whom there is authentic record is Judah Löw ben Bezaleel, of whom his contemporary David Gans says that he was for twenty years (1553–73) the spiritual head ("ab bet din") of all the Jewish congregations in the province of Moravia ("Ẓemaḥ Dawid," year 5352).

From the Seventeenth Century.

At the time of Löw ben Bezaleel the congregations of Moravia were evidently very small. They were composed of refugees who through the influence of Capistrano had been expelled from the large cities like Brünn and Olmütz (1454) and had settled where any well-disposed lord would receive them under his protection. As they formed communities too small to engage a well-qualified rabbi, they elected to act as their judge one having his seat in one of the largest congregations of the province. Similar conditions prevailed elsewhere. The Jews living in the principality of Bamberg obtained in 1619 permission to elect a "Paumeister oder obristen Rabbi," and they may have had such an official earlier (Eckstein, "Gesch. der Juden im Ehemaligen Fürstbistum Bamberg," pp. 62, 157, Bamberg, 1898). The communities of the principality of Oettingen, also formed from refugees of larger cities like Nördlingen, had a Landesrabbiner from early times (Müller, "Aus Fünf Jahrhunderten," p. 171, Augsburg, 1900). The Jews living under the protection of the elector and the Archbishop of Mayence had in 1718 Issachar Berush Eskeles as their Landesrabbiner (Bamberger, "Historische Berichte über die Juden . . . Aschaffenburg," p. 18, Strasburg, 1900). The title was occasionally conferred as a sign of distinction; thus Samson Wertheimer received in 1717 from Emperor Charles VI. the title of Landesrabbiner of Hungary ("pro archi sive superiori Judæorum Rabbino"). His son-in-law, the above-named Eskeles, who (although he resided in Vienna, being connected with his father-in-law's banking business there) had succeeded his father, Gabriel Eskeles, as Landesrabbiner of Moravia, was appointed (1725) at Wertheimer's death his successor as Landesrabbiner of Hungary (Kaufmann, "Samson Wertheimer," p. 104, Vienna, 1888; Wurzbach, "Biographisches Lexikon," *s.v.* "Eskeles").

As Spiritual Chiefs.

In the course of the eighteenth century various governments attempted to influence the internal condition of the Jewish communities, and for this reason legislated with regard to their congregational constitutions. Typical in this respect is Maria Theresa, who in her "General-Polizei-Prozess und Kommercialordnung für die Judenschaft" of Moravia (Dec. 29, 1753) prescribes in detail the duties of the Landesrabbiner; *e.g.*, that he shall assign the tractate which all other rabbis shall adopt for instruction; bestow the title of "Doppelter Reb" ("Morenu"); see that all taxes are promptly paid; and arrange the complicated election of a new official (Willibald Müller, "Beiträge zur Geschichte der Mähr. Judenschaft," pp. 86–99, Olmütz, 1903). Other provinces were to have a Landesrabbiner. Indeed, the empress appointed one for Galicia, but he had no successor (Buber, "Anshe Shem," pp. xix. *et seq.*, Cracow, 1895). In Germany it was chiefly in the small states, where the governments directed all affairs, that the institution was established. Hesse-Cassel had a "Landesrabbinat," which was a board constituted on the same basis as the Protestant consistory, but with a Landesrabbiner as presiding officer. Its establishment was decreed in 1823. Hanover made similar provisions in the law of 1844 on Jewish affairs. Up to the present it has had three Landesrabbiners, at Hanover, Hildesheim, and Emden. Specially typical conditions existed in the grand duchy of Mecklenburg-Schwerin, where the government established the institution of Landesrabbiner May 14, 1839. Here the rabbis were at first supposed to introduce radical reforms, but after the revolution of 1848, when the policy of the government became reactionary, the newly elected rabbi was intended to strengthen "historic Judaism" (Donath, "Gesch. der Juden in Mecklenburg," pp. 221 *et seq.*, Leipsic, 1874). In Saxe-Weimar the government used the Landesrabbiner to enforce the law of June 20, 1823, which ordered that services be held in German (see Hess, Mendel). In Saxe-Meiningen the Landesrabbinat was organized by the law of Jan. 5, 1811 (Human, "Gesch. der Juden im Herzogthum Sachsen-Meiningen-Hildburghausen," pp. 69 *et seq.*, Hildburghausen, 1898). Here as elsewhere in the small German states the object of the institution was to raise the moral and intellectual status of the Jews.

In Modern Times.

At present only some of the small states of Germany have a Landesrabbiner, namely, Mecklenburg-Schwerin, Mecklenburg-Strelitz, Oldenburg, Birkenfeld, Saxe-Meiningen, Anhalt, Brunswick, and Schwarzburg-Sondershausen. Prussia, which always proclaimed the principle of non-interference in internal Jewish affairs, has retained the office in some of the provinces annexed in 1866, as in the three districts of Hanover and in the province of Hesse-Nassau (Cassel). The office of Landesrabbiner for the province of Brandenburg, which existed in Berlin and in Frankfort-on-the-Oder, survived, as in other countries, up to the end of the eighteenth century by virtue of the rabbi's capacity as civil judge. The last one to hold the title was Hirschel Lewin, while his successor, Simon Mayer Weyl (d. 1828), held the title of "Viceoberlandesrabbiner." As an exceptional favor the government in 1849 gave to Gedaliah Tiktin of Breslau the title of Landesrabbiner, which was interpreted as a manifestation of the government in favor of Orthodoxy and as a disapproval of the Reform movement (L. Geiger, "Abraham Geiger's Leben in Briefen," pp. 113 *et seq.*, Berlin, 1878).

In Austria Samson Hirsch held the office for the province of Moravia from 1847 to 1851. He was elected according to the complicated method prescribed in the law issued by Maria Theresa. At the time of his resignation the legal position of the Jewish communities was in a state of chaos owing to the events of 1848, which had played havoc with the principles on which the legislation rested. The government then appointed as substitute Abraham Placzek of Boskowitz, who in his last years had his son Baruch Placzek of Brünn appointed as his assistant. An attempt made by Baron Moritz Königswarter, who was a member of the House of Lords, to introduce into the law of 1890 regulating the legal status of the Austrian Jewish congregations a clause reestablishing the office of Landesrabbiner of Moravia was defeated in the lower house of the Reichsrath (Löw, "Das Mährische Landesrabbinat," in "Gesammelte Schriften," ii. 215–218, Szegedin, 1890; D'Elvert, "Zur Gesch. der Juden in Mähren und Oesterreich. Schlesien," pp. 209–211, Brünn, 1895; Willibald Müller, "Beiträge zur Geschichte der Mährischen Judenschaft," pp. 157–165, Olmütz, 1903). Baruch Placzek is, however, officially addressed by the government authorities as "Landesrabbiner"; he recently appointed Solomon Funk, rabbi of Boskowitz, as his substitute, an appointment which the government confirmed ("Oesterr. Wochenschrift," 1904, p. 190). The office existed also in Siebenbürgen early in the nineteenth century.

A similar institution is that of Chief Rabbi of the United Hebrew Congregations of the British Empire, which, however, rests exclusively on voluntary acknowledgment on the part of the congregations, and does not extend over whole groups of congregations like the Portuguese, the Reform, and the Polish organizations. The office of the Grand Rabbin du Consistoire Central in France is also of similar nature, but differs in that the chief rabbi acts merely in his capacity as member of the consistory, and not as hierarchic chief.

D.

LANDESRABBINERSCHULE IN BUDAPEST (Országos Rabbiképző Intézet): The efforts to found a rabbinical seminary in Hungary reach back to the beginning of the nineteenth century. The various projects, however, did not receive tangible form until a Jewish school fund had been created by King Francis Joseph in 1850 (see Jew. Encyc. vi. 502, *s.v.* Hungary). The government made an attempt to open a rabbinical school in 1864, but on account of internal party quarrels the matter dragged on until 1873. After a building had been erected especially for its requirements the institute was opened Oct. 4, 1877.

Organization.

The institute is under the supervision of the ministry of religion, which appoints the teachers upon nomination by the council (consisting of twelve clerical and twelve lay members), of which M. Schweiger has been president and Dr. J. Simon secretary ever since the institute's foundation. The course of study extends over ten years and is divided into two equal periods; one being devoted to the lower department, the other to the upper. The former corresponds to an "Obergymnasium"; and the requirement for admission is the possession of a diploma from an "Untergymnasium," or the passing of an entrance examination covering the equivalent of the course of study pursued there as well as a certain amount of Hebrew and Talmudics. The diplomas from this department are recognized by the state, and command admittance into any department of the universities or schools of technology. After the completion of the courses offered by the upper department, including attendance under the faculty of philosophy at the university, a year of probation follows. This is concluded in February by an oral examination after the candidate has presented three written theses on Biblical, rabbinic-Talmudical, and historical or religious-philosophical subjects respectively. At graduation he receives a rabbinical diploma, which is recognized by the state. To supplement the regular course of training there are students' societies in both departments.

The constitution of the institute has also the training of religious teachers in view; and a plan of study and examinations has been arranged to this end. The library of the institute contains about 25,000 volumes of manuscripts and printed works, which are accessible to all in the reading-room and may under certain conditions be taken from the library. The assistance of pupils is provided for by the Ez-Chajim Society, which at present has a fund amounting to 150,000 kronen and a yearly expenditure of 11,000 kronen. In addition there are various stipends which are not controlled by the society.

Faculty.

Since its foundation the institute has had eighteen teachers. The present professors in the department of theology are: Dr. W. Bacher (Bible and Midrash); M. Bloch (Talmud and Shulḥan 'Aruk); Dr. L. Blau (history, Bible, and Talmud; also librarian); Dr. I. Goldziher (philosophy of religion); and Dr. S. Kohn (homiletics). Among former teachers have been: "Rabbinatspräses" S. L. Brill (until 1887; d. 1893); D. Kaufmann (d. 1899; also librarian); and H. Deutsch (until 1888; d. 1889). The professors of the gymnasium courses are: A. Balogh (since 1892); K. Bein (since 1878); Dr. H. Bloch (since 1881); S. Schill (since 1878); director, Dr. I. Bánóczi (1877–1892). The singing-master is Chief Cantor A. Lazarus.

Schill, *A Budapesti Országos Rabbiképzőintézet Története*, Budapest, 1896; *Annual Reports* (with literary supplements).

D. L. B.

LANDLORD AND TENANT: I. Farming Land. The Mishnah and later authorities speak of two kinds of tenants—the "aris," or the tenant on shares, the landlord receiving "one-half, one-third, or one-fourth," and the "ḥoker," or the tenant at a fixed rental, which in the case of farming land was usually payable in a fixed measure of the grain to be grown on the land, less frequently in money. Dwellings or business houses were, in the nature of things, let at a fixed rental in money. The word "meḳabbel" (lit. "receiver") is applied to both kinds of tenants, but more especially to tenants on shares; "ḳablan" always bears the latter sense.

The laws in force between landlord and tenant, the former being generally known as "owner of the field," are set forth in Baba Meẓi'a ix. 1–10.

Local Custom.

1. The first principle laid down is well known to English and American lawyers from the leading case of Wigglesworth versus Dallison—the force of local custom to supply many details in a contract letting land to farm: "Where one receives [*i.e.*, farms on shares] a field from his neighbor, he must cut [the grain] where it is the custom to cut, and pull out where it is the custom to pull out; he must plow up the ground after [the harvest, in order to kill the weeds] where it is customary to plow up; all according to the custom of the province." So far the Mishnah; a baraita adds that local custom also decides whether the farmer on shares shall have part in the fruits of the trees, upon which he generally bestows no labor. Just as landlord and tenant share in the grain, in that proportion they share also in straw and stubble, branches and cane; and in like proportion both provide the cane for propping vines.

2. Where one takes from his neighbor (at a fixed rent) a field which depends on irrigation, or contains trees, and the spring for irrigation ceases to run, or a tree is cut down, he is not entitled to a deduction; but when the field is specifically let as an irrigated field, or as a place for trees, and the spring fails or a tree is cut down, a fair deduction from the rent must be made.

3. Where one takes a field from his neighbor (on shares) and permits it to lie fallow, the judges estimate how much it would have produced if cultivated, and he pays accordingly; for thus it is (usually) written: "If I allow it to lie fallow and do not work it, I shall pay according to the best possible results."

4. One who takes a field from his neighbor is required to weed it.

5. When one takes a field (on shares), as long as it produces enough to make a "heap" that will stand, he must labor on it. A baraita bases this

rule on the wording used when the contract is in writing: "I shall stand up, and plow and sow, and cut and bind in sheaves, and thrash and winnow, and set up a heap before thee; and then thou shalt come and take one-half [or one-third], and I for my toil and outlay shall take one-half [or two-thirds]." The terms of division are further discussed in the Gemara.

6. Where one rents a field from his neighbor, and locusts eat the crop, or it is burned, if the calamity be general, the landlord makes a deduction from the rent, but if it be not general he makes no deduction; for it is the tenant's ill luck. In discussing this section of the Mishnah the Babylonians differ in opinion as to the extent of country over which the calamity must range before the tenant is entitled to a deduction; but they generally admit that if he sows other than the kind of grain he has contracted to raise he is not entitled to any deduction. The position taken by R. Judah, that no deduction should be made where the rent is payable in money, was disregarded by the Babylonian teachers.

Payment in Kind.

7. If one takes a field from his neighbor at the rent of ten kors of wheat, or other grain, a year, and the quality of the wheat raised is not good, he may pay his rent with part of this wheat; should the wheat raised be better than usual, the tenant may not buy wheat of ordinary quality outside, but must pay his rent out of his own crop.

8. He who rents a field from his neighbor to sow it with barley, may not sow wheat; if to sow it with wheat, may not sow barley; if to sow it with grain, may not sow legumes (such as beans, peas, or lentils); but if to sow with legumes, may sow grain: R. Simeon ben Gamaliel forbade it. The majority allowed the change from wheat to barley or from legumes to grain because the latter exhaust the soil less; R. Simeon's broad prohibition of any change from the contract is based by R. Ḥisda on Zeph. iii. 13: "The remnant of Israel shall not do iniquity, nor speak lies; neither shall a deceitful tongue be found in their mouth."

9. He who rents a field from his neighbor for a "few years" (less than seven) should not plant it in flax, neither has he the right to cut timber from the sycamore-trees; but he who rents for seven years may plant flax in the first year, and may cut timber from the sycamore-trees.

10. Where one rents a field (in the Holy Land) for a "week of years" for seven hundred zuz, the seventh, or Sabbatic, year is included; but if he rents it for seven years it is not included.

These rulings are set forth, or at least indicated, in the Mishnah, in the chapter given. From the Gemara in the same chapter may be gathered the following rules:

1. When the tenancy is at an end and the harvest is not ripe enough to be cut and sold, the harvest is estimated, and the landlord takes it and pays for it. Should the tenant die before the end of the lease, the landlord must arrange with the heirs of the tenant on the basis of the work done and the benefit received up to the time of the tenant's death, the lease then being considered at an end (B. M. 109a).

2. The codes treat, in connection with the law of landlord and tenant, the case of the workman who agrees to plant fruit-trees, taking a share of the profit arising from the plantation. Here, when a doubt arises as to the amount of his share (one-half or one-third), it is to be determined by the local custom. If not more than 10 per cent of the trees fail to bear fruit, the workman ("shattelan") is excused; if more than 10 per cent, the whole deficit is charged to him. But a contract with the workman, that if any of the trees are made the worse by his planting he shall have nothing at all, is not enforceable (B. B. 95a).

As to the duty of landlord and tenant in regard to fixtures, see Fixtures.

Bibliography: *Shulḥan 'Aruk, Ḥoshen Mishpat*, pp. 320–330; Maimonides, *Yad, Sekirut*, viii.

II. Town Property. In the Mishnah and in the codes the law governing the tenancy of a dwelling or business house is given separately from that of rural leases, and the questions discussed are different. The tenant of a house is known as the "hirer" ("soker"), like the renter of chattels. Much less is said in the Mishnah and Talmud about town tenancies than rural ones (B. M. viii. 6–9, 73b, 101b–103a).

A lease for a certain time vests in the tenant a property right, which the landlord can not defeat by a sale. No tenant may be ousted before the end of his term by the landlord on account of the latter's needs, such needs, for instance, as may arise from the destruction of his own dwelling as by fire or storm. Where rent is paid in advance, no matter for how long a term, a binding lease for the time paid for is understood. A landlord who during the term sells or lets the house to one who through violence or by appeal to the law of the Gentiles evicts the tenant must provide the latter with another house as good as the first. The same rules apply where the use of a house for a year at a time has been pledged for the owner's debt: the pledgee has all the rights of a tenant.

Notice to Quit.

Where a house is let "to lodge" in, it means for a day; to "rest" in, for two days; and for a marriage, thirty days. But the unconditional ordinary letting of a dwelling-house means, in winter (rainy season), for the rest of the season, that is, from the Feast of Booths till after the Passover; in summer, till the expiry of a thirty days' notice to quit. But this applies only in a town ("'ir"); in a large commercial city ("kerak"), where the demand for houses is great, a notice must be given twelve months in advance. This is also the rule for all shops, both in towns and cities, in which the tenant sells goods; for a tradesman must have ample time to make his new place of business known to his customers. Simeon ben Gamaliel in the Mishnah holds that bakers and dyers are entitled to three years' notice to quit their shops. The codes differ as to whether his opinion should be followed. The tenant must in each case give as long a notice to rid himself of the obligation for rent as the landlord would have to give to him. Where the letting is for a fixed time no notice need be given by either party.

Where a house is let under notice of implied length only, without specified term, the rights of the tenant, while the notice to quit is running out, are not secure against the landlord's necessities. The latter, should his own house fall down, can insist that the tenant shall make room for him. Also, if during the running of the notice the market rate of rents goes up, the landlord can for the unexpired time ask for rent at the higher rate: on the other hand, if rents go down, the tenant can demand a reduction. But mere transfer of the ownership gives to the purchaser or heir no greater right than that of the original landlord.

Repairs and Restoration.

The owner must not during the term, or while the notice to quit is running, tear down the house. If he does, he is bound to replace it. Moreover, if it should fall through no fault of his while there is a lease for a fixed term, he must provide the tenant with another house, either elsewhere or by rebuilding, the new one to be of like size, and to have an equal number of rooms and windows. Should the house become dangerously insecure, it seems the landlord is bound only to pay toward its restoration the amount of rent in advance in his hands. What is said of a house applies to a court (group of houses), to a shop, or to a bath.

Where a house is let for a year, and the year is one of thirteen months, the tenant gets the benefit. If the renting is for so many months, the tenant must pay for each. In disputes as to the length of the lease, the presumption is on the side of the shortest term: for the landlord is the owner; and the burden lies on the tenant who sets up an adverse estate.

A tenant for a fixed term has the right to sublet the house to another for the remainder of his lease, provided the new tenant's household is no more numerous than his own; but the landlord can, if he wishes, prevent such subletting by taking the house back and releasing the tenant from all further obligation for rent. Where two men rent a house jointly, neither of them can transfer his share of the tenancy to a third person without the consent of his companion.

The duty as between landlord and tenant of making repairs and improvements and the correlative right to fixtures have been shortly discussed under FIXTURES.

LANDOWNER. See REAL ESTATE.

LANDSBERG: Russian family of scholars and philanthropists. Its founder was **Abraham Landsberg** of Kremenetz, who was born in 1756 and died in 1831 of the plague, then raging in Russia. He had six sons who were among the first Russian Maskilim. Of these, the eldest, **Aryeh Löb Landsberg** (1780–1861), lived at Odessa, and was an able writer in Hebrew and a prominent merchant. Through business reverses he lost his fortune, and for the rest of his life lived in reduced cirumstances and seclusion, devoting his time to study. **David Judah Landsberg**, the youngest son of Abraham, was principal of the public school for Jewish children at Odessa. Of Abraham's other sons, **Lippe Landsberg** and **Mendel Landsberg** (1786 to Jan. 8, 1866) lived at Kremenetz, where they were born. Mendel was the more prominent, not only for his learning, but also for his charitable disposition. He had a remarkable collection of books, most of which, after his death, were incorporated in the Friedland collection now in the Asiatic Museum at St. Petersburg. Mendel contributed some articles on Biblical subjects to "Ha-Karmel" and other Hebrew journals, and wrote "Sefer ha-Ḳundes" and other satirical pamphlets.

The members of the Landsberg family were intimate with Isaac Bär Levinsohn, and Mendel Landsberg placed his library at Levinsohn's disposal, the collection being of inestimable value for the latter's literary work. In a fit of anger Levinsohn made a scurrilous attack on Landsberg in the form of a Talmudic treatise entitled "Massekta Oto we-Et Beno"; but they ultimately became reconciled.

H. R. A. S. W.

LANDSBERG, MAX: American rabbi; born at Berlin Feb. 26, 1845; son of Meyer Landsberg, "Landrabbiner" at Hildesheim, Hanover. He was educated at the Hildesheim Gymnasium Josephinum, and at the universities of Göttingen and Breslau, also studying at the Breslau Jewish theological seminary. He is Ph.D. of Halle, Germany. In 1866 he became "Stiftsrabbiner" and teacher at the seminary for Jewish teachers at Hanover, a position which he held for five years. In 1871 he went to America and was offered the position of rabbi to the Congregation Berith Kodesh at Rochester, N. Y., where he has continued ever since. He is the author of the "Ritual for Jewish Worship" (1884; 2d ed., 1897), and of "Hymns for Jewish Worship" (1880; 2d ed., 1890).

BIBLIOGRAPHY: *American Jewish Year Book*, 1903-4.

A.

LANDSBERG, MEYER: German rabbi; born at Meseritz, Prussia, May 1, 1810; died at Hildesheim May 20, 1870.

Landsberg's teacher, Aaron Wolfsohn, rabbi of Wollstein, was elected to the rabbinate of Hildesheim in 1826, and Landsberg accompanied him and lived under his roof until Wolfsohn's death in 1830. Landsberg then went to Brunswick, where he continued his rabbinical studies while preparing for the university at the Brunswick gymnasium. He studied at the University of Berlin from 1834 to 1838. At Berlin he became closely connected with Leopold Zunz; with him he organized the Seminary for Jewish Teachers in 1840, in which institution he was an instructor until 1845. A lifelong friendship with Zunz was established, with whom he corresponded until his death. In 1837 he passed his state's examination as "Oberlehrer," and his certificate contains the then usual clause, that, being a Jew, he had no claim to a position at a higher school.

In 1835 Landsberg was engaged as teacher at the Nauensche Institute for the education of boys, and from 1839 to 1846 he was its director, in which position David Cassel was his successor. From 1838 to 1846 he preached regularly at the bet ha-midrash and at the synagogue of Commerzienrath Lieberman. In 1846 he was appointed "Landrabbiner" of Hildesheim, which position he filled until his death. Although himself very strict in the observance of the ceremonial law, he was of a progressive spirit. In the synagogue built during his administration (1849) an organ was introduced, a mixed choir established, some German prayers introduced, and the "piyyuṭim" nearly all abolished. Confirmations of boys and girls were held every year. His eldest son is Dr. Max Landsberg, since 1871 rabbi of the Congregation Berith Kodesh at Rochester, N. Y.; his second son is Geheimrath Professor **Theodor Landsberg** of the Technische Hochschule at Darmstadt (since 1880), a distinguished authority on architecture, railroad- and bridge-building, and editor of the "Handbuch für Ingenieurwissenschaften." S.

LANDSBERGER, HUGO (pseudonym, **Hans Land**): German novelist, dramatist, and editor; born at Berlin Aug. 25, 1861. His first production was "Der Neue Gott, Roman aus der Gegenwart," Dresden, 1891, which was followed by "Sünden," Berlin, 1891. His dramatic efforts thus far have been confined to collaboration with Holländer in the production of "Die Heilige Ehe: Ein Modernes Schauspiel in 5 Akten," *ib.* 1893. In that year, also, his first success was made in his novel "Die Richterin," of which a sixth edition was called for in the following year. Other works are: "Mutterrecht," a novelette; "Die Tugendhafte," 1895, a humorous story; "Um das Weib," 1896, a novel of contemporary life; "Von Zwei Erlösern," and "Schlagende Wetter," 1897, a novel which was issued, with twenty-five illustrations, as No. 50 of Kürschner's "Bücherschatz."

Landsberger's career as editor dates from 1898, when he founded the weekly journal "Das Neue Jahrhundert," the first number of which appeared in October of that year. At the same time another periodical with the identical name, but with the subtitle "Berliner Wochenschrift," edited by F. Werth, made its début. Since then Landsberger has written two other novels: "Und Wem Sie Just Passieret," Berlin, 1899, and "Liebesopfer," *ib.* 1900.

s. M. Co.

LANDSBERGER, JOSEPH: German physician; born at Posen Aug. 21, 1848; descendant of Aryeh Löb, who died as martyr in Posen in 1737; educated at the gymnasium of his native town and at the universities of Vienna and Berlin (M.D. 1873). In the Franco-Prussian war (1870–71) he was active as an assistant surgeon. Settling as a physician in Posen, he practised there till 1901, when he retired from practise on account of ill health and removed to Charlottenburg, near Berlin.

Landsberger took an active part in the municipal life of Posen, being for eighteen years alderman, and for one year president of the aldermanic board. For four years he was also chief physician of the Jewish Hospital.

He has written several essays for the medical journals, and is the author of "Handbuch der Kriegschirurgischen Technik," Tübingen, 1875, which book received the Empress Augusta prize.

s. F. T. H.

LANDSHUTH, LESER: German liturgiologist; born Jan. 15, 1817, at Lissa, Posen; died in Berlin March 23, 1887. He went to Berlin as a youth to study Jewish theology, and there he became acquainted with Zunz and Abraham Geiger, the latter of whom was then staying in that city in order to become naturalized in Prussia. Landshuth soon gave up his intention of becoming a rabbi, not being willing to conceal or renounce his liberal opinions; and Moritz Veit aided him in establishing himself as a Hebrew bookseller. Meanwhile Landshuth kept up his literary activity; and in 1845 he published as an appendix to the prayer-book issued by Hirsch Edelmann ("Siddur Hegyon Leb"; commonly known as "Landshuth's Prayer-Book") a valuable essay on the origin of Hebrew prayers. His essay on the Pesaḥ Haggadah (Berlin, 1855) and the introduction to the "Ma'abar Yabboḳ," a handbook of the funeral customs of the Jews, are along similar lines ("Vollständiges Gebet- und Andachtsbuch zum Gebrauche bei Kranken und Sterbenden," Berlin, 1867). A number of inscriptions from the tombstones of prominent men are added to the latter work.

Landshuth's chief work was his "'Ammude ha-'Abodah (Columnæ Cultus): Onomasticum Auctorum Hymnorum Hebræorum cum Notis Biographicis et Bibliographicis," on Hebrew liturgical poetry (2 vols., *ib.* 1857–62), a painstaking and important contribution to the subject. No less valuable are his works relating to the history of the Jewish community of Berlin, parts of which have been incorporated in L. Geiger's "Gesch. der Juden in Berlin" (*ib.* 1871); other portions have been published in "Die Gegenwart" (*ib.* 1867) and other periodicals. He published also "Toledot Anshe ha-Shem u-Pe'ulatam," history of the Berlin rabbis 1671–1871 (*ib.* 1884). Many valuable manuscript notes by Landshuth have passed into the possession of Dr. S. Neumann of Berlin; and other matter has been reprinted by Dr. S. Bernfeld from Landshuth's notes in "Ha-Meliẓ," 1886. Landshuth also copied and arranged the early communal archives of Berlin (written in Hebrew) and the inscriptions of the old cemetery in that city, which was closed in 1827.

Bibliography: *Ha-Asif*, 1888, pp. 25–29.

s. S. Be.

LANDSOFER (LANDSCHREIBER), JONAH BEN ELIJAH (known also as **Jonah ben Elijah Bunzlau** or **Bumslo**): Bohemian Talmudist; born in 1678; died at Prague Oct. 9, 1712. Landsofer made a special study of the Masorah and was well versed in the regulations concerning the writing of scrolls of the Law, whence his name "Landsofer." He studied also secular science and Cabala, and as a cabalist he, with Moses Ḥasid, was sent by Abraham Broda to Vienna to engage in a disputation with the Shabbethaians. Though he died young, Landsofer wrote several important works: "Ẓawwa'ah," ethics, printed in Asher b. Jehiel's "Orḥot Ḥayyim" (Frankfort-on-the-Main, 1717); "Me'il Ẓedaḳah," responsa, at the end of which are notes on Euclid (written in 1710, and published by his grandson Yom-Ṭob Landsofer, Prague, 1757); "Bene Yonah," novellæ on the Masorah and the regulations concerning the writing of scrolls of the

Law (*ib.* 1802); "Kanfe Yonah," novellæ on Shulḥan 'Aruk, Yoreh De'ah (to § 111; *ib.* 1812). His pupil Elijah b. Azriel quotes, in the preface to his "Miktab le-Eliyahu," a work of Landsofer entitled "Me'ore Or," on corrections for scrolls of the Law.

S. S. M. SEL.

LANGENSCHWARZ, MAXIMILIAN LEOPOLD (pseudonyms, **N. Z. Charleswang** and **Jakob Zwangsohn**): German author and hydropathist; born 1801 at Rödelheim, near Frankfort-on-the-Main; died before 1860. His parents being very poor, a few wealthy citizens sent him to the gymnasia of Darmstadt and Frankfort-on-the-Main. He joined several wandering theatrical troupes, and is said to have embraced Christianity at Vienna. In 1830 he appeared at Munich, gaining successes as a declaimer and improvisator. He also made successful tours through England, France, and Russia. In 1842 he settled in Paris as a hydropathist under the name Langenschwarz-Rubini; and in 1848 he returned to Germany.

Langenschwarz wrote: "Arnoldo," Vienna, 1829; "Die Fahrt in's Innere," *ib.* 1830; and "Der Hofnarr," poems, 1832, and edited the magazine "Satirische Brille für Alle Nasen" (1830).

S.

LANGUEDOC (Hebrew, לנגדוק or לשון אוק): Ancient province of France corresponding to the present departments of Tarn, Aude, Gard, and Ardèche, with parts of Haute-Loire, Haute-Garonne, and Tarn-et-Garonne. It was divided into two parts: Higher Languedoc, having for its capital Toulouse; and Lower Languedoc, with Montpellier as its chief city. Two letters of Sidonius Apollinaris and the canons of the council held at Agde in 506 prove the existence in the province at that time of numerous and prosperous Jewish communities (Dom Vaissète, "Histoire Générale de Languedoc," i. 243; Sidonius Apollinaris, iii., Epistle 4; iv., Epistle 5). While Languedoc was a dependency of the Visigothic kings the Jews suffered much persecution, but in a far less degree than their brethren on the other side of the Pyrenees. Protected by the Christian inhabitants, who often rebelled against their kings, the Jews of Languedoc could easily evade many oppressive laws enacted against them. The edict of expulsion issued by Wamba in 672 provoked a general uprising of the inhabitants. After the province had been pacified, and the edict was enforced, the absence of the Jews was of very short duration. Nor did the barbarous laws of Erwige and Egica meet with greater success.

Under the Carlovingians.

An era of great prosperity for the Jews of Languedoc set in with the accession of the Carlovingian dynasty. The loyalty of the Jews to the cause of the French kings in the struggle against the Saracens was highly appreciated and rewarded by many privileges. Pepin the Short conceded them the right of enjoying hereditary allodial tenure; and this right was respected by all the Carlovingians, in spite of the protests of some of the clergy. Large communities possessing synagogues and important commercial establishments existed at Béziers, Carcassonne, Lodève, Lunel, Mende, Montpellier, Narbonne, Nîmes, Pamiers, Posquières, Saint-Gilles, and Toulouse.

The happy condition of the Jews of Languedoc did not cease under the rule of the counts, especially under those of Toulouse, who evinced kindly feelings toward them. But the spirit of intolerance that pervaded western Europe in the eleventh century did not fail to leave its impress upon the province. Thenceforward the Jews were obliged to occupy special quarters, and a custom was established which permitted the populace to inflict upon them all kinds of humiliations during Holy Week. At Toulouse it was deemed expedient that at least one Jew should have his ears publicly boxed on the first day of Easter; while at Béziers the mob was allowed to throw stones at the Jews. Still their situation was relatively prosperous; and even these vexations gradually disappeared and were, on the intervention of the counts, superseded by yearly taxes in addition to the poll-tax common to all inhabitants.

Jews in Public Office.

The good-will of the counts of Toulouse displayed itself far beyond mere toleration; they even entrusted the Jews with important public offices. Raymond V. about 1170 appointed a Jew as bailiff in his domain of Saint-Gilles, and, with the exception of the counts of Montpellier, his example was followed by many other counts and barons. The nomination of Jews to public offices in the dominions of the viscounts of Béziers and Carcassonne was a common occurrence under Viscount Roger II. and his successor Raymond Roger.

The crusade against the Albigenses at the beginning of the thirteenth century brought a great reaction in the condition of the Jews of Languedoc. Accused by the clergy of having fostered among the Christians a spirit of rebellion against the Church, oppressive laws were enacted against them in the various councils. At that held at Saint-Gilles in 1209 Raymond VI. was compelled to swear that in the future neither he nor his vassals would entrust public or private offices to Jews; and, except at Narbonne, where Jews served as brokers until 1306, this oath was strictly observed in the territory of the counts of Toulouse.

The condition of the Jews in Lower Languedoc became still worse when that province fell into the hands of Saint Louis and his brother Alphonse of Poitiers, who, the former from bigotry and the latter from greed, enacted against them oppressive laws—*e.g.*, the prohibition to sojourn in small localities and to erect new synagogues—and crushed them with fiscal burdens. Everywhere the Jews were imprisoned, to be released only after having paid heavy sums. On the death of Alphonse of Poitiers his estates came into the possession of Philip the Bold, and the Jews of those districts shared the fate of their brethren of northern France.

While the Jews were laboring under adverse circumstances in that part of Languedoc which was annexed to France, those who lived in the domains of independent lords continued to enjoy a high de-

Under Independent Lords.

gree of prosperity during the whole of the thirteenth century. In a letter addressed to his subjects in 1252 Jaime I., Count of Montpellier, declared that he would take the Jews of his territory under his protection, and he enjoined the inhabitants to do them no harm. The dukes of Foix granted the Jews in their domains many privileges, and vindicated their rights against the encroachments of Philip the Fair. In 1303 Count Gaston confirmed all the ancient privileges of the Jews and engaged himself not to claim more than the yearly taxes which had been levied by his father, Roger Bernard, and by his other predecessors. The community of Pamiers, which was under the jurisdiction of the Abbot of Saint Antonin, was treated with benevolence by the ecclesiastical authorities, while those of Alet, Béziers, Grasse, and Nîmes received a no less favorable treatment at the hands of the bishops. But the most favored community was that of Narbonne, which enjoyed special privileges and immunities. Among these the most noteworthy was that of being governed by a Jewish "king."

With the expulsion of the Jews by Charles VI. in 1394 all the communities of Languedoc, with the exception of several, like Montpellier and Narbonne, ceased to exist. See BÉZIERS; CARCASSONNE; FRANCE; LUNEL; MONTPELLIER; and NARBONNE.

G. I. BR.

LANIADO: Sephardic family settled in Italy and the East; the best-known members are:

Abraham ben Isaac Laniado: Oriental scholar of the sixteenth and seventeenth centuries; born in Aleppo; a contemporary of Joseph Caro, whose Talmudical lectures at Safed he attended. He sojourned for some time in Syria, and toward the beginning of the seventeenth century went to Venice, where he published two works: "Magen Abraham" (1603), which treats of the mystical interpretation of various commandments and ceremonies, and "Neḳuddot ha-Kesef," a commentary on Canticles, published in 1619 by **Moses Laniado,** who prefaces the work with a note in which he says that Abraham ben Isaac was the author also of unpublished commentaries on the Pentateuch, the Five Scrolls, the Hafṭarot, Psalms, Proverbs, Job, and Daniel.

Abraham left several responsa, which are extant in the Royal Library at Vienna and which have been copied and published with explanatory notes by M. Friedländer (Vienna, 1860).

BIBLIOGRAPHY: De Rossi, *Dizionario*, ii. 4; Azulai, *Shem ha-Gedolim*, s.v.; Conforte, *Ḳore ha-Dorot*, p. 41b; Steinschneider, *Cat. Bodl.* col. 689; Fuenn, *Keneset Yisrael*, p. 36; Michael, *Or ha-Ḥayyim*.

Samuel ben Abraham Laniado: Rabbi at Aleppo in the second half of the sixteenth century; contemporary of Moses Alshech and Ḥayyim Vital. He devoted his activity to the Midrashic literature and on that account was surnamed "ha-Darshan." Samuel was the author of the following Midrashic commentaries: "Keli Paz" (Venice, 1557), on Isaiah, excerpts from which were inserted in the "Bibliotheca Rabbinica" (ed. Amsterdam, 1724–27); "Keli Ḥemdah" (Venice, 1594–95; Prague, 1609), on the Pentateuch; and "Keli Yaḳar" (Venice, 1603), on the Earlier Prophets. Azulai asserts that he had in his possession a manuscript containing Laniado's commentary on the Midrash Shoḥer Ṭob, entitled "Sekel Ṭob." Joseph Delmedigo mentions in his "Miktab Aḥuz" the "Keli Yaḳar" and "Keli Ḥemdah," and speaks of them very disparagingly.

Solomon b. Abraham Laniado: Preacher at Venice in the eighteenth century; grandson of Samuel ben Abraham Laniado. He wrote an introduction and addenda to his grandfather's commentary to Isaiah, and a collection of sermons.

LAODICEA.—1. Laodicea ad Lycum: Town in Phrygia on the River Lycus. Jews lived there, Antiochus the Great having transported 2,000 Jewish families from Babylonia to Phrygia (Josephus, "Ant." xii. 3, § 4). Flaccus ordered the confiscation of Temple money contributed by the Jews of Laodicea, to the value of more than twenty pounds of gold (Cicero, "Pro Flacco," § 28). There was also a Syrian element among the population (Ramsay, "The Cities and Bishoprics of Phrygia," i. 33). A Christian community was founded there at an early date (Rev. i. 11, iii. 14), to which John wrote a letter (comp. Col. iv. 16). In the year 62 Laodicea was destroyed by an earthquake, but it was soon rebuilt. To-day the village of Eski-Hissar stands on its site.

——**2. Laodicea ad Mare:** Flourishing commercial town in Upper Syria, situated southwest of Antioch; now called Ladiḳiyyah. Herod the Great built water-works for it (Josephus, "B. J." i. 21, § 11). The Laodiceans were commanded by the Romans to allow their Jewish fellow citizens to celebrate the Sabbath and to practise their other religious observances ("Ant." xiv. 10, § 20). Jewish scholars lived in Laodicea who were counted among the tannaites (Sifre, Deut. 335). According to B. M. 84a, certain tannaites emigrated thither, also, unless the city of the same name in Phrygia is referred to. Sandals were brought from Laodicea (Kelim xxvi. 1); and as a city situated near Palestine it is mentioned frequently by the Rabbis (Krauss, "Lehnwörter," ii. 309, Berlin, 1899).

G. S. KR.

LAPAPA, AARON B. ISAAC: Oriental rabbi and Talmudist; died 1674. He was at first rabbi at Manissa, Turkey, and at an advanced age was called to Smyrna as judge in civil affairs. In 1665, when the Shabbethai Ẓebi movement was at its height there, he was one of the few rabbis who had the courage to oppose the false prophet and excommunicate him. Shabbethai Ẓebi and his adherents retorted by deposing him and forcing him to leave the city, and his office was given to his colleague, Ḥayyim Benveniste, at that time one of Shabbethai's followers. After Shabbethai Ẓebi's conversion to Islam, Lapapa seems to have been reinstated.

Aaron Lapapa was a pupil of Abraham Motal and son-in-law of Solomon Algazi. He wrote: "Bene Aharon," responsa and novellæ (Smyrna, 1674); "Teshubot," responsa, published in the "'Abaḳ Derakim" of Baruch Kalometi (Salonica, 1714); "Yad Aharon," an index to the Talmud and to rabbinical literature (see Benjacob, "Oẓar ha-Sefarim"). Two other works, a commentary to the "Toledot Adam we-Ḥawwah" of R. Jeroham, and a work called "Shiṭṭot Meḳubbaẓot," a collection of glosses on various Talmudic tractates, are mentioned by Conforte and Azulai. An anonymous rabbinical decision, edited by Abraham Palaggi in "Abraham Azkir" (Smyrna, 1889) and by Bernfeld in "Ḳobeẓ 'al Yad" (published by the Meḳiẓe Nirdamim, Berlin, 1899), is attributed to him.

LAPIDARIA: Writings giving the qualities of precious and other stones, mostly composed in the Middle Ages. The rarest stones and minerals were in ancient times regarded as having special and often magical qualities. For those contained in the breastplate of the high priest see Gems. The Arabs translated from the Greek or composed several works dealing with the qualities of gems. Among them 'Ali ibn Sahl ibn Rabban al-Ṭabari, a Jew converted to Islam (flourished 850), seems to have written on minerals, and Masewaih possibly on stones, as did also Bar Hebræus. The first work written by a European Jew on the subject is that of Berechiah ha-Naḳdan, in which in a description of seventy-three minerals he described also the uses of the compass (magnet). Steinschneider suggests a Romance source for the original. Judah b. Moses Cohen translated into Spanish the Arabic lapidarium of "Abolays" (Abu al-'Aish?), and Jacob b. Reuben (13th cent.) translated "Liber Lapidum" of Bishop Marbod (d. 1123; Steinschneider, "Hebr. Uebers." pp. 238, 957, 980). A section of the encyclopedic work of Gershon b. Solomon is also devoted to stones. Simon Duran deals with the subject in his commentary on Abot. Lazarus, a Jewish physician of Mayence in 1563, perhaps the body-physician of the children of the emperor Ferdinand, composed in German a work called "Ehrenpreis," upon qualities of precious stones, still extant in a Vienna manuscript. Abraham Portaleone in his "Shilṭe ha-Gibborim," 1612, quotes from a "tarifa" of silver, gold, and gems by Meshullam of Volterra. Among modern writers mention may be made of M. Cohen, who wrote a descriptive catalogue of a collection of diamonds, Vienna, 1822, and H. Emanuel, who wrote on "Diamonds and Precious Stones," London, 1867.

Bibliography: Steinschneider, in *Kohut Memorial Volume*, pp. 42-72.

G. J.

LAPIDATION. See Capital Punishment.

LAPIDOTH (LAPPIDOTH) ("torches; flames"): The husband of Deborah (Judges iv. 4), whom the Rabbis identify with Barak (= "lightning"); known also as Michael (so D. Ḳimḥi, Budde, and Wellhausen). "Lapidoth" is an intensive plural (comp. "Naboth"), with probably a figurative meaning (Böttcher, "Lehrbuch," § 719a).

E. G. H. E. I. N.

LAPWING: The rendering in the Authorized Version of the Hebrew "dukifat," enumerated among the unclean birds in Lev. xi. 19 and Deut. xiv. 18. The rendering of the Revised Version, "hoopoe," is, however, supported by the ancient versions (LXX. ἔποπα, "epopa"; Vulgate, "upupa"), and is generally accepted as the more correct one. The hoopoe winters in Egypt and returns to Palestine in the spring. It feeds on insects in dunghills and marshy places. The Arabs ascribe to it magical properties.

The Talmud understands by "dukifat" the mountain-cock ("nagar ṭura," Ḥul. 63a [Rashi]; comp. also Targ. to the Biblical passages; "tarnegol bara," Giṭ. 68b), to which the angel presiding over the sea entrusted the Shamir. The dukifat appears also in the legend of Solomon and the Queen of Sheba (Targ. Yer. to Esther i.; Koran, sura xxvii.). For the medicinal use of its blood see Shab. 78a.

LAQUEUR, LUDWIG L.: German ophthalmologist; born at Fürstenberg, Silesia, July 25, 1839. Studied at Paris and Berlin (M.D. 1860). In 1860 he became privat-docent at Berlin, and was assistant at Liebreich's ophthalmological hospital in Paris from 1863 to 1869. In 1872 he became assistant professor at the University of Strasburg, where since 1877 he has been professor of ophthalmology.

Of Laqueur's works may be mentioned: "Etudes sur les Affections Sympathiques de l'Œil," Paris, 1869; "Ueber Atropin und Physostigmin," in Graefe's "Archiv für Augenheilkunde," xxiii.; "Das Prodromalstadium des Glaucoms," *ib.* xxvi.; "Die Lage des Centrums der Macula Lutea im Menschlichen Gehirn," in Virchow's "Archiv," clviii.; "Lateral Illumination," in "System of the Diseases of the Eye," edited by Norris and Oliva, Philadelphia, 1897.

S. F. T. H.

LARA, COHEN DE: Spanish family, members of which settled in Amsterdam, Hamburg, London, and America.

Aaron Cohen de Lara: Ḥazzan of the Spanish-Portuguese community of Amsterdam from 1729 to 1744; a relative of Abraham Cohen de Lara; Haham Samuel Mendes de Sola delivered a memorial address on his death.

Abraham Cohen de Lara: Ḥazzan of the Spanish-Portuguese community of Amsterdam from 1682 to 1694; wrote a sermon in Spanish.

David Cohen de Lara: Haham, lexicographer, and writer on ethics; born about 1602 (according to some writers, at Lisbon; according to others, at Hamburg); died at Hamburg Oct. 10 (20), 1674; son of Isaac Cohen de Lara of Amsterdam; pupil of Rabbi Isaac Uzziel of Amsterdam; lived at Hamburg, where he was appointed haham of the Spanish-

Portuguese congregation at a salary of 300 marks. In the fall of 1656 he went to Amsterdam, remained there for several years, and then returned to Hamburg. He translated several sections of Elijah de Vidas' ethical work "Reshit Ḥokmah" under the title "Tratado del Temor Divino" (Amsterdam, 1633), and Maimonides' dogmatic treatises, under the title "Tratado de los Articulos de la Ley Divina" (*ib.* 1652), and wrote "Tratado de Moralidad, y Regimiento de la Vida" (Hamburg, 1662).

David Cohen de Lara's "Dibre Dawid" is an exposition of Abraham ibn Ezra's puzzle on the letters אהוי, with a Latin translation (Leyden, 1658). He was prominent as a rabbinical lexicographer. His "'Ir Dawid sive de Convenientia Vocabulorum Rabbinicorum cum Græcis et Quibusdam Aliis Linguis Europæis," which he dedicated to Joh. Silvius de Tulingen, the Swedish ambassador to Germany, is a lexicon of the foreign words found in the rabbinical writings (Amsterdam, 1638); it is really a prodromus to his greater "Keter Kehunnah: Lexikon Thalmudico-Rabbinicum," the leading work in this field, next to the 'Aruk and Buxtorf's "Lexicon Rabbinicum." This work, on which he was engaged for forty years, and which shows his familiarity with the Greek and Roman classics as well as with the Church Fathers and the Christian philologists, was completed down to the letter ר, according to Esdras Edzard, but only a portion, down to the letter י, was printed (Hamburg, 1668). He corresponded with Johann Buxtorf the younger, who thought highly of him and his work, and with other Christian scholars. His intimacy with Esdras Edzard, the Hamburg missionary, occasioned much suspicion. Of his works the following have never been printed: a dictionary to the Talmud entitled "Bet Dawid," or "Nomenclator," on which he worked for twelve years, and of which he sent a specimen to Buxtorf in 1660; "Pirḳe Kehunnah," or "Florilegium," a collection of ethical maxims; "Ohel Dawid," a book of rabbinical synonyms; "Oẓar Rab," a glossary of Arabic and other technical terms used by the rabbinical writers; and some other works, all of which have doubtless perished. He was probably also the author of a work on the "seventy weeks" of Daniel, preserved in manuscript in the city library of Hamburg.

Diego de Lara: Canonist and ecclesiastic; publicly burned for professing Judaism May 2, 1563, at Murcia, Spain, his home.

Ḥiyya Cohen de Lara: Pupil of Solomon Amar (rabbi of all the African communities; died at Morocco in 1738); taught at the school 'Eẓ Ḥayyim of Amsterdam; died after 1753. In 1685 he edited the work "Mishmerot Kehunnah" (Amsterdam, 1753). In this rare work, each copy of which he signed, he arranged Talmudic quotations in alphabetical order, and corrected the misprints found in the Talmud; he also added various critical remarks, but retracted them on the back of the title-page, probably at the instance of the rabbinical college of Amsterdam. He criticizes pilpulism and betrays a leaning toward religious reform. Some of his responsa are included in the collection "'Eẓ Ḥayyim." He left in manuscript a cabalistic work entitled "Kanfe Yonah" (now in the Bodleian Library) and "Merkebet ha-Mishnah," from which he occasionally quotes.

BIBLIOGRAPHY: Steinschneider, *Cat. Bodl.* col. 4735; Roest, *Cat. Rosenthal. Bibl.* Appendix, No. 1288; Kayserling, *Bibl. Esp.-Port.-Jud.* p. 56; *idem*, in Ersch and Gruber, *Encyc.* section ii., part 42, pp. 119 *et seq.*

Isaac Cohen de Lara: Father of David Cohen de Lara of Amsterdam; delivered religious discourses at the Academia de los Pintos, together with Isaac Velosinos; is said to have written poetry.

Isaac Cohen de Lara: Son of Abraham Cohen de Lara of Amsterdam; bookseller; editor of the "Comedia Famosa de Aman y Mordochay," dedicated to his friend David de Souza Brito, with an appendix containing many Spanish and Dutch riddles (Leyden, 1699); he edited also "Guia de Passageros," containing a Judæo-Spanish calendar, several prayers, etc. (Amsterdam, 1704). Another **Isaac Cohen de Lara** was ḥazzan of the Spanish-Portuguese congregation of Amsterdam from 1729 to 1743.

Isaac Cohen de Lara: Lived in America; goods sent by him from Rhode Island to New York in 1699 were seized by pirates.

D. M. K.

LARA, ISIDORE DE: English composer; born in London Aug. 9, 1858. He was educated at Boulogne, and made his first appearance as a pianist at the age of thirteen, continuing to play in many recitals. In his fifteenth year he went to Milan, and studied composition and singing at the conservatory of music. He remained in Italy for three years, taking the grand prize for composition. On his return to England he began to compose, and became a professor at the Guildhall School of Music. In 1882 he wrote "Only a Song." He then produced a comic opera, "The Royal Word"; a choral work, "Song of Orval"; and a cycle of melodies, "To the Palms," with words by Lord Lytton.

De Lara has written about 150 songs, of which the most popular are: "Mine To-day," "All of My All," "After Silent Years," and "The Garden of Sleep." He has written also the operas: "The Light of Asia," "Kenilworth," "Moma," and "Messalina," the last-named being first produced at Monte Carlo, and afterward at London and New York.

LA ROCHELLE (Latin, **Rupella**; Hebrew, לרוקיל): City and seaport of France; capital of the department of Charente-Inférieure; situated on the Atlantic coast. Its small Jewish community made itself conspicuous in the third decade of the thirteenth century by the exploits of one of its members named Nicholas Donin, who, after having embraced

Christianity, brought persecutions upon the Jews of Brittany and caused the burning of the Talmud in 1242. An edict of expulsion was issued in 1249 against the Jews of La Rochelle by Alphonse of Poitiers, who relieved the Christian inhabitants of that city from harboring Jews. The banishment was, however, of short duration, and Jews were again in the city at the close of that same century. A Jew named Avinus, living in Toulouse in 1307, was designated a native of La Rochelle. Since the banishment of the Jews from France in 1394 there has been no Jewish community at La Rochelle.

Among the prominent men connected with the city the following may be mentioned: R. Sire Duran or Sev Duran, a halakic decision by whom in a case of marriage is found in the glosses on the "Semaḳ" (MS. Berlin No. 37, p. 18); R. Simon Deus, who is mentioned in MS. Halberstam No. 345; and Ḥayyim ben Isaac, who in 1216 copied the Bible for a certain Joseph ha-Kohen (MS. Vatican No. 468), and the Prophets and the Hagiographa for a certain David ben Meshullam (MS. Kennicott No. 242).

G. I. Br.

L'ARRONGE, ADOLF: German dramatist and theatrical manager; born in Hamburg March 8, 1838; son of Eduard Theodor l'Arronge (Aaron). He received a musical training at the conservatorium at Leipsic, and officiated later as conductor of the orchestra in theaters in Cologne, Königsberg, Würzburg, Stuttgart, and other cities. In 1866 he settled in Berlin to assume the direction of Kroll's Opera-House, for which he wrote his first farce, "Das Grosse Los," the success of which determined him to devote himself to play-writing. His next piece, "Gebrüder Bock," was represented at the Wallner Theater, Berlin. From 1869 to 1872 he edited the "Berliner Gerichtszeitung," and during that time wrote the "Spitzenkönig" (in collaboration with Hugo Müller), "Die Kläffer" (with Heinrich Wilken), and the "Registrator auf Reisen" (with Gustav von Moser). From his own pen unaided there appeared the minor piece "Papa Hat's Erlaubt," and the comedy "Die Weisse Katze," produced at the Berlin Viktoria Theater. His great success, however, was "Mein Leopold," which, when produced in 1873, at once placed him on a very high plane in German dramatic literature. It demonstrated his power to picture for stage production the popular life of modern Berlin. The play at once found its way to the stages of every large city in Germany, and was translated and adapted for the theaters of other countries in Europe as well as for the American stage. Even as late as 1894 a German company produced "Mein Leopold" at the Opera Comique in London.

In 1874 L'Arronge became director of the Lobe Theater in Breslau, and remained there until 1878, during which time were produced his "Alltagsleben" (1874), "Hasemann's Töchter" (1877), and "Doktor Klaus" (1878). The latter two added greatly to his fame and popularity; they both had long runs and are still frequently produced in various parts of the world. He returned to Berlin in 1878, where he produced "Wohlthätige Frauen" (1879), "Hans Lony," "Der Kompagnon" (1880), "Die Sorglosen" (1882), and "Das Heimchen" (1883). At this time he acquired control of the Friedrich-Wilhelmstädtische Theater, which he reopened as the "Deutsche Theater" in 1883, at the head of which he remained until 1894. One of the most interesting features of the new enterprise was its establishment on the plan of the Théâtre Français, the management being vested in a group of "sociétaires." The associates of L'Arronge were Ludwig Barnay, Friedrich Haase, August Förster, Ernest Possart, and Siegwart Friedmann. During that period, notwithstanding his managerial cares, he found time to write "Der Weg zum Herzen" (1884), "Die Verkannten" and "Die Loreley" (1886), and "Lolo's Vater" (1893). At the request of the German emperor he revised the original text of Lortzing's posthumously discovered opera "Regina" and infused into it a patriotic element. In 1895 his "Pastor Brose" was produced, and in 1896 he wrote "Das Deutsche Theater und die Deutsche Schauspielkunst."

LASHON HA-ḲODESH. See Hebrew Language.

LASK, ABRAHAM BEN JEHIEL MICHAEL HA-KOHEN. See Abraham b. Samuel Cohen of Lask.

LASKER, EDUARD: German politician; born at Jarotschin, Posen, Oct. 14, 1829; died in New York city Jan. 5, 1884; educated at the universities of Breslau and Berlin (LL.D. Leipsic, 1873; Hon. Ph.D. Freiburg, 1875). He took part, at Vienna, in the revolution of 1848 as a member of the academic legion. In 1851 he passed his first juridical examination, and was employed for the two following years in the city court of Berlin, after which he went to England (1853), returning to Germany in 1856 to resume his juridical career. He passed his second examination in 1858 and became associate judge in Berlin. In 1865 he was elected from Berlin to the Prussian Lower House, in which he sat with the party of the Left ("Fortschrittspartei"). Reelected in 1866, he became one of the founders of the German "Nationalpartei." From 1868 to 1873 he represented Magdeburg, and from 1875 to 1879 Frankfort-on-the-Main, in the Prussian National Assembly. In 1870 Lasker was admitted to the bar in Berlin as attorney at law, and in 1873 he was appointed "Syndikus des Pfandbriefamtes" in Berlin. When the North German Parliament was opened in 1867 Lasker represented the first Berlin district; later he was elected to the German Reichstag from the second Meiningen district, which he represented until his death.

Eduard Lasker.

Lasker was a prominent member of the German party which, under the guidance of Bismarck, contributed to the rebuilding of the German empire after the Austro-Prussian (1866) and Franco-Prussian (1870–71) wars. As one of the leaders of the Nationalists he was a strong supporter of the "Iron Chancellor" until 1879, when he refused to follow him in his new revenue policy, and was consequently defeated when he stood for reelection to the Prussian National Assembly. In 1880 Lasker and a few of his followers deserted the Nationalist party; but Lasker failed to agree even with his followers. He came into direct conflict with Bismarck (who found in him a strong antagonist) with regard to a bill designed to limit freedom of speech in Parliament. Bismarck's fight against the National party and its seceding members became soon a fight against Lasker, who was thus left without a party. Exhausted in body and mind, Lasker retired from political life in the summer of 1883, and, hoping to find health and strength in travel, visited America, where death suddenly overtook him. He was buried at Berlin on Jan. 28, 1884. A resolution of sympathy was passed by the United States House of Representatives and sent to Bismarck to be laid before the German Reichstag. The chancellor, however, refused to accept the resolution on the ground that it contained a criticism of German politics—a course of action which provoked a heated debate in the German Parliament on March 13 following.

Leader of National Liberals.

Lasker was one of the ablest and most popular orators in the German Parliament, a character above reproach and an enthusiastic patriot. He contributed much to the passage of many important Prussian and German laws, among these being the laws of association, the laws governing handicrafts, determining responsibility, regulating taxation, etc.; in 1875–76, as a member of a commission, he was especially active in this work. His most notable speeches were made on Jan. 4 and Feb. 7, 1873, when he opposed the railroad policy of the Prussian secretary for railways, Von Itzenplitz. The Assembly voted a commission to examine the conditions, but the real success of these two speeches was seen in the collapse of the "Gründungsschwindel" (stock-juggling). Lasker was always the champion of his coreligionists; he introduced a law by which Jews of Orthodox tendencies were allowed to create Jewish communities. He found time also for literary work. He was the author of: "Erlebnisse einer Mannesseele," Stuttgart, 1873; "Zur Geschichte der Parlamentarischen Entwicklung Preussens," Leipsic, 1873; "Zur Verfassungsgeschichte Preussens," *ib.* 1874 (essays which appeared first in "Deutsche Jahrbücher," 1861–64); "Die Zukunft des Deutschen Reiches," *ib.* 1877; "Wege und Ziele der Kulturentwicklung," *ib.* 1881. "Aus Eduard Lasker's Nachlass, I.: 15 Jahre Parlamentarischer Geschichte," was published at Berlin in 1902.

LASKER, EMANUEL: Chess champion of the world; born Dec. 24, 1868, at Berlinchen, Germany; educated at the universities of Berlin, Göttingen, and Heidelberg, and took his degree of Ph.D. at the University of Erlangen. In 1882 he defeated several of the leading chess masters in a tournament at Berlin, gaining the first prize without losing a single game. In 1889 he gained first prize in the Masters' Tournament held at Breslau, and in the same year was second in the tournament at Amsterdam.

In 1892 Lasker went to England—in which country he has since made his home—and won the British chess championship, defeating Blackburne by 6 games to love. In the following year he went to New York and gained the championship of America, winning all his games with the thirteen leading players, including Steinitz. In 1894 Lasker won the championship of the world from Steinitz at New York with 10 games to 5, and at the return match in Moscow, in 1896, his score was: won 10; lost 2. At the Hastings international tournament in 1895 Lasker gained third prize, Pillsbury and Tchigorin being first and second respectively. He gained first prize at St. Petersburg 1895, Nuremberg 1896, London 1899, and Paris 1900, and tied with Janowski for second prize at Cambridge Springs, Pa., 1904.

Lasker has been editor of "The Chess Fortnightly" (London); and he is the author of "Common Sense in Chess," New York, 1895.

Lasker is also a mathematician of ability, and he has published the following papers: "About a Certain Class of Curved Lines," in "Nature," Oct. 17, 1895; "Metrical Relations," *ib.* Aug. 8, 1895; "An Essay on the Geometrical Calculus," in "Proc. of the London Mathematical Society," Nov., 1896, and May, 1897; "Reiten auf der Convergenzgrenze," in "Proc. of the Royal Society."

J. A. P.

LASKER, RAPHAEL: American rabbi; born at Zirke, province of Posen, Feb. 19, 1838; educated by his father, who was rabbi of Zirke, by the rabbis Caro of Pinne, Feilchenfeld and Mendel, both of Rogasen, and later at the gymnasium of Gleiwitz and the University at Giessen. In 1858 he emigrated to the United States, where he founded the Congregation B'nai Abraham at Portsmouth, Ohio. In 1862 he became rabbi of Congregation Shaar Hashomayim, in New York city, and in 1871 of the Temple Israel, Brooklyn. In 1876 he accepted a call from the Congregation Ohabei Shalom at Boston, of which he is now (1904) rabbi emeritus. When, in 1901, the "New Era Magazine" was founded Lasker became its editor, but he resigned in November, 1903, when the periodical was purchased by Isidore Lewi.

LASSALLE, FERDINAND: The founder of Social Democracy; born in Breslau, Germany, April 11, 1825; died Aug. 31, 1864, in Geneva. His father, Heymann Lassel, was a prosperous silk-merchant, and desired his son to pursue a similar calling. Lassalle even in early youth manifested the independent spirit that characterized him in all his later life, but he yielded to this wish of his father. After some preliminary schooling in his native city, the boy was sent at the age of fifteen to a commercial school at Leipsic. The studies there were not to his taste, he having already acquired a passion for philosophy and the classics. The year and a half that he spent there were irksome, but they offered him opportunity to pursue at will the intellectual labors that attracted him.

Lassalle at last succeeded in persuading his father that the commercial school was not suitable for him; and he returned to Breslau to prepare for admission to the University of Breslau, attendance at which was followed by a course at the University of Berlin.

His Youth.

Lewis J. Huff, in his article on Lassalle in the "Political Science Quarterly," vol. ii. 416, states positively that Lassalle was baptized in his youth. No historical basis can be found for this statement. Helene von Racowitza, in her memoirs, states that during their courtship Lassalle asked her whether his being a Jew would be an obstacle to their union, and whether she would require him to become a Christian, and that he expressed his gratification that such a sacrifice on his part would not be necessary. This should certainly be sufficient to disprove Huff's statement.

Lassalle devoted himself to philosophy and philology. He early became a disciple of Hegel, and acquired the ambition of writing a monograph on Heraclitus from the Hegelian point of view.

At the end of his university career (1845) Lassalle, mainly with the idea of collecting materials for his work on Heraclitus, went to Paris, and there met Heine, who was suffering from sickness, want, and the worries of litigation. Lassalle, though but a boy of twenty, came to him as a ray of sunshine. The poet's letters show that Lassalle was a source of welcome aid to him in his troubles. He admitted, too, the high mental qualities of the youth; and his letter introducing Lassalle to Varnhagen von Ense is a remarkable tribute to the possibilities of the future that lay before the former.

From Paris Lassalle returned to Berlin, where he consorted familiarly with such eminent scholars as Humboldt—who dubbed the dashing youth a "Wunderkind"—Savigny, and Böckh; and here, too, he was introduced by Dr. Mendelssohn to the Countess von Hatzfeldt, who was then in her thirty-sixth year, and who, engaged in a feud with her husband, had been dispossessed of her property and robbed of her children.

Hatzfeldt Affair.

Lassalle was soon enrolled among those who were seeking to secure for her some measure of right and justice at the hands of the courts. He applied himself to the study of jurisprudence, and, being admitted to practise, took up the countess' affairs in earnest. For eight years he confined himself exclusively to her interests, not only giving of his time, thought, and energy in her behalf, but also providing for her support out of his allowance. All other pursuits were practically discarded by him. Work on the "Heraclitus" was suspended: the Hatzfeldt affair absorbed all his intellectual powers. Some indication of the effort involved in the prosecution of the case may be gleaned from the fact that from first to last Lassalle was obliged to prosecute thirty-six separate and distinct actions in court.

One of its incidents was the casket episode, which arose out of the attempt by some friends of the countess to obtain possession of a certain bond for the settlement of a large life annuity by Count Hatzfeldt on his mistress, Baroness Meyerdorf. The casket, which was the jewel-case of the baroness, was taken from her room at a hotel in Cologne. Two of Lassalle's comrades were prosecuted for the theft; one of them, Mendelssohn, being condemned to six months' imprisonment, while the other, Oppenheim, was acquitted. Lassalle himself was charged with moral complicity, and was convicted, but on appeal to the higher court, judgment was reversed and he was acquitted.

Revolution of 1848.

Another and a more important incident of the Hatzfeldt affair was the uprising of 1848, at which time Lassalle had gone to Düsseldorf in connection with the case. He affiliated with the Democrats of the Rhine province. When the Prussian government dispersed the National Assembly in November, Lassalle used his oratorical powers in an effort to arouse the people to armed resistance. He was arrested and thrown into prison, and on the following day was tried on the charge of inciting the populace to armed revolt. In the eloquent speech which he delivered in his defense ("Meine Assisen-Rede," Düsseldorf, 1849) the young revolutionist, then but twenty-four years of age, emphatically proclaimed himself an adherent of the Social Democratic idea. He was acquitted of the main offense, but on a minor technical charge was sentenced to six months' imprisonment. At last the Hatzfeldt matter was settled by a compromise which secured for the countess a substantial fortune. This done, Lassalle then completed "Die Philosophie Herakleitos des Dunklen," 2 vols., Berlin, 1858. In 1859 he went to Berlin, where he was elected a member of the Philosophical Society and selected to deliver the Fichte Memorial oration. There appeared from his pen at this time the drama "Franz von Sickingen." In 1859 he wrote and published "Der Italienische Krieg und die Aufgabe Preussen's," in which he unfolded the very plan of campaign which Bismarck later submitted to the King of Prussia and, several years after, successfully put into execution.

Ferdinand Lassalle.

In 1860 appeared the first-fruits of his researches in jurisprudence, the "System der Erworbenen Rechte, eine Versöhnung des Positiven Rechts und der Rechtsphilosophie," 2 vols., Leipsic, 2d ed. 1880, a treatise which demonstrates the thorough manner in which he had pursued his legal studies. About the same time he grappled with the literary critic Heinrich Julian Schmidt in a work of fascinating brilliancy, "Herr Julian Schmidt, der Literarhistoriker, mit Setzer-Scholien Herausgegeben," Berlin, 1862. Schmidt, who sought to pose as the interpreter of German intellectual life, was remorselessly flayed, Lassalle exposing the errors of fact as well as of judgment of which Schmidt had often been guilty.

Founder of Social Democracy.

Now came that brief period of Lassalle's life which witnessed the activity that has rendered his career most remarkable. The seed sown in 1848 blossomed forth in the three years 1861–64. It was indeed a short period within which to wage such a war against traditional ideas of politics and economics as Lassalle fought.

Lassalle himself never undertook, or at least never carried out, the task of formulating a systematic exposition of his socialistic theories, and these must, therefore, be pieced together from scattered sources.

At the back of all his ideas on this subject lay his recognition of the pitiable plight of the peasant and laborer of his time in Germany, where the French Revolution probably exerted less influence than in any other country of Europe. His oft-recurring text is the "iron law of wages," as enunciated by Ricardo, according to which the tendency of a laborer's wages is to keep on a level with the cost of bare subsistence for himself and family. Lassalle contended that the real value of things is the amount of labor expended in their production; that labor is, therefore, the sole creator of value; and that labor should, consequently, receive all the value of its produce, instead of the greater portion being given to capital as profit on the investment. The problem to be solved was how to dispense with the interposition of capital, so that labor might secure the profit of its industry instead of the bare subsistence wage. The central idea of Lassalle's solution of this problem was that the state, by its credit, should aid the promotion of cooperative associations for the carrying on of various industries. In this brief statement lies embedded the germ of state socialism. To state it negatively, it does not contemplate any present confiscation of property, as by communism, nor ultimate abrogation of all legal obligations, restraints, and liabilities, as is embodied in the program of the anarchists. It differs from these in that it has not in view any violent methods whereby to secure its adoption.

His Program.

The economic phase of Lassalle's program was not, however, its sole feature, nor indeed even its chief characteristic. Equal in importance with it was the political phase, which had for its object the introduction of universal suffrage as the method by which social reform could be more expeditiously and efficaciously realized. In the "Arbeiterprogramm" (Eng. transl. by Edward Peters, London, 1884) Lassalle elaborates the theme that, as the middle classes had succeeded to the territorial aristocracy, so the "fourth estate," the working classes, by means of universal suffrage was destined eventually to become the ruling power in society. It was this proposition to invest the laboring class with political power rather than his socialistic suggestions that brought upon Lassalle the wrath of both Liberals and Conservatives. This dream of a democracy was, to the German mind of 1863, as startling as if there had been no Washington, no French Revolution.

It is not easy to conceive how difficult it was so late in the nineteenth century to lead the minds of the German laborers to a realizing sense of Lassalle's teachings. He gathered about him a band of disciples such as Bernard Becker, Vahlteich, Dammer, and Bebel, and founded the General German Labor Organization; and the Social Democracy, as a political factor and an economic ideal, was created.

In all this work of agitation Lassalle displayed marvelous assiduity, and though he was hated and denounced as "the terrible Jew," astonishment was expressed at his remarkable oratorical power, his profound and wide learning, and his dialectical skill in controversies with some of the ablest publicists of his time. The literary product of this period of his life is exclusively the outcome of his politico-social agitation.

His Duel and Death.

In 1862 Lassalle met Helene von Dönnigsen, the daughter of a Bavarian diplomat and, according to Kellogg, of a Jewish mother. The two loved at first sight; and it was not long before they revealed their affection to each other. But her father opposed their union and forced his daughter to write a formal renunciation of him. She then accepted as a suitor Janko von Racowitza, who had long paid her assiduous attentions. Lassalle was enraged and sent a challenge to both father and lover, which was accepted by the latter. The duel was fought on the morning of Sunday, Aug. 28, 1864, in a suburb of Geneva. At the first shot Lassalle fell mortally wounded, and three days afterward died.

The body of the Socialist leader, brought home through Germany amid much pomp and ceremony, greeted in the various cities with many manifestations of popular grief, was laid to rest in the Jewish cemetery of Breslau.

After his death the organization which he had founded developed factional differences growing out of varying conceptions of the scope and methods of the movement, the fundamental point of variance being the opposition to Lassalle's idea that socialistic regeneration was possible under the imperial or royal constitution of the state.

Influence and Writings.

The influence of Lassalle's agitation was not confined, however, to the party which he created, but was felt in the legislation of Prussia, Germany, and of all other civilized countries.

Subjoined is a list of Lassalle's writings in alphabetical order:

Agitation des Allgemeinen Deutschen Arbeitervereins und das Versprechen des Königs von Preussen, Die. Berlin, 1864.
An die Arbeiter Berlins. Berlin, 1863.
Arbeiterfrage, Zur. Leipsic, 1863.
Arbeiterlesebuch. Frankfort, 1863.
Arbeiterprogramm. Berlin, 1862.
Briefe von Lassalle an Carl Rodbertus-Jagetzow. Berlin, 1878 (in vol. i. of Rodbertus, "Aus dem Literarischen Nachlass").
Criminalurtheil über Mich, Das. Leipsic, 1863.
Erwiderung auf eine Recension der Kreuzzeitung. Düsseldorf, 1864.
Feste, die Presse und der Frankfurter Abgeordnetentag, Die. Düsseldorf, 1863.
Fichte's Politisches Vermächtniss und die Neueste Gegenwart. Hamburg, 1860.
Gotthold Ephraim Lessing vom Culturhistorischen Standpunkt. 2d ed. Hamburg, 1877.
Herr Bastiat-Schulze von Delitzsch, der Oekonomische Julian oder Kapital und Arbeit. Berlin, 1864.
Indirecte Steuer und die Lage der Arbeitenden Klassen, Die. Zurich, 1863.
Macht und Recht. Zurich, 1863.
Offenes Antwortschreiben an das Zentralcomté. Zurich, 1863.
Open Letter to the National Labor Association. Cincinnati, O. Eng. transl. 1879.
Ueber Verfassungswesen. Berlin, 1862.
Was Nun? Berlin, 1862.
Wissenschaft und die Arbeiter, Die. Zurich, 1863.
Workingman's Programme, The. Transl. by Edward Peters. London, 1884.

There are two collected editions of Lassalle's writings, both of which include, besides his published works (though neither has the "System der Erworbenen Rechte" in its complete form), stenographic reports of several of the trials in which he was the central figure. One edition was published in New York in 1882-83, and the other, a much fuller and more accurate production, was edited by E. Bernstein and published in Berlin in 1891-93. Both editions are in three volumes.

LASSAR-COHN. See COHN, LASSAR.

LASSAR, OSKAR E.: German dermatologist and hygienist; born at Hamburg Jan. 11, 1849. He received his education at a gymnasium at Hamburg and at the universities of Heidelberg, Göttingen, Strasburg, and Würzburg (M.D. 1873). He served through the Franco-Prussian war as lieutenant. After a postgraduate course at Strasburg under Hoppe-Seyler, and at Berlin under Salkowski, he became assistant in the physiological institute at Göttingen. In 1875 he went to Breslau, where he held the position of assistant at the pathological institute till 1878. The same year he removed to Berlin, where he established a practise as dermatologist. In 1880 he became privat-docent, and four years later he opened a private hospital and dispensary for dermatology and syphilis. He was one of the founders of the Berlin Dermatological Society (1886).

Lassar was one of Robert Koch's associates in the Prussian Board of Health. He introduced the "Lassar's shower-bath" in 1883, which made it possible to give the poor a bath for 2 cents. He has contributed many essays to the medical journals, especially to Pflüger's "Archiv für die Gesammte Physiologie" and to Virchow's "Archiv." Lassar is editor of the "Dermatologische Zeitschrift."

LASSEN, EDUARD: Danish conductor and dramatic composer; born at Copenhagen April 13, 1830; died at Weimar Jan. 15, 1904. His father was president of the Jewish Consistory of Belgium. In his twelfth year he entered the Conservatoire at Brussels, to which city his parents had removed in 1832, and after two years' study secured the first prize for pianoforte. In 1849 he received the second government prize for composition; in the following year, prizes at Ghent and Antwerp, and in 1851, for his cantata "Baltasar," the "Prix de Rome."

Lassen visited Düsseldorf, Cassel, Leipsic, Dresden, Berlin, and Weimar, sojourning for some time in the last-named city in order to receive the benefit of Liszt's instruction. Thence he went to Rome, where he remained until 1855. Returning to Brussels, he endeavored to secure a hearing for his first opera, "Le Roi Edgard," but only the overture was performed. Undismayed by this failure, the composer sent the score to Liszt, who greatly assisted Lassen in remodeling the work; and, under the title "Landgraf Ludwig's Brautfahrt," it was very successfully performed under the leadership of the composer himself at Weimar in May, 1857. Lassen soon afterward succeeded Götze as court musical director at Weimar, with which city he thenceforth became identified. From 1861 to 1895 he held there the position of court kapellmeister.

Lassen was a most able conductor, particularly of Wagner's operas, and one of the leading composers of his day. His principal works, in addition to those already mentioned, include: the operas "Frauenlob" (Weimar, 1860), and "Le Captif" (Brussels, 1865; in German at Weimar, 1868); the music to "Œdipus in Kolonus" (1874), to "Faust" (1876), to "Pandora" (1886), to Calderon's "Circe" (in the German version: "Ueber Allen Zaubern Liebe" by Devrient), and to Hebbel's "Nibelungen" (11 characteristic pieces for orchestra); a Te Deum for chorus and orchestra (first performed at the Church of St. Gudule Dec. 16, 1860, in celebration of the birthday of Leopold I. of Belgium); vocal Bible scenes, with orchestral accompaniment; cantatas; a soprano scena with orchestra, entitled "Der Schäfer Putzte Sich zum Tanz"; 2 symphonies; overtures; and a march for orchestra.

It is, however, principally through his songs (comprising several hundred numbers) that Lassen has secured a world-wide reputation, his best productions in this field being the following: "Ich Hatte Einst ein Schönes Vaterland"; "Mit Deinen Blauen Augen"; "Das Alte Lied"; "Frühlings-Gruss"; "Der Fichtenbaum"; "Ich Hab' im Traum Geweinet"; "Zigeunerbub im Norden"; "In Deiner Nähe"; "Die Gletscher Leuchten im Mondlicht"; "Wenn der Frühling auf die Berge Steigt"; "Sommerabend"; "Sonntagsruhe"; "Sei Stille"; "Die Grossen Stillen Augen"; "Schlummerlied"; "Ich Weil' in Tiefster Einsamkeit"; "Nähe des Geliebten."

LASSON, ADOLF: German philosophical writer; born at Alt-Strelitz, Mecklenburg-Strelitz, March 12, 1832; educated at the Gymnasium Carolinum, Neu-Strelitz, and the University of Berlin (1848–52; classical philology and law). In 1858 he became teacher at the Friedrichsgymnasium, and from 1859 to 1897 he occupied the same position at the Louisenstädtisches Real-Gymnasium. In 1861 he took the Ph.D. degree at Leipsic University, and in 1877 became privat-docent in philosophy at Berlin University. Since 1874 he has lectured on the history of German literature at the Viktoria Lyceum. He embraced Christianity in 1853, and at present holds the position of honorary professor at the University of Berlin.

Lasson has written the following works: "J. H. Fichte im Verhältniss zu Kirche und Staat," 1863; "Meister Eckhart" and "Das Kulturideal und der Krieg," 1868; "Prinzip und Zukunft des Völkerrechts," 1871; "System der Rechtsphilosophie," 1881; "Entwickelung des Religiösen Bewusstseins der Menschheit," 1883; "Zeitliches und Zeitloses," eight lectures, 1890; "Sint ut Sunt, Wider die Neuerer"; "Das Unendlich Kleine im Wirtschaftlichen Leben," 1891; "Lotterie und Volkswirtschaft," 1894; "Das Gedächtnis," 1894; "Handelsinteressen und Grundbesitzinteressen," 1896; "Der Leib," 1898. He also edited a translation into German of Giordano Bruno's "De Causa" (3d ed. 1902), and a small volume of religious poetry entitled "Herzensstille," 1868.

Bibliography: *Das Geistige Berlin*, 1897, pp. 283–284; *Meyers Konversations-Lexikon*; Kahle, *Lasson's System der Rechtsphilosophie*, 1883.

S.

LASZ, SAMUEL: Hungarian scientist; born Dec. 18, 1859, at Szergeny; studied at Papa, Sopron, and Budapest. In 1882 he received an appointment at the state meteorologic institute, where he made researches into climatology, zoology, and geology. He is now (1904) professor at one of the gymnasiums of Budapest.

Lasz has published the following works: "A Vulkánizmuszról" (Budapest, 1883), on volcanism; "Szövö-Fonómesterek" (*ib.* 1885, awarded a prize), on master-spiders; "Egy Átkos Kis Légyröl" (*ib.* 1894, awarded a prize), on flies; "Lebens- und Charakterbild des Dr. Ludwig Lewis" (*ib.* 1883).

s. L. V.

LÁSZLÓ, PHILIP: Hungarian portrait-painter; born June 1, 1869, at Budapest. As a highly talented student of the Model Drawing School of Budapest, he received for five years a stipend from the state, which enabled him to study portraiture at Munich with Liezen-Mayer, and at

Paris with Lefèvre. He first attracted attention in 1891 by his painting "Erzählende Alte Frau." His best-known portraits are those of the family of the Prince of Bulgaria; Princess Charlotte of Saxe-Meiningen; Count Arthur Schönborn; Prince Alexander Hohenlohe-Schillingsfürst; King Francis Joseph I.; Bishop Fraknői; Archduchess Isabella; Prince Hugo Dietrichstein; and Pope Leo XIII. László has embraced Christianity.

S. L. V.

LATERAN COUNCILS: Councils of the Church held at Rome in the papal palace on Lateran Hill, whence their title. Those affecting Jewish history are the third (1179) and fourth (1215). At the former or third Lateran Council the Church law with regard to Jews having Christian servants was reenacted, and those Christians were excommunicated who even lodged among Jews. The testimony of Christians was to be preferred to that of Jews, while the property of converts to the Christian Church was not to be taken away from them. This last enactment was directed against Christian princes, who claimed the property of converted Jews on the ground that it belonged by right to them. When a Jew became a convert he ceased to be a moneylender, and the king lost by the change and claimed compensation. At the same council the Church laws against usury were increased in severity, and Christian burial was refused to those dying in that sin. This tended to throw the business of money-lending more and more into the hands of the Jews (see Usury).

At the great Lateran Council of 1215 further steps were taken by the Church to check usury. Christian princes were admonished to see that debtors be not charged too high a rate of interest by Jews. The princes were also commanded by the Church not to have Jewish officials, while Jews themselves were ordered to pay tithes for such lands as they held which had previously had tithes paid on them by Christian princes, so that the Church should not lose by the change of ownership. Besides this each head of a Jewish household was obliged thenceforth to pay six deniers yearly to the Church at Easter. But above all, this council established the institution of the Badge, with its disastrous consequences to the status of the Jews. The alleged reason for making the distinction was the frequency of intercourse between Jews and Christian women.

G. J.

LATTEINER, JOSEPH: Judæo-German playwright; born at Jassy, Rumania, in 1853. After studying Talmud in the yeshibah there, Latteiner, at the age of seventeen, devoted himself to the study of modern languages. In 1876 the quarrel which broke out between the Ḥasidim and the Mitnaggedim in his native town afforded Latteiner an opportunity to test his dramatic talent; he wrote two dramas, "Der Fanaticismus" and "Der Dibbuk," both being produced with notable success. In 1884 Latteiner went to New York, where he is now living (1904); he is recognized as one of the leading writers for the Jewish stage in America. Latteiner has written over a hundred plays, mainly melodramas, burlesques, and comic operas. He is an opponent of Gordin's realistic dramas, and for a long time he and Horowitz held undisputed sway. Among his dramas "Das Fünfte Gebot," "Blümele," and "Ḥorban Yerushalayim" deserve special notice.

Bibliography: B. Eisenstadt, *Ḥakme Yisrael be-Amerika*, p. 61, New York, 1903; Hutchins Hapgood, *The Spirit of the Ghetto*, pp. 126, 128, 139, New York, 1902.

S. M. Sel.

LATTES (LATTAS): Family that includes many scholars among its members. The name frequently occurs with the prefix "De" (מלאטאש, מלאטיש), and seems to have originated in Lattes, a little town near Béziers, France (Steinschneider, "Cat. Bodl." No. 8216).

Aaron Elijah Lattes: Rabbi at Venice; died there 1839; came from Savigliano in Piedmont ("Atto Ecc. dell' Istituto Convitto Rabbinico in Padova," Venice, 1853).

Abraham ben Isaac Lattes: Grandson of Aaron Elijah; born 1809; died 1875. He graduated from the rabbinical college of Padua in 1834, returned to Venice, and became assistant to his grandfather. Upon the death of the latter in 1839 he was appointed chief rabbi. He rendered memorable services to the charitable and educational institutions of the community, distinguishing himself especially by his self-sacrificing devotion during the epidemic of cholera that accompanied the siege of Venice in 1848.

In 1847 Abraham wrote, at the request of the municipality, "Cenni Storici sulla Communità Israelitica di Venezia," which appeared in "Venezia e Sue Lagune" (Venice, 1847), a volume published on the occasion of the ninth scientific congress, held at Venice in 1847. He also contributed an important article in defense of Judaism to the "Eco dei Tribunali." In his younger days he contributed to the Hebrew periodicals "Kerem Ḥemed" and "Bikkure ha-'Ittim."

Bonet de Lattes. See Bonet de Lates.

Elijah Lattes: Economist and classical scholar; son of Abraham Lattes; born at Venice in 1843; educated at Turin (Doctor of Laws). He became professor of Greek and Roman antiquities in the scientific and literary academy of Milan, in which city he now (1904) lives in retirement. He is a member of many scientific societies and a commander of the Order of St. Maurice and St. Lazarus. Among his writings are: "Studii Storici sul Contratto d'Enfiteusi" (Turin, 1868); "Studii Critici e Statistici sul Credito Fondiario" (Milan, 1868); "La Libertà delle Banche a Venezia del Secolo xiii. al xvii." (*ib.* 1869); "L'Ambasciate dei Romani per le 12 Tavole" (*ib.* 1884). In memory of his father and of his brother Moses he established a fund to provide prizes for works in Jewish literature.

Elijah ben Isaac Lattes. See Elijah ben Isaac of Carcassonne.

D. E. L.

Immanuel b. Jacob Lattes: Son of Bonet de Lattes; flourished about 1515-27; highly respected at the court of Leo X., where he received a large salary as physician and translator from the Latin. He had a number of sons, the best known of whom is **Isaac Joshua b. Immanuel,** who rendered great services in connection with the printing of the Zohar. A portrait of his other son, **Elijah de Lattes Ebreo,** has been preserved on a medal of 1552 ("Monatsschrift," xxxviii. 239). His brothers **Samuel, Moses,** and **Jacob** were prominent and learned members of the Roman community about 1570. Samuel's sons **Moses, Menahem,** and **Solomon** were at Rome about 1585; Jacob's sons **Immanuel, Mordecai,** and **Menahem** are mentioned in the archives of the community of Rome as late as 1600. Aside from this direct line descending from the famous Bonet, a large number of persons by the name of **Lates** lived at Rome during and after the Middle Ages. Among the rabbis of Rome may be mentioned **Raphael de Latas** (*c.* 1670), who was in personal intercourse with Bartolocci and corresponded with Samuel Aboab of Venice. In the succeeding centuries there appear to have been many members of the family of Lattes in Piedmont, especially at Chieri. **Isaac b. Joshua,** author of a commentary to the Midrash (Chieri, 1629; Steinschneider, "Cat. Bodl." col. 2862), was rabbi at Chieri about 1630.

D. I. E.

Isaac ben Jacob Lattes: Lived in Provence; wrote, in 1340, "Toledot Yiẓḥaḳ," in which he gives valuable information concerning other Provençal authors and discusses the history of tradition. This work is known also by the name "Sha'are Ẓiyyon" (ed. Buber, Yaroslav, 1885). He wrote also "Ḳiryat Sefer," a commentary on the Pentateuch (Benjacob, "Oẓar ha-Sefarim"; Zunz, "Z. G." p. 479; Buber, in the preface to "Sha'are Ẓiyyon"). E. L.

Isaac Joshua ben Immanuel Lattes. See ISAAC JOSHUA BEN IMMANUEL DE LATTES.

Isaac ben Judah Lattes: French Talmudist and physician; lived in the thirteenth and fourteenth centuries. He visited Perpignan in 1303, and later settled there as a physician. Aside from his medical practise, he was engaged in Talmudic, astronomic, and other scientific studies, and is said to have written works thereon. He can not have gone deeply into natural science, however; for, like many of his contemporaries who believed in the marvelous powers of amulets, Isaac, when his art as a physician failed him, also employed a talisman, one of stone on which a lion was engraved. He thereby occasioned a great controversy between Abba Mari of Perpignan and Solomon ben Adret, in the course of which Isaac, who claimed to be an advocate of science within Judaism, incurred the most bitter reproaches of Abba Mari.

Isaac figured in another controversy between Abba Mari and Solomon ben Adret, which was much more important and far-reaching. Abba Mari requested Solomon ben Adret to forbid, under pain of excommunication, free investigation and the pursuit of scientific studies, to which the latter, after much hesitation, consented. But as soon as the affair became known, the most prominent members of the community of Perpignan objected. Abba Mari, disappointed in his expectations, drew up a petition signed by several members, to prove to Adret that he did not stand alone in his opinion. Among the signatures was that of Isaac, proving that he sided with Abba Mari. This did not prevent him, however, from likewise signing the letter that the rationalists addressed to Solomon ben Adret to induce him to change his mind. It is difficult to understand what caused Isaac to act in this inconsistent manner, which justly exasperated Abba Mari.

Jacob b. Immanuel Lattes. See BONET DE LATES.

Jacob ben Isaac Lattes: Talmudist; father of Isaac ben Jacob Lattes; lived about 1340 (Zunz, "Z. G." p. 479).

Joseph Lattes: Italian rabbi; born at Turin 1811; died at Reggio 1880. He received the rabbinical diploma at the age of nineteen, and was successively rabbi at Moncalvo, Chieri, and (from 1857) Reggio. Especially devoted to the cause of education, he was sent as a provincial delegate to the congress of teachers held at Turin in 1874; his active participation in its deliberations won for him the title of "Cavaliere." He was an advocate of cremation, but there being no crematory at Reggio he left orders for his body to be buried in quicklime ("Il Vessillo Israelitico," 1880, pp. 150, 187).

D. E. L.

Judah ben Jacob Lattes: French rabbi and ritualist of the thirteenth century. He was the author of a work entitled "Ba'al Asufot," responsa and ritual decisions. Gross ("Monatsschrift," xviii. 536) thinks that this work is quoted in the "Orḥot Ḥayyim" (Günzburg MS. 124a) under the title "Sefer ha-Asufot," sometimes confounded with the "Asufot" written by a German author. The "Ba'al Asufot" is quoted by Isaac Lattes in his "Sha'are Ẓiyyon" (p. 73), and the author of the former quotes many rabbis of Provence. Extracts from the "Ba'al Asufot" were published by S. D. Luzzatto in Berliner's "Magazin" (iv. 73 *et seq.*, Hebr. part). Gedaliah ibn Yaḥya ("Shalshelet ha-Ḳabbalah"), followed by Zunz ("Z. G." p. 481), erroneously attributes the "Ba'al Asufot" to Judah's grandfather, Isaac b. Elijah of Carcassonne.

D. M. SEL.

Moses Lattes: Son of Abraham Lattes; born at Venice 1846; died as the result of an accident in 1883 near Lake Lecco, where he had gone to recover from a severe illness; studied in the rabbinical college of Padua, graduating in 1863. In 1869 he published, in Hebrew, "De Vita et Scriptis Eliæ Capsalii," which he dedicated to his father. After his father's death he acted as temporary rabbi for six months, and then resigned, principally that he might devote himself wholly to study. He applied himself to the investigation of old documents, a large number of which he published, either in part or entire, in the "Archivio Veneto" and in the periodicals "Mosé," "Il Vessillo Israelitico," and "Revue des Etudes Juives." He published also an independent collection of the documents which had appeared in "Mosé," entitled "Notizie e Documenti di Litteratura e Storia Giudaica" (Padua, 1879). He became especially well known through his studies on the language of the Talmud. His first work, "Saggio di Giunte e Correzioni al Lessico Talmudico" (Turin, 1879), was printed with the proceedings of the Royal Academy of Turin. His "Nuovo Saggio di Giunte e Correzioni al Lessico Talmudico" (Rome, 1881) won for him honorable mention in the Accademia dei Lincei. He had collected material for many other works when death prematurely ended his career.

LAUB, FERDINAND: Austrian violinist; born at Prague Jan. 19, 1832; died March 17, 1875, at Gries, near Bozen, Tyrol. He received his early musical education from his father, and when a young boy displayed a remarkable talent for music which aroused the interest of some musical celebrities, one of whom, Moritz Mildner, undertook the boy's future education. Laub received from the archduke Stephan a letter of recommendation to some musical notables in Vienna, whither the young man went in 1847, and there gave some very successful concerts. Thence he traveled to Paris, giving en route concerts at the principal towns of southern Germany.

Laub visited London for the first time in 1851; two years later he succeeded Joachim as "Concertmeister" in the Academy of Music at Weimar, and resigned this position in 1855 to become a teacher of the violin at the Conservatory in Berlin under the supervision of Stern and Marx. The following year he became "Concertmeister" of the royal orchestra and royal chamber virtuoso, in which capacity he gave a series of chamber concerts at which a number of classical and modern quartets were introduced, and which added considerably to his reputation.

In 1864 Laub joined Carlotta Patti, Jaell, and Kellermann in a long concert tour through the Netherlands and southern Germany. Two years later he became professor of the violin at the Conservatory in Moscow, and leader of the Russian Musical Society's concerts in that city. In 1874 ill health compelled him to resign these appointments. He composed an opera, "Die Griesbäcker"; an "Elegie"; two collections of Czech melodies; a "Polonaise"; and other solo pieces for the violin. Of these compositions the one now most frequently heard is his "Polonaise."

LAUCHHEIMER, CHARLES HENRY: American naval officer; born at Baltimore, Md., Sept. 22, 1859. In 1881 he graduated from the United States Naval Academy at Annapolis; in 1884 he took the degree of LL.B. at Columbia University. He attained the rank of first lieutenant in 1890, that of captain in 1898, and for the last three years has been major in the United States Marine Corps. He is the author of "Naval Courts and Naval Law" (1896) and "Forms of Procedure for Naval Courts and Boards" (1896; revised and enlarged, 1902).

A.

LAURENCE, RICHARD: English Christian Hebraist; born in Bath 1760; died in Dublin 1838. He was made regius professor of Hebrew and canon of Christ Church, Oxford, in 1814, and Archbishop of Cashel, Ireland, in 1822. His chief contribution to Biblical scholarship was his study of the Ethiopic versions of certain pseudepigrapha: "Ascensio Isaiæ Vatis" (Oxford, 1819); "Primi Ezræ Libri . . . Versio Æthiopica" (*ib.* 1820); "The Book of Enoch the Prophet" (*ib.* 1821; other ed. 1832, 1838), from a manuscript in the Bodleian Library brought from Abyssinia by Bruce; these were all provided with Latin and English translations. Though these editions have been superseded, through the discovery of better texts and the employment of better critical methods, Laurence is entitled to the credit of having revived the study of Ethiopic, which had been neglected in England since the time of Walton. He published also "The Book of Job" (Dublin, 1828)—the Authorized Version, arranged in conformity with the Masoretic text.

LAURIN. See DAMASCUS AFFAIR.

LAUTENBURG, SIGMUND: Theatrical manager; born at Budapest Sept. 11, 1852. In consequence of the poverty of his parents, he was obliged to interrupt his studies at the "Realschule" at the age of twelve to enter a banking-house. He neglected his business, however, for the theater, to which he was enthusiastically devoted. An uncle then took him to Vienna, where he continued his studies at the Akademische Gymnasium; but here again the theater was a greater attraction for him than the school. Under these circumstances he decided to devote himself entirely to the dramatic art, and in 1871 he made his début in Schiller's "Kabale und Liebe" at Neusohl, Hungary. In 1873 he was engaged for a short time at the Königstädtische Theater, Berlin, and then played in Elberfeld and Barmen for two years. On returning to his native city, he was engaged at the Deutsche Theater. Soon afterward he became director of various theaters in Amsterdam, Bremen, and Lübeck, and in 1887 he became general manager of the Residenztheater, Berlin, which position he still (1904) occupies.

LAVATER, JOHN CASPAR. See Mendelssohn, Moses.

LAVER (כיור): Vessel used for ritual ablutions. The laver in the Tabernacle consisted of two parts, a basin and a stand ("ken"; Ex. xxx. 18 *et al.*). It was made of the brass from the mirrors given by the women who served in the Sanctuary (Ex. xxxviii. 8), and stood between the door of the Tabernacle and the altar of burnt offering. It was placed there that Aaron and his sons might wash their hands and feet before entering the Tabernacle (Ex. xxx. 19-21). Nothing is said as to its size or shape. In the court of Solomon's Temple ten lavers of bronze were established, five on the right and five on the left, facing eastward (I Kings vii. 27-39). They were used for the cleansing of the entrails and feet of the animals sacrificed (Josephus, "Ant." viii. 3, § 6; comp. II Chron. iv. 6), while the "brazen sea" served the purpose of the laver of the Tabernacle. As far as can be made out from the detailed but not entirely clear and intelligible descriptions of I Kings and Josephus, and from comparing similar vessels represented on Assyrian monuments, the lavers had bases ("mekonot"), in

Laver and Basin.
(In the British Museum, London.)

two parts or divisions. The lower part consisted of a square framework, the sides being a kind of open lattice-work ("misgerot" and "shelabbim"). At the corners of this frame were "shoulders" ("ketefot"), in which were fixed the axles on which the wheels turned. These bases were each four cubits long, four broad, and three high (Josephus and the LXX. give somewhat different measurements), while the wheels were each one and one-half cubits in diameter. Upon these bases were set round pedestals (I Kings vii. 31, 35), each half a cubit in height, one and one-half cubits across, and one cubit on the inside; the pedestals rested on supports ("yadot" = "hands") springing, as it seems, from the lower square base (comp. Stade's "Zeitschrift," xxi. 150 *et seq.*; Nowack, "Lehrbuch der Hebr. Archäologie," ii. 44–46). The panels and stays were ornamented with figures of lions, oxen, cherubim, and wreaths. The lavers proper, or basins, were four cubits in diameter, and had a capacity of "forty baths" (= 52 cubic feet), being therefore about two feet high.

In the Second Temple there was only one laver of brass, which served the same purpose as that of the Tabernacle, namely, for the priests to wash the hands and feet (Tam. i. 2, ii. 1; Mid. iii. 6). According to Yoma 37a, Ḳaṭin supplied it with twelve spigots ("daddim," lit. "breasts"), it having had only two before, and with some contrivance for letting the water in and out. Of its size and shape no information is given. No mention is made of the laver in the Temple of Herod.

The holiness of the priests and Levites was transferred to the whole people after the destruction of the Temple, and prayer took the place of sacrifices. Hence the institution of the washing of hands before prayer. The antiquity of the custom among the Jews is evidenced by its mention in the epistle of pseudo-Aristeas (comp. ed. Moritz Schmidt, p. 67; comp. also Judith xii. 7; Clement of Alexandria, "Stromatà," iv. 22, 144; Sibyllines, iii. 591–593). Orthodox synagogues, therefore, have a laver either in the anteroom or in the court. The form and material of the synagogue laver vary. Usually it is of copper, barrel-like in shape, with a spout near the bottom from which the water is allowed to run over the hands into a receptacle underneath. The strict regulations for washing the hands before meals do not obtain in regard to prayer; it is only required to moisten the hands to the wrists and recite the benediction ("'al neṭilat yadayim . . .") while drying them ("Yad," Tefillin, iv. 2). For the washing of the priests' hands by the Levites before the blessing of the congregation ("dukan"; comp. Soṭah 39a; Num. R. xi. 4) a ewer and basin are used. See Ablution; Levites; Priest.

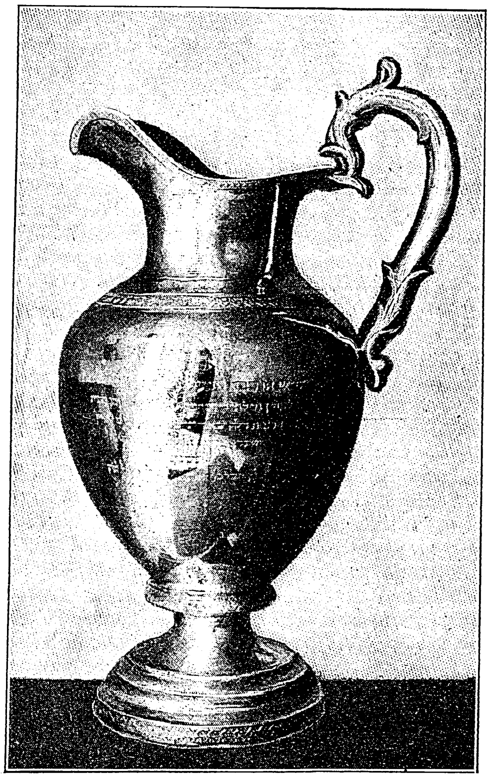
Laver from Tunis.
(In the United States National Museum, Washington, D. C.)

LAW, CIVIL: That system of jurisprudence established by the people of a state or nation for their government as citizens as distinguished from criminal law, which defines crimes and their punishment, and from ecclesiastical law, which regulates matters of church and religion. The distinction implied in this division of the subject did not exist in the old Jewish law, which knew no difference between the obligation to do right to man by respecting his person and property and the obligation to do right to God by offering Him the proper and customary devotion and sacrifice. All these obligations were regulated by a body of legal rules or customs, and were equally sacred because they had the same sanction, namely, the command of God.



Laver.
(In the Shearith Israel Synagogue, New York.)

The law originated in ancient customs, recognized among the nomadic people before any well-defined legal system or code came into existence. The books of Genesis and Judges, where a condition of society is described in which "every man did what seemed right in his own eyes," illustrate this (Judges xvii. 6). The customs of this stage of society will be found to refer principally to the family relations, to the simplest forms of trade, and to the regulation of pasturage. The family was the unit of this society, hence the preponderance of customs relating to it. The relations of husband and wife, parent and child, the regulations concerning family property, slavery, and the rights and duties of kinsmen to each other, are the chief subjects which ancient patriarchal customs regulated.

Ancient Custom.

These ancient family and tribal customs are variously treated by the Torah. Some are preserved, and thus receive the sanction of law; some are abolished; and others are merely modified. Many of these customs are not alluded to in the Torah, but persisted as a part of the unwritten, oral law down to the Talmudic period, when they were committed to writing. The antiquity of the oral law is attested by various authorities. The Mishnah (Ab. i. 1), as explained by Maimonides in the introduction to the "Yad," ascribes the oral law to Moses, from whom it descended through an unbroken line of authorities to the latest times. This theory is substantially the same as that by which the origin of the English common law is explained. The law is supposed to have existed since time immemorial in the breasts of the judges, awaiting the case in which it was to be first applied.

After the period of the supremacy of ancient tribal customs came the Torah, containing codes of law on various subjects. Here is the first law in the modern sense, a series of statutes and ordinances succinctly expressed and written down by the authority of a lawgiver. The Torah legislates for a stage of society higher than that of the nomad. It is intended for a people settled on the soil and devoted largely to agriculture. Herein will be found its limitations. It knows little of commerce or contract in the modern sense; its regulations are comparatively primitive and are expressed in terse sentences and with little comment. The simplicity of the Biblical civil law is best illustrated by the fact that it is all contained in fifteen chapters of the Bible, and in some of these chapters occupies the space of only a few verses. The bulk of the civil law is found in two codes (Ex. xxi.-xxiii. and Deut. xxi.-xxv.) concerning slaves, land, inheritance, pledges, loans and interest, bailments, torts, marriage and divorce, and legal procedure. Exodus xviii. and Deuteronomy xvii. treat of the constitution and jurisdiction of the courts; Leviticus xxv. and Deuteronomy xv. treat of the laws of the jubilee, of the Sabbatical year, and of ransom; Leviticus xix. treats of the poor-laws, and Numbers xxvii. and xxxvi. of the laws of inheritance. This is substantially the entire Biblical civil law, which grew to enormous bulk in the Talmud.

Civil Law in the Pentateuch.

That these laws were intended for an agricultural people is obvious. The sale of land was not favored, because land was substantially the sole means of support of the people, and its easy transfer would have resulted in the impoverishment of sellers and the creation of great landed estates, a condition of things that actually supervened in the times of the kings, and was made the target of prophetic censure. Hence the lawgiver instituted the Sabbatical year and the jubilee, preventing this consequence of free alienation of land. On the other hand, the laws of inheritance prevented the too minute subdivision of the land, by excluding the daughters from a share unless there were no sons. Personal property other than that which is incident to the land, such as cattle, is hardly mentioned, and there are no regulations concerning its transfer except the general injunction to be just in weights and measures (Lev. xix. 35; Deut. xxv. 14, 15). Written contracts were unknown; all transactions were simple, and were easily made a matter of public record by being accompanied by the performance of some formal act in the presence of witnesses. Legal process was likewise simple: the judges spoke in the name of God (Ex. xxii. 7, where the Hebrew has "Elohim" as the original of the A. V. rendering "judges"), and it is not unlikely that the judgment of Solomon fairly represents the simple and direct method pursued by them in seeking to do justice. In doubtful cases the "oath of the Lord" (Ex. xxii. 11) was administered to settle the matter.

As mentioned above, the old notions restricting the transfer of land gave way during the reign of the kings before the power of the king and the nobles. It is quite probable that the changes in the law during that time were numerous and radical, although the chroniclers who handed down the records of the books of Samuel, Kings, and Chronicles say nothing of such changes. One significant illustration of this change is preserved. When Jeremiah bought the field of Hanameel, the simplicity of the earlier days when Abraham bought Machpelah or when Boaz bought the lands of Elimelech had given way to the more modern procedure of preparing a written deed of conveyance (Jer. xxxii. 9-10).

The Babylonian captivity probably influenced the development of the Jewish civil law both in substantive law and in procedure. The long residence of the Jews under Persian dominion left its impress on their jurisprudence, just as in the following centuries the Greeks and Romans successively contributed to its development. On the return from the Captivity, the influences which under the monarchy had resulted in breaking down the old land system were no longer in actual operation, but new conditions promoted the same result. The people were now reduced to a small community, were in need of ready money to pay taxes and tribute to a foreign master, and were on the great commercial highroad between Egypt, Syria, and Persia. Accordingly they began to engage in commerce to a larger extent than before. These influences succeeded in preventing the reestablishment of the old land laws. There was less need of the soil as a source of livelihood and more need of freedom of alienation. Even the effect of the Biblical law of the Sabbatical year was nullified, so far as the collection of debts was concerned, by the ordinance of Hillel (see Prosbul). The jubilee was never reinstituted after the Captivity ('Ar. 32b), and many of the land laws connected with it fell into abeyance ("Yad," Shemiṭṭah, x. 9).

After the Exile.

Contemporaneous with this decline of the laws relating to the soil was the origin of the great body of law relating to personal rights and obligations, the law of contract. The people were now by force of circumstances compelled to play an important part in the affairs of the world at large, and this, together with the growth of their commercial activity, created sweeping changes in the law. Persian, Greek, and Roman supremacy successively influenced not merely the politics, but also the law of Judea. Numerous branches of the law were created during the period from the return from Babylonian captivity to the destruction of the Second Temple. The number of foreign technical legal terms adopted by the Jewish law indicates the important part that foreign systems played in its development.

This great change took place during the period of the formation of the Mishnah, which was codified at the end of the second century of the Christian era, but its laws run back to remote times, many of them to the period before the Captivity. The Mishnah contains the old common law of the Jews together with the additions made thereto during the five hundred years immediately before the Christian era, and the rabbinical amplifications of these laws made during the first two hundred Christian years. The old law, which had developed under agricultural conditions, was characterized by its prohibitive enactments. "Thou shalt not" is its key-note. It was concerned chiefly with guarding the rights of persons. The new law, which was afterward gathered and written down in the Mishnah, was mandatory rather than prohibitive. It was chiefly concerned with the enforcement of rights created by contract, express or implied. Thus, the new law was the necessary complement to the old law of the Torah; and so great was the veneration in which the Torah was held that the rabbinical lawyers, ignoring the fact that the laws of the later period had sprung up independently of the Torah, or perhaps unconscious of this fact, sought to find the origin of all these laws in the words of the Torah. Much of the law which had arisen after the Captivity, or even earlier, was based upon customs which were found to be at variance with the words of the Torah; and when the Rabbis became conscious of this discrepancy they attempted to reconcile with those words the practise which had been made obligatory by reason of long-continued usage. Herein they displayed their greatest ingenuity, for although in theory they did not go beyond tradition, and certainly would not advisedly have overruled the sacred laws of the Torah, yet the necessities of the situation drove them far beyond these self-imposed limits to their activity, and they acted with the practical independence of modern lawmakers, although with theoretical subservience to the domination of the written word.

The Mishnah.

An examination of the contents of the civil law of the Mishnah will illustrate what has been said. The civil law will be found principally in the first, third, and fourth orders of the Mishnah. The first order, Zera'im ("Seeds"), contains many laws relating to the land—the old Biblical law and its amplifications. The third order, Nashim ("Women"), treats of marriage and divorce, marriage settlements, and property rights arising out of the marriage relation. The fourth order, Neziḳin ("Damages"), treats principally of the civil law. It contains the divisions Sanhedrin, Shebu'ot, and Horayot, which treat of the courts, and of administration of oaths and legal procedure generally, as well as of the effect of judicial decisions. The divisions Baba Ḳamma ("First

Gate"), Baba Meẓi'a ("Middle Gate"), and Baba Batra ("Last Gate") contain the bulk of the civil law.

Based on the Torah.

The attempt to trace back this huge body of jurisprudence to the Torah and its few simple laws resulted in the development of a peculiar Talmudical system of reasoning. At times with superficiality, more often with great thoroughness, always with earnestness and zeal, Biblical legal principles were examined, traditions reviewed, opinions and cases dissected, analogies discovered, differences glossed over, in the attempt to preserve the unbroken unity and continuity of the law and to reconcile the irreconcilable. The practical effect of this enormous intellectual output of the Talmudic legal mind was to establish a great system of law theoretically based on the Torah, but containing the inherent power of adapting itself to the changing conditions of life. It rested upon the theory that all possible modifications of the law had been foreseen at the beginning, and that when once uttered by an authority ex cathedra, they took their place naturally in the system, as though they had been there since time immemorial. "Even that which an able student [תלמיד ותיק] may hereafter expound before his master has already been communicated [by God] to Moses on Sinai" (Yer. Meg. iv. 74d; Lev. R. xxii.). The peculiar system of Talmudical hermeneutics contributed largely to this result. The discussion and arguments of the rabbinical authorities are preserved in the Gemara, which together with the Mishnah forms the Talmud. The Gemara was compiled about three hundred years after the Mishnah, and the generations of Rabbis who followed devoted their talents to the interpretation of the Talmud and the application of its principles and decisions to the new cases which arose. The volume of the civil law grew apace. In Europe, Asia, and Africa scholars and judges were adding to its bulk. Steinschneider divides these additions to the law into five classes:

(1) Commentaries on the Talmud.

(2) Tosafot (glosses and additions to the Talmud and its commentaries); Nimuḳim (notes); and Ḥiddushe Halakot (the novellæ of the Spanish, Italian, and modern schools).

(3) Liḳḳuṭim (collectanea); Ḳobeẓim (compilations of laws); Ḳiẓẓurim (compendiums for practical use).

(4) Pesaḳim (decisions of actual cases); Teshubot (responsa, legal opinions rendered in response to some "she'elah" [question] submitted upon a given state of facts); Dinim (rules of law); Taḳḳanot (ordinances referring principally to communal matters).

(5) Independent works on the entire subject of the law, or on different branches of it.

The most important of these for the development of the civil law were the teshubot. As these were opinions on actual cases they were, to a large extent, kept free from theoretical speculation. They were usually extended discussions of the law in general applicable to the case, followed by a decision of the point involved. The tosafot, which are the work of the authorities of the twelfth and thirteenth centuries in France, Germany, and Italy, are also of very great importance, and are usually printed in the common editions of the Talmud with the text.

The Codes.

Two other great codes of the law require notice: Maimonides' "Mishneh Torah" (Second Law), known as the "Yad ha-Ḥazaḳah" (Strong Hand), which belongs to the twelfth century, and Caro's "Shulḥan 'Aruk" (Prepared Table), which belongs to the sixteenth century. The code of Maimonides resembles the modern law code in its orderliness, and the "Shulḥan 'Aruk" is largely modeled upon the same plan. In each of these codes the law was brought up to date, and since the compilation of the latter, various commentaries have been written to include the later literature, especially the responsa. One of the most important of these is the "Pitḥe Teshubah" (Gates of Repentance—a play on the word "Teshubah") of R. Abraham Eisenstadt (1836). This is a collection of decisions from the literature of the teshubot arranged according to the text of the "Shulḥan 'Aruk," and usually printed with the latter.

The civil law is still administered by the Jewish tribunals in different countries; and even in those countries in which, in civil matters, the courts of the land have superseded these tribunals, the Jewish law is still administered by the latter whenever litigants submit to their jurisdiction.

K. D. W. A.

LAW, CODIFICATION OF: A unified and coordinated body of law superseding all previous laws within its scope, or the reenactment of existing law in a systematic and improved form. There are few Jewish codes under the first head, but many under the second. The Jewish term "law" includes much more than is commonly comprehended under that name; therefore the material that is found in Jewish codes is of various kinds, and different portions of it have frequently been treated in various legal works. The originators of the Biblical laws were well aware of the difference between juridical, ceremonial, and moral law, as is proved by the number of synonyms for "law" found in Scripture. For although these synonyms were in the course of time used without distinction, yet there is no doubt that they originally indicated different classes of laws, the original differentiation being lost when the laws were traced back to one divine origin.

Definition.

In the Pentateuch the word "Torah" is used to designate all precepts, regulations, commands, and prohibitions which were considered authoritative because they were of divine, or, at least, of holy origin, whether they were moral maxims, ceremonial usages, or legal decisions. Similarly in subsequent Talmudic times every regulation or teaching of the Bible was called a "miẓwah," since, being decreed (= "ẓiwwah") by God, it was regarded as obligatory. Hence Jewish codes include not only jurisprudence, but also theology, ethics, and ritual; but there are only a few codes which include the whole Law, the field covered being so vast.

According to tradition all the regulations found in the Pentateuch were given by Moses to Israel at the command of God, hence the Torah includes only one code; but modern Bible criticism, whose results are still open to revision, finds in the Pentateuch at

The First Code.

least four different codes, ascribable to different epochs and authors. It must be noted, however, that the question concerning the time in which the Law was committed to writing is independent of the question as to the date of its origin. Israel was a "People of the Word" long before it was a "People of the Book," and the laws of the Hebrews, like those of most other nations, were written down only after they had been in force for a long time.

From a certain point of view the DECALOGUE in its various forms may be regarded as a code, but is really only the rough outline of the principles underlying the earlier legislation. Ex. xxi.-xxiii. 19 contains a code which was collected and arranged as a manual for the judge, furnishing rules to guide him in his decisions. In the wording of the superscription—"Now these are the judgments which thou shalt set before them" (Ex. xxi. 1)—this section is clearly designated as a code, and its literary form also, aside from some later interpolations, is that of a code.

The laws treated in this "Book of the Covenant," as the section is now commonly called, are manifold in nature. They may, nevertheless, be divided into two chief groups: (1) enactments relating to civil and criminal law (xxi. 2-xxii. 16), and (2) moral, religious, and ceremonial enactments (xxii. 17-xxiii. 19). Although the people for whom these laws were made were no longer nomads, their institutions were still very primitive. The criminal and civil administration of justice corresponded on the whole to that still obtaining among the Arabs of the desert. The religious and moral point of view, however, expressed in this code was new and specifically Jewish. It is the duty of every person to protect the poor and strangers; relief of the needy, as well as love of truth, is enjoined on the ground that God is the "merciful one" (xxii. 26). This advanced religious and moral point of view, which is not in keeping with the primitive character of the jurisprudence displayed in the code, leads to the assumption that the laws originated a long time prior to the date at which the code was committed to writing. In antiquity as in modern times, the administration of justice did not always keep pace with ethics. The Book of the Covenant as well as the Decalogue is older than those sources of the Pentateuch that are designated as JE; hence these codes may be classed in one group and designated "the primitive codes"; that is, the codes which had been committed to writing earlier than the eighth century B.C.

The legal part of Deuteronomy must be considered as a different kind of code, including more than three-fourths of the primitive codes and much other matter, especially religious and moral, not found in the earlier ones. It is characteristic of the "Deuteronomic Code" that it is intended for the whole nation, and not for special classes—priests or judges. Hence many technical points are omitted, as, frequently, the exact nature of the punishment for an offense, which neither would interest the people nor would its repetition be needed by the judge, since at the time of the Deuteronomist he would be entirely familiar with the code especially intended for him. In other respects, however, the Deuteronomist is, naturally, very explicit, for he lived in a time when the organization of society was much more complex than it had been in previous centuries, and when new conditions were constantly arising which required special legislation.

Characteristics of the Deuteronomic Code.

The centuries between the time when the primitive codes were committed to writing and the time of the Deuteronomist were the period of activity of the greater prophets, whose influence on legislation is apparent. Hence many laws in Deuteronomy derived from the old codes show material revision. Thus the father's authority over his minor daughter is largely curtailed. Deut. xv. 12, in contradiction to Ex. xxi. 7, orders that a daughter sold into slavery by her father shall be free in the seventh year, and that during her time of service she can not be forced by her master to become his wife. But though the Deuteronomic code, in comparison with the primitive codes, represents on the whole a great advance in religious and moral matters, its laws being distinguished by their humanitarian spirit, still there are many provisions that make the later code appear at first glance much more severe than its predecessors. Formerly it had been decreed that he who sacrifices to strange gods shall be excommunicated (Ex. xxii. 19): in Deuteronomy such an offense is punished by death (xvii. 5), equally severe punishment being meted out to one who leads astray into apostasy or magic. But it is easy to understand this rigor of the new code in view of the fact that, shortly before it was compiled, the ruling party in Judea, supported by the authority of the godless king Manasseh, attempted to destroy utterly the followers of God. The opposing party under Josiah could not count on victory unless it proceeded with utmost rigor against idolaters, for by such means only could it hope to counteract the influence of those who had betrayed their faith. Expressed antagonism to heathendom is one of the most prominent characteristics of this code; the centralization of worship in one place—Jerusalem—as well as many other provisions, is explicable only from such an attitude. In consequence of the close connection between the ceremonial and the legal aspects of Jewish law, the religious point of view of this code influenced the social legislation also. The institution of cities of refuge in Deuteronomy (iv. 41-43) is closely connected with the abolition of the local sanctuaries which formerly afforded protection (Ex. xxi. 13).

Deuteronomic and Primitive Codes.

The Deuteronomic code, notwithstanding its many peculiarities, can not properly be designated as a new code; it represents rather a revised and improved edition of the Book of the Covenant, made in conformity with the new ideas of the time. Deuteronomy contains very few ceremonial and ritual laws not found in early sources, and it may also be unhesitatingly assumed that even those few laws which are found there for the first time were not new at this period, but had existed long before, and, perhaps, had been previously committed to writing. Nevertheless it would be difficult to overestimate the importance of this code; it is not only a great reformative legal work, but it is also, in a certain sense, the first authoritative code (see Deuteronomy). For, probably, the laws of the primitive codes were generally accepted only after a long period of limited usage, being for many years restricted to particular classes; for example, to the priests. It was different with the Deuteronomic code according to the modern critical view. Under the leadership of King Josiah (II Kings xxiii. 3) the whole people agreed to regard the laws laid down in this code as authoritative. It is the first book of laws for the people, its predecessors being intended chiefly for judges and priests; and it retained this position as the people's code, although it underwent some changes in the course of time.

Holiness Code.

Quite a different fate befell a code which was issued by Ezekiel about a century later (Ezek. xl.-xlviii.); although its originator was an influential prophet, it never became national. It is concerned chiefly with the Temple. The theoretic treatment in Ezekiel's work is a new and characteristic feature. Although the laws he formulated could not become effective, as the Temple was in ruins at that time, he nevertheless described in detail the laws of his future ideal state, in which the Temple was to be once more the center of the national life. Ezekiel was not the only man at that time who lived in the future, for that part of Leviticus which is designated as the "Holiness Code," or the "Law of Holiness" (Lev. xvii.-xxvi.), originated in this period. In these laws much stress is laid on the holiness of God. Compared with the Book of the Covenant, this code deals much more with moral and ceremonial regulations than with civil and criminal matters. The religious as well as ethical point of view is a very advanced one, and it is especially characteristic of the Holiness Code that it endeavors to apply the moral principles of the Decalogue to practical legislation. The ethical injunction "Love thy neighbor as thyself" (Lev. xix. 18) is quoted in connection with laws intended to protect the rights of the poor. It must be especially emphasized in regard to this code that it contains many very ancient laws. P, the largest code of the Pentateuch, contains even a greater number. This code includes the first part of Leviticus (i.-xvii.), most of the legal sections of Numbers, some portions of Exodus, and the section on circumcision in Genesis. It is called "P," in full "Priestly Code," because the ceremonial laws relating to sacrifices and purity constitute the larger part of it. In P, however, a distinction must be made between (1) the priestly teaching; that is, all the laws introduced by the formula "This is the Torah of . . ."; (2) the original draft of P; and (3) its later supplements. The novelty and great importance of this collection of laws do not, as the name might lead one to believe, consist in the many regulations pertaining to sacrifices, most of which were known for centuries to the priests, but in the fact that this code was an attempt to realize the idea of Israel as a "people of priests," each member of which should live like a priest. This ideal, which filled the minds of its originators, was not shared by the whole people until the time of Ezra and Nehemiah. About 400 B.C. the exiles returning from Babylon to Palestine agreed to observe "the law of Moses"—the laws of P (Neh. x. 29). It is doubted by the critics whether at this time the various parts of the Pentateuch were already combined into a book; but the definitive codification of Biblical law in any case did not take place later than 350 B.C. In consequence of the canonization of the Pentateuch, which probably took place shortly after this date, the Law was for a period of time regarded as finished.

The Priestly Code.

Period of the Soferim.

The period between the canonization of the Pentateuch and the time of the Maccabees is known in rabbinical tradition as the time of the Soferim. The authority of the Pentateuch had been established, and the chief task remaining was to explain the Scriptures and to apply correctly to existing conditions the principles laid down therein. No works dealing with the Law were produced during this time, which, indeed, was singularly deficient in literary effort. It is characteristic of the period that even the later rabbinical tradition, ascribing to Biblical times some laws and decisions of the sages, which really originated much later (see Oral Law), never refers to works of the time of the Soferim. But there may have been, for instance, a collection of important laws dealing with the Temple and its ritual, and the Mishnah contains probably some halakot that were originally included in such collections. But it is probable that these old collections of halakot were never written down.

A Sadducean Code.

The earliest code mentioned in post-Biblical times is the Sadducean "criminal code," which was in force down to the time of Queen Alexandra (Megillat Ta'an. iv.; the explanations given in the scholia are probably wrong in regard to certain particulars, as Wellhausen, "Pharisäer und Sadducäer," p. 63, has pointed out; yet the fact that the Pharisees celebrated the day on which the "Book of Decisions" was abolished proves that it was an anti-pharisaic work). The Megillat Ta'anit itself may in a certain sense be regarded as one of the earliest rabbinical codes; for the enumeration of the minor holidays on which fasting was forbidden was undertaken more in reference to the Halakah than to history, as the actual deeds commemorated by these days are in general omitted. At about the time of the compiling of the Megillat Ta'anit, the beginning of the Christian era, several divisions of the Halakah were probably codified, even if only a portion are found in writing. For, although the pharisaic classes, for various reasons, were endeavoring at that period (see Oral Law) to prevent written codes from reaching the public, many scholars had their "megillot setarim" (secret books) in codified form, in which they entered important passages of the Halakah. Some circles of priests possessed similar rolls, which contained matter of especial importance to them. The Mishnah, directly or indirectly, made use of such collections (see Simon of Mizpah); for there is no longer any doubt that it contains halakot which were formulated during the days of the Temple, although it can not be demonstrated that they were written down in definitive form.

The Mishnah of Akiba.

The contrast between Mishnah and Baraita—that is, between officially recognized subjects taught in academies and matter that was not taught there—existed as early as the time of Johanan b. Zakkai (see Baraita). The pupils of this authority, as well as some of his younger contemporaries whose activity falls in the period 70–100, undertook to arrange the immense mass of material that had accumulated as a result of the activity of the schools of Shammai and Hillel. The treatises Yoma, Tamid, and Middot probably date from this time—shortly after the destruction of the Temple. Akiba b. Joseph's work, however, is the first that can be definitely identified; his genius for systematization led him to begin arranging the different branches of the Jewish learning of that time, and his work, according to a trustworthy tradition, served as guide for the Mishnah, the fundamental outlines of which may be regarded as Akiba's work. In addition to Akiba, other tannaim were busy at the same time with similar works, which may also have served in many respects as models for the editor of the Mishnah. But the first code dealing with the entire material of the Halakah was compiled only at the end of the second century; namely, the Mishnah of Judah ha-Nasi, called briefly "the Mishnah."

Judah ha-Nasi's work may rightly be considered as the most important production in the field of rabbinical code literature, although it does not correspond either in content or in form with the current view of a code. The Mishnah, it must be stated by way of explanation, successfully terminated the revolution of Jewish intellectual life, which, lasting for about two centuries, threatened to destroy the vital principle of rabbinical Judaism. Until the time of Shammai and Hillel, tradition, operating unnoticed and peaceably, had determined the regulation of the religio-legal life in all its departments. With them it became the subject of authoritative discussions in the public academies. Practical questions were replaced by academic discussions, leading to inquiries into fundamental principles and to differences of opinion which introduced insecurity into the entire religio-legal life. This uncertainty was further increased by the political catastrophes which occurred soon after and extended over a long period; and it accounts for the contradictory views and sentences of the tannaim of the second generation. The first attempts to put an end to this confusion were made toward the end of the first century of the common era at the synod or synods of Jabneh, probably under the influence of Rabban Gamaliel II. (see 'Eduyot). While the decisions of the school of Hillel were adopted as a theoretical standard, authority was often conceded in practical matters to the opposing school of Shammai, provided that the choice made between the two schools was consistently maintained in the whole conduct of life. Other differences were decided by a majority vote. Soon, however, it seemed as if the efforts made at Jabneh had been in vain. No fixed and determined principles were recognized which might serve as an authoritative canon in ultimately determining halakot as yet undefined. Another danger to the Halakah arose from the fact that most of the prominent tannaim of the third generation conducted schools in which the existing Halakah material was taught according to different orders. Akiba, as has been stated, was the first to adopt a certain standpoint for a systematic and topical arrangement and redaction of the material. But Akiba with his hermeneutics, which gave full play to the theorists, increased the uncertainty of the Halakah to such an extent that his pupil Meïr felt compelled to add to his teacher's Mishnah the new Halakah, which, in the main, was based on Akiba's hermeneutics.

Rabbi Judah's Mishnah.

So long as the Halakah material, with the exception of the relatively few ancient decisions, was in a constant state of flux, especially in the school of Akiba, no true codification could be made. Although the redactions of the Mishnah by Akiba and Meïr were of great value to the schools, for which they, in a sense, were text-books, religio-legal practise profited little by them. Of an entirely different nature was the Mishnah of Rabbi Judah, who set himself the task of adapting the halakot to practical life. He made an independent revision not only of the very late, but also of the earliest, halakot; hence, of all the halakot in existence before the redaction of the Mishnah collection. The results of this revision, which was undertaken by Rabbi with the aid of his colleagues and pupils, were not alike in all cases. Many of the halakot are quoted as "the law" without any explanation of the fact that they are merely the opinion of one authority. Such halakot (designated in the terminology of the Talmud as סתם משנה) either belong to the old laws fixed in the generations before Rabbi or are decisions made in doubtful cases by the editor of the Mishnah and his colleagues. But as in many instances it was absolutely necessary, for the historic appreciation of the Halakah, to know whether a certain decision is one generally recognized or not, disputed halakot are indicated as such in a large part of the Mishnah. In most of these cases, however, the value of the codification is not thereby impaired, because the opinion held by the editor to be the correct one is given as the halakah, while the divergent opinion is quoted in the name of a single authority. In the arrangement of his Mishnah also, Rabbi had the historical development in view. The old Halakah was essentially exegetical in nature, and, therefore, always followed the arrangement of the Scriptures (comp., *e.g.*, Neg. xii. 5–7), although to the various halakot bearing on the Scriptures it added a number of important "decisions of the court," which were considered valid as being the utterances of recognized authorities.

Economy of the Mishnah.

The development of the Halakah in the period following Hillel, during which the gulf between the Scriptures and the Halakah was widening and a mass of new material was added, necessitated the arrangement of the Halakah on a systematic basis. Akiba, the first to attempt to carry out this new arrangement, was probably also the originator of the present division of the Mishnah, according to which the entire work is divided into six principal parts ("sedarim"), which are subdivided into treatises ("massektot"); these again into chapters ("peraḳim"), and the chapters into sections ("mishnayyot"). The many shortcomings in this arrangement of the Mishnah must not be ascribed wholly to the author. One must bear in mind both the connection of the Mishnah with Scripture and the fact that it was intended as a code for the practical teacher of the law, as well as a text-book for the student. The first Mishnah, for instance, determines the time of reading the "Shema'" without previously stating that the recital of the latter is a religious duty. Although this may seem unsystematic, it must be remembered that the Mishnah simply undertakes to interpret and define the precepts of Scripture without giving their substance. The Biblical laws had to be studied directly from Scripture, the word of God. The same remark applies to the old traditional laws and customs, which in a certain sense belong to Scripture, and which are quoted in the Mishnah only when certain details are questioned. As the Mishnah, furthermore, was intended as a text-book, purely pedagogical points had to be considered, which otherwise do not pertain to a code. There are two reasons, however, why the Mishnah of Judah ha-Nasi occupies the first place in code literature. Its intrinsic merits together with the authority of its redactor secured its universal acceptance and recognition, so that it eclipsed the numerous other Mishnah collections, which gradually disappeared. Again, this prominence of Judah ha-Nasi's Mishnah effected the great revolution in the field of the Halakah which manifested itself in the radical difference between the Halakah of the Tannaim and of the Amoraim. While the former regarded the text of the Bible as the basis for discussion, the latter took the Mishnah for their text, Biblical verses, which they frequently quoted, being introduced merely as weapons in intellectual jousts. So long as the Halakah was in a state of chaos, so long as it taxed the memory to the utmost, there could be no question of original, spontaneous work, the first condition for which was that the material should be part and parcel of the student's mind. The mere memorizing of the various halakot took so long that no time remained for a thorough study of them apart from their relation to the Bible. Hence, for the tannaitic Halakah, the hermeneutic interpretation of Scripture was the chief study. The Mishnah, whether written or oral, checked this tendency, this state of ebb and flow, by furnishing an integral whole, as it were, that not only could be memorized, but could be studied also. With the appearance of the Amoraim, therefore, arose the desire to discover the inner connection of the several halakot, in order to give logical formulation to the principles implied in the concrete halakot of the Mishnah. And although the Gemara, *i.e.*, the amoraic discussions of the Talmud, is exactly the opposite of what a code should be, yet it is most important for the subsequent codification of the rabbinical law, which must be regarded as a direct continuation not of the Mishnah, but of the Gemara, in which latter the Halakah was first reduced to norms.

The Talmud.

The Amoraim furnished furthermore an important contribution to codification in the rules which they formulated for the decision of those cases which are recorded in the Mishnah or in other tannaitic sources as moot points between two authorities. The Palestinian amoraim especially undertook to fix rules according to which disputed halakot were dealt with. For instance, so early an authority as R. Johanan refers to the rule: "If R. Meïr and R. Jose dispute about a halakah, it is the opinion of the latter that is authoritative" (Yer. Pes. iv. 30d). These rules, which are very important for codification, were first collected in the "Halakot Gedolot" under the title "Halakot Ḳeẓubot" (ed. Hildesheimer, p. 469; ed. Traub, p. 239; comp. Conflict of Opinion). The further development of the Halakah was now connected with the rules and opinions of the Gemara. The redaction of the Mishnah put an end to the tannaitic hermeneutics, which deduced new laws from Scripture; and the completion of the Talmud signifies nothing less than the final fixation of the entire Jewish law.

The Saboraim.

For post-Talmudic rabbinism the Talmud, *i.e.*, the amoraic development of the old halakot, is the sole authority in religio-legal questions—an authority that existed in its essentials as early as the time of the gaonate. As the Talmud is in its arrangement the exact opposite of a code, the necessity for a code was felt as soon as the Talmud had been finished. In the period immediately following its completion, attempts were made to formulate certain rules for guidance in the many cases of difference of opinion dating from the time of the Amoraim. Even in early times certain rules had been formulated referring to differences among the first amoraim; in ritual questions, for instance, the opinion of Abba Arika was decisive if opposed to that of his colleague Samuel, while in legal questions the latter's sentences were considered authoritative. Most of these rules, however, were first formulated by the Saboraim (comp. Conflict of Opinion), and were by them introduced into the Talmud. Since, during the period of the Amoraim, the later Halakah—that is, the Halakah of the Amoraim—was still in a state of flux, the influence of the Saboraim on codification must not be undervalued, as they made possible the task of codifying the Talmud.

It was probably not accidental that the first attempts at codification were made in the time of the Geonim, shortly after the rise of Karaism. The many and frequent controversies between the Rabbinites and the Karaites soon convinced the former of the necessity of codifying the rabbinic law. It may have happened more than once that a follower of rabbinism denounced as being Karaitic an opinion which his opponents thereupon proved to be deduced from the Talmud; and it was of great importance for the Rabbinites to know which passages of the Talmud were law and which were merely individual opinion. Yehudai Gaon, the contemporary of Anan, who was the author of a Karatic code, is the first of whom it is known that he summed up the final results of the discussions in the Talmud, in his "Halakot Pesuḳot" or "Halakot Ḳeṭu'ot." His work was so popular even a century later that many neglected the study of the Talmud, and devoted their whole attention to these "decisions" (Palṭoi Gaon, in the responsa collection "Ḥemdah Genuzah," No. 110). Beyond this little is known concerning their character, as only single citations from them have been preserved. This Yehudai Gaon is considered by many as the author also of the "Halakot Gedolot," the largest and most important work of codification in the time of the Geonim. This work, however, is probably by Simeon Ḳayyara, who flourished toward the middle of the ninth century. The sequence of the "Halakot" is patterned on the whole after the Mishnah, though the section (seder) on the laws of cleanliness (Ṭohorot) is missing, with the exception of Niddah, because only those halakot are considered which are still practically applied. For this reason, the "Halakot" includes among the laws which are found in the first section of the Mishnah—the so-called agricultural laws ("zera'im")—only those the enforcement of which was possible after the destruction of the Temple and in the Diaspora. In the matter of systematic arrangement it is an advantage over the Mishnah that the treatises of the "Halakot" which deal with different subjects are split up into several sections, new treatises thus being formed. In this way the "Halakot" has as appendix to the treatise Shabbat two chapters, relating to the laws respectively of circumcision and of Ḥanukkah, which in the Talmud are arbitrarily placed among the regulations relating to the Sabbath.

The "Halakot Gedolot" indicates an attempt to arrange the entire halakic material of the Talmud according to subjects; but the author did not quite dare to break with the ancient, venerable arrangement. The last seven sections in the second division ("Seder Mo'ed") of the work are most instructive for the systematizing of the Halakah. The prescription relating to mourning follows the section on the "Middle Days" (Ḥol ha-Mo'ed") because nearly the same labors are forbidden during the period of mourning as on "Ḥol ha-Mo'ed." The laws prohibiting the contamination of priests by contact with a corpse follow immediately upon the prescriptions relating to mourning, which likewise deal with the dead; then follows a second section dealing with the priests, namely the priestly blessing, which is important in the liturgy of the synagogue. Having thus reached the liturgy, the author next takes up the reading from the Torah as most closely related to the priestly blessing. Then follow the sections relating to tefillin and mezuzah, as nearly the same prescriptions relate to them as to the making of a holy scroll, from which passages are read in the synagogue. Finally comes the section on ẓiẓit, which are closely connected with the tefillin. Although this arrangement may appear artificial, it was nevertheless a praiseworthy first attempt to arrange topically the immense material of Jewish law.

Saadia and Hai.

Although Saadia, the greatest among the Geonim, also tried his hand at codification, his "Book on Legacies" (the Arabic original and the Hebrew translation in "Œuvres Complètes de R. Saadia," ix.) marks no great advance in this field; but in Hai's works the declining gaonate furnished a very important contribution to the systematizing of the Jewish law. Hai's compendium on the oath ("Mishpeṭe Shebu'ot"), and his work on the laws of commerce, pledges, and deposits ("Sefer Miḳḳaḥ u-Mimkar"), are the products of a clear, systematic mind. With a keen eye he surveys the whole field of his subject, carefully groups the related topics, and briefly and succinctly unfolds the various parts. He avoids both dry enumeration and prolix discussion. Beginning with the source, the Talmud, he briefly deducts the conclusions before the eyes of the reader. The whole mode of presentation in this work shows that the author was not unacquainted with Arabic scientific literature. Thus his book on commercial law, which is divided into fifty "gates," or chapters, begins with a definition of the concept "buy"; and the second section then defines in detail what may be bought or sold. Then gate follows gate in strictly systematic order, offering a clear and exhaustive presentation of the ramifications of commercial law.

Among the products of the codifiers of the geonic period should be reckoned the seven small treatises, in the style of the Mishnah, in which are gathered together the halakot dealing with (1) proselytes; (2) Samaritans; (3) slaves; (4) the sacred scroll; (5) tefillin; (6) ẓiẓit; and (7) mezuzah. The only probable sources for these treatises are the Talmud and the halakic midrashim. The small amount of new material which they contain is not to be traced to old, lost sources, but is the work of the compiler or compilers, whose authority prominent rabbis did not rate very highly. Toward the end of the period of the Geonim, it is probable that codifications, now entirely lost, were made of different branches of the ritual as well as of the juridical law. Thus, under the title "Basar 'al Gabbe ha-Geḥalim" is mentioned a compendium which contained ritual regulations on different subjects, and was known to as early a writer as Rashi's teacher ("Teshubot Ḥakme Ẓarfat," ed. Vienna, No. 82).

Codifiers of the African School.

With the rise of Talmudic study in northern Africa at the beginning of the second millennium a new period began for the codification of the Halakah. Although the first great African Talmudist, Rabbenu Hananeel, devoted himself chiefly to the exposition of the Talmud, the passages quoted from his "Sefer ha-Miḳẓo'ot," which was a kind of halakic compendium, indicate that he was interested also in codification. Ḥefeẓ b. Yaẓliaḥ, also, who flourished probably toward the end of the first millennium, was presumably a native of Africa, and therefore the first codifier in that region; for, to judge from what is known concerning his "Sefer ha-Miẓwot," which was written in Arabic, that work was a code containing the moral, religious, and legal commands of the Bible and of the Talmud. The most important product of the African school in this field is Isaac Alfasi's "Halakot," which has added the results of that school to the Talmudic and geonic halakah material. Alfasi modeled his work on the "Halakot Gedolot." Like it his "Halakot" closely follows the Talmud, discussing all that strictly belongs to the genetic presentation and definition of the norm, and omitting everything else. By including an opinion in his work Alfasi stamps it as a norm; and by simply ignoring another opinion he entirely rejects it. The "Alfasi," as his work is generally called, does not mark any important advance in the systematic presentation of the Halakah; for with few exceptions Alfasi has retained the treatises, chapters, and even the sequence of the mishnayot as found in the Talmud, and he likewise adds the discussions in so far as they are necessary for determining the norm.

Alfasi's great influence, however, lies in the circumstance that he was a very important factor in arriving at rules for determining the Halakah: for in the Talmud the discussions on doubtful points lead in many cases to no conclusion; and, as mentioned above, the rules formulated by the Saboraim for such doubtful cases applied only to a certain number of them. Alfasi, therefore, in establishing rules followed his own decisions, and frequently even attacked the opinions of the Geonim, either in determining the Talmudic halakah or in developing and correctly applying the principles found in the Talmud. He was perhaps also the first to draw upon the Yerushalmi for religio-legal practise. The Babylonian geonim, even those that were acquainted with the Yerushalmi and drew upon it for theoretical purposes, did not acknowledge its influence on practical life; but Alfasi, although he gave precedence to the Babylonian Talmud, followed the Yerushalmi in those cases in which the Babli reaches no conclusions or gives no decisions.

The Earlier Spanish School.

Alfasi's contemporary, the Spaniard Isaac b. Judah ibn Ghayyat, compiled a kind of compendium for ritual purposes, especially for feast- and fast-days. Only a part of this has been published, and that quite recently ("Sha'are Simhah," Fürth, 1862; "Hilkot Pesaḥim," Berlin, 1864). It reveals Ghayyat as a man of little independence, who merely tries to give an intelligible arrangement to the religio-legal decisions of the Talmud and of the Geonim. As he cites the decisions of the Geonim not in extracts, but entire, his presentation is prolix and difficult to survey; nor is it in other respects a model of lucidity. A third Isaac, Isaac b. Reuben Albargeloni, the youngest among the three, following Hai's example, attempted to compile a compendium of all the regulations referring to the oath. Although his "Sha'are Shebu'ot" is the product of an acute intellect and of a master in the field of Talmudic jurisprudence, it is in no respect of importance for codification.

The old Spanish school, *i.e.*, that of the time before Maimonides, produced only one man who undertook to codify the entire Halakah, namely, Judah b. Barzillai. He is said to have been Isaac b. Reuben's pupil; and he certainly flourished in Spain in the first half of the twelfth century. Barzillai attempted, as no one before him and perhaps no one after him, not only to codify the general Talmudic-geonic legal principles, but also to give many detailed laws, which either are found in this literature as illustrations of those principles, or may be deduced from them. As a result, his codex was very comprehensive, and consequently too bulky for practical purposes, so that only parts of it have been preserved and recently published. But, even if he had been a great codifier, his work would probably have shared the same fate as the many similar works which were thrown into the background by Maimonides' masterpiece. A really scientific codex, free from the dialectic form of the Talmud, covering the entire field of the Halakah, and presenting it in systematic form, could be compiled only by a man who was familiar with the intellectual activity of the Greeks as well as with the products of the Jewish intellect. Difficult as it is to codify any body of laws, a Jewish codifier has to contend with special difficulties. In consequence of the close connection of religious and juridical elements in the Jewish law, especially in its rabbinical development, topics which superficially viewed have no external connection whatever are in a Jewish code treated under one heading.

Maimonides' Code.

As regards its plan, arrangement, and language, Maimonides' "Mishneh Torah" is entirely original. He called his work the "Second Torah" because thenceforth no other book would be needed in determining the law. In contrast to its predecessors of the post-Talmudic time Maimonides' code covers the entire field of the Halakah, including the halakot no longer applicable after the destruction of the Temple. The "Mishneh Torah" covers even a larger field than the Mishnah itself, which, though it gives also the halakot fallen into disuse after the destruction of the Temple, does not include the fundamental doctrines of the Jewish religion, and offers very little that pertains to the liturgy. Furthermore, in the arrangement of the immense amount of material, Maimonides chose his own methods; for, though he recognized a logical sequence in the Mishnah (see his Introduction to the Mishnah), he could not be guided by it because it did not conform to his plan. The Mishnah is chiefly a text-book; Maimonides' code is a law-book; and what was of chief interest to Maimonides, differentiation between matters of practise and matters of theory, was of secondary importance for the editor of the Mishnah. The treatises Pesaḥim and Yoma deal with all the halakot that have any connection with these two holy days; the halakot on the offering of the paschal lamb follow the regulations on maẓẓah; similarly in Yoma the offices of the high priest in the Temple on the Day of Atonement are given together with the regulations on fasting on that day. Maimonides, who strictly separated practical from theoretical matter, deals with the regulations referring to maẓẓah in connection with the feast-days, while the paschal lamb is discussed among the sacrifices. The work is divided into fourteen books, the first two, on knowledge and God's love respectively, serving as introduction to the rest of the work in that they deal with the ethical and religious foundations of Judaism. The other twelve books discuss in groups of four: (1) the ceremonial law; (2) prescriptions no longer in force; and (3) rabbinical jurisprudence. For certain portions of his code Maimonides also wrote introductions in which the terminology is defined or general definitions are given. Despite various shortcomings and imperfections, scarcely avoidable, the "Mishneh Torah" (which is known also as the "Yad ha-Ḥazaḳah") is a masterpiece in construction, and not only the most brilliant work of codification, but also the greatest product of rabbinical literature.

Mention must be made of another work of Maimonides' which is of great value for the history of codification, but not comparable either in content or in form with the "Mishneh Torah." This is his "Sefer ha-Miẓwot" or "Book of Commandments," which was written as a preliminary to his greater code. In it he gives the 613 Biblical commands and prohibitions (see Azharot; Commandments, The 613). The work is not an unsystematic enumeration, but a topical grouping of the laws, and in a certain sense it is the only existing codification of the Biblical laws. Although primitive in plan and arrangement, many later held it to be a model for codices. The "Mishneh Torah" shows the immense strides which Maimonides had made in the interval between the two works.

The Provençal Codifiers.

The cultural life of the Jews in France, if not their actual sojourn there, began at a later date than that of the Jews in Spain; and they entered upon their literary activity when the Spanish Jews had already produced great works in several fields. The first French codifier was Abraham b. Isaac of Narbonne, whose codex, "Ha-Eshkol," compiled toward the end of the twelfth century, is for the greater part extant in print. His chief authority was Alfasi, whom he closely followed, hardly daring to express his own opinion. His division of the halakic material, which, unlike Alfasi, he does not group according to the Talmud, but by topics, shows little talent for systematization. For his arrangement of the "Eshkol," the works of Isaac b. Ghayyat and Judah b. Barzillai served as models. In this the first of French codifications the noteworthy feature is the great stress laid upon the purely ritual aspects of the law, a tendency recurring later and testifying to the overscrupulous piety of the Franco-German Jews.

Among Abraham b. Isaac's pupils was his son-in-law Abraham b. David, who through his merciless criticism of Maimonides' codex exercised an important influence on the shaping of Jewish law. In spite of his pronounced opposition to Maimonides' method of codification, Abraham b. David himself contributed a small work to this species of literature, namely "Ba'ale ha-Nefesh," in which he collected in a masterly manner all the laws of clean and unclean referring to women. But in contrast to his great adversary, he quotes his sources briefly and gives deductions from such laws as are not directly found in the Talmud. The most important Provençal codifier, however, was Isaac b. Abba Mari, another pupil of Abraham b. Isaac; also called "Ba'al ha-'Iṭṭur" after his codex "'Iṭṭur." This codex contains the whole body of rabbinical jurisprudence—with the exception of criminal law—and the dietary laws together with a few other ritual laws. The sequence of the material is very peculiar. For instance, the author adopts as guide for his arrangement of the law of records and documents the words תשקף בנוע חכמה, placing under each letter the articles beginning with that letter. Other portions of the book, however, especially the sections of the "'Iṭṭur" devoted to the ritual, show a very logical and systematic arrangement of the subject under discussion.

The School of Tosafists.

From the time of the Geonim down to Maimonides two different tendencies may be distinguished in the field of codex literature: the one abstracts the norm or rule from the discussion, often giving it without declaring its source or adducing any proofs. This tendency has its culmination in Maimonides' "Mishneh Torah." The other makes a point of first going back to the sources from which the rules are deduced, and then of supporting the deductions by proofs and authorities. This tendency culminates in Isaac b. Abba Mari's "'Iṭṭur." The former tendency predominated in Spain; the latter had more adherents in Provence, and was especially increased by the activity of the Tosafists. Not only did the dialectics of this school give rise to new rules derived from the Talmud, but its methods of study were such as to foster little interest in a dry reduction of the Halakah to norms. Moreover, the Tosafists, untrained in all disciplines except the Talmud, were little fitted to systematize complicated subjects. In northern France, the home of the Tosafists, it is true, the need of a guide for practical purposes was often felt. The Tosafists, however, did not consider the study of the Talmud merely a means to the end of regulating religious life; for them it was an end in itself; and the explanation and exposition of the Talmud were of primary importance, while the reduction of the Halakah to norms was merely secondary. Although Rabbenu Gershom b. Judah, the founder of Talmudic studies in France and Germany in the beginning of the eleventh century, is known to have written a compendium on an important subject of criminal law, and his pupil Judah ha-Kohen wrote a codex on jurisprudence, yet the true spirit of this school appears in Rashi and the Tosafists, who devoted themselves to the explanation of the Talmud. From the school of Rashi only the work of his pupil Simḥah of Speyer calls for mention, in whose Maḥzor important parts of the ritual law are codified (compare Maḥzor).

The first important codifier of this school is Eliezer b. Nathan, who gives in his "Eben ha-'Ezer" a large part of rabbinical jurisprudence as well as of the ritual. The plan and arrangement of this work are determined on the whole by the order of the Talmudic treatises; and in many sections the presentation is rather that of a commentary on the Talmud than of a code. Although an important authority, Eliezer was very careful in his decisions; and he hardly dared to attack a custom, even if it had little support. His methods were adopted by his grandson Eliezer b. Joel ha-Levi, whose code likewise closely follows the Talmud, discusses the points presented, and from them deduces the rule. More original as a codifier, though not as an investigator, is Eliezer b. Joel's contemporary, Baruch b. Isaac, who in his "Sefer ha-Terumah" treats of a certain number of the dietary and marital laws, the Sabbath laws, and some other ritual laws. He proceeds as follows: He assumes a general acquaintance with the source, *i.e.*, the Talmud, but he prefixes to the norm a synopsis of the discussion bearing upon it, and when the discussions are lengthy, he adds the views of the commentators and the gist of post-Talmudic controversies about them. The rules following from this discussion are then given again in numbered sentences. In order to facilitate a survey of the book all the subjects treated are given in the beginning in brief codified form. The importance of the "Sefer ha-Terumah" lies in the circumstance that in most cases it gives the conclusions of the Tosafists, especially those of northern France. Baruch b. Isaac's namesake and contemporary, Baruch b. Samuel, a German tosafist, was likewise the author of a legal code, the nature of which, however, can only be conjectured. The third codifier of the school of Tosafists of this time was Eleazar b. Judah, author of the "Roḳeaḥ," and better known as a mystic. His work, in 477 sections, deals with the Sabbath and feast-day laws, especial attention being paid to the synagogal ritual, and with the dietary laws. The first twenty-nine sections of the "Roḳeaḥ" really constitute a small book by themselves, a mystical work on morals.

Union of the Spanish and Franco-German Schools.

Moses b. Jacob of Coucy, a pupil of Baruch b. Isaac, about the middle of the thirteenth century wrote a work which in form and content is a fusion of the methods of the Spanish and the Franco-German schools. The "Sefer Miẓwot Gadol," abbreviated "SeMaG," presents in a certain sense Maimonides' "Sefer ha-Miẓwot" in enlarged and modified form. As in the latter work, the whole material is grouped around the 613 Biblical commands, and is furthermore divided into two parts, dealing respectively with the commandments and the prohibitions. But, while Maimonides gives only Biblical material and refers only briefly to the rabbinical formulation of the command or the prohibition, the "SeMaG" places the Biblical law first, then gives the deductions from it found in the Talmud, and, finally, adds matter less closely connected with the prescript. As the author himself says in the introduction, it was his chief aim to defend the Franco-German scholars against the Spaniards, especially since Maimonides' great work was gaining in popularity outside of Spain. Although in a way directed against Maimonides, the "SeMaG" really contributed to the spread of his authority in France and Germany; for Moses of Coucy was a true admirer of Maimonides, and did not intend to condemn him. He wished merely to procure a hearing for the opinion of the Tosafists as against that of the Spanish scholars. In part he followed Maimonides' codex, from which he often quotes verbatim; and many of its decisions first came to the notice of the Franco-German Jews through the "SeMaG."

A generation later Isaac b. Joseph of Corbeil wrote his compendium "Sefer Miẓwot ha-Ḳaẓer," or "ha-Ḳaṭon," frequently called "SeMaḲ," after the initial letters, in which, as in the "SeMaG," the Biblical command concisely expressed is placed at the beginning, the rules from the Talmud and from the post-Talmudic writers following, generally without indication of sources or proofs. The arrangement of the material is very peculiar. The book is divided into seven parts, according to the seven days of the week, in order that it may be read through once a week; and the laws whose performance calls for the special activity of any one member of the human body are arranged as one group accordingly. In this way most widely differing topics are grouped under one command, with which they often have no connection whatever. The book was written for a general public; hence its ardent, religious tone, which contributed not a little to its popularity. But it was highly regarded by scholars also, though the author expressly warns them against basing decisions upon it. The most important authority of France next to the author of this book was Perez b. Elijah, who wrote a codex that has only recently been discovered (Elbogen, in "R. E. J." xlv. 99 *et seq.*).

The German School.

Although Jewish literature in Germany is Italian in origin, it developed under French influences; and during the period of the Tosafists the German school was under the moral domination of the North-French school. But the beginning of the thirteenth century marked an important change: the pupil outdistanced the master. Isaac b. Moses Or Zarua', the first to transfer the center of gravity of Talmudic learning to the east, was the author of an important codex, written about the middle of the thirteenth century. Like all the similar products of the German school, the "Or Zarua'" is both a commentary and a codex; for it not only contains decisions, but also is more analytic in character, and was modeled on the work of the author's teacher, Eliezer b. Joel ha-Levi. Although the "Or Zarua'" is very defective in plan and in arrangement, it is still both in size and substance the most important product of the German school in the field of codification; and it was a decisive factor in the development of religious practise among the German-Polish Jews. Isaac's work evinces deep insight and acute intellect, and also an independence rare among the German Jews. It must especially be noted that through him the study of the Talmud of Jerusalem was introduced into Germany and France, and in a certain sense became an important factor in the regulation of the Halakah. Isaac's friend and colleague, Hezekiah b. Jacob, was the author of "Pesaḳim"; the nature of his decisions is not known.

The most important pupil of Or Zarua', Meïr b. Baruch of Rothenburg, the greatest Talmudic authority of his age, devoted not a little time to codification. Only a few treatises by him on mourning customs have, however, been preserved, besides some quotations from various other treatises that were perhaps part of a larger work divided into halakot. His importance for codification lies in the fact that his school produced Asher b. Jehiel and Mordecai b. Hillel, who were guided by the authority of their teacher in their works of codification and compilation. In this way R. Meïr exerted great influence on the shaping of the Halakah in Spain, whither his pupil Asher emigrated, and in the German and Slavic countries, through Mordecai. Mordecai did not claim to be anything but a compiler. He laboriously collected the halakic material of the entire rabbinical literature accessible to him, and attached it to Alfasi's halakot; yet hardly a generation later he was already regarded as a "posek" (authority).

The New Spanish School.

Maimonides' monumental work maintained itself in Spain in spite of much opposition; although the "Mishneh Torah" was criticized, and its decisions were not seldom modified, it was on the whole considered as the authoritative guide for legal practise. Hence the century following Maimonides marks in a way a cessation in the work of codification among the Spanish Jews, notwithstanding the flourishing of Talmudic scholarship during this period. Although Abraham b. Nathan wrote his "Manhig" at Toledo, he was not a Spaniard either by birth or by education; and his code is based chiefly on the work of the French tosafists. In fact, he was the first Provençal who was guided rather by the school of northern France than by the authorities of the south. The ritual codex "'Issur we-Hetter," authoritative on questions relating to dietary laws, is ascribed probably wrongly to the great anti-Maimonist Jonah b. Abraham, and can hardly be considered as a Spanish product. Even Naḥmanides, the great Talmudist of the thirteenth century, shows little interest in codification, his compendium "Torat ha-Adam," on mourning customs, being his only large work in that line. His "Hilkot Ḥallah" and "Hilkot Bekorot" are really only supplements to Alfasi's work. But by his highly original treatment of the Talmud Naḥmanides gave a renewed stimulus to labor in the field of codification. His method, which may be briefly characterized as a union of Spanish systematics with Franco-German dialectics, was bound to produce something new in codification; and his most important pupil, Solomon b. Abraham ibn Adret, was in fact the author of a codex which is as unique in its way as is Maimonides' masterpiece in the other category of codices. According to the original intention of the author, the work was to cover the entire field of the Halakah; but the existing part of it deals only with the dietary and purification laws, collected in the book "Torat ha-Bayit," and the Sabbath- and feast-day laws, collected in "'Abodat ha-Ḳodesh." The former work is divided into seven divisions ("battim," lit. "houses"), which are again subdivided into several "she'arim" (gates); the latter, a smaller work, into two houses with five gates each. This division is essentially modeled on the above-mentioned work of Hai Gaon, with which, as regards treatment of the material also, the books have much in common. The author always begins with the source, *i.e.*, the Talmud, and then introduces the different opinions with their proofs, which he not only sums up, but also discusses in such a way that the final rule takes shape before the reader. About this time another pupil of Naḥmanides, Samuel b. Isaac ha-Sardi, wrote a work on civil law, "Sefer ha-Terumot," which in lucidity of presentation, depth of thought, and mastery of the material has not been surpassed. This work, like the "Torat ha-Adam" of Samuel's master, is divided into gates, seventy in number, subdivided in turn into sections, and these again into paragraphs. Since Jacob b. Asher based his codex of civil law on this work, it exerted an immense influence on the development of later civil law. Though Asher b. Jehiel (Asheri), a contemporary of Samuel and a personal friend of Ibn Adret, was a German by birth, mention must be made of him in this place, because his halakot were written in Spain and clearly show the influence of the Spanish school. Asher based his halakot on Alfasi's work, drawing upon later literature in so far as it had bearing upon the reduction of the Halakah to norms; his work is therefore a commentary on the Talmud in its practical halakic parts. Asheri's halakot, which are marked by lucidity, penetration, and great scholarship, met with a ready reception in the new as well as in the old home of the author. R. Asher's pupil, the Provençal Jeroham, wrote (*c.* 1334) a compendium on civil law under the title "Sefer Mesharim," and a few years later a codex of most of the laws to be observed in the Diaspora. He set himself the task of remedying two defects of Maimonides' codex, namely, the lack of sources and the omission of opinions of the post-Talmudic authorities. In this respect Jeroham's work is meritorious, as he cleverly sums up the conflicting opinions, and briefly and lucidly traces back the halakot to their Talmudic sources. But he made the mistake of arranging the immense amount of material in his own way. His attempt was not successful; for while trying to avoid the defects of Maimonides' system, he was led into other errors, on account of which his work shows no advance beyond that of the former. Only in the smaller portions of his work did he succeed in grouping in a masterly manner all the pertinent material under one topic.

The "Ṭur."

The greatest codifier of the Naḥmanic-Asheric school, and, aside from Maimonides, the most important of all codifiers, was Jacob, the son of Asher b. Jehiel, or the "Ṭur," as he is briefly called after his codex. For his work he of course took that of Maimonides as model; yet the "Ṭur" is the independent creation of a gifted mind. Following Maimonides, he gives neither sources nor proofs; but he generally quotes the post-Talmudic authorities by name, cleverly selecting and contrasting the dissenting opinions; and although he does not give a direct decision, the thoughtful reader may gather the opinion of the "Ṭur" from the way in which a point under discussion is presented. The rapid development of Talmudic study in the period between Maimonides and Jacob b. Asher, covering nearly two centuries, made it impossible for a codifier to ignore differences of opinion; and, as the author of the "Ṭur" correctly says in his introduction, there was at his time hardly a point on which there were no differences of opinion. By birth and education Jacob b. Asher was peculiarly fitted to elaborate the products of the different schools. Through his father he became acquainted with the works and the tendencies of the Franco-German scholars, while a prolonged sojourn in Spain made him familiar with the works of the Sephardim. In view of the lucidity and logical arrangement of the work it is not surprising that for more than two centuries the "Ṭur" answered all the requirements of a codex; and even when its inadequacy began to be felt, and new codices appeared, the system and arrangement of the "Ṭur" were adopted by nearly all later codifiers. On account of its merits the "Ṭur" displaced many similar works of preceding and contemporary authors to such an extent that only recently have not a few of them been rediscovered. A contemporary, Aaron b. Jacob ha-Kohen, wrote a work entitled "Orḥot Ḥayyim," similar to the "Ṭur," but far inferior to it in everything that characterizes a codex, and a great part of it was first published in 1902.

The Italian Codifiers.

While the "Ṭur" may in a sense be regarded as the last important product of the work of codification which had been carried on for centuries among the Ashkenazim and the Sephardim, the Italian Jews were at this time only entering upon that field of labor. Isaiah ben Elijah di Trani's "Pirḳe Halakot" is the first Italian attempt at codification; but even in Italy it had to give way to the "Ṭur" and especially to Jacob b. Moses of Coucy's codex (see David Messer Leon, "Kebod Ḥakamim," p. 78). Only scattered allusions to it are known, and the entire work, still extant in manuscript, was hardly noticed. The "Shibbole ha-Leḳeṭ" of Zedekiah b. Abraham Anaw is another Italian code of laws dating from this time. As its name indicates, it pretends to be nothing but a "gleaning" of earlier decisions, and it shows little originality. The liturgical code "Tanya," probably dating from this time, was not without influence on synagogue liturgy even outside of Italy; but it also betrays little individuality. Toward the end of the fourteenth century Moses b. Jekuthiel de Rossi wrote his compendium "Ha-Tadir," which Güdemann ("Gesch." ii. 195) designates as the first Jewish postil.

Misfortunes of various kinds—the Black Death, the plague, persecutions, etc.—deprived the Jewish intellect of the clearness and briskness required for Talmudic studies and especially for the work of codification. The two centuries intervening between the "Ṭur" and the Shulḥan 'Aruk produced little of value in the field of codification. In Germany before 1349 Alexander Süsskind wrote his codex "Aguddah," a scholarly and independent but not systematic work. Isaac Düren, a contemporary of Süsskind, and an alleged pupil of Asher b. Jehiel, collected the dietary laws; and although his "Sha'are Dura" has little originality, it enjoyed for centuries a great reputation, and various commentaries and glossaries to it were written by scholars like Isserlein, Solomon Luria, and Isserles. After the "Ṭur" Spain likewise produced few halakic works of importance, with the possible exception of Menahem b. Zerah's "Ẓedah la-Derek." Although this work offers nothing original to scholars, the author makes a new departure in emphasizing on all occasions the ethical side of the Law. The scholars during this period devoted themselves especially to the synagogal ritual; and the "Kol Bo" in particular is an important work (for other ritual collections see Zunz, "Ritus," pp. 29-32). Crescas' intention ("Or Adonai," ed. Vienna, p. 2a) to codify the general principles of the Law, omitting details, was probably never carried out. The "Agur," written in Italy about 1480 by the German Jacob b. Judah Landau, is the only noteworthy contribution to codification in the fifteenth century.

The Shulḥan 'Aruk.

Although from the first third of the thirteenth century down to about the middle of the sixteenth there were no important products in the field of codification, yet the study of the Talmud during this period was not neglected. In Spain after the "Ṭur" there were men like Nissim b. Reuben, Yom-Ṭob b. Abraham, and Isaac b. Sheshet, to mention only a few. In their hands the Halakah material grew beyond the limits of the "Ṭur," and in many cases took a different shape. In Italy the influence of the new German school, which in many cases did not recognize the authority of the "Ṭur," made itself felt toward the end of the fifteenth century, especially through Colon. The most important representatives of this school, Jacob b. Moses Molin, Isserlein, and Israel Bruna, undertook to procure recognition for the German authorities, to whom in their opinion the "Ṭur" had not done justice. The insecure position of the Halakah toward the end of the fifteenth century, in itself a deplorable matter, was still further threatened when the Jews were expelled from the Pyrenean countries, and were scattered throughout other lands. This catastrophe undermined the power of "the custom of the country," which so far had always been given recognition. In some places mixed communities arose, composed of Spanish, Italian, German, and other Jews; and each of these members naturally desired to introduce the customs of his own country. In other places no communities could be formed, because difference in religio-legal practise prevented mutual understanding. This evil could be remedied only by a man who had mastered the immense material collected since the "Ṭur" was written, and whose authority was so generally recognized that his decisions were accepted everywhere. Joseph b. Ephraim Caro satisfied these two conditions as no one else could; and he furthermore possessed the literary capacity necessary to reduce the existing codices to one code satisfying the demands of his time. He recognized that if his work was to be a universal codex, it must not be based on Maimonides' "Yad ha-Ḥazaḳah," which entirely ignored the labors of the German-French school, but must be based on the "Ṭur," which was highly regarded by both the Ashkenazim and the Sephardim. Caro's "Bet Yosef," therefore, on which the Shulḥan 'Aruk was based, follows the "Ṭur," the plan and arrangement of which were adopted in the Shulḥan 'Aruk also. But Caro is much more independent than his predecessor in that he generally reduces the Halakah to rules without giving every difference of opinion. In making rules his authorities were the three codifiers Alfasi, Maimonides, and Asher b. Jehiel. An opinion held by any two of them is adopted by Caro, unless the majority of later authors follow the opinion of the third, in which case his opinion is accepted. Some such plan was absolutely necessary, because Caro's authority, in spite of his great reputation, was not such that he could hope to have his decision accepted in questions about which the greatest "Poseḳim" of centuries had been contending.

Authority of the Shulḥan 'Aruk.

The Shulḥan 'Aruk, however, includes many decisions which Caro either deduced independently from the Talmud or decided according to Talmudic principles without considering the differing opinions of great authorities. For this reason as well as on account of the fact that he was not sufficiently acquainted with the practise of the Ashkenazim, in spite of his thorough knowledge of their halakic literature, the Shulḥan 'Aruk met with opposition among them, and especially among the leading Talmudists of Poland. Of especial importance among these was Moses Isserles, who, by his glosses to the Shulḥan 'Aruk and to the "Bet Yosef," in some degree modified the authority of the Shulḥan 'Aruk in Polish-German countries. While the Shulḥan 'Aruk became with few exceptions the authoritative codex among the Oriental Jews, the Ashkenazim and in part also the Italians recognized Isserles' authority in cases where his opinion differed from that of Caro. It took a whole century, however, to bring about a universal recognition of the authority of the Shulḥan 'Aruk, which had to contend especially with the "Lebush," Mordecai Jaffe's codex, as well as with the bitter criticism of Solomon Luria and Joel Sirkes. Only when authorities like Samuel b. David and Shabbethai b. Meïr, notwithstanding their scholarship and independence, accepted most of the decisions of the Shulḥan 'Aruk as authoritative, did the work become what it now is, the codex par excellence of rabbinical Judaism. Nevertheless, it must always be borne in mind that the really decisive authority is the Talmud (comp., *e.g.*, Maimonides' introduction to his codex, and, among later writers, Yom-Ṭob Lipman Heller, on Sheb. iv. 10; on the question comp. Weiss, "Dor," iii. 216 *et seq.*), and a reference to a codex as authoritative is equivalent to saying that its exposition of the Talmud is regarded as the correct one. A man like Elijah ben Solomon, in spite of his respect for the Poseḳim, could frequently decide in important cases against the Shulḥan 'Aruk, and follow his own interpretation of the Talmud. But such independence was very rare, and, although theoretically recognized, had little influence on actual practise. Of greater importance for the fixation of the Halakah are the commentaries on the Shulḥan 'Aruk, especially those of David b. Samuel and Shabbethai b. Meïr, who proceeded independently in the exposition of the Shulḥan 'Aruk. Although the Halakah material increased immensely after the completion of the Shulḥan 'Aruk, especially through the contribution of Polish Talmudists in the seventeenth and eighteenth centuries and in the first half of the nineteenth, only a few attempts were made to codify the new material. The most important modern contributions in this field are the works of Abraham Danziger, "Ḥayye Adam" and "Ḥokmat Adam," in which the Halakah of the Aḥaronim is codified; but they did not find general favor with scholars, in spite, or perhaps because, of their popularity. The great Ḥasidic Rabbi Shneor Solomon b. Baruch of Ladie attempted a new code; but the larger part of his manuscripts was destroyed by fire, and only fragments have been published.

Summary.

The source of the Law and of its authority is the will of God as expressed in Scripture. From the standpoint of rabbinism there is no code, and none can exist, which can supersede the Torah. But practically the matter is quite different, although during the whole period from the first Mishnah down to the Shulḥan 'Aruk it was acknowledged in many circles that a codex really had no place beside the Torah. This idea was dominant during the time of the Soferim and the Tannaim; for, although some of the latter attempted to systematize the immense materal of the Halakah, they objected to its codification. The Mishnah, which closes the period of the Tannaim, is in so far a codex as it was regarded as the only authoritative exposition of the Torah; and all those cases which were not clearly defined in Scripture had to be referred to the Mishnah. The Mishnah, moreover, is the only source for those laws which were formulated independently of Scripture, and lived in the consciousness of the people as such. The Mishnah owes its authority to the fact that it was undertaken by the patriarch Judah ha-Nasi and his bet din, which was recognized by the Jews as the highest religious and political authority. An authority of such a kind no longer existed at the time of the Amoraim (see Bet Din), whose opinions are important only because the Amoraim were the direct successors of the Tannaim and must be considered as the legitimate expounders of the Mishnah, which they inherited from the Tannaim. The relation of the Talmud, a product of the Amoraim, to the Mishnah is about the same as that of the Mishnah to Scripture. The Talmud derives its authority from the fact that it was completed under the supervision of the entire body of Jewish scholars, Babylon being at that time (*c.* 500) the only important seat of these scholars.

In post-Talmudic times there was no longer one authority; there were several authorities. As Alfasi and Maimonides frequently decided against the Geonim, so later scholars not seldom decided against the Poseḳim, the scholars between 1000 and 1500 c.e. This explains the great opposition to Maimonides' codex and subsequently to Caro's works, because here individual opinions were codified by them. Because of the extent of the field of Jewish law, cases occurred daily that were not provided for in the Mishnah or in the Gemara, and a certain standard had to be created so that religious practise and law should not be constantly called into question. Important factors in securing stability were veneration for custom ("minhag") and the importance ascribed to the opinions of the former generations ("rishonim"). The true sentiment of the people was expressed in the minhag; and this must therefore be respected as a decisive factor in expounding the existing law and in its development. The opinions of the rishonim, which are frequently decisions of practical cases, have the same significance as the decisions of a higher court in modern jurisprudence, which are valid until they have been proved to be erroneous. But these two factors, the minhag and the authority of the rishonim, reached from time to time dangerous proportions, and threatened to displace the real source of authority; and at such times the chief men of Israel felt the necessity of collecting and sifting the accumulating material and of formulating the rules of the Law. The three great codifiers of the Middle Ages, Maimonides, Jacob b. Asher, and Caro, had each a special task: Maimonides that of systematizing the law; Jacob b. Asher of sifting it critically; and Caro of unifying it. Compare Amora; Authority; Baraita; Caro, Joseph b. Ephraim; 'Eduyot; Halakah; Isserles; Jacob b. Asher; Maimonides, Moses; Mishnah; Talmud; Tannaim.

LAW OF THE LAND. See Conflict of Laws.

LAW, THE ORAL. See Oral Law.

LAW, READING FROM THE: The custom of reading portions of the Pentateuch at the synagogue on Sabbath and holy days and at other stated times of the year; an institution which made Judaism one of the most powerful factors of instruction and education in the world. Through it the Torah became the property of the whole people of Israel; and through it, also, the Gentiles were won for Judaism; even the rise of Christianity and Islam was made possible chiefly through the customary reading from the Law and the Prophets on the various days of rest, inasmuch as it was accompanied by interpretation and application of the Law and the Prophets to the events and needs of the time. The institution dates from the very earliest time of the synagogue; Josephus ("Contra Apionem," ii. 17) ascribes it to Moses himself. "The lawgiver," he says, "showed the Law to be the best and the most necessary means of instruction by enjoining the people to assemble not once or twice or frequently, but every week while abstaining from all other work in order to hear the Law and learn it in a thorough manner—a thing which all other lawgivers seem to have neglected." Compare the words of Nicolaus ("Ant." xvi. 2, 3): "The seventh day is dedicated to the learning of our customs and laws"; also Philo ("De Opificio Mundi," p. 48; "De Septennario," p. 6; "Hypothetica" in Eusebius, "Præparatio Evangelica," viii. 7); and the New Testament (Acts xv. 21) as well as the Talmud (Yer. Meg. iv. 75a; B. Ḳ. 82a; Massek. Soferim x. 1, but comp. Mek., Beshallaḥ, Wayassa', i. and notes of I. H. Weiss), which ascribe the institution to Moses; and this view is accepted alike by Isaac Al-Fasi on Meg. iv. and Maimonides, Tefillah, xii. 1. The reason that it has been ascribed to Moses is that the Deuteronomic law (Deut. xxi. 10) prescribes that every seventh year the Law should be read to all Israel when it gathers at the Feast of Tabernacles. According to Josephus ("Ant." iv. 8, 12), the high priest read it before the assembly; the Mishnaic record (Soṭah vii. 8; comp. Yer. Soṭah against the Talmudic emendation) has it that the king read the whole of Deuteronomy on the eighth day of Sukkot, "the chapter of the king" (Deut. xvii. 14-20) having given the name to the whole (comp. Sifre, Deut. 160). From Tosef., Soṭah, vii 17, however, it appears that the whole of Deuteronomy was not always read on that occasion.

Origin of the Institution.

The custom of going to the prophet on Sabbath and holy days for instruction known in ancient times (II Kings iv. 23) may have been specially practised during the Exile, in which the beginnings of the Synagogue must be sought; and consequently readings from the Prophets may have preceded those from the Pentateuch, wherefore the origin of the Haftarah is wrapped in obscurity. The reading from the Law can be traced much more clearly. King Josiah was the first to read the Book of the Covenant to the assembled people (II Kings xxiii. 2); and Ezra the scribe, who came back from Babylonia with the complete Pentateuch, read from the same to the assembly on the eight days of Sukkot (Neh. viii. 1-18). How and when this developed into the practise of a regular Pentateuch lesson on each Sabbath-day can not be ascertained. It has been suggested that the Deuteronomic precept mentioned above led to the practise of reading a small chapter from the Pentateuch each Sabbath so that the whole was completed each seventh year. Lengthy readings were originally not favored at all (see Meg. iv. 4; Tosef., Meg. iv. 17). Out of the seven years' cycle, two cycles of three and a half years may have evolved, then one of three years, and finally one of one year with the last day of Sukkot as the Feast of Rejoicing in the Law (see Simḥat Torah), when the last section was read (see Zunz, "G. V." p. 3, note f; Müller, "Masseket Soferim," p. 158; *idem*, "Ḥilluf Minhagim," No. 48, but compare Rapoport, "Halikot Ḳedem," 1846, pp. 10 *et seq.*, and Herzfeld, "Gesch. des Volkes Jisrael," ii. 209). With the three-and-a-half-year cycle the division of the Pentateuch into 175 sections would correspond (Massek. Soferim xvi. 11; comp. Müller's notes; Yer. Shab. xvi. 15c); with the three-year cycle observed in Palestine and in Palestinian colonies down to the thirteenth century (Meg. 29b; Maimonides, Tefillah, xiii. 1; Benjamin of Tudela, ed. Asher, p. 98), the 155 sections mentioned in Esther R. at the beginning (קנה) and preserved in the Masorah as well as in the Midrashim (see Zunz and Rapoport, *l.c.*); while the generally accepted division of the Pentateuch into 53 or 54 sections found in Babylonia as early as Samuel's time (Meg. 29b, 30a) is based upon the one-year cycle. How these various cycles came into use is a matter of conjecture; Graetz found an intermediary stage between the triennial and the annual cycle in the practise of continuing the reading of the section through the week—that is, at the Sabbath afternoon and the Monday and Thursday morning services (Meg. 31b)—which he calculates to have constituted a two-year cycle. A more complicated theory is proposed at great length by Buechler in "J. Q. R." v. 420-468. From these 54 parashiyyot of the Torah each Sabbath of the Jewish calendar year received its name. (See also Loeb and Derenbourg in "R. E. J." vi. 250-267, vii. 146-149.) As regards the Samaritan cycle, also based upon a one-year cycle, see Cowley, "J. Q. R." vii. 134-140.

While the reading from the Law at the morning service of the Sabbath and holy days was generally assumed to be a Mosaic institution, the practise of reading from the Law on Sabbath afternoon, when people have leisure, and on Monday and Thursday mornings, for the villagers who then came to the city for the market and court days, is ascribed to Ezra (Yer. Meg. iv. 75a; B. Ḳ. 82a; comp. Mek., Wayassa', i.; see notes of I. H. Weiss, p. 53). Only the first section of the week's parashah is read on Sabbath afternoon and on Monday and Thursday. This was different in earlier times (see Meg. 29b).

Number of Those Who Read.

The reading, which was originally done by one priest or elder (see Philo in Eusebius, "Præparatio Evangelica," *l.c.*, ed. Mangey, ii. 630; and Yer. Meg. iv. 75a), was afterward done by several, each of whom was called up by the head of the synagogue to read a few verses (Yoma vii. 1; Rashi, see 'Aliyah). On Sabbath morning seven were called up—which number seems to have been selected in order to give each of the seven elders of the synagogue, "sheba' ṭobe ha-'ir," who sat on the platform (Matt. xxiii. 2; see Almemar) an opportunity of reading, while the chief among them dismissed the congregation with words of comfort and monition from the Prophets (see Haftarah and Prophets). On the Day of Atonement six were called up, on holy days five, on half holy days four, on Sabbath afternoon and week-days three; the last number implied the great historic principle that the Law was no longer the privilege of the priest and the Levite (comp. Neh. viii. 7-8), but that in the Soferic period the layman also was counted a student and teacher of the Law (Giṭ. v. 5, 59a; B. Ḳ. 82a; see Müller, *l.c.* p. 145). Originally no one was called up to the Law who could not himself read; consequently where there was but one able to read in the assembly he read the whole portion (see Yer. Meg. iv. 75b; comp. Maimonides, *l.c.* xii. 5; Abudarham, "Tefillah shel Ḥol"); in the course of time the ignorant members of the congregation had to be considered also, and it became the custom to have the Ba'al Ḳore read the chapter for all (Rashi Shab. 12b; Tosafot Meg. 28b). Regarding the mode of reading from the Law, see Cantillation.

For the fifty-four parashiyyot of the Torah, see Pentateuch.

The chapters selected for the various feasts and fast-days, part of which were fixed in the Mishnaic time (see Meg. iii. 4-6), others in the Babylonian schools with a view to the second day of each festival, which was likewise regarded as a holy day (Meg. 29-31), are:

Passover: first day, Ex. xii. 21-51;
second day, Lev. xxiii. 1-44;
third day (half holy day), Ex. xiii. 1-16;
fourth day, Ex. xxii. 24-xxiii. 19;
fifth day, Ex. xxxiv. 1-26;
sixth day, Num. ix. 1-14;
seventh day (holy day), Ex. xiii. 17-xv. 27;
eighth day, Deut. xv. 19-xvi. 17.
Shabu'ot: first day, Ex. xix. 1-xx. 17;
second day, Lev. xxiii. 1-44.
Sukkot: first and second days, Lev. xxii. 36-xxiii. 44;
from the third to seventh days (half-holidays), Num. xxix. 17-39;
eighth day, Lev. xxiii. 1-44;
Simḥat Torah, Deut. xxxiii.-xxxiv. 12.
New-Year's:
first day, Gen. xxi.;
second day, Gen. xxii. 1-19.
Day of Atonement:
morning, Lev. xvi. 1-34;
afternoon, Lev. xvi. 1-34.

All these are followed by the reading of the respective portions relating to the sacrifice for the day, from Num. xxviii.-xxix.

New-Moon, Num. xxviii. 1-15.
The eight days of Ḥanukkah, portions from Num. vii. 1-viii. 4 are successively read.
Purim, Ex. xvii. 9-15.
Sabbath Sheḳalim, Ex. xxx. 1-10.
" Zakor, Deut. xxv. 17-19.
" Parah, Num. xix. 1-22.
" Ha-Ḥodesh, Ex. xii. 1-20.
Ninth of Ab, Deut. ix. 25-40.
Ordinary fast-day, Ex. xxxii. 11-xxxiv. 11.

For the order in which the reading of the Law is taken, see 'Aliyah, and for the nature of the manuscripts see Scrolls of the Law.

J. G. L.

LAWS, NOACHIAN: Laws which were supposed by the Rabbis to have been binding upon mankind at large even before the revelation at Sinai, and which are still binding upon non-Jews. The term Noachian indicates the universality of these ordinances, since the whole human race was supposed to be descended from the three sons of Noah, who alone survived the Flood. Although only those laws which are found in the earlier chapters of the Pentateuch, before the record of the revelation at Sinai, should, it would seem, be binding upon all mankind, yet the Rabbis discarded some and, by hermeneutic rules or in accordance with some tradition (see Judah ha-Levi, "Cuzari," iii. 73), introduced others which are not found there.

The Seven Laws.

Basing their views on the passage in Gen. ii. 16, they declared that the following six commandments were enjoined upon Adam: (1) not to worship idols; (2) not to blaspheme the name of God; (3) to establish courts of justice; (4) not to kill; (5) not to commit adultery; and (6) not to rob (Gen. R. xvi. 9, xxiv. 5; Cant. R. i. 16; comp. Seder 'Olam Rabbah, ed. Ratner, ch. v. and notes, Wilna, 1897; Maimonides, "Yad," Melakim, ix. 1). A seventh commandment was added after the Flood—not to eat flesh that had been cut from a living animal (Gen. ix. 4). Thus, the Talmud frequently speaks of "the seven laws of the sons of Noah," which were regarded as obligatory upon all mankind, in contradistinction to those that were binding upon Israelites only (Tosef., 'Ab. Zarah, ix. 4; Sanh. 56a *et seq.*).

While many additions were made to these laws by some of the tannaim—*e.g.*, the prohibitions against eating the blood of a living animal, against the emasculation of animals, against sorcery, against pairing animals of different species, and against grafting trees of different kinds (*ib.* 56b)—so that in one place thirty Noachian laws are mentioned (Ḥul. 92a; comp. Yer. 'Ab. Zarah ii. 1), the prevalent opinion in the Talmud is that there are only seven laws which are binding upon all mankind. In another baraita (Tanna debe Menasseh) the seven Noachian prohibitions are enumerated as applying to the following: (1) idolatry, (2) adultery, (3) murder, (4) robbery, (5) eating of a limb cut from a living animal, (6) the emasculation of animals, (7) the pairing of animals of different species (Sanh. 56b).

Laws Before Sinai.

With regard to the other laws which are mentioned in the Book of Genesis and which were not included among the Noachian laws, as, for instance, circumcision and the prohibition against eating of the "sinew that shrank," the Rabbis laid down the following principle: "Every law that was enjoined upon the Noachidæ and was repeated at Sinai is meant to apply both to Israelites and to non-Israelites; laws that were enjoined upon the Noachidæ and were not repeated at Sinai apply to Israelites only" (Sanh. 59a; R. Jose ben Ḥanina; comp. Bacher, "Ag. Pal. Amor." i. 430 and note). By this principle a number of the pre-Sinaitic laws were excluded from the Noachian laws, although it required a great deal of speculative reasoning to make this principle apply to all cases (Sanh. 59b).

In the elaboration of these seven Noachian laws, and in assigning punishments for their transgression, the Rabbis are sometimes more lenient and sometimes more rigorous with Noachidæ than with Israelites. With but a few exceptions, the punishment meted out to a Noachid for the transgression of any of the seven laws is decapitation, the least painful of the four modes of execution of criminals (see Capital Punishment). The many formalities of procedure essential when the accused is an Israelite need not be observed in the case of the Noachid. The latter may be convicted on the testimony of one witness, even on that of relatives, but not on that of a woman. He need have had no warning ("hatra'ah") from the witnesses; and a single judge may pass sentence on him (*ib.* 57a, b; "Yad," *l.c.* ix. 14). With regard to idolatry, he can be found guilty only if he worshiped an idol in the regular form in which that particular deity is usually worshiped; while in the case of blasphemy he may be found guilty, even when he has blasphemed with one of the attributes of God's name—an action which, if committed by an Israelite, would not be regarded as criminal (*ib.* 56b; see Blasphemy).

Procedure.

The Noachidæ are required to establish courts of justice in every city and province; and these courts are to judge the people with regard to the six laws and to warn them against the transgression of any of them (*ib.*; "Yad," *l.c.* ix. 14, x. 11; comp. Naḥmanides on Gen. xxxiv. 13, where the opinion is expressed that these courts should judge also cases other than those coming under the head of the six laws, as, for example, larceny, assault and battery, etc.). In the case of murder, if the Noachid slay a child in its mother's womb, or kill a person whose life is despaired of ("ṭerefah"), or if he cause the death of a person by starving him or by putting him before a lion so that he can not escape, or if he slay a man in self-defense, the Noachid is guilty of murder and must pay the death-penalty, although under the same circumstances an Israelite would not be executed (*ib.* 57b; "Yad," *l.c.* ix. 4; comp. "Kesef Mishneh," *ad loc.*).

Only six cases of what would ordinarily be illicit connection are forbidden to the Noachid: (1) with mother; (2) with father's wife, even after the father's death; (3) with a married woman, whether married to a Jew or to a non-Jew; (4) with sister by the same mother; (5) pederasty; (6) bestiality. In these cases also there are differences in the punishment inflicted, dependent upon whether the offenses are committed by a Noachid or by an Israelite (see "Yad," *l.c.* ix. 5–8). The Noachid is punished with decapitation for all kinds of robbery, whether from a Jew or from a non-Jew, even though the article stolen is worth less than a peruṭah (the smallest Palestinian coin, for less than which no case can be instituted against an Israelite). The Noachid is executed also if he eat of a limb cut from a living animal, even though the quantity consumed be less than the size of an olive (the minimum portion for the eating of which an Israelite may be punished; "Yad," *l.c.* ix. 9–13).

Special Exceptions.

The Noachid is free from punishment if he commits a sin unwittingly; ignorance of the Law, however, does not excuse him. If he commits a sin under duress, even one for which an Israelite is obliged to undergo martyrdom rather than transgress (*e.g.*, idolatry, adultery, or murder), he is not liable to punishment (Mak. 9a; Sanh. 74b; "Yad," *l.c.* x. 1, 2; comp. "Leḥem Mishneh" and "Kesef Mishneh," *ad loc.*). A Noachid who slays another Noachid, or worships idols, or blasphemes, or has illicit connection with the wife of another Noachid, and then becomes a proselyte, is free from punishment. If, however, he has killed an Israelite, or has had illicit connection with the wife of an Israelite, and then becomes a proselyte, he must submit to the punishment that is inflicted upon an Israelite found guilty of such a transgression (Sanh. 71b; "Yad," *l.c.* x. 4).

A Noachid who wishes to observe any of the laws of the Torah is not prevented from doing so. With regard to the prohibition against a Noachid studying the Law or observing the Sabbath, see Gentile in Relation to Jews.

He who observed the seven Noachian laws was regarded as a domiciled alien (גר תושב, 'Ab. Zarah 64b; see Proselyte), as one of the pious of the Gentiles, and was assured of a portion in the world to come (Tosef., Sanh. xiii. 1; Sanh. 105a; comp. *ib.* 91b; "Yad," *l.c.* viii. 11). In Talmudic times the non-Jews of Babylon were apparently sunk in the grossest immorality, so that 'Ula, one of the earlier

Babylonian amoraim, complains that out of the thirty laws (see above) which the Noachidæ accept they observe only three—they do not write a marriage contract ("ketubah") for pederasty; they do not sell human flesh in their shops; and they show respect for the Torah (Ḥul. 92b).

In the Messianic age the Noachidæ will accept all the laws of the Torah, although later they will again reject them (Yer. 'Ab. Zarah ii. 1).

LAWYER. See Academies; Attorney.

LAZAR. See Eleazar.

LAZARE, BERNARD: French author; born at Nîmes June 14, 1865; died at Paris Sept. 1, 1903; educated in his native town and in Paris, where he settled, becoming critic and collaborator on "La Nation," "L'Evénement," "L'Echo de Paris," "Le Journal," "Figaro," etc. Although without any religious convictions he avowed himself a Jew, and was always ready to defend his brethren. It was therefore only natural that the family of Captain Dreyfus, believing their kinsman innocent, should appeal to Lazare, who, himself convinced of the innocence of the accused officer and of the existence of a conspiracy among his accusers, took up his defense and wrote "Une Erreur Judiciaire: La Vérité sur l'Affaire Dreyfus" (Paris, 1896) and "Comment On Condamne un Innocent" (*ib.* 1897), which books paved the way for the revision of the Dreyfus case. Lazare interested himself deeply in the Jewish problem, even visiting Russia and Rumania to observe personally the conditions prevalent among the Jews. He became an ardent supporter of the Zionist movement, and was a prominent figure in the Zionist congress of 1898, but he soon dissociated himself from the movement on account of disagreement in the management of the Jewish Colonial Trust.

Lazare was the author of: "La Fiancée de Corinthe," Paris, 1889; "Le Miroir des Légendes," *ib.* 1891; "L'Antisémitisme, Son Histoire et Ses Causes," Paris, 1892 (English transl. 1903); "Les Porteurs des Torche," 1897. Lazare's most widely known book is "L'Antisémitisme," parts of which had already appeared as articles and essays. The author says in the introduction, "I have been charged by some with being an anti-Semite, by others with having defended the Jews too strongly. . . . This is wrong, for I am neither an anti-Semite nor a philo-Semite; I intend to write neither an apology nor a diatribe, but an impartial study of the history and sociology of the Jews." The book gives the history of the facts that have tended to develop anti-Semitism, and recounts the treatment the Jews received in ancient times (ch. ii.), from the foundation of the Christian Church to Constantine (ch. iii.), from Constantine to the eighth century (ch. iv.), from the eighth century to the Reformation (ch. v.), from the Reformation to the French Revolution (ch. vi.). Ch. vii. discusses ancient and medieval anti-Semitic literature, the modern phenomena and literature of anti-Semitism being discussed in ch. viii. and ix. Ch. x. is given to a discussion of the Jews as a race. Ch. xi. compares them with other races represented in Europe. "But can the Jews be regarded as a race? The anti-Semites accuse them of cosmopolitanism, and from this deduce their revolutionary tendencies, not only politically but socially" (ch. xii., xiii., xiv.).

The last chapter forecasts the future of anti-Semitism. The principal agent in the disappearance of anti-Semitism will be the gradual assimilation of the Jews by surrounding stocks, a process now observable in the United States. Anti-Semitism excites the middle class, the proletariat, and sometimes the farmer, against the rich Jew; and while it leads these classes to socialism, it prepares them for anarchism, teaches them to hate not the Jewish capitalist only, but all capitalists. Anti-Semitism thus carries within itself the agent of its own destruction. It leads man to socialism, to equality, to fraternity, and destroys the barriers between the classes, between nations and religions.

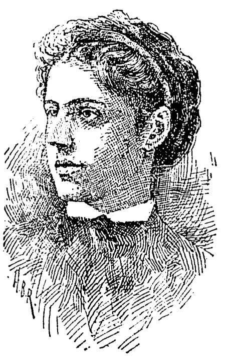
LAZARUS B. DAVID. See Bendavid, Lazarus.

LAZARUS, EMMA: American poet; born July 22, 1849, in New York city; died there Nov. 19, 1887; daughter of Moses and Esther (Nathan) Lazarus. She was educated by private tutors, and early manifested poetic taste and talent. The first stimulus to her muse was offered by the Civil war. A collection of her "Poems and Translations," verses written between the ages of fourteen and seventeen, appeared in 1867 (New York), and was commended by William Cullen Bryant. This volume was followed, in 1871, by "Admetus, and Other Poems" (*ib.*). The title-poem was dedicated "To my friend Ralph Waldo Emerson," whose works and personality were exercising an abiding influence upon the poet's intellectual growth. During the next decade, in which "Phantasies" and "Epochs" were written, her poems appeared chiefly in "Lippincott's Magazine" and "Scribner's Monthly."

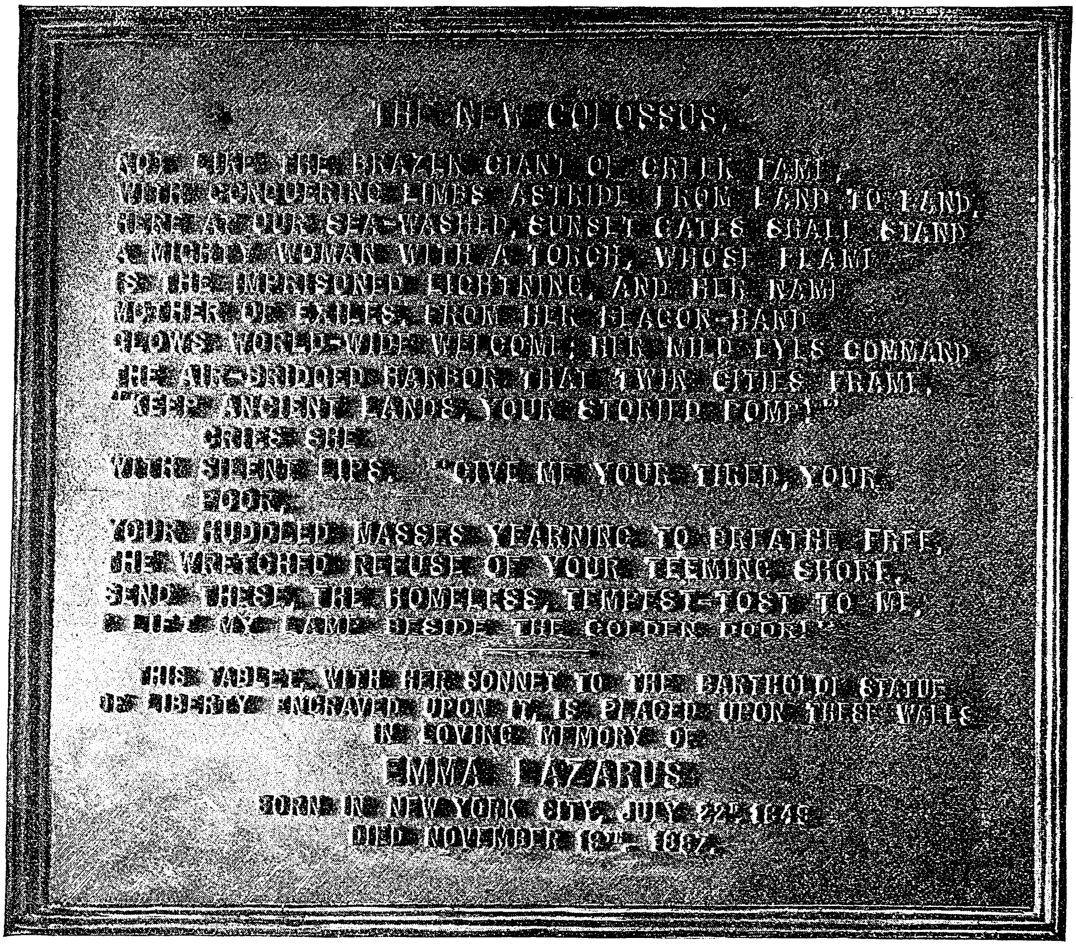


Emma Lazarus.

By this time her work had won recognition abroad. Her first prose production, "Alide: An Episode of

Goethe's Life," treating of the Fredericka Brion incident, was published in 1874 (Philadelphia), and was followed by "The Spagnoletto" (1876), a drama, and by "Poems and Ballads of Heinrich Heine" (New York, 1881), to which a biographical sketch of Heine was prefixed. Her renderings of some of Heine's verse are considered among the best in English. In April, 1882, she published in "The Century" the article "Was the Earl of Beaconsfield a Representative Jew?" Her statement of the reasons for answering this question in the affirmative may be taken to close what may be termed the Hellenic and journeyman period of Emma Lazarus' life, during which her subjects were drawn from classic and romantic sources.

What was needed to make her a poet of the people as well as of the literary gild was a great theme, the establishment of instant communication between some stirring reality and her still-hidden and irresolute subjectivity. Such a theme was provided by the immigration of Russian Jews to America, consequent upon the proscriptive May Laws of 1881. She rose to the defense of her race in powerful articles contributed to "The Century" (May, 1882, and Feb., 1883). Hitherto her life had held no Jewish inspiration. Though of Sephardic stock, and ostensibly Orthodox in belief, her family had hitherto not participated in the activities of the Synagogue or of the Jewish community. Contact with the unfortunates from Russia led her to study the Bible, the Hebrew language, Judaism, and Jewish history. Besides, she suggested, and in part saw executed, plans for the welfare of the immigrants. The literary fruits of identification with her race were poems like "The Crowing of the Red Cock," "The Banner of the Jew," "The Choice," "The New Ezekiel," "The Dance to Death" (a strong, though unequally executed drama), and her last published work (March, 1887), "By the Waters of Babylon: Little Poems in Prose," which, aglow with "a gleam of the solemn fire of the Hebrew prophets," constitutes her strongest claim to a foremost rank in American literature.



THE NEW COLOSSUS.
NOT LIKE THE BRAZEN GIANT OF GREEK FAME,
WITH CONQUERING LIMBS ASTRIDE FROM LAND TO LAND;
HERE AT OUR SEA-WASHED, SUNSET GATES SHALL STAND
A MIGHTY WOMAN WITH A TORCH, WHOSE FLAME
IS THE IMPRISONED LIGHTNING, AND HER NAME
MOTHER OF EXILES. FROM HER BEACON-HAND
GLOWS WORLD-WIDE WELCOME; HER MILD EYES COMMAND
THE AIR-BRIDGED HARBOR THAT TWIN CITIES FRAME.
"KEEP ANCIENT LANDS, YOUR STORIED POMP!"
CRIES SHE
WITH SILENT LIPS. "GIVE ME YOUR TIRED, YOUR
POOR,
YOUR HUDDLED MASSES YEARNING TO BREATHE FREE,
THE WRETCHED REFUSE OF YOUR TEEMING SHORE.
SEND THESE, THE HOMELESS, TEMPEST-TOST TO ME,
I LIFT MY LAMP BESIDE THE GOLDEN DOOR!"

THIS TABLET, WITH HER SONNET TO THE BARTHOLDI STATUE
OF LIBERTY ENGRAVED UPON IT, IS PLACED UPON THESE WALLS
IN LOVING MEMORY OF
EMMA LAZARUS
BORN IN NEW YORK CITY, JULY 22ND 1849
DIED NOVEMBER 19TH 1887.

TABLET WITH POEM BY EMMA LAZARUS AFFIXED TO THE LIBERTY MONUMENT, NEW YORK.

During the same period (1882-87) she translated the Hebrew poets of medieval Spain with the aid of the German versions of Michael Sachs and Abraham

Geiger, and wrote articles, signed and unsigned, upon Jewish subjects for the Jewish press, besides essays on "Bar Kochba," "Henry Wadsworth Longfellow," "M. Renan and the Jews," etc., for Jewish literary associations, all the while continuing her purely literary and critical work in the magazines in such articles as "Tommaso Salvini," "Salvini's 'King Lear,'" "Emerson's Personality," "Heine, the Poet," "A Day in Surrey with William Morris," etc. Her most notable series of articles was that entitled "An Epistle to the Hebrews" ("The American Hebrew," Nov. 10, 1882–Feb. 24, 1883), in which she discussed the Jewish problems of the day, urged a technical and a Jewish education for Jews, and ranged herself among the advocates of an independent Jewish nationality and of Jewish repatriation in Palestine. The only collection of poems issued during this period was "Songs of a Semite: The Dance to Death and Other Poems" (New York, 1882), dedicated to the memory of George Eliot. After her death appeared "The Poems of Emma Lazarus" (2 vols., Boston and New York, 1889), which comprise such of her poetic work in previous collections, in periodical publications, and from among her literary remains as her executors deemed proper to preserve in permanent form.

Emma Lazarus counted among her friends many of the prominent literary men of the day. Doubtless she is the most distinguished literary figure produced by American Jewry, and possibly the most eminent poet among Jews since Heine and Judah Löb Gordon. From a point of view transcending the racial, she ranks high as a writer; and her later work would seem to indicate that, if days had been granted her, she might have risen to a place in the first class. In May, 1903, a bronze tablet commemorative of her was placed inside the pedestal of the Statue of Liberty in New York harbor.

A. H. S.

LAZARUS, JOSEPHINE: American essayist; born March 23, 1846, in New York city, where she has always resided; daughter of Moses and Esther (Nathan) Lazarus. The first piece of work to bring her into prominent notice was the biographical sketch of her sister Emma Lazarus, which first appeared in "The Century Magazine," Oct., 1888, and was afterward prefixed to "The Poems of Emma Lazarus" (New York and Boston, 1889). Between 1890 and 1893 she wrote articles on "Marie Bashkirtseff" in "Scribner's Magazine," and on "Louise May Alcott" and "Margaret Fuller" in "The Century Magazine." In 1895 six of her essays on Jewish subjects, which had appeared from 1892 to 1895 in "The Century Magazine" and "The Jewish Messenger," were collected and published in book form under the title "The Spirit of Judaism." The plea addressed to Jews in these essays is to acquire a larger knowledge of the Jewish situation, to emerge from their spiritual isolation, and to enter into fellowship with those among whom they live; and the plea addressed to Christians is for a more liberal attitude toward Jews and Jewish thought.

Between 1897 and 1902 Josephine Lazarus wrote, in "The American Hebrew," "The New World," and "The Maccabæan," four articles on aspects of the Zionist movement, with which she is in sympathy. Besides, she published, in 1899, a book entitled "Madame Dreyfus"; and for many years she has been a contributor of numerous book-notices to "The Critic."

A. H. S.

LAZARUS, JULIUS: German physician; born at Neusalz-on-the-Oder April 6, 1847; educated at the gymnasium of Görlitz, Silesia, and at the University of Breslau, where he studied medicine. The Franco-Prussian war interrupted his studies, Lazarus serving as assistant surgeon. He is still connected with the army as surgeon of the landwehr. At the close of the war he resumed his studies at the University of Berlin (M.D. 1872). He became assistant to Traube and was detailed to a military hospital as surgeon. At twenty-six he received the Prussian Order of the Crown. Since 1875 he has lectured at Berlin University as privat-docent to the senior medical classes during the summer vacation, receiving the title of "Sanitätsrat" in 1896, and that of professor in 1901.

Lazarus was one of the founders of the Society of Jewish Nurses. He is a collaborator on Eulenburg's "Allgemeine Pathologie und Therapie" (Vienna, 1899), and is the author of: "Handbuch der Krankenpflege," Berlin, 1897; "Pneumatische Therapie," Vienna, 1899; "Muskulöse Insufficienz des Herzens," Leipsic, 1901.

S. F. T. H.

LAZARUS, LEYSER: German Talmudist; born at Filehne 1820; died at Breslau April 16, 1879; brother of Moritz Lazarus. He first attended yeshibot, then went to Sondershausen as fellow teacher of Rabbi Heidenheim, and there attended the gymnasium. After having studied at the University of Berlin, he was elected rabbi of Prenzlau in 1849, and in 1875 became Frankel's successor in the presidency of the Breslau seminary, which position he held until his death.

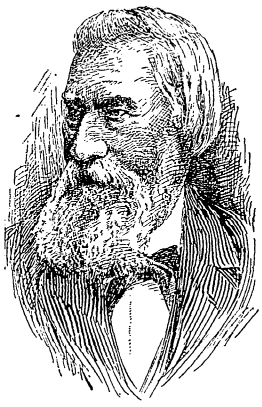
Lazarus combined the knowledge of a Talmudist of the old school with modern education. He was the author of "Die Ethik des Talmuds," Breslau, 1877.

Bibliography: *Jahresbericht des Jüdisch-Theologischen Seminars*, Breslau, 1880.

S. D.

LAZARUS, MORITZ: German philosopher; born at Filehne, in the Prussian province of Posen, Sept. 15, 1824; died at Meran, Tyrol, April 13, 1903; son of Aaron Levin Lazarus, a pupil of Akiba Eger, and himself president of the bet din and the yeshibah of Filehne (died there Feb. 26, 1874). With his brother Leyser, who later became president of the Jewish Theological Seminary of Breslau, Lazarus received his first instruction at the school of the Jewish community of Filehne. Besides he studied with A. Waldenburg, father of the Berlin professor

Ludwig Waldenburg. The first German public school in Filehne (founded 1834) was inaccessible to young Lazarus on account of its denominational character. Thus his early education was confined to the various branches of Jewish knowledge. His parents destined him for a commercial career, and at the age of sixteen he was apprenticed to a merchant of Posen. From the outset, however, this career did not meet with Lazarus' approval. In 1844 he entered the German gymnasium at Brunswick, and left it two years later with the "testimonium maturitatis." From 1846 to 1849 he studied history, philology, and especially philosophy at the University of Berlin. Being a fervent admirer of his teacher Herbart, Lazarus in course of time became a prominent exponent of his philosophy, to which he gave a more idealistic impress. In 1850 he obtained his Ph.D. degree; in the same year he married Sarah Lebenheim.



Moritz Lazarus.

Founds "Völker-psychologie."

Lazarus' first publication, "Die Sittliche Berechtigung Preussens in Deutschland" (Berlin, 1850), appealed to the public at large. In this book he claimed for Prussia the leadership over the other German states on account of her political, philosophical, and religious superiority. From 1850 Lazarus devoted himself especially to psychology. Applying the laws of the psychology of the individual to the nation and to mankind (for these he considered as social beings), Lazarus established a new branch of research which he termed "Völkerpsychologie" (national psychology). In an article entitled "Ueber den Begriff und die Möglichkeit einer Völkerpsychologie als Wissenschaft" (in Prutz's "Deutsches Museum," 1851) he laid the foundation for the study of this science. Nine years later, in collaboration with H. Steinthal, his friend and brother-in-law, Lazarus established the "Zeitschrift für Völkerpsychologie und Sprachwissenschaft" (vols. i.-xx., Berlin, 1860-90; continued as the "Zeitschrift des Vereins für Volkskunde"). From 1856 to 1858 he published his principal work, "Das Leben der Seele in Monographien" (3 vols.; 3d ed., 1883-97). It deals with the principal problems of psychology from the standpoint of the philosophy of Herbart. Written in a popular and easy style, it soon found a large circle of readers.

In 1860 Lazarus was called to the University of Bern as professor of psychology; six years later he returned to Berlin and was appointed teacher of philosophy at the Royal Military Academy (1867); and in 1874 he became professor of philosophy at the university of that city. He was one of the founders of the Schillerstiftung and for many years its president; he was also curator of the Victoria Lyceum. On the occasion of his seventieth birthday Lazarus was honored by the German emperor, the University of Bern, and the Hebrew Union College of Cincinnati. The first conferred upon him the title of "Königlicher Geheimer Regierungsrath"; the second, the degree of doctor of law; and the third, that of doctor of theology. In 1895 Lazarus, after the death of his first wife, married the widow Nahida Ruth Remy, who under his influence had embraced Judaism. During his last years Lazarus lived a retired life in Meran.

Among his shorter philosophical and historical writings may be mentioned: "Ueber den Ursprung der Sitten," 1860; "Ueber die Ideen in der Geschichte," 1861; "Zur Lehre von den Sinneserscheinungen," 1867; "Ein Psychologischer Blick in Unsere Zeit," 1872; "Ideale Fragen," 1878; "Erziehung und Geschichte," 1881; "Ueber die Reize des Spiels," 1883.

Communal Activity.

Lazarus took a very active part in the public and spiritual life of the Prussian Jews. From 1867 to 1892 he was a member of the Repräsentanten-Versammlung of the Jewish congregation of Berlin; from 1882 to 1894, vice-president of the Deutsch-Israelitischer Gemeindebund; from 1867 to 1874, president of the Berlin branch of the Alliance Israélite Universelle; in 1869, president of the Jewish Synod of Leipsic, and in 1871 of that of Augsburg. He was also vice-president of the Russian Auxiliary Committee and of the Rumanian Committee (1869-94). Lazarus was furthermore one of the founders of the Lehranstalt für die Wissenschaft des Judenthums of Berlin, and for many years president of its board of curators. He was a very effective and popular public speaker. His most important lectures on Jews and Judaism were collected and published in his "Treu und Frei," Leipsic, 1887 (contains his speeches at the meetings of the two synods; "Was Heiss National?"; "Unser Standpunkt"; "An die Deutschen Juden"; "Auf Moses Mendelssohn"; "Auf Michael Sachs"; "Aus einer Jüdischen Gemeinde vor Fünfzig Jahren").

Lazarus devoted much time and energy to combating that anti-Semitism which took its rise in Germany about 1878. He was one of the most prominent Jewish apologists of his time. Like many of his contemporaries, he believed (but erroneously) that anti-Semitism was merely a passing fancy, a phenomenon engendered by reactionary times, which could be explained away in writings or addresses. He maintained that the Jews were united only by means of their religious history ("Treu und Frei," p. 77). In this case as in many others, when considering Jewish matters, Lazarus follows the dictates of his desires rather than the interests of the common weal ("Gemeingeist"). Much cited for apologetic purposes is his definition of the concept "nation," as the essential and only objective characteristic of which he takes not the similarity of customs and morals, of territory, religion, and race, but the bond of language.

Of his more important contributions to Jewish literature may be cited: "Der Prophet Jeremias" (1894), a lecture, and "Die Ethik des Judenthums"

“Die Ethik des Judenthums.”

(part i., 1898; 2d ed., 1899; translated into English by Henrietta Szold, and published by the Jewish Publication Society of America, 1900). In the latter work Lazarus takes ethics as the resultant rather than as the basic principle of religion, and, following Kant, establishes as the principle of Jewish ethics in particular the co-equality of God and the law of autonomy, whereby the Jewish conception of God has, of course, been given up. Lazarus fails to show the historical development of the morals of Judaism according to the various sources, as has been pointed out by Herman Cohen (“Das Problem der Jüdischen Sittenlehre, eine Kritik von Lazarus, ‘Ethik des Judenthums,’” in “Monatsschrift,” xliii. 385 *et seq.*).

S. M. Sc.

LAZARUS, MOSES: American merchant; born in New York city June 29, 1813; died there March 9, 1885. He was identified with the sugar-refining industry until 1865; thereafter he lived in retirement. In 1840 he married Esther Nathan, a member of another family prominent in the life of New York city. At his death he left seven children, two of whom, Emma and Josephine, have achieved distinction as authors. Lazarus was a member of the Shearith Israel congregation and was one of the founders of the Knickerbocker Club.

A. H. S.

LAZARUS, NAHIDA RUTH (*née* **Sturmhöfel**): German authoress; born Feb. 3, 1849, at Berlin; a descendant of a German Christian family. She was married first to Dr. Max Remy (in her writings she still signs herself “Nahida Remy”), after whose death she became a convert to Judaism and married Prof. Moritz Lazarus (1895).

Nahida Lazarus has contributed many essays and novels, treating of history, art, and theatrical criticism, sociology, etc., to the feuilletons of the “Vossische Zeitung,” “Monatszeitung,” “Westermann’s Monatshefte,” etc. She is also the authoress of: “Die Rechnung ohne Wirth,” drama, 1870; “Wo die Orangen Blühen,” story, 1872; “Constanze,” drama, 1879; “Die Grafen Eckardstein,” drama, 1880; “Schicksalswege,” 1880; “Domenico,” and “Nationale Gegensätze,” drama, 1884; “Sicilianische Novellen,” 1885; “Liebeszauber,” drama, 1887; “Geheime Gewalten,” 1890; “Das Jüdische Weib,” 1892; “Das Gebet in Bibel und Talmud,” 1892; “Kulturstudien über das Judentum,” 1893; “Humanität im Judentum,” 1894; “Ich Suchte Dich,” an autobiography, 1898; etc. Since the death of her husband she has prepared a volume of his “Lebenserinnerungen.”

LEASE. See LANDLORD AND TENANT.

LEATHER.—Biblical Data: Skins of animals were employed for clothing as soon as man felt the need of covering his body to protect himself against cold and rain. With the advance of civilization such clothing was everywhere replaced by products of the loom. The same was the case among the Hebrews. The “coat of skins” was regarded by them as having been the first kind of clothing, given to man by God Himself (Gen. iii. 21); and the mantle of skins was still worn in the time of the Patriarchs (Gen. xxv. 25). In historic times the use of the mantle of skins is mentioned only in the case of the prophets Elijah and Elisha, who, in intentional contrast to the people of their day, wore the ancient, simple garb (I Kings xix. 13; II Kings i. 8; ii. 8, 13 *et seq.*); indeed, the hairy mantle came in time to be the distinguishing feature of a prophet’s garb (Zech. xiii. 4; Matt. iii. 4, vii. 15).

After the Hebrews had acquired the art of tanning, which must have been at an early date, leather came to be used for a number of other purposes. Among articles of clothing it was employed chiefly for sandals. Leathern girdles are also mentioned (II Kings i. 8 *et al.*). The warrior had a leathern HELMET to protect his head, and his SHIELD also was usually of leather. For utensils in daily use leather is principally employed among nomads, as it was among the ancient Israelites, since receptacles of leather are not liable to be broken and are easily carried about. The original form of a table, as the word שלחן indicates, was a piece of leather, which was spread upon the ground. Pails and all other vessels for holding liquids were made of leather. The leather bucket for drawing water out of a well and the leather flask—consisting of a single skin removed from the animal’s carcass as intact as possible—for holding wine or for transporting water have remained in common use in the Orient down to the present day. Skins of goats and sheep were generally used for these various purposes; more seldom, those of oxen. Concerning tanning, although it was probably familiar to the Hebrews from the oldest times, nothing is said in the Old Testament. Not once is a tanner mentioned.

A. I. BE.

——**In the Talmud:** The Talmud speaks of many articles made of skins (עור); and, as tanning was practised in Talmudic times, it is possible that such articles, or at least some of them, were of leather. The strap (“reẓu‘ah”) is mentioned as serving various purposes. Asses were hobbled with straps; and cows were led by means of straps tied to the horns (Shab. 54b). Women used to tie their hair with leathern straps (*ib.* 57a); and by similar means shoes and sandals were fastened to the feet (Neg. xi. 11), and the tefillin to the head and arm (Men. 35b). Flagellation (“malḳut”) was performed by means of three straps—one of calfskin and two of ass’ skin (Mak. 22b); straps are frequently mentioned as instruments of punishment, especially of children (Yer. Giṭ. i. 43d, *et passim*). It would appear that straps were used to tie up certain objects, as the untying of the strap is often used to designate relaxation (Yer. Bik. i. 64a, *et passim*). It is very probable that sandals generally were made of thick hide; for wooden sandals are indicated as such (Yeb. 101a, *et passim*). Besides shoes, the Talmud speaks of leather hose (“anpilia”), and of a kind of glove and foot-wear of skin for a cripple who was compelled to use his hands in order to move from place to place (*ib.* 102b).

The Mishnah, Kelim xxvi. 5, enumerates the following articles made of leather: a covering for the mule or ass; aprons worn by muleteers and by surgeons to protect their clothes; a cradle-cover; a child's breast-piece to protect it from the scratching of a cat; aprons by which wool-carders and flax-spinners protected themselves from the waste of the wool or the tow of the flax; the pad placed by the porter under his load; and skins used for various purposes by individuals not engaged in any business or trade ("'orot ba'al ha-bayit"). In mishnah 8 of the same chapter, tanners' skins are spoken of; but certainly untanned skins are meant, similar to those referred to in Shab. 49a as having been spread by the tanner for people to sit upon.

A. M. Sel.

LEAVEN (שאור): Fermenting dough (חמץ = "to be sour," "fermented"; Aramaic, חמועא). Leavened bread was probably a common article of food among the ancient Israelites (Hos. vii. 4), while unleavened bread ("maẓẓot") was prepared when food was required at short notice (Gen. xix. 3; I Sam. xxviii. 24). Such bread was designated "the bread of affliction," because of its association with Egyptian slavery (Deut. xvi. 3; Ex. xii. 34–39; see Baking; Bread; Maẓẓah). With few exceptions (Lev. vii. 13, xxiii. 17), leaven was forbidden in sacrificial offerings (Ex. xxiii. 18, xxxiv. 25; Lev. ii. 11, vi. 10; comp. Amos iv. 5; see Sacrifice). In later times, "leaven" and "corruption" were regarded as synonymous terms (Matt. xvi. 6–12; Mark viii. 15; I Cor. v. 6–8). The Rabbis, in speaking of the evil desire ("yeẓer ha-ra'"), called it "the leaven that is in the dough" (Ber. 17a; comp. Gen. R. xxxiv. 12; Yalḳ., Ruth, 601), and the term was thus extensively used by the cabalists of the Middle Ages (Hastings, "Dict. Bible," *s.v.*).

During the festival of Maẓẓot it was strictly forbidden to eat anything leavened, or even to keep such food on one's premises (Ex. xii. 14–20, xiii. 3–7, xxiii. 15, xxxiv. 18; Lev. xxiii. 6; Num. xxviii. 17; Deut. xvi. 3, 4). The punishment for eating leavened bread during these seven days was "karet" (Ker. 2a), and for preparing it, stripes (Maimonides, "Yad," Ḥameẓ, i. 1–3). The reason for this prohibition is given in Ex. xii. 34–39, although other reasons have been advanced by modern scholars (see Maẓẓah; Passover).

Kinds of Leaven.

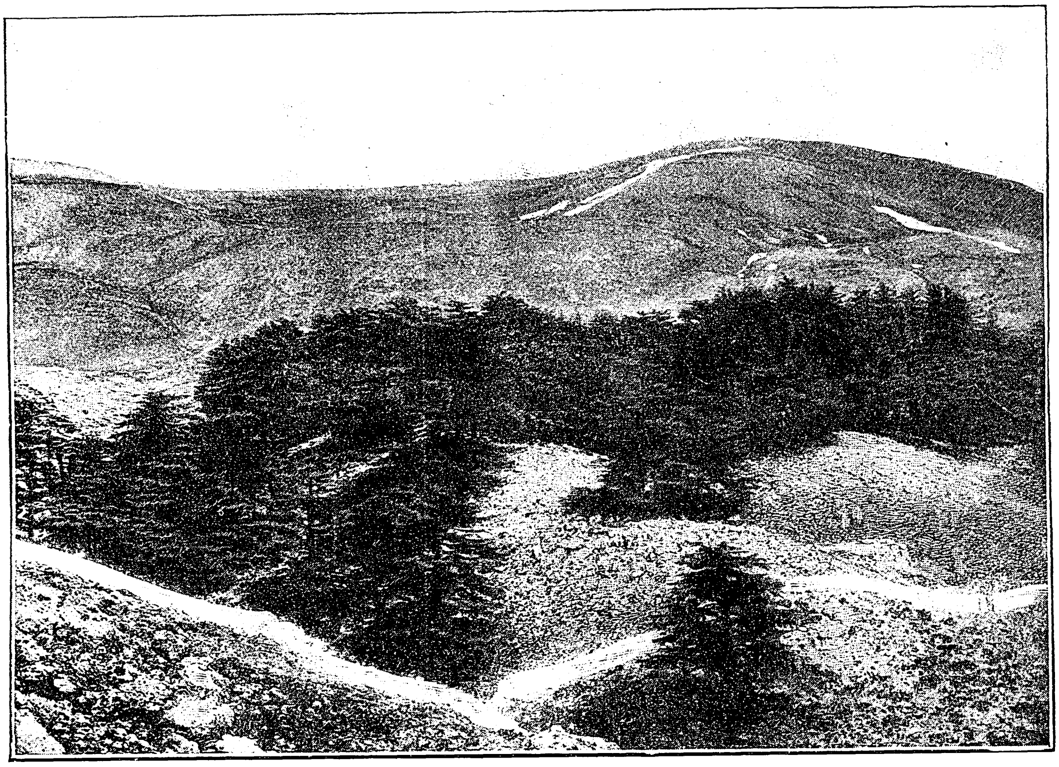
With reference to this prohibition three kinds of leaven were distinguished by the Rabbis: (1) leavened food prepared from the five kinds of grain, wheat, barley, oats, corn, and spelt ("ḥameẓ gamur"); (2) food in which leaven of the first kind was mixed ("ta'arubot"); and (3) any leavened substance unfit for food, *e.g.*, the dough which the cooks used to place over the pot or that which the bookbinders used for pasting the leaves ("ḥameẓ nuḳsheh"). Leaven of the first kind carried with it the punishment of karet; of the second, stripes; while that of the third kind, being prohibited only by a rabbinical decree, carried no punishment with it (Pes. 43a; "Yad," *l.c.* 6; Shulḥan 'Aruk, Oraḥ Ḥayyim, 442, 1; Ḥayye Adam, 121, 1).

An Israelite may not derive any benefit from unleavened bread during Passover. He may not feed his animal with it, nor may he burn it and then make use of the fire (Pes. 5b, 21b). The Rabbis, in order to punish him who did not remove all leaven from his house before the holy day, went still further in their restrictions, and decreed that the use or benefit from any leaven belonging to an Israelite left over after the holyday was forever prohibited (*ib.* 28a, 29a; "Yad," *l.c.* i. 4). If, however, the Israelite had sold or given all his leaven to a non-Jew before Passover, it might be bought back and used by the Jew after Passover (Tosef., Pes. ii. 5, 6; Rosh, *ib.* ii. 4). It has thus become customary for one who has much leaven left to sell it to a non-Jew before Passover.

Sale of Leaven to Gentiles Before Passover.

A contract is drawn up in legal form in which all the details are set forth, and earnest-money is accepted; and the key of the room in which the leaven is stored up is delivered to the non-Jew. A common custom, followed by a great many communities, is for all the Jews of the town to make the rabbi the agent for selling all their leaven to a non-Jew. A few days before the festival every Israelite comes to the rabbi's house and signs a deed of sale and enters into the symbolical form of sale ("ḳinyan") with the rabbi; and then the rabbi draws up a separate deed for the non-Jew, to whom all the other deeds are delivered. It is also necessary to rent to the non-Jew the room in which the leaven is stored (Sha'are Teshubah to Oraḥ Ḥayyim, 448, 3; Ḳiẓẓur Shulḥan 'Aruk, 114).

If a particle of leaven fall into a boiling pot during Passover, even though the pot contain more than sixty times the amount of leaven, all the food in the pot is prohibited, and the pot itself can not be used again during the festival (Pes. 30a; "Yad," *l.c.* i. 5). If, however, the leaven fall into the pot before Passover, and the amount in the pot is sixty times the amount of leaven, the food may be eaten on the festival. Dishes or pots which have been used during the year for articles containing leaven can not be used during the festival, unless they have gone through some process of purification. Earthenware vessels which have been used for leaven must be burned again in the potter's kiln, while vessels made of metal may be used after they have undergone a process of purification ("hag'alah"). Vessels used on the fire, such as spits or broilers, must be made red hot before they can be used for Passover, while vessels that have been used in cooking, such as pots and pans, must be boiled in water ('Ab. Zarah 75b; Rosh Pes. ii. 7; "Yad," *l.c.* v. 21–26; Oraḥ Ḥayyim, 451). Dishes, spoons, and forks are made fit for use on Passover by pouring hot water over them. The custom, however, is to have these as well as all vessels, even such as have been used only for cold food or drink, boiled in the same manner as vessels used in cooking. Large vessels, such as can not be placed in other vessels in order to have them boiled, can be purified by being passed over a hot stone while hot water is being poured over them (Oraḥ Ḥayyim, 451, 6, and Isserles' note). Wooden tables upon which hot vessels containing leaven have been placed should be scrubbed with hot water, and, as is usually the custom, rubbed over with a hot stone. Polished tables which can not be washed in this manner must be covered with heavy cloth for Passover, so that the heat of the dishes placed upon them shall not reach the surface (Oraḥ Ḥayyim, 451, 20, and Be'er Heṭeb, *ad loc.*). Some rabbis are of the opinion that glassware needs no special purification for Passover; others, that no process of purification can make it fit for use (*ib.* 26, and "Magen Abraham," *ad loc.*). In some countries it is the custom to leave glasses in water for three successive days, changing the water every day, in order to make them fit for use on the festival (Ḥayye Adam, 125, 22). In order to avoid all doubt, observant Jews provide themselves with separate sets of dishes and kitchen utensils for Passover, which are stored away from year to year, being used only during the festival.



The Forest of Lebanon.
(From a photograph.)

Search for Leaven Before Passover.

Many days before Passover the pious Jewish housewife commences her house-cleaning for the festival. On the eve of the fourteenth of Nisan, although most Jewish houses are then thoroughly free from all leaven, the master of the house proceeds with the ceremony of searching for leaven ("bediḳat ḥameẓ"; Pes. 2a; see Bediḳah). Pieces of bread are placed in conspicuous places which can not be overlooked, and with a wax candle in his hand the master of the house begins the search, after pronouncing the following blessing: "Blessed art thou . . . and commandest us concerning the removal of leavened bread" (*ib.* 7b). After he has searched all the rooms and has collected all the morsels of leaven in a wooden spoon, he carefully ties them up in a rag and stores them away in a place which can not be reached by rats, pronouncing the following formula in Aramaic or in any language which he understands best: "Let all leaven that is in my premises which I have not seen and which I have not removed be as of no avail and be as the dust of the ground." On the next morning leaven may be eaten only until the fourth hour of the day (*ib.* 12b); and soon after that time all the remaining leaven is carefully collected and burned, when the master of the house repeats the formula, with a few alterations, which he recited on the previous evening (Oraḥ Ḥayyim, 431–437).

Any leaven found in the house during Passover, if discovered on the week-days of the holy day, should be immediately burned; if found on the holy day itself it should be covered with a vessel and burned in the evening. While it is being burned the above-mentioned blessing should be pronounced (Pes. 6a; "Yad," *l.c.* iii. 8; Oraḥ Ḥayyim, 446).

LEAVENWORTH. See Kansas.

LEBANON (לבנון): Name of a range of mountains in Syria. In prose, with the exception of II

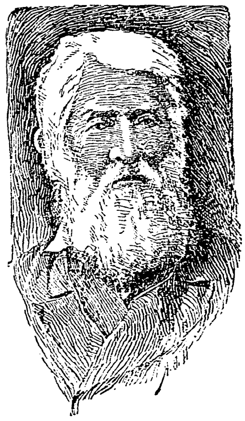
Chron. ii. 8 (Hebr.), the name is always written with the article, while in poetry it occurs as often without as with the article. The name (= "white") is due either to the snow which covers its peaks for the greater part of the year, and to which Jer. xviii. 14 alludes, or to the calcareous formations of the upper ranges. The topography of the Lebanon is very vaguely indicated in the Bible; it appears only as the great northern limit of the land assigned to Israel (Deut. i. 7, xi. 24; Josh. i. 4), and is mentioned as being not far from the Sea of Joppa (Ezra iii. 7). It was fully described by Greek geographers, among others by Strabo (xvi. 754): it consists of two parallel ranges running south-southwest and north-northeast, the western range being called "Lebanon," and the eastern, "Anti-Lebanon"; Mt. Hermon is the highest peak in the latter range. Between the two ranges is a valley which the Bible calls "the valley of Lebanon," where the city of Baal-gad was situated (Josh. xii. 7); the Greeks gave the name "Cœle-Syria" to the district. The Lebanon juts into the Mediterranean south of Tyre, where the rocks form an ascent to the top of the mountain; hence the Talmudic name סולמא דצור (= "the ladder of Tyre"; Yer. 'Ab. Zarah i. 9; 'Er. 80a; Beẓah 25b; comp. the Κλίμαξ Τυρίων of Josephus, "B. J." ii. 10, § 2).

Proverbial Fertility.

"Lebanon" also in the Bible includes the Anti-Lebanon (comp. Josh. xiii. 5, "all Lebanon toward the sunrising," and Cant. vii. 5 [A. V. 4], "the tower of Lebanon which looketh toward Damascus"; in both verses the Anti-Lebanon being meant). At the time of Joshua, the Lebanon was inhabited by the Hivites and Giblites, and though it formed a part of the land assigned to the Israelites it was never conquered by them (Josh. xiii. 5; Judges iii. 1-3). In the time of Solomon, the Lebanon district seems to have been in the possession of Hiram, King of Tyre (I Kings v. 6; II Chron. ii. 8). Nevertheless, Solomon appears to have erected buildings in the Lebanon (I Kings ix. 19; II Chron. viii. 6). Owing to its extraordinary fertility, the Lebanon is the mountain range most frequently mentioned in the Bible. Moses, when looking over the promised land, mentioned the Lebanon in particular (Deut. iii. 25). It was famous for its fruit (Ps. lxxii. 16), its wine (Hosea xiv. 8), and especially for its cedars, which furnished wood for the Temple (I Kings v. 6; Ezra iii. 7; Ps. xxix. 5, civ. 16; *passim*). The range had also an abundance of fir-trees and algum-trees (II Chron. ii. 8), and the thistle of the Lebanon is once referred to (*ib.* xxv. 18). The "smell of Lebanon" is spoken of in Hosea xiv. 7 and Cant. iv. 11, and by the Talmudists. "At the arrival of the Messiah, the young people of Israel will exhale an odor like that of Lebanon" (Ber. 43b). Lebanon is referred to as "Eden" by Ezekiel (xxxi. 16), and Isaiah speaks of the "glory of Lebanon" (Isa. lx. 13). It is for this reason that "Lebanon" is taken by the Prophets to designate Jerusalem (Isa. x. 34; Zech. xi. 1), while the Rabbis understood it to refer to the Temple of Jerusalem, supposing that it was so called because it cleanses Israel of sin (lit. "it whitened their sins"; Yoma 39a).

E. G. H. M. Sel.

LEBENSOHN, ABRAHAM DOB BÄR BEN ḤAYYIM (surnamed **Michailishker**; pseudonym, **Adam**): Russian Hebraist, poet, and grammarian; born in Wilna, Russia, about 1789; died there Nov. 19, 1878. Like all Jewish boys of that time in Russia he was educated as a Talmudist, but became interested in Hebrew grammar and punctuation when, at the age of eleven, he was instructed in reading in public the weekly portions of the Law. He was married, according to the custom of those times, as soon as he had celebrated his bar miẓwah; and he spent the following eight years with his wife's parents in Michailishok, government of Wilna. This gave him the surname "Michailishker," by which he was popularly known; and it also accounts for the last letter in his pen-name "Adam" (formed from the initials of Abraham Dob Michailishker), while the family name "Lebensohn," which he adopted, is a literal translation of "ben Ḥayyim." He afterward lived about four years in Osmiyany, in the government of Wilna, where he attempted to establish himself as a merchant. He was now an accomplished rabbinic scholar; but he devoted most of his leisure time to the study of Hebrew poetical and grammatical works. On returning to his native city, where he remained for the rest of his life, he engaged in teaching, a profession which he followed until his old age, except for about fifteen years in which he was engaged in the business of a broker.



Abraham Lebensohn.

As Poet.

His first poetical work to be published was the "Shir Ḥabibim" (Wilna, 1822), in honor of the marriage of Count Tyszkiewicz, one of the most powerful noblemen of Lithuania. It was followed by "Ebel Kabed" (*ib.* 1825), an elegy on the death of R. Saul Katzenellenbogen; this established the author's reputation as a Hebrew poet. The publication of the first volume of his poetry, entitled "Shire Sefat Ḳodesh" (Leipsic, 1842; 2d ed. Wilna, 1863), marks the beginning of a new epoch in Neo-Hebrew literature in Russia. It is the first poetical work of the rejuvenated literature that can be favorably compared with the works of that nature which were produced in western European countries. It was received with unbounded enthusiasm. Thousands of young men in sympathy with the Haskalah movement, of which Lebensohn became the leading exponent in Lithuania, learned to recite the songs of "Shire Sefat Ḳodesh" by heart; and the fame of the author spread to all centers of Hebrew learning.

When Sir Moses Montefiore visited Wilna in 1846 Lebensohn prepared for his perusal an article on the condition of the Jews in Russia and the means by which it was to be improved. This interesting document, embodying the views held by the Maskilim of that period, summarized the evils from which the Jews suffered and boldly stated that they were themselves to blame for their troubles. Lack of education and of skill in handicrafts, too early marriages, the ignorance of the rabbis and teachers, and extravagance were described as the four "abot neziḳin" or chief faults; and relief was proposed, as was customary in those times, through governmental intervention (see I. M. Dick, "Ha-Oraḥ," and Lebensohn, "Yeter Shire Adam," pp. 67 *et seq.*).

As Commentator.

In 1848 Lebensohn was made one of the principal teachers in the newly established rabbinical school of Wilna, a position which he creditably filled for nearly twenty years, until he was forced by age and impaired eyesight to relinquish it. He was succeeded by his son-in-law Joshua Steinberg. In 1848, too, he began, conjointly with the bibliographer Benjacob, the publication of a new edition of the Bible, with a German translation, himself adding valuable glosses to the "bi'ur" ("Miḳra'e Ḳodesh," Wilna, 1848–53). Some of his commentaries on the Bible were later printed separately as a supplement to that edition ("Bi'urim Ḥadashim," *ib.* 1858). A second volume of "Shire Sefat Ḳodesh" appeared in Wilna in 1856 (2d ed., *ib.* 1869); and in 1869 was published "Yeter Shire Adam," the third volume of the same work, containing also poems written by his son Micah Joseph Lebensohn. The most important of his later works are the allegorical drama "Emet we-Emunah" (*ib.* 1867; 2d ed., *ib.* 1870), which has for its theme the harmonization of science and religion; and "Yitron le-Adam" (*ib.* 1874), a commentary on Ben-Ze'eb's well-known Hebrew grammar, "Talmud Leshon 'Ibri," with which it has been often reprinted. A new edition of the three volumes of "Shire Sefat Ḳodesh" appeared in Wilna in 1895.

Lebensohn was the author of several other, unimportant, works and of numerous articles in the periodicals. He exercised almost as much influence by his powerful personality as by his literary efforts, and was recognized in his later years as the pioneer of haskalah in northwestern Russia. The Maskilim of Wilna considered themselves as his pupils, while the fanatics saw in him the embodiment of all the objectionable features of the progressist movement.

He had two sons, Micah Joseph, cited above, and **Aryeh Löb,** who was a prominent business man in Wilna.

H. R. P. Wi.

LEBENSOHN, MICAH JOSEPH: Russian Hebrew poet; born in Wilna, Russia, Feb. 22, 1828; died there Feb. 17, 1852. His father, the poet Abraham Bär Lebensohn, implanted in him the love of Hebrew poetry, and Micah Joseph began very early to translate and to compose Hebrew songs. He suffered from consumption during the last five or six years of his short life. In 1849 he was in Berlin, and later went to Salzbrunn and other watering-places, where he vainly sought relief from the terrible disease which had attacked him. About the end of 1850 he abandoned all hope of recovery and returned to Wilna, where he lingered until his death.

Lebensohn's poetical works are: "Harisut Troya" (Wilna, 1849; 2d ed., *ib.* 1869), a translation of the third and fourth books of Vergil's "Æneid" after Schiller's German translation; "Shire Bat Ẓiyyon" (*ib.* 1851; 2d ed., *ib.* 1869), epic poems on Jewish subjects, of which his brother-in-law, Joshua Steinberg, published a German translation entitled "Gesänge Zion's" (*ib.* 1859); and "Kinnor Bat Ẓiyyon" (*ib.* 1870), a second volume of the foregoing songs, printed posthumously by his father. The most noted elegies on his death are that by his father, entitled "Mikal Dim'ah" (in the second part of "Shire Sefat Ḳodesh") and J. L. Gordon's allegorical drama, "Ho Aḥ," which is placed in the first part of "Kol Shire Yehudah."

Lebensohn's poetry surpasses that of his father, and is characterized by a deep pathos and a beauty of expression which are rare in Neo-Hebrew verse. It is also noted for its expression of the young poet's strong longing for life and of the dread of an early dissolution which preyed on his mind.

LEBERT (LEWY), HERMANN: German physician; born at Breslau June 9, 1813; died at Bex, Canton Waadt, Switzerland, Aug. 1, 1878. He studied medicine at the universities of Berlin and Zurich, graduating in 1834, and spent the following year traveling through Switzerland engaged in botanical researches. In 1836 he took a post-graduate course in Paris, and in 1838 settled in Bex as a physician. The winter months of 1842–45 he spent in Paris, occupied with studies in comparative anatomy. During the winter of 1845–46 he lived in Berlin, and in 1846 he settled in Paris.

In 1853 Lebert was elected professor of medicine at Zurich University, which position he held for six years, when he was called in a similar capacity to the University of Breslau. Resigning in 1874 he spent the last four years of his life in Nice, Vevey, and Bex.

Lebert added greatly to the knowledge of pathology and biology. He wrote numerous essays in the medical journals; among his independent works may be mentioned: "Physiologie Pathologique," Paris, 1845; "Traité Pratique des Maladies Scrofuleuses et Tuberculeuses," *ib.* 1849 (German transl. Stuttgart, 1851); "Traité Pratique des Maladies Cancéreuses," Paris, 1851; "Traité d'Anatomie Pathologique Générale et Spéciale," *ib.* 1852–64; "Handbuch der Praktischen Medicin," Tübingen, 1855; "Handbuch der Allgemeinen Pathologie und Therapie," *ib.* 1865; "Grundzüge der Aerztlichen Praxis," *ib.* 1866; "Klinik der Brustkrankheiten," Tübingen, 1874; "Verzeichniss der Schlesischen Spinnen," *ib.* 1875; "Bau und Leben der Spinnen," Berlin, 1878; "Die Krankheiten des Magens," Tübingen, 1878.

His family name was "Lewy" (or "Levy"), which he changed to "Lebert" when he adopted Christianity.

LEBERT, SIEGMUND (SIEGMUND LEVY): Music-teacher and writer on music; born at Ludwigsburg, Württemberg, Dec. 12, 1822; died at Stuttgart Dec. 8, 1884. After completing his studies under Tomaschek, Weber, Tedesco, and Proksch, at Prague, he taught music at Munich. In conjunction with Faiszt, Brachmann, Laiblin, Stark, and Speidel, he founded (1856–57) the Stuttgart Conservatory. Lebert was highly esteemed as a music-teacher and published a large number of works on music, of which the following are the most important: "Grosse Klavierschule," published in cooperation with Stark (several editions; it has been translated into English, French, Italian, and Russian); an edition of Clementi's "Gradus ad Parnassum"; an edition of pianoforte classics (in collaboration with Faiszt, Ignaz Lachner, Liszt, and others).

The University of Tübingen conferred on Lebert the degree of doctor of philosophy, and the King of Württemberg bestowed on him the title of professor. His methods have gradually come to be regarded as somewhat laborious and pedantic. Nevertheless several able pianists were graduated from his school, among whom Anna Mehlig is one of the most distinguished.

LEBRECHT, FÜRCHTEGOTT: German educator; born at Memmelbach, Bavaria, Nov. 16, 1800; died at Berlin, Sept. 1, 1876. He studied at Fürth, and later at Presburg under Moses Sofer, devoting himself mainly to the Talmud and to the Hebrew literature of the Middle Ages. In 1827 he went to Halle, where he received a thorough grammatical training under Gesenius, whom in turn he aided in Neo-Hebraic literature. After a few years spent at Halle, he went to Berlin, where he devoted himself to literary work. He secured a position as teacher at the Lehrer-Seminar (founded under the direction of Zunz in 1840), and continued there until 1848. In 1856 he became head teacher at the Veitel Heine Ephraim'sche Lehranstalt (Bet ha-Midrash), a position he retained until his death, serving also as librarian. This institution had been established in 1774, but was not maintained on a high pedagogical plane until Lebrecht introduced modern educational methods and elevated it to a level of efficiency that attracted to it wide-spread attention.

Lebrecht was a constant contributor to Jewish periodicals, such as Geiger's "Jüd. Zeit.," Fürst's "Der Orient," the "Historische Jahrbücher für Kritik," the "Allg. Zeit. des Jud."; also to the "Vossische Zeitung" and the "Spenersche Zeitung." In 1862 he published his "Handschriften und Erste Ausgaben des Babylonischen Talmud" in the "Wissenschaftliche Blätter aus der Veitel Heine Ephraim'schen Lehranstalt," and two years later his "Verbesserter Kritische Lesarten und Erklärungen zum Talmud," Berlin, 1864. In 1874 his "Adelheid Zunz" was reprinted from the "Vossische Zeitung." His last work (posthumously published) was his "Bethar, die Fragliche Stadt im Hadrianisch-Jüdischen Kriege: Ein 1700 Jähriges Missverstädniss; Beitrag zur Gesch. und Geographie des Alten Palästina," Berlin, 1877, an enlarged reprint of his article in Berliner's "Magazin," 1876, pp. 27–40, 77–93, the principal addition being a historical appendix. Together with Johann B. Biesenthal he edited David Ḳimḥi's "Sefer Shorashim" (Berlin, 1847), and to A. Asher's edition of Benjamin of Tudela (vol. ii. London, 1841) he contributed an essay on the state of the califate of Bagdad during the latter half of the 12th century. Several of his essays—"Juden als Arabische Dichter," "Die Oppenheimer'sche Bibliothek," "Jehuda ben Koreisch, der Erste Lexicograph der Bibel"—were published in the "Orient, Lit." 1841–44. His pamphlet, "Zum 150. Geburtstage Moses Mendelssohn's," was edited by Dr. A. Berliner (Berlin, 1878).

LECCE: Town of southern Italy, capital of the province of the same name (formerly Terra d'Otranto); contained one of the most prominent Jewish settlements in the Neapolitan kingdom before their expulsion. There are traces of the existence of Jews in Lecce at the time of the Normans (G. T. Tanzi, "Gli Statuti della Città di Lecce," p. 19, Lecce, 1898). There seem to be no special records concerning the Jews until the fifteenth century. They occupied themselves at one time with dyeing, cattle-raising, and money-lending; the last-named occupation, however, was prohibited in 1471. The same restrictions were put upon them as in most other lands: they could not own real estate or engage in the higher callings, and they were compelled to wear distinguishing badges on their dress. Still, they were under the protection of the law and seem to have been free from persecutions, as were the other Jewish communities throughout Italy. But when Giannantonio del Balzo-Orsini, the last Count of Lecce, died in 1463, and the city came under the direct rule of Ferdinand I., King of Aragon, a violent outbreak against the Jews occurred, in which the ghetto was sacked, several Jews were killed, and the remainder driven out of the place. The city then excused itself before the king by throwing all the blame upon the Albigenses and other foreigners who lived there. The king issued a decree June 20, 1464, ordering the Jews to be called back, and pointing out the injuries the city had suffered through their expulsion. On March 21, 1495, a mob invaded and set fire to the ghetto, and killed a great number of Jews; the few that saved their lives scattered throughout the kingdom. The synagogue was demolished and a church erected on its site. The Jews probably never returned to Lecce, as they were expelled from the whole Neapolitan kingdom in 1540. Lecce was the birthplace of the grammarian Abraham de Balmes ben Meïr (1450–1523).

LE-DAWID BARUK (לדוד ברוך): Familiar title for Ps. cxliv., from the initial words of the Hebrew text, with especial reference to its employment, together with Ps. lxvii., as an introduction to the evening prayer at the close of the Sabbath. Alone among the sections of the Hebrew ritual chanted to traditional tunes, this psalm is always set to some melody in the bright and cheerful major mode.

If one rather poor eighteenth-century air preserved in south-German congregations be left out of consideration, there is a remarkable fundamental similarity in the various chants utilized by the German and Polish Jews, by the Spanish and Portuguese according to the Dutch and West-Indian tradition, and by the Italians and the Jews of the Orient. This basal similarity especially struck the traveler Moses Israel Ḥazzan ("Kerak shel Romi," p. 4b, Leghorn, 1876). The Ashkenazic and Sephardic versions likewise agree in the change from the major mode to the minor as the end of the verse is approached. This is possibly an instance of the intentional application of the teaching of Ps. cxxxvii. 6, which has affected all of the comparatively few blithe strains in the traditional melody of Jewish public worship. The influence of the originally northern melody on the southern usage is paralleled by that of the tune Addir Hu, of similar date.

Local variants are numerous. Those in the tradition of Slavonic and Teutonic regions are due largely to the necessity of transposing the second phrase of the chant to the upper or the lower octave, according as the psalm is started in the range of a bass or a tenor voice. The chief forms of the northern chant are shown in the transcription below, at the same pitch however. The first (A) is rather favored among German, the second (B) among Polish, congregations. The southern chant (C) first appears as the subject of the setting of Ps. ix. in Benedetto Marcello's "Estro Poetico-armonico," or "Parafrasi Sopra li Salmi" (Venice, 1724), where it is headed "Intonazione degli Ebrei Spagnuoli Sopra il Salmo le-David Baruk." This intonation exhibits a more marked simplicity than the two southern versions (obviously variants diverging from it) quoted by Baer in "Ba'al Tefillah," No. 714. These developments are due to the personal variations of successive cantors, a source of change from which the congregational use of the chant customary among the northern Jews has preserved their melody to a marked extent.

LEDERER, ABRAHAM: Hungarian educator and writer; born Jan. 9, 1827, at Libochowitz, Bohemia. In 1840 he went to Prague, where he studied at the Teachers' Seminary and at the university. In 1853 he taught at Lundenburg, Moravia; and in 1854 he accepted the post of director of the Jewish school at Tata, Hungary, whence he was called to the Israelitische Musterschule in 1857, becoming in the following year director of the Israelitic Teachers' Seminary at Budapest.

Lederer has contributed much to pedagogics in general, and to the training of Jewish teachers in Hungary in particular. He is the founder and organizer of the Jewish normal school ("Landes-Präparandie"), of the Jewish National Teachers' Association, of the national pedagogical museum, of the Women's Industrial Association, and of the vacation colony for children. In 1869 the government commissioned him to translate Hungarian text-books into German, and appointed him director of the state seminaries and a member of the supreme board of education. Of his works the following are noteworthy: "Heimathskunde" (Pest, 1859); "Erziehungslehre für Israelitische Eltern und Lehrer" (*ib.* 1865); "Leitfaden und Lesebuch für Lehrer" (*ib.* 1870); "Methodischer Leitfaden zum Deutschen Sprachunterricht" (Budapest, 1873); "Társadalmi Pädagogia" (*ib.* 1885), on social pedagogics; "Hires Emberek Ismertető Jelei" ("Charakteristiken Berühmter Männer," 1896); "A Testi Büntetés Lélektana" (1901), on the psychology of corporal punishment; and "Iskolai Kirándulás a Csillagos Egbe" (1903), a guide to instruction in astronomy in schools.

LEDERER, JOACHIM K.: Austrian playwright; born at Prague Aug. 28, 1808; died at Dresden July 31, 1876. Lederer received only a meager education under a private tutor. He began the study of medicine, but after a year's experience discarded it for law, and received his degree of D.C.L. He found, however, that, being a Jew, there was no prospect for him as a professor in any of the universities, and, the practise of law offering no attractions to him, he devoted himself to dramatic authorship. He developed great skill in reproducing, with keen humor and a touch of satire that won for him an assured place on the Austrian stage, the peculiar characteristics of his countrymen. Among his most successful comedies are: "Häusliche Wirren," "Geistige Liebe," "Die Weiblichen Studenten," "Eine Rettende That," "Die Zwei Kranken," and "Die Kranken Doctoren," in writing the last of which W. M. Gerle was collaborator.

LEE, SIDNEY: English editor; born in London Dec. 5, 1859; educated at City of London School and Balliol College, Oxford. Almost immediately on leaving college he became associated with Sir Leslie Stephen as assistant editor of the "Dictionary of National Biography" for the first twenty-one volumes (1881–90). For the following five he was joint editor, and for vols. xxvii. to lxiii. and the supplement and index (41 vols. in all) he was sole editor of this national undertaking, which was finished in 1903. In recognition of his work he was made honorary doctor of letters by the Victoria University in 1900. Lee visited the United States on a lecturing tour in 1903.

Besides his work on the dictionary he has edited Lord Berner's translation of "Huon of Bordeaux," 1883–85; Lord Herbert of Cherbury's "Autobiography," 1886; and a facsimile of the first folio of Shakespeare, 1902. Of the lives contributed by him to the "Dictionary of National Biography" two have been issued separately and have established themselves as standard biographies, namely: "William Shakespeare," 1898; and "Queen Victoria," 1902.

LEEDS: Manufacturing town in Yorkshire, England. It possessed a small Jewish community before the year 1840, divine service being held in a small room in Bridge street, little better than a loft, access to which was gained by means of a ladder. On May 12, 1840, a plot of land in the Gelderd road was granted by the Earl of Cardigan for a cemetery, which plot was afterward enlarged, and now belongs to the Old Hebrew Congregation (the "Great Synagogue") in Belgrave street. The first Jewish wedding in Leeds took place on June 1, 1842.

The First Synagogue.

Divine service continued to be held in Bridge street until 1846, when a room in Back Rockingham street was transformed into a temporary synagogue, mainly through the instrumentality of the late Gabriel Davis, whose nephew, Edward Davis, continued to interest himself in the affairs of the synagogue till his death in 1895. In 1850 the rabbi was the Rev. Ephraim Cohen. In 1860 the congregation removed to a new building in Belgrave street. This soon became too small; and in 1877 the present synagogue was erected on a site part of which had been covered by the original structure.

Meanwhile the community was developing in other directions. In 1869 a ḥebra was formed in St. Alban's street, which became a congregation in 1873, the members at the same time acquiring a cemetery situated in the Gelderd road, which was extended in 1895 by an additional purchase of land adjoining the original plot. In 1883 a large private mansion standing in spacious grounds in St. John's place, New Briggate, was acquired and adapted for use as a synagogue. The congregation continued to worship there till 1894, when the house was demolished, and the present building was erected on the site, a convenient room for a school being provided in the basement.

Next in order of seniority is the Central Congregation, founded in 1887. This also was developed from a ḥebra, and was originally known as the Maiempoler Congregation. A cemetery was also acquired on a site adjoining that of the New Briggate congregation. In 1898 the congregation removed to its present synagogue in Templar street.

In 1876 an association called the "Polish Ḥebra" had been formed, the members of which in 1890 resolved to form themselves into a new congregation. Purchasing a chapel with a good basement in Byron street, they made the necessary alterations, and opened the building for divine service. For some time it was known as the "Polish Congregation," but is now usually called the "Byron Street Congregation." In 1893 the members acquired a plot of ground in Farnley, which was consecrated as a cemetery.

Bet ha-Midrash.

The bet ha-midrash began in 1873 with a small room for the purposes of prayer and study. From this developed the present Bet ha-Midrash ha-Gadol, which was opened in Hope street in 1895, in the heart of the Jewish quarter. Recently there has been a movement to constitute it a congregation. A plot of land has been purchased adjoining the cemetery belonging to the New Briggate congregation, and a wall enclosing the site has been built.

Classes for religious education were at first formed in connection with the Great Synagogue, but, these proving inadequate, in 1876 the Talmud Torah school for the free education of poor boys was founded. No provision, however, was made for girls. When the Rev. M. Abrahams arrived in Leeds classes for boys and girls were formed in connection with the Belgrave Street Synagogue. The accommodation proving insufficient, the Leeds school board was approached, and it agreed to grant the use of one of its schools for the purpose of religious education. In 1888 the Leeds Hebrew and religion classes for boys and girls were opened in connection with the board school in Gower street, Leylands. Four of the board schools are attended almost exclusively by Jewish children; and the school in Gower street showed the most successful record of attendance (percentage 99.47) in the United Kingdom during the year ending April, 1901.

Education and Philanthropy.

The Jewish Board of Guardians was founded in 1878. For many years it has been presided over by Paul Hirsch. In its benevolent work it has been assisted by two Jewish ladies' societies; by the Dorcas Society, founded in 1897 to provide clothing for the poor; by the Biḳḳur Ḥolim Society, founded in 1876 for the relief of the indigent ailing; by the Haknasat Oreḥim, or Poor Jews' Shelter, founded in 1890; and by the Kasher Kitchen, founded in 1901. There is also a Ḥebra Ḳaddisha, founded in 1895, in connection with the Belgrave Street Synagogue. In addition to these societies there exist the Hebrew Literary Society and the Leeds Jewish Young Men's Association. About 1,800 working men belong to the Amalgamated Jewish Tailors, Machinists, and Pressers' Trade Union, which is in part a friendly society and mainly supports a new cemetery in Farnley, opened in 1901, and adjoining that belonging to the Byron Street Congregation. There are also a branch of the Anglo-Jewish Association, a B'nai Zion Association, several Zionist Associations, a company of the Jewish Lads' Brigade, and seven friendly societies.

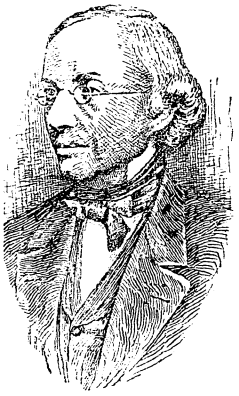
Paul Hirsch, the first Jewish justice of the peace in Leeds, was elevated to the magisterial bench in 1899. M. Zossesheim, a former vice-president of the chamber of commerce, is consul for Italy.

The Jewish community of Leeds, numbering about 20,000 in a total population of 428,953, is the third largest in the United Kingdom, being exceeded by those of London and Manchester only.

J. M. A.

LEESER, ISAAC: American rabbi, author, translator, editor, and publisher; pioneer of the

Jewish pulpit in the United States, and founder of the Jewish press of America; born at Neuenkirchen, in the province of Westphalia, Prussia, Dec. 12, 1806; died at Philadelphia, Pa., Feb. 1, 1868. Educated at the gymnasium of Münster, he was well grounded in Latin, German, and Hebrew, besides having studied the Talmud tractates Beẓah, Baba Meẓi'a, and a part of Ḥullin and Baba Batra under Hebrew masters. At the age of seventeen he emigrated to America, arriving at Richmond, Va., in May, 1824. His uncle, Zalma Rehiné, a respected merchant of that city, sent the youth to a private school; but after ten weeks the school was closed, and for the next five years Leeser was employed in his uncle's counting-room. Unfavorable as were the circumstances for a growth of Jewish knowledge, the young man showed his bent by voluntarily assisting the ḥazzan to teach religion on Saturdays and Sundays and also by appearing in the public prints from time to time in defense of Judaism when assailed.



Isaac Leeser.

Elected at Philadelphia.

In 1828 an article in the "London Quarterly" reflecting on the Jews was answered by Leeser in the columns of the "Richmond Whig"; and the reply attracted the attention of the Jewish communities of Richmond and Philadelphia. About that time (Oct. 18, 1828) the Rev. Abraham I. Keys, ḥazzan of the Congregation Mikveh Israel of the latter city, died, and a successor was needed. Leeser was induced to accept the congregation's invitation to present himself as a candidate. His own view of the situation is given in a letter written by him six years later to the chief rabbi Solomon Hirschel of London: "Knowing my own want of proper qualification, I would never have consented to serve, if others more fitting in point of standing, information, or other qualities had been here; but this not being the case (as is proved by there being yet two congregations at least in this country without a regular ḥazzan), I consented to serve."

In Aug., 1829, Leeser went to Philadelphia with the manuscript of his first book ("The Jews and the Mosaic Law") in his pocket and great thoughts for Israel in his mind. Up to that time the ḥazzanim in America had been merely precentors. There was, however, a new movement in Europe. The Hamburg Temple had put forward Gotthold Salomon; and preaching in German had become the Reformed fashion, while the new Conservatives had met it by electing to the Hamburg rabbinate Bernays, who also delivered sermons in the vernacular. Something of this ferment had leavened the thoughts of Leeser; and he hoped to transform the reading-desk into the pulpit and the teacher's rod into the editorial wand.

On June 2, 1830, he delivered his first English discourse, and thenceforward preached with reasonable regularity, though on sufferance only, until June 18, 1843, when the congregation formally accepted the sermon as regular.

The scarcity of books concerning the Jewish religion emphasized the fact that there was no American Jewish publisher. Having translated Johlson's "Instruction in the Mosaic Religion," Leeser issued in the winter of 1829-30 proposals to publish it and "The Jews and the Mosaic Law." As no one would take the risk, however, he became his own publisher. The following are his publications:

1830 (Aug.). Johlson's Instruction in the Mosaic Religion.
1833. The Jews and the Mosaic Law.
1837. Discourses. 2 vols. Portuguese prayers, with his own translation. 6 vols.
1838. Hebrew Spelling-Book.
1839. His Catechism.
1841. The Claims of the Jews to an Equality of Rights. Discourses. 1 vol.
1843. The Occident, a monthly magazine (continued till his death, and, under the editorship of Mayer Sulzberger, one year thereafter; vols. xvii. and xviii. were issued as a weekly. 26 vols.).
1845. The Pentateuch (Hebrew and English). 5 vols.
1848. Daily Prayers, German Rite (with his Eng. transl.). 1 vol.
1853. His translation of the Bible. 1 vol. 4to.
1857. Second edition of the Bible. 18mo. Portuguese prayers. 2d ed. 7 vols.
1859. Dias' Letters.
1860. The Inquisition and Judaism.
1864. Meditations and Prayers. Aguilar's "Jewish Faith" and her "Spirit of Judaism."
1867. Collected Discourses. 10 vols. Mosaic Religion. 2d ed.

Besides accomplishing the literary work involved in the foregoing, he translated Schwarz's "Geography of Palestine," and with Dr. Jaquett saw through Lippincott's press an edition of the Hebrew Bible.

Leeser retired from the Congregation Mikveh Israel in 1850, and did not again take office until 1857, when the newly formed Congregation Beth-El-Emeth in Philadelphia called him, and he remained its minister until his death.

When Leeser commenced his public career the scattered Jewish individuals and the members of congregations in the United States did not number more than from 12,000 to 15,000. His purpose to mold these into a community was to be achieved in part by the pulpit and in part by the press.

Besides engaging in the activities sketched above, Leeser participated in all Jewish movements. He was the earnest promoter of all the national enterprises—the first congregational union, the first Hebrew day-schools, the first Hebrew college, the first Jewish publication society—and of numberless local undertakings. The "Occident" acquired a national and even an international reputation; the Maimonides' College, of which he was president, paved the way for future Jewish colleges in the United States; and his translation of the Bible became an authorized version for the Jews of America.

In the religious controversies of his time Leeser took an active part on the Conservative side, and lived and died in the unshakable belief that the existence of opposing parties was but transient and short-lived.

A. M. Sc.

LEEUW, JACOB HEYMANN DE: Dutch Talmudist; born at Leyden 1811; died at Amsterdam Sept. 15, 1883. He removed to the latter city in 1874, and was appointed rabbi at the bet ha-midrash. He was the author of the following Talmudical works: "Shoshannat Ya'aḳob," Leyden, 1848; "Peri 'Eẓ Ḥayyim," *ib.* 1852; "Debarim Aḥadim," *ib.* 1853; "Naḥalat Ya'aḳob," Rotterdam, 1857; and "Ḥeleḳ Ya'aḳob," *ib.* 1858.

Bibliography: Roest, in *Isr. Nieuwsbode*, 1883, No. 13.

S. E. Sl.

LEFMANN, SALOMON: German philologist; born at Telgte, Westphalia, Dec. 25, 1831, his family being old Westphalian settlers. He was educated at the Jewish school of his native town, at the seminary and academy at Münster, and at the universities of Heidelberg, Berlin, and Paris (Ph.D., Berlin, 1864). In 1866 he became privat-docent, and in 1870 assistant professor, in the University of Heidelberg; and he is at present (1904) honorary professor of Sanskrit there.

Lefmann has taken a great interest in Jewish communal affairs. While preparing himself for the university and during his employment as a public teacher he held also the positions of tutor and schoolmaster in several small communities of Westphalia; and at Heidelberg in 1887 he was president of the Zedaka Verein, a society for the aid of the poor.

Through his "Ueber Deutsche Rechtschreibung" (in "Virchow und Holzendorff's Wissenschaftliche Vorträge," 1871) and "Zur Deutschen Rechtschreibung" (in "Münchner Allgemeine Zeitung," 1871, Nos. 136, 209, 274) Lefmann took part in the movement for the establishment of a correct and uniform system of spelling in German.

Lefmann's principal philological works are: "De Aristotelis in Hominum Educatione Principiis," Berlin, 1864; "August Schleicher," Leipsic, 1870; "Lalita Vistara" (edited and translated), Halle, 1883, 1902; "Gesch. des Alten Indiens," Berlin, 1879-90; 2d ed., 1898; "Franz Bopp," 2 vols., Berlin, 1891-97.

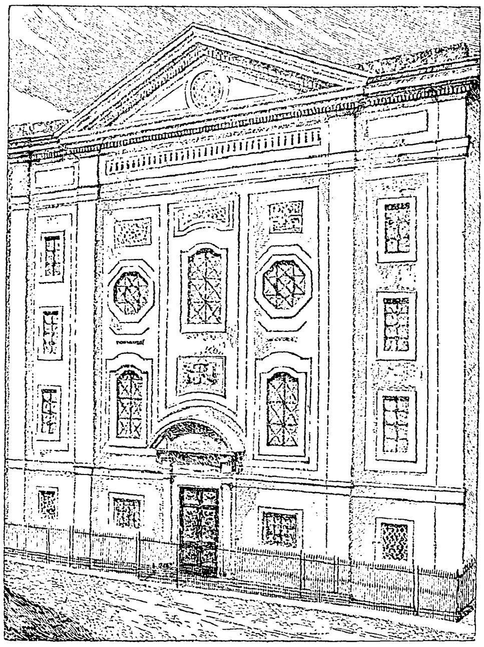
LEGHORN (Italian, **Livorno**; Hebrew, לבורנו. לבורני): Seaport city of Tuscany. Its Jewish community, although the youngest among the large communities of Italy, was for some time the foremost because of the wealth, scholarship, and political rights of its members. The first traces of a Jewish settlement are found about 1583. The endeavors of the Medici to promote the growth of the city and of the harbor brought in many new settlers; and the Spanish Maranos persecuted by Ferdinand II. also found a refuge here in 1590. In 1591 and 1593 all persons desiring to settle at Leghorn, including Jews, were assured the most extensive rights and privileges. Many Jews were attracted by this promise; and the community of Pisa received the privilege of founding a branch at Leghorn with a synagogue and cemetery. In 1597 the Jews of Leghorn received as a community autonomous rights.

Rights and Privileges.

The community had complete jurisdiction both in civil and in criminal cases. In 1593 a special judge was assigned to the Jewish court, from whose sentence appeal could be made only with the permission of the grand duke. As controversies arose regarding the extent of the jurisdiction, it was decreed that the infliction of severe penalties, such as sentences of death and penal servitude, should be confirmed by the public court. The Jewish court was abolished in 1808, when Tuscany was incorporated into the French empire; it was revived in 1814, its jurisdiction, however, being confined to questions relating to marital law. In 1822 such cases also were assigned to the municipal courts, the directors of the community retaining the privilege of giving advisory opinions. Since 1866 the "Codice Civile" and civil marriage obtain in Leghorn as throughout the kingdom.



Synagogue at Leghorn.
(From a photograph.)

The Leghorn community had the right of succession in all cases where the deceased died without natural or legal heirs. This privilege was likewise abrogated in 1808 by the French laws, and was never restored.

When the Jewish community was established (in 1593) the directors were empowered to grant safe-conducts and immunity as regards previous crimes and debts to all Jews who settled at Leghorn, and the latter were accepted as citizens by the communal directors on a majority vote of two-thirds. The right of immunity in the case of previous crimes was soon abrogated, while that of immunity from debt was limited in 1786 to debts that had been incurred more than four months previously; and this rule continued down to 1836. The right of naturalization, however, remained in force until 1859, when the Jews received full citizenship.

Taxes.

From the beginning the Jewish community had the right to impose taxes for the purpose of defraying its expenses. This right was confirmed in 1715, 1782, and 1814. In 1829 it was even amplified. The taxes were as follows: (*a*) "Ẓorke ẓibbur," ½ per cent of their income, payable by all Jews living at Leghorn, or engaged in trade or commerce there, and having a yearly income of more than 1,500 lire.

(*b*) "Diritto nazionale," a duty on all goods imported or exported by Jews through the port of Leghorn, at the rate of ⅛ per cent for resident and ¼ per cent for non-resident Jews. Merchants were required to keep a special column in their books for this tax.

(*c*) Beginning with 1767, a special tax upon private synagogues, in order to prevent their multiplication.

(*d*) Special tax on meat slaughtered according to the Jewish ritual. In recent times all these taxes have been gradually abolished, and a single tax, "sussidio obbligatorio," covering all the needs of the community, has been substituted.

Constitution of 1780.

When the municipality received its constitution in 1780, Jews were declared eligible to the municipal council, though they were excluded from the magistracy; but as house-owners they had the right to send a deputy to the latter, which deputy took part in the government of the city, and had the same privileges and salary as the Christian magistrates. The municipal constitution of 1808 abrogated this privilege; but it was renewed in 1816 and remained in force down to 1845, when Jews became eligible to all municipal offices.

Organization.

The administration of the community, which in the course of time underwent material changes, was entrusted at its foundation in 1593 to a council of five members, designated "capi" or "massari della sinagoga." They had to be prominent, well-to-do merchants; they were elected for one year, and were not immediately reeligible. In consequence of irregularities during an election, it was decreed in 1637 that the massari should be designated by lot by the community of Pisa; but owing to repeated irregularities new methods were adopted in 1642, and five massari were appointed from a council of fifty persons who had been chosen from among all merchants and house-owners over twenty-five years of age. In 1667 in addition to the massari there was a council of twelve deputies, who were elected for life. There was furthermore a council of forty "able and capable citizens" in three commissions, from whom the massari were chosen. In 1693 a great council of sixty members, having all the rights of a modern parliament, was introduced; of this council twenty members sat in rotation each year, the entire body being convened only on important occasions. By this constitution (*i.e.*, the constitution of 1693) the administrative corporation was divided into two bodies, one legislative and the other executive. It, however, remained in force only a short time. In 1715 another body of officers was introduced, when the grand duke appointed three members of the great council as censors for a period of two years. They were empowered to examine the books of the community and to supervise the expenses. On the extinction of the house of Medici the Duke of Lorraine confirmed the constitution, with slight modifications, and it was again confirmed in 1803 under the short-lived kingdom of Etruria. During this whole period the important principle prevailed that all the members be obliged to accept communal offices, and the administration be aided by a chancellor appointed and salaried by the grand duke.

Recent History.

The privileges as well as the constitution of the community were temporarily abrogated in 1808, when Tuscany was incorporated with France. Leghorn received the consistorial constitution drafted by the Sanhedrin of Paris in 1806, and was made the seat of a consistory for the Mediterranean district. Two rabbis and three laymen were appointed members of this consistory Sept. 6, 1810. In 1814 the old constitution was revived, and the grand duke appointed three massari for a period of three years and a council of forty for life. In 1861, on the establishment of the kingdom of Italy, the old constitution was entirely abrogated; and during the following interregnum the community was governed by three members. In 1881 the community was finally reorganized, with new statutes in conformity with the principles obtaining in most of the Italian communities.

The Jews of Leghorn suffered no persecutions, nor were any restrictions imposed upon them, during the entire time of their residence in the city. Their industry and ambition as well as their connections with the East contributed greatly to the development of commerce and industry. Thus Leghorn grew from a small fishing-village into a rich and powerful commercial center. The Jews dominated part of the commerce. A traveler of the seventeenth century says that the Christians had to keep holiday on the Sabbath on their account. The community, which consisted mainly of Spanish and Portuguese immigrants, retained the ancient traditions. Down to the nineteenth century communal business was transacted partly in Portuguese; the Spanish ritual was observed in the synagogue; important hafṭarot were translated into Portuguese; and sermons were delivered in that language. The Jews preserved also the gentility and self-confidence characteristic of them in their Spanish homes. In 1603 they built a synagogue which is still one of the finest architectural monuments of the city.

The rabbinate of Leghorn, continually acquiring new learned members from the East, and through its connections with the Sephardim of Amsterdam and London, was widely known for its scholarship. Many of the merchants also devoted themselves to study, taking up under the guidance of their rabbis medicine, astronomy, philosophy, and the classics, in addition to Jewish science. Of the numerous Jewish scholars who either were natives of Leghorn or lived there for some time may be mentioned: Solomon Ayllon, Ḥayyim Joseph David Azulai, Elijah Benamozegh, David Castelli, Benjamin Espinosa, Jacob Ḥagiz, Malachi ha-Kohen, Raphael

Meldola, Sabato Morais, Jonah Nabon, Immanuel Ḥaj Richi, and Hezekiah da Silva. The present (1904) chief rabbi, Dr. Samuel Colombo Coën, has published several sermons.

Through its connection with the East, Leghorn was always a center for cabalists, especially at the time of the Shabbethaian controversies; and even in recent times cabalists and mystics found support and encouragement in the city.

The community evinced interest in the general welfare, especially by ransoming prisoners landed at Leghorn. The members were also charitable toward their unfortunate coreligionists in foreign countries. In 1648 they levied a special tax for the benefit of the Polish Jews; and more recently they were among the first to join the Alliance Israélite Universelle. At various periods the Jewish community of Leghorn numbered 10,000 persons; as late as 1848 it was estimated to number 7,000. As the commerce of the city declined, many emigrated; and to-day (1904) there are about 3,000 Jews in the city. The community, formerly so wealthy, has become very impoverished.

Foundations.

Among the many philanthropic foundations the schools, which were once widely famed, are especially noteworthy. Besides the chapels, of which there are a number in addition to the large synagogue (two being named after the rabbis Ergas and Azulai), the following institutions may be mentioned: (1) Beneficenza Israelitica, organized in 1683 by the levying of a special tax and intended for the relief of the communal poor as well as for the ransoming of prisoners. Subsequently its operations were limited to giving pecuniary relief to the indigent. It has been enriched by many legacies. The trustees are at the same time trustees of the communal schools, Pie Scuole Israelitiche di Livorno, which, richly endowed, were the pride of the community, and excited the admiration of educators and travelers. As early as the beginning of the nineteenth century there were two Jewish schools, an elementary school with three grades and a higher school with six grades, having at that time together a fund of 86,000 florins. The schools subsequently received bequests from the Franchetti family. At present they include a kindergarten ("asili infantili"), an elementary school for boys and girls, a drawing-school for boys learning a trade, and a trade-school for girls. Instruction is given both in secular and in religious subjects. Connected with these schools is a rabbinical seminary ("istituto rabbinico"), which gives instruction in advanced Hebrew, rabbinical science, and theology, in addition to the regular college course. Included in the bequests made to these schools, which are among the wealthiest Jewish educational institutions in existence, are a large legacy by Samuele del Mare (1885) and a foundation for distributing prizes for scientific works. (2) Spedale Israelitico, founded in 1826 by Solomon Abudarham, and enriched by many bequests from his relatives and from the Franchetti family (building opened in 1863). (3) Moar Abetulot ("maritare donzelle"), founded in 1644 by prominent Spanish families for providing brides with dowries, and affording relief to impoverished members. The membership and government of this institution are hereditary; and, being in the nature of a family foundation, it has preserved the genealogies of all its members. (4) Malbisc Harumim, Vestire Poveri, instituted in 1654, for clothing the poor, especially the teachers and pupils of the Jewish schools. (5) Opera Pia Franco, founded by Joseph Franco in 1772 for the promotion of rabbinical studies, giving dowries to poor brides, and the support of Jews in Palestine. All these foundations have been recently obliged to change their statutes and government in conformity with the Italian law for the administration of philanthropic institutions.

Between 1650 and 1657 there was at Leghorn a Hebrew printing-press, and in 1703 another was established there; these together have issued many prayer-books, especially for the East, in addition to many cabalistic works.

D. I. E.

LEHMANN, BEHREND. See BERMANN, ISSACHAR HA-LEVI.

LEHMANN, EMIL: German jurist; born at Dresden Feb. 2, 1829; died there Feb. 25, 1898; son of the merchant Bonnier Lehmann. He attended the Israelitische Gemeindeschule and the Kreuzschule in Dresden, and then (1848) went to Leipsic and devoted himself to the study of jurisprudence until 1851. On his return to Dresden he applied himself to journalism, and was connected eight years with the "Sächsische Dorfzeitung." With Bernhard Beer, Zacharias Frankel, and Wolf Landau he engaged in the struggle to secure a larger measure of legal rights for the Jews of Germany. The legislation of 1868 in Saxony, by which this aim was attained—at least so far as that kingdom was concerned—is to be credited to his efforts and those of his collaborators. In 1863 he began the practise of his profession as an attorney, and later as royal notary.

Lehmann took an active part in public affairs, and from 1865 to 1883, with but short intervals, was a member of the city council of Dresden, and most of the time its vice-president. He was a member of the Landtag of Saxony from 1875 to 1880, as an adherent of the Fortschrittspartei. When the anti-Semitic agitation, inaugurated by Stöcker, set in throughout Germany, he took a considerable part in the pamphlet warfare of the period.

For several decades Lehmann was president of the Jewish congregation in Dresden, an interesting history of which, covering the period of his recollection, he wrote under the title "Ein Halbjahrhundert in der Israelitischen Religionsgemeinde zu Dresden," Dresden, 1890. He wrote also, under the title "Der Polnische Resident Behrend Lehmann," Dresden, 1885, a sketch of the founder of the congregation, his own ancestor. Among his other writings should be noted: "George Gottfried Gervinus," Hamburg, 1871; "Zur Synode," Breslau, 1871; "Höre Israel," *ib.* 1871; "Lessing und Seine Bedeutung für die Juden," Dresden, 1879; "Gabriel Riesser," Leipsic, 1881; and "Die Juden Jetzt und Einst: Zur Lösung der Judenfrage," Dresden, 1887.

After his death his children and a number of his friends edited and published a collection of his writings under the title "Emil Lehmann, Gesammelte Schriften," Berlin, 1899.

S. M. Co.

LEHMANN, JOSEPH: German journalist; born at Glogau Dec. 28, 1801; died at Berlin Feb. 19, 1873. At the age of fifteen he found his way to Berlin, and secured a position as office-boy in a banking-house. He studied assiduously, and strove to gain a footing in literature through the channel of journalism. From 1827 to 1842 he occupied an editorial position on the "Preussische Staatszeitung." In 1832 he established the "Magazin für die Literatur des In- und Auslandes," published as a supplement to the "Staatszeitung" until 1842, when it was issued as a separate publication, which occupied a unique position as an intermediary between German literature and that of non-German countries.

Lehmann was for several decades president of the Gesellschaft der Freunde in Berlin, founded in 1792 by the Mendelssohnian group. He took an active part in the establishment of the Hochschule für die Wissenschaft des Judenthums, and contributed materially to the poor students' fund of the Jewish Theological Seminary at Breslau.

BIBLIOGRAPHY: *Allg. Zeit. des Jud.* 1873, p. 155.

LEHMANN, JOSEPH: French chief rabbi; born at Belfort Nov. 1, 1843. He numbers among his ancestors on his father's side R. David Diespeck, the author of "Pardes Dawid" (Sulzbach, 1786), and on his mother's side six Swabian rabbis. Educated at first by his father, who was for fifty years rabbi at Belfort, he completed his studies at the rabbinical seminary of Paris, and was ordained rabbi in Sept., 1867. Two years later he succeeded Zadoc Kahn as rabbi of the Temple of the Rue Notre Dame de Nazareth.

Lehmann was almoner of the army of Paris during the Franco-Prussian war of 1870-71; almoner of the fourth army corps, 1874-90; professor of the Talmud at the Talmud Torah of Paris, 1874-90; and was appointed director and professor of the Talmud in the seminary of that city in 1890. He was president of the Société des Etudes Juives in 1898, was elected officer of the Academy in 1886, and was made chevalier of the Legion of Honor in 1898.

Lehmann's works include: "Le Procès d'Hérode: Saméas et Pollion," Paris, 1892; "Les Sectes Juives Mentionnées dans la Mischna de Berakhot et de Meguilla," Paris, 1896; "Assistance Publique et Privée dans l'Antique Législation Juive," *ib.* 1897; "Quelques Dates Importantes de la Chronologie du 2e Temple à Propos d'une Page du Talmud, Aboda Zara 8b," *ib.* 1898.
S. J. Ka.

LEHMANN, LÉONCE: French lawyer; born at Augsburg, Bavaria, Feb. 24, 1836; died in Paris Dec. 27, 1892. He was educated in the latter city, where he studied law, and in 1856 became private secretary to Dr. Spitzer, Turkish minister to Naples, holding this position until the fall of the kingdom of Naples in 1860. There he translated the "Tuenzio Mamiani" under the title "Un Nouveau Droit Européen," and on his return to France in 1861 received his doctorate in law, presenting the thesis "La Condition Civile des Etrangers en France." He was admitted to the Paris bar, and subsequently practised law before the Court of Appeals.

At the outbreak of the Franco-Prussian war in 1870, Lehmann was appointed by Adolphe Crémieux, then minister of justice, secretary-general of this department, but on the resignation of his chief he returned to the Court of Appeals, where he practised successfully for over twenty years. He was repeatedly elected a member of the governing board of the Society of Advocates, while his activity in the interests of Judaism was evinced by the fact that he was a member of the Central Consistory after 1873, and of the committee on the Jewish Seminary and of the Ecole de Travail. In addition he was for twenty-four years one of the central committee of the Alliance Israélite Universelle, of which he was at first treasurer and later secretary. In 1869 Lehmann and Narcisse Leven traveled in Russia to study means for the alleviation of the sufferers by the famine there. He was decorated with the Turkish Order of the Medjidie, and in 1880 was made a chevalier of the Legion of Honor.

S. J. Ka.

LEHMANN, MARCUS (MEYER): German rabbi; born Dec. 29, 1831, at Verden, Hanover; died at Mayence April 14, 1890. After graduating from the gymnasium, he studied Hebrew at Halberstadt under Israel Hildesheimer. He then went to Berlin University, and thence to Prague, to continue his theological and secular studies. He was graduated Ph.D. from the University of Halle.

In 1853 the congregation of Mayence, when building its new temple, provided for the introduction of an organ. Those of the members who were opposed to this innovation seceded, and organized the Religionsgesellschaft, which in 1854 extended to Lehmann a call as rabbi and preacher. He accepted the position and remained with the congregation until his death.

In 1856 he dedicated a new synagogue, which the congregation owed mostly to his efforts (this was replaced in 1879 by the present edifice), and he founded a religious school which in 1859 was developed into a Jewish school where both religious and secular branches were taught.

With the establishment of the "Israelit," Lehmann attained a high position as one of the leaders of the movement for the maintenance of Orthodox Judaism in Germany. In 1860 Ludwig Philippson's "Allgemeine Zeitung des Judenthums" was practically the only Jewish periodical exerting a profound influence in extending the ideas of the Reform party. In May of that year the "Israelit" made its appearance, and from the outset it acquired a great reputation and wide circulation. In the course of time it absorbed the "Jeschurun" and assumed the title of "Israelit und Jeschurun," which paper, after the death of Lehmann, was continued under the editorial care of his son **Oskar Lehmann,** who for a number of years had been a member of its staff (see ISRAELIT, DER).

Lehmann was known as a prolific writer of short stories, most of them being first published in his paper. They afterward appeared collectively as "Vergangenheit und Gegenwart," 6 vols., Frankfort-on-the-Main, 1872–88. Lehmann wrote also two novels, "Rabbi Josselmann von Rosheim," 2 vols., *ib.* 1879–80, and "Akiba" (based on Talmudic and classical sources). Of his other writings may be mentioned: "Die Orgel in der Synagoge," Mayence, 1862; "Die Abschaffung des Kol Nidre, und Herr Dr. Aub in Mainz," Mayence, 1863; and "Der Talmud Jeruschalmi. Traktat Berakot. Text mit dem zum Ersten Male nach einer in Palästina Aufgefundenen Handschrift Herausgegebenem Commentare des R. I. Syrelei," *ib.* 1874.

Another son, **Jonas Lehmann** (born at Mayence Sept. 19, 1865; Ph.D. 1889), is a novelist and dramatic author. Among his works may be mentioned "Thomas Bekket" (1893), a drama, and "Der Günstling des Czaren" (1897), a novel. He is the proprietor of the "Breslauer Zeitung."

S. M. Co.

LEHRANSTALT FÜR DIE WISSENSCHAFT DES JUDENTHUMS: Rabbinical seminary at Berlin; founded in 1870 and opened in 1872 as the "Hochschule für die Wissenschaft des Judenthums," which name, upon the order of the government, was changed in 1883 to the one it now bears.

A movement for the establishment in Germany of a seminary for Jewish science was begun as early as 1835 by Abraham Geiger, who never ceased advocating the plan until the establishment of the "Hochschule." Geiger found a supporter in Ludwig Philippson, who sought to give the thought currency among the people. Chiefly owing to Geiger's influence, the theological seminary at Breslau was established in 1854; but its conservative theological policy was not approved by Geiger. The "Hochschule" was established upon the principle that the question of religion should not be decisive in the choice of teachers or in the admission of students. It was to be devoted purely to scientific work. Nominally, it has never been a solely theological school; as a matter of fact, however, the training of theologians has been its chief task.

For the first twenty-five years the sums received (excluding stipendiary contributions) totaled 348,843.24 marks; the expenses (stipends excluded) totaled 341,750.89 marks. The "Lehranstalt" is supported by annual contributions from the members of a society established for that purpose and by general donations. Contributors and donors elect the "curatorium," which elects the teaching staff and controls the finances of the institution. The first chairman of the "curatorium" was Prof. M. Lazarus, who held that office for twenty-three years, until his removal to Meran. The present chairman is Dr. S. Neumann, who also was a member of the first "curatorium." The faculty at first included David Cassel, Abraham Geiger, I. Lewy, and H. Steinthal; it has since included P. F. Frankl, S. Maybaum, M. Schreiner, E. Baneth, and I. Elbogen. Any one attending, or having attended, a German university and able to pass a simple examination may be admitted as a regular student. The teachers admit special students at their discretion. During the first twenty-five years of the seminary's existence 168 applicants were granted admission as regular students and 140 as special students. Of the former, 55 were born within the German empire, 1 in the grand duchy of Luxemburg, 68 in Austria-Hungary, 27 in Russia, 3 in Rumania, 2 in England, 1 in Sweden, and 3 in America. The locations of but 75 of the total number graduated were known in 1897; of these, 52 were rabbis and preachers (16 in Germany, 25 in Austria-Hungary, 6 in Russia, 4 in America, 1 in Rumania), 21 were teachers (11 in Germany, 2 in Austria-Hungary, 4 in Russia, 2 in America, 1 in Rumania, 1 in England), and 2 were in the service of Jewish congregations in Germany. Of the 140 special students, 12 were from the Protestant theological department of the university, 25 from the law department, 25 from the medical department, and 62 from the philosophical department. Stipends amounting to 96,218.40 marks were given to needy students during the first 25 years. The library now contains about 12,000 volumes.

Geiger's "General Introduction to the Science of Judaism," "Introduction to the Biblical Writings," and "Lectures on Pirḳe Abot" were originally delivered as lectures at the seminary.

Reflecting the tendency of the times, the "Lehranstalt" stands for a conservative Judaism; but its main object is the scientific study of things Jewish, freed as far as possible from the rancor of theological disputes and practical politics.

D. L. M.

LEHREN: Dutch family whose name is derived from Lehrensteinfeld, a village in Württemberg.

Akiba Lehren: Dutch banker and communal worker; born July 30, 1795; died in Amsterdam Nov. 19, 1876; younger brother of Ẓebi Hirsch Lehren and Jacob Meïr Lehren. He was "president of the Pekidim and Amarcalim of the Jewish congregations in the Holy Land, dwelling in Amsterdam," and in 1844 became involved in the literary dispute of his brother Hirsch concerning the administration of the Ḥaluḳḳah (see Fürst in "Der Orient," 1844, p. 17).

Both Akiba and his brother Meïr possessed very rich and valuable collections of Hebrew books, a sale catalogue of which was arranged and published by J. L. Joachimsthal, Amsterdam, 1899 (comp. "Zeit. für Hebr. Bibl." 1899, p. 152).

Akiba published a very poor edition of Isaac ben Moses' "Or Zarua'," parts i. and ii., according to an Amsterdam manuscript, Jitomir, 1862 (Steinschneider, "Zeit. für Hebr. Bibl." viii. 1 *et seq.*).

BIBLIOGRAPHY: *Allg. Zeit. des Jud.* 1876, p. 809; *Ha-Maggid*, 1876, p. 412; *Univ. Isr.* 1876, p. 217.

Jacob Meïr Lehren: Dutch banker and communal worker; born 1793; died in Amsterdam May, 1861; younger brother of Ẓebi Hirsch Lehren. He was president of the Jewish congregation of Amsterdam for more than thirty years, and of many Jewish educational and charitable institutions. Lehren was also connected with the Ḥalukkah affair of his brother Hirsch (see Fürst in "Der Orient," 1843, p. 361). He devoted much interest to the education of Jewish rabbis and religious teachers. As regards the library left by him see Akiba Lehren.

Bibliography: *Allg. Zeit. des Jud.* 1861, p. 344; Jew. Encyc. i. 544a, *s.v.* Amsterdam; *ib.* iii. 312a, *s.v.* Book-Collectors.

Ẓebi Hirsch (Hirschel) Lehren: Dutch merchant and communal worker; born 1784; died in Amsterdam Nov., 1853. Lehren was prominent in the history of the Ḥalukkah in the first half of the nineteenth century. Beginning with 1810, he, as a rich and influential merchant, was entrusted, together with Abraham Prinz and Solomon Reuben, with the responsibility of forwarding to Palestine the contributions which were sent annually to Amsterdam. In 1822 he ruled that in future only one representative, instead of two, should be sent from Palestine for both the Sephardic and the Ashkenazic congregations, and that the money collected for the Ḥalukkah should be divided in proportion to the number of persons in the Palestinian congregations in question. When, in 1829, the young congregation of the Ashkenazim in Jerusalem had become involved in financial difficulties through the building of a new synagogue and school, and was obliged to appeal for support to its coreligionists in Europe, Lehren, as president of the Ḥalukkah committee, prohibited in a very harshly worded circular the transmission of any further contributions to Jerusalem. On this account he was vehemently attacked, and suspicion was even cast on his integrity in administering the funds. This produced a bitter literary quarrel (see Fürst in "Der Orient," 1843, pp. 361 *et seq.*, 377 *et seq.*; 1844, pp. 1 *et seq.*; "Sendschreiben an Unsere Glaubensgenossen den 18ten Schebat, 5603"). In his defense Lehren published "Drei Briefe aus Jerusalem zur Vertheidigung der Ehrlichkeit des Amsterdamer Comité's in Betreff der Palästinaspenden" with the Hebrew title "Ḳontres Emet me-Ereẓ" (part i., Amsterdam, 1843; part ii., *ib.* 1844), after he had already published the Hebrew article of Solomon Kohen, "Emet me-Ereẓ," with the German title "Sendschreiben oder Wahrheit aus dem Heiligen Lande" (*ib.* 1843; Fürst, "Bibl. Jud." ii. 228).

In 1840 the oppressed Jews of Damascus appealed to Lehren for aid, as they did to many other influential Jews; and he bravely took up their cause. Together with Aaron Prinz, Lehren sent a circular letter to many rabbis, which in the autumn of 1844 resulted in a protest, signed by seventy-eight Orthodox rabbis of Germany, Bohemia, Moravia, and Hungary, against the rabbinical conference of Brunswick (June 12–19, 1844; see "Univ. Isr." 1845, ii. 12 *et seq.*). The letters of recognition for this service, sent to Lehren and Prinz by many rabbis, were published under the title "Torat ha-Ḳena'ot" (*ib.* 1845).

LEHRERHEIM. See Periodicals.

LEHRS, KARL LUDWIG (KAUFMANN): German philologist; born at Königsberg, East Prussia, Jan. 2, 1802; died there June 9, 1878; brother of the philologist **F. Siegfried Lehrs** (1806–43), editor of Didot's edition of the Greek epic poets. Karl was educated at the Königsberg gymnasium and university (Ph.D. 1823); in 1822, after entering the Protestant Church, he passed the examination for teacher in the gymnasium. He was successively appointed to positions at Danzig, Marienwerder, and Königsberg (1825). In 1831 he established himself as privat-docent at Königsberg University, and in 1835 was appointed assistant professor. Elected in 1845 professor of ancient Greek philology, he resigned his position as teacher at the gymnasium; he held the chair in Greek philology until his death. Among Lehrs's many works may be mentioned: "De Aristarchi Studiis Homericis," Königsberg, 1833 (3d ed., by Ludwich, Leipsic, 1882); "Quæstiones Epicæ," *ib.* 1837; "Herodiani Scripta Tria Minora," *ib.* 1848; "Populäre Aufsätze aus dem Alterthume," *ib.* 1856 (2d ed., 1875); "Horatius Flaccus," *ib.* 1869; "Die Pindarscholien," *ib.* 1873.

LEIBZOLL or **JUDENGELEIT:** A special toll which the Jews had to pay in most of the European states in the Middle Ages and up to the beginning of the nineteenth century. The origin of the Leibzoll may be traced to the political position of the Jews in Germany, where they were considered crown property and, therefore, under the king's protection. In his capacity as Roman emperor the king claimed the exclusive rights of the jurisdiction and taxation of the Jews, and was responsible for the protection of their lives and their property. Protection he granted them either by a guard or by safe-conduct; chiefly by the latter, for the Jews, being extensive travelers, when they went on long business trips could not always be accompanied by imperial guards. The first instance of the granting of one of these safe-conducts occurred under Louis le Débonnaire (814–840), and a specimen of it may be found among the documents preserved in the "Liber Formularum" of that period. According to this document the king grants freedom of travel and exemption from all taxes to three Jews of Lyons "neque teloneum, neque paravereda aut mansionaticum, aut pulveraticum, aut cespitaticum, aut ripaticum, aut rotaticum, aut portaticum, aut herbaticum prædictis Hebræis exigere præsumant" (De Rozières, "Recueil Général des Formules Usitées dans l'Empire des Francs," i. 41–43, Paris, 1859–1871; Simson, "Jahrbücher des Fränkischen Reiches Unter Ludwig dem Frommen," i. 393–396, Leipsic, 1874–76). For such a safe-conduct the Jews were required to pay a certain fee; but this, being understood, is not stated anywhere, as the payment constitutes the only reason for the exemption from other taxes. The stipulations regulating the tolls of Raffelstaetten, issued between 904–906, are to be interpreted in the same manner—the Jews, as privileged merchants, shall not pay more than the regular toll ("justum theloneum"). The law expressly states this to be in conformity with the ancient custom (Pertz, "Mon. Germaniæ Leges," iii. 480; Waitz, "Deutsche Verfassungsgeschichte," iv. 1, 70, Kiel, 1884; Scherer, "Rechtsverhältnisse der Juden," p. 110, Leipsic, 1901); the same is stated in the charter granted to the Jews of Worms, 1090 ("Zeitschrift für die Gesch. der Juden in Deutschland," i. 139). When the Jews passed under the jurisdiction of the territorial rulers, this principle was acknowledged. Frederick II. of Austria, in his law on the Jews, issued 1244, decreed that within the limits of his state they should not pay more than the legal rate of toll—the same rate that all other citizens had to pay (Scherer, *l.c.* p. 181). As in the stipulations regulating the tolls of Raffelstaetten, and as in the law of Frederick II., only customs duties for goods or slaves were mentioned: therefore a personal tax was unknown.

Rate of Toll.

As the Jews in increasing numbers passed under territorial jurisdiction, the exemption from personal tax, which was granted them as long as they remained crown property, was no longer respected, for each territorial ruler considered himself entitled to levy taxes on all foreign Jewish subjects who passed through his territory. But these taxes continued as customs duties until, with the growing hostility of the free cities, and with the frequent expulsion from vast territories which became the rule in the fifteenth century, those rulers who had expelled the Jews from their domains determined on the adoption of a policy of keeping them away from their borders. International relations, however, would not permit of the disregard of a passport granted by a foreign ruler to one of his subjects, so when Jews visited a territory in which no Jew was permitted to settle they were subjected to the payment of a toll.

Development of Leibzoll.

The adoption of this policy was dictated by absolute necessity. Owing to the weakness of the federal power of the German empire Jews expelled from a place could easily settle in the vicinity, and on the strength of their passports do business in the place from which they had been expelled. So the Jews expelled from Nuremberg in 1499 settled in Fürth; those expelled from Nördlingen (1507) settled in Kleinerdlingen; those who could not gain entrance into the city of Lübeck settled in the village of Moisling—all places of settlement within easy walking distance of the cities in which they were denied residence. On the passports issued to them by their respective sovereigns they could engage in trade in the latter places, at least during the day, and, therefore, since the local governments wished to enforce the decrees excluding the Jews, they were driven to adopt new measures ("R. E. J." viii. 212). Soon the financial utility of the Leibzoll was recognized, and the territorial rulers in the German empire levied such a toll from all traveling Jews, whether foreigners or their own subjects. In Nuremberg the average annual value of the toll for the last ten years during which Leibzoll was levied (1797–1806) was 2,448 florins, or about $1,000 (Barbeck, "Gesch. der Juden in Nürnberg und Fürth," p. 106, Nuremberg, 1878).

That it was the purpose also to humiliate the Jews is shown, sometimes, in the wording of the law. For example, an ordinance of Philip V. of Spain (1703) fixes the toll for a wagon-load of merchandise, one head of cattle, or one Jew, when passing over the bridges of Luxemburg, at four sols ("R. E. J." viii. 208). Sometimes the humiliation lay in the form in which the tax was levied. In some places a Jew passing a toll-gate was required to cast dice in remembrance of the crucifixion (Grätz, "Gesch." 3d ed., viii. 14); elsewhere, as in Freiberg, in Saxony, Jews were forced to pay for a guard to follow them as long as they remained within the city. Even after the Leibzoll had been officially abolished, as in Austria by Emperor Joseph II. in 1782, Jews entering Vienna or staying there for some time were required to pay a special tax which differed from Leibzoll only in name. The same may be said of Nuremberg, where Leibzoll was abolished theoretically in 1800, but was levied practically until 1806 under the name of "Passier- und Eintrittsgeld." In Warsaw, where the French government had emancipated the Jews, the Russian government reintroduced the Leibzoll under the name of "Tagzettel," requiring every Jew entering the city to pay five silver groschen for the first day and three for every additional day he remained ("Allg. Zeit. des Jud." 1862, p. 12).

Exemptions.

Certain exemptions from Leibzoll were granted. Under the Austrian law of 1244, corpses were exempt. Albrecht III. gave free safe-conduct to three Austrian Jews to bring "etrogim" from Triest free of duty in 1389 (Scherer, *l.c.* p. 535). The Jews living within the territory of the Elector of Mayence were exempted from Leibzoll when they were traveling to attend one of the regular landtags, or meetings of the district congregations (see Bamberger, "Histor. Berichte über die Juden der Stadt Aschaffenburg," p. 26, Strasburg, 1900). As a mark of special favor, court Jews or mint-farmers were exempt from the payment of such tolls (see HARBURG). Later the exemption was extended to manufacturers; and Hirsch David, velvet-manufacturer of Berlin, was exempted by the king (1731) because his business required him to travel frequently ("Allg. Zeit. des Jud." 1902, p. 477). When Meyerbeer went to Vienna, the "Judenamt" received orders to treat him "not as a Jew, but as a cavalier" (*ib.* 1847, p. 91). Native Jews were often exempted, for a fixed sum, from paying this toll, but naturally this freed them from it only within the confines of their own country. Thus the Jews of Saxony were exempt from the Leibzoll by an order dated April 16, 1773 (Levy, "Geschichte der Juden in Sachsen," p. 71, Berlin, 1901). The Jews of Berlin compromised with the elector, in 1700, by paying 1,000 ducats annually; this sum ("Jüdische Presse," Aug. 22, 1902) exempted only those who were in the possession of a lawful charter ("Schutzbrief"), which had replaced the old safe-conduct ("Judengeleit"), and who therefore were called "vergleitete Juden."

G. D.

In December, 1787, Frederick William II. of Prussia abolished the Leibzoll in Berlin, and in July, 1788, he abolished it in other places. The abolition of the toll was due largely to the exertions of David Friedländer. In 1791 the toll was abolished also by the Bishop of Salzburg in his own dominions.

Notwithstanding the liberal spirit which these abolitions showed, the majority of the German states still clung to the tax. With the advent of the French, however, some of them were compelled to abolish the Leibzoll. Early in July, 1798, the French general Cacatte informed the members of the government at Nassau-Usingen that, at the order of the division commander Freitag, the special taxes of the Jews were to be abolished, as they were repugnant to justice and humanity. In consequence of this order the Jews on the left bank of the Rhine were relieved from the payment of Leibzoll. At the conclusion of the peace of Luneville July 21, 1801, the toll was reimposed.

Wolf Breidenbach.

At the beginning of the nineteenth century the Jews of Germany found a courageous champion in Wolf Breidenbach, who worked persistently for the abolition of this impost. Perceiving that ample resources would be required to carry on his campaign, and not being personally able to command these, he invoked the aid of the German and foreign Jews (1803), asking them to subscribe to the fund raised for this purpose. He instituted negotiations with the minor German princes at the Diet of Ratisbon, and, aided by Dahlberg, the imperial chancellor, succeeded in obtaining free passage for the Jews throughout the Rhine provinces and Bavaria. It was largely due to his efforts that the Leibzoll was abolished in Kurhessen, Hohenlohe, Neuwied, Wied-Runkel, Braunfels, Solms-Rödelheim, and also in Nassau (Sept., 1806). The emancipation of the Jews from these imposts created much antagonism; and among those opposed to it were such men as Paalzow, Grattenauer, and Buchholz. In the northern Hanse towns the French garrisons compelled the burghers to relieve the Jews from the payment of the Leibzoll, and, notwithstanding much opposition, secured the privilege for the Jews of Hamburg, Lübeck, and Bremen. The Leibzoll was abolished in Brunswick-Lüneburg April 23, 1823, through the efforts of Israel Jacobsohn, court agent to the Duke of Brunswick. Although the tax had been almost universally abolished, its collection still continued from the Jews visiting Vienna in the reign of Francis I. of Austria. Of the German states, Saxony was the last to abolish it.

In Russia.

Up to 1862 the Polish Jews visiting Russia were treated as foreigners, and as such were not admitted into the interior of the empire. On the other hand, the Russian Jews had great difficulty in entering Poland, and those who went there for business were obliged to pay a "Geleitzoll." In 1826 the representatives of the Jewish community of Kovno petitioned the government for the abolition of the tax, which amounted then to fifteen Polish florins. By order of Emperor Nicholas I. this application was referred to the grand duke Constantine Pavlovich, then viceroy of Poland, who stated that he considered the abolition of the tax inexpedient, but proposed decreasing its amount and regulating it according to age, sex, and business occupation. He deemed it advisable to introduce a similar tax in Russia, and suggested that each Polish Jew entering Russia, and each Russian Jew entering Poland, should be supplied with a pass descriptive of the place of its issuance, the bearer's business, etc. The local police was to be charged with the inspection of the passes. In consequence of this report, Emperor Nicholas ordered the minister of finance to communicate with the proper authorities, and to draft the regulations for the introduction of the tax in question. After a prolonged correspondence with the Polish authorities the minister found the proposed measure to be inexpedient, not only because of the decrease in the revenues which it would effect, but also because of possible complications and abuses in its enforcement. The "Geleitzoll" was, therefore, abolished by a ukase of May 24, 1862.

G. H. R.

LEICESTER: County town of Leicestershire, England. A Josce of Leicester is recorded in the Nottingham "Donum" of 1194 as living in Nottingham; and Benedict of Leicester is mentioned in 1205 (Jacobs, "Jews of Angevin England," p. 238). Part of the old Roman wall at Leicester is still called the "Jewry Wall"; it is figured in Throsby's "Leicester," plates 1 and 2, and a full description of it is given in the "Journal of the Archæological Association," iv. 393–402. It is difficult to suggest for what reason the wall received its name. Leicester being an appanage of the earls of Leicester, Simon de Montfort took the opportunity to prevent any interference with his seigniorial rights on the part of the king by expelling the Jews from Leicester in 1231 (C. Bemont, "Simon de Montfort," p. 62, Paris, 1884).

In modern times there has been a small Jewish congregation, which in 1898 had increased sufficiently to build a synagogue in Highfield street. This had been preceded by a charity organization in 1886, and by a Biḳḳur Ḥolim society in 1896. Sir Israel Hart has been four times mayor of Leicester (1884–86, 1893).

Bibliography: Throsby, *Leicester*, p. 232, Leicester, 1791.

J.

LEIDESDORF, MAX: Austrian psychiatrist; born at Vienna June 27, 1818; died there Oct. 9, 1889; educated at the university of his native city (M.D. 1845). After studying for several years in the principal insane asylums of Italy, Germany, England, and France, he established himself as privat-docent at Vienna University (1856), and, later, held the following appointments: assistant professor of psychiatry (1864); chief physician of the insane department of the general hospital ("Allgemeines-Krankenhaus," 1872); and chief of the "Landesirrenanstalt" (1875). He resigned these positions in 1888.

Leidesdorf was one of the leading psychiatrists of his time. In 1876 he was called to Constantinople to examine the mental condition of the dethroned sultan Murad; and in 1886 he was asked by the crown of Austria to give an opinion as to the sanity of Louis II. of Bavaria. He was the author of: "Beiträge zur Diagnostik und Behandlung der Primären Formen des Irreseins," Krefeld, 1855; "Das Römerbad Tüffer in Steiermark," Vienna, 1857; "Compendium der Psychiatrie für Aerzte und Studirende," *ib.* 1860; "Pathologie und Therapie der Psychischen Krankheiten," Erlangen, 1860 (2d ed. 1865, and translated into Italian 1865); "Erläuterungen zur Irrenhausfrage Niederösterreichs," Vienna, 1868; "Psychiatrische Studien aus der Klinik Leidesdorf," *ib.* 1877; "Das Traumleben," *ib.* 1880.

LEIDESDORFF, WILLIAM: One of the earliest settlers in California; born (at Szathmar, Hungary ?) about 1802; died at San Francisco May 18, 1848. He was the son of Mordecai Leidesdorff; his cousin Yitl (Henrietta) married Akiba Eger, and their daughter married Moses Sofer (Schreiber). William Leidesdorff left his home when about fifteen years of age, and his family never heard from him again. A tradition became current in the Eger and Schreiber families that he had "gone to America" and "become a great man." He went to San Francisco (Yerba Buena) in 1840; but his history before his appearance there is obscure. He passed as a native of Jamaica, of Danish extraction; on leaving that island he went to New York, and subsequently to New Orleans, in which latter city he held the office of "captain of the port." On arriving at Yerba Buena he began the establishment of extensive commercial relations with "the States." When the American flag was raised over San Francisco (July, 1846) he became vice-consul. He bore a high reputation for integrity and enterprise. He is said to have been "liberal, hospitable, cordial, confiding even to a fault." Leidesdorff became the wealthiest man in San Francisco. During the eight years of his residence there he organized the first American public school, served as alcalde, as a member of the Ayuntamiento, as one of the six aldermen, or town-councilors, and as city treasurer. On the day of his burial the town was in mourning, the flags were at half-mast, business was suspended, and the schools were closed. His remains were interred in the Roman Catholic graveyard behind the church of the Mission Dolores. Leidesdorff street was named for him.

The Leidesdorff Estate.

It is reasonably certain that William Leidesdorff of San Francisco and Wolf Leidesdorfer of Szathmar, Hungary, were one person. But legally that fact has never been established. The California pioneer died intestate, and the court appointed Captain John L. Folsom temporary administrator of his large estate. Folsom visited Jamaica and found some "relatives"—even a woman who claimed to be Leidesdorff's mother—and purchased the claims of all these people. But they obtained no standing in court. The uncertain condition of the probate laws, together with the fact discovered that William Leidesdorff, though he had held federal offices, had never been a citizen of the United States, and the additional fact that these Jamaica "relatives" had sold titles to Captain Folsom which the courts could not approve, created so much confusion regarding the estate that, in 1854, Governor Bigler, in a special message to the senate, recommended the escheat of the estate, then worth a million and a half, and suggested that proceedings be commenced for its recovery ("Journal of the Senate of California," 1854). Another reason why the courts refused to admit the title of the Jamaica relatives was that there were "other heirs, who had never conveyed away their rights in the estate" (Sweasy, "Early Days and Men of California"). These "other heirs" lived in Europe.

While Leidesdorff passed as a Christian and was buried in a Roman Catholic churchyard, he had never been known to be identified with any church. Some of his intimates claimed to have known that he was of Jewish extraction. He is said to have been a man of fine appearance, "swarthy" (Sweasy), and of an irascible temperament. He never spoke of his relatives; he never married; and, though conducting a great establishment, he practically lived alone. The following facts appear in connection with his estate: (1) The claims of his Jamaica "relatives" were thrown out of court, their evidence of relationship being summarily rejected. (2) No Danish family of the name of Leidesdorff ever appeared to claim the estate of William Leidesdorff of San Francisco. (3) Since 1854 the descendants of the Leidesdorfers, and the Eger and Schreiber families of Hungary, through legal representatives, have continued to contest the escheat of the estate, and have established their claims to the satisfaction of many eminent attorneys, though there is at the present time (1904) not the remotest chance of their recovering anything, the statute of limitations covering and protecting every title obtained from John L. Folsom and others who acquired possession.

A. J. V.

LEIMDÖRFER, DAVID: Rabbi; born at Hlinik, Hungary, Sept. 17, 1851; educated at his native place and at Zsolna, Waitzen, Budapest, Presburg, and Vienna. He became a chaplain in the Austro-Hungarian army; from 1875 to 1883 he was rabbi at Nordhausen, Prussia, and since 1883 he has been rabbi at Hamburg, where he is also principal of the school for religion and of the Jewish high school for girls.

Of Leimdörfer's works may be mentioned: "Kurzgefasste Religionslehre der Israeliten," Nordhausen, 1876; "Die Kürzeste Darstellung der Nachbiblischen Gesch. für die Israelitische Schuljugend," *ib.* 1880 (4th ed. 1896); "Die Chanuka Wunder," Magdeburg, 1888, and "Die Lebende Megilla," Hamburg, 1888, both festival plays; "Der Hamburger Tempel," *ib.* 1889; "Das Heilige Schriftwerk Koheleth im Lichte der Gesch." *ib.* 1892; "Die Messias Apokalypse," Vienna, 1895; "Das Psalter Ego in den Ichpsalmen," Hamburg, 1898; "Zur Kritik des Buches Esther," Frankfort-on-the-Main, 1899; "Die Lösung des Koheleträtsels Durch Ibn Baruch," Berlin, 1900; and "Der Altbiblische Priestersegen," Frankfort, 1900.

s. F. T. H.

LEIPSIC: A city of Saxony. The first mention of its Jewish community occurs in the middle of the thirteenth century in the "Or Zarua‘" of Isaac ben Moses of Vienna (p. 215b), who speaks of a synagogue and of a tax on the community. The oldest non-Jewish record of the existence of Jews in Leipsic dates a century later. On Oct. 28, 1352, Margrave Frederick, "the Stern," of Meissen gave the synagogue ("scolam Judæorum") in Leipsic as a fief to his marshal ("Urkundenbuch von Leipzig," iii., No. 44). The Jews' Street ("Iudenburc"), into which a special gate ("valva") opened, is first mentioned in the "Leipziger Stadtbuch" in 1359.

In the Middle Ages.

In Feb., 1349, Margrave Frederick, "the Earnest," ordered the burning of the Jews in his territories; and although there is no documentary evidence of the event, the Jews of Leipsic were without doubt exterminated, their houses and lands being confiscated by the margrave. His successor, the above-mentioned Frederick, "the Stern," although not less harshly inclined toward the Jews than his predecessor, allowed some of them in 1364 to settle in Leipsic on payment of a large sum for protection. It is doubtful, however, whether a Jewish community was again organized there. In 1430, by command of the elector Frederick, the Jews were expelled from Saxony, after having been robbed of their property. By a special patent of freedom and protection the rich Jewish money-lender Abraham of Leipsic, together with his family, was exempted from this order in return for the payment of a large sum of money; he was also granted extensive privileges. In recognition of the faithful services which he had rendered the Duke of Saxony he was allowed among other things to have a synagogue ("Judenschule"). Finally, however, even he and all his household fell victims to envy and hatred. As the result of a suit brought against him he was punished in 1439 by the annulment of the greater part of the bonds which he held, by a money fine of 12,000 gulden, and by perpetual banishment from the country ("Urkundenbuch von Leipzig," iii. 103 *et. seq.*).

At the Fairs.

From that time forward for nearly 300 years no Jews settled permanently in Leipsic. Only after the middle of the fifteenth century numerous Jews appeared at fair-times, but the first statistics concerning their attendance at the fairs date from 1675. From that year to 1748 there were at the fairs on an average 750 Jews; 1770–79, 1,652 Jews as against 8,597 Christians; 1786–1839, 3,185 Jews to 13,005 Christians (R. Markgraf, "Der Einfluss der Juden auf die Leipziger Messen"; three lectures in the "Leipziger Tageblatt," March 27, 28, 29, 1896). The Jews took a large share in the trade as regards both purchase and sales and the variety of the purchases made for good legal tender. At the same time they were exposed to endless annoyances, exacting regulations, and burdensome restrictions. At the New-Year's fair in 1645 an order of the city council of Leipsic was published forbidding Jews to have open shops and booths facing the street, and permitting them to sell only in private rooms. This order resulted in an agitation on the part of the Jews which lasted nearly a century. The shopkeepers and merchants, and with them the city council, repeatedly sided against the Jews; but the elector twice decided in their favor (Oct. 6, 1687, and March 1, 1689). In 1704 the Jews were assigned quarters on the Brühl during the fair. In 1722, in addition to the quarrel in regard to open shops, a dispute arose in regard to peddling. The council, at the instance of the merchants and shopkeepers, wished to forbid this kind of trade also, but the elector at first permitted it. On Sept. 3, 1731, August, "the Strong," issued an order forbidding Jews to sell in shops open to the street or to peddle from house to house. This order, however, does not appear to have been strictly carried out.

Privileged Jews of the Eighteenth Century.

In 1713 Gerd Levi of Hamburg, on his appointment as purveyor to the mint, had received permission from the elector Frederick August to reside permanently in Leipsic, he being the first Jew to be so privileged. This privilege was extended to his son Levi Gerd. In 1754 another privileged Jew, Baruch Aaron Levi of Dessau, was allowed to settle in Leipsic (Freudenthal, "Aus der Heimat Mendelssohns," pp. 122, 130). During the Seven Years' war several Jewish traders successfully attempted to settle permanently in Leipsic. Although the city council, the estates, the mercantile class, and especially the goldsmiths' gild, opposed the settlement of Jews, and strove to have all non-privileged Jews excluded, and although the council refused all petitions from Jews praying to be allowed to settle in the city, nevertheless from the end of the Seven Years' war on, some Jews remained settled in Leipsic beyond the limits of fair-time, probably by permission of the elector in return for services rendered or to be rendered. Thus, on Aug. 15, 1766, there were thirteen such settlers; on Sept. 9, twelve; and on Oct. 30, eleven. After 1788 Jewish visitors to the fair continued to settle permanently in Leipsic, and the council tried in vain to secure from the elector an order for their banishment. They lived in the inner city and in the suburbs and had their places of business wherever they pleased. But as late as 1835 the Jews living in Leipsic, sixty-six in number, were still precluded from engaging in any incorporated trade and could engage only in petty commerce.

Decisions of the two chambers of the Saxon Diet first brought about a change in favor of the Leipsic Jews. A law of May 18, 1837, permitted them to form themselves into a religious community, and as such to have a common house of prayer. A second law, of Aug. 16, 1838, defined the civil position of the Jews. Civil rights were granted to those who were already residents, with the exception, however, of all municipal and political rights. Jews who were not yet residents had to obtain permission from the ministry of the interior before settling.

The first foreign Jew to obtain the privilege of citizenship (Jan. 7, 1839) was the engraver Solomon Veith of Dresden.

Prayer-Rooms at the Fair.

The Jews present in Leipsic at the fair had their rooms for prayer ("Judenschulen"), varying in number according to the attendance. Generally each one was erected by the members of a certain community and named after the place from which the majority of them came. Thus in 1717, besides the Berlin "Judenschule," there were those of Dessau, Halberstadt, Hamburg, and Prague. In the nineteenth century those of Breslau, Brody, Jassy, and Tiktin (Tikotzin) were added for the visitors at the fair. Sometimes, however, as at the New-Year's fair on Jan. 7, 1704, the Jews were prevented from holding divine service, "absolutely and with all seriousness, either in secret or openly in the city or its suburbs."

Community Organized.

The position of "rabbi for the fair" until the beginning of the nineteenth century was usually filled by the rabbi or dayyan of the neighboring community of Dessau. Until 1815, also, the bodies of Jews who died in Leipsic were taken to Dessau for burial (only exceptionally to Halle). In that year the first Jewish cemetery was laid out in Leipsic. During the Michaelmas fair in 1837 Zacharias Frankel, "as chief rabbi of the Jewish communities in Dresden and Leipsic," issued a printed appeal to all Israelites in Germany to assist in building a synagogue in Leipsic. The appeal proved ineffective. Ten years passed before the Jewish community of Leipsic was organized, on the basis of a statute which was approved by the government and which was revised in 1884. On Sept. 8, 1847, Adolf Jellinek was installed as preacher and religious teacher. Preaching in German was introduced in Leipsic at a comparatively early date; first in the so-called Dessau synagogue, then in the German Jewish temple Bet Ya'aḳob. As early as 1818 Joseph Wolf, preacher in Dessau, preached in Leipsic during fair-time; L. Zunz preached there in 1820; I. N. Mannheimer in 1821; Immanuel Wolf in 1822; and I. L. Auerbach was preacher until 1845. Preaching in German was introduced into Leipsic by the members of the Namburg congregation in 1820; and it was due to the popularity of the German sermons delivered by famous preachers to the throngs which gathered in Leipsic from various parts that the practise was introduced also into Berlin, Königsberg, Vienna, Magdeburg, Dresden, and many other communities (Kayserling, "Bibliothek Jüdischer Kanzelredner," i. 4 *et seq.*). Jellinek preached at first (1845) in the Berlin private synagogue for visitors to the fair in Leipsic. In 1849 this synagogue passed into the hands of the community. On Sept. 10, 1855, a new synagogue was dedicated; and in 1864 a new cemetery was opened.

Jellinek, who was called to Vienna at the close of 1857, was succeeded by Abraham Meyer Goldschmidt (1858–89; from 1887 assisted by Abraham Eckstein). Since 1888 Nathan Porges has been officiating as rabbi and preacher in Leipsic. Simon Hurwitz (died at an advanced age on March 6, 1900), author of commentaries on the "Tanya" (Warsaw, 1879) and (in Hebrew) on the Maḥzor Vitry (Berlin, 1884–93), from about the year 1875 had charge of matters pertaining to the ritual slaughter of animals. From May 29 to July 2, 1869, the sessions of the first Jewish synod and of the first German Jewish "Gemeindetag" were held in Leipsic. The "Gemeindetag" developed into the "Gemeindebund" in 1877, which, finding its existence threatened by an order of the Saxon ministry of the interior, of Dec. 16, 1881, changed its seat from Leipsic to Berlin. In 1901 the Talmud Torah, with Dr. Ephraim Carlsbach as director, was founded; and in the following year another private Orthodox society, the Addi Jeschurun, was established with Dr. A. N. Nabel at its head.

The community of Leipsic, of which, according to civil law, every Jew living in the prefecture of Leipsic is a member, and which is in a state of continual growth, numbered at the last census (1900) 6,314 souls, a little more than half of the total number of Jews in the kingdom of Saxony (12,419). The capital of all the benevolent institutions within the Jewish community amounts to about 1,000,000 marks, of which 700,000 marks is controlled by the directorial board of the community.

——**Typography:** The first book printed with Hebrew type at Leipsic was a Latin work, the "Elementale Hebraicum," of Novenianus, a pupil of Pellicanus and lecturer in Hebrew; it appeared in 1520. The first Hebrew work printed there, however, was an edition of the Psalms published by Melchior Lotther in 1533, and prepared for the press by Anthonius Margarita, who had come to the city two years before as lecturer in Hebrew. There has never been a Jewish printing-press in Leipsic, but in the last quarter of the seventeenth century several Hebrew books were published there through the efforts of F. A. Christiani, a convert. The edition of the commentary of Abravanel on the later prophets which appeared in 1685 is especially noticeable for its beautiful print. The numerous Hebrew works published in Leipsic since the middle of the nineteenth century have all been printed by non-Jewish firms.

D. N. P.

LEIPZIGER, HENRY MARCUS: American educator; born at Manchester, England, Dec. 29, 1853; emigrated to New York in 1865; educated at the College of the City of New York (M.A. 1873) and at Columbia College (LL.B. 1875; Ph.D. 1878). Leipziger was a teacher in the New York public schools (1873–81), becoming assistant superintendent of schools (1891–96), superintendent of lectures for the Board of Education (1890–96), and, in 1896, supervisor of lectures in New York city. He was chairman of the library committee of the Aguilar Free Library (1889–1903), president of the New York Library Club (1900–2), and a member of the circulation committee of the New York Public Library (1903).

Leipziger has taken an active interest in extending the system of manual and industrial training in public schools, and has called special attention to the necessity for Jews to engage in mechanical occupations. He was the director and organizer of the Hebrew Technical Institute in New York (1884–1891), president of the Manual Training Department of the National Educational Association (1889), a member of the board of governors of the Hebrew Union College (1893–1902), and, since 1899, has been president of the Judæans. Leipziger is the author of "The New Education," New York, 1888, and of a large number of articles on educational and ethical subjects.

Bibliography: *Who's Who in America*, 1903-5; *The New York Times*, Supplement, Jan. 1, 1900.

A. I. G. D.

LEIRIA: City of Portugal. In 1378 its Jews complained to the king that they were attacked and maltreated by the Christian inhabitants, especially during Holy Week. A Hebrew printing-press was established here in the house of Samuel d'Ortas, who together with his son Abraham issued on July 25, 1492, at the expense of a certain Solomon, an edition of Proverbs, with Targum and commentary. Two years later he printed the Earlier Prophets with the commentaries of Ḳimḥi and Levi ben Gershon. In 1495 the same press issued an edition of Jacob b. Asher's "Ṭur Oraḥ Ḥayyim." Affonso d'Orta, who was a printer at Valencia in 1496, was probably Samuel's son. Leiria, which became later the rendezvous for many Maranos, was the native place of the poet Manuel de Leaõ (Leon).

Bibliography: Kayserling, *Gesch. der Juden in Portugal*, pp. 27, 90; Ersch and Gruber, *Encyc.* section ii., part 28, p. 37; Steinschneider, *Hebr. Bibl.* ix. 80; idem, *Cat. Bodl.* col. 2820; Freimann, *Ueber Hebr. Inkunabeln*, p. 9.

G. M. K.

LEITMERITZ, BENJAMIN WOLF: German glossarist and theologian; son of Isaac Levi; lived at the beginning of the seventeenth century. In his "Amarot Ṭehorot," published by his son Saul, he defines and interprets in alphabetical order the difficult words of the Zohar. His "Yesode Torat Mosheh," an exhaustive dissertation on the dogmatical and ethical principles of Judaism, exists only in manuscript.

S. P. B.

LEITNER, GOTTLIEB WILLIAM: Professor of Arabic; born at Budapest in 1841; died at Bonn March 22, 1899. He was educated at Constantinople and at King's College, London. Showing an aptitude for languages, he was appointed at an early age interpreter to the British commissariat during the Crimean war, with the rank of colonel. He became lecturer in Arabic, Turkish, and Modern Greek at King's College in 1859, and two years later was appointed professor of Arabic and Mohammedan law; he organized the Oriental section of the college. Later he accepted the post of principal of the Lahore Government College, and became the first registrar of the Punjab University, which he established. Leitner founded several literary societies and free public libraries, and published journals in Hindi, Arabic, and English. In 1866 he undertook for the Punjab government an expedition to the almost unknown region lying between Kashmir and Afghanistan.

Leitner wrote a number of works on Indian subjects. He bought a college at Woking, where he provided religious conveniences for Indian students who came to England for education. He edited the "Asiatic Quarterly Review" and took an energetic part in Oriental congresses. After the congress held in Sweden there was a split in the camp of the Orientalists. Leitner conducted the campaign of his own party with the greatest vigor and perseverance, and succeeded in convening a congress at London in 1891.

LEJBOWICZ. See Frank, Jacob.

LEKAH DODI (לכה דודי = "Come, my friend" [to meet the bride]): The initial words of the refrain of a hymn for the service of inauguration of the Sabbath, written about the middle of the sixteenth century by Solomon ha-Levi Alḳabiẓ, who signed eight of its nine verses with his acrostic. The author draws much of his phraseology from Isaiah's prophecy of Israel's restoration, and six of his verses are full of the thoughts to which his vision of Israel as the bride on the great Sabbath of Messianic deliverance gives rise. It is practically the latest of the Hebrew poems regularly accepted into the liturgy, both in the southern use, which the author followed, and in the more distant northern rite.

Ancient Moorish Melody.

Its importance in the esteem of Jewish worshipers has led every cantor and choir-director to seek to devote his sweetest strains to the Sabbath welcome-song. Settings of "Lekah Dodi," usually of great expressiveness and not infrequently of much tenderness and beauty, are accordingly to be found in every published compilation of synagogal melodies. Among the Sephardic congregations, however, the hymn is universally chanted to an ancient Moorish melody of great interest, which is known to be much older than the text of "Lekah Dodi" itself. This is clear not only from internal evidence, but also from the rubric in old prayer-books directing the hymn "to be sung to the melody of 'Shubi Nafshi li-Menuḥayeki,'" a composition of Judah ha-Levi. who died nearly five centuries before Alḳabiẓ. In this rendering, carried to Palestine by Spanish refugees before the days of Alḳabiẓ, the hymn is chanted congregationally, the refrain being employed as an introduction only. But in Ashkenazic synagogues the verses are ordinarily chanted at elaborate length by the ḥazzan, and the refrain is properly used as a congregational response.

Old German and Polish Melodies.

At certain periods of the year many northern congregations discard later compositions in favor of two simple older melodies singularly reminiscent of the folk-song of northern Europe in the century succeeding that in which the verses were written. The better known of these is an air, reserved for the 'Omer weeks between Passover and Pentecost, which has been variously described, because of certain of its phrases, as an adaptation of the famous political song "Lilliburlero" and of the cavatina in the beginning of Mozart's "Nozze di Figaro." But resemblances to German folk-song of the end of the seventeenth century may be found generally throughout the melody.

Less widely utilized in the present day is the special air traditional for the "Three Weeks" preceding the Fast of Ab, although this is characterized by much tender charm absent from the melody of Eli Ẓiyyon, which more often takes its place. But it was once very generally sung in the northern congregations of Europe; and a variant was chosen by Benedetto Marcello for his rendition of Psalm xix. in his "Estro Poetico-Armonico" or "Parafrasi Sopra li Salmi" (Venice, 1724), where it is quoted as an air of the German Jews. Birnbaum ("Der Jüdische Kantor," 1883, p. 349) has discovered the source of this melody in a Polish folk-song, "Wezm ja Kontusz, Wezm," given in Oskar Kolbe's "Piesni Ludu Polskiego" (Warsaw, 1857). An old melody, of similarly obvious folk-song origin, was favored in the London Jewry a century ago, and was sung in two slightly divergent forms in the old city synagogues. Both of these forms are given by Isaac Nathan in his setting of Byron's "Hebrew Melodies" (London, 1815), where they constitute the air selected for "She Walks in Beauty," the first verses in the series. But the melody, which has nothing Jewish about it, was scarcely worth preserving; and it has since fallen quite out of use in English congregations and apparently elsewhere as well.

LEKAH DODI (Melody Before the Fast of Ab)

1. Modern Version.

LELIO DE LA TORRE. See Torre, Lelio de la.

LEMANS, MOSES: Dutch educationist; born at Naarden Nov. 5, 1785; died at Amsterdam Oct. 17, 1832. He was educated by his father and (in mathematics) by Littwack. He became a teacher of religion, and in 1818 chief of the religious school, then recently founded. In 1828 he was appointed teacher of mathematics in the Latin school at Amsterdam. In 1808 he published "Imra-Ẓerufah," on the pronunciation of the Hebrew language, and some years later a Hebrew grammar, "Rudimenta" (1820). In collaboration with Mulder he published a dictionary, "Hebreeusch - Nederduitsch Handwoordenboek" (1829–31).

To defend the Jews against the accusations of the novel "Levi and Sara," then much in vogue, he wrote "De Geest der Talmudische Heer." Besides, he wrote: a biography of Maimonides, 1815; "Proeve van Talmudische Wiskunde," 1816; "Geschiedenis der Sterrenkunde," 1819; "Handleiding tot het Teekenen van Land-, Zee-, en Hemelkaarten," 2 vols., 1826.

Lemans' chief services to Judaism, however, consisted in his efforts, by translating the prayer-books (1822), to propagate among his coreligionists a knowledge of the Dutch language.

Lemans was a member of several mathematical societies; and many of his papers were published in the works of the society Tot Nut en Beschaving.

Delaville wrote an elegy on Lemans ("Elon Muẓ-ẓab," p. 10).

S. E. Sl.

LEMBERG (Polish, **Lwow**): Capital of Galicia, Austria; 180 miles east of Cracow and 60 miles from the Russian frontier. Its population in 1869 was 87,109, of whom 26,694 were Jews; in 1890 it was 127,943, including 36,130 Jews; in 1900 there were 44,801 Jews in a total population of 159,618.

The history of the Jews of Lemberg dates from its foundation in the middle of the thirteenth century. The Jews were among the first settlers, with Ruthenians, Armenians, Tatars, and "Saracens"; they even preceded the German and Polish immigration. These "Saracens" were Karaites, a remnant of the Byzantine Chazars, who migrated from Asia Minor to Ruthenia and Lemberg. The city's records of 1356 distinguished the Karaites as "Saracens" and other Jews as "Judæi" (comp. Sokolow, "Sin'at 'Olam," p. 82, Warsaw, 1882).

Karaites. German Jews expelled from their fatherland settled in Lemberg after its capture by Casimir the Great (1340), who gave the Jews equal rights with the Christians. The Jews of Lemberg enjoyed the same rights under Casimir's successor, Ludwig of Anjou.

Originally, the Jewish quarter was located within the city walls, on the southwest side. The Jews that came later took up their abode outside the walls, in the environs. For a long time the congregation in the city had its own rabbinate, independently of that of the Jews outside; but about the beginning of the seventeenth century they were united under a chief rabbi, with a special bet din for each congregation.

Under Casimir IV. (1447–91) the Jews of Lemberg obtained certain privileges on payment of an exorbitant tax to the king. A general conflagration which visited Lemberg on Aug. 5, 1494, destroyed most of the Jewish dwellings. The Jews were permitted to rebuild on easy terms and, as an inducement to stay, were released from part of their taxes.

Taxes and Business Restrictions.

Under Sigismund I. the Jews of Lemberg engaged in many commercial enterprises, but the German merchants, fearing Jewish competition, induced the Polish noblemen to check the Jewish expansion of trade. In 1521 the magistrate of Lemberg joined the magistrates of the neighboring cities in a petition to the king to abrogate all commercial privileges enjoyed by the Jews. In a letter from the magistrate of Lemberg to that of Posen the Jews are referred to as "infidels and dangerous competitors of Christian merchants." The Cracow diet was induced to propose such measures "to save the Church from ruin." The king, however, refused to sanction them. In his veto he maintained that the Jewish commercial activity was essential to the welfare of the community at large. It was shown that out of a total of 3,700 merchants in Lemberg only 500 were Christians; that the Jews lived economically and were satisfied with small gains, while the Christians were spendthrifts and extorted large profits from purchasers. Furthermore, the Jews promoted a large export trade with Wallachia and Asia Minor, which exceeded the imports and thereby drew money into the country. Jewish business privileges then extended only to the sale of wax, leather, and cattle. The sale of cloth was not permitted them, except at regular fairs. Yet the Jewish merchant was indispensable to the inhabitants of Lemberg; even after the fire in 1527 it was necessary to promise the Jews twenty years' immunity from taxes and to extend their cattle-dealing privileges from 500 to 2,500 head per annum to each dealer as an inducement to them to stay in Lemberg.

Moses Niemiec was made a citizen in return for his conveying a piece of ground to the city authorities for the erection of a public building. Certain privileges and restrictions of trade passed by the diet in 1581 were renewed in 1592 (see Caro, "Gesch. der Juden in Lemberg," p. 37).

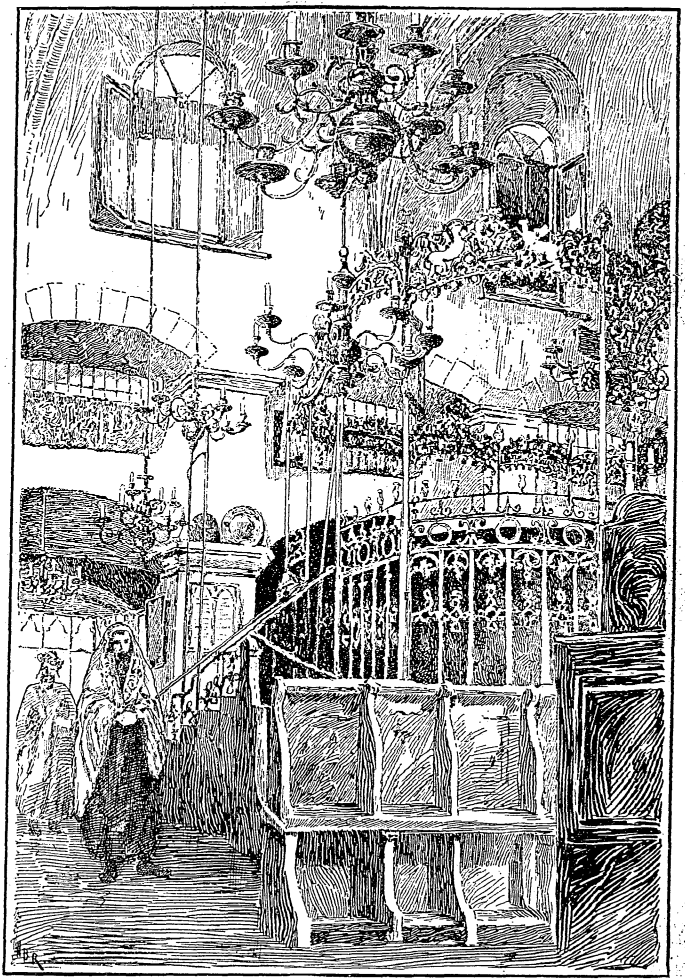
Protection of the Magistracy.

While the Jews in Lemberg suffered restrictions in business, they were not subjected to religious persecutions. Indeed, the Ruthenians suffered just as severely from trade restrictions. It is to the credit of the magistrate of Lemberg that he protected the Jews against the force sent by Pope Pius II., in 1463, under one Szczesny, to aid Hungary in her struggle against the Turks. Szczesny's soldiers would have slain the Jews, but the magistrate of Lemberg shut the gates against them until the Jews had secured themselves by the payment of a ransom. The persecution of the Jews in Lemberg did not commence before Sept. 1, 1592, when the archbishop, Solikowski, invited the Jesuits to build a church in Lemberg; the date of that event is marked in black letters in the Jewish calendar. It was the beginning of the anti-Jewish movement in Lemberg, and blood accusations and desultory attacks soon culminated in murder and plunder. Jesuit machinations in 1603 resulted in the confiscation of the Jewish synagogue and grounds for a Jesuit church and school, on the pretext that the Jewish title to the property was invalid. The Jews protested, but the courts decided against them, and they were compelled to deliver the keys of the synagogue to the Jesuits. Fortunately for the Jews, their opponents were divided; Rabbi Kalman of Worms and his wife, Rosa ("the golden Rose"), appealed to Archbishop Zamoyski, and finally succeeded in reclaiming the property, after a lapse of four and a half years, by paying a ransom of 4,000 guilders. On Purim, 1609, the synagogue was rededicated with great rejoicing, and a special hymn by Isaac ha-Levi was sung. The hymn was afterward inserted in the liturgy for the Sabbath following Purim and was recited annually.

In Sept., 1648, the Cossacks under Chmielnicki besieged Lemberg and reduced the town to the verge of starvation, withdrawing upon receiving an enormous ransom, a considerable part of which was paid by the Jews.

The Jesuits concocted another blood accusation in 1728, and incited the followers of Shabbethai Ẓebi, the false Messiah, against the Jews in Lemberg. The Frankists had been solemnly excommunicated by the rabbis of Lemberg in 1725; the Jesuits, therefore, induced the Frankists to revenge themselves by embracing Christianity and accusing the Jews of using Christian blood for the Passover service. The canon De Mikulski later arranged for a disputation in Lemberg in June, 1759, between the rabbis and the Frankists, which resulted in renewed persecution of the Jews of Lemberg.

Lemberg was, also, a center of modern Ḥasidism; but such men as Joseph Perl (1773–1839) and Solomon Löb Rapoport (1790–1807) opposed the movement, the former by the establishment of a model high school for Jewish and secular instruction and with his persuasive pen, especially in his "Megalleh Ṭemirin," written in a peculiar Hebrew jargon, and exposing the methods of the Ḥasidim. Rapoport founded a literary circle with a library supported by Judah Löb Mises (d. 1831), thus providing ambitious young men with a liberal education.



Interior of the Synagogue on Wechslergasse, Lemberg.

Institutions.

Lemberg is well provided with Jewish institutions. The first synagogue was built by the Karaites in 1582. The Ashkenazic synagogue, the title to which was contested by the Jesuits, followed in 1632; this ancient building has capacious vestry-rooms that are now used as separate synagogues. Since the Karaites removed from Lemberg their synagogue has been occupied by Rabbinite Jews. Altogether, Lemberg has three large synagogues and nine smaller synagogues, two batte ha-midrashot, the "Chorschule," or "Temple" (dedicated in 1846), a commodious Jewish hospital, an orphan asylum, a technical school, regular Talmud Torah schools, and several yeshibot. A new Jewish hospital costing 800,000 crowns ($160,000) was founded Oct. 1, 1902, to commemorate the seventieth birthday of Prof. Moritz Lazarus.

Title to the old Jewish cemetery was granted by the city authorities in 1414, when several burials had already been made, as indicated by a tombstone, of a youth named Jacob, dated 1348, and by another tombstone, of Miriam, or Marysia, daughter of Samuel, dated 1380 (Tammuz 2d). This cemetery is surrounded by a stone wall, with Karaite graves close to the wall. The second cemetery was opened in 1856.

Lemberg has seven Jewish printing establishments, the first dating from 1611. During the eighteenth century it was the principal Austrian center for Hebrew publications. Since the removal of censorship in 1848 the printing of Jewish works has greatly increased. As a commercial and industrial center Lemberg is even more important than Cracow. Next to the Germans, the Jews control the greatest amount of business.

The following is a list of the rabbis of Lemberg:

Levi b. Jacob Kikenes (d. 1503; it is doubtful if he was ever official rabbi); **Kalman of Worms** (teacher of Isserles; rabbi from 1518 to 1560); **Asher b. Isaac Kohen** (d. 1582); **Eliezer** (son-in-law of Kalman of Worms; d. 1590); **Moses b. Mordecai Ashkenazi** (d. 1600); **Jacob Koppel b. Asher ha-Kohen** (d. 1630); **Mordecai Ẓebi-Hirsch Ashkenazi** (d. 1636); **Joshua-Höschel Falk b. Joseph** (author of "Maginne Shelomoh" and "Pene Yehoshua'"; d. in Cracow

1648); **Meshullam Salzburg b. Abraham Ashkenazi** (d. 1645); **Joseph b. Eliakim Goetz** (d. 1652); **David b. Samuel ha-Levi** (d. 1667; author of "Ṭure Zahab"); **Hirsch Klausner** (rabbi in the city); **Judah b. Jacob of Lublin** (rabbi outside the city; d. 1697); **Elijah b. Abraham Ḳalmankes of Lublin** (d. 1636, while delivering a lecture on the Sabbath preceding Passover); **Solomon b. Isaac ha-Levi** (d. 1638); **Meïr b. Abraham Sack** (d. 1654); **Naphtali Herz b. Judah Selki of Cracow** (d. 1669); **Ẓebi Hirsch b. Zechariah Mendel Klausner** (d. 1691 in Lublin); **Moses Phinehas b. Israel Ḥarif** (d. 1702); **Joel b. Isaac (Eisik) Heilprin** (d. 1710); **Ẓebi Hirsch b. Jacob Ashkenazi** (the "Ḥakam Ẓebi"; d. 1718); **Simḥah b. Naḥman ha-Kohen Rapoport of Lublin** (d. 1718); **Moses Ḥayyim Lemberger** (d. 1725); **Jacob Joshua b. Ẓebi Hirsch** (till 1731; d. 1756 in Berlin); **Judah Löb Oettinger b. Eliezer ha-Levi** (d. 1739); **Aryeh Löb b. Saul of Cracow** (d. 1771); **Ḥayyim ha-Kohen Rapoport b. Simḥah** (d. 1741); **Solomon b. Moses Chelma** (author of "Merkebet ha-Mishnah"; d. 1785 in Jerusalem); **Meïr b. Ẓebi Hirsch Margolioth** (author of "Meïr Netebim"; d. 1790); **Abraham b. Jacob Koppel** (d. 1828); **Jacob Meshullam Ornstein** (author of "Yeshu'ot Ya'aḳob"; d. 1839); **Simḥah Nathan Ellenberg**; **Joseph Saul Nathansohn** (author of "Shoel u-Meshib," responsa; d. 1875); **Isaac Aaron Ettinger** (author of a collection of responsa; d. 1891); **Ẓebi Hirsch Ornstein** (d. 1898).

The present rabbis are Isaac Schmelkes and Dr. Caro.

Among the writers whose names are associated with Lemberg are:

Joshua Falk ha-Kohen (Katz) b. Alexander (author of "Sefer Me'irat 'Enayim"; d. 1614); **Abraham Schrenzel ha-Kohen Rapoport** (author of "Eton ha-Ezraḥi"; d. 1651); **Isaac Ḥayyot b. Jacob** (author of "Zera' Yiẓḥaḳ"); **Abraham Ḥayyim b. Naphtali Schorr** (author of "Torat Ḥayyim"; d. 1632); **Abraham b. Moses Heilbron Ashkenazi** (author of "Ahabat Ẓiyyon"; d. 1649); **Meïr b. Samuel Te'omim** (author of "Birkat Yosef"); **Joseph b. Meïr Te'omim** (author of "Peri Megadim"); **Samuel Solar** (author of "Shem me-Shemuel"); **Ẓebi Hirsch Rosanus** (author of "Tesha' Shiṭṭot"); **Meshullam b. Joel Kohen** (author of "Pitḥe Niddah"); **Isaac b. Ẓebi Ashkenazi** (author of "Torat ha-Ḳodesh"); **Abraham Mendel Mohr** (author of "Shebile 'Olam").

The present (1904) president of the Cultus Gemeinde is S. von Horowitz.

Following is a summary of the provisions of the regulation of 1569:

The waywode must appoint, as his representative for the administration of Jewish affairs, none but an estated Polish nobleman.

The Jewish books or records must be kept in the Jewish prayer-house, or synagogue, encased, and under lock and key.

If the judge [a Polish nobleman] having the books in his possession inserts therein any records or regulations whatsoever without the consent of the Jewish elders, such records or regulations shall be void.

The judge has no right to appoint, without the consent of the Jewish elders, a secretary for the keeping of the Jewish books.

The Jewish elders shall be elected by the members of the community only. The election of the elders must be approved by the waywode.

The waywode shall not impose upon a Jew a fine greater than three ten-copeck pieces; the judge receives as his fee from the offender one pound of pepper, in compliance with the prescriptions of the royal statute [*i.e.*, the privileges of Boleslav of Kalisz]. These fines, moreover, must be in conformity with the law, and must be imposed by the judge in conjunction with the Jewish elders.

The Jewish synagogue can not be closed nor its property attached otherwise than by special imperial order.

The right is left to the Jews to kill their cattle and sell them to Christians and to any others as they will, in compliance with the customs practised among other Jews, as those of Cracow, Posen, and Lublin.

The Jewish elders have the right to punish Jews by excommunication or otherwise, in compliance with their Law, and none shall hinder them in so doing.

The waywode has no right to appoint any rabbi other than the one elected to the office by the Jews themselves.

The judge appointed by the waywode has no right to make any decree except in conjunction with the Jewish elders. The elders shall be tried only by the waywode or by the judge appointed by him, and may then appeal to the tribunal of the king himself; summoned otherwise, they are not obliged to respond, and may treat such a summons as unauthoritative.

LEMBERGER, JUDAH LÖB: Judæo-German author of the seventeenth century. He was probably the son of the publisher Abraham Lemberger of Prague. Judah Löb Lemberger was the author of a work in Judæo-German, entitled "Ein Hübsch Göttlich Büchel" (Prague, n.d.), a selection of moral sayings from the Talmud and other rabbinical works, with an appendix, "Ḥibbuṭ ha-Ḳeber," on the sufferings of the dead in the grave.

LEMMLEIN (LÄMMLIN), ASHER: Pretended forerunner of the Messiah. He appeared in Istria, near Venice, in 1502, and announced the coming of the Messiah in that very year, provided the Jews showed repentance and practised charity. Having gained many adherents in Italy, Lemmlein traveled through Austria and Germany, receiving there both sympathy and credence. Even Christians are said to have believed in his Messianic prophecy. The chronicler Ganz relates that his grandfather destroyed an oven destined for the baking of unleavened bread, firmly believing that at the next Passover he would be with the Messiah in Palestine. There were much fasting, much praying, and much distribution of alms wherever Lemmlein passed, so that the year of his propaganda was called the year of penitence. But he suddenly disappeared; and the agitation came to an end.

G. I. Br.

LEMON, HARTOG (called in contemporary Hebrew works **Hirz b. Hirsch Wiener** or **Hirz**

Levi Rofe): Dutch physician and worker for the emancipation of the Jews; born about the middle of the eighteenth century; died at an advanced age at Amsterdam Dec. 5, 1823. On the completion of his medical studies he was appointed physician for the poor by the parnasim of the Ashkenazic community of Amsterdam (1788). When the French took possession of Holland (1795), Lemon became one of the leaders of the Felix Libertate Society, which aimed at winning civic equality for the Jews (see AMSTERDAM). The parnasim, who did not approve of this movement, dismissed him from his office (April, 1795). Lemon, however, continued his efforts to procure the emancipation of the Dutch Jews; and he interested himself also in the organization of a new Jewish community at Amsterdam. He was successful in both directions: the Jews of Holland were emancipated on Sept. 2, 1796; and on June 23, 1797, Lemon as president delivered the inaugural address of the synagogue of the new congregation Adath Jeschurun (published Amsterdam, 1797). On Aug. 1, 1797, Lemon, together with S. Bromet, was elected a member of the parliament ("Nationale Conventie"). The Adath Jeschurun also sent him, together with two other members, as delegate to the Great Sanhedrin at Paris, where he delivered two discourses ("Bijdragen Betrekkelijk de Verbetering van den Maatschappelijken Staat der Joden," part i., pp. 471-472, 513-515, The Hague, 1806-7).

When in 1808 the two congregations were reunited, Lemon was a member of the Opper Consistorie der Hollandsche-Hoogduitsche Israelietsche Gemeenten in Holland.

Accused of participating in a conspiracy against the French government, Lemon was suddenly arrested during the night of Feb. 12-13, 1813, and sentenced to two years' imprisonment and a fine of 500 francs, with costs. He was taken first to the state prison at Ham (France), and then to Amiens, and was not liberated until April 6, 1814. On his return to Holland he wrote a defense, under the title "Jets Over de Nooit Plaats Gehad Hebbende Zamenzwering te Amsterdam in Februari, 1813" (Amsterdam, 1815).

Lemon was a physician of repute. His two works, "Voorschrift ter Genezinge van de Tusschen-Poozende of Zoogenaamde Koude Koortsen door Middel van Tourniquets" (*ib.* 1808), and "Proeve eener Beknopte en Letterkundige Geschiedenis van het Stelsel van Brown" (*ib.* 1811), testify to his scientific attainments. Among his other literary works may be mentioned a Dutch translation of the German tragedy "Bella" (*ib.* 1789).

One of Lemon's daughters was married to J. Littwak, a well-known Jewish mathematician of Amsterdam, who also took part in the struggle for emancipation.

D. S. SE.

LEMOS, HENRIETTE DE. See HERZ, HENRIETTE.

LEMUEL: A king mentioned in the superscription to Prov. xxxi., which is addressed to him by his mother. Various theories have been proposed in explanation of the superscription. Cheyne reads "Jerahmeel." Others (*e.g.*, Wildeboer) join the phrase "Lemuel the king" with the following word, "massa" (A. V., following the Masoretic punctuation, "prophecy"), which they take as a proper name, and read "King of Massa," an Ishmaelite people (Gen. xxv. 14). Toy ("Proverbs," p. 539) rejects this together with any symbolical interpretation. The word "Lemuel," like "Lael," means "Godward" (comp. Gray, "Hebrew Proper Names," p. 207, *s.v.* "Nemuel").

E. G. H. E. I. N.

LENCHITZA (Polish, **Leczyca**): District town in the government of Kalisz, Russian Poland. On April 20, 1639, members of its Jewish community were accused of ritual murder, owing to the disappearance of a Christian child, aged one and one-half years, from the neighboring village of Kamashitza, and the subsequent discovery, in the adjacent woods, of its body covered with many wounds. Suspicion fell on a local tramp, Foma, who, when arrested and questioned, confessed to having abducted the child at the instigation of the Jews of Lenchitza. The ancient right of appeal to the king being ignored, the case was tried by the local authorities, who were openly prejudiced against the Jews. Many members of the community were placed on the rack; and two of them, Lazar and Maier, were quartered. The monks in the local Bernardine monastery made use of the incident to inflame popular hatred against the Jews. They placed the remains of the supposedly martyred child in the cathedral, together with a painting and a detailed description of the murder. The superstitious Catholic masses made pilgrimages to the relics of the supposed saint; and the income of the Bernardine monastery was thereby greatly augmented. In commenting on the frequent charges of ritual murder against the Jews shortly before the Cossack uprisings, Bershadski says: "Such was the condition of the Jews on the eve of the Cossack and Shlyakhta wars. Abandoned by the kings and the Shlyakhta, and in constant warfare with the clergy, they were helpless in dealing with the accusations of ritual murder. Such accusations were, moreover, easily spread. When a child left alone had disappeared, and its body had been found covered with wounds several days or a week later in the woods, it was immediately concluded that the members of the nearest Jewish community were guilty of the murder. They were formally charged with it; legal proceedings were instituted; and the rack invariably showed the guilty one!"

Among the prominent rabbis born at Lenchitza should be mentioned Rabbi Ephraim, author of "'Olelot Efrayim," who died in 1619.

The Jewish community of Lenchitza suffered severely at the hands of the Polish general CZARNIECKI, 300 of their number perishing by the sword. In 1710 seven Jews were burned at the stake under the accusation of stealing consecrated bread and of practising the magic arts.

At the present time (1904) the Lenchitza Jews number about 2,000 in a total population of 9,044.

LENGFELD, FELIX: American chemist; born at San Francisco Feb. 18, 1863; educated at the San Francisco College of Pharmacy, the University of California, Johns Hopkins University, and at Zurich, Liége, Munich, and Paris. Lengfeld has been fellow of Johns Hopkins University (1887–88), professor of chemistry in the South Dakota School of Mines (1890–91), instructor in chemistry at the University of California (1891–92), and docent-instructor and assistant professor in chemistry at the University of Chicago (1892–1901). He is the author of "Laboratory Manual of Inorganic Preparations," and has contributed numerous articles to American and foreign journals of science.

A. I. G. D.

LENTILS (Hebr. "‘adashim"; Arabic "‘adas"): Edible seeds first mentioned in the Old Testament in Gen. xxv. 29–34, where it is related that Jacob gave Esau "bread and pottage of lentils" for his birthright. Lentils were also among the provisions brought by Barzillai to David when the latter was in exile (II Sam. xvii. 28); and they seem to have been, as at present in Palestine and in other countries, a common article of food (comp. *ib.* xxiii. 11). From Ezek. iv. 9 it appears that in times of scarcity lentils, ground and mixed with other ingredients, were made into bread, a practise still in vogue in modern Egypt.

According to De Candolle ("Origin of Plants," p. 257), the lentil (*Ervum Lens*) was probably a native of western Asia. In some parts of Palestine it is still the predominant crop. Of the several varieties the red lentil (comp. Gen. xxv. 30) is considered the best. The lentil held a high place also among the ancient Egyptians, and the variety of Pelusium was especially celebrated (comp. Vergil, "Georgics," i. 228; Pliny, "Historia Naturalis," xvi. 201).

In Talmudic times lentils seem to have been one of the staple foods of Palestine. Thus in Pes. 3b lentils as human food are contrasted with barley as food for cattle (comp. Shab. 76b). In Beẓah 14b they are even referred to as a feast-day dish in the house of Gamaliel. The Egyptian lentil is pointed out as being of medium size, and as the measure of a particle from a "creeping thing" ("shereẓ") to cause uncleanliness (Kelim xvii. 8; comp. Ma‘as. v. 8). In connection with Gen. xxv. it is said (B. B. 16b; comp. Gen. R. lxiii. 14) that lentils form a suitable dish for mourners because they have no "mouth" (*i.e.*, "slit"), like the mourner who in his anguish is struck dumb, and by their round form they symbolize the going around of trouble and loss in this world.

LEO: Court physician to Grand Duke Ivan III. Vassilivich of Russia; executed at Moscow April 22, 1490. With the arrival at Moscow of the grand duke's second wife, Sophia Palæologus, niece of Constantine, the last Byzantine emperor (1473), active intercourse began between Russia and western Europe. In 1490, when the brother of the grand duchess, Prince Andreas of Morea, and the Russian ambassador to Rome visited the court of Moscow, they brought with them, besides some artists and mechanics, a physician from Venice, named Leo. He was a Jew by birth, and is mentioned by the Russian historians as "Mister Leon Zhidovin" (= "the Jew"). He was probably the first physician from western Europe to enter Russia.

Leo had to pay for his temerity with his life; for he fell a victim to the superstition of the Muscovites. Soon after his arrival he had an opportunity to show his skill. Ivan Ivanovich, the son of the grand duke, had the gout; Leo, placing too much faith in his skill, assured the grand duke that he could effect a cure, and pledged his head in case of failure. He treated the patient with herbs and dry-cuppings; but the prince became worse, and died March 7, 1490. At that time the people believed in the infallibility of medical science, and accordingly they accused the unsuccessful physician of ill-will. Leo was arrested, and, after the forty days of mourning had elapsed, was publicly beheaded at Bolvanov Place.

LEO III.; LEO IV. See Chazars.

LEO X. (GIOVANNI DE MEDICI): Two hundred and twenty-fourth pope; born at Florence Dec. 11, 1475; elected March 11, 1513; died Dec. 1, 1521. His pontificate was very favorable for the Jews in general and for the Jews of Rome in particular. The latter saw in the kind treatment they received at his hands a sign of the arrival of the Messiah; and so much impressed were they with this idea that the leaders of the Roman community asked those of Jerusalem if such signs were not visible in the Holy Land. While still a cardinal, Leo showed his spirit of toleration in bestowing his favor upon two Jewish musicians, Joan Maria and Jacopo Sansecondo, especially upon the former, who subsequently received from him the title of count. Like his predecessor, Alexander VI., Leo attached to his person as physician the Jewish rabbi Bonet de Lates; and De Lates exercised such influence upon the pope that Reuchlin solicited his intervention in connection with the examination of the "Augenspiegel." Another Jew who was persona grata at the papal court was Sabbatiano Solomonis, upon whom, in acknowledgment of his services, Leo bestowed a yearly pension of 60 gold ducats.

The Jews of Rome were not the only beneficiaries of Leo's generosity. In a bull issued Sept. 8, 1514, Leo expressed his desire that the rights of the Jews should be respected, and repealed the edict of the Bishop of Carpentras, who had prescribed a special badge to be worn by the Jews of Avignon, Carpentras, and Venaissin. Of still greater importance was the bull of Nov. 1, 1519, in which the pope remitted the Jewish hearth and banking taxes, granted amnesty for all offenses committed by Jews, confirmed all the privileges and advantages granted to them by his predecessors, and prescribed that a Jewish offender should be arraigned before qualified judges and should be condemned only on evidence given by trustworthy witnesses. Leo took a lively interest in Jewish learning. In 1518 he authorized the establishment of a Hebrew printing-office in Rome, and in the same year granted a special privilege for the issuance of a new edition of the Talmud.

G. I. BR.

LEO HEBRÆUS (Abravanel, Judah): Physician, philosopher, and poet; born in Lisbon in the second half of the fifteenth century, and died at Venice in 1535. He accompanied his father, Isaac Abravanel, when the latter went to Spain and afterward to Naples, and became physician in ordinary to the Spanish captain-general Gonsalvo de Cordova. Thence he went to Genoa and later to Venice, where he finally settled. He never abandoned the faith of his forefathers (B. Zimmels, "Neue Studien," Vienna, 1892; E. Carmoly, "Oẓar Neḥmad," ii. 70; Steinschneider, "Monatsschrift," xlii. 420). His most important work, "Dialoghi di Amore" (Dialogues of Love), was written about 1502, and published at Rome 1535. Its polished Italian and the lofty Platonic spirit with which it is imbued made it very popular. In the space of twenty years it went through five editions and was translated twice into French, three times into Spanish, and once into Latin; later also into Hebrew. Beside this work, he wrote, at the request of Pico de Mirandola, an astronomical work, which has remained unpublished, and several Hebrew poems, which have been embodied in the works of his father. He wrote also an elegy on the vicissitudes of the age in which he lived. This book was quite recently published.

G. M. K.

LEO, LEWIS: Synagogue musician; born in London in 1809; died there Sept. 11, 1876; second son of the Rev. Simon Leo. He was a musician and composer of much ability, and was the first to arrange the various Hebrew chants and melodies for part-singing (1838), which eventually replaced the old "bass-and-singer" style. Leo wrote the music for the inaugural service of the New Synagogue, and for the reconsecration of the Western Synagogue in 1836.

His father, **Simon Leo**, was ḥazzan at the Denmark Court Synagogue, London. In 1826 he removed with the congregation to St. Alban's Place, and continued to officiate there. He was succeeded by his eldest son, **Ansell Leo**, about 1837. The latter left England for New York in 1846, where he held a similar position.

LEON: Ancient Spanish kingdom, bounded by Old Castile, Portugal, and Galicia. The Saracens ruled here until driven out by the Spaniards, who founded a kingdom of their own, which in 1218 was incorporated with Castile. In this kingdom of Leon, with its capital of the same name, Jews were living at an early date, certainly at the end of the tenth century. They were engaged in cultivating the vine and in various trades. Hebrew bills of sale dating from the beginning of the eleventh century have been found at Leon. Before the year 1006 the Abbess of Santiago purchased a vineyard from the Jew Jayu (Haya). Other Jews of Leon are also mentioned in this period; *e.g.*, Ezekiel, Samuel (1007), Vitas-Ḥayyim (1008), Jacob (1031), and Shem-Ṭob (1049). According to a document preserved in the archives of the Cathedral of Leon, the Infanta D. Fronilda, daughter of D. Pelayo, who restored Christian supremacy after the invasion of the Saracens, purchased Nov. 4, 1053, from the Jew Joseph b. Joab Escapat for the sum of 50 dineros a vineyard at Montaurio; and in 1137 Auro Tota, daughter of Cid Crescent, and her husband, Isaac b. Moses of Leon, sold one-half of a vineyard situated in Castrillo de la Ribera, near Leon, to the "canonicus" Albertin. In 1151 Pedro Pelasz bought a vineyard from Auro, daughter of Cid, and her husband, Abraham b. Meïr Mogusi ("R. E. J." ii. 136, iv. 226).

The earliest Hebrew inscription in Spain was found at Fuente Castro, the ancient "Castrum Judæorum" at Leon; it came from the tombstone of Yaḥya, the son of the goldsmith Joseph b. Aziz of Leon, who died on the 15th of Kislew, 4860 (= Nov. 18, 1100), and is now preserved in the archeological museum at Leon (Rios, "Estudios," p. 29; *idem*, "Hist." i. 169; "R. E. J." ii. 135).

Rights and Restrictions.

The Jews of Leon were assured equal rights with the Christian inhabitants of the country by the Cortes assembled at Leon in 1020 as well as in the Fuero of 1090; they were also permitted to take part in duels; but they were subjected to special taxes. The Bishop of Leon received for himself and his clergy 500 sueldos a year from those taxes. When the Cortes, assembled at Leon in 1349, proposed that the Jews and Moors "living in the cities, boroughs, and villages of the kingdom of Leon" should pay the salaries of the judges and alcaldes, "because they pronounce sentence for them," the king declared that no taxes in addition to the special taxes could be imposed upon the Jews (Cortes de Leon y Castilla, of the year 1349, Pet. ii.). In 1290 the Jews of Leon paid altogether 218,400 maravedis. The most important "aljamas" of the country were: Leon, Mansilla (Mansiella) de las Mulas, Mayorga, Sahagun, Paredes, Valencia de Don Juan, Rueda, Astorga, Almanza, and Carrion de los Condes. At Leon, where the Jews, like those at Mansilla, were very wealthy, there lived in the first half of the fourteenth century D. Abraham Royuelo, who, together with Sara, widow of Samuel Commineto, and Saul b. Uzziah of Mansilla, lent money to the knight Pedro Alfonso de Boygas of Rueda on his estates, which after his death passed into the possession of the monastery of San Miguel de Escalana. D. Abraham, who then rented from the spendthrift prior of the monastery all the privileges and income of the same for a period of twenty-five years, in consideration of 5,000 maravedis a year, was ordered by the king after a few years to renounce all his claims. Many Jews at Leon, Mansilla, and other cities succumbed to the plague in 1348 and 1349. In 1365 King D. Pedro of Castile obliged the Jews of Leon to contribute to the municipal taxes, from which they had hitherto been exempt. The Jews of Leon escaped neither the persecutions of the year 1391 nor the missionary sermons of Vicente Ferrer in 1412. The storm broke out at Benevent, as a dirge says, sweeping across Leon, Valencia de D. Juan, Astorga, Mayorga, and Palencia (Introduction to Simeon b. Ẓemah Duran's "Magen Abot," ed. A. Jellinek, Leipsic, 1855).

Synagogues in Leon.

King Alfonso VIII. commissioned the Jews of Mayorga to guard the castle there. Carrion de los Condes was inhabited chiefly by Jews, who enjoyed ancient privileges. The Jews of Valencia de D. Juan erected in 1379 a handsome large synagogue in place of a small one, thereby incurring the anger and envy of the clergy of that city; the synagogue was in consequence transformed into a church soon after its completion. The Jews of Bembibre, a place not far from the city of Ponferrada, had a similar experience. Together with their coreligionists who lived scattered round about, they had replaced their old synagogue by a larger and handsomer building a few years previous to the general expulsion. It had just been dedicated when an abbot of the city forcibly entered it, removed the Torah rolls, set up a crucifix, and consecrated the building as a church. The Jews appealed to the authorities, who ordered the removal of the crucifix, and the restitution of the synagogue to its owners. The abbot, however, insisted that since the building had been dedicated as a church, it must remain a church, and he carried the matter to the Bishop of Cordova, D. Inigo Manrique, formerly Bishop of Leon and subsequently grand inquisitor. The latter decided the case in agreement with a bull of Innocent IV., dated April 15, 1250, according to which the Jews of Leon and Castile were not allowed to build new synagogues without special permission. As they had not complied with this condition they had forfeited their property rights; and the synagogue, having been dedicated as a church, could not be restored to them. The abbot, however, was ordered to erect instead a substantial new building, 200 feet (five "tapicas") high, 35 feet long, and 25 feet wide, on a site to be assigned to him by the city, and to hand it over to the Jews within six months. This verdict was delivered to the abbot in presence of the representative of the "aljamas," R. Isaac Connueto, on May 19, 1490. The synagogue dedicated as a church still exists. Two years later the Jews of the former kingdom of Leon left the country. Their movables and real estate, which they were obliged to sell at any price, fell in part into the hands of the clergy. See PALENCIA; SAHAGUN.

LITERARY DIRECTORATE

EDITORIAL BOARD

CYRUS ADLER, Ph.D.

(Departments of Post-Biblical Antiquities and the Jews of America.)

President of the American Jewish Historical Society; Librarian, Smithsonian Institution, Washington, D. C.

WILHELM BACHER, Ph.D.

(Departments of the Talmud and Rabbinical Literature.)

Professor in the Jewish Theological Seminary, Budapest, Hungary.

GOTTHARD DEUTSCH, Ph.D.

(Department of History from 1492 to 1904.)

Professor of Jewish History, Hebrew Union College, Cincinnati, Ohio; Editor of "Deborah."

RICHARD GOTTHEIL, Ph.D.

(Departments of History from Ezra to 1492 and History of Post-Talmudic Literature.)

Professor of Semitic Languages, Columbia University, New York; Chief of the Oriental Department, New York Public Library.

EMIL G. HIRSCH, Ph.D., LL.D.

(Department of the Bible.)

Rabbi of Chicago Sinai Congregation, Chicago, Ill.; Professor of Rabbinical Literature and Philosophy, University of Chicago; Editor of "The Reform Advocate."

JOSEPH JACOBS, B.A.

(Departments of the Jews of England and Anthropology; Revising Editor.)

Formerly President of the Jewish Historical Society of England; Author of "Jews of Angevin England," etc.

KAUFMANN KOHLER, Ph.D.

(Departments of Theology and Philosophy.)

President of Hebrew Union College, Cincinnati, Ohio; Rabbi Emeritus of Temple Beth-El, New York.

HERMAN ROSENTHAL.

(Department of the Jews of Russia and Poland.)

Chief of the Slavonic Department, New York Public Library.

ISIDORE SINGER, Ph.D.

Managing Editor.

(Department of Modern Biography from 1750 to 1904.)

CRAWFORD HOWELL TOY, D.D., LL.D.

(Departments of Hebrew Philology and Hellenistic Literature.)

Professor of Hebrew in Harvard University, Cambridge, Mass.; Author of "The Religion of Israel," etc.

I. K. FUNK, D.D., LL.D.

(Chairman of the Board.)

Editor-in-Chief of the Standard Dictionary of the English Language, etc.

FRANK H. VIZETELLY, F.S.A.

(Secretary of the Board.)

Associate Editor of the Standard Dictionary, "The Columbian Cyclopedia," etc.

WILLIAM POPPER, M.A., Ph.D.

(Associate Revising Editor; Chief of the Bureau of Translation.)

Gustav Gottheil Lecturer in Semitic Languages, Columbia University, New York (1903-5); Author of "The Censorship of Hebrew Books."

AMERICAN BOARD OF CONSULTING EDITORS

BERNARD DRACHMAN, Ph.D.,

Rabbi of the Congregation Zichron Ephraim; Instructor in the Bible and in Hebrew Grammar, Jewish Theological Seminary of America, New York.

B. FELSENTHAL, Ph.D.,

Rabbi Emeritus of Zion Congregation, Chicago, Ill.; Author of "A Practical Grammar of the Hebrew Language."

GUSTAV GOTTHEIL, Ph.D.

(Deceased),

Late Rabbi Emeritus of Temple Emanu-El, New York.

HENRY HYVERNAT, D.D.,

Head of the Department of Semitic and Egyptian Literatures, Catholic University of America, Washington, D. C.

MARCUS JASTROW, Ph.D.

(Deceased),

Late Rabbi Emeritus of the Congregation Rodef Shalom, Philadelphia, Pa.; Author of "Dictionary of the Talmud."

MORRIS JASTROW, Jr., Ph.D.,

Professor of Semitic Languages and Librarian in the University of Pennsylvania, Philadelphia, Pa.; Author of "Religion of the Babylonians and Assyrians," etc.

J. FREDERIC McCURDY, Ph.D., LL.D.,

Professor of Oriental Languages, University College, Toronto, Canada; Author of "History, Prophecy, and the Monuments."

H. PEREIRA MENDES, M.D.,

Rabbi of the Shearith Israel Congregation (Spanish and Portuguese), New York; President of the Board of Jewish Ministers, New York.

MOSES MIELZINER, Ph.D., D.D.

(Deceased),

Late President of the Hebrew Union College, Cincinnati, Ohio; Author of "Introduction to the Talmud."

GEORGE F. MOORE, M.A., D.D.,
Professor of Biblical Literature and the History of Religions in Harvard University, Cambridge, Mass.; Author of "A Commentary on the Book of Judges," etc.

DAVID PHILIPSON, D.D.,
Rabbi of the Congregation B'ne Israel; Professor of Homiletics, Hebrew Union College, Cincinnati, Ohio; President of Hebrew Sabbath School Union of America.

IRA MAURICE PRICE, B.D., Ph.D.,
Professor of Semitic Languages and Literatures, University of Chicago, Ill.; Author of "The Monuments and the Old Testament," etc.

SOLOMON SCHECHTER, M.A., Litt.D.,
President of the Faculty of the Jewish Theological Seminary of America, New York; Author of "Studies in Judaism."

JOSEPH SILVERMAN, D.D.,
President of Central Conference of American Rabbis; Rabbi of Temple Emanu-El, New York.

JACOB VOORSANGER, D.D.,
Rabbi of the Congregation Emanu-El, San Francisco, Cal.; Professor of Semitic Languages and Literatures, University of California, Berkeley, Cal.

EDWARD J. WHEELER, M.A.,
Editor of "The Literary Digest," New York; Author of "Stories in Rhyme," etc.

FOREIGN BOARD OF CONSULTING EDITORS

ISRAEL ABRAHAMS, M.A.,
Coeditor of "The Jewish Quarterly Review"; Author of "Jewish Life in the Middle Ages," etc.; Reader in Talmudic, Cambridge University, England.

M. BRANN, Ph.D.,
Professor in the Jewish Theological Seminary, Breslau, Germany; Editor of "Monatsschrift für Geschichte und Wissenschaft des Judenthums."

H. BRODY, Ph.D.,
Rabbi, Nachod, Bohemia, Austria; Coeditor of "Zeitschrift für Hebräische Bibliographie."

ABRAHAM DANON,
Principal of the Jewish Theological Seminary, Constantinople, Turkey.

HARTWIG DERENBOURG, Ph.D.,
Professor of Literal Arabic at the Special School of Oriental Languages, Paris; Member of the Institut de France.

S. M. DUBNOW,
Author of "Istoriya Yevreyev," Wilna, Russia.

MICHAEL FRIEDLÄNDER, Ph.D.,
Principal of Jews' College, London, England; Author of "The Jewish Religion," etc.

IGNAZ GOLDZIHER, Ph.D.,
Professor of Semitic Philology, University of Budapest, Hungary.

M. GÜDEMANN, Ph.D.,
Chief Rabbi of Vienna, Austria.

BARON DAVID GÜNZBURG,
St. Petersburg, Russia.

A. DE HARKAVY, Ph.D.,
Chief of the Hebrew Department of the Imperial Public Library, St. Petersburg, Russia.

ZADOC KAHN,
Chief Rabbi of France; Honorary President of the Alliance Israélite Universelle; Officer of the Legion of Honor, Paris, France.

M. KAYSERLING, Ph.D.,
Rabbi, Budapest, Hungary; Corresponding Member of the Royal Academy of History, Madrid, Spain.

MORITZ LAZARUS, Ph.D.
(DECEASED),
Late Professor Emeritus of Psychology, University of Berlin; Meran, Austria.

ANATOLE LEROY-BEAULIEU,
Member of the French Institute; Professor at the Free School of Political Science, Paris, France; Author of "Israël chez les Nations."

ISRAEL LÉVI,
Professor in the Jewish Theological Seminary; Editor of "Revue des Etudes Juives," Paris, France.

EUDE LOLLI, D.D.,
Chief Rabbi of Padua; Professor of Hebrew at the University, Padua, Italy.

IMMANUEL LÖW, Ph.D.,
Chief Rabbi of Szegedin, Hungary; Author of "Die Aramäischen Pflanzennamen."

S. H. MARGULIES, Ph.D.,
Principal of the Jewish Theological Seminary; Chief Rabbi of Florence, Italy.

H. OORT, D.D.,
Professor of Hebrew Language and Archeology at the State University, Leyden, Holland.

ABBÉ PIETRO PERREAU,
Formerly Librarian of the Reale Biblioteca Palatina, Parma, Italy.

MARTIN PHILIPPSON, Ph.D.,
Formerly Professor of History at the Universities of Bonn and Brussels; President of the Deutsch-Israelitischer Gemeindebund, Berlin, Germany.

SAMUEL POZNANSKI, Ph.D.,
Rabbi in Warsaw, Russia.

E. SCHWARZFELD, LL.D.,
Secretary-General of the Jewish Colonization Association, Paris, France.

LUDWIG STEIN, Ph.D.,
Professor of Philosophy, University of Bern, Switzerland; Editor of "Archiv für Geschichte der Philosophie," etc.

HERMANN L. STRACK, Ph.D.,
Professor of Old Testament Exegesis and Semitic Languages, University of Berlin, Germany.

CHARLES TAYLOR, D.D., LL.D.,
Master of St. John's College, Cambridge, England; Editor of "Sayings of the Jewish Fathers," etc.

SYSTEMS OF TRANSLITERATION AND OF CITATION OF PROPER NAMES*

A.—Rules for the Transliteration of Hebrew and Aramaic.

1. All important names which occur in the Bible are cited as found in the authorized King James version; *e.g.*, *Moses*, not Mosheh; *Isaac*, not Yiẓḥaḳ; *Saul*, not Sha'ul or Shaül; *Solomon*, not Shelomoh, etc.

2. The spellings of names that have gained currency in English books on Jewish subjects, or that have become familiar to English readers, are generally retained; cross-references are given when topics are treated under forms transliterated according to the system tabulated below.

3. Hebrew subject-headings are transcribed according to the scheme of transliteration; cross-references are made as in the case of personal names.

4. The following system of transliteration has been used for Hebrew and Aramaic:

א *Not noted at the beginning or the end of a word; otherwise ' or by dieresis; e.g., pe'er or Meïr.*

ב *b*	ז *z*	ל *l*	פּ (*with dagesh*), *p*	שׁ *sh*
ג *g*	ח *ḥ*	מ *m*	פ (*without dagesh*), *f*	שׂ *s*
ד *d*	ט *ṭ*	נ *n*	צ *ẓ*	ת *t*
ה *h*	י *y*	ס *s*	ק *ḳ*	
ו *w*	כ *k*	ע *ʿ*	ר *r*	

NOTE: The presence of dagesh lene is not noted except in the case of פ. Dagesh forte is indicated by doubling the letter.

5. The vowels have been transcribed as follows:

◌ָ (ḳameẓ) *a*	◌ֻ *u*	◌ַ *a*	◌ֶ *e*	וֹ *o*
◌ָ (ḳameẓ ḥatuf) *o*				
◌ֵ *e*	◌ֱ *e*	◌ֳ *o*	◌ִי *i*	
◌ִ *i*	◌ְ *e*	◌ֲ *a*	וּ *u*	

The so-called "Continental" pronunciation of the English vowels is implied.

6. The Hebrew article is transcribed as *ha*, followed by a hyphen, without doubling the following letter. [Not *hak-Kohen* or *hak-Cohen*, nor *Rosh ha-shshanah.*]

B.—Rules for the Transliteration of Arabic.

1. All Arabic names and words, except such as have become familiar to English readers in other forms, as *Mohammed*, *Koran*, *mosque*, are transliterated according to the following system:

أ *See* א *above*	خ *kh*	ش *sh*	غ *gh*	ن *n*
ب *b*	د *d*	ص *ṣ*	ف *f*	ه *h*
ت *t*	ذ *dh*	ض *ḍ*	ق *ḳ*	و *w*
ث *th*	ر *r*	ط *ṭ*	ك *k*	ي *y*
ج *j*	ز *z*	ظ *ẓ*	ل *l*	
ح *ḥ*	س *s*	ع *ʿ*	م *m*	

2. Only the three vowels—a, i, u—are represented:

◌َ *a* ◌ِ *i* ◌ُ *u*

No account has been taken of the *imalah; i* has not been written *e*, nor *u* written *o*.

---

*In all other matters of orthography the spelling preferred by the STANDARD DICTIONARY has usually been followed. Typographical exigencies have rendered occasional deviations from these systems necessary.

3. The Arabic article is invariably written *al*, no account being taken of the assimilation of the *l* to the following letter; *e.g.*, *Abu al-Salt*, not *Abu-l-Salt; Nafis al-Daulah*, not *Nafis ad-Daulah.* The article is joined by a hyphen to the following word.

4. At the end of words the feminine termination is written *ah;* but when followed by a genitive, *at; e.g.*, *Risalah dhat al-Kursiyy*, but *Hi'at al-Aflak.*

5. No account is taken of the overhanging vowels which distinguish the cases; *e.g.*, *'Amr*, not *'Amru* or *'Amrun; Ya'ḳub*, not *Ya'ḳubun;* or in a title, *Kitab al-Amanat wal-I'tiḳadat.*

C.—Rules for the Transliteration of Russian.

All Russian names and words, except such as have become familiar to English readers in other forms, as *Czar*, *Alexander*, *deciatine*, *Moscow*, are transliterated according to the following system:

А а	*a*	Н н	*n*	Щ щ	*shch*
Б б	*b*	О о	*o*	Ъ ъ	mute
В в	*v*	П п	*p*	Ы ы	*y*
Г г	*h, v,* or *g*	Р р	*r*	Ь ь	half mute
Д д	*d*	С с	*s*	Ѣ ѣ	*ye*
Е е	*e* and *ye* at the beginning.	Т т	*t*	Э э	*e*
Ж ж	*zh*	У у	*u*	Ю ю	*yu*
З з	*z*	Ф ф	*f*	Я я	*ya*
И и І і	*i*	Х х	*kh*	Ѳ ѳ	*F*
К к	*k*	Ц ц	*tz*	Ѵ ѵ	*œ*
Л л	*l*	Ч ч	*ch*	Й й	*i*
М м	*m*	Ш ш	*sh*		

Rules for the Citation of Proper Names, Personal and Otherwise.

1. Whenever possible, an author is cited under his most specific name; *e.g.*, Moses Nigrin under *Nigrin;* Moses Zacuto under *Zacuto;* Moses Rieti under *Rieti;* all the Ḳimḥis (or Ḳamḥis) under *Ḳimḥi;* Israel ben Joseph Drohobiczer under *Drohobiczer.* Cross-references are freely made from any other form to the most specific one; *e.g.*, to Moses *Vidal* from Moses *Narboni;* to Solomon Nathan *Vidal* from Menahem *Meïri;* to Samuel *Kansi* from Samuel Astruc *Dascola;* to Jedaiah *Penini* from both *Bedersi* and *En Bonet;* to *John* of Avignon from Moses de *Roquemaure.*

2. When a person is not referred to as above, he is cited under his own personal name followed by his official or other title; or, where he has borne no such title, by "of" followed by the place of his birth or residence; *e.g.*, *Johanan* ha-Sandlar; *Samuel* ha-Nagid; *Judah* he-Ḥasid; *Gershom* of Metz; *Isaac* of Corbeil.

3. Names containing the words *d', de, da, di, van, von, y, of, ben, ha-, ibn** are arranged under the letter of the name following this word; *e.g.*, de Pomis under *Pomis*, de Barrios under *Barrios*, Jacob d'Illescas under *Illescas.* The order of topics is illustrated by the following examples:

Abraham of Augsburg
Abraham of Avila
Abraham ben Azriel
Abraham de Balmes
Abraham ben Baruch
Abraham of Beja
Abraham ben Benjamin Aaron
Abraham ben Benjamin Zeeb
Abraham Benveniste

---

* When Ibn has come to be a specific part of a name, as Ibn Ezra, such name is treated in its alphabetical place under "I."

Note to the Reader.

Subjects on which further information is afforded elsewhere in this work are indicated by the use of capitals and small capitals in the text; as, Abba Arika; Pumbedita; Vocalization.

"**Ẓaddiḳ** ka-Tamar," Music of 625

THE JEWISH ENCYCLOPEDIA

LEON (LEÃO): Spanish-Portuguese family having branches in Italy, Holland, Germany, England, southern France, the Orient, the West Indies, especially Jamaica, and Surinam.

1. Abraham Judah Leon: Assistant rabbi of the Spanish-Portuguese congregation in London from 1685 until his death in 1707.

BIBLIOGRAPHY: Gaster, *Hist. of Bevis Marks*, p. 40.

2. David de Isaac de Leon: Lived in Amsterdam in the eighteenth century. He published "Sermão da Boa Fama" (Amsterdam, 1767), an address in Portuguese delivered June, 1767; also some Hebrew verses in honor of his father's "Avizos Espirituaés," printed with that book.

3. Elijah de Leon: Son of **Michael Judah de Leon** (d. March 3, 1658) and nephew of Jacob Judah Leon. He was ḥakam of the benevolent society Gemilut Ḥasadim in Amsterdam and corrector for the press 1656–66. The Hebrew Bible printed by Joseph Athias in 1661 was corrected and provided with a preface by Elijah de Leon and Samuel de Caceres. Some Hebrew verses of Elijah's are given in the Spanish translation of the Psalms by his uncle Jacob Judah Leon.

BIBLIOGRAPHY: Steinschneider, *Cat. Bodl.* p. 2879 and cxxx.; Roest, *Cat. Rosenthal. Bibl.* Supplement, No. 2366; Kayserling, *Bibl. Esp.-Port.-Jud.* p. 37.

4. Isaac de Leon: Son of Eliezer ben Solomon ibn Zur; born probably in Spain; lived in Ancona; died there most likely. He was the author of "Megillat Esther"—a commentary on Moses b. Maimon's "Sefer ha-Miẓwot," written in the latter's defense against the attacks of Moses ben Naḥman (Venice, 1592; Amsterdam, 1660). He wrote also a rabbinical decision in the dispute between Solomon de Lolli and Jacob Catalano (Rome, 1546).

BIBLIOGRAPHY: Azulai, *Shem ha-Gedolim*, i. 105; Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 134; Fürst, *Bibl. Jud.* ii. 231 (who wrongly ascribes the decision to another Isaac de Leon); Zedner, *Cat. Hebr. Books Brit. Mus.* p. 383.

5. Isaac de Leon: Talmudist, and director of a Talmud school in Salonica about 1630 (Conforte, "Ḳore ha-Dorot," p. 46a).

6. Isaac de Leon: In conjunction with Samuel Athar, he published a collection of stories from the Midrashim and Haggadot (Venice, n.d.).
